[1] Plin. *nat. hist.* 16. 242 est in suburbano Tusculani agri colle, qui Corne appellatur, lucus antiqua religione Dianae sacratus a Latino (so J. Hardouin for *Latio* codd.), velut arte tonsili coma fagei nemoris. in hoc arborem eximiam aetate nostra amavit Passienus Crispus bis cos. (cp. Dessau *Inscr. Lat. sel.* no. 7061), orator, Agrippinae matrimonio et Nerone privigno clarior postea, osculari conplectique eam solitus, non modo cubare sub ea vinumque illi adfundere. vicina luco est ilex, et ipsa nobilis xxxiv pedum ambitu caudicis, decem arbores emittens singulas magnitudinis visendae silvamque sola faciens. No doubt the big beech was a beauty: Theophr. *hist. plant.* 5. 8. 3 expressly comments on the enormous size of beech-trees in the lowlands of Latium. Nevertheless it is simply inconceivable that C. Passienus Crispus, a Roman of exceptional ability and distinction, the husband first of Domitia and then of Agrippina the younger (Suet. *v. Pass. Crisp.*), should have behaved thus towards a mere tree—kissing it, embracing it, lying beneath it, pouring wine over it,—unless he in some sense identified the tree with the goddess (Frazer *Golden Bough*[3]: The Magic Art. i. 40 n. 4). Presumably he regarded himself, not only as her protector (cp. Hdt. 7. 31), but actually as her husband. This would be in strict accordance with local usage; for six or seven miles away, as the crow flies, the *rex Nemorensis* was even then playing a similar part. Diana's tree in the grove near Tusculum was, I take it, comparable with Diana's tree in the grove at Nemi. And, if Caligula posed as the priestly king of Nemi (Suet. *Calig.* 35 cited *supra* p. 147 n. 6: see also the imperial house-boats described and illustrated by R. Lanciani *New Tales of Old Rome* London 1901 p. 205 ff.), Passienus Crispus, his brother-in-law and intimate (Suet.

cult of the goddess was that on Mount Tifata some thirty furlongs north of Capua[1]; and the name *Tifata*, according to Verrius Flaccus, meant 'Woods of Evergreen Oak[2].' Another of her homes was Mount Algidus in Latium[3], where oaks and holm-oaks abounded[4]. And from Mount Algidus it is but a few miles to Nemi. That being so, we may fairly surmise that at Nemi too Diana had her favourite oaks.

In passing I may observe that this association of Diana with the oak has left its mark on the art of the Graeco-Roman age. Land-

v. Pass. Crisp.), may have done the same at Tusculum. In this connexion it must be remembered, on the one hand that Latinus Silvius, who founded Tusculum (Diod. 7. 5 (ii. 133, 30 ff. Vogel) *ap.* Euseb. *chron.* vers. Armen. (i. 287, 7 ff. Schöne)) and dedicated the beech-grove to Diana (Plin. *loc. cit.*), belonged to a dynasty of woodland kings (see the *Class. Rev.* 1904 xviii. 363 f., *Folk-Lore* 1905 xvi. 285 ff., Frazer *Golden Bough*[3]: The Magic Art ii. 178 ff., 192, 379) and would be likely enough to institute such a custom; on the other hand that Passienus Crispus hailed from Vitellia (in Suet. *v. Pass. Crisp.* read *Vitelliensis* for the meaningless *Viselliensis* codd.), an ancient Latin town, the home of the Vitellii, descendants of Faunus king of the Aborigines and the goddess Vitellia (Suet. *Vitell.* 1), and would be likely enough to revive such a custom.

[1] E. H. Bunbury in Smith *Dict. Geogr.* ii. 1207, P. Paris in Daremberg—Saglio *Dict. Ant.* ii. 155, G. Wissowa in Pauly—Wissowa *Real-Enc.* v. 326 ff., *id. Rel. Kult. Röm.*[2] pp. 247, 251.

[2] Paul. ex Fest. p. 366, 8 Müller, p. 503, 14 f. Lindsay Tifata iliceta. Romae autem Tifata Curia. Tifata etiam locus iuxta Capuam. Cp. Paul. ex Fest. p. 49, 18 Müller, p. 43, 13 Lindsay Curia Tifata (so Scaliger for *Curiati fana* codd.) a Curio dicta est, qui[a] eo loco domum habuerat, p. 131, 1 Müller, p. 117, 1 f. Lindsay Mancina Tifata appellabantur, quod Mancinus habuit insignem domum, quae publicata est eo interfecto. Paulus' information is ultimately derived from the dictionary of Verrius Flaccus (*infra* Append. N *init.*). F. Buecheler in the *Rhein. Mus.* 1884 xxxix. 421 f. connects *tifata* with the Sabine *teba*, 'hill' (Varr. *rer. rust.* 3. 1. 6), cp. R. S. Conway *The Italic Dialects* Cambridge 1897 i. 221, 358. And G. Meyer *Etymologisches Wörterbuch der albanesischen Sprache* Strassburg 1891 p. 430 *s.v.* '*timp*' and in the *Indogermanische Forschungen* 1892 i. 324 would relate *teba* to the Carian τάβα, 'rock' (Steph. Byz. *s.v.* Τάβαι). If so, all these words are probably survivals from a pre-Indo-Europaean language, cp. Walde *Lat. etym. Wörterb.*[2] p. 766 *s.v.* 'teba,' I. Thomopoulos Πελασγικά Athens 1912 pp. 212 f., 419. But Walde *op. cit.*[2] p. 778 *s.v.* 'tibulus' suggests that *tifata* is akin to *tibulus*, a variety of wild pine (Plin. *nat. hist.* 16. 39), cp. A. Ernout *Les éléments dialectaux du vocabulaire latin* Paris 1909 pp. 27, 75, 237 ('C'est donc à l'osque que le latin a emprunté le mot'). We need more light.

The woods of Mt Tifata are mentioned by Sil. It. 13. 219 Tifata umbrifero...monte.

[3] E. H. Bunbury in Smith *Dict. Geogr.* i. 103, P. Paris in Daremberg—Saglio *Dict. Ant.* ii. 154, C. Hülsen in Pauly—Wissowa *Real-Enc.* i. 1476.

[4] Hor. *od.* 3. 23. 9 f., 4. 4. 57 f., cp. *od.* 1. 21. 5 f. and Stat. *silv.* 4. 4. 16. When in 458 B.C. Roman envoys were sent to complain of a treaty broken by the Aequi, they were bidden to make their complaint to a huge oak-tree on Mt Algidus, under the shade of whose branches the Aequian commander had his quarters (Liv. 3. 25 eos Aequorum imperator, quae mandata habeant ab senatu Romano, ad quercum iubet dicere: se alia interim acturum. quercus ingens arbor praetorio imminebat, cuius umbra opaca sedes erat. tum ex legatis unus abiens 'et haec' inquit 'sacrata quercus et quidquid deorum est audiant foedus a vobis ruptum nostrisque et nunc querellis adsint et mox armis, cum deorum hominumque simul violata iura exsequemur').

scape-reliefs already described[1] twice represent an old oak growing beside a Diana-pillar, and once show its trunk spanned by an archway, which we now know to be a *ianus*, the very embodiment of Diana's consort Dianus[2].

(χ) Artemis and the Oak.

Similarly on Greek soil the earth-goddess, who under various names fulfilled the same functions as Diana, was frequently connected with the oak. The Amazons, when they founded the cult in the Artemision at Ephesos, set up the effigy of their goddess 'beneath an oak-tree of noble girth[3]'; and in Roman times the image of Artemis *Ephesia* wore a garland of flowers with a necklace of acorns hanging below it (figs. 307, 315)[4]. Again, Neleus, son of Kodros,

[1] *Supra* p. 150 n. 3 figs. 91, 92.

[2] *Supra* p. 354 ff. Cp. a fragmentary relief at Copenhagen (L. Müller *Musée-Thorvaldsen* Troisième partie. Antiquités. Section i et ii. Copenhague 1847 p. 140 f. no. 81, Gerhard *Ant. Bildw.* p. 359 pl. 111, 4, T. Schreiber *Die hellenistischen Reliefbilder* Leipzig 1890 pl. 69, *Einzelaufnahmen* no. 1480 Mitte with Text v. 113 by P. Arndt), on which a Diana-pillar, with *lîknon*, *phallós*, and *lagobólon*, is seen beneath an arched tripod (?) or round altar (?) bearing a goat's-head (?). Height 0·15m.

[3] Kallim. *h. Artem.* 237 ff. σοὶ καὶ Ἀμαζονίδες πολέμου ἐπιθυμήτειραι | ἓν ποτε (the older codd. read ἐν κοτε, whence O. Schneider cj. ἐγκυτὶ—a thoroughly bad emendation) παραλίῃ Ἐφέσῳ βρέτας ἱδρύσαντο | φηγῷ ὑπ' εὐπρέμνῳ (so A. Hecker, followed by A. Meineke and O. Schneider, for φηγῷ ὑπὸ πρέμνῳ codd. U. von Wilamowitz-Moellendorff still retains in his text the impossible reading of the manuscripts)· τέλεσεν δέ τοι ἱερὸν Ἵππώ· | κ.τ.λ. With this cp. Dionys. *per.* 827 ff. παραλίην Ἔφεσον, μεγάλην πόλιν Ἰοχεαίρης, | ἔνθα θεῇ ποτε νηὸν Ἀμαζονίδες τετύκοντο | πρέμνῳ ἔνι πτελέης, περιώσιον ἀνδράσι θαῦμα. The oak-tree is here changed into an elm, perhaps because the original oak had long since decayed, whereas in later days the city (presumably one quarter of it) was called after a conspicuous elm-tree (Plin. *nat. hist.* 5. 115 Ephesus...multis antea expetita nominibus...vocata...et Ptelea, Steph. Byz. *s.v.* Ἔφεσος· ...ἐκαλεῖτο δὲ...καὶ Πτελέα. ὁ πολίτης Πτελεαῖος...καὶ Πτελεάτης ὁ πολίτης).

The scientific excavation of the Artemision, commenced by Mr Hogarth in 1904, has made it probable that the first sanctuary on the site was in fact a small tree-shrine (D. G. Hogarth *Excavations at Ephesus* London 1908 p. 72 'The tree-shrine may be held to be represented by our Basis *A* with its altar or dependent platform on the west, enclosed within a paved *temenos*; and the building erected over it, by the restoration *B*, which amplified these central structures and united them in one platform, in a manner hardly to be accounted for except on the supposition that a considerable superstructure was to be erected on the new platform' with p. 52 ff. fig. 13 ff. and Atlas pl. 1 f. See also W. R. Lethaby 'The earlier temple of Artemis at Ephesus' in the *Journ. Hell. Stud.* 1917 xxxvii. 15 fig. 15). It is even possible that the isolated column, which in the sixth-century building (D. G. Hogarth *op. cit.* p. 283 f. Atlas pl. 12) and again in the fourth-century building (see Plin. *nat. hist.* 36. 95) stood immediately behind the cult-image, was an architectural substitute for the sacred tree. A column in such a position might well be differentiated from the rest (cp. the one Corinthian column in the temple of Apollon *Epikoúrios* at Bassai: Durm *Baukunst d. Gr.*[3] p. 270 fig. 240 *b*, p. 346 fig. 331, p. 349 fig. 335, a, b, c, p. 429 fig. 391) and adorned with carving rightly or wrongly attributed to Skopas (Plin. *loc. cit.*, where the text *una a Scopa* has been needlessly altered by J. J. Winckelmann and K. L. von Urlichs to *uno scapo*, by A. S. Murray to *imo scapo*).

[4] Literary and inscriptional evidence concerning the cult of Artemis at Ephesos is

printed *in extenso* by O. Benndorf in the *Forschungen in Ephesos* Wien 1906 i. 237—274 (an exhaustive series of 435 extracts got together by E. Guhl for his *Ephesiaca* Berlin 1843) and 278—282 (83 inscriptions). A convenient summary and discussion of the *data* is contributed by O. Jessen to Pauly—Wissowa *Real-Enc.* v. 2753—2771. I must content myself with two or three typical illustrations. Among the statuettes etc. representing Artemis *Ephesia* (*ib.* p. 2764 f. The best monograph is still C. Menetreius *Symbolica Dianæ Ephesiæ statua*[2] Romae 1688, bound up with L. Holstenius *Epistola ad Franciscum Cardinalem Barberinum de fulcris seu verubus Dianæ Ephesiæ simulacro appositis* Romae 1688 and G. P. Bellori *Notæ in numismata tum Ephesia, tum aliarum urbium apibus insignita*) none is more remarkable than a small figure in the Capitoline Museum, described as follows by Stuart Jones *Cat. Sculpt. Mus. Capit. Rome* p. 157 ff. Sala delle Colombe no. 49 pl. 38: 'H. ·86 m. to top of plinth, plinth ·246 m. Marble: head, hands, and feet of *bigio morato*, eyes of enamel; the rest of Luna. Restored: the crown has been broken off and refixed; one column on the l. and the whole row on the r. of the temple at the top; semicircular veil with three foreparts of griffins on l. of head, and the head of the top griffin on the r. (possibly the whole piece of veil on this side); forepart of lion on r. forearm; parts of breasts; little finger of r. hand and index finger of l.; heads of three stags in the top row on skirt. (The figure has been broken through below them.) Other small fragments. Amelung adds, the double tower, face, hands and feet.

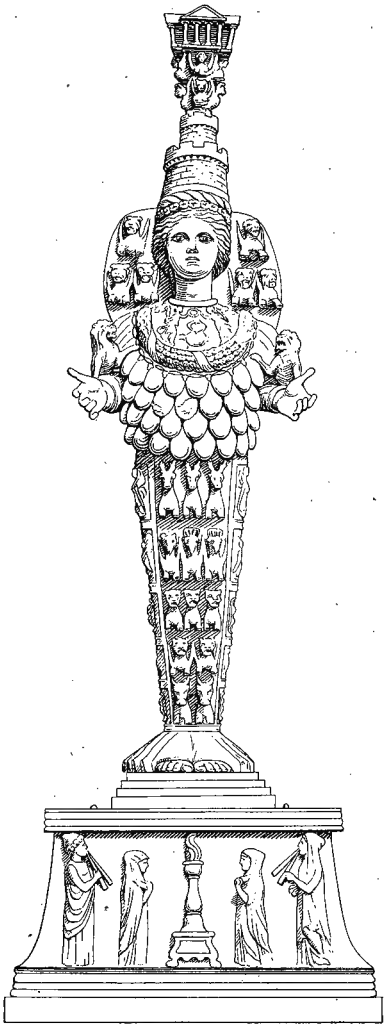

Fig. 307.

The relief on the base has been much broken. Restored: all the lower part of the base including the whole of the figure on the l. of

the thymiaterion, most of the thymiaterion, part of the figure on the r. of it, and the lower third of the figure on the extreme l.; the lower l. angle.

This statuette of the Ephesian Artemis has the usual hieratic attitude, with both feet together, the arms held out parallel, and the face looking straight forward. On her head is a lofty crown composed of several tiers, with a temple at the summit having porticoes on three sides. Below are circles of the foreparts (1) of sphinxes, and (2) of griffins; the next tier consists of a round tower with masonry and battlements indicated; and the whole rests on a pad formed of a twisted taenia with rosettes. Behind the head, on each side, is a semicircular disk with the foreparts of three griffins.

The upper part of the chest is adorned with a garland of flowers, encircled by a twisted taenia, and having acorns depending from it; it hangs from the shoulders, and encloses a relief of two Victories, with palms in their hands, holding up a single wreath, beneath which is a crab. Above each head is a flower. Parallel with the garland, and below it, hangs a fillet. Under this are four rows of breasts.

On each forearm, which is covered by a long sleeve, sits a small lion.

Below the breasts the body is enclosed in a kind of sheath gradually diminishing in size and reaching nearly to the feet; below it the folds of a long thin chiton spread fanlike above the feet. The sheath is divided horizontally, on each side and in front, into five compartments. Those each side bear reliefs of a Scylla, a bee, a rosette or flower, a bee, and a rosette again. Those in front are decorated with rows of the foreparts of animals: viz. (1) three stags, (2) three winged eagle-headed griffins, (3) three lion-headed griffins, (4) two winged lion-headed griffins, (5) two oxen.

The base on which the figure stands, and which probably does not belong, is surmounted by a plinth of four steps. The base grows larger in size at the lower edge and the sides are concave. The front bears a relief showing two female figures on each side approaching a lighted thymiaterion from opposite directions. The two outer figures play double flutes and wear a long chiton and himation, which in the right-hand figure goes over the head; the inner figure on the right, which is antique, is smaller, veiled, and draped, and has a fringe of tight curls; the figure probably carried some object (Amelung suggests a distaff), but the hand is restored. There is a similar base in the Vatican [Amelung *Sculpt. Vatic.* ii. 626 f. no. 411 a pl. 52].'

Fig. 308.

See further C. Menetreius *op. cit.*[2] p. 10 pl. on left, Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 i. 97 pl. 46 (after Menetreius), P. Righetti *Descrizione del Campidoglio* Roma 1833 i. 193 pl. 192 (inexact), Gerhard *Ant. Bildw.* p. 396 pl. 307, 26 (bust only), Reinach *Rép. Stat.* ii. 321 no. 4 (text erroneous). W. Amelung in the *Jahresh. d. oest. arch. Inst.* 1909 xii. 173 ff. figs. 83—85 notes that on the upper surface of the base, to right and left of the stepped plinth, there were originally two rectangular slabs supporting side-attributes. He also insists that the double turreted crown is a

mistaken modern addition. And he cleverly confirms the presence of the attributes and the absence of the turrets by citing one of Raphael's painted pilasters in the Gallery of the Vatican (G. Ottaviani [*Le Loggie di Raffaello nel Vaticano* Roma 176—] no. vi C. Savorelli pict., P. Camporesi delin.=my fig. 308), where by a curious coincidence the great artist has made an oak-tree with acorns to emerge from behind the back of the Ephesian goddess. Numismatic evidence proves that the missing attributes were two stags, and makes it likely that the hands of the goddess were tethered by means of fillets (Hesych. *s.v.* κληῖδες·...καὶ παρὰ Ἐφεσίοις τῆς θεοῦ τὰ στέμματα. The notion that these lateral appendages were solid supports called *verua* rests on Min. Fel. *Oct.* 22. 5 *et Ephesia mammis multis et veribus* (so cod. Par. *verubus* ed. princ. Romana ann. 1543) *exstructa*, where however F. Ursinus, followed by many critics including C. Halm, cj. *uberibus*. J. J. Scaliger's cj. *tuberibus* has met with less acceptance)—hardly bonds to prevent her from quitting her temple (M. Collignon *ap.* F. Cumont in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1915 p. 273 n. 4), but rather ties to bring the very ground into magic connexion with her hands (cp. Ail. *var. hist.* 3. 26 θώμιγγας, Plout. *v. Sol.* 12 κρόκην κλωστήν, Loukian. *Herc.* 3 σειραὶ λεπταὶ χρυσοῦ καὶ ἠλέκτρου εἰργασμέναι, etc.). The fillets are most clearly shown on silver coins struck at Ephesos by Claudius and Agrippina (Morell. *Thes. Num. Imp. Rom.* ii. 17 pl. 4, 23 f., Stevenson—Smith—Madden *Dict. Rom. Coins* p. 324 f. fig., P. Gardner *Types of Gk. Coins* p. 78 pl. 15, 4=my fig. 309,

Fig. 309.

Fig. 310.

D. G. Hogarth *Excavations at Ephesus* London 1908 p. 332 pl. 52, 4, Cohen *Monn. emp. rom.*[2] i. 273 no. 1 fig.) or on coppers of Kadoi in Phrygia issued under the name of Domitia (L. Holstenius *op. cit.* p. 10 fig., *Brit. Mus. Cat. Coins* Phrygia p. 120 pl. 15, 2 =my fig. 310). And the general effect of the effigy is to be seen from a bronze coin of Apameia struck by Gordian, on which Artemis *Ephesia*, with a small tetrastyle temple on her head, fillets stretched from her hands to the ground, and a stag on either side

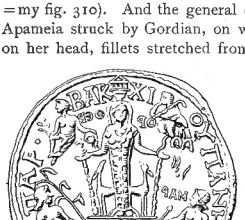

Fig. 311.

Fig. 312.

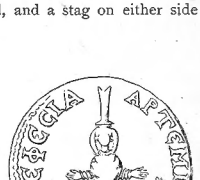

Fig. 313.

of her, appears in the midst of four river-gods Maiandros (ΜΑΙ), Marsyas (ϘΑΜ), Therma(s? -ios?) (ϘΘ), and Orgas (ϘΟ) (Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1897 ii. 398 f., 402 n. 2, 432 pl. 1, 1=my fig. 311, Head *Hist. num.*[2] p. 667 fig. 314, *Brit. Mus. Cat. Coins* Phrygia p. xxxix f.), or from a smaller bronze coin of Neapolis in Samaria, struck by Faustina Iunior, on which the goddess has a head-dress

on leading a band of colonists from Athens to Miletos, was bidden by an oracle to make an image of Artemis 'from very fruitful wood.' He started during a festival of Artemis *Chitóne*, discovered an oak with rich and varied fruitage hung upon it, made therefrom an image

of three plumes [?a Sphinx, cp. fig. 307. A.B.C.] surmounted by a tetrastyle temple, pectoral decoration of two Victories holding a wreath, large garland, panelled sheath, stags on either side, and fillets treated as dove-sceptres (G. F. Hill *Some Palestinian Cults in the Graeco-Roman Age* London 1912 p. 6 f. fig. 9 (extr. from the *Proc. Brit. Acad.* v), *Brit. Mus. Cat. Coins* Palestine pp. xxxi, 54 pl. 6, 5 = my fig. 312).

A figure so full of complex symbolism implies the growth of ages. The temple on top may be safely regarded as a late and perhaps Egyptising addition: cp. the small *naós* on the head of Neḥemāuit (Lanzone *Dizion. di Mitol. Egiz.* p. 435 f. pl. 174, 1—3.

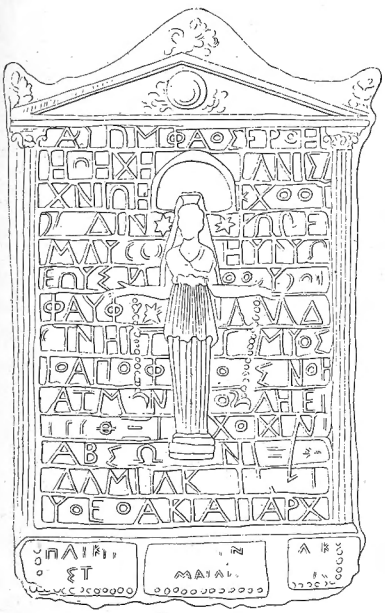

Fig. 314.

Fig. 315.

E. A. Wallis Budge *The Gods of the Egyptians* London 1904 i. 421 f. pl. 14 calls it 'the sistrum'!) or of Hathor (Lanzone *op. cit.* p. 892 pl. 317, 2 f. E. A. Wallis Budge *op. cit.* i. 430 pl. 19, bound up as pl. 20, calls it 'a pylon')—a possibility (suggested independently by Mr H. R. Hall *ap.* G. F. Hill *op. cit.* p. 7 n. 1 (= *Proc. Brit. Acad.* v. 417 n. 1)) which should have been considered by W. Amelung *loc. cit.* The attachment of the fillets to the ground was also an afterthought. Sometimes they are represented as swinging clear: *e.g.* on a bronze coin of Ephesos struck by Domitian (T. Schreiber in the *Arch. Zeit.* 1883 xli. 284 fig. 4 = my fig. 313). Indeed, this manner of representation can be traced

of the goddess, and so settled at Miletos[1]. We need not attach

back to the first or second century B.C.; for it occurs on an Ephesian amulet of terra cotta in the Museum at Syracuse (L. Stephani 'Ueber ein Ephesisches Amulett' in the *Mélanges gréco-romains tirés du Bulletin historico-philologique de l'Académie Impériale des Sciences de St.-Pétersbourg* St.-Pétersbourg 1855 i. 1—5 with pl. = my fig. 314. The inscription, plausibly described by Stephani as 'Ἐφέσια γράμματα (collected by C. Wessely *Ephesia Grammata* aus Papyrusrollen, Inschriften, Gemmen etc. Wien 1886 pp. 1—38 and by R. Heim 'Incantamenta magica graeca latina' in the *Jahrb. f. class. Philol.* Suppl. 1893 xix. 525 ff. See also E. Kuhnert in Pauly—Wissowa *Real-Enc.* v. 2771 ff., Lübker *Reallex.*[8] p. 332), is in part deciphered by C. F. Graefe, who (*ap.* Stephani *loc. cit.* p. 4 n.*) would read the first words as ΑΡΤΕΜ ΦΑΟΣ ΕΡΟΝ, *i.e.* "Αρτεμι, φάος ἱερόν, and the last as ἀπαρχή. The original, of which this is a blundered copy, appears to have been a hexameter invocation beginning with "Αρτεμι, φῶς ἱερόν, and ending with some such phrase as Δαμναμενῆι δέχου θεοαλκέ' (?) ἀπαρχήν). Again, the breasts of the goddess were multiplied at some date prior to the period 159—133 B.C. (B. V. Head *On the chronological sequence of the coins of Ephesus* London 1880 p. 63 pl. 4, 11, *Brit. Mus. Cat. Coins* Ionia p. 63 no. 144, D. G. Hogarth *op. cit.* p. 323) to emphasise her nutrient motherhood (cp. *Folk-Lore* 1904 xv. 282). I cannot, however, agree with Mr D. G. Hogarth (*op. cit.* p. 323 ff.) that the whole type current in Roman times was descended from that of the πότνια θηρῶν, whose curled wings became successively heart-shaped, piriform, oval, circular, and whose lions, degraded into meaningless lines, were finally duplicated as attendant stags.

The cult-statue at Ephesos, attributed to Endoios (*c.* 550 B.C.), was said to be of ebony or, according to one witness, of vine-wood (Plin. *nat. hist.* 16. 213 de simulacro ipso deae ambigitur. ceteri ex hebeno esse tradunt, Mucianus iii cos. ex iis, qui proxime viso eo scripsere, vitigineum et numquam mutatum septies restituto templo, hanc materiam elegisse Endoeon, etc.). But the original Amazonian image, erected φηγῷ ὑπ' εὐπρέμνῳ (*supra* p. 405 n. 3), was probably itself made of oak, which would blacken as the centuries passed till it became indistinguishable from ebony. On some statuettes of the type known to the Greeks as πολύμαστος and to the Romans as *multimammia* (Hieron. *in* Paul. *ad Ephes.* prolog. (xxvi. 441 Migne)) the necklace of acorns attains considerable importance (*e.g.* C. Menetreius *op. cit.*[2] p. 10 pl. on right = my fig. 315 'Apud March. Vinc. Iustinianum'). It is even possible that the pendent acorns first suggested the pendent breasts.

[1] Schol. Kallim. *h. Zeus* 77 Νηλεὺς ὁ Κόδρου ἀποικίαν θέμενος ἀπὸ Ἀθηνῶν ἔλαβε χρησμὸν ἐγεῖραι ξόανον τῇ Ἀρτέμιδι ἀπὸ παγκάρπων ξύλων. καὶ δή ποτε ἑορτῆς τελουμένης τῇ Ἀρτέμιδι ἐν τῇ Χιτώνῃ (ἔστι δὲ δῆμος Ἀττικῆς) ἀπελθὼν εὗρε δρῦν πάμπολυν καὶ διάφορον ἔχουσαν ἠρτημένον (ἠρτημένην cod. M. A. Meineke cj. ἀπηρτημένον) καρπόν. καὶ ἐκ τούτου (A. Meineke cj. ταύτης) ἐποίησεν ἄγαλμα τῇ θεᾷ, καὶ οὕτω μετῴκησεν (μετῴκισεν cod. E., followed by O. Schneider) ἐν Μιλήτῳ. ἀπὸ τοῦ δήμου οὖν ἔσχε τὴν ὁρμασίαν ἡ Ἄρτεμις. ἢ ὅτι τικτομένων τῶν βρεφῶν ἀνετίθεσαν τὰ ἱμάτια τῇ Ἀρτέμιδι. The existence of a deme Chitone is very questionable (Welcker *Gr. Götterl.* i. 575 n. 27, A. Milchhöfer in Pauly—Wissowa *Real-Enc.* iii. 2335). But Artemis bore the title Χιτώνη (Kallim. *h. Zeus* 77 f., Steph. Byz. *s.v.* Χιτώνη, cp. *s.v.* Ἑρμιών), or Χιτωνία (Parmenon of Byzantion and Epicharmos *frag.* 127 Kaibel *ap.* Steph. Byz. *s.v.* Χιτώνη, cp. Hesych. *s.v.* Κιθωνέα), probably at Athens (*Corp. inscr. Att.* ii. 2 no. 778 *A*, 16 κιτωνεῖα with U. Koehler's n. *ad loc.*), certainly at Miletos (Kallim. *h. Artem.* 225 f.) and Syracuse (Athen. 629 E): see further T. Schreiber in Roscher *Lex. Myth.* i. 572 f., K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 1381 f., 1401 f., O. Jessen *ib.* iii. 2335, Farnell *Cults of Gk. States* ii. 444, 568, Nilsson *Gr. Feste* p. 242 f., Gruppe *Gr. Myth. Rel.* pp. 369 n. 2, 1272 n. 7, 1295 n. 1. The epithet Χιτώνη, Χιτωνία, popularly derived from χιτών, was in all likelihood a pre-Greek appellative. I incline to suspect that the word thus Grecised meant originally 'the Hittite' (cp. the forms *Khatti*, *Kheta*, *Heth*, etc.: H. R. Hall *The Ancient History of the Near East* London 1913 p. 327). Be that as it may, the scholiast on Kallimachos does not definitely state whether the oak hung with fruitage was growing

much weight to Ovid's description of the Colchian Diana as a golden three-faced goddess, whose marble temple had 'a grove black with pitch-pines and leaves of the evergreen oak[1].' But in Thrace Artemis was certainly conceived as a vegetation-deity. Tetradrachms of Abdera, struck *c.* 400—390 B.C., show her standing in profile with a stag at her side, a bow and arrow in her left hand, and a wreath (fig. 316)[2] or branch[3] in her right, or else facing

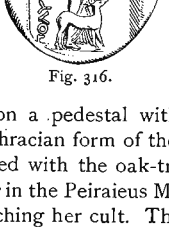

Fig. 316.

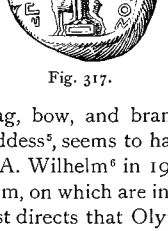

Fig. 317.

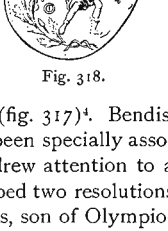

Fig. 318.

us on a pedestal with stag, bow, and branch (fig. 317)[4]. Bendis, a Thracian form of the goddess[5], seems to have been specially associated with the oak-tree. A. Wilhelm[6] in 1902 drew attention to a *stéle* in the Peiraieus Museum, on which are inscribed two resolutions touching her cult. The first directs that Olympos, son of Olympiodoros, for his official services to her sanctuary and *orgeônes* be

in Attike or in Ionia. Perhaps we may assume that it marked the site of the new settlement. If so, the foundation-legend of Miletos resembled that of Ephesos (*supra* p. 405).

[6] A. Wilhelm in the *Jahresh. d. oest. arch. Inst.* 1902 v. 133 (publication by J. Dragatsis promised).

In an inscription from Thessalonike a priestess of Πρινοφόρος, the 'Bearer of the Evergreen Oak,' who speaks of herself as *θύσα* and *εὐεία*, leaves certain vineyards to her *θίασος*, the *πρινοφόροι*: if the conditions of the bequest are not fulfilled, the property is to go to another *θίασος*, that of the *δροιοφόροι* or 'oak-bearers' (P. Perdrizet in the *Bull. Corr. Hell.* 1900 xxiv. 321 ff. *Β lέρεια θύσα | εὐεία Πρινο|φόρου κατα|λίπω εἰς μνί|ας χάριν αἰω|νίας ἀνπέλων | πλέθρα δύω | σὺν τῆς τάφροις | ὅπως ἀποφ[έρω]νται αἰμοὶ | – – and C καὶ οἱ μύστε | μικρὸς μέ|γας ἕκαστος | στέφανον ῥόδινον. ὁ δὲ μὴ ἐ|νένκας μὴ μετε|χέτω μου τῆς | δωρεᾶς. αἰὰν | δὲ μὴ ποιήσω|σιν, εἶνε αὐτὰ | τοῦ δροιοφό|ρων θειάσου ἐ[π]ὶ τ]οῖς αὐτοῖς.* Perdrizet adds: 'Pour le chêne-vert, c'est un arbre fort répandu dans la Macédoine orientale; le Pangée lui doit son nom actuel (*Pournar-dag*).' See further the *Class. Rev.* 1904 xviii. 82 n. 1, where I have cited the copper coins of Thessalonike with a wreath of oak-leaves enclosing the word ΘΕΣΣΑΛΟΝΙΚΕΩΝ or ΘΕCCΑΛΟΝΙΚΕΩΝ (*Brit. Mus. Cat. Coins* Macedonia, Etc. pp. 108, 113).

honoured with a wreath of oak[1]. The second, proposed by Sosias, son of Hippokrates, on Skirophorion 8 in the archonship of Lykeas, ordains that Eukleides, son of Antimachos, for his services as secretary receive the oak-wreath. Wilhelm infers that this was the national wreath of the goddess. Was it accident or design that combined the obverse Artemis with the reverse oak-wreath on the shield-like tetradrachms issued in Makedonia from 158 to 149 B.C.[2]? A silver coin of the Acarnanian League, referable to the year 192—191 B.C., shows a torch-bearing Artemis in a wreath of oak (fig. 318)[3]. And literary allusions tell the same tale. An Orphic hymn to Artemis invokes her as 'haunting the oak-woods of the mountains' and again as 'goddess of oak-woods[4].' Aristophanes similarly describes her as 'the Maid that ranges the oak-clad hills[5].' And Statius not only makes Atalante dedicate a choice oak to her in Arkadia[6], but also speaks of her effigy as carved on 'pitch-pine and cedar and every oak-tree' of her grove near Thebes[7].

The goddess was perhaps even identified with her own tree. The Saronic Gulf, according to Pliny, was formerly fringed with forests of oak and drew its name from the fact[8]. On its shore, near

[2] Cp. Demeter Χλόη, Dionysos Βότρυς, Dionysos Κισσός. But the direct identification of deity with plant-form in a cult-title was rare. Overbeck *Gr. Kunstmyth.* Zeus p. 4 rashly assumes a Zeus Φηγός on the strength of Steph. Byz. *s.v.* Δωδώνη·...καὶ τὴν αἰτιατικὴν φησιν Εὐφορίων Δωδῶνα ἐν Ἀνίῳ· 'ἴκομεν ἐς Δωδῶνα Διὸς φηγοῖο προφῆτιν.'

[3] Paus. 2. 30. 7 ἔλαφον διώκοντα (the words ὑπὸ τῶν κυμάτων κατακλυζόμενον imply a derivation of Σάρων from σαρόω, cp. Lyk. *Al.* 389 with Tzetz. *ad loc.*=*et. mag.* p. 708, 56 ff.), schol. Eur. *Hipp.* 1200 διώκων ἔλαφον. We need not with S. Wide (*De sacris Troezeniorum, Hermionensium, Epidauriorum Commentatio academica* Upsaliae 1888 p. 26 f., cp. *id. Lakon. Kulte* p. 125 n. 3 and in the *Festschrift für Otto Benndorf* Wien 1898 p. 14 ff.) and M. P. Nilsson (*Gr. Feste* p. 226 f.) assume that the doe was Artemis herself in animal shape, still less with O. Keller (*Thiere des classischen Alterthums in culturgeschichtlicher Beziehung* Innsbruck 1887 p. 97, cp. *id. Die antike Tierwelt* Leipzig 1909 i. 277) take it to be a symbol of the starry midnight sky. After all, ordinary deer can swim well and take readily to the water (see *e.g.* R. Lydekker *The Royal Natural History* London 1894 ii. 347, 354, *id. Wild Life of the World* London s.a. i. 28). There is a good parallel in Paus. 8. 22. 9.

[4] Euphorion *ap.* schol. Dionys. *per.* 420 (cp. *et. mag.* p. 708, 51 ff.) and Eustath. *in* Dionys. *per.* 420 ἐπιδιώκων σῦν. This too is a possible occurrence (R. Lydekker *Wild Life of the World* London s.a. i. 34).

[5] Paus. 2. 30. 7.

[6] So at least I have argued in the *Class. Rev.* 1904 xviii. 370, cp. O. Höfer in Roscher *Lex. Myth.* iv. 389.

[7] Artemis Σαρωνίς (Paus. 2. 30. 7) was also called Σαρωνία at Troizen (Paus. 2. 32. 10, cp. Achaios *Theseus frag.* 18 Nauck[2] *ap.* Hesych. *s.v.* Σαρωνία· Ἄρτεμις· Ἀχαιὸς Θησεῖ· ἀπὸ τοῦ ἐν Τροιζῆνι Σαρωνικοῦ κόλπου=Phot. *lex. s.v.* Σαρωνία) and Epidauros (P. Kabbadias *Fouilles d'Épidaure* Athènes 1893 i. 51 f. no. 85=*Inscr. Gr. Pelop.* i no. 1083 a *stèle* of *s.* iii (?) B.C. Ἀριστείδας Ἀριστοκράτευς | δὶς πυροφορήσας | τ(ῶ)ι Ἀσκλαπιῶι | Ἀρτέμι|τι Σαρω|νίαι | ἀνέθηκε, *Fouilles d'Épidaure* i. 57 no. 128=*Inscr. Gr. Pelop.* i no. 1198 a rectangular block inscribed in archaistic lettering of *s.* iv A.D. or later Ἀρτέ‖μιτος | Σαρωνίας with a numeral ξβ′ below and a circle, perhaps meant for a wreath, in the middle of the name Ἀρτέμιτος: on this symbol see further C. Blinkenberg in the *Ath. Mitth.* 1899 xxiv. 381, 383 and M. Fränkel in the *Inscr. Gr. Pelop.* i. 187, *infra* Append. L *init.*). Her festival the Σαρώνια (Paus. 2. 32. 10) is discussed by Nilsson *Gr. Feste* p. 226 f.

relationship as Virbius to Diana *Nemorensis*[1]. Unfortunately, little or nothing is known about the early kings of Troizen[2]. It is, however, noteworthy that the later Troezenian hero Hippolytos to some extent repeated the career of Saron. He too was a hunter, was intimate with Artemis, had the *entrée* of her *ábaton*[3], and died a violent death on the margin of the sea. He is not indeed linked by

The existence of the alternative title Σαρωνία at first sight tells against my interpretation of Σαρωνίς; for Σαρωνίς and Σαρωνία may both be derivatives of Σάρων, a place-name (Steph. Byz. *s.v.* Σάρων· *τόπος* Τροιζῆνος) or river-name (Eustath. *in* Dionys. *per.* 420 ἡ ἀπὸ Σάρωνος ποταμοῦ Τροιζῆνος, whence L. Holstein cj. ποταμός for *τόπος* in Steph. Byz. *loc. cit.*). But these names themselves in all probability connoted oaks, cp. Paus. 8. 23. 8 *ἐπὶ δρυμὸν ἀφίξῃ Σόρωνα* (C. Bursian *Geographie von Griechenland* Leipzig 1868—1872 ii. 263 n. 2 'Σόρων ist wahrscheinlich arkadische Form für Σάρων,' L. Grasberger *Studien zu den griechischen Ortsnamen* Würzburg 1888 p. 259), so that on this showing Σαρωνίς, Σαρωνία would be 'She of the Oak-land,' 'She of the Oak-river.'

There is yet another possibility. Starting from Hesych. *s.v.* σαρῶνες· *τὰ τῶν θηρατῶν λινά* W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 ii. 1349 render Σάρων 'Netzold, Netze'—a view adopted by Preller—Robert *Gr. Myth.* i. 613, Gruppe *Gr. Myth. Rel.* p. 192 (but see *ib.* p. 1281 n. 4), Nilsson *Gr. Feste* p. 227, O. Höfer in Roscher *Lex. Myth.* iv. 388 (but see *ib.* p. 389). Artemis Σαρωνίς, Σαρωνία would then be a kind of Δίκτυννα. But it is far from certain that Δίκτυννα was originally connected with *δίκτυον* (*supra* i. 541 n. 6); and the Hesychian gloss may rest on a confusion (cp. Hesych. *s.v.* σάρδονες· *ἐν κυνηγετικῷ μέρη τινὰ δικτύων δηλοῦνται.* The reference is to Xen. *cyneg.* 6. 9. Hence L. Dindorf restored. σαρδόνες to Hesych. and σαρδόνων to Xen. In Poll. 5. 31 G. Jungermann notes the manuscript reading σαρδῶνες for σαρδόνες. A. Fick in the *Gött. gel. Anz.* 1894 p. 245 relates σαρδών to *σέσηρα*; but see Boisacq *Dict. étym. de la Langue Gr.* p. 853).

[1] Saron, like Virbius (*supra* p. 393 f.), came to be deemed an aquatic divinity (Aristeid. *or.* 46. 208 (ii. 274 Dindorf) οὐδ' ἵνα τὸν πάντα χρόνον τὴν θάλατταν οἰκῶσιν, ὥσπερ τὸν Γλαῦκόν φασι τὸν Ἀνθηδόνιον, ἢ τὸν Σάρωνα τὸν ἐπώνυμον τοῦ πελάγους with schol. Aristeid. p. 639, 1 ff. Dindorf *κατὰ κοινοῦ τὸ δαίμονά φησι γίνεσθαι ναυτικώτατον. κ.τ.λ.*, Apostol. 15. 34 Σάρωνος ναυτικώτερος· οὗτος ὁ Σάρων δαίμων ἦν ναυτικώτατος. κ.τ.λ.), being worshipped on the western side of the Bosporos in the bay called Bathykólpos, the modern *Boyukdere* (Dionys. Byz. *per Bosporum navigatio* frag. 71 versionis Gillianae (p. 26 Wescher) 'Fluvius in sinum exit, cui idem quod sinui nomen est. Hic exsistit *Saronis* herois Megarici ara, et jactus piscium,' etc.), and presumably also at Megara (F. Pfister *Die mythische Königsliste von Megara und ihr Verhältnis zum Kult und zur topographischen Bezeichnung* Heidelberg 1907 p. 41 = *id. Der Reliquienkult im Altertum* Giessen 1909 i. 41). On him see further the excellent article of O. Höfer in Roscher *Lex. Myth.* iv. 387—389.

[2] The *locus classicus* is Paus. 2. 30. 5—8, where we are told that the succession was (1) Ὦρος, (2) Ἄλθηπος, son of Poseidon by Λητὶς daughter of Ὦρος, (3) Σάρων, (4) after an interval of forgotten names Τπέρης and Ἄνθας, sons of Poseidon by Alkyone daughter of Atlas, (5) Ἀέτιος, son of Ἄνθας, in whose reign Troizen and Pittheus, the sons of Pelops, entered the country. F. Pfister *Der Reliquienkult im Altertum* Giessen 1909 i. 50 ff. ('Die mythische Königsliste von Troizen') contends that the names Horos (*sic*), Leïs, Althepos, Anthas, Hyperes all refer to the fertility of the Troezenian land. Here it is *ad rem* to observe that Anthas is comparable with Anthos of Arkadia, whose descendants hung their clothes on an oak-tree before swimming across a pool to become were-wolves (*supra* i. 71 ff.), and that the Arcadian Anthos was perhaps, like Anthos thé son of Autonoos and Hippodameia, destroyed by horses—a fate which would connect him with Hippolytos (*supra* i.-75).

[3] Eur. *Hipp.* 70 ff.

legend with a sacred oak. But it is possible that here, as elsewhere[1], the oak had given place to the olive. In Pausanias' time a certain

Fig. 319.

introduces the fatal trunk into the death-scene. The tree thus connected with Hippolytos by literature and art very possibly presupposes the sacred oak of Artemis. In any case Hippolytos and Artemis *Saronis* must have borne an obvious resemblance to Virbius and Diana *Nemorensis*; for Virgil and later writers told how Hippolytos, restored by Asklepios at Artemis' request, lived again as Virbius in Diana's grove at Nemi[1]. His tragic death and triumphant resurrection made him a favourite theme alike on Greek and on Roman *sarcophagi*[2] (fig. 323)[3].

(ψ) Diana's tree at Nemi.

It is clear, then, that Diana in Italy and Artemis in Greece were often conceived as oak-goddesses. But have we any special reason to think that Diana's tree at Nemi was an oak? Sir James Frazer, as is well known, has conjectured that such was the case and has immortalised his opinion in that amazing monument of helpful research, *The Golden Bough*[4]. Nevertheless, with regard to this particular point, his argument admittedly rests on probabilities, not proofs[5],

Kunstmyth. Apollon pp. 327 no. 57, 330 Atlas pl. 22, 3 (Apollon only), J. H. Huddilston *Greek Tragedy in the light of Vase Paintings* London 1898 pp. 108—112 fig. 15. My fig. 322 is after Kalkmann *loc. cit.*

[1] *Supra* p. 399 n. 5. See also S. Eitrem in Pauly—Wissowa *Real-Enc.* viii. 1866.

[2] Robert *Sark.-Relfs* iii. 169—219 pls. 44—56 and figs. in text.

[3] In the death of Hippolytos as carved on one of the smaller sides of a fine Greek *sarcophagus* at the Petrograd Hermitage (H. Brunn in the *Ann. d. Inst.* 1857 xxix. 36 ff., *Mon. d. Inst.* vi pl. 2 = my fig. 323, Robert *op. cit.* iii. 182 ff. pl. 47—48 fig. 154 *a*) the sculptor has apparently adapted the type of Phaethon's overthrow (Robert *op. cit.* iii. 170). He adds a background etc. of oaks and olives.

[4] Frazer *Golden Bough*[3]: The Magic Art ii. 379, *alib.*

[5] Apart from the general association of the oak with the Aryan thunder-god (*Golden Bough*[3]: The Magic Art ii. 356 ff.), Sir James Frazer urges the following special considerations: (1) Diana at Nemi was called Vesta (*Corp. inscr. Lat.* xiv no. 2213 = Orelli *Inscr. Lat. sel.* no. 1455 = Wilmanns *Ex. inscr. Lat.* no. 1767 = Dessau *Inscr. Lat. sel.* no. 3243 Dianae Nemoresi Vestae | sacrum, etc.) and presumably had a perpetual fire in her sanctuary. The Vestal fire at Rome was fed with oak-wood (*Golden Bough*[3]: The Magic Art ii. 185 f., 372, 378). Latin ritual is so uniform that we may assume a like custom at Nemi: hence 'it becomes probable that the hallowed grove there consisted of a natural oak-wood, and that therefore the tree which the King of the Wood had to guard at the peril of his life was itself an oak' (*Golden Bough*[3]: The Magic Art ii. 379). (2) Verg. *Aen.* 6. 203 ff., cp. *ib.* 136 ff., speaks of the golden bough as growing on an evergreen oak (*opaca | ilice*) near Lake Avernus (*Golden Bough*[3]: The Magic Art ii. 379, *ib.*[3]: Balder the Beautiful ii. 284 f., 315). Serv. *in* Verg. *Aen.* 6. 136 quotes as a popular belief (*publica...opinio*) the view 'that the Golden Bough was the branch which a candidate for the priesthood of Diana had to pluck in the sacred grove of Nemi' (*Golden Bough*[3]: Balder the Beautiful ii. 284 n. 3). (3) Verg. *Aen.* 6. 772 represents the old Alban dynasty of the Silvii as crowned with oak (*civili...quercu*) (*Golden Bough*[3]: The Magic Art ii. 178 ff., 379). 'It is not impossible that the King of the Wood...was the lawful successor ...of this ancient line' (*ib.* p. 379). (4) The double-headed bust at Nemi, which probably portrays the old King of the Wood and his younger rival, shows both of them plastered

and I was formerly disposed to question its validity[1]. I still hold that the evidence is incomplete; but I believe that I am in a position to strengthen it by sundry fresh facts of local significance.

Some years ago in looking through an old book on the Campagna I came across an etching of the Lake at Nemi, published in 1805 (fig. 324)[2]. The accompanying text by Miss Ellis Cornelia Knight[3]

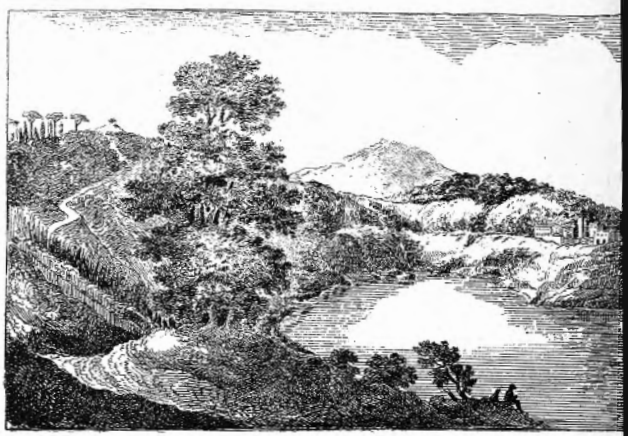

Fig. 324.

who lived in Italy from 1776 to 1799, describes the lake-side and incidentally remarks:

'There is a tree which tradition reports to be near two thousand years old, but some of the inhabitants content themselves with saying, that it was planted by Augustus; its spreading branches hang over the lake, and produce a noble effect.'

It occurred to me at once that the tree in question might be the successor of the tree guarded by the *rex Nemorensis*, the obscure

with oak-leaves (*Golden Bough*[3]: The Magic Art i. 41 f.). (5) Egeria, perhaps a local form of Diana (*Golden Bough*[3]: The Magic Art ii. 171 ff., 267, 380), was described as an oak-nymph (*ib.* ii. 172, 267, 380). Val. Max. i. 2. 1 speaks of her as *dea Aegeria*, which may mean 'the Oak Goddess' (*ib.* i. 22 n. 5, ii. 172 n. 3).

[1] *Class. Rev.* 1902 xvi. 371, 374, 378 n. 4 (but see *ib.* 1904 xviii. 369 f.), *Folk-Lore* 1906 xvii. 445 f.

[2] *Description of Latium; or, La Campagna di Roma* London 1805 p. 85 f. pl. 6 (=my fig. 324).

[3] My friend Prof. R. C. Bosanquet informed me that the anonymous author of the *Description of Latium* was Miss E. C. Knight, on whom see Dr R. Garnett's article in the *Dictionary of National Biography* ed. by S. Lee London 1892 xxxi. 249 f.

woodland king having been replaced in popular memory by the famous emperor[1]. Anxious therefore to ascertain the species of the tree, I asked my former pupil Miss E. M. Douglas (Mrs Van Buren) to go over from Rome to Nemi and question the peasants on the spot. Miss Douglas kindly consented to do so, and on Sept. 13, 1912 reported that they knew nothing about it, having—she said—'just enough modern ideas to hold everything old in detestation.' But a week later a postcard from her drew my attention to the following passage in G. Tomassetti's great work on the Campagna:

'Among the scattered memories of this country I must record that of the gigantic oak-tree, which grew on the banks of the Lake and was said to have been planted by no less a person than Augustus (Kircher *V. Lat.* p. 50); it was capable of containing twenty-five people in the hollow of its trunk, and it is said that the women of Genzano caused it to wither because they used to boil the water for the washing in it (Ratti p. 87, who saw it cut down)[2].'

A. Kircher, whose *Latium* appeared at Amsterdam in 1671, duly mentions that the big tree below Genzano could house a family of twenty-five in its hollow trunk and was believed to have been planted by Caesar Augustus[3]. N. Ratti's *Storia di Genzano* I failed to find at Cambridge, and there is no copy in the British Museum. So I induced my old colleague Prof. P. J. Harding, when next he visited Rome, to take up the quest. Four months afterwards he ran down the book in the Bibliotèca Vittorio Emanuele and on Jan. 16, 1913 sent me an extract, showing that Ratti, whose *Storia* is dated 1797, had seen the tree lying on the ground and was prepared to support Kircher's estimate of its size[4]. It would seem,

[1] It is perhaps noteworthy that one of the chief festivals of modern Nemi is the *Esposizione della Croce* on Sept. 24, a day which was celebrated in antiquity as Augustus' birthday (Wissowa *Rel. Kult. Röm.*[2] pp. 446, 587).

[2] G. Tomassetti *La Campagna Romana* Roma 1910 ii. 257 'Tra le memorie scomparse di questa terra deve ricordarsi il gigantesco albero di quercia esistito sul versante del lago, che dicevasi piantato nientemeno che da Augusto (KIRCHER, *V. Lat.*, pag. 50), capace di contenere nel vuoto del tronco 25 persone; e si dice che le donne Genzanesi lo abbiano fatto inaridire, perchè vi facevano all' interno bollire la lisciva del bucato (RATTI, p. 87, che l' ha veduto recidere).'

[3] A. Kircher *Latium* Amstelodami 1671 p. 50 'E regione *Nemoris* diametraliter opposita *Cynthianum*, vulgo *Genzano* situm est, de quo supra: nobile & dives oppidum *Cæsarini* Ducis jurisdictioni subjacet; infra quod ad ipsum *lacum* arborem vidi tantæ magnitudinis, ut integra familia 25 personarum facile concavitatem inhabitare queat. Incolæ certo sibi persuasum habent, arborem hanc *ab Cæsare Augusto* inibi plantatam, successu temporis in tantam molem excrevisse. Sed sinamus indigenis plus æquò credulis plebejam hanc persuasionem.'

[4] Nicola Ratti *Storia di Genzano con note e documenti* Roma 1797 p. 87 n. (1) 'Quest' albero per la sua mole portentoso si è mantenuto in piedi sino a nostri giorni, e sussisterebbe tuttora, se la biasmevole costumanza delle donne Genzanesi di far bollire a fuoco vivissimo la caldaja del loro bucato entro la cavità del tronco, che loro serviva di commoda

then, that the great trunk was felled some time between 1776, when Miss Knight went to Italy, and 1797, when Ratti brought out his account of Genzano. Its identification as an oak rests on the statement of Tomassetti. If that is reliable, then Sir James Frazer's surmise concerning Diana's tree receives at least a supplementary prop[1].

We need not, therefore, scruple to admit that Virbius was represented as a Janiform herm covered with oak-leaves just because he was the consort of Diana[2]. How long he persisted in folk-memory and how widely he was recognised, our meagre records do not permit us to determine. As to the former question, C. G. Leland in 1892 published a curious tale current among the Romagnoli of northern Italy, in which we can readily detect a moralising reminiscence of Diana, Virbius, and his successful rival[3]. As to the latter question,

stanza, a poco a poco non ne avesse seccato le radici, e l' albero stesso, per il che anni indietro bisognò venirne al taglio. Noi lo abbiamo veduto dopo reciso, e possiamo assicurare, che l' assertiva del Kircher riguardo alla straordinaria di lui grandezza non è punto esaggerata. Un albero di questa natura non poteva essere, che di un età vecchissima, e quando non voglia credersi coevo di Cesare Augusto almeno non gli si potran negare molti secoli di vita.'

[1] If it be objected that Genzano is on the opposite side of the Lake to Nemi, we must bear in mind the constant tendency of the early population to move down from the mountain towards the sea (G. Tomassetti *La Campagna Romana* Roma 1910 ii. 263 f.). As Diana's temple at Nemi was duplicated by Diana's temple at Aricia (*id. ib.*), so *ex hypothesi* the oak at Nemi was duplicated by the oak at Genzano.

Two other possibilities are worth weighing. (1) Quite conceivably the sacred tree of Diana *Nemorensis* was an apple-tree. I have erenow been half-inclined to maintain that view: see *Folk-Lore* 1906 xvii. 445 f., *supra* i. 274 f. And further reasons for adopting it could be adduced. In 1744 the site of the precinct at Nemi was occupied by the *pomario* of P. Frangipani (Tomassetti *op. cit.* ii. 264). Miss Douglas writes to me (Sept. 13, 1912): 'There are a good number of apple trees on the slopes of the lake, some of them fairly large.' Also it is a well-known fact that mistletoe very commonly grows on an apple-tree. (2) Again, something might be said for the conjecture that Diana's tree was a beech. She was certainly a beech-goddess in the near neighbourhood (*supra* p. 402 f. and especially p. 403 n. 1). And the whole district is called *La Faiola* (= La Faggiuola) from its beeches (L. Morpurgo in the *Mon. d. Linc.* 1903 xiii. 297 n. 1).

[2] *Supra* p. 400.

[3] C. G. Leland *Etruscan Roman Remains in Popular Tradition* London 1892 p. 124 f. "*Verbio* was a beautiful youth, as good as he was beautiful, and he loved with all his heart a maid who seemed to return his love. "But she soon was tempted, | Tempted by another | Youth of greater beauty, | Which was like enchantment; | Yet he was a stranger, | And he had no story, | For this handsome stranger, | Verbio was slighted. "Then Verbio fell ill in despair, and seemed to be dying, and the girl learning this repented, and in grief said to her new lover: 'I have done wrong, and I now see that Verbio loved me truly as thou dost not and no one can.' Then her lover gazed at her and she saw he was not a man but a devil. And he said:—"'See what thou hast done, | See how thou art wicked, | Leaving one who loved thee | With all soul sincerely! | Yet for me you left him, | Yes, for me, a devil; | Now you both are lost, | For thou'st truly promised | To be mine for ever, | As thou holdest Verbio. | But if you will sign | With your blood a contract | To be mine, I'll grant ye | Many, many years | Of happiness together.' "Now Verbio did

a priest of Virbius is mentioned in an inscription at Naples[1], and there was a Clivus Virbius in the immediate vicinity of an ancient Dianium at Rome[2]. Servius' statement that Diana was transferred from Aricia to Sparta[3] leads me to suggest that at a comparatively late date Virbius, the associate of Diana *Nemorensis*, was attached to Artemis *Orthía* also. Vibius Sequester actually gives Virbius as the name of a Laconian river[4]. And Pausanias says that the image of Artemis *Orthía* was found by Astrabakos and Alopekos the sons of Irbos. He adds that Irbos was the son of Amphisthenes, son of Amphikles, son of Agis[5]. I suspect that *Írbos* is a late Grecised form of *Virbius*; and in his forbears *Amphis*thenes and *Amphi*kles I find a hint of his Janiform nature[6]. The connexion of Virbius with Artemis *Orthía* would be doubly appropriate if, as is certainly possible, the Greek *Orthía* was the older phonetic equivalent of the Latin *Virbius*[7], both names being akin to the word *arbor*[8]. On this

not believe in the power of devils, and was only too glad to get his love again, and so signed the contract, as she did also. And they lived happily indeed for many years; but years must end, and so it came to pass that when the time of the contract expired both died at once. And all at once there was an awful storm over all the land, the heavens grew dark by day, and horrible fires flashed out of the darkness, and amid the storm was heard a voice which sang:—"'Women, learn to love | One true love, and truly; | When you're truly loved | Be warned by my example! | Now I pay the fee | For my fatal falsehood.' "And since that time the two have gone about as spirits knowing no rest."

Leland has been accused of inaccuracy—a charge which he hotly rebuts (*op. cit.* p. 13 ff.). He was no doubt an erratic genius, and there is a good deal of chaff mixed with his grain. But he certainly meant his tales from La Romagna Toscana as a serious contribution to folk-lore: see his letters to Mrs Pennell written from Florence in 1890—1891 and printed by E. R. Pennell *Charles Godfrey Leland* London 1906 ii. 339 ff.

[1] *Corp. inscr. Lat.* x no. 1493, 6 = Dessau *Inscr. Lat. sel.* no. 6457, 6 flamini Virbiali. See further Frazer *Golden Bough*[3]: The Magic Art i. 20 n. 3.

[3] Serv. *in* Verg. *Aen.* 2. 116 Colchos petierat (*sc.* Orestes), et cum his occiso Thoante, simulacrum sustulit absconditum fasce lignorum: unde et Facelitis dicitur...et Ariciam detulit. sed cum postea Romanis sacrorum crudelitas displiceret, quamquam servi immolarentur, ad Laconas est Diana translata, ubi sacrificii consuetudo adulescentum verberibus servatur, qui vocabantur Bomonicae, quia aris superpositi contendebant, qui plura posset verbera sustinere. *Infra* § 3 (c) i (*σ*).

[4] *Supra* p. 394 n. 2.

[5] Paus. 3. 16. 9 τοῦτο μὲν γὰρ Ἀστράβακος καὶ Ἀλώπεκος οἱ Ἴρβου τοῦ Ἀμφισθένους τοῦ Ἀμφικλέους τοῦ Ἄγιδος τὸ ἄγαλμα εὑρόντες αὐτίκα παρεφρόνησαν. Cp. 3. 16. 11 καλοῦσι δὲ οὐκ Ὀρθίαν μόνον, ἀλλὰ καὶ Λυγοδέσμαν τὴν αὐτήν, ὅτι ἐν θάμνῳ λύγων εὑρέθη, περιειληθεῖσα δὲ ἡ λύγος ἐποίησε τὸ ἄγαλμα ὀρθόν.

[6] *Folk-Lore* 1905 xvi. 290 n. 9. Note also the title *Ambi*sagrus (*supra* p. 328).

[7] My expert friend Dr P. Giles tells me (May 1918) that **Vurbia*, the strict equivalent of *Fορθία* (for *ϝορθιᾱ́ᾱ*), involves a sound *Vu* which the Latins disliked and would therefore alter by dissimilation (cp. **vucus* > *vīcus*). He thinks that the first *i* of *Virbius* may perhaps be due to the influence of the second *i* (cp. *filius*).

[8] According to Walde *Lat. etym. Wörterb.*[2] pp. 55 f., 58 and Boisacq *Dict. étym. de la Langue Gr.* p. 711 f., *arbor*, *arāuus*, and *ὀρθός* are all of kindred origin.

showing *Orthía* might be rendered 'Goddess of Growth[1]' and *Virbius*, 'He who is concerned with Growth' or the like[2].

vi. Zeus and the Twins.

Thus far we have traced the fortunes of the divine Sky, which was represented, not only as a celestial archway, but also—since it was bright by day and dark by night—as a double-faced god[3] with a tendency to differentiation of the two faces[4]. It remains to notice yet another development of the same primitive conception. To put it briefly, the twofold Sky split into twins. The phrase sounds extravagant. Fissiparism savours more of biology than of mythology[5]. Nevertheless we can mark the process by which the very vault of heaven first produced a pair of pendant divinities and afterwards underwent complete dichotomy.

(*a*) The supports of the Sky personified.

The initial step is taken when the supports of the Sky become personified[6] as its supporters, the result being a couple of contrasted sky-powers. The pillars of Herakles at one end of the Mediterranean[7], formerly called the pillars of Briareos[8] and earlier still the pillars of Kronos[9], together with the analogous pillars of Proteus at the other end[10], those of Herakles in Pontos[11] or far beyond Babylon[12],

[1] The alternative form Ὀρθωσία (Gruppe *Gr. Myth. Rel.* pp. 161 n. 12, 1284 n. 3, O. Höfer in Roscher *Lex. Myth.* iii. 1210 ff., 1214 f.) is definitely transitive in meaning and would denote 'She who makes to grow.' Cp. Zeus Ὀρθώσιος (Dion. Hal. *ant. Rom.* 2. 50 Ὀρθωσίῳ Διΐ = Iovi *Statori*, Schöll—Studemund *anecd.* i. 265 no. 73 (Διὸς) ὀρθωσίου, *ib.* i. 266 no. 65 (Διὸς) ὀρθωσίου) with Cramer *anecd. [12] Iul. Valer. 3. 49 p. 157, 14 ff. Kuebler (two inscribed *stelae* of solid gold and silver respectively, fifteen cubits high, two cubits thick, at a distance of ninety-five days' journey from Babylon), cp. the *itinerarium Alexandri* 54 (ed. D. Volkmann, Naumburg 1871, p. 29, 3 ff.) (two inscribed *stelae* of solid gold and silver respectively, twelve cubits high, two cubits thick, at a distance of ninety days' journey from Babylon).

those of Herakles and Dionysos in India[1], imply the belief that the sky rests upon solid and tangible supports[2]. But these as yet are mere columns or columnar heights[3]. The two pillars before the altar of Zeus on Mount Lykaion were likewise in all probability conceived as sky-props. And here a certain advance may be discerned: the pillars are divinised, so to say, by the sky-god, who rests upon each in the form of a gilded eagle[4].

The Phoenicians in their sacred architecture went a step further towards personification. The two inscribed columns of bronze, eight cubits high, in the Herakleion at Gadeira, which some took to be the original pillars of Herakles[5], were at least masses of shining metal. They were excelled in brilliance by the two pillars, which Herodotos saw in the sanctuary of Herakles at Tyre: of these, one was made of pure gold[6], the other of 'emerald-stone large enough

[1] The pillars of Herakles and Dionysos on Indian soil (Strab. 171) are sometimes called boundary-stones (Curt. 3. 10. 5, 9. 4. 21), sometimes altars (Plin. *nat. hist.* 6. 49, Solin. 49. 4, Mart. Cap. 692). The pillars of Dionysos (Apollod. 3. 5. 2, Avien. *descr. orb. terr.* 824 ff., 1384. The *epitome rerum gestarum Alexandri Magni* 12 (ed. O. Wagner Leipzig 1900) mentions one pillar only) are also termed *metae* (Claud. *de tert. cons. Honor. Aug. paneg.* 208).

[2] Preller—Robert *Gr. Myth.* i. 562 n. 1, 565, 624 n. 1, Gruppe *Gr. Myth. Rel.* p. 383, R. Eisler *Weltenmantel und Himmelszelt* München 1910 i. 325, 369, 392 n. 5, ii. 619, 624, 627, 631. *Supra* p. 141.

[3] Eustath. *in* Dionys. *per.* 64 *φασὶ δὲ αὐτὰς ἢ ἀνδριάντας εἶναι* Ἡρακλέος, κ.τ.λ. is an isolated vagary, which cannot be held to justify the assertion of F. Dürrbach in Daremberg—Saglio *Dict. Ant.* iii. 93 that the pillars of Herakles 'ne sont pas autre chose sans doute que les simulacres de la divinité cbez les Phéniciens.' Priscian. *per.* 617 ff., 1057 f. (*Poet. Lat. min.* v. 296 and 311 Baehrens) in like manner describes the pillars of Dionysos as *statuae*: see De Vit *Onomasticon* i. 655.

I add what seems to be a northern parallel. At Cape Sölfar in the southern part of Porsanger Fjord the Lapps of the eighteenth century had their most famous cult-centre. Here at a distance of half a mile from the sea rose two lofty rocks, one of them coated with moss. Near the rocks lay the spits (*Bassem-Morak*) used at festivals of the god, to whom his worshippers offered only the bare bones of the animals sacrificed, expecting him to reclothe the same with flesh [cp. Frazer *Golden Bough*[3]: Spirits of Corn and Wild ii. 257]. Stakes of dry firwood were set up crosswise against the rocks, each marked with the signs |||XXX|||+++|||XXX. [Longish stakes called *Liet-Morak*, smeared with the blood of the victim, were commonly set up on the place of sacrifice.] Towards the south stood a tall square beam bearing the same marks: the lower part of it was driven into the ground, the upper part was pierced by an iron nail like a trenail. Knud Leem supposes that the deity here worshipped was Thor, though he admits that no idol named Thor was then known among the Lapps of Finmark (Canutus Leemius *De Lapponibus Finmarchiæ, eorumque lingua, vita et religione pristina commentatio* Ripbenhavn 1767 p. 437 f. with p. 428 f. pl. 86=my fig. 329, Knud Leem *Nachrichten von den Lappen in Finmarken, ihrer Sprache, Sitten, Gebräuche, und ehemaligen heidnischen Religion* Leipzig 1771 p. 221 with p. 216). *Supra* p. 57 n. 1.

[3] *The Itinerary of Rabbi Benjamin of Tudela.* Translated and edited by A. Asher London and Berlin 1840 i. 40 f. I am indebted for my knowledge of this passage to R. Eisler *op. cit.* i. 48, who has done good service by drawing attention to it. When, however, he goes on to suggest that Georgios Monachos *de Basilio Macedone* 14 (p. 844, 3 ff. Bekker) *ἀλλὰ καὶ τὴν στήλην Σολομῶντος ἐν τῇ βασιλικῇ οὖσαν μεγίστην κατεάξας προσέταξεν ἐν ὀνόματι αὐτοῦ ἐκτυπωθῆναι καὶ τεθῆναι κάτωθεν ἐν τοῖς θεμελίοις τῆς αὐτῆς Νέας ἐκκλησίας, ὡς θυσίαν ἑαυτὸν τῷ τοιούτῳ κτίσματι τῷ θεῷ προσάγων* may refer to one of

'Also St. Giovanni in porta latina in which place of worship there are two copper pillars constructed by king Sh'lomo o. b. m. whose name "Sh'lomo Ben David" is engraved upon each. The Jews in ROME told him[1], that every year about the time of the 9th of Ab[2], these pillars sweat so much that the water runs down from them.'

From pillars with personal names we go on to pillars with individual effigies. At Antiocheia on the Orontes, close to Mount Silpion with its cult of Zeus *Keraúnios*[3], Tiberius built a sanctuary of Dionysos and outside the temple set up two great statues-on-columns (*stêlai*) in honour of the Dioskouroi Amphion and Zethos[4]. My friend Dr Rendel Harris has justly compared them with the two extant columns of Edessa (*Ourfa*), which he regards as originally '*representative of or votive to the great twin-brethren*[5].' He holds that the Edessan columns were surmounted by statues of the Twins, and he has even attempted to decipher in that sense the Syriac inscription graven on the more southerly shaft[6]. Further, he has cited in this connexion an important passage from Julian, who shortly before 361 A.D.[7] writes:

'The inhabitants of Edessa, a place sacred from time immemorial to Helios, associate with him in cult Monimos and Azizos. Iamblichos, from whose ample stores I have taken all this, states that by Monimos they mean Hermes, by Azizos Ares, consorts of Helios, conveying many a benefit to the region round the earth[8].'

It looks as though the local Twins had been identified with Azizos, 'the Strong' (*'azîz*), and Monimos, 'the Beneficent' (*moun'îm*),

the two pillars of the temple at Jerusalem, he is forgetting that these pillars were both demolished (*supra* p. 427 n. 1) and that *στήλη* in late Greek means 'statue-on-pillar' and so 'statue' (C. d. F. Ducange *Glossarium ad Scriptores mediæ & infimæ Græcitatis* Lugduni 1688 ii. 1447, Stephanus *Thes. Gr. Ling.* vii. 752 D).

[4] Rasche *Lex. Num.* iii. 527 f., Suppl. ii. 720 f., E. Babelon in the *Revue belge de numismatique* 1893 xlix. 27 no. 91 pl. 3, 3 [ΜΗΤ·ΚΟΛ·]ЄΔЄCCΗΝΩΝ, *Hunter Cat. Coins* iii. 313 pl. 79, 8 (=my fig. 335) ΜΗ[ΤΚΟΛ]ЄΔЄCCΗΝΩΝ.

[5] The little figure has often been fancifully interpreted. Thus J. F. Vaillant *Numismata ærea Imperatorum, Augustarum, et Cæsarum, in coloniis, municipiis, et urbibus iure Latio donatis, ex omni modulo percussa* Parisiis 1695 ii. 145 fig. says: 'columna, in qua Diana ut videtur Venatricis habitu, dextrâ extensâ telum, lævâ arcum' <tenens> (cp. Rasche *Lex. Num.* iii. 527). Eckhel *Doctr. num. vet.*[2] iii. 511 has: '*simulacrum Palladis, ut videtur, columellae impositum*' (cp. Rasche *Lex. Num.* Suppl. ii. 720). E. Babelon *locc. citt.* speaks of 'un petit génie,' which is vague. Head *Hist. num.*[1] p. 689

personage can hardly be other than Azizos, whom Iamblichos compared with Ares. If so, he was one, and the more important one, of the Edessan Twins. The identification is borne out by the fact that coppers of Edessa struck by Alexander Severus and Iulia Mamaea (fig. 336)[1] show a somewhat similar little figure standing on the turreted crown of the goddess in the attitude of a fighting

Fig. 336.

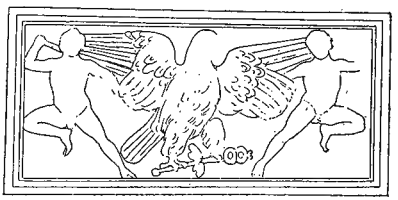

Fig. 337.

giant and probably intended for the constellation Orion[2], whose position in the starry sky is contiguous to that of the Twins[3]. Whether Azizos and Monimos were, as R. Dussaud[4] supposes, parallel forms arising from the duplication of a single god or rather, as F. Cumont[5] suggests, originally distinct divinities on their way towards ultimate fusion, we cannot with the *data* at our disposal

'the figure of a divinity on a column' is hardly less so. G. Macdonald in the *Hunter Cat. Coins locc. citt.* hazards 'statue (of Aquarius?)' and is followed by Head *Hist. num.*[2] p. 815.

[1] E. Babelon in the *Revue belge de numismatique* 1893 xlix. 20 f. no. 79 pl. 2, 9: 'un petit génie qui, peut-être, tire de l'arc.' *Hunter Cat. Coins* iii. 312 pl. 79, 7: 'small statue (of Aquarius?).' Fig. 336 is from a specimen given to me by Dr Rendel Harris. ΜΗΤΚΟΛ ΕΔΕCCΗΝΩΝ. The city-goddess is seated on a stool with a small temple in her right hand, the river-god Skirtos at her feet, and four stars round about her.

[3] A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 129 with pl. 1 f. ('Sternbilderkarte' and 'Sternkarte').

[4] R. Dussaud—F. Macler *Mission dans les Régions désertiques de la Syrie moyenne* (extr. from the *Nouvelles Archives des Missions scientifiques* x) Paris 1903 p. 57 ff., R. Dussaud in the *Rev. Arch.* 1903 i. 129 f. = *id. Notes de mythologie syrienne* Paris 1903 p. 9 f., *id. Les Arabes en Syrie avant l'Islam* Paris 1907 p. 131 f. Dussaud argues that various deities identified with the planet Venus were thereby duplicated into hypostases corresponding with the morning- and evening-star. Thus the Sabaean god 'Athtar, 'équivalent onomastique d'Ichtar et forme masculine d' 'Achtoret-Astarté,' produced the pair Azizos and Monimos, the Arabian counterparts of Phosphoros and Hesperos.

[5] F. Cumont *Études syriennes* Paris 1917 p. 269 n. 2: 'On pourrait, il est vrai, se demander si ce n'est pas le phénomène inverse qui s'est produit ici: les dieux de l'étoile du matin et de l'étoile du soir, primitivement distincts, seraient confondus lorsque l'astronomie reconnut que les deux planètes n'en faisaient qu'une. C'est ce qui arriva en Grèce pour Phosphoros et Hespéros.' But see R. Dussaud in the *Rev. Arch.* 1903 i. 129 n. 1 = *id. Notes de mythologie syrienne* Paris 1903 p. 9 n. 1.

determine. It is, however, permissible to think that their columns on the citadel of Edessa were conceived as sky-supports. For at Baitokaike (fig. 337)[1] and elsewhere throughout the Syrian area

Fig. 338.

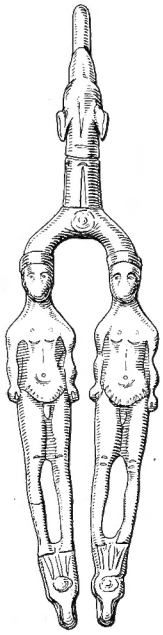

Fig. 339.

Azizos and Monimos are found as the regular supporters of the solar eagle carved on the soffits of sacred lintels[2].

Finally, Etruscan mirrors show the starry roof actually resting on the heads of the Dioskouroi[3]. The great majority of these

[1] E. G. Rey in the *Archives des Missions scientifiques et littéraires* Paris 1866 Deuxième série iii. 338 with woodcut, R. Dussaud in the *Rev. Arch.* 1903 i. 131 fig. 3 (reproduced in my fig. 337)=*id. Notes de mythologie syrienne* Paris 1903 p. 11 fig. 3. Dussaud thinks that each of the *épheboi* was holding in both hands a torch (probably added in paint), and that one of these torches was raised, the other lowered. But?

[3] *Supra* i. 769 f. figs. 561, 562, 563, 565. I have (*ib.* p. 767 n. 1) compared the Dioscuric arch with the structure of the Japanese *torii*. Prof. Takeo Wada of Kyoto University kindly informs me that at Yamagata there is a *torii*, the two side-posts of

mirrors[1], by a curious convention, gives the heroes but one arm apiece, as though to indicate their conjoint being[2]. Other bronzes of Etruscan make represent them with two arms each, but only a single wing (fig. 338)[3].

(β) The Dioskouroi as the halves of the Sky.

Looking back, we realise that the divine Sky has little by little transformed its supports into anthropomorphic supporters. Tyndareos has been joined by the Tyndaridai. Zeus has begotten the Dioskouroi. But the process is still incomplete. For it cannot be said that the Sky itself has as yet suffered cleavage or split into a pair of Twins. The fact is that, so long as men believed in a flat earth overarched by a solid sky resting on side-props, further development was impossible. But with the dawn of philosophy a better cosmology appeared[4]. Ionic speculation in the sixth century B.C. led on to the view, first clearly enunciated by Parmenides and zealously propagated by the Pythagoreans, that this earth of ours is a sphere[5]. It then became natural to conceive of the Sky as composed of two hemispheres, respectively light and dark. And some unknown thinker, perhaps Empedokles[6], more likely a Stoic[7], ventured to identify them with the Dioskouroi. His explanation appealed to rational minds and found favour in a materialistic age. For instance, Philon the Jew, speaking of ingenious mythologists in his treatise *On the Decalogue* (*c.* 40 A.D.), says:

which are carved in relief with standing figures of temple-servitors wearing their official caps. The resemblance to the scene on the Etruscan mirrors is singularly complete.

[1] For a larger collection of evidence see Gerhard *Etr. Spiegel* iii. 33 ff. pls. 45 ff.

[2] *Supra* i. 768. Since writing on the subject I have acquired a mirror (pl. xxiv), which retains the usual type of the Dioskouroi with Phrygian cap, short *chitôn*, bent leg, single arm, and connective pediment, but adds between the brothers their mother Leda (?) in a Phrygian cap and their sister Helene (?) with rayed hair. The stars are here absent, unless the pattern on the two shields can be claimed as stellar. Length 0·245^{m}. Breadth 0·116^{m}. Cp. Gerhard *Etr. Spiegel* iii. 317 pl. 227, 2 = Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 525 f. no. 1313 fig.

[3] I figure a pair of belt-hooks, obtained by Mr E. J. Seltman in Capri, and now in my possession. The Twins, whose heads are rayed, bear a dagger and a knife in their right hands. The left hand in each case is empty and clumsily rendered, being perhaps no part of the original design. A wolf's head terminates each hook above and below; but it must not hastily be assumed that this is due to contamination with Romulus and Remus (*infra* p. 440 ff.). Height 0·104^{m}. Cp. *Brit. Mus. Cat. Bronzes* p. 351 no. 2858. Another belt-hook of the same *provenance* and of similar design (fig. 339) omits the wings, but connects the heads of the Twins by means of a forked bar.

[4] For a clear perception of this sequence of ideas I am indebted to friendly criticisms received from Miss Harrison (Sept. 23, 1918).

Etruscan mirror: the Dioskouroi with Leda(?) and Helene(?) between them.

See page 432 n. 2.

'They bisected the sky theoretically into hemispheres, one above, the other below, the earth, and called them Dioskoroi, adding a marvellous tale about their life on alternate days[1].'

Again, that acute doubter Sextus Empiricus (*c.* 180 A.D.), *à propos* of men raised to the rank of gods, writes as follows:

'Moreover, they say that the Tyndaridai usurped the reputation of the Dioskouroi, who were thought to be gods. For in those days wise folk spoke of the two hemispheres, the one above the earth and the other below it, as Dioskouroi. Wherefore also the poet, hinting at this, says of them:

> One day they are alive, the next day dead
> In alternation, honoured like to gods.

And men put *pîloi* on their heads with stars atop, hinting at the arrangement of the hemispheres[2].'

An anonymous *Introduction to the Phaenomena of Aratos* (later than *s.* i. A.D.) alludes briefly to the same 'Homeric allegory[3].' And Julian attacks it in his oration on *The Sovereign Sun* (361 A.D.):

'Who, think you, are the Dioskouroi, my wise friends, you that accept tradition without criticism?... Some have supposed that the theogonists meant the two hemispheres of the universe. But this is absurd. For how each of the hemispheres is "alternate of days" it is not easy to imagine, since the increase of their light each day is imperceptible[4].'

Ioannes the Lydian (*c.* 490—*c.* 570 A.D.) repeats the theory:

'The philosophers declare that the Dioskoroi are the hemisphere below, and the hemisphere above, the earth; they take it in turns to die, according to the myth, because turn and turn about they pass beneath our feet[5].'

[1] Philon *de decalogo* 12 (iv. 258 Richter) *τόν τε οὐρανὸν εἰς ἡμισφαίριον τῷ λόγῳ διχῇ διανείμαντες, τὸ μὲν ὑπὲρ γῆς, τὸ δὲ ὑπὸ γῆς, Διοσκόρους ἐκαλέσαντο, περὶ τῆς ἑτερημέρου ζωῆς αὐτῶν προστερατευσάμενοι διήγημα.*

Finally, Eustathios in the second half of the twelfth century includes this notion along with others in his commentary on the Homeric couplet[1]. It would seem, then, that Greek speculation from Hellenistic to Byzantine times sought to identify the sons of Zeus with the two segments of the animate Sky. T. H. Martin[2] has plausibly conjectured that this is why the Pythagoreans regarded semicircles as sacred to the Dioskouroi[3].

(γ) Twins as Children of the Sky.

I would dwell for a moment on some aspects of this mythological development. In the first place, it solves without more ado an otherwise baffling problem with regard to twins in general. Sir James Frazer, in his survey of superstitions as to twins in Africa, remarks concerning the Baronga of Delagoa Bay: 'They bestow the name of *Tilo*—that is, the sky—on a woman who has given birth to twins, and the infants themselves are called the children of the sky[4].' He adds in a footnote: 'The reason for calling twins "Children of the Sky" is obscure. Are they supposed in some mysterious way to stand for the sun and moon[5]?' Dr Rendel Harris, who has contributed so much to the study of twins[6], carries the enquiry a stage further by pointing out 'that we have here among the Baronga the exact equivalent of the Greek' *Dióskouroi*[7]. But if that be so, there is no need to prolong discussion. The

[1] Eustath. *in Od.* p. 1686, 33 ff. ἕτεροι δὲ οὐ πάνυ πιθανῶς νοοῦντες τὸ ἑτερήμερον ἐπὶ τοῦ τὸν μὲν τῇδε ζῆν τῇ ἡμέρᾳ ὡς τοῦ ἑτέρου ἐν νεκροῖς ὄντος, τῇ δὲ ἑτέρᾳ τὸν λοιπὸν ὡς θατέρου τεθνεῶτος, εἰς τὰ δύο κατ' οὐρανὸν ἡμισφαίρια τοὺς Διοσκούρους ὑπονοοῦσιν, ὧν θάτερον μὲν ὑπὲρ γῆς ἀεί ἐστι, θάτερον δὲ ὑπὸ γῆν. ὅπερ ἀνατρέπων ὁ παραβάτης φησὶν ὡς οὐκ ἔχει λόγον εἰρῆσθαι Διοσκούρους παρ' Ὁμήρῳ τὰ δύο ἡμισφαίρια τοῦ παντός. κ.τ.λ. [7] J. Rendel Harris *The Cult of the Heavenly Twins* Cambridge 1906 p. 26.

question is already answered. Twins are 'Children of the Sky' because the Sky itself, appearing alternately as Day and Night, is essentially of a twin character. And the savage who saw twins born of an earthly mother was logical (or should we say illogical?) enough to dub her *Tilo*, 'the Sky.' Obviously this explanation does not exclude the possibility that the twinhood of the Sky was sometimes expressed in terms of Sun and Moon[1], or—for that matter—of Morning- and Evening-Star[2]. These are but secondary modes of denoting the great primary contrast between Day and Night.

(δ) The Twins contrasted.

In the second place, the bisection of the divine Sky naturally produced Twins of differing complexion. Sundry scholars have even supposed that the contrast might be crudely indicated by means of colour. Thus W. Watkiss Lloyd[3] as far back as 1850 published a black-figured *amphora*, then in possession of a London dealer, which represents two warriors, with helmets, shield, and lances, riding side by side on a black horse and a white horse towards a youth greeting them with uplifted hand. The learned author interpreted the scene as the Dioskouroi welcomed by Hyakinthos, and remarked 'the common relation of the brothers to alternating light and darkness.' F. F. Ravaisson[4] in 1875 pointed out that on the red-figured *amphora* from Mêlos, now in the Louvre[5], which shows the Dioskouroi taking part in a grand Gigantomachy, one of the heroes is charging on a white horse, the other on a red horse. And E. Bethe[6] as late as 1903 thought it significant that on a vase of the Blacas collection published by Panofka[7] the Dioskouroi have a black *pîlos* and a white *pîlos* respectively. But the fact is that in all these cases the use of white and black is merely an artistic

[1] Indeed, a whole set of European folk-tales points in that direction (*infra* Append. F).

[2] Cp. the description of the Dioskouroi in Mart. Cap. 83 post hos duorum una quidem germanaque facies; sed alius lucis sidere, opacae noctis alius refulgebat.

convention entirely devoid of mythological meaning[1]. The contrast between the Dioskouroi, when they really are contrasted, goes much deeper than surface-colouring and is a matter of constitution and character.

(ε) Kastor and Polydeukes.

Kastor and Polydeukes, for example. The *Iliad*[2], it is true, describes them as a pair of princely athletes buried in Lakedaimon, and only distinguishes Kastor the 'tamer of horses' from Polydeukes the 'good boxer.' The poet, in fact, conceives both to have been mortal men; and this early evidence might be thought to negative any connexion with the diurnal and nocturnal Sky. But just here we must walk warily. It will be remembered that in Hellenic times the two Spartan kings were priests of Zeus *Lakedaímon* and of Zeus *Ouránios*[3], that is, apparently, of Zeus in his ordinary daylight guise and of Zeus as god of the starry midnight sky[4]—the very sources from which, on my showing, the Dioskouroi derived their divinity. Further, the kings claimed descent from the twin sons of Aristodemos[5], whose death by lightning at Naupaktos[6] marks him as a 'Zeus-struck' man[7]. Moreover, so intimately was each successive pair of kings related to Kastor and Polydeukes that, if both kings went out to battle, both the Tyndaridai went with them, and, if one king stayed at home, one of the Tyndaridai was left to keep him company[8]. These customs and beliefs, if I am not deceiving myself, suggest that in early Doric days the two kings of Sparta were regarded as incarnations of Polydeukes and Kastor[9]. The Homeric allusion to the heroes' burial may well be based on hard

[1] The simplest proof of this is furnished by the fact that, on the Gigantomachy-vase at Paris, the chariot of Zeus has two white horses and two red, that of Ares three red and one white. Such variation in colour assists the eye to pick out and appreciate individual forms: see K. Reichhold in Furtwängler—Reichhold *Gr. Vasenmalerei* i. 105 ff.

[7] *Supra* p. 376 f.

[8] Hdt. 5. 75. See further Frazer *Golden Bough*[3]: The Magic Art i. 48 ff., who urges that the Dioskouroi 'may have been thought to accompany the march of a Spartan army in a visible form, appearing to the awe-stricken soldiers in the twilight or the darkness either as stars in the sky or as the sheen of spears on earth.' But Herodotos' language points rather to something portable, which could be taken with the troops, or left behind —hardly the *dókana* (W. W. How—J. Wells *ad loc.*), more probably the sepulchral jars (*infra* Append. H *med.*).

[9] If so, no wonder that Aristomenes and his friend were able to impose on the Spartans by appearing to them at night on white horses with *ptíoi* and golden stars all complete (Polyain. 2. 31. 4).

fact. The *Odyssey*[1]—or, to be precise, a passage interpolated into the *Odyssey*—speaks of them in language borrowed from the *Iliad*, but explains that, though buried, they were yet alive, and adds that even below ground by a special privilege received from Zeus they were living and dead on alternate days. This remarkable arrangement is set out more fully by Pindar. Writing in 474 B.C.[2] he mentions the fame 'of the mighty Castor, and of thee, king Polydeucês, ye sons of the gods—ye that dwell, for one day, in the homes of Therapnê, and, for the other, within the halls of Olympus[3].' And *c.* 463 B.C.[4] he says: 'In alternate changes the twin brethren spend the one day beside their dear father Zeus and, the other, down in the hollow earth in the depths of Therapnê, thus fulfilling an equal lot, since, when Castor was slain in war, Polydeuces preferred this life to being wholly a god and dwelling in heaven[5].' The sequel tells of their feud with Idas and Lynkeus, the sons of Aphareus. The quarrel was occasioned by a cattle-raid, in which Idas had been defrauded of the booty[6]. Lynkeus, gazing with his keen sight from Mount Taygeton, descried the Tyndaridai seated in the trunk of an oak[7], and with his brother at once hastened to attack them. Idas speared Kastor. Polydeukes came to the rescue. Idas and Lynkeus in vain hurled at him the tomb-stone of their father Aphareus. Polydeukes succeeded in spearing Lynkeus. And Zeus, flinging a thunderbolt at Idas, consumed him and his brother together. Polydeukes, returning to Kastor, found him not yet dead, but gasping for breath. In deep distress Polydeukes prayed to Zeus: 'Bid me also die, O king, with this my brother.' Then, as Pindar puts it,

'He ceased, and before him came Zeus, and spake in this wise:—"Thou art my son, whereas Castor was begotten by thy mother's husband, of mortal seed,

Bethe in Pauly—Wissowa *Real-Enc.* v. 1113 ff., which was written after the discovery of the sixth-century metope from the treasury of the Sicyonians at Delphoi (*Fouilles de Delphes* iv. 1. 24 ff., 32 pl. 4, 1, É. Bourguet *Les ruines de Delphes* Paris 1914 p. 63 f. fig. 18, F. Poulsen *Delphi* trans. G. C. Richards London 1920 p. 86 ff. fig. 25, Perrot—Chipiez *Hist. de l'Art* viii. 455 ff. fig. 227).

[7] Pind. *Nem.* 10. 114 ff. ἀπὸ Ταϋγέτου πεδαυγάξων ἴδεν Λυγκεὺς δρυὸς ἐν στελέχει | ἡμένος (J. B. Bury rightly restores the Doric acc. pl. from the scholia on ἥμενος codd. B.D. Aristarchos cj. ἥμενον. See further *infra* p. 439 n. 1 and E. Abel *Scholia vetera in Pindari Nemea et Isthmia* Berolini 1884 p. 314 ff.).

after thine own conception. But lo! I grant thee thy full choice in this; if thou desirest to escape death and grievous eld, and to dwell thyself in Olympus with me, and with Athênê, and with Arês of the darksome spear, thou canst have this lot appointed thee. But, if thou contendest for thy brother, and art minded to have an equal share with him in all things, then mayest thou breathe for half thy time beneath the earth, and for half thy time in the golden homes of heaven." When thus the god had spoken, the hero had no double purpose in his heart; and Zeus opened once more the eye, and then released the voice of the bronze-clad warrior, Castor[1].'

It has long been recognised that the interpolator of the *Odyssey* and Pindar were alike indebted to the *Kypria*[2], of which certain fragments are extant covering approximately the same ground. One such fragment draws the essential contrast:

> Kastor was mortal, being doomed to die,
> But Polydeukes, War's own wight, immortal[3].

Another relates the beginning of the fray:

> And then in haste
> Lynkeus with fleet foot sought Taygeton,
> Climbed to its topmost peak, and looked abroad
> Through the whole isle of Pelops son of Tantalos.

[1] Pind. *Nem.* 10. 148 ff. trans. Sir J. E. Sandys.

[2] F. Staehlin 'Der Dioskurenmythus in Pindars 10. nemeischer Ode. (Ein Beispiel einer Mythenidealisierung.)' in *Philologus* 1903 lxii. 182—195 claims to show that in various points Pindar is intentionally improving on the tale as told by the *Kypria*:

KYPRIA	PINDAR
Kastor the mortal and Polydeukes the immortal are both sons of Zeus.	Only Polydeukes is the son of Zeus.
They carry off their cousins the Leukippides without giving bride-gifts to Leukippos.	The rape of the Leukippides is omitted.
The Apharidai taunt the Dioskouroi with the rape; whereupon the Dioskouroi lift the cattle of the Apharidai and present them to Leukippos.	Only Kastor is concerned with the cattle-raid.
The Dioskouroi hide themselves in a hollow oak from the pursuit of the Apharidai. Idas, thrusting through the oak, pierces Kastor.	The Apharidai basely attack Kastor, while he is seated (*ἥμενον*) on a stump of oak.
Polydeukes therefore slays Lynkeus. Idas with the *stêle* of Aphareus all but slays Polydeukes.	Idas and Lynkeus with the *stêle* of Aphareus attempt to stop Polydeukes, but fail.
Zeus helps Polydeukes by killing Idas with a thunderbolt.	Polydeukes slays Lynkeus, and would have slain Idas, had not Zeus, to honour Polydeukes, hurled the fatal bolt.

But see Gruppe *Myth. Lit.* 1908 p. 482 f.

[3] *Cypria frag.* 5 Kinkel *ap.* Clem. Al. *protr.* 2. 30. 5 p. 22, 22 ff. Stählin Κάστωρ *μὲν θνητός, θανάτου δέ οἱ αἶσα πέπρωται* (H. Köchly cj. *πέπρωτο*)· | *αὐτὰρ ὅ γ' ἀθάνατος Πολυδεύκης, ὄξος Ἄρηος.* The concluding phrase does not, of course, imply that Polydeukes was the son of Ares: see H. Ebeling *Lexicon Homericum* Lipsiae 1880 ii. 31. *Supra* i. 279.

Right soon the noble hero keen of eye
Saw both of them inside a hollow oak,
Horse-taming Kastor, prizeman Polydeukes.
Then drew he near and smote the mighty oak[1].

A later author likewise much beholden to the *Kypria* was the enigmatic Lykophron—witness the following extract from his *Alexandra*[2]:

One[3] with his cornel striking hollow trunk
Of a black oak[4] shall slaughter one[5] of twain,
To wit the lion[6] pitted 'gainst the bull[7].
The other[8] with his lance shall rip the flank
O' the bull[9] and bear him groundwards. Yet once more
The dauntless ram[10] shall butt him[11], brandishing
The glory of the Amyclaean tomb.
Howbeit bronze[12] and far-flung thunderbolts
Shall slay both bulls[13] together, one[14] of whom
By doughty deeds had satisfied enow
The god of Skias, Orchia, Tilphossa,
What time he[15] bent his horn and fought his fight.
The one pair Hades, but the other Olympos
Shall welcome guestlike on alternate days,
Mortal immortals, saved by brotherly love[16].

Now we may be very sure that the original explanation of the Twins' in-and-out career was not, as Pindar and Lykophron would

[1] *Cypria frag.* 9 Kinkel *ap.* schol. have us believe, sheer brotherly affection. The notion is edifying, but not primitive. Rather, the alternate life was a fifth-century[1] improvement upon the harsh contrast of a mortal Kastor with an immortal Polydeukes. And this contrast is best regarded as a simple but graphic expression of the obvious fact that the divine Sky is half dark, half bright. The Tyndaridai inherited the essential duality of their sire, and at Sparta were appropriately embodied in a double line of kings.

(ζ) Romulus and Remus.

Proto-Doric institutions presumably have an Illyrian ancestry behind them, and may be expected to have left their traces in Italy as well as in Greece[2]. At Rome, for instance[3], there seems to have been a definite and persistent tendency towards a dual kingship. Romulus and Remus—whatever the precise history of their names[4]—were certainly conceived as a pair of royal twins. According to one version of their legend, they reigned with equal rights over their rustic subjects[5]. According to another, Romulus after the death of Remus was bidden by an oracle to place a curule seat for him with sceptre, crown, etc. in order that the two brothers might still appear to be associated in the government[6]. A curious ampli-

[1] Cp. Eur. *Hel.* 137 f. ΕΛ. οἱ Τυνδάρειοι δ' εἰσὶν ἢ οὐκ εἰσὶν κόροι; | ΤΕΤΚ. τεθνᾶσι κοὐ τεθνᾶσι· δύο δ' ἐστὸν λόγω. Cp. later *e.g.* Min. Fel. *Oct.* 22. 7 Castores alternis moriuntur ut vivant.

[2] *Supra* p. 340 ff. Sir James Frazer points out to me (Aug. 14, 1918) that the octennial tether of the Spartan kings and the periodic test to which they were subjected (*Golden Bough*[2]: The Dying God p. 58 f., Spirits of Corn and Wild i. 82, 85) fit in well with my hypothesis of them as sky-powers incarnate. It is interesting to find that the Illyrians had the same eight-year cycle (Strab. 315 ἴδιον δὲ τῶν Δαλματέων τὸ διὰ ὀκταετηρίδος χώρας ἀναδασμὸν ποιεῖσθαι with G. Dottin *Les anciens peuples de l'Europe* Paris 1916 p. 154).

[3] I have pursued the subject further in *Folk-Lore* 1905 xvi. 300 f.

[4] On this intricate problem see Th. Mommsen 'Die Remuslegende' in *Hermes* 1881 xvi. 1—23, P. Kretschmer 'Remus und Romulus' in *Glotta* 1909 i. 288—303, W. Soltau 'Ῥῶμος und Remus' in *Philologus* 1909 lxviii. 154—157, *id.* 'Die Entstehung der Romuslegende' in the *Archiv f. Rel.* 1909 xii. 101—125, J. B. Carter in Roscher *Lex. [5] L. Cassius Hemina (not hefore 146 B.C.) *frag.* 11 Peter *ap.* Diomed. *art. gramm.* 1 (in H. Keil *Grammatici Latini* Lipsiae 1857 i. 384, 3 ff.) pastorum vulgus sine contentione consentiendo praefecerunt aequaliter imperio Remum et Romulum, ita ut de regno pararent inter se (so J. F. Gronovius for *parent inter se* codd. A.B.M. and cod. Scioppii, *pares inter se essent* editiones interpolatae). Cp. schol. Bob. *in* Cic. *Vatin.* 23 p. 119, 3 ff. Hildebrandt: primumque sex vultures Remum vidisse, dein postea Romulum duodecim, atque ita et Romam conditam et ipsos reges appellatos: illum, quod prior auspicium cepisset, Romulum vero, quod maius. See, however, Th. Mommsen *loc. cit.* p. 20 n. 5.

[6] Serv. *in* Verg. *Aen.* 1. 276 (cp. Serv. *in* Verg. *Aen.* 6. 780). S. Eitrem in the *Class. Rev.* 1921 xxxv. 20 well compares the two crowns set out on the couch depicted in the *Tomba del Letto funebre* at Corneto (*infra* Append. N).

fication of the tale related that Romulus, obeying the Pythia, had a golden bust made from the features of Remus, set it as a statue on his brother's throne, and ever afterwards reigned with this effigy of gold beside him; he also sent golden busts of himself and his brother to be installed beside the magistrates of all towns under the Roman sway. Hence (says our authority[1]) the still prevalent use of the royal 'we'! Again, the tradition that Romulus later ruled conjointly with Titus Tatius the Sabine suggests conformity with the custom of a dual kingship. No doubt, the absorption of foreign elements into the Roman state prevented the unbroken continuity of that *régime*. But, when the Tarquins were driven out, the same ancient principle reasserted itself and possessed sufficient

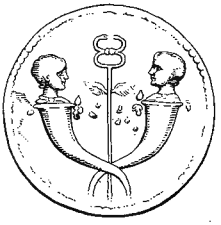

Fig. 340.

Fig. 341.

vitality to produce the double consulship, if not also the ultimate duplication of the titles *Caesar* and *Augustus*[2]. There was a certain dramatic fitness in the belief that the battle of Lake Regillus, which sealed the fate of monarchy for the next five centuries, was won by the help of the great twin brethren Castor and Pollux. Even when the republic developed into the empire, the beneficent influence of twins, at once human and divine, was not forgotten. Tiberius was overjoyed when in 19 A.D. Livia or Livilla, the sister of Germanicus, bore to Drusus Caesar the twins Tiberius and Germanicus[3]. A large brass of Drusus Caesar, struck in 23 A.D., has for obverse design (fig. 340)[4] the busts of the two boys emerging from *cornua copiae* to right and left of a winged *caduceus*. The significance of

princely twins, themselves surmounted by the same Dioscuric device (figs. 349—351)[1].

Whether the dyarchy of the Phoenician *sufetes*[2] was similarly related to a cult of Phoenician Twins, is a question more easily asked than answered. In any case it need not here detain us.

(η) Zetes and Kalaïs.

Confining ourselves to the Greek area, we note that Kastor and Polydeukes were not the only pair of Twins differentiated out of the divine Sky. Boreas, the bifrontal[3] wind-god of Thrace, whom we have already compared with Zeus[4], became by Oreithyia, daughter of Erechtheus, the father of two winged sons, Zetes and Kalaïs[5]. Their names were explained by the ancients as alluding to foul and fair weather respectively: *Zétes* was rendered 'Very Blowy, Blustery,' and *Kálaïs*, 'Fair-blowing[6].' The former etymology might indeed pass muster[7], but the latter is impossible[8]. Rather we should suppose that *Kálaïs* was the Thracian equivalent of the Phrygian *Kalaós*, father of Attes[9]. Be that as it may,

Ζήτης· ὁ υἱὸς Βορρᾶ... Ζαήτης, παρὰ τὸ ζα καὶ τὸ ἀήτης, ὁ μεγάλως πνέων· υἱὸς γάρ ἐστι τοῦ Βορρᾶ, schol. Pind. *Pyth.* 4. 324 Ζήταν Κάλαΐν τε· οἱονεὶ Ζαήτην, ὅ ἐστιν ἄγαν ἄοντα καὶ πνέοντα, καὶ Κάλαϊν οἱον καλῶς ἄοντα, Eustath. *in Od.* p. 1547, 15 f. ὁ μὲν οἱονεὶ ζαήτης δ ἐστι σφοδρὸς ἀήτης Βορρᾶς, ὁ δὲ καλὸν ἢ ἀκαλὸν ἤγουν ἥσυχον ἄημα Βορέου δηλαδή. Myth. Vat. 2. 142, 3. 5. 6 derive absurdly from ζητῶν καλόν. O. Schroeder in the *Berl. philol. Woch.* Juli 9, 1898 p. 868 assumes connexion with ζητέω, which is disputed by Gruppe *Gr. Myth. Rel.* p. 560 n. 5.

[7] Gruppe *loc. cit.* finds a difficulty in the Doric Ζάτας (*Inscr. Gr. Sic. It.* no. 1293 *A* 89 f. καὶ Ζάταν καὶ | Κάλαιν [υἱὼ] Βορέα τοῦ Θραικὸς | κ.τ.λ.). But the crucial vowel is uncertain (G. Kaibel in *Inscr. Gr. Sic. It. loc. cit.* prints Z·TAN P. Victorius read ZATAN, Leo Allatius and F. Bianchini ΣATAN, L. Stephani ...AN) and in any case might be a hyperdorism. Boisacq *Dict. étym. de la Langue Gr.* p. 306 regards the Homeric ζᾱής as dissimilated from *ζηής (ζα- + *αμε- of ἄημι). It is tempting to connect Hesych. ζάει·... καὶ πνεῖ. Κύπριοι with Ζηήρ· Ζεὺ(ς) ἐν Κύπρῳ; but see *infra* Append. M.

[8] Since the -ᾱ- of Κάλαΐς could scarcely represent -αη- !

[9] Paus. 7. 17. 9. Cp. F. Bechtel *Die historischen Personennamen des Griechischen bis zur Kaiserzeit* Halle a.d.S. 1917 p. 573. Note also Hesych. Καλλαΐς· γένος ἰθαγενῶν (a passage to which Mr J. Whatmough drew my attention). We can hardly connect

H. Usener justly observed that these twins attest the twofold nature (*Doppelseitigkeit*) of their father[1].

(θ) Zethos and Amphion.

Zétes can hardly be separated from *Zêthos*[2], whose twin brother *Amphion* bore a name again indicative of a twofold father[3]. That father, whether Zeus or Epopeus—for the two were one[4]—, was a sky-god, whose diverse aspects found mythological expression in the diverse characters of his children, Zethos the stern hunter and herdsman, Amphion the milder and more civilised musician[5].

(ι) Herakles and Iphikles.

Somewhat similar is the relation of Herakles to his less valiant brother Iphikles[6]. It is even possible that this pair of twins was originally conceived as a single dicephalous god[7]. S. Reinach among his miscellaneous types of Herakles has recently included a bronze statuette in the Museum at Sens, which represents a two-headed personage with a curved knife (?) or club (??) in one hand and an apple (?) in the other (fig. 352)[8]. A. Héron de Villefosse

Κάλαϊς with κάλ(λ)αϊς, 'turquoise' (Stephanus *Thes. Gr. Ling.* iv. 860 D—862 C), though Hyg. *fab.* 14 says that Zetes and Kalaïs had 'crines...caeruleos.'

[1] H. Usener 'Zwillingsbildung' in the *Strena Helbigiana* Leipzig—Berlin 1900 p. 329 (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 351 f.). *Id. ib.* n. 57 quotes an interesting Lithuanian parallel from M. Prätorius *Deliciae Prussicae oder Preussische Schaubühne* ed. W. Pierson Berlin 1871 p. 27: 'Prätorius...berichtet: "Mir fällt ein, was ich einsmahls bey einem Fischer in dem Dorf Karckel gesehen. Derselbe hat anstatt der Fahnen auf den Mast seines Bootes eine *statuam* beim Ruder (d. h. dem Steuerruder) aufgerichtet. Er hatte nemblich von Borken gemacht ein Bild eines Menschen, dass am Kopf zween Gesichter, eins vornen, eins hinten waren, an beyden aber war das Maul aufgesperret (der Wind wird also aus dem Mund geblasen); an den Schultern waren zween ziemlich grosse Flügel, daneben er seine Hände ausgestrecket, die rechte aufwärts, die linke erdwärts; in der linken hielt er einen Fisch, in der rechten ein Fässchen. Auf dem Haupt war ein Hahn gemacht. Das bildt nente er *Wejopatis* (Herr des Windes)." Es wird noch hinzugefügt, dass der Pfarrer des Ortes diesen Fischer "vor einen recht alten preussischen Heyden" gehalten habe, der nicht zu bewegen war, die Kirche zu besuchen, dass man ihn aber für den reichsten Fischer ansah. Man möchte vermuten, dass das Doppelgesicht den *uentus secundus* und *aduersus* bedeutete.'

[2] The two names are confused in Palaiph. 22 (23) Ζῆθος καὶ Κάλαϊς (where A. Westermann restored Ζήτης) and Serv. *in* Verg. *Aen.* 10. 350 a Zetho et Calai (so G. Thilo: H. A. Lion prints *Zeto*).

The ancients derived Ζῆθος from ζητέω (Eur. *Antiop. frag.* 181 Nauck² *ap. et. Gud.* p. 230, 55 ff. and *et. mag.* p. 411, 12 ff., cp. Hyg. *fab.* 7) or ζάω (*et. Gud.* p. 230, 54 f., *et. mag.* p. 411, 11 f.). K. B. Stark *Niobe und die Niobiden in ihrer literarischen, künstlerischen und mythologischen Bedeutung* Leipzig 1863 p. 367 connects with ζέω.

[8] Reinach *Bronzes Figurés* p. 199 no. 178 fig. (=my fig. 352), *id. Rép. Stat.* iv. 135 no. 4. Height 0·096m.

was disposed to think this queer customer spurious and Reinach accordingly labels him 'Suspect.' Without careful examination of the original one would not venture to decide. But it reminds me of the copper coins struck under Septimius Severus at Baris (*Isbarta, Sparta*) on the Kestros in Pisidia, which portray a double-headed deity, with two or four arms[1], clad in a lion-skin and grasping bow and club (figs. 354, 355)[2] or bow, club, and sword (fig. 356)[3]. D. Sestini in 1828 mistook him for a group of Herakles and Hephaistos[4]. J. Friedländer in 1879 was the first to recognise in him '*einen*

Fig. 352.

[1] Cp. a bronze statuette from Teti in Sardinia (Perrot—Chipiez *Hist. de l'Art* iv. 65 f. fig. 51 = my fig. 353) representing a warrior with four arms, four eyes in his head, and

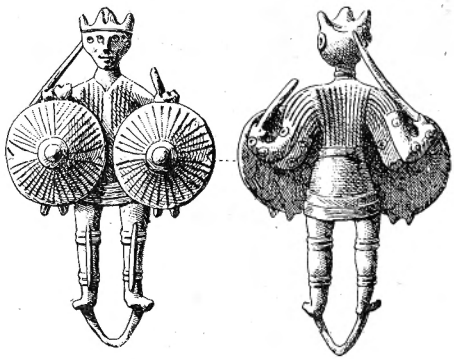

Fig. 353.

apparently other eyes on his arms: he carries two swords and two round shields. Height $0{\cdot}19^{m}$.

[2] A. Löbbecke in the *Zeitschr. f. Num.* 1890 xvii. 13 pl. 2, 3 (= my fig. 354): *obv.* ΑΥ·Κ·Λ·CЄΠ·CЄΥΗΡΟC·ΠЄΡ· bust of Septimius Severus; *rev.* ΒΑΡΗΝΩΝ double-headed male figure advancing to right, with club in right hand and bow in left, on which a bird seems to be perched. Round his shoulders is flung a lion-skin. 'Löwenhaut und Keule...deuten auf Herakles.'

[3] *Brit. Mus. Cat. Coins* Lycia, etc. pp. cx, 207 pl. 34, 2 (my fig. 356 was drawn from a cast of the coin, kindly sent to me by Mr G. F. Hill): *obv.* ΑVΤΚΑΙΛCЄΠ-CЄΟVΗΡΟCΠЄΡ.. bust of Septimius Severus; *rev.* ΒΑΡΗ ΝΩΝ double-headed, four-armed male figure advancing to right, with heads looking different ways, bow and club held to right, sword to left, and lion-skin slung behind.

Fig. 355.

Fig. 356.

(κ) The effeminate Twin.

And here we must notice a suggestion thrown out long since by that pioneer of mythological study F. L. W. Schwartz[4]. He held that the contrast between the doughty hero and the weakling was a commonplace of Indo-European *saga*[5] to be compared with the *motif* of the emasculated sky-god. Now I am not prepared to follow our ingenious author, when he hazards the conjecture that Kastor was named after *kástor*, the 'beaver[6],' and recalls the belief that this rodent gets rid of its pursuers by tearing off its own testicles[7]. Nor can I agree with him, when he interprets the mutilation of Ouranos by Kronos[8], or that of Kronos by

utraque manu arcum paratum tenet, supra quem insistit avis stymphalis.' Hence Mionnet *Descr. de méd. ant.* Suppl. vii. 111 no. 131.

[1] J. Friedlaender in the *Zeitschr. f. Num.* 1879 vi. 17 f. described, but did not figure, a specimen now at Berlin, the reverse of which is from the same die as the reverse of Sestini's coin.

[2] G. F. Hill in the *Brit. Mus. Cat. Coins* Lycia, etc. pp. cx, 322.

[3] Head *Hist. num.*[2] p. 707.

[4] F. L. W. Schwartz *Der Ursprung der Mythologie* Berlin 1860 p. 138 ff.

[5] *Id. ib.* p. 147 cites Herakles and Iphikles, Agamemnon and Menelaos, Hektor and Paris, Siegfried and Gunther.

[6] So, from a different point of view, does J. Rendel Harris *Boanerges* Cambridge 1913 pp. 296, 302 f., 310. I am not concerned to deny the possibility, and even the attractiveness, of this derivation. Only, it seems to me that the evidence produced in support of it is inadequate.

[7] See *e.g.* M. Wellmann in Pauly—Wissowa *Real-Enc.* iii. 400 f., O. Keller *Die antike Tierwelt* Leipzig 1909 p. 188.

[8] Hes. *theog.* 154 ff. (Gaia, angry with Ouranos because he hated their offspring and would not let them see the light, produced grey adamant, made a sickle of it, and bade her children take vengeance on their father. Kronos, her youngest son, alone dared the deed. Gaia gave him the jagged *hárpe* and hid him in an ambush. Then came great Ouranos, bringing night, and spread himself above Gaia. Kronos reached forth his hand, shore off his father's genitals with the *hárpe*, and flung them from the land into the sea. The bloody drops, falling upon Gaia, gave rise to Erinyes, Gigantes, and the nymphs

Zeus[1], or that of Zeus by Typhon[2], as meaning merely that the

called Meliai. The genitals tossing on the deep caused the white foam, *aphrós*, amid which Aphrodite was reared), 472, Antim. *frag.* 35 Kinkel *ap.* Plout. *quaestt. Rom.* 42, Apollod. 1. 1. 4, Ov. *Ibis* 273 f. with schol. *ad loc.*, Cornut. *theol.* 7 p. 7, 17 ff. Lang, Tert. *ad nat.* 2. 12, Arnob. *adv. nat.* 4. 24, Aug. *de civ. Dei* 7. 19, Macrób. *Sat.* 1. 8. 6 ff., *alib.* The Phaiakes were sprung from the drops let fall by Ouranos (Alkaios *frag.* 116 Bergk[4] and Akousilaos *frag.* 29 (*Frag. hist. Gr.* i. 103 Müller) *ap.* schol. Ap. Rhod. 4. 992, where T. Bergk cj. Ἀλκμὰν for Ἀλκαῖος). Phaiakia or Korkyra is called Δρεπάνη (Aristot. *frag.* 469 Rose *ap.* Steph. Byz. *s.v.* Σχερία, cp. schol. Ap. Rhod. 4. 983; Kallim. *frag.* 554 Schneider *ap.* Plin. *nat. hist.* 4. 52) or Δρέπανον (Tzetz. *in* Lyk. *Al.* 762 and 869) or Ἅρπη (Lyk. *Al.* 761 f. with schol. *ad loc.*) because the δρέπανον used by Kronos to mutilate Ouranos, or by Zeus to mutilate Kronos, lies buried beneath it (Timaios *frag.* 54 (*Frag. hist. Gr.* i. 203 Müller) *ap.* schol. Ap. Rhod. 4. 983: Ap. Rhod. 4. 982 ff. and *et. mag.* p. 287, 31 f. make Kronos the agent, Lyk. *Al.* 761 f. and Tzetz. *in* Lyk. *Al.* 762, 869 make him the patient), though others referred these names to the δρέπανον (schol. Ap. Rhod. 4. 983, *et. mag.* p. 287, 33 ff.) or ἅρπη of Demeter (Ap. Rhod. 4. 986 ff.). Ζάγκλη (Steph. Byz. *s.v.*) or Δρέπανον in Sicily (*et. mag.* p. 287, 35 ff., Serv. *in* Verg. *Aen.* 3. 707, cp. Macrob. *Sat.* 1. 8. 12. Lyk. *Al.* 869 calls it ἅρπης Κρόνου πήδημα: see C. von Holzinger *ad loc.*) and Δρέπανον in Achaia (Paus. 7. 23. 4) were likewise connected with the sickle of Kronos; Δρέπανον (*et. mag.* p. 287, 38 f.) or Δρεπάνη in Bithynia, with that of Zeus (Steph. Byz. *s.v.* Δρεπάνη, citing the anonymous line Δρεπάνην κλείουσιν ἀπὸ Κρονίδαο σιδήρου). On the fish πομπίλος, which together with Aphrodite sprang ἐκ τοῦ οὐρανίου αἵματος (Athen. 282 F: cp. *pervig. Ven.* 9 cruore de superno), see Gruppe *Gr. Myth. Rel.* p. 1351 n. 1.

[1] According to the Rhapsodic theogony of the Orphists (*c.* 500 B.C.?), Zeus at the advice of Nyx made Kronos drunk on honey, bound him beneath the tall oaks, and gelded him on the spot (*infra* § 3 (*c*) i (υ) and Append. G *med.*). Cp. Timaios *frag.* 54 (*supra* n. 0), Lyk. *Al.* 761 f. (*supra* n. 0), Lyd. *de mens.* 4. 64 p. 116, 21 ff. Wünsch (Aphrodite born ἀπὸ τῶν Κρόνου μηδέων, τουτέστιν ἀπὸ τοῦ αἰῶνος), Myth. Vat. 1. 105 Juppiter adultus, quum Saturnus quodam die ad usum corporis exiret (? a mythological travesty derived from the comic stage), illato cultro amputavit naturalia ejus, quae in mare projecit, ex quibus Venus nata est; et mox Juppiter patrem regno expulit, 3. 1. 7 habent quoque fabulae, vel hunc (*sc.* Saturnum) patris sui Caeli virilia abscidisse, et abscissa in mare jecisse, et ex ipsorum cruore spumaque maris Venerem natam esse; vel ipsum a filio castratum fuisse, et de ipsius itidem virilibus, in mare missis, Venerem provenisse. de hac tamen diversitate nonnisi idem sentimus; testiculique utriuslibet abscissi fructus naturales, quos tempora producunt, teste Fulgentio (Fulgent. *myth.* 1. 2), designant, etc., schol. cod. *G.* Ov. *Ibis* 273 Saturnus Caelo patri suo genitalia amputauit (patri suo Caelo uirilia abscidit ne alium filium generaret cod. *C.* caelo patri abscidit uirilia cod. *Ask.*), unde Calixto (Promptius uel Calmethes cod. *C.* callisthenes cod. *Ask.* R. Ellis cj. Propercius uel Callisthenes): Saturnus credens unum laesisse parentem, | tres, non tantum unum laeserat ille patrem. | non impune tamen, nam parte est laesus eadem, | poenamque a nato quam dedit ipse tulit. | peccat uterque male (*sic*), sed cum male peccat uterque (malis male sed cum uterque cod. *C.* male ille male hic male peccat uterque cod. *Ask.*), | hic peccat peius qui prius illa (ista codd. *C. Ask.*) facit. | credere uix ausim esse deos; me iudice nempe | tam male qui peccat nec deus est nec homo.

[2] The story has come down to us in two different settings. (1) Apollod. 1. 6. 3: When the gods had vanquished the Gigantes, Ge in anger consorted with Tartaros, and brought forth in Kilikia Typhon the most monstrous of all her children. Down to the waist he was human in shape, but big enough to overtop the mountains; his head often touched the stars; his hands reached the east and the west, and from them started a hundred snaky heads. Below the waist he had serpentine coils that reared and hissed. There were wings all over his body, bristly hair on his head and cheeks, fire in his eyes. He attacked heaven with hissing and shouting, as he hurled rocks and breathed out fire. The gods on

storm-god, cut by the rainbow-sickle, showers down the lightning

seeing him fled to Egypt, where they transformed themselves into various animals (*supra* i. 370 n. 1, 445, 675). While Typhon was afar off, Zeus flung thunderbolts at him (*infra* § 3 (c) iv (α)). When Typhon drew nigh, Zeus scared him with a *hárpe* of adamant and pursued him to Mt Kasion in Syria. Seeing that he was wounded, Zeus then came to close quarters. But Typhon, casting his coils about the god, caught him, wrested the *hárpe* from him, and cut the sinews of his hands and feet. He lifted Zeus on his shoulders and carried him through the sea to Kilikia, where he deposited him in the Corycian Cave. The sinews he hid in the skin of a bear and stored them there with Delphyne, half-snake, half-woman, to guard them. However, Hermes and Aigipan contrived to steal the sinews, and fitted them on to Zeus again (Τυφὼν δὲ ταῖς σπείραις περιπλεχθεὶς κατέσχεν αὐτόν, καὶ τὴν ἅρπην περιελόμενος τά τε τῶν χειρῶν καὶ ποδῶν διέτεμε νεῦρα, ἁράμενος δὲ ἐπὶ τῶν ὤμων διεκόμισεν αὐτὸν διὰ τῆς θαλάσσης εἰς Κιλικίαν καὶ παρελθὼν εἰς τὸ Κωρύκιον ἄντρον κατέθετο. ὁμοίως δὲ καὶ τὰ νεῦρα κρύψας ἐν ἄρκτου δορᾷ κεῖθι ἀπέθετο. καὶ κατέστησε φύλακα Δελφύνην δράκαιναν· ἡμίθηρ δὲ ἦν αὕτη ἡ κόρη. Ἑρμῆς δὲ καὶ Αἰγίπαν ἐκκλέψαντες τὰ νεῦρα ἥρμοσαν τῷ Διὶ λαθόντες). Thus Zeus, having recovered his strength, suddenly appeared in the sky on a chariot drawn by winged horses. Brandishing his bolts, he pursued Typhon to Mt Nysa. Here the monster was deceived by the Moirai; for, believing that it would increase his strength, he tasted of mortal fruit. Pursued further to Thrace, he carried on the fight round Mt Haimos and hurled whole mountains at Zeus. But the thunderbolt forced these mountains back upon him, till he deluged the range with his blood (Αἷμος from αἷμα). He essayed to escape through the Sicilian sea. But Zeus finally crushed him beneath Mt Aitne, from which the fiery blasts of the thunderbolts that were flung can still be seen to issue.

(2) Nonn. *Dion.* 1. 137 ff.—2. 712: Zeus, enamoured of Plouto (*supra* i. 156), had hidden his thunderbolts in the Arimian Cave, where their smoke betrayed them. Typhoeus or Typhon (the names are used indifferently) the Cilician, at the advice of his mother Gaia, stole them, kept them in a hollow rock, and usurping the powers of Zeus (1. 295 Ζεὺς νόθος, 391 νόθου Διός, cp. 479 f. γνήσιον ὑμνείων με νέον σκηπτοῦχον Ὀλύμπου | σκῆπτρα Διὸς φορέοντα καὶ ἀστράπτοντα χιτῶνα) proceeded to upset the whole course of nature. Thereupon the gods flew, like a flock of birds, to Egypt. Just then Kadmos, seeking Europe (*supra* i. 539 ff.), reached the Arimian Cave. Zeus, accompanied by Eros met him, and together they plotted the death of Typhoeus. Pan was to dress up Kadmos as a shepherd; Kadmos, to soothe Typhoeus with his *sýrinx*, receiving Harmonia as his reward; Eros, to quell the world-tumult and shoot a shaft at Typhoeus. Zeus in the form of a bull retired to Mt Tauros (Ταῦρος = ταῦρος). The plot is carried into effect. Typhoeus, charmed by Kadmos' music, leaves the bolts of Zeus in the cavern with Gaia. Kadmos feigns terror. Typhoeus reassures him, and suggests a musical contest between Kadmos' pipes and his stolen thunders. He even offers that, when he himself occupies the throne of Zeus, he will establish Kadmos in heaven pipes and all. Kadmos next proposes to chant Typhoeus' triumph to the seven-stringed *kithára*, with which he has surpassed Phoibos himself. Unfortunately Zeus, to pleasure Phoibos, has destroyed his strings; but, if he can get new strings, he will enchant the universe. Thereupon Typhoeus fetches from his cavern the sinews of Zeus, which during their former fight had fallen on the ground, and gives them to Kadmos. Kadmos handles the sinews and stores them in a hollow rock for Zeus (1. 510 ff. καὶ ταχὺς εἰς ἑὸν ἄντρον ἐπείγετο· κεῖθεν ἀείρας | νεῦρα Διὸς δολόεντι πόρεν ξεινήια Κάδμῳ, | νεῦρα, τά περ χθονὶ πῖπτε Τυφαονίῃ ποτὲ χάρμῃ. | καὶ δόσιν ἀμβροσίην ἀπατήλιος ἥνεσε ποιμήν· | καὶ τὰ μὲν ἁμφαφάασκε καὶ ἅρμενον οἷά τε χορδὴν | ἐσσομένην φόρμιγγι κατέκρυφε κοιλάδι πέτρῃ, | Ζηνὶ Γιγαντοφόνῳ πεφυλαγμένα). He then with thin-drawn notes of his *sýrinx* pipes to the unwitting Typhoeus the coming victory of Zeus. Meantime Zeus creeps into the cave, recovers his weapons, and conceals Kadmos in a cloud. The music stops. Typhoeus, eager to resume his rage, goes in search of the thunderbolts and discovers that he has been tricked. His wrath is unbounded. The gods are still in Egypt. But Zeus gives battle from Mt Tauros and, after a scene of prodigious

before he passes into a milder mood[1]! But, such vagaries notwithstanding conflict, blasts Typhoeus with his lightnings. To Kadmos he speaks words of comfort, and so retires to Olympos, taking the gods with him.

M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 228 says truly that the barocco trait of Typhon excising the sinews of Zeus is unparalleled in Greek mythology (Sir J. Rhys *Hibbert Lectures 1886*[3] London 1898 pp. 119—122 cp. the Old Norse myth of Tyr *v.* the wolf Fenrir [who is bound with the fetter Gleipnir, made in part of the sinews of bears: see P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 246] and the Old Irish myth of Nuada *Argat-lám v.* the Fir Bolg champion Sreng [which I have discussed in *Folk-Lore* 1906 xvii. 28 f., *supra* p. 224 n. 1]) and must be due to a learned importation of Egyptian elements. The Count de Marcellus (ed. Paris 1856 p. 8 of 'Notes et commentaires') aptly quotes Plout. *de Is. et Os.* 55 *ὅθεν ἐν Κοπτῷ τὸ ἄγαλμα τοῦ Ὥρου λέγουσιν ἐν τῇ ἑτέρᾳ χειρὶ Τυφῶνος αἰδοῖα κατέχειν· καὶ τὸν Ἑρμῆν μυθολογοῦσιν, ἐξελόντα τοῦ Τυφῶνος τὰ νεῦρα, χορδαῖς χρήσασθαι, διδάσκοντες ὡς τὸ πᾶν ὁ λόγος διαρμοσάμενος σύμφωνον ἐξ ἀσυμφώνων μερῶν ἐποίησε, καὶ τὴν φθαρτικὴν οὐκ ἀπώλεσεν, ἀλλ' ἀνεπήρωσε, δύναμιν. κ.τ.λ.* (in the sequel Typhon takes out the eye of Horos, swallows it, and then restores it—the Egyptian explanation of a solar eclipse). Mayer *loc. cit.* further points out that Typhon hides the sinews of Zeus in a bear's skin because the constellation of the Bear was in Egypt regarded as the soul of Typhon (Plout. *de Is. et Os.* 21 *τὰς δὲ ψυχὰς ἐν οὐρανῷ λάμπειν ἄστρα, καὶ καλεῖσθαι κύνα μὲν τὴν Ἰσιδος ὑφ' Ἑλλήνων, ὑπ' Αἰγυπτίων δὲ Σῶθιν, Ὡρίωνα δὲ τὴν Ὥρου, τὴν δὲ Τυφῶνος, ἄρκτον*). He adds *ib.* p. 229 n. 177 that the derivation of *Αἶμος* from Typhon's *αἷμα* recurs in connexion with Egypt (Steph. Byz. *s.v.* Ἡρώ).

One obvious difficulty remains. If the Greek stories were merely *Αἰγύπτιοι λόγοι*, Hermes ought to have docked the sinews of Typhon, not Typhon the sinews of Zeus. Probably the sense of justice, which led the Orphists to declare that Kronos the castrator of his father must himself be castrated by his son (*supra* p. 448 n. 1), prompted a later generation to demand the like penalty of Zeus. It may be that the *νεῦρα Διός* were originally a euphemism for the *αἰδοῖα Διός*, cp. Plout. *de Is. et Os.* 55 *Τυφῶνος αἰδοῖα* and the use of *νεῦρα* in Athen. 64 B (with J. E. B. Mayor's note on Iuv. 10. 205).

[1] Another explanation, advanced by A. Lang *Custom and Myth* London 1884 p. 45 ff., *id. Myth, Ritual, and Religion* London 1887 i. 299 ff., and treated as plausible by Farnell *Cults of Gk. States* i. 27 and Frazer *Golden Bough*[2]: Adonis Attis Osiris[2] i. 283, sees in these stories 'a myth of the violent separation of the earth and sky, which some races, for example the Polynesians, suppose to have originally clasped each other in a close embrace.' Frazer *loc. cit.* i. 283 n. 3 quotes a doubtful Egyptian parallel, in which Osiris perhaps mutilates his father Set at the separation of earth and heaven.

More probably we have here to do with mythical echoes of a primitive custom. When Kronos succeeds to Ouranos, he must possess himself of his predecessor's fertilising powers. Since these reside in the genitals, the new god must castrate the old. It may be suspected that originally he kept the relics as jealously as Typhon keeps the *νεῦρα Διός*. The mutilations of Kronos by Zeus and of Zeus by Typhon will be later repetitions of the same early myth, which long after its meaning had been forgotten came ricochetting down the ages. The most instructive parallel, as Miss Harrison points out to me (Sept. 23, 1918), is that of the early kings of Uganda first published by my friend the Rev. J. Roscoe 'Kibuka, the War God of the Baganda' in *Man* 1907 vii. 161—166 with pl. L, 1—3 and 4 figs. in text (Kibuka and his brother Mukasa, who lived on one of the islands of Lake Victoria, have become the two principal gods of the Baganda. Kibuka's relics include a stool with a hollowed seat containing his lower jawbone, his testicles, and his *phallós*, in three leathern cases decorated with shells and beads), cp. W. Ridgeway *The Dramas and Dramatic Dances of Non-European Races* Cambridge 1915 p. 379 ff. figs. 85—87.

Miss Harrison has further brought to my notice the latest attempt to solve the problem, that of the psychoanalyst. It is implied, if not expressed, in S. Freud *Totem und Tabu* Leipzig—Wien 1913 (extr. from *Imago* 1912 i and 1913 ii) p. 120 f. 'Wer aber

standing, Schwartz has fastened on a possibility that merits consideration. The comparative feebleness of one of the twins is certainly a recurring feature[1], and *may* presuppose loss of virility. Dr Rendel Harris[2] points out that on the chest of Kypselos one of the Dioskouroi was bearded, the other beardless[3],—a distinction found also on a *sarcophagus* at Arles[4]. The mystical school of Epimenides[5] even maintained that the Dioskouroi were respectively male and female[6]. Whether Iphikles, sometimes called

die Geschichte des kleinen Hans aufmerksam durchsieht, wird auch in dieser die reichlichsten Zeugnisse dafür finden, dass der Vater als der Besitzer des grossen Genitales bewundert und als der Bedroher des eigenen Genitales gefürchtet wird. Im Ödipus- wie im Kastrationskomplex spielt der Vater die nämliche Rolle, die des gefürchteten Gegners der infantilen Sexualinteressen. Die Kastration und ihr Ersatz durch die Blendung ist die von ihm drohende Strafe' (English ed. London 1919 p. 216).

[1] In the *Iliad* Machaon is more to the fore than his brother Podaleirios: cp. Hyg. *fab.* 97, where Machaon takes twenty ships to Troy, Podaleirios ten. But later epos distinguished Machaon as surgeon from Podaleirios as physician, and preferred the less drastic art. See Türk in Roscher *Lex. Myth.* iii. 2587 f., Lübker *Reallex.*[8] p. 627. U. von Wilamowitz-Moellendorff *Isyllos von Epidauros* Berlin 1886 p. 51 regards Ποδαλείριος as a Carian name, cp. Steph. Byz. *s.v.* Σύρνα· πόλις Καρίας, ἔκτισται δὲ ὑπὸ Ποδαλειρίου. κ.τ.λ. and Ποδάλεια in central Lykia. The Greeks, however, here as elsewhere (*supra* i. 25), tried to extract sense from the Carian name (*et. Gud.* p. 471, 28 ff. =*et. mag.* p. 678, 17 ff., Favorin. *lex.* p. 1525, 4 f., Eustath. *in Il.* pp. 395, 32, 962, 59 ff.); and modern critics have followed suit. T. Panofka in the *Abh. d. berl. Akad. 1845* Phil.-hist. Classe p. 342 f. renders 'weissfüssig, schnell,' cp. ποδάργης; W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 ii. 1215, 'Rosentreter od. Zierfuss'; A. Fick—F. Bechtel *Die griechischen Personennamen*[2] Göttingen 1894 pp. 397, 406, 'zart, schwach?'+'Fuss,' followed by S. Eitrem *Die göttlichen Zwillinge bei den Griechen* (*Videnskabsselskabets Skrifter* II. Historisk-filos. Klasse 1902 No. 2) Christiania 1902 p. 93 'der schwachfüssige'; A. Fick in the *Beiträge zur Kunde der indogermanischen Sprachen* 1902 xxvi. 320, 'schmalfuss.' Ποδαλείριος, understood as 'Lily-foot' implying weakness in the feet (on the François-vase Hephaistos' distorted feet are white: Furtwängler—Reichhold *Gr. Vasenmalerei* i. 6 pl. 1—2), might well be contrasted with Μαχάων, whose name was connected with μάχη (S. Eitrem *loc. cit.* p. 92) rather than with μῆχος, μᾶχος (A. Fick—E. Bechtel *op. cit.*[2] pp. 198, 399, A. Fick *loc. cit.* 1902 xxvi. 320 f.) or with μάττειν (H. Usener *Götternamen* Bonn 1896 pp. 150 n. 8, 170).

Mr E. S. Hartland has suggested to me in conversation (Oct. 1, 1918) that a Biblical parallel is to be found in the case of Jacob and Esau. The analogy is indeed singularly complete; for the statement that the mysterious Wrestler 'touched the hollow of Jacob's thigh in the sinew of the hip' (Gen. 32. 32, cp. 32. 25) may, as Mr Hartland urges, refer to the *genitalia* (see J. Skinner *A Critical and Exegetical Commentary on Genesis* Edinburgh 1910 pp. 341 f., 410 f.).

[6] Lyd. *de mens.* 4. 17 p. 78, 20 ff. οἱ δὲ περὶ Ἐπιμενίδην ἄρρενα καὶ θήλειαν ἐμύθευσαν τοὺς Διοσκόρους, τὸν μὲν αἰῶνα, ὥσπερ μονάδα, τὴν δὲ φύσιν, ὡς δυάδα, καλέσαντες· ἐκ γὰρ μονάδος καὶ δυάδος ὁ πᾶς ζωογονικὸς καὶ ψυχογονικὸς ἐξεβλάστησεν ἀριθμός.

Iphiklos[1], can be identified with Iphiklos son of Phylakos, whose debility was cured by Melampous[2], is very doubtful.

(λ) Apollon and Artemis.

If one of the twins, he who stood for the dark nocturnal Sky, was thus effeminate, the question arises: Can we accept Dr Rendel Harris' further contention 'that Apollo and Artemis are twins displacing twins'[3]? *À priori* such displacement is, of course, quite thinkable; yet we cannot, so far as I know, adduce any example of its actual occurrence. Two ancient cult-centres where it might naturally have occurred are Delos and Delphoi. At Delos we have the earlier Hyperborean maidens Opis and Arge[4], or Opis and Hekaerge[5], together with their male counterparts Opis and Hekaergos[6]; we have also the later Hyperborean maidens Hyperoche and Laodike[7]. At Delphoi we meet with the heroes Hyperochos and Laodokos[8], or Hyperochos and Amadokos, who were likewise Hyperboreans[9]; we meet too with the heroic couple Phylakos and Autonoos[10]. But none of these will serve our turn. For the Delian pairs, if twins[11], were not male; and the Delphian pairs, though male, were not twins[12]. On the whole, it seems most likely that Opis and Arge (Hekaerge) were originally appellatives of Artemis[13], and at least possible that Hyperochos and Laodokos (Amadokos) were one-time appellatives of Apollon[14]. The male Opis and Hekaergos

[8] Paus. 10. 23. 2. [9] Paus. 1. 4. 4. [10] Hdt. 8. 38 f.

[11] Claud. *de cons. Stil.* 3. 253 ff. Οὖπις, Ἑκαέργη, and Λοξώ form a triad in Kallim. *h. Del.* 292 with schol. *ad loc.*, Nonn. *Dion.* 5. 489 ff., 48. 332 ff., *et. mag.* p. 641, 56 ff.

[12] That Hyperochos and Laodokos (Amadokos) were twins, we are not told. They are mentioned as a triad along with Pyrrhos, son of Achilles (Paus. 1. 4. 4, 10. 23. 2). That Phylakos and Autonoos were twins, is very improbable, since their precincts were some distance apart (Hdt. 8. 39, cp. Paus. 10. 8. 7 with H. Hitzig—H. Blümner *ad loc.*).

[13] See *e.g.* O. Höfer in Roscher *Lex. Myth.* iii. 927 ff.

[14] Ὑπέροχος, 'Eminens, Excellens, Superior' (Stephanus *Thes. Gr. Ling.* viii. 235 C—D). Ἀμάδοκος and Λαόδοκος are comparable with the Thracian names Μήδοκος, Σπαράδοκος, etc. (F. H. M. Blaydes on Aristoph. *ran.* 608). Λαόδοκος was perhaps changed into the more intelligible Λαόδικος, whence Λαοδίκη—a favourite name in the family of Seleukos (O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 220): but this is guessing in the dark.

were invented by way of compliment to Apollon, just as the female Hyperoche and Laodike were invented by way of compliment to Artemis.

It is, then, far from certain that Apollon and Artemis superseded any pair of twins. Indeed it is far from certain that they were originally twins themselves. When, where, and how they first got together, are questions intimately bound up with the problem of Apollon's *provenance*. And here opinion has, within the last quarter of a century, fairly boxed the compass. K. Wernicke (1894)[1] remarks that Homer was already acquainted with Apollon and Artemis as the twin offspring of Zeus by Leto, and lays stress on Delos as the mainstay, if not the cradle, of their connexion. L. R. Farnell (1896)[2], who groups the cults of Apollon-and-Artemis in a valuable conspectus, would push their joint worship back to the Homeric age and concludes: 'The place where the two deities were first closely associated, and whence the belief in their twinship spread, was probably Delos[3].' T. Zielinski (1899)[4] is in favour of Troy as the *Ausgangspunkt*. Apollon and his sister Artemis, a pair of light-divinities, came from the Troad, where behind the rocks of Mount Ide lay *Lykía*, a blissful 'Land of Light' inhabited by the pious Hyperboreans. From thence the cult of Apollon in early epic times made its way into Greece through Thermopylai. Parnassos became the second holy mountain of the god, who found a double hypostasis—corresponding with the Amphictionic meetings at Delphoi and Pylai—in *Oréstes*, the 'Mountain-man,' and *Pyládes*, the 'Gate-man.' U. von Wilamowitz-Moellendorff (1903, 1908)[5] likewise looks to the east. He argues that in the *Iliad* Apollon protects Trojans and Lycians, that as the god of Lykia he has the appellatives *Lykegenés*[6], *Lýkeios*, *Lýkios* and in accordance with

K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 33—35.

Farnell *Cults of Gk. States* ii. 464—467, 577—581.

[3] A Melian *amphora*, now at Athens (Collignon—Couve *Cat. Vases d'Athènes* p. 120 ff. no. 475), has for its principal design the meeting of Apollon and Artemis. Apollon, bearded, arrives in a car drawn by four winged steeds. He carries a seven-stringed lyre, to which the reins are attached (!), and brings with him two females, usually regarded as Muses, but better identified by M. P. Nilsson in the *Archiv f. Rel.* 1913 xvi. 313 with the Hyperborean maidens. If so, the locality must be Delos. Artemis advances to welcome the god, having a bow and quiver on her back, an arrow in her left hand, and a stag in her right (A. Conze *Melische Thongefaesse* Leipzig 1862 pl. 4 (=my fig. 357), H. von Rohden in Baumeister *Denkm.* iii. 1954 f., Perrot—Chipiez *Hist. de l'Art* ix. 471 ff. fig. 235).

[6] *Il.* 4. 101, 119. Wilamowitz contends that Pandaros the Lycian presumably uses

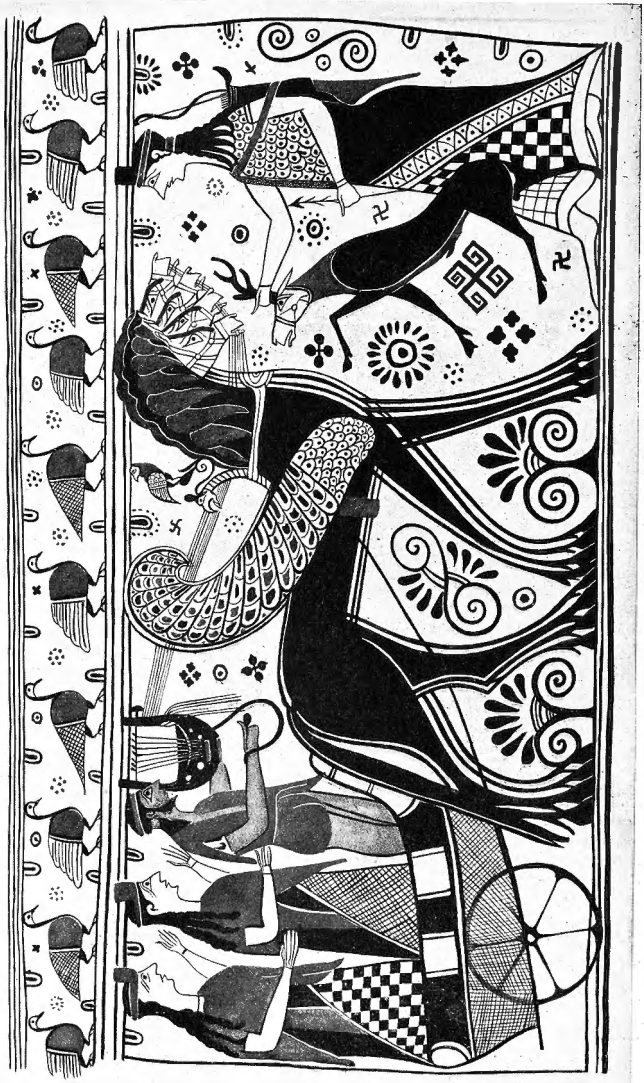

Fig. 357.

Lycian custom[1] the metronymic *Letoïdes*, that his sister was a barbaric goddess equated by the Greeks with their own Artemis, that the birth of the twins was located at Araxa in Lykia[2], that their mother Leto bears a native name (the Lycian *lada* meaning 'wife'[3]), that the Delian Apollon was believed to winter in Lykia[4], and that the earliest cult-poetry of Delos was attributed to the Lycian Olen[5]. Hence Wilamowitz concludes that Leto and her twins were essentially Asiatic (Lato *Asiâtis* was worshipped at Argos[6]), belonging by rights to the Lycians in their original abode, that the cult of all three had before the arrival of the Greeks in Asia Minor already spread to Delos and Crete, and that it passed over from the islands to the mainland of Greece, where Apollon usurped the position of this, that, and the other older deity. M. P. Nilsson (1906)[7] accepts in the main the results reached by Wilamowitz and seeks to support them by certain heortological considerations. He observes that in Greece, apart from the great cult-centres of Delos, Delphoi, and Mount Ptoion, the chief festivals of Apollon are precisely those in which the god appears as an intruder[8]; that Apolline festivals are comparatively rare on the Greek mainland, much more frequent in the islands and in Asia Minor; that Apollon has a higher percentage of appellations derived from place-names than any other god, his worship, as a missionary cult, being widely disseminated, and his numerous epiphanies suggesting that in many places he was invoked to quit

λυκηγενής in the sense of 'born in Lykia.' For other interpretations see O. Höfer in Roscher *Lex. Myth.* ii. 2174 f. and Frazer *Pausanias* ii. 195 f.

his ancient haunt and attend the new local rites. Nilsson further (1911)[1] notes that the first day of the month was sacred to Apollon as *Nouménios*[2] and that the twentieth was sacred to him as *Eikádios*[3], but that his festivals regularly fell on the seventh of the month[4]. Hence we are to infer that Apollon was essentially connected with the lunisolar calendar and its sacred sabbath, that his worship originated in Babylonia, and that it spread through Asia Minor to Greece. O. Gruppe (1906)[5], though he does not go so far afield as Mesopotamia, again turns his face eastwards. He holds that the worship of a barbaric mother-goddess *Lató*, whose name was Ionised as *Letó*, and the recognition of Apollon and Artemis as her twin children may be attributed to Hellenic settlers on the coast of Asia Minor in the course of the ninth and eighth centuries B.C. W. Aly (1908)[6] is disposed to reject the eastern origin of Apollon. He argues that, if the god had come—as Wilamowitz thought—from Lykia, his cult must have reached Greece *viâ* Crete. We should therefore look to find early forms of his worship in that island. But a careful survey of the Cretan evidence can produce nothing of the sort. Rather we are driven to conclude that the cult was imported from Greece, especially from Delphoi[7]. E. Meyer (1909)[8] also parts com-

[6] W. Aly *Der kretische Apollonkult* Leipzig 1908 pp. 1—57.

[7] *Id. ib.* p. 57 : 'Fassen wir zusammen, so hat unsere Untersuchung ergeben, dass sich auf Kreta nichts findet, das Anspruch darauf machte, für altapollinisch zu gelten. Der verbreitete Kult des pythischen Gottes kommt von *Delphi*, während das, was Delphi aus Kreta entlehnt, nicht an Apollons Namen haftet. *Dorisch* dürften wir den Karneios, Dromaios, Agyieus nennen ; die übrigen Gestalten sind lokale *Sondergötter*, die mit Apollon erst im Laufe der Entwicklung verschmelzen. Besonders deutlich traten der Apollon von Eleutherna und Apollon Delphinios als eigenartige Persönlichkeiten hervor. Während sich in dorischer Zeit Abhängigkeit von *Argos* zeigte, wiesen die älteren Spuren nach *Böotien*, in einem besonderen Falle nach *Thessalien*. *Kleinasien* kam nur ganz gelegentlich in Betracht. Die sprachliche Untersuchung konnte noch kein Resultat erzielen, da sie von dem ethnologischen Problem abhängig ist. Im Ganzen geht Kreta in vordorischer Zeit *nicht* mit dem Osten, sondern mit dem Mutterland.

Kam Apollon aus Lykien, so ist er jedenfalls an Kreta völlig vorübergegangen, eine Tatsache, die den östlichen Ursprung des Gottes als sehr zweifelhaft erscheinen lässt.'

[8] E. Meyer *Geschichte des Altertums*[2] i. 2. 639 f.

pany with Wilamowitz in regard to the alleged Lycian character of Apollon and his name[1]. Meyer believes that Apollon was originally a deity of flocks and herds, common to all the Greek stems, and that later he became an oracle-giver, when identified with one or another native oracular god on the western and southern coasts of Asia Minor —an identification which entailed certain foreign elements in his cults and myths, especially the story of his birth. A. L. Frothingham (1911)[2] conceives that Apollon, a sun-god, originated in Crete, being none other than Chrysaor, the offspring of Medousa[3], who is to be identified with Artemis—and, for that matter, with Rhea, Kybele, Demeter, etc.—as a form of the Great Mother[4]. Apollon came from Crete to Delphoi, returning later to Crete again as Apollon *Pýthios*[5]. Artemis too, a goddess of nature and fertility, was Cretan, if not in her origin, at least in her development as mistress of mountains and lions, of snakes, of doves or birds[6]. In Asia Minor, between *c.* 1000 and 600 B.C.[7], she took on the typical form of Medousa, her wings being derived from Hittite divinities, her hideous face from the Egyptian Bes[8]. The resultant *Gorgóneion*, a solar effigy, appears in connexion with Artemis at Sparta[9] and in Korkyra[10], with Apollon at Miletos[11] and Delphoi[12]. Latterly scholars have shown a distinct tendency to return to C. O. Müller's belief in the northern origin of Apollon, even if they do not with Müller regard him as an essentially Dorian god[13]. L. R. Farnell (1907)[14] writes: 'We discern that Apollo came into Hellas with the invaders from the North, and aided by the

[1] *Id. ib.*[2] i. 2. 640 n.: 'dass der Name Apollon fremden Ursprungs sei, kann ich nicht für richtig halten. Er ist überall ein Hauptgott der Griechen, auch in den Kultformeln bei Homer; gerade bei den Doriern, bei denen wir am wenigsten Kleinasiatisches erwarten dürfen, ist er geradezu der Stammgott; und ein grosser Teil der apollinischen Kulte und Mythen hat mit dem Orakelgott gar nichts zu tun. Andrerseits ist der Name Apollon in Lykien nicht nur nicht nachweisbar—das würde wenig beweisen, da wir lykische Götternamen aus den Inschriften überhaupt nicht kennen—, sondern der Name Ἀπολλωνίδης wird lykisch durch pulenida wiedergegeben (C I Lyc. 6), ist also aus dem Griechischen entlehnt, was gewiss nicht der Fall sein würde, wenn Apollo ein altlykisches Äquivalent gehabt hätte.'

[13] C. O. Müller *The History and Antiquities of the Doric Race* trans. H. Tufnell and G. C. Lewis Oxford 1830 i. 227 ff. (p. 230: 'The most ancient settlements of the Doric race, of which any historical accounts are extant, were...the country at the foot of Olympus and Ossa, near the valley of TEMPE'—p. 300: 'the worship of Apollo came from the most northern part of Greece, from the district of Tempe').

[14] Farnell *Cults of Gk. States* iv. 99 f., 111 f.

light of two records we can perhaps follow the double trail of his southward pilgrimage, the record concerning the Hyperboreans and that about the sacred way from Tempe to Delphi....But the furthest northern points to which we can push back the cult of Apollo are Illyria, Thrace[1], and Macedon.' Again: 'The Apolline worship at a very early, though perhaps not the earliest, era of Hellenic history had struck deep roots in North Greece, and from thence spread its branches southwards and across the sea:...it was already in some sense the common property of the leading tribes in the north, Thessalian-Achaeans, Ionians, Dryopes, and Dorians, before the Dorian conquest of the Peloponnese and before the great colonies were planted along the Asia Minor coast; and hence in the later era of expansion it became a leading cult in the cities of Aeolis and Ionia, and dominant in the Dorian Pentapolis: the Peloponnesian Dorians were devoted to the cults of Apollo [*Pythaeús*] and [*Kárneios*], but both these they probably found already established there by an earlier Dryopian immigration, while the Amyclaean Apollo was the divinity of the Achaean, the Messenian Apollo [*Kórydos*] probably of a Minyan population; and Apollo Lykeios who gave his name to Lycia[2] belonged to the oldest stratum of the religion, and his cult was the common heritage of many races.' G. Murray at first (1911)[3] laid stress on the epic formula of appeal to Zeus, Athena, and Apollon[4] as establishing the Achaean character of all three[5], but later (1912)[6] somewhat modified his view: 'Zeus is the Achaean Sky-god. His son Phoebus Apollo is of more complex make. On one side he is clearly a Northman. He has

[1] 'The wide diffusion of the cult of Apollo in Thrace in the historical period, vide *Geogr. Reg.* s.v. [*id. ib.* iv. 433], may be regarded as an inheritance from an aboriginal period: the figure of Apollo may have emerged when the Hellenes were in Thrace, or may have belonged equally to Thracians and Hellenes: Thomaschek's *Die alten Thraker* takes the view that Thrace was his original home.' Hardly so. W. Tomaschek in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1894 cxxx. 2. 48 f. says: ''Απόλλων...uralte Gottheit der lelegischen Aboriginer....Von einer Verehrung des Apollon in Thrake weiss Herodot nichts....[Numerous dedications to Apollon in the Thracian area are cited] Dies alles unter griechischem Einfluss und aus späterer Zeit.' The slip is repeated by M. H. Swindler *Cretan Elements in the Cults and Ritual of Apollo* Bryn Mawr 1913 p. 12. Harrison *Proleg. Gk. Rel.*[2] p. 462 is more circumspect.

[2] Cp. Gruppe *Gr. Myth. Rel.* p. 751 n. 2. But that Lykia was named after Apollon Λύκειος is highly improbable.

[3] G. Murray *The Rise of the Greek Epic*[2] Oxford 1911 pp. 69, 88 ('The two clearest gods of Homer's Achaeans are perhaps the patriarchal Zeus and his son Apollo; next to them Athena').

[6] G. Murray *Four Stages of Greek Religion* New York 1912 p. 69 f.

connexions with the Hyperboreans....On the other side Apollo reaches back to an Aegean matriarchal Kouros. His home is Delos, where he has a mother, Leto, but no very visible father....He is no "Hellene." In the fighting at Troy he is against the Achaioi: he destroys the Greek host, he champions Hector, he even slays Achilles. In the Homeric hymn to Apollo[1] we read that when the great archer draws near to Olympus all the gods tremble and start from their seats; Leto alone, and of course Zeus, hold their ground.' Miss M. H. Swindler (1913)[2], after a survey of these divergent views, frankly abandons the quest: 'An attempt to name the tribe in which the Apollo cult had its beginning can scarcely meet with success. The reasons for this are apparent. Although Apollo is a comparatively late comer into Greece, he stands out in Homer, almost in his full development, with a cosmopolitan character. He is essentially a migratory god, which seems to be one source of his great popularity. While he sojourned in the various lands to which he was "invited," he took over into his cult the local gods and oracles, and acquired new epithets. He is at home in Dorian Pytho and Ionian Delos; he has his place in almost all of the oracles on the western and southern coast of Asia Minor, and is especially bound to Lycia. The islands know him and northern Greece in particular bears witness to his worship. It is this pandemic character of Apollo and this tendency to appropriate foreign elements to his cult which render difficult the problem of determining his original character. The origin of his cult and the earliest elements contributed to it must for this reason remain problematic.'

I confess, I am not so despondent. The myth of the Hyperboreans[3] goes a long way, if not all the way, towards a settlement of the points at issue.

Himerios[4] (*s.* iv A.D.) has preserved for us in prose form the contents of a poem by Alkaios[5] (*c.* 600 B.C.), which affords the earliest known version of the myth:

'When Apollon was born, Zeus arrayed him with a golden *mitra* and a lyre, and giving him a chariot of swans to drive sent him to Delphoi and the streams of Kastalia, there to utter justice and law for the Hellenes. But Apollon, stepping on to the chariot, urged the swans to fly to the Hyperboreoi.

[1] *H. Ap.* 1 ff.

[2] M. H. Swindler *Cretan Elements in the Cults and Ritual of Apollo* Bryn Mawr 1913 p. 13 f.

[3] The fullest and fairest collection of evidence with regard to the Hyperboreans is that of Daebritz in Pauly—Wissowa *Real-Enc.* ix. 258—279. See also important articles by O. Crusius and M. Mayer in Roscher *Lex. Myth.* i. 2805—2841, O. Schroeder 'Hyperboreer' in the *Archiv f. Rel.* 1905 viii. 69—84, Gruppe *Myth. Lit.* 1908 p. 520 f., G. H. Macurdy 'The Hyperboreans' in the *Class. Rev.* 1916 xxx. 180—183.

[4] Himer. *or.* 14. 10 f.

[5] Alk. *frag.* 2 Bergk[4].

The Delphians, perceiving it, composed a paean and a song, and arranged dances of young men round the tripod, and called upon the god to come from the Hyperboreoi. He, after he had spent a whole year[1] in giving law to the men that were there, thought that the right time was come for the Delphic tripods too to be sounding, so bade his swans fly back again from the Hyperboreoi. Now it was summer, indeed midsummer, when, according to Alkaios, Apollon was brought from the Hyperboreoi. Hence, at the time when summer shines forth and Apollon is here, the lyre too brightens into a summer strain concerning the god. Nightingales sing for him as one would expect birds to sing in Alkaios. Swallows also sing and cicalas, not telling of their own fortunes among men, but voicing all their songs about the god. Kastalia too in poetic wise rolls her silver streams, and Kephissos rises high with tossing waves after the likeness of Homer's Enipeus. For Alkaios, like Homer, does his utmost to make the very water able to feel the god's advent.'

From this prosified extract we learn that, at the close of the seventh century B.C., Apollon was supposed to have reached the land of the Hyperboreans by traversing the air with a team of swans[2]. His track

[1] ὁ δὲ ἔτος ὅλον παρὰ τοῖς ἐκεῖ θεμιστεύσας ἀνθρώποις, κ.τ.λ. This ἔτος is presumably a year of twelve months, not a great year (ἐνιαυτός: see *supra* i. 540 n. 1).

[2] For Apollon (*a*) drawn by swans or (*b*) riding on a swan see L. Stephani in the *Compte-rendu St. Pét.* 1863 pp. 29 ff., 80 ff., A. Kalkmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 233 ff., Overbeck *Gr. Kunstmyth.* Apollon pp. 312, 350—354, 494 f., P. Hartwig *Die griechischen Meisterschalen der Blüthezeit des strengen rothfigurigen Stiles* Stuttgart—Berlin 1893 p. 188 f., L. Malten *Kyrene* Berlin 1911 pp. 8 f., 43.

(*a*) The former type is known to us from one example only—an engraved *smáragdos* of Roman work at Petrograd, of which a modern paste copy existed in the Stosch collection and passed with it to Berlin (fig. 358 (scale $\frac{3}{1}$) after Overbeck *op. cit.* Apollon p. 495 fig. 24=F. Studniczka in Roscher *Lex. Myth.* ii. 1727 fig. 3), representing Apollon with bay-branch and quiver as he bears off the reluctant Kyrene in a chariot drawn by two swans (cp. schol. Ap. Rhod. 2. 498 Φερεκύδης δέ φησι (*frag.* 9 (*Frag. hist. Gr.* i. 72 Müller)) καὶ Ἀράιθος (*frag.* 4 (*Frag. hist. Gr.* iv. 319 Müller)) ἐπὶ κύκνων αὐτὴν ὀχηθεῖσαν κατὰ Ἀπόλλωνος προαίρεσιν εἰς τὴν Κυρήνην ἀφικέσθαι, Philostr. min. *imagg.* 14. 2 Apollon promises Hyakinthos δώσειν...ὑπὲρ κύκνων (κύκνον cod. P. and ed. Ald. C. F. W. Jacobs cj. κύκνου) αὐτὸν ὀχούμενον περιπολεῖν χωρία, ὅσα Ἀπόλλωνος φίλα, Nonn. *Dion.* 8. 226 ff. εἰ δέ σοι οὐρανόθεν πόσις ἦλυθε καλὸς Ἀπόλλων | καὶ Σεμέλης ὑπ' ἔρωτι λελασμένος ἔπλετο Δάφνης, | νόσφι δόλου κρυφίοιο δι' ἠέρος εἶς σὲ χορεύσῃ (D. F. Graefe cj. χορεύσαι) | ἀβρὸς ἀσιγήτων ἐποχημένος ἅρματι κύκνων,—quoted by O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1852 p. 60 n. 26).

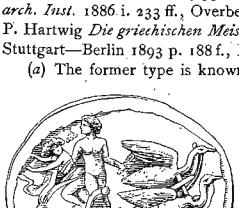

Fig. 358.

(*b*) The latter type is fairly common in vase-paintings, terra-cottas, coins, etc. The earliest of the vases is a fragmentary *kýlix* from the beginning of *s.* v B.C. (P. Hartwig *op. cit.* p. 188 f. pl. 18, 3). The earliest coins are electrum *statêres* of Kyzikos struck *c.* 400—350 B.C. (W. Greenwell 'The electrum coinage of Cyzicus' in the *Num. Chron.* Third Series 1887 vii. 57 f. pl. 1, 22 Paris, *id. ib.* Third Series 1890 x. 22 pl. 3, 3 Greenwell collection (excellent specimen), *Brit. Mus. Cat. Coins* Mysia p. 33 pl. 8, 13, Babelon *Monn. gr. rom.* ii. 2. 1431 f. pl. 175, 16). I illustrate (pl. xxv) a *hydría* of late red-figured style, found in Kyrenaike, preserved in the British Museum, and hitherto unpublished (*Brit. Mus. Cat. Vases* iii. 182 f. no. E 232, Overbeck *op. cit.* Apollon p. 350 no. 2,

Hydria from Kyrenaike, now in the British Museum: Apollon, riding on a swan, returns to Delphoi.

See page 460 *n.* 2 (*b*).

P. Hartwig *op. cit.* p. 189 n. 1). Apollon, with radiate fillet, bordered *himátion*, and bay-branch, sits between the wings of a swan, which is about to alight on the flowering earth. On rising ground to the right a Satyr leans on his left hand and knee and looks round at Apollon, raising his right hand to his face (*ἀποσκοπεύων*: *supra* i. 709). Higher up on the right stands a Maenad, holding a *thýrsos* in one hand and beckoning to the god with the other. Satyr and Maenad on the right were balanced by Maenad (?) and Satyr (?) on the left; of whom the Maenad (?), seated on a *himátion* with a square box behind her, looks upward at Apollon, while the Satyr (?)—now largely lost—stands with a *thýrsos* in his left hand. The whole scene is comparable with that on a vase formerly in the Hamilton collection (Tischbein *Hamilton Vases* ii. 34 ff. pl. 12 (fair), Lenormant—de Witte *Él. mon. cér.* ii. 130 ff. pl. 42, Müller—Wieseler *Denkm. d. alt. Kunst* ii. 97 pl. 13, 140, Overbeck *op. cit.* Apollon p. 350 no. 1 Atlas pl. 22, 6 (Apollon only)). The

Fig. 359.

palm-tree would suit either Delos (so C. O. Müller *loc. cit.*, Welcker *Alt. Denkm.* i. 154 n. 21, Boetticher *Baumkultus* p. 419 n. 24 a) or Delphoi (so F. Wieseler *loc. cit.*, L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 68 f., *alib.*, Overbeck *op. cit.* Apollon p. 352 f.). But the appearance of Apollon as the centre of a Dionysiac circle seems to me decisive in favour of Delphoi. I cannot agree with my friend Mr H. B. Walters, who regards the Satyrs and Maenads as mere 'personifications of nature' (*Brit. Mus. Cat. Vases* iii. 183. Fig. 359 is from a photograph very kindly supplied to me by Mr Walters). I figure also two imperial coppers of Kalchedon in Bithynia, which show Apollon, lyre in hand, seated on his swan (*Brit. Mus. Cat. Coins* Pontus, etc. p. 128 no. 34 Iulia Paula, no. 35 Tranquillina pl. 28, 5, no. 36 Tranquillina, Overbeck *op. cit.* Apollon pp. 304, 312 Münztaf. 5, 11 Lucius Verus (=my fig. 360) and 12 Tranquillina, Waddington—

was none other than that 'Road of the Birds,' which in Lithuanian belief led to the celestial country[1]. In a word, it was the Milky Way[2]. Suspicion becomes certainty, when we take into account the next batch of references to the Hyperborean land. Pindar in a magnificent passage of his tenth *Pythian*[3], a poem composed for Hippokleas of Thessaly in 498 B.C., says of the victor's father:

Babelon—Reinach *Monn. gr. d'As. Min.* i. 299 pl. 47, 11 Trajan, 300 pl. 47, 16 f. M. Aurelius, 301 pl. 47, 21 Faustina Iunior, 301 no. 70 Lucius Verus, 302 pl. 47, 24 Septimius Severus (=my fig. 361), 302 no. 79 Iulia Domna, 304 no. 93 Elagabalos,

Fig. 360.

Fig. 361.

305 no. 99 Iulia Paula, 306 pl. 48, 20 Iulia Mamaea, 307 no. 115 Tranquillina, Head *Hist. num.*[2] p. 512. See further L. Stephani in the *Compte-rendu St. Pét.* 1863 p. 82).

Similarly Zeus was on occasion conceived as drawn by a team of eagles (*Brit. Mus.*

Fig. 362.

Cat. Terracottas p. 451 no. E 170=my fig. 362 a disk from Tarentum: diameter 2⅛ ins.), more often as upborne by a single eagle (*supra* p. 102 f. figs. 59—64).

[1] *Supra* p. 38. [2] *Ib.* [3] Pind. *Pyth.* 10. 27—46.

The copper sky he cannot scale ;
But all the joys we mortals hail
These hath he voyaged through to the utmost bound.
By ship nor foot shall e'er be found
The wondrous way to the Hyperborean throng.
Yet princely Perseus on a bygone day
Entered their homes and supped with them, men say,
Lighting their merry company among,
What time they offered in that bright abode
Whole hecatombs of asses[1] to the god.
Ay, for Apollon loves always
The feasting and the feasters' praise ;
And sure he laughs to see the sight
Of brute beasts ramping bolt upright.

[1] Cp. Clem. Al. *protr.* 2. 29. 4 p. 21, 26 ff. Stählin Σκύθαι δὲ τοὺς ὄνους ἱερεύοντες μὴ παυέσθων, ὡς Ἀπολλόδωρός φησι (*frag.* 13 (*Frag. hist. Gr.* i. 431 Müller)) καὶ Καλλίμαχος (*frag.* 187 Schneider), 'Φοῖβος Ὑπερβορέοισιν ὄνων ἐπιτέλλεται (Tanaquil Faber cj. ἐπιτέρπεται O. Schneider cj. ἐπιτέλθεται) ἱροῖς.' ὁ αὐτὸς δὲ ἀλλαχοῦ (*frag.* 118 Schneider) 'τέρπουσιν λιταραὶ Φοῖβον ὀνοσφαγίαι' (quoted also by schol. Pind. *Pyth.* 10. 49) = Arnob. *adv. nat.* 4. 25 quis ab Scythis asinos immolari ? non principaliter cum ceteris Apollodorus ? Iuv. 6. 468 f. illo lacte fovetur | propter quod secum comites educit asellas, | exul Hyperboreum si dimittatur ad axem. Ant. Lib. 20, writing in *s.* ii A.D. or later (*infra* Append. M *med.*), cites from the *Ornithogonia* of 'Boios' (G. Knaack in Pauly—Wissowa *Real-Enc.* iii. 633 f.) and from the epic *Apollon* by Simmias of Rhodes (W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 ii. 1. 92 f., Lübker *Reallex.*[8] p. 952) the story of Kleinis, which may be summarised as follows :—Near Babylon lived a man called Kleinis, a wealthy owner of oxen, asses, and sheep. Favoured by Apollon and Artemis, he often went with them to the temple of Apollon among the Hyperboreoi, where he saw the asses being sacrificed to the god. On reaching Babylon again he too was minded to offer a similar hecatomb at Apollon's altar. But Apollon came and threatened to kill him, unless he desisted and returned to his usual sacrifice of goats, sheep, and oxen, saying that the asses pleased him only if offered by the Hyperboreoi. So Kleinis drove the asses from the altar, and told all this to the children whom Harpe had borne him—Lykios, Ortygios, Harpasos, and Artemiche. Thereupon Lykios and Harpasos bade him to sacrifice the asses and enjoy the feast ; Ortygios and Artemiche, to hearken to Apollon. He followed the advice of the latter. But Harpasos and Lykios let the asses go, and drove them to the altar. At this the god sent madness upon the beasts, which devoured the young men and their servants, and Kleinis into the bargain. As they perished they called upon the gods. Poseidon in pity turned Harpe and Harpasos into the birds that bear their names. Leto and Artemis resolved to save Kleinis, Artemiche, and Ortygios, as being innocent persons. Apollon therefore, to pleasure Leto and Artemis, transformed Kleinis into a *ὑψιαλετος* (a large, dark eagle of the sort that slays fawns), Lykios into a *κόραξ* (a raven, white at first, but black later when it announced that Koronis daughter of Phlegyas had married Alkyoneus), Artemiche into a *πίφιγξ* (a lark ?), and Ortygios into an *αἰγίθαλλος* (a titmouse).

In the Amphictionic law of 380 B.C. (*Corp. inscr. Gr.* i no. 1688, 14 f. = *Corp. inscr. Att.* ii. 1 no. 545, 14 f. = Michel *Recueil d'Inscr. gr.* no. 702, 14 f. = J. Baunack in Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 643 ff. no. 2501, 14 f. = Roberts—Gardner *Gk. Epigr.* ii. 191 ff. no. 70, 14 f. = J. v. Prott and L. Ziehen *Leges Graecorum sacrae* ii no. 75, 14 f. καὶ τὰ ἱερήϊα ἀθρόα συναγόντων τὸς ὄνος τῶν δοκιμ[ασθέντων ἀποδόντες, ὁ δὲ ἐπὶ τὰν ἐκ]ατόμβαν δ[ρ]κον ὀμόσας εἴπερ τοὶ ἱερομνάμονες δοκιμαξέτω) the words τὸς ὄνος—as H. L. Ahrens *De dialecto Dorica* Gottingae 1843 p. 484 ff. pointed out—have nothing to do with asses (ὄνους), but with the prices (ὤνους) of the victims approved for sacrifice.

The Muse is never absent from their haunt,
But, while the virgin dancers circling chant,
Lutes lift their sound,
Flutes echo round.
With golden bay they bind the brow
And glad at heart go revelling now.
No fell disease, no cursed age
Can spoil the pilgrims' heritage,
Who free at last from weary fight
And far from Nemesis' despite
Dwell safe at home.
Thither did Danaë's son of valiant soul,
Guided by great Athena to his goal,
To join the band of all the blessed come.

Notice two points. On the one hand, when Pindar speaks of a 'wondrous way'—neither sea nor land—leading to a blissful abode free from disease and old age, he means beyond all reasonable doubt the Elysian track elsewhere described by him as 'the road of Zeus' or 'the gleaming way[1],' in a word the Galaxy. This actually passes through the constellation Perseus[2], an astronomical fact which explains the part played by that hero in the myth. On the other hand, the sacrifice of asses suggests an earthly rather than a heavenly location. Asses were slain for Ares by various tribes[3], including the inhabitants of Karmania[4], and for Priapos by the Lampsacenes[5]. They were further connected with Dionysos, Silenos, the Satyrs, etc.[6] These deities one and all emanate from the Thraco-Phrygian area. And, if the Tarentines sacrificed an ass to the Winds[7], it was presumably to the Etesian Winds which blew down the Adriatic from the north-west[8]. The ass, however, was unknown to the Scythians[9] and is but a stranger in central Europe[10]. We may therefore provisionally assume that those who habitually offered this beast to Apollon dwelt in or near Thrace.

The same curious bilocation of the Hyperborean realm appears in

other allusions of Pindar and his younger contemporary Bakchylides. A Pindaric poem cited by Strabo[1] spoke of the Hyperboreoi as 'living for a thousand years'—a view shared by Simonides[2] (556—468 B.C.), Megasthenes[3] (*c.* 300 B.C.), and others. Again, Bakchylides[4] made the Delian Apollon transport Kroisos and his daughter straight from the pyre to the Hyperboreoi; on which Sir R. C. Jebb[5] justly observes that the Hyperborean land is conceived as a paradise for pious mortals, like the Homeric Elysian Plain or the post-Homeric Islands of the Blest. But, if these passages imply that the Hyperboreoi lived in a celestial country to be reached by no ordinary route, Pindar's third *Olympian*[6], written for Theron of Akragas in 476 B.C., insists with equal clearness that they had a terrestrial abode in the Balkans. Herakles, pursuing the hind with golden horns, 'had seen the far-off land beyond the cold blast of Boreas,' had marvelled at its trees, and had been filled with desire to plant them at the end of the Olympic race-course. The poet in the context identifies this Hyperborean region with 'the Istrian land,' where 'Leto's horse-driving daughter' (Artemis) had welcomed the hero. It was 'from the shady springs of Istros' that he brought the olive to Olympia, 'after he had gotten it by persuading the servants of Apollon, to wit the folk of the Hyperboreoi.'

The account here given by Pindar is not free from difficulty. My friend Sir W. Ridgeway has argued that the hind with golden horns is due to a reminiscence of the reindeer, since in no other species of deer are antlers borne by the female[7]. This contention is supported by Sir James Frazer, who points out that in north-eastern Russia there is an annual celebration known as the 'Feast of the Golden-reindeer-horn[8].' The hypothesis is indeed attractive, though by no means secure. The attribution of horns to female deer was a blunder common to Greek[9], Latin[10], and Hebrew[11] writers. And we

can hardly think that in every such case they were describing a reindeer or copying the peculiarity of the Cerynean hind[1]. Besides, the oldest known representation of the 'hind,' that on a 'sail'-*fibula* of the Geometric period, makes it an unmistakable male[2]. If, however, we accept Sir W. Ridgeway's explanation and with him suppose that Herakles travelled as far north as the Hercynian Forest, where reindeer were still to be seen in Caesar's day[3], it becomes impossible to believe that the hero fetched thence the wild olive, which is essentially a southern, not a northern plant[4]. Pindar, confessedly an innovator in matters of mythology, may well have combined the myth that Herakles cut his club from a wild-olive on the Saronic Gulf and, leaning it against the image of Hermes *Polýgios* at Troizen, caused a wild-olive to spring up there too[5] with the fact that an olive was growing on the grave of the Hyperborean maidens Hyperoche and Laodike in Delos[6]. Be that as it may, Pindar having once stated that Herakles had brought the wild-olive from the land of the Hyperboreoi to Olympia, others would repeat the statement[7] and it would be widely believed.

But at this point L. Weniger[8] has done good service by insisting on the local tradition of the Olympic seers[9] preserved by Phlegon of Tralleis, who wrote his chronological compendium in the first half of *s.* ii. A.D.[10] According to Phlegon[11], for the first five Olympiads no victor received a wreath; but, on the occasion of the sixth contest, the Eleans sent their King Iphitos to Delphoi, that he might ask of the god whether wreaths should be awarded, and the god made answer:

Iphitos, make not the fruit of an apple the prize of thy contest;
But on the victor's head set a fruitful wreath of wild olive,
Even the tree now girt with the fine-spun webs of a spider.

The king, on returning to Olympia, found that one among the many wild-olives in the precinct was wrapped in spiders' webs. So he walled it round and wreathed the victors from its branches. The first to gain the wreath was Daïkles the Messenian, who won the foot-race in the seventh Olympiad (752 B.C.)[1]. The spiders' webs, since they portended rain[2], marked out one tree as specially fertile. But the point to notice is that in this old priestly narrative there were many wild-olives growing in the precinct. The tree was an indigenous product, no importation from a foreign land, least of all from the far north.

Nevertheless the belief that Herakles had introduced a tree from the north to Olympia is supported by both ritual and myth. Only, the tree in question was not the wild-olive but the white-poplar. Pausanias[3] says:

'The Eleans are wont to use logs of white-poplar, and of no other tree, for their sacrifices to Zeus. They honour the white-poplar thus, I imagine, simply because Herakles brought it to Hellas from the Thesprotian land. It struck me, too, that Herakles himself, when he offered sacrifice to Zeus at Olympia, burnt the thigh-pieces of the victims on logs of white-poplar. Herakles found the white-poplar growing beside the Acheron, the river in Thesprotia; and on this account—they say—the tree is called by Homer *acheroïs*[4]. It would seem, then, that of old, as at the present day, different rivers suited different plants and trees. Thus tamarisks are most numerous and flourishing on the banks of the

The ancient derivation is rejected by modern philologists (L. Meyer *Handb. d. gr. Etym.* i. 147 f., Schrader *Reallex.* p. 205, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 69, Boisacq *Dict. étym. de la Langue Gr.* p. 107, H. Hirt *Die Indogermanen* Strassburg 1907 ii. 622, S. Feist *Kultur Ausbreitung und Herkunft der Indogermanen* Berlin 1913 p. 194).

Maiandros; reeds grow tallest in the Boeotian Asopos; and the *perseia*-tree loves no water but the water of the Nile. Similarly with regard to the white-poplar, the poplar, and the wild-olive, it was natural enough for the white-poplar to grow first on the banks of the Acheron, for the wild-olive to do the same on the banks of the Alpheios, and for the poplar to be nurtured by the land of the Keltoi and the Celtic Eridanos.'

Fig. 363.

The interpolator of Servius' commentary on Virgil has preserved a more romantic version[1]. Leuke, the daughter of Okeanos, was loved by Plouton and carried off to the Underworld, where she spent

[1] Interp. Serv. *in* Verg. *ecl.* 7. 61 (probably derived from the commentary of Aelius Donatus).

her days and in due course died. Plouton from love of her bade a white-poplar (*leúke*) to spring up in the Elysian fields. It was from this tree that Herakles on his return from the nether regions plucked a wreath. Other authorities add a few details[1]. Herakles, when he dragged Kerberos from below, saw the white-poplar growing beside the Acheron, marvelled at its beauty, wreathed himself with it, brought it to the Upperworld, and showed it to Helios. The myth was already current in the fourth century B.C., to judge from a Scopaic type of the hero wearing his poplar-wreath (fig. 363)[2]. The wreath of white-poplar, thus associated with Herakles[3], was awarded to victors in the Rhodian Tlapolemeia, a festival commemorating Herakles' son Tlepolemos[4], if not Herakles himself[5]. Some would have it, however, that the festival belonged to Helios[6]; and natives of the island spoke of the white-poplar as 'Helios' wreath[7].' Virgil, describing the cult of Hercules at the Ara Maxima,

[1] Eratosthenes (?) *ap.* schol. Theokr. 2. 121 (p. 290, 7 ff. Wendel), interp. Serv. *in* Verg. *Aen.* 5. 134, schol. A. B. D. *Il.* 13. 389, Eustath. *in Il.* p. 938, 63 f. makes the Salii chant his exploits 'their brows bound with branches of poplar[1],' though later usage prescribed wreaths of bay[2]. It was perhaps as followers of Herakles that successful athletes in Kos[3] and at Athens[4] wore white-poplar. But the practice has ultimately a chthonian significance. The white-poplar, 'the finest tree which grows in modern Greece[5],' had in ancient times a variety of

Mus. Cat. Coins Caria, etc. p. 261 nos. 342 pl. 41, 3 (=my fig. 364), 343 (=my fig. 365), 344, 345 pl. 41, 4, *Hunter Cat. Coins* ii. 444 no. 80, Head *Hist. num.*[2] p. 641 f.). This wreath, formerly said to be of vine-leaves (Rasche *Lex. Num.* vii. 1039), is now commonly described as an oak-wreath; and such it might possibly be (*Class. Rev.* 1903 xvii. 418 fig. 17). But our passage rather suggests that it is intended for the wreath of white-poplar sacred to the Rhodian Helios. Mr E. S. G. Robinson, who at my request kindly compared the specimens in the British Museum with some actual leaves of white-poplar, reports (June 24, 1921): 'I have looked at the coins of Rhodes you mention and have

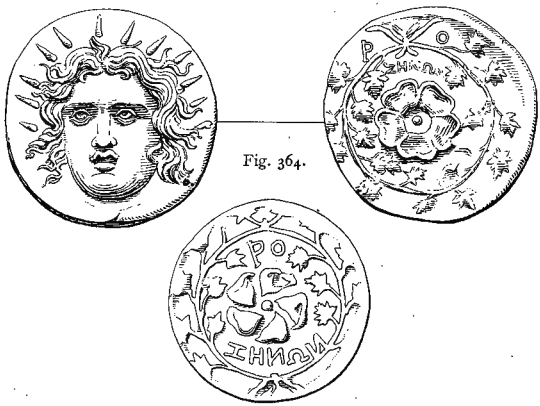

Fig. 364.

Fig. 365.

little doubt that the leaves of the wreath are meant for white poplar and not for oak, as you will see from the two enclosed casts; they (the leaves) are not drawn with any great care, but the essential difference between the oak and poplar (the pyramidical shape of the latter) seems to have been observed.'

A certain sympathy between the white-poplar and Helios is attested by the belief that the olive, the white-poplar, and the willow turn their leaves at the solstice (Varr. *rer. rust.* 1. 46=Plin. *nat. hist.* 2. 108. Plin. *nat. hist.* 16. 87 and 18. 266 f. adds the elm and the linden).

[5] So Dr W. Leaf in his note on *Il.* 13. 389. Cp. E. Step *Wayside and Woodland Trees* London 1905 p. 55: 'The White Poplar...grows into a large tree, something between sixty and a hundred feet high.'

names derived from the light-coloured under-surface of its leaves[1]. The striking effect of light combined with dark was, at least in part, the reason why the tree was assigned to the limbo between the Upperworld and the Underworld. As having no fruit, also, it was appropriate to the realm beyond[2]. It was 'chthonian[3],' 'sacred to Hades[4],' 'dedicate to the dead[5].' Hence, according to Harpokration[6] (*s.*ii(?)[7] A.D.), its use in the rites of the chthonian Dionysos[8]. A similar explanation might be given of the fact that, at Olympia, persons wishing to sacrifice to Pelops had to obtain wood of the white-poplar from the 'woodman' (*xyleús*)[9] attached to the cult of Zeus[10]. When Idmon, son of Apollon and seer of the Argonauts, died, his brows were bound with its white leafage[11]. Aquites the Colchian, 'consecrated to the waters of the land and priest of the mighty Phasis,' wore a wreath of white-poplar[12], perhaps because poplars fringed the river where it flowed past Phrixos' tomb to the sea[13]. Finally, Polyphemos, son of the Lapith Elatos, who married

[10] Paus. 5. 13. 3. The Pelopion had been founded by Herakles, who sacrificed into the pit (*bóthros*) for Pelops. The annual magistrates kept up the sacrifice, the victim being a black ram, the neck of which was given to the woodman (*xyleús*). Whoever, either of the Eleans or of strangers, ate the flesh of the victim sacrificed to Pelops might not enter the temple of Zeus (*ib.* 2—3). See further Sir J. G. Frazer *ad loc.*

[11] Val. Flacc. 5. 10 f. [12] Val. Flacc. 6. 294 ff. [13] Val. Flacc. 5. 184 ff.

Laonome a sister of Herakles[1] and fell fighting in the land of the Chalybes, had a burial mound near the sea beneath a tall white-poplar[2].

If the white-poplar was thus regarded as a Borderland tree, the black-poplar was even more closely connected with the Otherworld. The woods of Persephone on the further side of Okeanos consisted of 'tall black-poplars and willows that shed their fruit[3].' When Teukros quitted Salamis to seek a new home across the water, 'he is said to have bound his brows with a poplar-wreath[4].' When Aeneas on the anniversary of his father's death held a contest for ships, the Trojan crews were 'veiled with poplar-leafage[5].' Varro was buried in an earthenware coffin 'after the manner of the Pythagoreans on leaves of myrtle, olive, and black-poplar[6].' And the place where Augustus' body had been burnt on the Campus Martius was enclosed by an iron fence and planted with black-poplars[7].

Nor can we in this context ignore the myth of the Heliades. Virgil, it is true, in his *Eclogues* transforms these sisters of Phaethon into alders[8]: but in his *Aeneid* he, like the great majority of Latin writers, speaks of them as poplars[9]; and the Greeks almost with one consent[10] call them black-poplars[11]. As such they appear in their

earliest extant representation, that of an Arretine mould acquired in 1898 by the Museum of Fine Arts at Boston. A cast taken from the mould (fig. 366)[1] shows a relief, signed by Bargates a slave of the potter M. Perennius, which subdivides into two distinct scenes. On the right we see Phaethon fallen from the solar car. One wheel of it lies beside him. The other is collected, as Valerius Flaccus says[2], by Tethys the wife of Okeanos, his grandmother[3]. Helios[4], on horseback with a spare horse at his side, has already caught two of the chariot-team by the reins and will next turn his attention to the remaining pair, of which one rears high in the air, the other collapses on the ground. The scene is completed by the cause of Phaethon's fall—Zeus in the act of hurling his bolt, accompanied by Artemis, whose arrow would avenge the wrong done to Apollon, and by Iris[5], whose outstretched arms hold a fillet suggestive of a rainbow spanning the storm. On the left is the transformation of Phaethon's sisters. One of them has been completely metamorphosed into a tree, from whose branches large leaves of black-poplar are sprouting. The other two are stiffening into the shape of Caryatids[6] as they endeavour with uplifted hand to free themselves from the branches visible above them. In this last desperate effort they and their vanished sister are helped by three young men, in all probability their brothers[7],

[2] Val. Flacc. 5. 431.

[3] Phaethon was the son of Helios by the Oceanid Klymene (G. Knaack in Roscher *Lex. Myth.* iii. 2177). E. Robinson *loc. cit.* took the figure of Tethys to be 'possibly one of the Heliades.' F. Hauser (*Philologus* 1899 lviii. 485 n. 5) suggested Nemesis (*supra* i. 269 ff., 276). The right interpretation was first given by P. Hartwig *loc. cit.*

[4] So P. Hartwig *loc. cit.*: certainly not 'Phaethon...vainly trying to hold his six horses' (E. Robinson *loc. cit.*).

[5] 'Nikê or Iris?' (E. Robinson *loc. cit.*): 'Aura oder Hora' (P. Hartwig *loc. cit.* with express reservation): 'eine geflügelte Frauengestalt, die einen bogenförmig ausgebreiteten Gegenstand emporhält (wohl Andeutung des Himmelsgewölbes)' (G. Knaack *loc. cit.*).

[6] *Supra* p. 402 n. 0.

[7] E. Robinson *loc. cit.* is content to speak of them in each case as a 'youth.' P. Hartwig *loc. cit.*, after weighing the possibility that they may be 'Brüder oder Verwandte der Heliaden,' accepts a suggestion of W. Helbig that they are labourers hacking at the trees to get drops of amber: we are to assume that the ancients confused the method of collecting

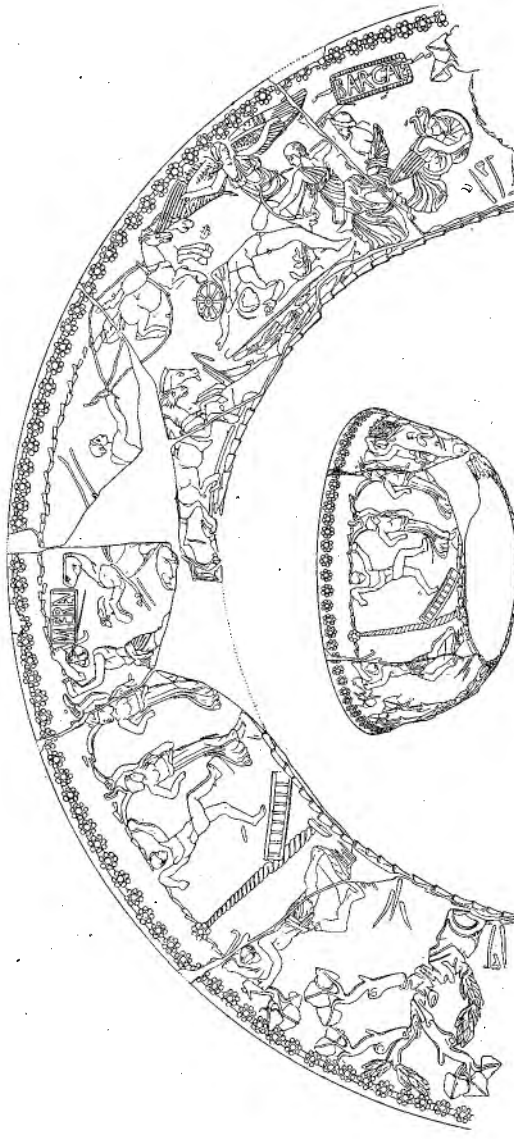

Fig. 366.

who with bill-hooks, or without[1], attempt to lop or rend away the entangling vegetable growth. The centre of the transformation-scene is occupied by a spiral column with a rosette on the top of it and a ladder leaning against it. P. Hartwig[2] and H. Goez[3] draw a sharp contrast between the two scenes of the downfall and the metamorphosis: the former they take to be a rich and harmonious composition implying an artistic prototype[4], the latter a loosely-connected and clumsy row of figures perhaps first put together by Bargates and certainly filled out by him with a mere ornamental column[5]. I do not agree with this estimate. On the one hand, the boasted composition is full of absurdities. Zeus, comfortably seated, is yet hurling a thunderbolt! Helios is on horse-back—a notion that is not Greek[6]. And Artemis is unexampled *dans cette galère*. The fact is that the Arretine potter, not possessed of sufficient genius to invent a new type, is simply using up stock patterns. He has by him a seated Zeus, who will serve for the thunderer. He has a set of neo-Attic dies for the tragedy of the Niobids[7]: three of them can be worked in—Artemis, the dead youth (Phaethon), the fleeing maiden (Tethys). He knows how to represent Troïlos on horse-back: the familiar figure with its spare horse will do for Helios, and the two horses of Troïlos can be duplicated for the captured solar pair. All patch-work! But patch-work, when the patches are Greek, is apt to produce—as it were by a turn of the kaleidoscope—new and satisfactory combinations of old and well-

amber with that of obtaining frankincense (Theophr. *hist. pl.* 9. 4. 4, Plin. *nat. hist.* 12. 68). H. Goez *loc. cit.* thinks that the youth without the bill-hook, like the two Heliades in front of him, is trying to tear away the fatal poplar-branches, and can hardly be viewed as an amber-collector. G. Knaack *loc. cit.* leaves the question in suspense.

[1] Cp. Ov. *met.* 2. 358 f. (of Clymene) truncis avellere corpora temptat | et teneros manibus ramos abrumpit.

[2] P. Hartwig *loc. cit.* p. 493.

[3] H. Goez *loc. cit.* p. 479.

[4] P. Hartwig *loc. cit.* p. 494 ff. presupposes some toreutic work of the Hellenistic age, inspired by a literary (but *non*-tragic) source, to which Ovid and Valerius Flaccus were likewise indebted.

[5] E. Robinson *loc. cit.*: 'This may have something to do with the subject, but seems more probably introduced to fill the space.' P. Hartwig *loc. cit.* p. 491 f.: 'Die gewundene Säule...halte ich mit Robinson für eine rein ornamentale Zuthat unseres Bargates.' For the twisted column as a favourite *motif* of Arretine ware see H. B. Walters *History of Ancient Pottery* London 1905 ii. 493.

[6] *Supra* i. 333 n. 5. Yet Eur. *Phaethon frag.* 779, 8 f. Nauck[2] *ap.* Longin. *de sublim.* 15. 4 says of Helios: *πατὴρ δ' ὅπισθε νῶτα σειραίου βεβὼς | ἵππευε παῖδα νουθετῶν· κ.τ.λ.*

[7] F. Hauser *Die neu-attischen Reliefs* Stuttgart 1889 p. 73 ff. nos. 104—107 b. Furtwängler *Masterpieces of Gk. Sculpt.* p. 43 f. fig. 7 shows that these reliefs were originally extracts from a fifth-century representation of Apollon and Artemis slaying the Niobids, probably that carved hy Pheidias on the throne of Zeus at Olympia. For other views see A. H. Smith in the *Brit. Mus. Cat. Sculpture* iii. 262 f.

known elements. Hence the appreciation of our critics. On the other hand, the transformation of the Heliades is hardly to be dismissed as a group of mechanical or meaningless items. The designer had at his disposal sundry vintage-stamps[1] including a vine-dresser, a ladder, a dancing Satyr[2], and a dancing Maenad[3]. By dexterous repetition of the first and last he has contrived to tell his story, though it must be admitted that the poplar-sprays on the bay-leaved willow-trunk are, as H. Goez protests, a *Naturwunder*[4]. It is noticeable that no indication of locality is given except the twisted column and the ladder. The action, doubtless, takes place on the banks of the Eridanos, a river usually identified with the Padus or the Rhodanus, but also set in the sky as the constellation Eridanus or Flumen[5]. The scene is thus at once earthly and heavenly. Is it a mere coincidence that we have already found both the spiral column[6] and the ladder[7] used as links between earth and heaven? Moreover, we have seen reason to connect the sky-pillar[8] and sky-ladder[9] with the Milky Way. And, with regard to the mythical personages here concerned, it will be remembered, not only that we identified the road up which the Heliades escorted Parmenides as the Milky Way[10], but also that certain Pythagoreans explained the Milky Way as the track made by a star which fell with the falling Phaethon[11].

I am inclined to surmise that the Galaxy at one time played a considerable *rôle* in the myth of Phaethon[12]. There are at least three

Knaack *Quaestiones Phaetonteae* Berolini 1886 pp. 1—81, *id.* 'Zur Phaethonsage' in *Hermes* 1887 xxii. 637—640, *id.* in Roscher *Lex. Myth.* iii. 2175—2202 with figs. 1—3 (the most comprehensive

possibilities. In the first place, the Milky Way was that 'Road of the Birds[1],' along which the swans drew Apollon to the land of the Hyperboreans[2]. This accounts for the intimate relations of *Kýknos*, the 'Swan,' to Phaethon. The Hesiodic (?) version preserved by Hyginus[3] states that Kyknos, king of Liguria, bewailing the fate of his kinsman Phaethon was changed into a swan and chanted his dying song. Similarly Pausanias[4] relates that Kyknos, a musician, became king of the Ligurians inhabiting the Celtic country beyond the Eridanos, and at his death was transformed into the bird by the will of Apollon. Phanokles[5], the Alexandrian elegiast, in his *Erotes* retold the tale and, no doubt, gave it the romantic touch, which is discernible in later allusions[6]. Claudian[7] adds that Phaethon, raised to the sky, became Auriga, and his sisters the Hyades, while

> The Milky Circle sprinkles the spread wings
> Of Cycnus, once his comrade.

Both *Auriga*, the 'Charioteer,' and *Olor*, the 'Swan,' are to be seen nightly on the Milky Way[8]. Lucian in his little work *On Amber or Swans* claims to have visited the Eridanos and lost his illusions. He saw neither poplars nor amber, and the natives had never heard of Phaethon!

'However,' he continues, 'there was one thing I still thought I really should find there, and that was flocks of swans singing on the banks. We were still on the way up, and I applied to the boatmen again: "About what time do the swans take post for their famous musical entertainment?—Apollo's fellow craftsmen, you know, who were changed here from men to birds, and still sing in memory of their ancient art." But they only jeered at me: "Are you going to lie all day about our country and our river, pray?"' Etc., etc.[9]

and compendious treatment of the subject), O. Gruppe 'Aethiopenmythen' in *Philologus* 1889 xlvii. 328—343, S. Eitrem 'De Phaethonte' *ib.* 1899 lviii. 461—464, J. Nonn. *Dion.* 38. 424 ff. makes Zeus set Phaethon in the sky as Auriga, the Eridanos as Flumen. Interp. Serv. *in* Verg. *Aen.* 10. 189 says that Kyknos was placed among the stars by Apollon.

[8] Hyg. *poet. astr.* 4. 7 notes that the Milky Way passes through the following constellations: Olor, Perseus, Auriga, Gemini, Procyon, Argo, Centaurus, Scorpio, Sagittarius, Aquila.

[9] Loukian. *de electro* 4 f. trans. H. W. Fowler.

The swan was fair game to the satirist; but its connexion with the myth was never forgotten by ancient art. A fine sardonyx cameo at Florence (fig. 367)[1] shows Phaethon falling from the solar car into the river, which is suggested by the urn upset. Helios[2], a youthful figure on horse-back grasping a torch, gallops up to the rescue. In the foreground Kyknos, a swan already, utters his plaintive cry. The same scene with its suggestion of sudden death followed by new and glorified life was repeated on *sarcophagi* of the second and third centuries A.D.[3] The noblest example is that

[4] F. Wieseler 'Sarcofago ostiense rappresentante il mito di Fetonte' in the *Ann. d. Inst.* 1869 xli. 130—144 pl. F, F. Matz in the *Arch. Zeit.* 1870 xxviii. 113 ff., G. Knaack in Roscher *Lex. Myth.* iii. 2197 ff. fig. 2, G. Lippold in P. Arndt *La Glyptothèque Ny-Carlsberg* Munich 1896 p. 215 f. pl. 153 (=my fig. 368), Reinach *Rép. Reliefs* ii. 182 no. 2.

On the left we see Phaethon standing before the seated Helios to prefer his request. In front of Helios four youths, the Heliadai[1], hold in readiness the solar steeds. At his back are four maidens, the Horai, characterised as the seasons of the year. The central space is reserved for the central incident, the fall of Phaethon, conceived as on the cameo, except that Helios on horse-back is replaced by the Dioskouroi[2] riding up from left and right, while Kyknos below appears both as an aged man leaning on a staff and as a swan. At his back sits Moira[3] conning the roll of fate. Phaethon falls headlong towards Eridanos, who reclines with a branch over his shoulder and a snake[4] at his side. Beyond him is another reclining male, who holds a large wheel and is best regarded as a personification of the Course[5]. An anchor visible between the two hints at Okeanos. Above sits Helios, his head resting on his hand in a pose of deep dejection, while Hermes brings him the sad news[6]. Behind Helios stands Klymene (?) with a look of grave concern. Behind Hermes are the Heliades, two standing, one seated, in attitudes expressive of their grief[7]. Their transformation is still to come: as mourners they must not anticipate the change.

Secondly, the Milky Way is sometimes viewed as a celestial river, and that not only in Australia[8], Annam[9], China[10],

[1] So P. Hartwig in *Philologus* 1899 lviii. 489. G. Lippold *loc. cit.* is content with 'quatre serviteurs.' Above them are remains of the chariot-pole, and the mantle of Caelus (*supra* i. 59).

[2] See A. Baumeister in his *Denkm.* iii. 1305 f.

[3] Nonn. *Dion.* 38. 166 and 218.

[4] See F. Wieseler in the *Ann. d. Inst.* 1869 xli. 137.

[5] Cp. *supra* i. 260 n, 3. G. Knaack in Roscher *Lex. Myth.* iii. 2197 'Auf dem Himmelsgewölbe (vgl. *Matz, bull. dell' inst.* 1869, 67) sitzt Helios...' is on the wrong track. So too is G. Lippold *loc. cit.*, who (after F. Wieseler *loc. cit.*) sees in the two reclining male figures 'des personnifications de la Terre et de la Mer.'

[6] His type is ultimately derived from that of Hermes in the east pediment of the Parthenon (*infra* § 9 (*h*) ii (*θ*)).

[7] All three are modifications of figures F (Hippodameia) and O (the handmaid) in the east pediment of the temple of Zeus at Olympia (Overbeck *Gr. Plastik*[4] i fig. 77).

[8] R. Andree *Ethnographische Parallelen und Vergleiche* Stuttgart 1878 p. 110 (the Gingis of New South Wales, tribes on the Darling River).

[9] H. Gaidoz and E. Rolland in *Mélusine* Paris 1884–85 ii. 154.

[10] *Eid. ib.* ii. 154. Prof. H. A. Giles has kindly supplied me (Jan. 18, 1919) with the following detailed information: 'The Milky Way is mentioned three times in the *Odes* edited by Confucius about B.C. 500, but only as a celestial phenomenon.

'The famous traveller, Chang Ch'ien, who brought the grape from Fergana to China, and visited Bactria (B.C. 138), was sent by the Emperor to discover the source of the Yellow River, which was supposed to flow from heaven and to be a continuation of the Milky Way. He sailed up stream for many days until he reached a city where he saw a girl weaving. On his asking what place this was, the girl gave him her shuttle, telling him to show it on his return to a certain astrologer, who would know where he had been. He did so, and the astrologer at once recognized the shuttle as that of the Weaving

Japan[1], Siberia[2], Mesopotamia[3], and Arabia[4], but in Greece itself[5]. Greek peasants in Kypros speak of it as 'the River Jordan' or 'the Shade of the Jordan[6].' Indeed, the southern Greeks in general call it the 'River Jordan[7].' And this name can be traced back for hundreds of years, being found already in the *Apókopos* of Bergades[8], a sixteenth-century poem of lasting popularity[9]. In face of these facts

Damsel (α Lyrae); further declaring that on the day and at the hour when Chang received the shuttle, he had noticed the intrusion of a wandering star between α Lyrae and βγ Aquilae. Thus Chang was actually believed to have sailed upon the bosom of the Milky Way.

'The following names have been given to the Milky Way by the Chinese: The Celestial River. The Silver River. The Celestial Ford. The Bright River. The Red River! The last is an *amnis ruber a non rubendo*; the explanation being that the Milky Way lies to the south of the north pole, and that fire and red are the element and colour, respectively, which have been assigned to the south quarter of the heavens.'

[1] B. H. Chamberlain *Things Japanese* London—Tōkyō 1890 p. 327 f. (a reference given me by my friend Mr H. G. Brand of Tokyo): 'The only fable worth mentioning here in connection with the stars is that which inspires the festival named *Tanabata*. This fable, which is of Chinese origin, relates the loves of a Herdsman and a Weaving-Girl. The Herdsman is a star in Aquila. The Weaver is the star Vega. They dwell on opposite sides of the "Celestial River," or Milky Way, and may never meet but on the seventh night of the seventh moon, a night held sacred to them, strips of paper with poetic effusions in their honour being stuck on stems of bamboo grass and set up in various places. According to one version of the legend, the Weaving-Girl was so constantly kept employed in making garments for the offspring of the Emperor of Heaven—in other words, God—that she had no leisure to attend to the adornment of her person. At last however, God, taking compassion on her loneliness, gave her in marriage to the Herdsman who dwelt on the opposite bank of the river. Hereupon the woman began to grow remiss in her work. God, in his anger, then made her recross the river, at the same time forbidding her husband to visit her oftener than once a year. Another version represents the pair as mortals, who were wedded at the early ages of fifteen and twelve, and who died at the ages of a hundred and three and ninety-nine respectively. After death, their spirits flew up to the sky, where the Supreme Deity bathed daily in the Celestial River. No mortals might pollute it by their touch, except on the seventh day of the seventh moon, when the Deity, instead of bathing, went to listen to the chanting of the Buddhist scriptures.'

[2] R. Andree *op. cit.* p. 110 (the Koryaks of North-East Siberia).

[3] H. Fox Talbot in the *Transactions of the Society of Biblical Archæology* 1873 ii. 53, A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 189, *id.* in Roscher *Lex. Myth.* iv. 1493.

[4] H. Gaidoz and E. Rolland *loc. cit.* ii. 156.

[5] Not in Italy. H. Gaidoz and E. Rolland *loc. cit.* ii. 151 give *Fluvius lacteus* as a Latin name of the Milky Way. But this rests on a misunderstanding of Mart. Cap. 15 and 207, where the milky stream is the track of the planet Iupiter: see U. F. Kopp's note on Mart. Cap. 14.

it is permissible to conjecture that the *Eridanós*, which—as I shall subsequently argue[1]—appears to have meant 'River of Life,' was at the outset none other than the Milky Way, and that, when a different conception of this starry phenomenon gained ground and drove out the old appellation, room was still found in the nocturnal sky for the constellation Eridanus[2]. Moreover, if we may rely (as we are fully entitled to do) on the statement of Hyginus[3] that some authorities spoke of this constellation as the Nile, and that many called it Oceanus, certain further consequences immediately present themselves. The Nile is described in the *Odyssey*[4] by the remarkable adjective *Diïpetés*, which properly denotes a river 'that falls in the Zeus,' 'in the clear Sky[5].' This description would apply with strict accuracy only to the Milky Way, but might be extended to all rivers[6] conceived as rillets of that great flood[7]. Pursuing the same line of thought we can hardly avoid another conclusion, *viz.* that 'back-flowing Okeanos[8],' the very 'source of the gods[9],' was not

[1] *Infra* Append. G.

[2] R. Brown *Eridanus: river and constellation* London 1883 p. 44 would connect the Milky Way 'with the heavenly Eridanus, subsequently reduplicated in the particular constellation of that name': cp. *ib.* p. 71.

[3] Hyg. *poet. astr.* 2. 32 ERIDANUS. hunc alii Nilum, complures etiam Oceanum esse dixerunt.

[4] *Od.* 4. 477 (=4. 581) Αἰγύπτοιο, Διιπετέος ποταμοῖο with schol. *ad loc.* According to schol. E.H.Q., Ζηνόδοτος...γράφει διειπετέος· διὰ τῆς ει διφθόγγου. *Supra* i. 349 n. 2. F. Solmsen in the *Zeitschrift für vergleichende Sprachforschung auf dem Gebiete der indogermanischen Sprachen* 1911 xliv. 162 f., followed by F. Bechtel *Lexilogus zu Homer* Halle a. d. S. 1914 p. 101, would write *διειπετέος*, holding that the dative Διει-, correct in such a formation as Διΐφιλος, forced its way at an early date into other compounds, in which it was incorrect,—*Διΐ-θεμις*, *Διει-τρέφης*, *διει-πετής*. But the locative Δι- in Διιπετής, explained as in the text, gives a perfectly satisfactory meaning. H. Lehmann *Zur Lehre vom Locativ bei Homer* Neustettin 1870 p. 8 renders: 'in der Helle fliessend.'

[5] Cp. the analogous formation Διιπέτης, 'that flies in the Zeus,' 'in the clear Sky' (*h. Aphr.* 4 οἰωνούς τε Διιπέτεας. So H. Ebeling for *διιπετέας* codd. W. Schulze *Quaestiones epicae* Guetersloae 1892 p. 237 f. proposes *διειπετέας*).

[6] Skamandros (*Il.* 21. 268, 326), Spercheios (*Il.* 16. 174), a river in Phaiakia (*Od.* 7. 284), a river in some unidentified locality (Hes. *frag.* 212 Flach, 217 Rzach *ap.* schol. Ap. Rhod. 1. 757), a river in a simile (*Il.* 17. 263). For later developments in the meaning of Διιπετής see Stephanus. *Thes. Gr. Ling.* ii. 1527 C—1528 B. The earlier significance may perhaps be traced in its application to the thunderbolt (an oracle *ap.* Euseb. *praep. ev.* 6. 3. 1=Cougny *Anth. Pal. Append.* 6. 146. 23 πυρσῶν αἰώραισι Διιπετέεσσι δαμῆναι, cp. *et. mag.* p. 275, 19).

[8] *Il.* 18. 399, *Od.* 20. 65, Hes. *theog.* 776 ἀψορρόου Ὠκεανοῖο.

[9] *Il.* 14. 201 and 302 Ὠκεανόν τε θεῶν γένεσιν καὶ μητέρα Τηθύν, cp. *ib.* 245 f. ποταμοῖο ῥέεθρα | Ὠκεανοῦ, ὃς περ γένεσις πάντεσσι τέτυκται, Orph. *h. Okean.* 83. 1 f. Ὠκεανὸν... | ἀθανάτων τε θεῶν γένεσιν θνητῶν τ' ἀνθρώπων. The use of the word *γένεσις* in this connexion is peculiar, and may imply that Okeanos was at one time regarded as the very seed of the sky-god, giving rise to a whole succession of divine forms (cp. the Tarragona tablet *infra* Append. G *med.*). Certain pundits in antiquity declared that Homer was borrowing from the lore of Egypt, and went about to prove that Okeanos and Tethys were

originally a terrestrial river forming the circumference of a discoidal earth, but, as E. H. Berger[1] has maintained, a celestial stream of stars. I should indeed venture to suppose that in pre-Greek times, before the rise of geographical speculation, the river Okeanos simply meant the Galaxy[2]. F. W. H. Myers[3] with fine imagination pictures the forefather of the human race as he wakes at night and sees—

> Stars in the firmament above him beaming,
> Stars in the firmament, alive and free,
> Stars, and of stars the innumerable streaming,
> Deep in the deeps, a river in the sea.

Thirdly, the Milky Way is on occasion compared with a tree, whose vast trunk can be dimly descried towering through the gloom and branching across the midnight sky. Thus at Nüxei in the Harz district it is called the *Wetterbaum*[4], weather-forecasts being drawn from its appearance[5]. It has been maintained that a similar belief once prevailed in southern Babylonia. A bilingual tablet, consisting of a Sumerian text with an interlinear Semitic translation, brought from the library of Ashurbanipal (668—626 B.C.) at Kouyunjik, contains an incantation[6] rendered by R. Campbell Thompson[7] as follows:

> In Eridu groweth the dark *kiškanû*[8]
> That springeth forth in a place undefiled,
> Whereof the brilliance is shining lapis
> Which reacheth unto Ocean;
> From Ea its way in Eridu
> Is bountiful in luxuriance,
> Where earth is, there is its place,

Osiris and Isis respectively (Plout. *de Is. et Os.* 34). The Egyptians believed the Nile, and indeed all moisture, to be Ὀσίριδος ἀπορροήν (*id. ib.* 36), and held that living creatures arose from the river-slime (*frag. lyr. adesp.* (Pind. ?) 84. 14 f. Bergk[4] *ap.* Hippol. *ref. haeres.* 5. 7 p. 136 Duncker—Schneidewin, Hippys *frag.* 1 (*Frag. hist. Gr.* ii. 13 Müller) *ap.* schol. Ap. [8] Mr H. H. W. Pearson of the Royal Gardens at Kew suggests one of the tragacanth-bearing varieties of *astragalus*.

And the Couch of the Goddess Id its home.
In an undefiled dwelling like a forest grove
Its shade spreadeth abroad, and none may enter in.
In its depths (are) Shamash and Tammuz.
* * * * *
At the confluence of two streams
The gods Ka-Hegal, Shi-Dugal, (and) ... of Eridu
[Have gathered] this *kiškanû*, [and over the man]
Have performed the Incantation of the Deep,
(And) at the head of the wanderer have set (it).
That a kindly Guardian, a kindly Spirit
May stand at the side of the man, the son of his god.

R. Campbell Thompson took this to mean that the *kiškanû*-plant (? *astragalus gummifer*), growing in Eridu where two streams met, was plucked for medicinal use originally by the gods and later by men. Nothing more probable. But A. Jeremias[1] ten years later translates the opening lines—

In Eridu grew a black *kiškanû*-tree: it was created in a light place.
Its (branches) are of glittering *lapis lazuli* and stretch out over the ocean.—

and adds, with confident dogmatism, that the Milky Way is here conceived as a world-tree[2]. I am, however, assured by my learned friend the late Dr C. H. W. Johns and by Mr Sidney Smith of the British Museum that there is not the slightest ground for supposing any allusion to the Galaxy. At Ėridu, near the point where the Euphrates and the Tigris empty into the Persian Gulf, there was an entrance to the Underworld. It seems possible, therefore, that the tree here mentioned was akin to the Borderland tree of the Greeks and Romans. If so, a comparison with the poplars of the Heliades might be justified (gum tragacanth is a passable parallel to amber), though to equate—as Jeremias does[3]—*Eridu* with *Eridanós* is simply laughable.

On the whole I conclude that several traits in the myth of Phaethon, including the Heliades, Kyknos, the Eridanos, etc., do point to an early connexion with the Milky Way. A parallel may be found in modern Pomerania, where it is believed that the Wild Huntsman marks his progress across the sky by streaks of fire and that once,

[1] A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 60, *id.* in Roscher *Lex. Myth.* iv. 1492 f.

[2] A. Jeremias *Handbuch der altorientalischen Geisteskultur* p. 60: 'Bei der Grundstellung der Milchstrasse, bei der Orion und Skorpion im Ost- und Westpunkte des Horizontes stehen, während die Milchstrasse sich vertikal über den Beschauer wölbt, kann sie in der Tat poetisch als Baum angesehen werden, der seine Zweige über Erde und Meer ausspannt. Der Eridanos schliesst sich direkt an die Milchstrasse beim Orion an.'

[3] A. Jeremias *Handbuch der altorientalischen Geisteskultur* p. 60, *id.* in Roscher *Lex. Myth.* iv. 1492.

venturing too high in the air, he left behind him the Milky Way, hence called the *Wildbahn*, as a trace of his passage[1].

It remains to notice a curious variant of the myth preserved by Apollonios of Rhodes, who gives the following account of the Argonauts' visit to the scene of Phaethon's disaster[2]:

> Then entered they Eridanos' inmost stream,
> Where once, his breast struck by the blazing bolt,
> Phaethon fell, half-burnt, from Helios' car
> Into the mouth of the deep mere; and still
> From the glowing wound wells up the vapour dense.
> No bird can wing its way on pinions light
> Across that water, but it flutters, fails,
> Falls i' the heat. And maidens all around,
> The Heliades, pent in black-poplars tall,
> Make of their misery a pitiful plaint,
> Yea, from their lids let slip bright amber-drops,
> Such as are dried by sunlight on the sand.
> But, when the waters of the darksome mere
> Wash o'er the strand, blown by some blustering wind,
> Then all that wealth is tumbled on the tide
> Into Eridanos. The Celts declare
> These are the tears of Apollon, Leto's son,
> Borne on the eddies,—tears past numbering
> He shed in bygone days, what time he came
> To the sacred race of the Hyperboreans
> And left, at his Father's chiding, radiant heaven,
> Wroth for the son divine Koronis bare
> In shining Lakereia at the mouth
> Of Amyros. Such the tale these tribesmen tell.

The poet has worked into his epic a piece of local lore, which is both interesting and important. The Keltoi, he says, regarded amber as the tears, not of the poplars, but of Apollon. This lends some colour to a view that I put forward years ago concerning Apollon's name[3]. The oldest form of it seems to have been *Apéllon*, and Festus' assertion that 'the ancients used to say *Apello* for *Apollo*[4]' is supported by a considerable body of epigraphical evidence from the Doric area[5]. I proposed, therefore, to derive *Apéllon* from *apellón*, 'a black-poplar[6].' On this showing Apollon would be a

deity associated with a grove of black-poplars like that of the Heliades. Now the scenery of the Eridanos, as described by the Rhodian poet, was more or less similar to that of Apollonia in Illyria, which possessed not only an ancient cult of Helios[1], but also a *Nymphaîon* with springs of hot water and bitumen[2]. Close by, a perennial jet of flame burst from the ground, surrounded—a curious sight—by flourishing trees and verdant grass[3]. Drenching rain merely increased the blaze, into which the worshippers cast their offerings of frankincense[4]. Silver coins of the town, issued from *c.* 100 B.C. onwards on the standard of the Roman *denarius*, represent

Fig. 371.

three Nymphs (? Heliades), torch in hand, dancing round the sacred fire (fig. 369)[5]. And a copper piece, struck by Caracalla, shows the statue of Apollon in his temple, behind which are visible the tops of three trees probably, but not certainly, meant for poplars (fig. 370)[6]. The same doubt attaches to the tree seen behind Apollon *Smintheús* on a coin of Alexandreia in the Troad, which might be either a poplar or a cypress (fig. 371)[7]. We are on surer ground, when we recall the love of Apollon for Dryope. Antoninus Liberalis, following Nikandros (*c.* 150 B.C.), tells her story thus[8]:

[8] Ant. Lib. 32 (from bk. i of the Ἑτεροιούμενα of Nikandros). The passage is here summarised, not translated.

Dryops, son of the river Spercheios and the Danaïd Polydora[1], reigned on Mount Oite and had an only daughter Dryope, who tended her father's flocks. The Hamadryads loved her exceedingly, and taught her how to hymn the gods and to dance. Apollon, who saw her dancing, was enamoured of her and, to attain his ends, became first a tortoise, which she fondled and put into her bosom, and then a snake. The second change scared away the Nymphs, who left Dryopé and her lover alone. Shortly afterwards Dryope was wedded to Andraimon, son of Oxylos; but the result of her union with Apollon was the birth of Amphissos. He grew to man's estate, built the town of Oite, and established a sanctuary of Apollon in Dryopis. When Dryope visited this sanctuary, the Hamadryads carried her off and hid her in the forest. In her place they caused a black-poplar to spring from the ground and a fountain to gush forth beside it. Dryope now became a Nymph. Amphissos founded a sanctuary of the Nymphs in her honour and a contest in running, which is still kept up. From this contest women are excluded, the reason given being that, when Dryope was carried off by the Nymphs, two maidens revealed the fact to the natives of the land and thus incurred the anger of the Nymphs, who transformed them into fir-trees.

It would seem, then, that in the neighbourhood of Mount Oite Apollon was recognised as the consort of a black-poplar. The connexion of this tree with the god was, however, forgotten[2], when Apollon on his way through Thessaly[3] acquired the bay as his attribute. Thenceforward Dryope gave place to Daphne. The fact is that the particular species of tree assigned to a god depends entirely, or almost entirely, upon the character of the local flora. At Delphoi, for example, the bay-tree was of comparatively recent introduction, and Ovid[4] *à propos* of the earliest Pythian games states that 'whosoever had won with hand or feet or wheel received the honour of oaken foliage (*aesculeae...frondis*)[5]: the bay as yet was not, and Phoebus crowned his brows, fair with their flowing tresses,

[1] Another version made Dryops the son of Apollon and of Dia, a daughter of Lykaon (schol. Ap. Rhod. 1. 1218, *et. mag.* p. 288, 34 f., Tzetz. *in* Lyk. *Al.* 480).

[2] Ov. *met.* 9. 329 ff. contaminates the story of Dryope with that of Lotis, and transforms the former, like the latter, into a lotus-tree.

[3] A. Mommsen *Delphika* Leipzig 1878 p. 96, K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 110.

[4] Ov. *met.* 1. 445 ff. I have discussed the passage in *Folk-Lore* 1904 xv. 413.

[5] For Apollon in connexion with the oak see Gruppe *Gr. Myth. Rel.* p. 1235 n. 1, who cites Apollon Ἀσκραῖος (*supra* p. 255, cp. *Class. Rev.* 1903 xvii. 416) and Apollon Δρύμαιος (schol. Lyk. *Al.* 522) or Δρύμας at Miletos (Tzetz. *in* Lyk. *Al.* 522; but Hekataios of Miletos (? cp. *frag.* 356 (*Frag. hist. Gr.* i. 28 Müller)) *ap.* Strab. 321 regarded Δρύμας as a barbaric name), Dryops son of Apollon (*supra* p. 486 n. 1) and Dryope mate of Apollon (*supra* p. 485 f.), etc. A fine tetradrachm of Katane, struck *c.* 413—404 B.C., shows a full-faced head of Apollon crowned with oak-leaves and flanked by bow and lyre (*Brit. Mus. Cat. Coins* Sicily p. 47 fig., *Hunter Cat. Coins* i. 172 no. 12, G. F. Hill *Coins of Ancient Sicily* London 1903 p. 132 f. pl. 9, 4, Head *Hist. num.*[2] p. 133). A copper of Neapolis in Campania has a profile head of Apollon wearing an oak-wreath (*Brit. Mus. Cat. Coins* Italy p. 109 no. 148 fig.). Further evidence in *Folk-Lore* 1904 xv. 417 f.

from the nearest tree.' Thus it may well be that neither the bay nor the poplar[1] was the tree sacred to Apollon throughout central and northern Europe. In the Balkans the word for 'poplar' closely resembles the word for 'apple[2].' And Dr Rendel Harris has lately been urging, with a great array of evidence and no little persuasiveness, that Apollon—incredible as it sounds—was both in name and in nature an 'apple'-god[3]. He contends (if I follow

[1] J. Hoops *Waldbäume und Kulturpflanzen im germanischen Altertum* Strassburg 1905 p. 230 f.: 'Die von Willkomm[2] [[2] *Forstl. Flora*[2] 519 f. 530.] ausgesprochene Vermutung, dass die Weiss- und Schwarzpappel dem nördlichen Mitteleuropa von Haus aus fremd seien, wird durch das Fehlen prähistorischer Belege und den Mangel alteinheimischer Namen für die beiden Bäume im Keltischen, Germanischen und Slavischen bestätigt und darf auf das gesamte nordalpine Europa ausgedehnt werden. Sie sind erst zur Römerzeit oder im Lauf des Mittelalters aus Südeuropa eingeführt,' etc.

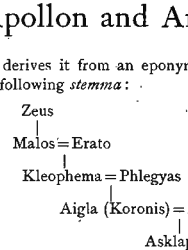
As to the significance of this title, Isyllos (*Inscr. Gr.*

Pelop. i no. 950 *C*, 27 ff.) derives it from an eponymous hero Μᾶλος, of whom he (*ib.* no. 950 *E*, 40 ff.) gives the following *stemma*:



Isyllos twice (*ib.* no. 950 *C*, 27 and 31) ends a hexameter with the appellative Μαλεάτα. It is natural to suppose that he scanned it Μᾰλεάτα. But, in view of his derivation from Μᾶλος, it is at least possible that he scanned by synizesis Μᾱλεᾶτα. Accordingly Rendel Harris, like H. Usener *Götternamen* Bonn 1896 p. 146 f. and S. Eitrem *Die göttlichen Zwillinge bei den Griechen* (*Videnskabsselskabets Skrifter.* II. Historisk-filos. Klasse 1902 No. 2) Christiania 1902 pp. 100 n. 3, 116, would derive Μᾱλεάτας from *μᾶλέα*, 'apple-tree,' cp. Dionysos Συκεάτης (Hesych. *s.v.*) from *συκέα*. To me it seems more probable that Μᾰλεάτης is the ethnic from Μᾰλέα or Μᾰλέαι (cp. *Inscr. Gr. Arc. Lac. Mess.* i no. 929 (Prasiai) Μαλεάτα | Μαλέαις and no. 1519 (Tyros) Ἀπόλονος ἐμ [Μαλέαις] on a small bronze lion), the well-known promontory of S.E. Lakonike, whence also Zeus Μαλειαῖος (Steph. Byz. *s.v.* Μαλέα).

(2) The cult of Apollon Μαλόεις in Lesbos (Thouk. 3. 3 a festival of Apollon Μαλόεις outside Mytilene, *Inscr. Gr. ins.* ii no. 484, 18 ff. (Hiera) *τᾶς* | *τε* Ἀρτέμιδος *καὶ* Ἀπόλ-λωνος | Μαλ(όε)ντος *ἀρχίχορον καὶ le*|*ροκάρυκα τῶν γερέων ξ*[*α*]|*κόρων Σαώτηρος* Ἀσκληπί|ω =O. Hoffmann *Die Griechischen Dialekte* Göttingen 1893 ii. 119 f. no. 168, 18 ff., who reads *le*|*ροκάρυκα τῶν* (*i*)*ερέων* after F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* i. 98 no. 255, 18 ff., cp. A. Conze *Reise auf der Insel Lesbos* Hannover 1865 p. 53 f. pl. 17, 1, Kallim. *frag.* 543 Schneider *ap.* Choirobosk. *in* Theodos. *can. masc.* 3 (i. 152, 13 ff. Hilgard) *τοιοῦτον γάρ ἐστι καὶ παρὰ* Καλλιμάχῳ "ὁ δὲ *ἀείδων* Μαλόες *ἦλθε χορός*," *ἀντὶ τοῦ* Μαλόεις· Μαλόεις *δέ ἐστιν ὁ* Λέσβιος = Bekker *anecd.* iii. 1187 *fin.*, Herodian. *περὶ παθῶν frag.* 326 (ii. 278, 4 f. Lentz) and *περὶ ὀνομάτων, περὶ τῶν εἰς εις* (ii. 619, 6 ff. Lentz)). The divine title (Hesych. *s.v.* Μαλ[λ]όεις· Ἀπόλλωνος *ἐπίθετον, ἢ ἐπώνυμον*) was identical with a Lesbian place-name (Steph. Byz. *s.v.* Μαλ[λ]όεις· Ἀπόλλων *ἐν Λέσβῳ. καὶ ὁ τόπος τοῦ ἱεροῦ* Μαλ[λ]όεις, *ἀπὸ τοῦ Μήλου* (*leg. μήλου*) *τῆς Μαντοῦς, ὡς* Ἑλλάνικος *ἐν Λεσβικῶν πρώτῳ* (*frag.* 117 (*Frag. hist. Gr.* i. 60)), *Inscr. Gr. ins.* ii no. 74, 5 *ἐν* Μαλόεντι *μόρον* =O. Hoffmann *op. cit.* ii. 66 f. no. 90, 5, Aristot. *vent. sit. et appell.* 973 a 10 f. *ἐνοχλεῖ δὲ* (*sc.* Καικίας) *τὸν* Μιτυληναίων *λιμένα, μάλιστα δὲ τὸν* Μαλόεντα with A. Conze *op. cit.* p. 7). The aetiological myth, briefly alluded to by Steph. Byz. *loc. cit.*, is given more fully in the Patmian *scholia* on Thouk. 3. 3 published by I. Sakkelion in the *Rev. Philol.* N.S. 1877 i. 185: Μαλόεις Ἀπόλλων· *οὗτος παρὰ* Μιτυληναίοις *ἐτιμᾶτο, ἀπὸ τοιαύτης δέ τινος αἰτίας. Μαντὼ ἡ* Τειρεσίου *θυγάτηρ περὶ τοὺς τόπους χορεύουσα τούτους, μῆλον χρυσοῦν ἀπὸ τοῦ περιδεραίου ἀπώλεσεν· εὗξατο οὖν, εἰ εὕροι, ἱερὸν ἱδρύσειν τῷ θεῷ. εὑροῦσα δὲ τὸ μῆλον, τὸ ἱερὸν ἱδρύσατο, καὶ* Μαλόεις Ἀπόλλων *ἐντεῦθεν παρ' αὐτοῖς ἐτιμᾶτο.* The myth makes it clear that Apollon's epithet Μαλόεις was connected, not with Μαλέα the S.E. headland of Lesbos, but with *μῆλον*, an 'apple.' Presumably, then, it was a local title derived from Μαλόεις, the 'Apple'-district N. of Mytilene. If so, it may or may not give us some hint as to the character of the god himself.

(3) At Nisaia, the port of Megara, was an old sanctuary of Demeter Μαλοφόρος with a ruined roof: among the explanations offered of the cult-epithet was that it had been given to the goddess by the first men who reared sheep (*μῆλα*) in the country (Paus. i. 44. 3). Rasche *Lex. Num.* vi. 406 and Welcker *Gr. Götterl.* ii. 474 cite a copper of Pagai, the other port of Megara, struck by Septimius Severus, on which appears Demeter (?Artemis Σώτειρα, cp. Paus. i. 40. 2 f. with i. 44. 4. A.B.C.) with a torch in either hand treading on rocky ground and preceded by a ram. But, since *μᾶλα*, 'sheep,' is only

a hyper-Dorism for μῆλα (E. Boisacq *Les dialectes doriens* Paris—Liége 1891 p. 47 n. 1), it is far more probable that Μαλοφόρος means 'Apple-bearing,' and that we should interpret in this sense Kallim. *h. Dem.* 138 *φέρβε βόας· φέρε μᾶλα, φέρε στάχυν· οἷσε θερισμόν*: see O. Schneider *ad loc.*, who aptly quotes schol. *Il.* 9. 542 (*αὐτοῖς ἄνθεσι μήλων*) *μηλοφόρον δὲ καὶ τὴν Δήμητραν τιμῶσιν*. Selinous, founded by Dorians from the Sicilian Megara and therefore a grand-daughter of Megara in Greece, maintained the worship of the goddess (A. Salinas in the *Not. Scavi* 1894 p. 208 ff. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 238 f. no. 5213 on a tufa-base with a small cornice Θέυλλος Πυρρία | ἀνέθηκε τᾶι | Μαλοφόρωι | εὐ(χ)άν· ἐνπέλα, cp. Hesych. *s.v.* ἐμπέλα· *ἐμπέλαζε, πρόσαγε, ἔγγιζε*; *Inscr. Gr. Sic. It.* no. 268 = F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 26 f. no. 3046 = Dittenherger *Syll. inscr. Gr.*[2] no. 751 on a tufa-block from the left *anta* of the *ádyton* of the temple of Apollon at Selinous in lettering of *c.* 450 B.C. [δι]ὰ τὼς θεὼς τώ[σ]δε νικῶντι τοὶ Σελινών[τιοι·] | [δι]ὰ τὸν Δία νικῶμες καὶ διὰ τὸν Φόβον [καὶ] | [δ]ὰ Ἡρακλέα καὶ δι' Ἀπόλλωνα καὶ διὰ Π[οτ]ε[ιδᾶ]να καὶ διὰ Τυνδαρίδας καὶ δι' Ἀθ[α]ν[αί]αν καὶ διὰ Μαλοφόρον καὶ διὰ Πασικ|ρά[τ]ειαν καὶ διὰ τὼς ἄλλως θεώς, [δ]ὰ δὲ Δία | μάλιστ[α]. φιλία[ς] δὲ γενομένας ἐνχρυσ|έω[ς] ἐλά[σα]ντα[ς, τὰ δ'] ὀνύματα ταῦτα κολ|άψαντ[ας ἐς] τὸ Ἀ[π]ολ[λ]ώνιον καθθέμε|ν, τὸ Διό[ς προ]γρά[ψα]ντες (*sic*)· τὸ δὲ χρυσίον | ἐξήκο[ντα τ]αλάντων ἦμεν). The Macedonian month Μαλοφόριος (cited from the dictionary of Papias the Lombard (1053—1063 A.D.) by K. F. Hermann in *Philologus* 1847 ii. 262: see also E. F. Bischoff 'De fastis Graecorum antiquioribus' in *Leipziger Studien für classische Philologie* vii Leipzig 1884 p. 374 with n. 6 (= Pyanopsion)) perhaps implies a festival of Demeter Μαλοφόρος. In any case we have no reason to connect the title with Apollon.

(4) In the grove of Apollon at Gryneia in S. Aiolis was an ancient oracle (Steph. Byz. *s.v.* Γρῦνοι, cp. Verg. *Aen.* 4. 345). Here Kalchas and Mopsos were said to have had a contest in seer-craft, each attempting to divine the number of apples on a certain tree. Mopsos won, and Kalchas died of chagrin (Euphorion *ap.* Serv. *in* Verg. *ecl.* 6. 72 = Myth. Vat. 1. 194, 2. 224).

Apollod. *epit.* 6. 2 f. and Strab. 642, following Hes. *frag.* 169 Flach, 160 Rzach (cp. the *nostoi* as summarised by Proklos in G. Kinkel *Epicorum Graecorum fragmenta* Lipsiae 1877 p. 53: Konon *narr.* 6 deviates widely), state that the contest took place near Kolophon in the grove of Apollon Κλάριος, which likewise possessed an ancient oracle. Kalchas, returning from Troy on foot with Amphilochos son of Amphiaraos (cp. Theopomp. *frag.* 112 (*Frag. hist. Gr.* i. 296 Müller) *ap.* schol. *Il.* 2. 135, Quint. Smyrn. 14. 360 ff.), had reached Klaros (cp. Kallinos *frag.* 8 Bergk[4] *ap.* Strab. 668), when he fell in with a better seer than himself, Mopsos son of Teiresias' daughter Manto, and died of vexation. Kalchas had asked Mopsos how many figs there were on a certain wild fig-tree. Mopsos had said: 'Ten thousand,—you can measure them with a bushel, and there will be one fig over.' This answer had proved to be correct, and straightway Kalchas had died. Strab. 643 says that, according to Pherekydes (*frag.* 95 (*Frag. hist. Gr.* i. 94 Müller)), the numerical question concerned the unborn litter of a sow; and that others combined this version with that of the wild fig-tree. He adds (*ib.* 643 and 675) that in Sophokles' Ἐλένης ἀπαίτησις (*frag.* 180 Jebb) Kalchas was fated to die when he met a better seer than himself, and that the scene of his contest with Mopsos and his subsequent death was here transferred to Kilikia, which the poet inexactly termed Pamphylia (see, however, Hdt. 7. 91, Strab. 668, Paus. 7. 3. 7). Tzetz. *in* Lyk. *Al.* 427, 440, 980, 1047 mentions both Kolophon and Kilikia, the wild fig-tree and the sow, cp. Eustath. *in* Dionys. *per.* 850. The sequel too deserves notice. According to one version, Amphilochos and Mopsos founded Mallos in Kilikia. Amphilochos then departed to Argos, entrusting his kingdom to Mopsos for a year. At the year's end he returned; but Mopsos would not give up the kingdom. So they quarrelled, and slew one another in single fight (Euphorion *ap.* Tzetz. *in* Lyk. *Al.* 440, Strab. 675 f., cp. Cic. *de divin.* 1. 88, Loukian. *Alex.* 29, *concil. deor.* 12). According to another version, Amphilochos son of Alkmaion on his return from Troy was carried by a storm to Kolophon (schol. *Od.* 13. 259) and so encountered Mopsos. The two met in single combat to decide the kingship, and succeeded in slaying each other (Apollod. *epit.* 6. 19, cited by Tzetz. *in* Lyk. *Al.* 440).

A very similar story is connected with Siris in Lucania. Herakles, when driving the cattle of Geryon, saw Kalchas—not the son of Thestor mentioned above, but a seer of the same name—sitting under a wild fig-tree, and asked him how many figs were on the tree. Kalchas replied: 'Ten bushels, and one fig over, which you cannot get into them.' Herakles proceeded to measure the figs and, despite all his efforts, failed to get in the extra one. Kalchas laughed at him. Thereupon Herakles with a blow of his fist slew the seer, and buried him beside the fig-tree (schol. Lyk. *Al.* 978 and 980: allusions in Lyk. *Al.* 978 ff., 1047 with Tzetz. *ad locc.*). Since Siris was colonised from Kolophon (J. Oehler in Pauly—Wissowa *Real-Enc.* i. 2833 f.), it is likely enough that the Colophonian account of Kalchas' contest was brought over to Siris, and there perhaps attached to the Daunian king Kalchos (Roscher *Lex. Myth.* ii. 923 f.).

These stories are of deep interest as implying a contest *à outrance* for the position of priestly king. They are, in fact, the attenuated Greek equivalent of the contest at Nemi: cp. *e.g.* the language of Tzetz. *in* Lyk. *Al.* 1047 'Αμφίλοχος δὲ κατά τινας συναιρεῖται τῷ Μόψῳ τούτῳ περὶ τῆς ἀρχῆς τῆς μαντικῆς μονομαχήσας. It is indeed probable that the apple-tree at Gryneia and the wild fig-tree at Kolophon were sacred trees, like that of Diana *Nemorensis*. If so, it may be maintained that Apollon Γρύνειος was specially connected with apples.

(5) Apples were given as prizes at the Pythian games (Max. Tyr. *diss.* 5. 8 Dübner 'Ολυμπιάσι μὲν καὶ Πυθοῖ οὐκ ἔνεστι κότινον λαβεῖν, οὐδὲ μῆλων τυχεῖν, αὐτὸν ἐφ' ἑαυτοῦ κονισάμενον, ἀλλὰ ἀνταγωνιστῶν δεῖ τῷ κηρύγματι, 7. 4 Dübner μετασχεῖν μὴ κοτίνου μόνον

Fig. 372.

'Ολυμπιάσιν, ἀλλὰ καὶ πίτυος 'Ισθμικῆς, καὶ σελίνου 'Αργολικοῦ, καὶ μήλων Πυθικῶν, *Anth. Pal.* 9. 357 (*adéspoton*: 'Αρχίου Plan.) τέσσαρές εἰσιν ἀγῶνες ἀν' Ἑλλάδα, τέσσαρες ἱροί, | οἱ δύο μὲν θνητῶν, οἱ δύο δ' ἀθανάτων, | Ζηνός, Λητοΐδαο, Παλαίμονος, 'Αρχεμόροιο· | ἆθλα δὲ τῶν κότινος, μῆλα, σέλινα, πίτυς = Auson. *ecl.* 20 (p. 103 Peiper) quattuor antiquos celebravit Achaia ludos. | caelicolum duo sunt et duo festa hominum. | sacra Iovis Phoebique, Palaemonis Archemorique, | serta quibus pinus, malus, oliva, apium. Cp. Phlegon *frag.* 1 cited *supra* p. 466 n. 11), and are represented in connection with them on imperial coppers of Delphoi (*Brit. Mus. Cat. Coins* Central Greece p. 30 pl. 4, 23 and 24 (=my fig. 372) *obv.* ΘΕΑΦ ΑΥCΤΕΙΝΑ Bust of Faustina Senior to right; *rev.* ΠΥ ΘΙ Α Agonistic table, on which are a crow, five apples, and a bay-wreath. Fig. 373, from a specimen in my collection, is similar, except that it shows a vase also on the table. Cp. J. N. Svoronos in the *Bull. Corr. Hell.* 1896 xx. 46 ff. pl. 30, 1—8, where the apples are wrongly described as *σφαιρίδια*, Anson *Num. Cr.* i. 98 nos. 943 f. pl. 17), of Philippopolis in Thrace (*Brit. Mus. Cat. Coins* The Tauric Chersonese, etc. p. 165 no. 36 *obv.* ΑVΤΚΜΑVΡCΕVΗ ΑΝΤΩΝΕΙΝΟC Bust of Caracalla to left, laureate; *rev.* ΚΟΙΝΟΝΘΡΑΚΩΝΑΛΕ ΖΑΝΔΡΙΑΕΝΦΙΛΙ ΠΟΠΟ *Dískos*-thrower standing to left with *dískos* and three apples in his hands. Across the field is ΠΥ ΘΙΑ, p. 166 no. 37 fig. (=my fig. 374) *obv.* The same inscription. Bust of Caracalla to right, radiate; *rev.* · ΚΟΙΝΟΝΘΡΑΚ Ω ΝΑΛΕΖΑΝΔΡ ΙΑΕΝΦΙΛΙΠ ΠΟΠΟΛΙ Agonistic table, on which is an urn inscribed ΠΥΘΙΑ containing two palms. Beneath the table

are an *amphora*, a palm, and five apples, p. 166 no. 38 similar, p. 166 no. 39 *obv.* Similar inscription and bust; *rev.* ΚΟΙΝΟΝ ΘΡΑ ΑΛΕΖΑΝ ΕΝΦΙ ΛΙΠΠΟΠ ΟΛΙ Similar type: but the urn on the table contains five apples, and beneath the table are a palm and an *amphora*. B. V. Head describes the apples as 'balls or discs.' G. Macdonald in the *Hunter Cat. Coins.* i. 444 no. 10 Caracalla, 445 no. 13 Elagabalos calls them 'balls'), of Ankyra in Galatia (*Brit. Mus. Cat. Coins* Galatia, etc. p. 13 pl. 3, 1 (=my fig. 375) *obv.* ΑΝ.....ΑΥΓΟΥCΤΟC Bust of Caracalla to right, laureate; *rev.* ΜΗΤΡΟΠ [ΑΝΚ]ΥΡΑC ΙΕΟΠΥΘΙ Α Agonistic table, on which is an urn, containing a palm-branch, placed between two purses: beneath the table are five apples, p. 13 pl. 3, 2 *obv.* ΑΝΤΩΝΙΝ ΟCΠΙΟCΑΥΓ Similar bust; *rev.* ΜΗΤΡΟΠΟ ΛΕΑΝΚΥΡΑC ΙΕΟΠΥΘ ΙΑ Agonistic urn inscribed ΑΓΩΝ, containing a palm-branch: above the urn are five apples. W. Wroth describes the apples as 'balls,' as does Anson *Num. Gr.* i. 60 no. 683 pl. 10, i. 66 no. 724 pl. 11), and of Tralleis in Lydia (*Brit. Mus. Cat. Coins* Lydia p. 357 no. 181 *obv.* ΦΡΟΥ CΑΒΤΡ ΑΝΚΥΛΛΕΙΝΑ Bust of Tranquillina to right; *rev.* ΤΡΑΛΛΙ ΑΝΩΝ beneath an agonistic table, on which are five apples between two prize-wreaths. In the field to left and right ΠΥΘΙΑ and ΟΛΥΜΠΙΑ. Above, ΕΠΙ? In the exergue, ΦΙΛΙΠΠΟΥ ΚΕΝΤΑ). Thus all the evidence for this custom, whether literary or numismatic, belongs to the second and third centuries of our era,—unless indeed *Anth. Pal.* 9. 357 can be attributed to Cicero's client A. Licinius Archias, which is very doubtful (see R. Reitzenstein in Pauly—Wissowa *Real-Enc.* ii. 463 f.).

(6) Coins of Eleuthernai in Crete, from *c.* 480 B.C. onwards, show Apollon holding a spherical object (J. N. Svoronos *Numismatique de la Crète ancienne* Mâcon 1890 i. 130 ff.

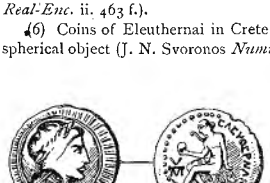

Fig. 376.

Fig. 377.

pl. 11, 4—6, 8—11, 14—18, 22—30, pl. 12, 1—5, 7, *Brit. Mus. Cat. Coins* Crete etc. p. 33 ff. pl. 8, 5—8, 10—13, *Hunter Cat. Coins* ii. 182 f. pl. 41, 15—17, Head *Hist. num.*[2] p. 464 f.), which has been variously interpreted. It is described as *malum* or *pomum* by the older numismatists (see also Overbeck *Gr. Kunstmyth.* Apollon p. 307 n. [3]), including Eckhel *Doctr. num. vet.*[2] ii. 311 f. and Rasche *Lex. Num.* iii. 586, Suppl. ii. 748; and its resemblance to the apple held in the hand *e.g.* of Aphrodite or Venus on other coins (Rasche *op. cit.* vi. 1702, x. 841, 847 ff., 855, 859, 870, 875 ff.) is evident. Müller—Wieseler *Denkm. d. alt. Kunst* ii. 94 pl. 12, 135[a] regards the small round thing held by the standing Apollon as an 'Apfel,' the relatively larger round thing held by the seated Apollon as a 'Diskos' or a 'Kugel'—the one reminiscent of Hyakinthos, the other a cosmic or solar globe. B. Pick in the *Jahrb. d. kais. deutsch. arch. Inst.* 1898 xiii. 173 n. 128 says: 'die Art, wie er den Gegenstand hält, ist sehr verschieden, zuweilen aber lässt sie die Deutung des Attributs als Salbgefäss oder als Granatapfel ganz unmöglich erscheinen.' J. N. Svoronos *op. cit.* i. 130 ff. calls it in succession 'peut-être une pierre,' 'une pierre,' and 'un disque.' W. Wroth in the *Brit. Mus. Cat. Coins* Crete etc. pp. xxvi ff., 33 ff., G. Macdonald in the *Hunter Cat. Coins loc. cit.*, and B. V. Head in his *Hist. num.*[2] *loc. cit.* all make it a 'stone,' presumably influenced by the stone-throwing Talos on coins of Phaistos and the stone-throwing Minotaur on coins of Knossos (*supra* i. 720 f. figs. 534—536). J. de Foville in the *Rev. Num.* iv Série 1902 vi. 454 ff. fig. (=my fig. 376) publishes a copper of Eleuthernai, on which Apollon's head is surrounded by a radiate circle (cp. *supra* i. 544 n. 9), and infers that the sphere held by him may

perhaps be ' un globe solaire, pareil à celui que les Égyptiens, voisins des Crétois, placent sur le front d'Ammon-Râ.' None of these explanations is free from doubt, and I now incline to think that a more satisfactory result may be reached by considering the earliest known coin of the town (E. Muret in the *Rev. Num.* iii Série 1883 i. 65 pl. 2, 4, F. Lenormant *ib.* p. 129 ff., W. Wroth in the *Num. Chron.* Third Series 1884 iv. 29 pl. 2, 5 (= my fig. 377), Overbeck *Gr. Kunstmyth.* Apollon p. 307 Münztaf. 3, 12, J. N. Svoronos *op. cit.* p. 130 pl. 11, 4: *obv.* Apollon, nude except for a belt, stepping left towards a height on which grows a storax-tree. The god carries a bow in his left hand, a spherical object in his right, and is accompanied by a hound. In the field behind him is a second storax-tree. All in a circle of dots; *rev.* ΛΞΘVΞ ΓΞ Artemis, in a long *chitón*, standing to right, shoots an arrow from her bow. She too is accompanied by a hound (? stag A.B.C.). All in a square of dots). It is highly probable that this coin represents Apollon Στυρακίτης (Steph. Byz. *s.v.* Στυράκιον) repairing to Mt Styrakion in Crete (Steph. Byz. *loc. cit.*, Eustath. *in Il.* p. 281, 13) with his bow and hound. It is an odd coincidence, but no more, that Στύραξ (=σαυρωτήρ) was a name recommended by Xenophon as suitable for a hound (Xen. *cyn.* 7. 5). Now Gruppe *Gr. Myth. Rel.* p. 789 infers from Hdt. 3. 107, Plin. *nat. hist.* 12. 81 that in the Levant στύραξ was a substitute for λιβανωτός, 'white-incense,' and suggests that on Greek soil λεύκη, 'white-poplar,' was a surrogate of στύραξ, both having a white under-surface to their leaves. It is therefore tempting to surmise that the storax-trees of Eleuthernai were

Fig. 378.

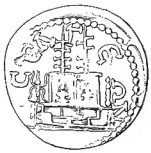

Fig. 379.

Fig. 380.

Fig. 381.

analogous to the poplar-trees of the Eridanos, Apollonia (?), etc. (Steph. Byz. *s.v.* Ἀπολλωνία 23 mentions Apollonia as a later name of Eleuthernai, and notes that ὁ *φυσικὸς* Διογένης, *i.e.* Diogenes ὁ Ἀπολλωνιάτης, was a native of this town: cp. the countermark ΑΠΤ on the copper of Eleuthernai (*supra* fig. 376)), and thence to conclude that the globe on the hand of Apollon is a ball of resin from the bark of the storax-trees comparable with the drops of amber believed to exude from the poplars. It is significant that the balsamic juice known as 'liquid storax' is obtained by incision from a tree, whose botanical name is *liquidambar orientalis*.

The Apollon of Eleuthernai appears also on silver coins of the neighbouring town Rhithymna, struck *c.* 400 B.C. (J. N. Svoronos *op. cit.* i. 308 pl. 30, 1, *Brit. Mus. Cat. Coins* Crete etc. pp. xxvii, 78 pl. 19, 8, Head *Hist. num.*[2] p. 477).

At Selge in Pisidia coppers of *s.* ii B.C. represent the head of Herakles wreathed with storax (*Brit. Mus. Cat. Coins* Lycia, etc. pp. cxvi f., 261 pl. 40, 7 f.), while coppers of imperial date have two storax-trees fenced round as objects of worship and flanked by club and thunderbolt, the symbols of Herakles and Zeus respectively (*Brit. Mus. Cat. Coins* Lycia pp. cxvii, 264 nos. 68 f. Hadrian, 266 no. 78 pl. 41, 3 (=my fig. 378) Severus Alexander, 267 no. 84 pl. 41, 5 (=my fig. 379) Salonina, no. 86 pl. 41, 6 (=my fig. 380) Aurelian). See further Imhoof-Blumer *Monn. gr.* pp. 342—345, who cites *inter alia* Strab. 570 f., and notes that the tree of Herakles is always larger than the tree of Zeus. F. Lajard *Recherches sur le culte, les symboles, les attributs, et les monuments figurés de Vénus, en orient et en occident* Paris 1837 pp. 136 f., 168 pl. 3, 2 (=my fig. 381)

his argument aright) that *Apóllon* was a term borrowed by the Greeks from some Teutonic tongue which, like Gothic, represented the original *b* of the Indo-Europaean **abela-*, **ablu-*[1] by a *p*. But, since Apollon is well-known to Homer, this involves the assumption that the change of Indo-Europaean *b* to Teutonic *p* took place at a very much earlier date (*c.* 1200—1300 B.C.) than is commonly supposed (*c.* 200—300 B.C.). At that remote epoch we should expect to find the Greeks in contact with Thracians or Illyrians rather than with Teutons. And who can assure us that Illyrians or Thracians pronounced 'apple' with a *p*? So for the present Dr Rendel Harris' attractive hypothesis must remain hypothetical.

Be that as it may, the extract cited above from Apollonios of Rhodes brings us back to the Hyperboreans again. Apollon (said the Keltoi), when banished by Zeus from heaven, was sent—not to Admetos king of Thessaly—but to the Hyperboreans. Once more we are led to suspect that the Hyperborean land lay well to the north of Greece. And the context implies that it was located at some point on the Amber Road[2]. Already in neolithic times one

published a specimen in the Bibliothèque Nationale, struck by Caracalla, which shows the trees surmounted by two birds.

[(7) Coppers of Olbia, struck probably in *s.* i A.D. have *obv.* ΟΛ ΒΙΟΠΟ Bust of Apollon to right; *rev.* Δ ΑΔ ΟC CΑΤΥ (*i.e.* Ἀάδος Σατύρου the *árchon*) Nude Apollon, who stands facing us with a *kálathos* on his head, a bow and arrow in his left hand, and a round object in his right (B. Pick in the *Jahrb. d. kais. deutsch. arch. Inst.* 1898 xiii. 172 f. pl. 10, 31, Miss G. M. Hirst in the *Journ. Hell. Stud.* 1902 xxii. 253 ff. fig. 2, E. H. [2] On the various routes by which amber from the north reached the south of Europe see J. N. von Sadowski *Die Handelsstrassen der Griechen und Römer durch das Flussgebiet der Oder, Weichsel, des Dniepr und Niemen an die Gestade des Baltischen Meeres* Aus dem Polnischen von A. Kohn Jena 1877, H. Genthe 'Ueber die Beziehungen der Griechen und Römer zum Balticum' in the *Verh. d. 36. Philologenversamml. in Karlsruhe* 1882 pp. 17—31, F. Waldmann *Der Bernstein im Altertum* (Separatabdruck aus dem Programm des livl. Landesgymnasiums für das Jahr 1882) Fellin 1883 (pp. 37—67 'Von dem Bernsteinhandel, dessen Betrieb, Ausbreitung und Strassen im Altertum,' p. 85 f. 'Bernsteinfunde an den Handelsstrassen'), O. Olshausen 'über den alten Bernsteinhandel der cimbrischen Halbinsel und seine Beziehungen zu den Goldfunden' in the *Zeitschrift für Ethnologie* 1890 xxii Verhandlungen p. 270 ff., *id.* 'über den alten Bernsteinhandel

branch of this great trade-route ran direct from the Baltic to the Black Sea, traversing the valleys of the Vistula and the Dniester, while a second branch, passing along the Elbe, the Moldau, the Danube, came down to the Adriatic, the Balkans, and Greece[1]. In the Bronze Age and the Early Iron Age the Elbe-Danube-Adriatic route was extensively used by the amber-trade[2]. It may therefore be regarded as reasonable to place the Hyperboreans of the myth pretty much where Pindar placed them, near 'the shady springs of Istros[3].'

This location is to some extent confirmed by recent enquiries into the etymology of the name *Hyperbóreoi*. In 1892 W. Prellwitz[4] first propounded the view that *Boréas* means the wind 'from the mountain' (Church Slavonic *gora*)—a view accepted in 1898 by H. Pedersen[5] and in 1901 by O. Schrader[6]. Pedersen accordingly takes the word *hyperbóreos* to denote 'beyond the mountains.' In 1905 O. Schroeder[7] argued that the Hyperboreans were, not an idealised earthly tribe, but a '*Himmelsvolk*' of divinised heroes. Belief in them arose in a land where and at a time when the word for 'mountain' was **bóris*—a form presumed for the pre-Greek dialects of northern Greece. Now the highest mountain between the rivers Haliakmon and Axios is the ancient *Bora*[8] or modern *Nidje*, which attains an elevation of over 2000^{m}[9]. We must conceive of the *Hyperbóreoi* as dwelling, not on the earth 'beyond Bora[10],' but in the sky 'above Bora[11].' Schroeder's conclusions were approved in 1914 by R. Günther and Daebritz[12]. In the same year Kiessling[13] admitted that *Hyperbóreoi* really meant 'above Bora,' but insisted that from the beginning of *s.* v B.C. it was interpreted 'beyond

Boreas,' the word *bora*, 'mountain,' having wholly dropped out of use. Hence—he inferred—neither the true (modern) derivation nor the false (ancient) derivation can explain the fact that the Hyperboreans were so early located to the north of the Rhipai. This must be due to the primitive astronomical belief that the sun disappeared at night behind a huge mountain in the north. In 1916 Miss G. H. Macurdy[1] wrote: 'Helios-Paean-Apollo was the Sun god worshipped with Artemis Basileia in Paeonia-Pieria, and the Hyperborean legend connects this worship with the cult of Apollo and Artemis beyond the Bora.' Miss Macurdy drew attention to the fact that the *via Egnatia*, which ran from Dyrrhachion through Makedonia and Thrace to Byzantion[2], passed close to Mount Bora, and she suggested 'that the same gift of poetic imagination to which we owe the myth of the sisters of Phaethon, transformed into poplars and dropping tears of amber at the place which appears to have been an entrepôt for amber in ancient days, has also developed this legend of a holy race of men living beyond the Bora, on the North-Western track that led to the night home of the Sun god.' In 1917 Miss Harrison[3] proposed to combine Kiessling's explanation with that of Miss Macurdy: 'The *bora* of myth gets contaminated with the Bora of fact.' Lastly, in 1920 Miss Macurdy[4] accepted this combination, but demurred to S. Casson's view[5] that 'The Hyperboreans as a nucleus of myths and travellers' tales belong essentially to the Far East of antiquity,' their 'celestial calm' being perhaps 'some faint echo from civilised China[6].'

[6] The views summarised in this paragraph are, of course, incompatible with that advocated by my friend Dr Farnell in his *Cults of Gk. States* iv. 102 f.: 'The brilliant explanation given by Ahrens of the meaning of the name [*sc.* 'Hyperboreans'] throws light on the darkness: he notes the name of the Macedonian month *Τπερβερεταῖος*, the last month of the year, and therefore falling probably in midsummer and about the time of the harvest, derivable also immediately from no other word than *ὑπερβερέτης*; he notes also the North Greek equation of *β* and *φ*, and concludes that the form *Τπερβόρειοι* is merely a lengthening, due to mistaken popular etymology of *Τπέρβοροι*, which equals *Τπέρφοροι*, a possible variant of *Τπερφερέται*, a name for the sacred ministrants who carry the cereal offerings from one community to another, and whom Herodotus calls *Περφερέες*. This deduction has won some acceptance, and is by far the most interesting contribution made by philology to the solution of a problem of Greek religion.'

The explanation put forward by H. L. Ahrens in the *Rhein. Mus.* 1862 xvii. 340 ff.

On the whole, it seems probable that originally the *Hyperbóreoi* were so named as dwelling 'Beyond the Mountains,' but that later, when the word *bora* had passed out of general use, surviving only in the Macedonian Mount *Bora* and in *Boréas* the wind 'from the Mountains,' they were popularly supposed to live 'at the back of the North Wind.' The road to their far-distant country was conceived

was adopted by W. Mannhardt *Antike Wald- und Feldkulte* Berlin 1877 p. 234 f. (*ib.*² Berlin 1905 p. 234 f.), O. Crusius in Roscher *Lex. Myth.* i. 2830 f., Gruppe *Gr. Myth. Rel.* pp. 103, 107, 718 b, *id. Myth. Lit.* 1908 p. 520 f. But, even as restated by its later adherents, it involves sundry serious improbabilities—see Daebritz in Pauly—Wissowa *Real-Enc.* ix. 260 f.: 'Die antike Volksetymologie habe, von orientalischen Vorstellungen beeinflusst, den H. eine Bedeutung gegeben, die diese "Überbringer der Festgeschenke" nicht von Anfang an hatten; περφερέες sei = *ὑπερβέρεες, *ὑπερβερέες, ὑπερβόροι; der Ὑπερβερεταῖος des makedonischen Jahres sei der Monat der *ὑπερβερετή, wie die makedonische Prozession nach Delphi geheissen habe, und gehe auf ὑπέρ + φέρω = maked. *βέρω zurück. Hiergegen spricht aber, wie mich Günther belehrt "dass ὑπέρ nie diese Bedeutung unseres 'über' in überbringen,—tragen hat; das müsste παρά heissen; περί wiederum heisst 'über' nur in komparativischem Sinne (περικαλλής, Brugmann Gr. Gr.⁴ 513); die περφερέες sind vielmehr die sich herumdrehenden, d. h. die Umgebung (wie ἀμφίπολος), vgl. περιφερής 'um etwas herumgehend' und die περιφέρεια des Kreises." Auch Schröder 73 hat gegen jene Erklärung einen meines Erachtens schlagenden Einwand vorgebracht, dass doch nach Herodots Worten nur die fünf Begleiter der Jungfrauen περφερέες hiessen. Wie kann man dem Volk den Namen nach den Gesandten geben? Πομποί ohne ein Volk, das sie schickt, sind undenkbar. Dass die Sage von den H. "aus einem Missverständnisse dieser Benennnng" (Ahrens) hervorgehen konnte, ist unglaublich. Einen weiteren Gegengrund, den Namen der im delphischen Glauben wurzelnden Ὑπερβόρειοι aus der nur für Delos bezeugten Bezeichnung der den Hyperboreerinnen beigegebenen Begleiter als περφερέες abzuleiten, bildet die Verschiedenheit des delischen und delphischen Glaubens. Freilich kann περφερέες wohl delphisch sein, Kretschmer Glotta i 37. Gegen die Ahrenssche Etymologie vgl. auch Immisch Klaros 156. Treuber Gesch. d. Lykier 1887, 78. Zielinski N. Jahrb. III 87.' Daebritz goes on to urge that the Macedonian month Ὑπερβερεταῖος (adopted into the Cretan calendar as Ὑπερβέρετος) was rightly connected by O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 108 [after A. Fick in *Orient und Occident* 1864 ii. 720, who postulates a Zeus ὑπερβερέτα] with a Zeus ὑπερβερέτας, 'the surpasser,' = ὑπερφερέτης (Dion. Hal. *ant. Rom.* 2. 34 cited *supra* p. 111 n. o) in the sense of ὑπερφέρων, ὑπερφερής. Hoffmann's derivation of Ὑπερβερεταῖος commends itself also to W. Baege 'De Macedonum sacris' in *Dissertationes philologicae Halenses* Halis Saxonum 1913 xxii. 228 and to E. Bischoff in Pauly—Wissowa *Real-Enc.* ix. 253. Proof positive has recently come to light in the shape of two inscriptions from the site of Mopsion (?) in Pelasgiotis (A. M. Woodward 'Greek Inscriptions from Thessaly' in *Ann. Arch. Anthr.* 1910 iii. 155 f. no. 7 on a gable-topped *stèle* in lettering of *s.* i B.C. (?) U. von Wilamowitz—Moellendorff in *Hermes* 1905 xl. 138 cures Kallim. *frag.* 117 Schneider *ap.* Hephaist. *enchir.* 6. 3 p. 19, 11 ff. Consbruch Ἑρμᾶς ὅ περ Φεραῖος αἰνείων θεός | ἐμμι τῶ φυγαίχμα by the simple expedient of re-writing Ἑρμᾶς ὁ Περφεραῖος Αἰνίων θεὸς | ἐμμι, τῶ φυγαίχμα ('wo dann so etwas wie ἀνάθημα und der Eigenname folgen musste, der Weihende, der der Schlacht entgangen war').

sometimes as an earthly, sometimes as a heavenly path. The former was the great trade-route that skirted the eastern shore of the Adriatic. The latter was its aërial counterpart, the Milky Way[1]. The one was the track by which amber reached the Greeks. The other was the highway followed by the birds. And it is interesting to find that Sophokles connected amber with birds, when he described it as the tears shed by the *meleagrides* or 'guinea-fowl' at the death of Meleagros[2].

Of the route by which the Hyperborean offerings came to Apollon at Delos we have two very different records. Herodotos[3] *à propos* of the Hyperboreoi writes :

'By far the fullest account of them is that given by the Delians, who declare that sacred things wrapped in wheaten straw are carried from the Hyperboreans to the Scythians ; that from the Scythians they are received by a succession of neighbouring tribes, who bring them westwards as far as the Adriatic ; that from this point they are forwarded south to the people of Dodona, who are the first of the Hellenes to receive them ; that from Dodona they come down to the Malian gulf and cross over to Euboia, where they are sent from town to town till they reach Karystos ; but that, after this, Andros is passed by, the Carystians taking them direct to Tenos, and the Tenians to Delos.'

Pausanias[4], having occasion to mention Prasiai, a small township on the east coast of Attike, observes :

'In Prasiai there is a temple of Apollon. Here the first-fruits of the Hyperboreans are said to come. The Hyperboreans—I am told—hand them over to the Arimaspians, and the Arimaspians to the Issedones ; from these the Scythians convey them to Sinope ; thence they are borne by Hellenes to Prasiai ; and it is the Athenians that bring them to Delos. These first-fruits—it is said—are hidden in wheaten straw, and nobody knows what they are. At Prasiai there is a tomb of Erysichthon[5], who died on the voyage as he was returning from Delos after the sacred embassy.'

The routes thus traced by Herodotos and Pausanias correspond, at least in part, with the two main branches of the Amber Road mentioned above[6], *viz.* that which passed along the Elbe, the Moldau,

[1] Cp. such names for the Galaxy as 'Watling Street' or 'London Road' (*supra* p. 37). H. Gaidoz and E. [5] Note that Erysichthon was destroyed by Demeter for felling a sacred black-poplar in her grove at Dotion (Kallim. *h. Dem.* 24 ff.) : see *Class. Rev.* 1903 xvii. 180 f., 1904 xviii. 76 f., *infra* § 3 (c) i (7), and cp. Hesych. *s.v.* Αἰγειροτόμοι· *ἰθαγενεῖς τινες Ἀθήνησιν.*

[6] *Supra* p. 493 f.

the Danube, and the Adriatic to Central Greece, and that which linked the Baltic to the Black Sea by means of the Vistula and the Dniester. The position of the various stations on the Hyperborean routes and their relation to both branches of the Amber Road can be conveniently seen from the map here inserted (pl. xxvi). It would appear that the five and a half centuries, which intervened between the time of Herodotos and the time of Pausanias, witnessed the transference of the first-fruits from the longer to the shorter land-route, a considerable saving of time being thereby effected[1]. F. G. Welcker, as far back as 1860, suggested that the Hyperborean gifts actually consisted of amber[2]; and his suggestion is decidedly attractive. If stones coloured like water were appropriate to the sky-god[3], amber may well have been associated with the sun-god. Whether the neolithic borings and cup-marks found on pieces of amber in Schleswig-Holstein, Denmark[4], and Prussia[5] had any solar significance[6], is very doubtful. Nor can we lay stress on the Homeric description of Eurymachos' necklace as 'strung with amber-beads, like the sun[7].' But Nikias (of Mallos[8]?) definitely

[1] Cp. Sir W. Ridgeway *The Origin of Metallic Currency and Weight Standards* Cambridge 1892 p. 105 ff., *id.* in Frazer *Pausanias* ii. 405 f.

[2] Welcker *Gr. Götterl.* ii. 353 ff. Frazer *Pausanias* ii. 406 and *Golden Bough*[3]: The Magic Art i. 33 n. 4 takes the offerings to have been first-fruits of the corn. But Herodotos' phrase *ἱρὰ ἐνδεδεμένα ἐν καλάμῃ πυρῶν* (4. 33) and Pausanias' equivalent *τὰς δὲ ἀπαρχὰς κεκρύφθαι...ἐν καλάμῃ πυρῶν* (1. 31. 2) imply that something was wrapped in the sheaf. There is therefore something to be said for the view of W. Mannhardt *Wald- und Feldkulte*[2] Berlin 1905 p. 237: 'Es wird nämlich in ausserordentlich zahlreichen Fällen noch jetzt ein *Mensch* oder ein *Tier*, oder ein *Ei* (Osterei) und *Brod*...in die *erste* oder *letzte Garbe* des Ährenschnitts als Vertreter des Wachstumsgeistes hineingebunden. Im griechischen und italischen Brauche spielt aber die erste Garbe der Ernte die Rolle, welche in Nordeuropa gemeinhin der letzten zufällt. Unzweifelhaft waren auch die in Weizengarben eingebundenen Opfergaben des delischen Erntefestes von gleicher Art.' That we have a Phrygian example of the man bound in a sheaf was rightly emphasised by W. Mannhardt *op. cit.*[2] p. 285 and *Mythologische Forschungen* Strassburg 1884 p. 1 ff., O. Crusius in Roscher *Lex. Myth.* ii. 2065 ff., Frazer *Golden Bough*[3]: Spirits of Corn and Wild i. 214 ff. Has it been noticed that a Greek parallel underlies Aristoph. *Ach.* 948 ff., where the Boeotian, about to carry off Nikarchos packed in straw, ejaculates *μέλλω γέ τοι θερίδδειν*, and the Chorus replies *ἀλλ', ὦ ξένων βέλτιστε, συν|θέριζε κ.τ.λ.*?

The Western and Eastern Routes of the Hyperborean Offerings in relation to early Trade-Routes for Amber.

See pages 493 f., 497 f.

explained amber as the juice or sweat of solar rays[1]. Moreover, its Greek name *élektron* is akin to *eléktor*, a poetic title of the sun[2]; and the ancients maintained that the latter was derived from the former[3], or the former from the latter[4]. Among the Rhodians, too, Elektryone —locally worshipped as Alektrona[5]—was said to be the daughter of Helios[6].

Our enquiry, as a whole, leads up to the following conclusions. The cult of Apollon came into Greece along the older Amber Route from the land of the Hyperboreans, which is best located near the source of the Danube. The *Agyieûs*-pillars of Apollonia, Orikos, Olympe, Ambrakia mark out the 'Way'[7] and point onwards to Delphoi, where the Hyperboreans Pagasos and Agyieus established the oracle[8]. Apollonia in Illyria was left as a milestone on the road[9], if not also Apollonia in Akarnania[10] and Apollonia in Aitolia[11].

[8] *Supra* p. 169.

[9] This assumes that the Corcyraean colony of 588 B.C. (J. Oehler in Pauly—Wissowa *Real-Enc.* i. 2827 f., G. Hirschfeld *ib.* ii. 112) found Apollon already established on the spot. Interest attaches to an archaic 'Apollon'-torso of white limestone (15 cm. high), which came to light at *Durazzo* (C. Praschniker—A. Schober *Archäologische Forschungen in Albanien und Montenegro* Wien 1919 p. 40 fig. 47, R. Pagenstecher in the *Berl. philol. Woch.* Jan. 29, 1921 p. 109 = *Class. Rev.* 1921 xxxv. 83).

[10] Steph. Byz. *s.v.* Ἀπολλωνία.

[11] Liv. 28. 8.

It is noticeable that a town in Thrace[1] and no fewer than four towns in Makedonia bore the same name[2], including the settlement on Mount Athos whose inhabitants were called *Macrobii*[3]—a title suggestive of Hyperborean longevity[4]. With regard to Apollon's original character we are still lamentably ignorant. That he was from the first a sun-god is neither proved, nor probable[5]. *Apóllon* appears to be merely a cult-epithet, 'he of the Black-Poplars[6].' The full name of the god is possibly preserved in the Homeric designation Phoibos *Apóllon*[7]. If so, the name means 'the Clear One,' 'the Pure One[8],' and would be applicable to any deity of the bright, shining sky. Not improbably Phoibos and Phoibe were sky-god and earth-goddess respectively. On reaching Delphoi, Phoibe as a chthonian power succeeded to Gaia and Themis[9], while Phoibos, finding another sky-god already in possession, became affiliated to Zeus and acted as his interpreter to men[10]. For the rest, Phoibos *Apóllon*, god of the clear, pure sky, underwent both physical and ethical development: on the one hand, his clarity, specialised into that of the sun[11], enabled him to rival and in part displace the ancient Helios; on the other hand, his essential purity[12] made him a god of light and leading to the whole civilised world.

We have, so far as I can see, no right to assume that Artemis entered Greece along with Apollon or came from the same northern home. Herodotos indeed adduces as a parallel to the Hyperborean usage the fact that Thracian and Paeonian women, when they sacrifice to Artemis *Basíleia*, hold their offerings 'not without wheaten

[12] Plout. *de* E *apud Delphos* 20 φοῖβον δὲ δήπου τὸ καθαρὸν καὶ ἁγνὸν οἱ παλαιοὶ πᾶν ὠνόμαζον, ὡς ἔτι Θεσσαλοὶ τοὺς ἱερέας ἐν ταῖς ἀποφράσιν ἡμέραις αὑτοὺς ἐφ' ἑαυτῶν ἔξω διατρίβοντας, οἶμαι, φοιβονομεῖσθαι λέγουσι.

straw[1].' But, as K. Wernicke[2] points out, 'Artemis *Basileia*' is merely Herodotos' translation of the Thracian *Bendîs*[3]; and we have not the remotest reason to connect Bendis with Apollon. Again, the story of Kleinis made that Mesopotamian worthy accompany Apollon and Artemis to the land of the Hyperboreans[4]. But, when they got there, it was Apollon, not Artemis, that received the sacrifice; and, in any case, a contaminated Hellenistic romance is a source of very dubious value[5]. O. Crusius[6] would emend Pindar's account of the Hyperborean 'brute beasts ramping bolt upright (*orthían*)[7]' in such a way as to make the delighted spectator, not Apollon, but Artemis *Orthía*—a desperate expedient. Crusius urges that Pindar elsewhere describes how 'Leto's horse-driving daughter' (Artemis) welcomed Herakles to 'the Istrian land[8].' But Pindar wishes us to believe that Herakles brought thence the wild-olive and, as we have already seen[9], is giving a southern colour to a northern myth. Lastly, it might be contended that the names of the Hyperborean maidens Opis and Arge (Hekaerge), or Hyperoche and Laodike, imply the cult of Artemis. That is probably true, and has been admitted[10]. But they imply the cult of Artemis at Delos rather than in the land of the Hyperboreans.

In short, we have no real ground for supposing that Artemis was *ab initio* the twin sister of Apollon. There is more to be said for the view that he first met her in Asia Minor or the Archipelago, where she originated as the younger form of the Anatolian mother-goddess, being related to Leto in much the same way as Persephone to Demeter[11].

(*b*) Lightning as a flash from an Eye.

W. Schwartz in a noteworthy chapter of his *Indogermanischer Volksglaube* collects a mass of evidence to show that lightning is

[1] Hdt. 4. 33 *οἶδα δὲ αὐτὸς τούτοισι τοῖσι ἱροῖσι τόδε ποιεύμενον προσφερές, τὰς Θρηικίας καὶ τὰς Παιονίδας γυναῖκας, ἐπεὰν θύωσι τῇ Ἀρτέμιδι τῇ Βασιλείῃ, οὐκ ἄνευ πυρῶν καλάμης ἐχούσας τὰ ἱρά.*

[11] *Supra* i. 396 f.

often regarded as the piercing glance of a fiery eye, and that the wide-spread belief in the evil eye is directly traceable to this conception[1]. Of the conclusions here stated I should accept the first and reject the second. There are, I think, grounds for supposing that the Greeks sometimes at least viewed lightning as a glance from the eye of Zeus, and indeed as the glance of his evil eye. But to explain the evil eye of men as derived from the evil eye of a god is—apart from other objections—to invert the order of religious causation.

Hesychios the lexicographer quotes from an unnamed Greek tragedian the phrase—

as the eye of Zeus,

and informs us that it means 'as a flash of lightning[2].' This is

[1] W. Schwartz *Indogermanischer Volksglaube* Berlin 1885 pp. 169—219. Cp. some sentences in an earlier work by the same author (F. L. W. Schwartz *Der Ursprung der Mythologie* Berlin 1860 p. 212 f.), and the helpful chapter of W. H. Roscher *Die Gorgonen und Verwandtes* Leipzig 1879 p. 63 ff. ('Der Blitz als Wuthblick eines himmlischen Ungeheuers,' etc.).

[2] *Frag. trag. adesp.* 278 Nauck² *ap.* Hesych. *s.v.* ὥσπερ οὐφθαλμὸς Διός· ὡς ἀστραπή. οὐφθαλμὸς Διός is the correction of A. Meineke (*Philologus* xii. 630) for ὁ ὀφθαλμὸς τοῦ Διός cod. A. Nauck reads ὀφθαλμὸς Διός.

Homer alludes four times to the ὅσσε φαεινώ of Zeus (*Il.* 13. 3 and 7, 14. 236, 16. 645), once to those of Athena (*Il.* 21. 415), once to those of Menelaos (*Il.* 17. 679), and once to the ὄσσε φαεινά of Alkathoos (*Il.* 13. 435). But it is to be observed that, according to Dr W. Leaf and Mr M. A. Bayfield *ad locc.*, the first four passages belong to a decidedly earlier *stratum* of the poem than the last three. Hence we may perhaps infer that 'flashing eyes' were appropriate to Zeus as a lightning-god, and to Athena as his second self (*infra* § 9 (h) ii (μ)). Menelaos was at most Διοτρεφής (*Il.* 17. 679), as was the father of Alkathoos (*Il.* 13. 427): Agamemnon was δμματα καὶ κεφαλὴν ἴκελος Διὶ τερπικεραύνῳ (*Il.* 2. 478. *Infra* Append. I).

Later writers usually lay stress on the eye of Zeus as the wakeful witness of right and wrong: *e.g.* Hes. *o.d.* 267 (*supra* i. 187 n. 9, 196 n. 6), Aisch. *suppl.* 646 ff. Δῖον ἐπιδόμενοι πράκτορά [τε] σκοπὸν | δυσπολέμητον, δν [οὐ]τίς ἂν δόμος ἔχοι | ἐπ' ὀρόφων μαίνοντα; βαρὺς δ' ἐφίζει with schol. *ad loc.* Διὸς σκοπόν, τὸν Διὸς ὀφθαλμὸν τὸν πάντα σκοποῦντα (W. Headlam, after F. Bamberger and T. G. Tucker, would read πράκτορά τοι κότον. I should keep σκοπόν, but explain it as alluding to the eagle, not to the eye, of Zeus), Soph. *O.C.* 704 ff. ὁ γὰρ αἰὲν ὁρῶν κύκλος λεύσσει νιν Μορίου Διὸς | χἀ γλαυκῶπις Ἀθάνα (the schol. *ad loc.*, cited *supra* p. 20 n. 4, equates Zeus Μόριος with Zeus Καταιβάτης), Eur. *Hipp.* 886 τὸ σεμνὸν Ζηνὸς ὄμμ' ἀτιμάσας, Cornut. *theol.* 11 p. 11, 20 Lang πάντ' ἐφορᾷ Διὸς ὀφθαλμὸς καὶ πάντ' ἐπακούει. But there is at least a negative reminiscence of the 'flashing eyes' in Ov. *met.* 2. 857 nullae in fronte minae, nec formidabile lumen.

Athena was worshipped as Ὀξυδερκής or Ὀξυδερκώ at Argos (Paus. 2. 24. 2), as Ὀξυδέρκα at Epidauros (*Inscr. Gr. Pelop.* i no. 1074 Ὀξυδέρ|κας. | Διονύσι|ος (Διονυσίου) | πυρφορή|σας with circle no. 40 (*ib.* p. 189) and numeral λγ'), as Ὀπτιλέτις (Plout. *v. Lyc.* 11, *apophth. Lac. Lyc.* 7) or Ὀπτιλία (Olympiod. *in* Plat. *Gorg.* 40 ἱστορεῖται γὰρ ὅτι Πτιλλίας Ἀθηνᾶς ἱερὸν ἐποίησε· πτίλλους δὲ ἐκάλουν τοὺς ὀφθαλμούς, cp. C. A. Lobeck *Pathologiae linguae Graecae elementa* Lipsiae 1853 i. 83) or Ὀφθαλμῖτις at Sparta (Paus. 3. 18. 2). These cult-titles recall her poetic epithets γλαυκῶπις, γοργῶπις, ὀβριμοδερκής, etc. (Bruchmann *Epith. deor.* p. 7, Gruppe *Gr. Myth. Rel.* p. 1198 n. 3) and her intimate relation to the Gorgon (W. H. Roscher *Die Gorgonen und Verwandtes* Leipzig 1879 Index p. 135 *s.v.* 'Athene,' *id.* in the *Lex. Myth.* i. 677, 1696, Gruppe *Gr. Myth. Rel.* pp. 1201

testimony which we cannot control; but the general trustworthiness of Hesychios and the occurrence of analogous expressions elsewhere combine to render it credible. Aischylos tells how an oracle bade Inachos drive Io from his home:

> And if he would not, there should come from Zeus
> A fire-eyed thunderbolt to blast his race[1].

But neither the reading nor the interpretation of the word translated 'fire-eyed' is quite certain[2]. More convincing are two other passages from the plays of the same poet. Klytaimestra in the *Agamemnon* has at length induced her husband to enter his palace treading a pathway strewn with purple as though he were a god. He does so, saying:

> Well, if thou wilt, let some one loose forthwith
> The shoes that serve my foot as slaves, and while
> I tread these sea-wrought robes, oh may no envy
> Of a divine eye strike me from afar[3].

Again, the chorus of Argive elders give the following expression to their belief in the jealousy of heaven:

> Exceeding good report is dangerous;
> For a thunderbolt is flung by the eyes of Zeus.
> Luck without envy is my choice[4].

These passages certainly seem to imply that lightning is a glance

n. 1, 1209 n. 2, Ziegler in Pauly—Wissowa *Real-Enc.* vii. 1641 f.). It may be suspected that she was credited with a potentially evil eye (cp. such passages as Prop. 2. 28. 12 Palladis aut oculos ausa negare bonos? Hyg. *fab.* 165 Iuno et Venus cum eam irriderent, quod et caesia erat (B. Bunte cj. esset) et buccas inflaret, Loukian. *dial. deor.* 8 γλαυκῶπις *μέν, ἀλλὰ κοσμεῖ καὶ τοῦτο ἡ κόρυς*, 20. 10 *ἢ δέδιας μή σοι ἐλέγχηται τὸ γλαυκὸν τῶν ὀμμάτων ἄνευ τοῦ φοβεροῦ βλεπόμενον;*).

A fine bronze statuette of Zeus from Paramythia, now in the British Museum (*Brit. Mus. Cat. Bronzes* p. 36 no. 275 pl. 7, A. S. Murray *Greek Bronzes* London 1898 p. 81 with pl.), had eyes inlaid with silver. So have other bronze statuettes of Zeus at Paris (Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 1 no. 1 fig., p. 1 f. no. 3 fig., p. 2 f. no. 4, p. 3 no. 5 fig., p. 3 f. no. 6 fig., p. 4 f. no. 8 fig., p. 5 f. no. 9 fig., p. 9 f. no. 17 fig., p. 10 no. 18 fig., cp. p. 13 no. 27, p. 13 no. 29 fig., De Ridder *Cat. Bronzes du Louvre* i. 76 no. 511 pl. 38) and doubtless elsewhere. Silver was a metal specially appropriate to Zeus (*supra* i. 25 n. 2, 625 f.).

[1] Aisch. *P.v.* 667 f. *κεἰ μὴ θέλοι, πυρωπὸν ἐκ Διὸς μολεῖν | κεραυνόν, ὃς πᾶν ἐξαϊστώσοι γένος.*

[2] The Laurentian MS. has *πυρωτὸν*, other MSS. *πυρωπὸν*, which is printed by Dindorf and Wilamowitz. E. E. Sikes and St. J. B. Wynne Willson adopt their cj. *πυρῶπ' ἀν.* Even if *πυρωπὸν* be kept, it may mean no more than 'of fiery aspect.'

[3] Aisch. *Ag.* 944 ff. The essential words are 947 *μή τις πρόσωθεν ὄμματος βάλοι φθόνος.*

[4] Aisch. *Ag.* 466 ff. *τὸ δ' ὑπερκόπως κλύειν | εὖ βαρύ· βάλλεται γὰρ ὅσσοις Διόθεν κεραυνός. | κρίνω δ' ἄφθονον ὄλβον.* T. G. Tucker's cj. *κάραvα*, accepted by W. Headlam, would mean: 'for lofty peaks are struck from heaven by jealous eyes of Zeus.' For other cjj. see A. W. Verrall *ad loc.*

shot from the jealous eye of Zeus. And, when we remember that the 'jealous eye' was another name for the evil eye[1], it becomes highly probable that the Greeks sometimes considered lightning as an exhibition of the evil eye on the part of Zeus.

Now W. Wundt[2] in his masterly *Völkerpsychologie* has shown that the superstition of the evil eye[3] presupposes a belief in the eye as the seat and doorway of the soul[4]. Primitive man regards reflections on the cornea as due to an inward fire and, since this fire is dimmed or extinguished by death, connects it with the soul's activity[5]. The pupil of the eye he takes to be a hole through which the soul can pass outwards to work its will at a distance. Parenthetically I may add that this explanation accounts, not only for the evil eye, but also for the good eye[6]. If the glance of the eye

Myth.* iii. 3209 and in the *Archiv f. Rel.* 1913 xvi. 381, G. Elliot Smith *The Evolution of the Dragon* Manchester 1919 pp. 52—55.

[5] Cp. *e.g.* Plin. *nat. hist.* 28. 64 augurium ex homine ipso est non timendi mortem in aegritudine, quamdiu oculorum pupillae imaginem reddant, Iul. Capit. *v. Pert.* 14. 2 ea die, qua occisus est, negabant in oculis eius pupulas cum imaginibus, quas reddunt spectantibus, visas.

[6] Examples of 'Der gute Blick' are collected by S. Seligmann *op. cit.* i. 244—251, cp. *ib.* ii. 493 Index *s.v.* 'Gutes Auge.' I have it from Prof. P. Gardner that the modern Greek peasant believes in the influence of a good eye as well as in that of an evil eye. I have noted the following ancient allusions to the good eye of deities: Kallim. *h. Ap.* 50 ff. *ῥεῖά κε βουβόσιον τελέθοι πλέον, οὐδέ κεν αἴγες* | *δεύοιντο βρεφέων ἐνιμηλάδες, ἧσιν* Ἀπόλλων | *βοσκομένῃσι ὀφθαλμὸν ἐπήγαγεν κ.τ.λ.*, Theokr. 9. 35 f. *τόσσον ἐμὶν Μοῖσαι φίλαι· οὐς γὰρ ὀρεῦντι* | *γαθεῦσαι, τοὺς δ' οὔ τι ποτῷ δαλήσατο Κίρκη* (cp. Kallim. *ep.* 23. 5 f. *Μοῦσαι γὰρ ὅσους ἴδον ὄμματι παίδας* | *μὴ λοξῷ, πολιοὺς οὐκ ἀπέθεντο φίλους*, where *μὴ λοξῷ* is read by schol. Hes. *theog.* 82, *ἄχρι βίου* by *Anth. Pal.* 7. 525. 6), cp. Pind. *Ol.* 7. 11 f., *Pyth.* 3. 85, Hdt. 1. 124, Alkiphr. *ep.* 1. 36, 3. 44, Aristain. *ep.* 1. 11, 1. 19, Hor. *od.* 4. 3. 1 ff. See further C. Sittl *Die Gebärden der Griechen und Römer* Leipzig 1890 p. 343 n. 5. In the case of men I have no certain instances, but cp. Pind. *Pyth.* 5. 14 ff. *τὸ μέν, ὅτι βασιλεὺς* | *ἐσσὶ μεγαλᾶν πολίων·* | *ἔχει συγγενὴς* | *ὀφθαλμὸς ἀλδοιότατον γέρας,* | *τεᾷ τοῦτο μιγνύμενον φρενί.* The 'eye born with' Arkesilas of Kyrene, which brought him worship and honour as an inalienable prerogative, may well have been his good eye. It seems to have been hereditary: *ib.* 51 ff. *ὁ Βάττου δ' ἕπεται παλαιὸς ὄλβος ἔμπαν τὰ καὶ τὰ νέμων,* | *πύργος ἄστεος ὄμμα τε φαεννότατον* | *ξένοισι.* J. Bridge 'ΣΥΓΓΕΝΗΣ ΟΦΘΑΛΜΟΣ' in *Harvard Studies in Classical Philology* 1900 xi. 141 ff. gives a different explanation (*συγγενὴς ὀφθαλμός* = *συγγενὴς πότμος*, 'the guardian spirit of the race,' cp. Aisch. *cho.* 934

is the soul projected to a distance[1], it follows that the glance will be bad or good according to the nature of the soul's intention. Applying now Wundt's illuminating hypothesis to the Greek[2] conception of lightning as a glance from the eye of Zeus, we reach again by a different route the conclusion that lightning was part and parcel of the bright sky-god, a flash of his own fiery self darted forth from his eye in heaven.

(*c*) Lightning as a weapon.

Sir John Evans[3] and, more recently, C. Blinkenberg[4] have shown that throughout the confines of Europe, indeed far beyond them, stone celts or axes are regarded as thunderbolts. They are supposed to have fallen with a flash of lightning in the thick of a thunderstorm, and are consequently venerated as being of celestial origin.

The modern Greeks form no exception to this almost universal belief—witness the following tale from Zakynthos. The Giants (it is said), fancying themselves mightier than God, once laid claim to be lords of heaven and earth. They climbed a high mountain and flung rocks at God. But He grasped his thunderbolts and hurled them at the Giants, who were all dashed headlong from the mountain. Many of them were killed: the rest fled. One of them, however, did not lose heart. He cut a great many reeds, bound them together, and so made an enormously long pole, with which he tried to reach heaven[5]. He had nearly succeeded, when suddenly a flash of lightning from God reduced him to ashes[6]. After this his companions made a last

ὀφθαλμὸν οἴκων). See also the *modus operandi* of love as conceived by Plout. *symp.* 5. 7. 2, Heliod. 3. 7 f., Eumath. 3. 7.

[1] The philosophers here too built upon popular belief. Emped. *frag.* 84 Diels (302 ff. Karsten) compared the eye to a lantern, the light of which leaps forth through its surrounding framework. Plat. *Tim.* 45 B ff. holds that, in the act of sight, a pure fire within us issues through the eye as a visual current (δψεως ῥεῦμα): it is akin to the fire of daylight in the air, and unites with it to make a uniform substance, which meets the vibrations from the visible object and transmits them to the eye and so to the soul. Cp. Aristot. *de sensu* 2. 437 b 10 ff.

[2] The same conception is to be found in Latin literature. W. Schwartz *op. cit.* p. 176 f. calls attention to Sil. 12. 719 ff. where Iuno says to Hannibal: huc vultus flecte atque aude spectare Tonantem: | quas hiemes, quantos concusso vertice cernis | sub nutu tonitrus! *oculis qui fulgurat ignis! Id. ib.* p. 177 cites Ov. *met.* 2. 787 ff. where Invidia, the personified evil eye, blasts the landscape like a thunder-storm.

[3] Sir J. Evans *The Ancient Stone Implements of Great Britain*[2] London 1897 p. 56 ff.

[4] C. Blinkenberg *The Thunderweapon in Religion and Folklore* Cambridge 1911 pp. 1 ff., 68 ff. (a valuable, though somewhat miscellaneous, collection of facts).

[5] Cp. the tale of the Thracian Kosingas (*supra* p. 130). J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 74 regards the incident of the reeds as 'probably an imperfect reminiscence of the legend of Prometheus.'

[6] At Arachova, a village near Delphoi, when a big tree is struck, people exclaim κάποιον διάβολον ἔκαψε (*sc.* ὁ θεός rather than ἡ ἀστραπή), 'He's blasted a devil!'—it being thought

attempt to get up to heaven and destroy God. They piled one mountain on the top of another. So, when God saw that they would not be quiet, in great wrath He again hurled His lightning at them, and sent His angels to inform the survivors of their fate, which was perpetual imprisonment inside a mountain[1]. B. Schmidt, who reports this Zakynthian tale, comments on its similarity to the classical myths of the Giants and the Titans, observing that the *rôle* of the pagan Zeus has been simply transferred to the Christian God[2]. He also remarks that the word here used of God's 'thunderbolts' is *astropelékia*[3], and adds: 'The common expression for lightning that strikes is *astropeléki*, and this term proves that in the eyes of the populace the flash travelling downwards from the air appeared as an axe[4].' Rather let us say that the flash was thought to be accompanied by a tangible axe. For in Greece the name *astropelékia* is given to actual neolithic celts[5]. Schmidt himself has lately published the important observation that such celts are called, not only *astropelékia*, but also *astrapopelékia* (Epeiros) and *astrapóboula* (Parnassos)[6]—fuller forms which denote 'lightning-axes,' 'lightning-bolts,' and explain the otherwise puzzling prefix[7]. The celts are kept in houses as a preservative against lightning[8]; and portions of them are worn by way of protection from evil spirits or the evil eye. The inhabitants of Parnassos declare that fragments of these stones are found in places that have been struck by lightning.

The beliefs of the modern peasantry are of no recent growth. About the year 1081 A.D. Alexios i Komnenos, emperor of Constantinople, sent a number of presents to Henry iv, emperor of Germany, and among them an *astropelékys* set in gold[9]. Centuries

that God aims his lightning at such trees in order to destroy demons residing in them (B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 33, J. C. Lawson *op. cit.* p. 73).

information which he derived from Sotakos of Karystos, a Hellenistic writer on precious stones.

Monumental evidence for the like beliefs in the classical area is fairly abundant. A 'Minoan' grave at Phaistos yielded a small celt of softish black stone, not steatite, pierced with a hole and doubtless worn as an amulet (fig. 382)[1]. A very ancient votive deposit from Norba in Latium includes a small celt of green stone encircled lengthwise by an iron band, which must once have ended in a hook for attachment (fig. 383)[2]. A tomb at *Narce* in the Faliscan district con-

Fig. 386.

Fig. 385.

Fig. 387.

tained a small celt of diorite serving as pendant to a necklace of beads made in blue vitreous paste (fig. 384)[3]. In the Führer catacomb at Syracuse a celt of greenish serpentine flecked with white, which has a partially bored hole at one end, was found on the breast of a woman (fig. 385)[4]—a good example of a pagan superstition surviving into Christian times. In Spain two small celts of fibrolite were used as prophylactic pendants (figs. 386, 387)[5]. At Vettersfelde in Nieder-Lausitz, a district of Brandenburg, a remarkable hoard of objects in gold—the complete equipment of a Scythian chief—was

turned up by the ploughshare in 1882[1]: among these objects was a small celt of dark serpentine, half-sheathed in gold and fitted with a hollow cylinder for suspension (fig. 388)[2]. There can be little doubt that the celt was worn as an amulet in the early decades of *s.* v B.C.[3]

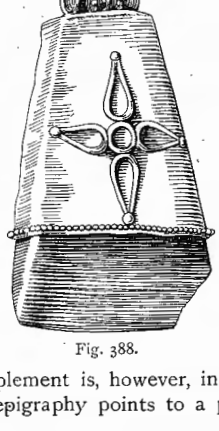

Fig. 388.

Of special interest are certain examples that bear incised inscriptions. A magnificent axe-head of brown banded agate, acquired by Cardinal S. Borgia (1731—1804) probably from some missionary to the East, later in the Tyszkiewicz collection, and now in the American Museum of Natural History at New York, has cut upon it a Sumerian inscription in archaic cuneiform characters (fig. 389)[4]. The inscription appears to record the owner of the axe, but not its dedication to a god. The implement is, however, in all probability of a votive character. Its epigraphy points to a period *c.* 2000 B.C.[5] A celt of serpentine,

[5] I am indebted for this information to my friend Mr Sidney Smith, who examined and criticised for me the readings propounded by other Assyriologists. He says: 'The probable translation is "Ḫad-ḫimil, elder brother of Adad-ili." The first name might also he read Ḫattish.' Mr Smith adds that a votive hammer-head of Shudurkîb, last king of the Sargonid dynasty of Akkad, is now in the British Museum and will be published in *Cuneiform Texts* Part 36.

H. Zimmern 'Zu den Weihinschriften der Kassiten-Könige' in the *Zeitschrift für Assyriologie* 1898 xiii. 302 ff. put together and elucidated the text of an inscription, in which the Kassite king Nazi-Maruttaš dedicates to Bel an axe 'of brilliant lapis-lazuli'... 'for his life and the welfare of his land.'

found in the Argolid and preserved in the Central Museum at Athens, is engraved with two Mithraic subjects and an inscription in Greek letters (fig. 390)[1]. A smaller celt of dark green jade or

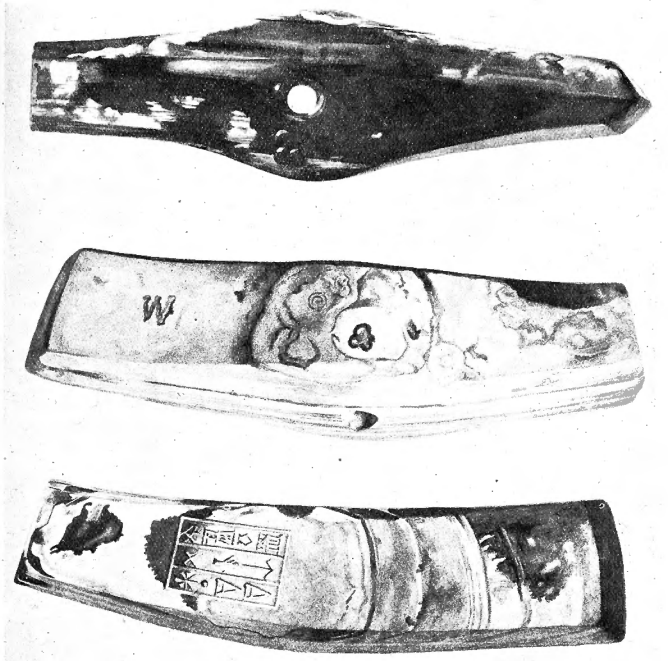

Fig. 389.

nephrite, brought from Egypt in 1812 by Colonel Milner, *aide-de-camp* to Lord J. Bathurst, and presented by Mrs Milner to the Christy collection, is covered on both faces with 'Gnostic' inscriptions

[1] A. Dumont in G. de Mortillet *Matériaux pour l'histoire primitive et philosophique de l'homme* Saint-Germain en Laye 1868 iv. 9 first drew attention to this axe. E. T. Stevens *Flint Chips* London 1870 p. 114 and Sir J. Evans *The Ancient Stone Implements, Weapons and Ornaments, of Great Britain*[2] London 1897 p. 61 f. followed suit. É. Cartailhac *L'âge de pierre dans les souvenirs et superstitions populaires* Paris 1877 p. 31 fig. 14 = Perrot—Chipiez *Hist. de l'Art* vi. 119 fig. 5 (inaccurate). Harrison *Themis* p. 57 fig. 6 (inscription corrected, after R. M. Dawkins). My illustration is from an impression in plaster kindly furnished by Mr B. Staes.

(fig. 391)[1]. Lastly, the paraphernalia of a diviner, discovered in the lower town at Pergamon and thence transferred to Berlin, comprise among other items of interest three polished black stones inscribed on both sides with magical *formulae*, the text of which is virtually identical on all three stones (fig. 392)[2]. It was pointed out by

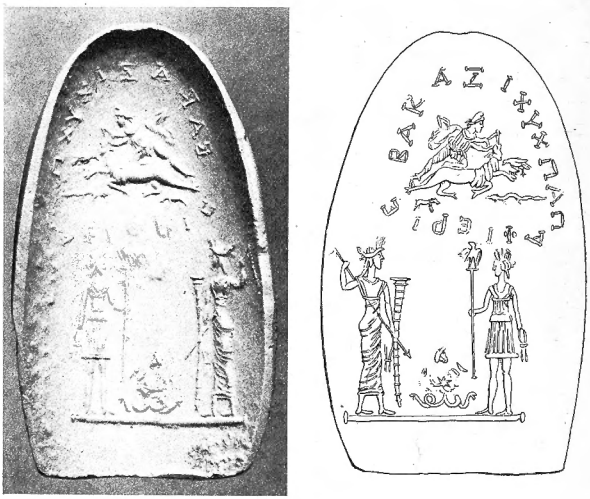

Fig. 390.

R. Wünsch that these stones are simply slices of one or more neolithic celts, cut up to serve as amulets. Special virtue was doubtless attributed to any section of a thunderbolt.

It would seem, then, that the beliefs attaching to neolithic celts among the modern Greeks can be traced back to classical times.

[1] Brigadier-General Sir H. Lefroy in *The Archaeological Journal* 1868 xxv. 151 f., C. W. King 'On a *Ceraunia* of jade converted into a Gnostic talisman' *ib.* 1868 xxv. 103—116 with pl. (=my fig. 391), E. T. Stevens *Flint Chips* London 1870 p. 109 f., Sir J. Evans *The Ancient Stone Implements, Weapons and Ornaments, of Great Britain*[2] London 1897 p. 60 f. fig. 11, G. F. That being so, it is reasonable to push the investigation one step further and raise the question whether the like beliefs were already operant in the great pre-classical civilisation known to us as 'Minoan.'

a *b*

Fig. 391.

i. The double axe in 'Minoan' cult.

Looking round for evidence, we are at once impressed by the prominent position accorded to the double axe in cults of the 'Minoan' age. Here, however, in the absence of deciphered documents, we must move with the greatest caution. The double axe is an implement apt to cut both ways. It has already lent itself to diametrically opposite interpretations[1]. And the assumption that it was the hatchet of a sky-god, though a legitimate hypothesis, is hardly self-evident. In such a matter the only safe plan of procedure is to classify without prejudice the extant examples of the object in dispute, and to see how far our hypothesis will serve to explain their complex details.

[1] This, if nothing more, is made plain by the polemic of my friend Dr W. H. D. Rouse 'The Double Axe and the Labyrinth' in the *Journ. Hell. Stud.* 1901 xxi. 268—274.

(α) The double axe in mid air.

In the cult-scenes of 'Minoan' art the double axe sometimes appears as an isolated object suspended in the air. The famous gold

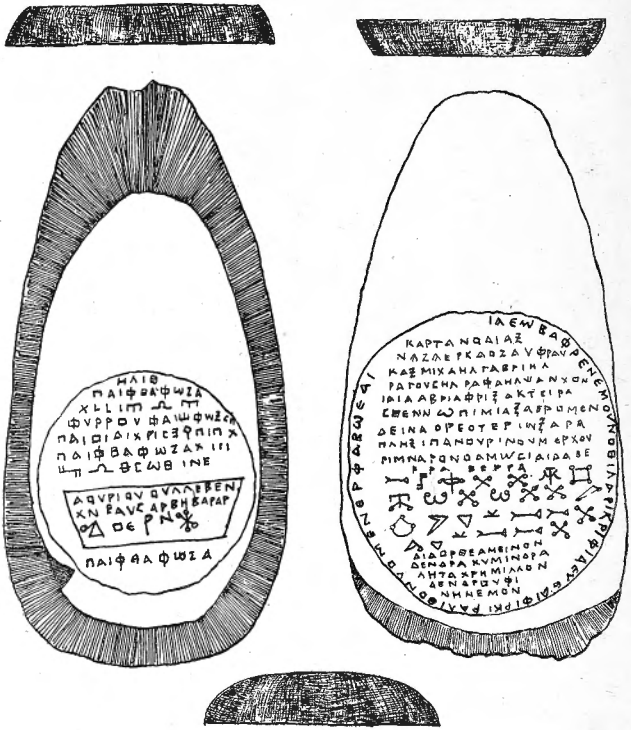

Fig. 392.

ring found by Drosinos and P. Stamatakes in a complex of buildings on the lower terrace of the Akropolis at Mykenai and now preserved in the Central Museum at Athens[1] affords a case in point (*supra* p. 47, fig. 18)[2]. It shows a female figure seated on stony ground

[1] Staïs *Coll. Mycénienne: Athènes* p. 66 f. no. 992.

[2] Fig. 18 is after Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 108 fig. 4 (scale $\frac{2}{1}$). O. Rossbach in the *Arch. Zeit.* 1883 xli. 169—173 fig. has a careful line-drawing (scale $\frac{1}{1}$) made from two impressions of the ring in different materials. Furtwängler *Ant.*

beneath a vine (?)[1], with three poppy-heads in her hand. Two other females approach, with gestures of adoration, bringing her lilies and lotuses. The goddess and her attendant nymphs, if such they are, alike wear lilies in their hair, necklaces, and divided skirts: their waists are tightly constricted, their breasts prominent and bare[2]. Immediately in front of the goddess and represented on a much smaller scale a woman stands on a heap of stones or rude altar to offer flowers. Behind the tree another woman, on the same small scale, uplifts her hands in worship. The scene is closed on the left by a row of six lion-heads[3]. These suggest the cult of Rhea[4], who being an earth-mother might well hold poppy-heads[5] and receive gifts of flowers[6] as she sat beneath a vine[7]. Her place at Argos, Sparta, and Mykenai was later taken by the Greek Hera[8]. And it can hardly be accidental that a statue of Hera at Argos had a wreath of vine-shoots on its head and a lion-skin beneath its feet[9]. Moreover, Hera is expressly stated to have loved lilies[10]. In short, it seems highly probable that the gold ring found at Mykenai commemorates the great goddess of the locality, the 'Minoan' Rhea. But if the lower part of the design gives us the earth, the upper part gives us the sky. The sun and moon are manifest, with a double wavy line

Gemmen i pl. 2, 20 gives a photograph of an impression, and *ib.* ii. 9 f. a bibliography and description.

[1] Opinions differ. H. Schliemann *Mycenæ* London 1878 p. 354 ff. fig. 530 consulted two professors of botany at Athens: one of these experts, T. Orphanides, concluded that the tree is 'a breadfruit-tree' (!); the other, whom Schliemann follows, pronounced it to be 'simply a vine laden with bunches of grapes.' C. Schuchhardt *Schliemann's Excavations* trans. E. Sellers London 1891 p. 276 ff. fig. 281 says: 'a clumsy representation of a vine.' Collignon *Hist. de la Sculpt. gr.* i. 45 ff. fig. 23: 'un pin.' Perrot—Chipiez *Hist. de l'Art* vi. 840 ff. fig. 425: 'un pin ou un olivier.' Staïs *loc. cit.*: 'olivier?' Furtwängler *loc. cit.*: 'ein dicht belaubter Baum.'

[2] This 'Minoan' usage ultimately gave rise to two Homeric epithets, *βαθύζωνος*, 'deep-girt' (*i.e.* with girdle cutting deeply into the waist), and *βαθύκολπος*, 'deep-bosomed' (*i.e.* with deep hollow between the breasts): see F. Studniczka *Beiträge zur Geschichte der altgriechischen Tracht* Wien 1886 pp. 120 f., 104, W. Amelung in Pauly—Wissowa *Real-Enc.* iii. 2314, E. B. Abrahams *Greek Dress* London 1908 p. 15 f.

[3] So Furtwängler *op. cit.* ii. 10.

[4] A. Milchhöfer *Die Anfänge der Kunst in Griechenland* Leipzig 1883 pp. 35, 102 fig. 39 rightly regards the figures in the foreground as a group of divinities, *viz.* Mother Rhea receiving fruit and flowers from her nymphs (*pace* C. Schuchhardt *op. cit.* p. 277 f. and M. Mayer in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii. 190).

beneath them, best taken to denote the Milky Way[1] conceived as Okeanos the celestial river[2]. Below this are two significant objects. To the left is a shield with human head, hands, and feet projecting from behind it: it grasps a spear or staff and is—to judge from analogous representations[3]—conceived as descending through the air. To the right, and occupying the very centre of the field, is a double axe with duplicated blades likewise descending from the region of the sun and moon towards the goddess and her *entourage*. It is reasonable to suppose that the shield and axe thus falling from above are the weapons of the sky-god. Further than that we cannot at present go.

Another example of the double axe in mid air has been thought to occur on a clay sealing found by D. G. Hogarth in a 'Minoan' house at *Kato Zakro*, a village of eastern Crete[4]. But of this impress a more likely explanation has been advanced by G. Karo, as we shall subsequently see[5].

(β) The double axe in relation to tree- or plant-forms.

In a second group of cult-scenes the double axe is brought into more intimate relations with tree-or plant-forms. A small *sarcophagus*, discovered by the Italian excavators close to the palace at *Hagia Triada*, two miles to the north-west of Phaistos, and now to be seen in the Museum at *Kandia*, has first claim upon our attention[6]. It was found, lidless, empty, and partially damaged, in a rectangular tomb-building, which can be referred to the end of the period known as 'Late Minoan ii' or the beginning of 'Late Minoan iii,' that is, to a date *c.* 1400 B.C. The *sarcophagus*, made of greyish limestone, in

The painted limestone *sarco*[illegible]n Hagia Triada near Phaistos.

See page 516 ff.

shape imitates a wooden coffer, and is covered with a skin of fine white stucco. On this ground the designs were drawn in yellow and painted in a variety of colours.

The decoration comprises four panels, two long and two short. Of the long sides one represents animal and vegetable offerings at a 'Minoan' shrine (pl. xxvii, *a*). From the left a procession of five women with bare white feet and long coloured robes advances towards a table-altar, on which lies a spotted bull bound with red bands. The blood flows from his throat into an *ámnion*[1] or bucket on the ground; his frightened eyes are wide open; and his tail still whisks. Beneath the table two goats, of some domesticated species, wait their turn. Behind it stands a red-skinned man playing a double flute; his hair is long and falls in a couple of black tresses down his back; a bordered robe covers him from neck to knee. Further to the right a woman is standing at a small altar. She wears an ornament of gold in her black hair, a white jacket sleeved to the elbow and bordered with pink, and a baggy white skirt tailed and tufted with red. She extends her hands over a small basin or basket, placed on the altar. Above it, that is, beyond it are visible a beaked jug somewhat resembling an *oinochóe* and a two-handled basket full of fruit. On the extreme right is a larger altar, of similar architectural design but surmounted by four pairs of ritual horns[2]. Behind grows a sacred tree probably meant for an olive[3]. Between the adjacent altars appears a platform or base of two courses, from which rises a large double axe of most remarkable aspect. A tapering pillar or tree-

[1] *Od.* 3. 444 ἀμνίον. Eustath. *in Od.* p. 1476, 38 ff. Κρῆτες δὲ ἄμνιόν φασιν ἀγγεῖον εἰς ὃ τὸ αἷμα τῶν ἱερείων ἐδέχοντο, αἷμνιόν τι ὂν παρὰ τὸ αἷμα. Πέρσιλος οὖν ὁ Ἱεραπύτνιος ἱστορεῖ, φασί, παρὰ τοῖς Ἱεραπυτνίοις ἔτι σώζεσθαι τὴν φωνήν, αἷμνιον, δασέως μετὰ τοῦ κατ' ἀρχὴν ἰῶτα προφερομένην παρὰ τὸ αἷμα. φησὶ δὲ καὶ Ἀπολλόδωρος ὡς εἰκὸς ἦν καὶ παρὰ τῷ ποιητῇ οὕτως αὐτὸ προφέρεσθαι, περιαιρεθῆναι δὲ τὸ ἰῶτα ὑπό τινων, cp. schol. H. M. Q. R. *Od.* 3. 444. See further Stephanus *Thes. Gr. Ling.* i. 2. 133 C—D, G. Meyer *Griechische Grammatik*[3] Leipzig 1896 p. 267, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 34, Boisacq *Dict. étym. de la Langue Gr.* p. 54.

The blood collected in the ἄμνιον would then be poured over the altar (Eustath. *loc. cit.* p. 1476, 41 f. Ἀττικοὶ δὲ σφάγιον τὸ τοιοῦτον ἀγγεῖον ἑκάλουν, εἰς ὃ πρῶτον αἷμα δεχόμενοι τῷ βωμῷ ἐπέχευον = schol. H. M. Q. R. *Od.* 3. 444)—a rite suggestive of chthonian worship (S. Eitrem 'Opferritus und Voropfer der Griechen und Römer' in the *Videnskapsselskapets Skrifter* ii Hist.-Filos. Klasse 1914 no. 1 Kristiania 1915 p. 434 f.).

[2] Cp. *supra* i. 506 ff.

[3] R. Paribeni in the *Rendiconti d. Lincei* 1903 xii. 348 takes the tree to be either an olive or a laurel. But in the *Mon. d. Lincei* 1908 xix. 42 f. he decides for an olive. So do A. J. Reinach in the *Rev. Arch.* 1908 ii. 282 ('derrière, semble s'épanouir un olivier'), F. von Duhn in the *Archiv. f. Rel.* 1909 xii. 164 ('Lorbeer oder Öl, wahrscheinlich letzteres'), Harrison *Themis* p. 161 ('an unmistakable olive-tree'), H. R. Hall *Ægæan Archæology* London 1915 p. 174 ('an olive-tree'). F. M. J. Lagrange in the *Revue Biblique internationale* Nouvelle Série 1907 iv. 341 thinks it a shrub rather than a tree, and suggests the *agnus castus*.

trunk, coloured pink (wood?), forms as it were the handle of a double axe, coloured yellow (gold?)[1]. The blades of this axe are duplicated—as on the ring from Mykenai[2]—and marked with diagonals. Upon them is perched a bird of black plumage, almost certainly to be identified as a raven[3]. The background of the panel changes from yellow to white and from white to blue as the eye travels from left to right; but this change of colour is apparently due to mere love of variety. The design as a whole puts beyond doubt the actual worship of the double axe. That here, as on the Mycenaean ring, it was conceived as the sky-god's weapon may be inferred partly from its elevated position, set on the apex of a tapering pillar, partly from its association with a raven, that prophet of the coming storm[4].

[1] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 43 'la doppia ascia d' oro,' cp. *ib.* p. 29 'due doppie asce d' oro o di metallo dorato.'

[2] *Supra* p. 47 fig. 18.

[3] R. Paribeni in the *Rendiconti d. Lincei* 1903 xii. 344, 348 regarded the birds represented on the axes of this *sarcophagus* as pigeons or ravens. But in the *Mon. d. Lincei* 1908 xix. 31 f., 43 he prefers ravens ('corvi') to pigeons ('colombe'). G. Karo in the *Archiv f. Rel.* 1904 vii. 130 makes them eagles ('Adler'). F. M. J. Lagrange in the *Revue Biblique internationale* Nouvelle Série 1907 iv. 341 f. would recognise a crow or an eagle on one side of the *sarcophagus* ('on dirait d'un corbeau ou d'un aigle'), but pigeons on the other ('la physionomie est ici celle de colombes plutôt que celle de corbeaux ou d'aigles'). A. J. Reinach in the *Rev. Arch.* 1908 ii. 281 f. leaves the matter undecided ('corbeau ou colombe,—colombe noire comme celles de Dodone,' 'un oiseau noir'). Sir A. J. Evans in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 195 says: 'perhaps the sacred black woodpeckers of the Cretan Zeus.' J. E. Harrison *ib.* ii. 155: 'a bird of black colour, possibly a pigeon or, as Dr Evans suggests, a black woodpecker.' Cp. Sir A. J. Evans in *Archaeologia* 1914 lxv. 54 'perhaps the sacred woodpecker, afterwards identified with the Cretan Zeus.' E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1909 xxiv. 163 argues for a cuckoo ('Kuckuck'). H. R. Hall *Ægæan Archæology* London 1915 p. 173 speaks of 'a bird which looks very like a magpie,' but *ib.* p. 175 adds: 'One may wonder whether this apparent magpie is not really intended for an eagle, the sacred bird of Zeus.' F. von Duhn in the *Archiv f. Rel.* 1909 xii. 166 ff. states that at first he thought the bird a dove ('Taube'), but that, after inspecting the original, he pronounced it to be a raven ('Rabe'). He reports *ib.* p. 167 n. 2 the expert opinion of W. Warde Fowler: 'I have examined the birds with a strong magnifying glass, and have no hesitation in identifying them as ravens: the one in the upper plate to the right is quite unmistakeable to the eye of anyone accustomed to observe birds out of doors, as I have done for the last thirty-five years and more. The other two are not quite so convincing, but must, I think, be the same. They all have the outline of head and beak which is peculiar to the raven (corvus corax) and which even the crow (corvus corone) has not in quite the same degree, nor any other bird known to me. I mean that there is only a very slight depression where the beak emerges from the feathers of the head, so that the upper outline of the bird's head is almost an uninterrupted curve. Perhaps I ought to mention that the raven of the southern Mediterranean is smaller than ours and unknown to me (c. umbrinus), but I believe that it resembles the northern bird in everything but colouration. I am certain these birds cannot be woodpeckers: apart from the head and beak no one sees a black woodpecker perched as these are.' This authoritative verdict may well be allowed to decide the issue.

[4] Aristot. *frag.* 241 Rose *ap.* Ail. *de nat. an.* 7. 7 *κόραξ δὲ ἐπιτρόχως* (so R. Hercher for *ταχέως καὶ ἐπιτρόχως* codd.) *φθεγγόμενος καὶ κρούων τὰς πτέρυγας καὶ κροτῶν αὑτάς, ὅτι*

The other long side of the *sarcophagus* (pl. xxvii, *b*) depicts two scenes, distinguished from each other, not so much by the variable background (white—blue—white), as by the fact that the human figures at the point of junction are standing back to back. On the left we see another episode from the ritual of the double axe[1]. A red-skinned man, wearing his hair short with a fore-lock[2], and clad in a

Royds *The Beasts, Birds, and Bees of Virgil*[2] Oxford 1918 p. 40 ff.).

We need not, therefore, hold with D. A. Mackenzie *Myths of Crete & Pre-Hellenic Europe* London s.a. p. 290 f. that ravens are necessarily 'birds of ill omen, who foretell death and disaster' or that the birds on the *sarcophagus* are 'the raven spirits of Hades... receiving a propitiatory offering of blood or wine.' F. von Duhn in the *Archiv f. Rel.* 1909 xii. 167 f. takes a wider and a wiser view. I should, however, he inclined to add that the bird was perhaps originally regarded, not 'als himmlischer Bote' etc., but as a telephany of the sky-god himself (*supra* p. 187). See further O. Keller 'Rabe und Krähe im Altertum' in the *Jahresbericht des Vereins für Volkskunde und Linguistik in Prag* 1893.

[1] F. M. J. Lagrange in the *Revue Biblique internationale* Nouvelle Série 1907 iv. 344 holds that the first long side of the *sarcophagus* together with the first portion of the second long side forms a continuous frieze, the subject of which is the cult of *three* sets of axes on handles. Obvious objections to this view are (1) the very different treatment of the axe-handles on the two sides of the *sarcophagus*; (2) the interposition of one of the short sides between the two long sides; (3) a serious lack of symmetry.

[2] *Supra* i. 23 n. 6 *sub fin.*

bordered pink robe that reaches from his shoulders to his bare feet, advances slowly from right to left. He holds a large golden lyre, which has seven strings and sides shaped like the necks of swans[1]. As he goes, he plucks the strings of the lyre, but apparently uses no *plêktron*[2]. In front of him moves a woman, whose fore-lock and front curls peep out from beneath a golden head-dress of peculiar type. She is clothed in a blue jacket and skirt with coloured borders; and she carries a pink pole, on which are slung two particoloured buckets. Before her stands another woman, wearing a white jacket sleeved to the elbow and bordered with blue, also a baggy white skirt tailed and tagged with red. She is engaged in pouring a red liquid (wine? blood??) out of another brightly coloured bucket[3] into a larger jar or *kratêr*, which, being painted blue with circular bands of yellow, may be taken to represent a silver vessel inlaid with gold. It rests on a base between two pedestals, one consisting of superposed steps, the other resembling a truncated pyramid[4]. From each of these pedestals there springs a tapering pillâr or tree-trunk, thickly covered with green leaves[5] and serving as the haft of a yellow (gold?) double axe with duplicated blades and ravens (?) perched upon them. As to the meaning of this scene, E. Petersen has rightly insisted on the contrast between the one bare stem and the two leafy stems, arguing that the former betokens the worship

[1] Clearly shown by A. Mosso *The Palaces of Crete and their Builders* London 1907 p. 317 f. fig. 156.

[2] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 37.

[3] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 33 f., 36 regards all these buckets as *situlae* of decorated metal (gold, silver, copper).

[4] Pedestals of the sort have come to light in the palace at *Hagia Triada* (R. Paribeni in the *Rendiconti d. Lincei* 1903 xii. 338, *id.* in the *Mon. d. Lincei* 1908 xix. 30), in the palace at Phaistos (L. Pernier *ib.* 1902 xii. 69 and 103), at *Palaikastro* (R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 300), in a small house at Knossos (Sir A. J. Evans in *Archaeologia* 1914 lxv. 68), in the 'Little Palace' at Knossos (*id. ib.* 1914 lxv. 72), and in the Dictaean Cave (*id. ib.* 1914 lxv. 72 fig. 82).

[5] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 29 thinks that the trunks are those of palm-trees and suggests the date-palm (*phoenix dactylifera*), but notes that palm-trunks are cylindrical, not conical like these. His identification as palms is accepted by A. J. Reinach in the *Rev. Arch.* 1908 ii. 281 f. and by J. E. Harrison in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 154 f. E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1909 xxiv. 163, 168, 170 is more reserved ('hier nur ein Pfeiler, dort zwei; diese zwei mit grünem Laub umkleidet, jener eine kahl und ohne Grün,' etc.). F. von Duhn in the *Archiv f. Rel.* 1909 xii. 173 was the first to recognise obelisks covered with cypress-leaves ('zwei cypressengeschmückte Obelisken') and to recall the fact that at Knossos Rhea had an ancient grove of cypresses (*supra* i. 649 n. 3). Accordingly in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 189 I wrote: 'Professor von Duhn kindly informs me that these supports are apparently pillars or posts covered with leaves —most probably with cypress leaves. If so, they were obviously ritual substitutes for cypress-trees.'

of the sky-god in the winter, the latter his marriage with the earth-goddess in the spring[1]. Petersen remarks that of the two leaf-clad pillars one is noticeably larger than the other, and that its axe-head has the same diagonals as the axe-head of the leafless pillar—a hint that the paired pillars are those of god and goddess respectively[2]. We may, then, assume provisionally that the worshippers of the double axe as depicted on the *sarcophagus* are performing rites intended to call down the vernal showers and so bring about the revival of vegetation.

But what of the second scene represented in immediate contiguity with this? Three bearers of offerings pass towards the right. Each has short hair and no clothing beyond a belt and a baggy white skirt tailed and tagged as before. The tags of these peculiar garments vary in colour, those of the first and last men being black, those of the second man red. All three have necklaces, and two have bracelets. Number one carries the model of a boat; number two, that of a white calf spotted with black; number three, that of a yellowish calf with spots of deeper yellow[3]. They are approaching a flight of three steps, coloured a dull red, beyond which is a tree of some doubtful species[4]. By it stands a man of shorter stature, with a fore-lock of black curly hair. He is swathed in a white robe with red tags and yellow border, which covers and conceals his arms. Behind him a polychrome building, enriched with spirals, completes the design. Egyptian parallels, adduced by R. Paribeni[5], have made it highly probable that the erect figure is that of a dead man, and that the building at his back is his tomb or tomb-chapel. His dwarfish height implies that he died young[6].

[1] E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1909 xxiv. 163 ff.

[2] *Id. ib.* p. 165 n. 11.

[3] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 26 ff. is disposed to view the offerings as an actual boat and live calves, not mere models. Later critics, without discussing the matter, appear to agree with him. They may be right. But size and position alike point rather to the use of models, such as are common in the tombs of Egypt and other lands.

[4] So R. Paribeni in the *Rendiconti d. Lincei* 1903 xii. 346 suggests the *ficus Indica*. But in the *Mon. d. Lincei* 1908 xix. 20 he is less explicit. F. M. J. Lagrange in the *Revue Biblique internationale* Nouvelle Série 1907 iv. 342: 'un arbre..., semblable à une plante grasse à trois panaches.' A. J. Reinach in the *Rev. Arch.* 1908 ii. 280 f.: 'l'arbre—une sorte de palmier,' 'le palmier funéraire.' F. von Duhn in the *Archiv f. Rel.* 1909 xii. 180: 'Palme.'

[5] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 15 ff. fig. 3. M. Meurer 'Zu den Sarkophagen von Klazomenai' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1900 xvii. 65—68 with figs. 1—3 argues that the trapezoidal, as distinct from the rectangular, *sarcophagi* of Klazomenai were designed to be set up on end uncovered and so hold the body upright, probably during the funeral ceremony,—a usage apparently derived from Egypt *viâ* Phoinike.

[6] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 19 f. F. von Duhn in the *Archiv f. Rel.*

Certain traits common to the two long sides of the *sarcophagus* suggest that the scenes of axe-cult are intimately related to the offerings made at this young man's tomb. The tagged garments worn by the priestesses of the double axe, by the ministrants at the tomb, and by the dead man himself have been recognised by Paribeni[1] as hairy sackcloth, originally made of animals' skins and still retaining a sort of tail: such a garb is presumably funeral in character. Again, three of the axe-worshippers and two of the tomb-ministrants are decked with red scarves or streamers, to which also we should attach some sepulchral significance[2]. It may therefore be surmised that the magic rites of revival performed before the double axes of the sky-god and the earth-goddess were believed to ensure the continued vitality or resurrection of the dead. Nay more, it is conceivable that the young man buried in this princely tomb was regarded as himself an incarnation of the sky-god. Was not Zeus said to have perished as a prince in Crete[3]? On this showing the Cretan prince was one of many who in their time played the part of Dionysos or Zagreus, the reborn Zeus[4]. And here, forestalling for a moment the results of a later section[5], we must note the curious parallelism of the Cretan and the Tenedian axe-cults[6]:—

HAGIA TRIADA.	TENEDOS.
Worship of a double axe erect on a stepped base.	Worship of a double axe erect on a stepped base[7].
Worship of two double axes.	Worship of two double axes[8].
Kratér set between double axes.	*Amphora* attached to double axe[9].
Sacrifice of a bull in the cult of an axe-god.	Sacrifice of a bull-calf in the cult of Dionysos *Anthroporrhaistes*[10], probably an axe-god[11].

But, if the youth buried in the *sarcophagus* actually posed as Dionysos or Zagreus, we should look to find him treated as the consort of the great 'Minoan' goddess Rhea[12]. Was this the case? An answer is perhaps to be sought in the designs of the two remaining panels.

1909 xii. 179 f. rather fancifully conjectures that the custom of crouched burial led to the dead being conceived as of smaller dimensions than the living. E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1909 xxiv. 162 thinks that this is no mummified mortal, but a young god resembling Dionysos Φαλλήν and swathed because phallic.

[12] *Supra* i. 649 n. 7.

One of the short sides (pl. xxvii, *c*) represents a pair of horses, blue and yellow on a white ground, drawing a two-wheeled chariot, in which rides a couple of white-skinned women. Their robes are pink bordered with blue, and blue bordered with yellow and white. The four red reins are apparently held by the woman nearest the spectator: she has two in her left hand and two in her right, which encircles her companion. We have no reason to think that these are goddesses[1] or even priestesses[2]. More probably they are just ladies belonging to the princely court—the queen, let us suppose, and her charioteer.

The other short side (pl. xxvii, *d*) shows a group roughly similar in appearance but widely different in meaning. A two-wheeled chariot on a red ground is drawn by a pair of griffins with canine rather than leonine bodies, variegated wings, and high plumed crests. In it ride two female figures, of whom the nearer one in a blue robe bordered with yellow and white holds the reins round her more gorgeously dressed companion. In the field above the griffins hovers a bird, which has been compared with a hoopoe[3] and even with a sparrow-hawk[4]. But its short beak, yellow-brown, blue, and white feathers, black marking, and erectile crest proclaim it to be a somewhat glorified jay[5]. This bird, the *corvus glandarius* of Linnaeus, the *garrulus glandarius* of later ornithologists, gets its modern scientific name from the fact that 'the acorn is its favourite food[6].' But the ancients were mainly impressed by its bright colouring and its talkative tongue. The former trait made it comparable with the woodpecker: the Romans called the one *pica*, the other *picus*[7]; and,

[1] Cp. E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1909 xxiv. 168 ff.

[2] A. J. Reinach in the *Rev. Arch.* 1908 ii. 287.

[3] R. Paribeni in the *Mon. d. Lincei* 1908 xix. 61: 'Non esiste nell' avifauna mediterranea un uccello di quella forma e di quei colori: l' upupa, alla quale si potrebbe pensare, ha il becco lungo, e drizza il suo pennacchio, ma non lo rovescia in avanti, come fa il nostro uccello, e come avviene nel cacatua e in qualche altro uccello esotico.' But it must be remembered that the young hoopoe develops its crest before its beak (R. Lydekker *The Royal Natural History* London 1895 iv. 58).

[4] F. M. J. Lagrange in the *Revue Biblique internationale* Nouvelle Série 1907 iv. 339 would recognise 'un épervier'!

[5] I am indebted for this suggestion to my wife. A good coloured plate of the jay is given by J. L. Bonhote *Birds of Britain* London 1907 p. 156 ff. pl. 47.

[6] R. Lydekker *Wild Life of the World* London s.a. i. 108 with col. pl., cp. *id. The Royal Natural History* London 1894—95 iii. 319 f. with fig., C. Swainson *The Folk Lore and Provincial Names of British Birds* London 1886 p. 75. Hence the Italian name *ghiandaia*, and the German *Eichel-häher*. Aristot. *hist. an.* 9. 13. 615 b 22 f. ὅταν δ' ὑπολίπωσιν αἱ βάλανοι, ἀποκρύπτουσα ταμιεύεται (*sc.* ἡ κίττα).

[7] The relation of both words to *pingo*, ποικίλος, etc. is doubtful (Walde *Lat. etym. Wörterb.*[2] p. 580). So is that of our *jay*, French *geai* (in Picardy *gai*), Spanish *gayo*, *gaya*, Portuguese *gaio* to the adjective *gay* (G. Körting *Lateinisch-romanisches Wörterbuch*[2] Paderborn 1901 p. 187).

if the Cretan Zeus took shape as a woodpecker (*Pîkos*)[1], the Cretan Dionysos very possibly figured as a jay. The latter trait brought it into the company of ravens[2] and other garrulous birds[3]: in this capacity too it was sacred to Dionysos[4]. We may, therefore, fairly conjecture that the jay here represented denotes the soul of the youth who in his lifetime had played the Dionysiac part. In the earth-coloured goddess with a plumed head-dress, towards whom the jay with a characteristic[5] flap of its wings is flying, we can recognise the Cretan Rhea[6]. She, like the Nemeseis of Smyrna[7], stands erect in a griffin-drawn car. In short, it seems probable that this panel, which formed the head-end of the *sarcophagus*[8], marks the reunion of the dead man with his divine consort in the other world.

The *sarcophagus* of *Hagia Triada* does not stand alone. Several of its motives are repeated on a painted earthenware *lárnax* found by J. H. Marshall at *Palaikastro*, thirteen miles north-east of Praisos and eight miles north of *Zakro*, in eastern Crete[9]. Its two long sides are divided each into a couple of square panels. Those of one side show (*a*) a fish, perhaps meant for a dolphin, upside down with two stars and a rosette in the field; (*b*) a bird of uncertain species[10] with high curled wings and spread tail. The panels of the other side (fig. 393) are more elaborately decorated. One of them (*c*) depicts a large lily-plant with three flowers. Those to right and left have their stamen-tips shaped like double axes. That in the centre appears, on closer inspection, to be not a flower at all, but an arrangement of cult-objects simulating a flower. Instead of a stalk there is a slender column with base, capital, and *abacus* complete. It supports, not a three-petalled lily, but a double axe rising from a stepped base[11] and flanked by a pair of pillars[12]. The remaining panel

[10] It appears to belong to the order *anseres*, and may be intended for a duck, goose, or swan.

[11] *Supra* p. 520 n. 4.

[12] R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 299 speaks of these as 'a pair of "sacred horns."' We should, however, distinguish these cigar-shaped pillars from the horns of the adjacent panel.

(*d*) exhibits a griffin with wings like those of the bird on the opposite side. In the field is a lily-flower before it, a star above it, and, higher up, two pairs of ritual horns[1] resting on a horizontal line. The ornamentation of the lid includes a couple of stars; that of the ends, a pair of horns with a bud springing from between them.

We are not in a position to clear up the meaning of all this symbolism. But we can at least explain some parts of it with more or less probability. The double axe set upright on a stepped base between a pair of pillars is again comparable with the Tenedian

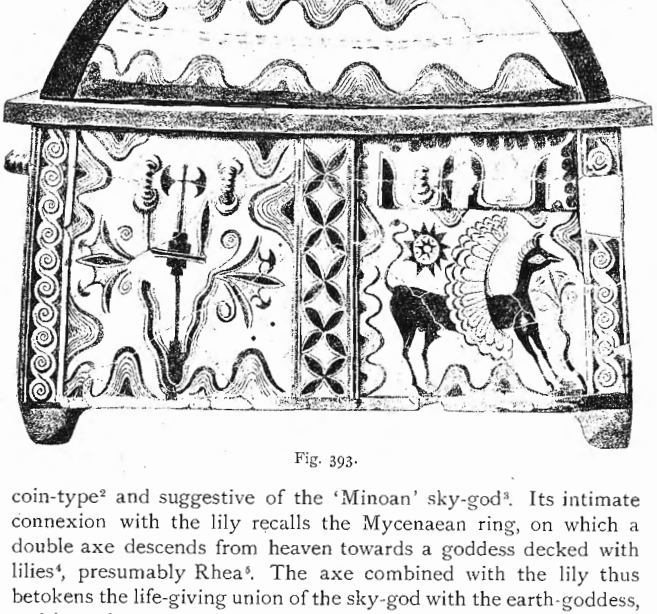

Fig. 393.

coin-type[2] and suggestive of the 'Minoan' sky-god[3]. Its intimate connexion with the lily recalls the Mycenaean ring, on which a double axe descends from heaven towards a goddess decked with lilies[4], presumably Rhea[5]. The axe combined with the lily thus betokens the life-giving union of the sky-god with the earth-goddess, and is analogous to the scene of the leafy axes on the *sarcophagus* from *Hagia Triada*. Whether the griffin can be regarded as an allusion to the griffin-drawn goddess is more doubtful.

A superb jar, found by R. B. Seager on the island of Pseira in

Fig. 394.

north-eastern Crete (fig. 394)[1], dates from the last stage of the period

[1] R. B. Seager *Excavations on the island of Pseira, Crete* (*University of Pennsylvania:*

known as 'Late Minoan i' (*c.* 1500 B.C.) and again illustrates the combination of double axe and lily. Round its rim is a series of axes with knobbed tops; round its base, a simplified axe-pattern; beneath its handles, other axe-forms. The main frieze, on its shoulder, has double axes of the knobbed variety alternating with bulls' heads. Each axe is erect on a square base. Each bull's head between its horns bears another double axe, the stem of which is shaped like an open lily. And the space between axes and bulls' heads is filled by olive-sprays. A second large jar of the 'Late

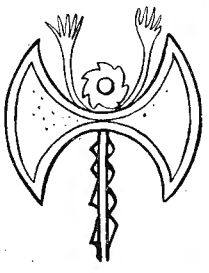

Fig. 395.

Fig. 396.

Fig. 397.

Minoan I' age, obtained by Seager on the neighbouring island of Mochlos[1], treats the floral stem of the axe in a freakish human fashion (fig. 395)[2] that brings to mind the quaintest flower-fays of Mr Arthur Rackham.

Vase-fragments of late 'Minoan' style, found by Sir Arthur Evans in a superficial layer of deposit covering the north-west building at Knossos, show the double axe rising from a leafy shaft between the sacred horns[3]. On the example here reproduced (fig. 396) this design fills two compartments, the other two being occupied by

a fish and a scroll derived from three Triton-shells treated as tentacles of an argonaut. Again, a hieroglyphic sign, found by the same explorer on a clay sealing from the Cnossian palace, represents a tree—apparently a cypress—serving as the handle of a double axe (fig. 397)[1].

A certain analogy with the foregoing examples of 'Minoan' religious art is afforded by an amulet, which forms the central pendant of an Etruscan gold necklace (fig. 398)[2]. It consists of a neolithic arrow-head of flint imbedded in the stem of a golden lily[3], on which rests a disk enclosing a decorative double axe (?). Since flint arrow-heads, no less than flint axes, were held to be thunderbolts[4], it is likely enough that this amulet[5] too was believed to combine the virtues of the sky-god and the earth-goddess.

Fig. 398.

(γ) The double axe in relation to columns or pillars.

Thirdly, the double axe had a religious significance for the 'Minoan' age, when it was stuck into the columns of a sacred building or cave. Fragments of painted plaster from the palace at Knossos[6] show portions of a sanctuary with a row of columns, which, from their shape and colour, are obviously meant to represent the wooden supports usual in the architecture of the period. Between each pair of columns and also along the top of their entablature are set large ritual horns. Into the upper part of the shaft, and into the upper part of the *echinus*, of every column is driven from opposite sides a couple of double axes, which, like the horns, are painted white. Finally,

[2] É. Cartailhac *La France préhistorique* Paris 1889 p. 6 fig. 3 (=my fig. 398). This appears to be the pendant, in the Campana collection, very inadequately described and figured by E. Braun in the *Mon. Ann. e Bull. d. Inst.* p. 54 pl. 10.

[3] The arrow-head itself is lily-shaped, the tang forming the central spike of an inverted flower.

[4] See *e.g.* Sir J. Evans *The Ancient Stone Implements of Great Britain*[2] London 1897 p. 362 ff.

[5] Other examples of flint arrow-heads set in gold, silver, or bronze and worn as amulets by the ancient Etruscans etc. are given in C. Blinkenberg *The Thunderweapon in Religion and Folklore* Cambridge 1911 p. 28 f. fig. 14 f., p. 109.

[6] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1903—1904 x. 40 ff., fig. 14, pl. 2 (=my fig. 399).

below the sacred edifice is a decorative band of rosettes—a motive, be it remembered, readily derivable from the Egyptian lotus[1]. The stamens of these rosettes, shaped like double axes, recall the axe-

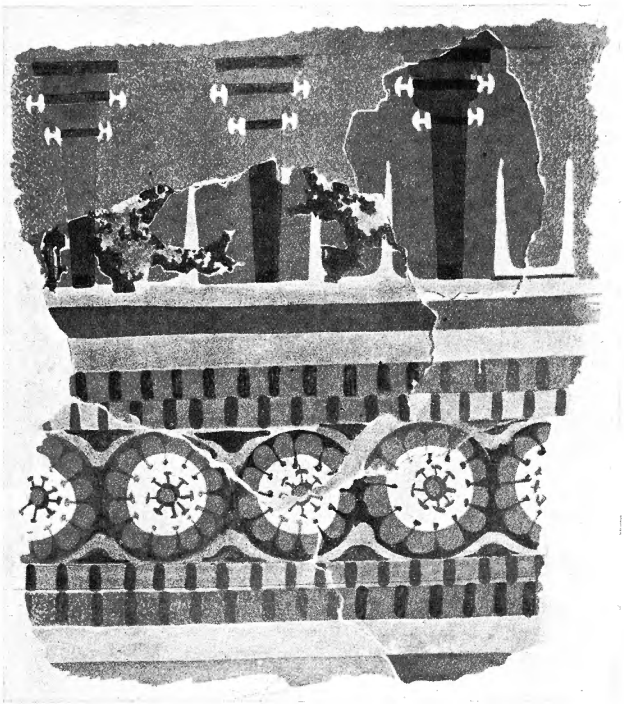

Fig. 399.

stamens of the lily-plant on the *sarcophagus* from *Palaikastro*[2]. The whole design (fig. 399) makes it clear that double axes of metal were imbedded in the wooden columns of 'Minoan' shrines[3].

[1] A. Riegl *Stilfragen* Berlin 1893 p. 52 ff., O. Montelius *Die älteren Kulturperioden im Orient und in Europa* Stockholm 1903 i. 78 f. fig. 303, cp. W. H. Goodyear *The Grammar of the Lotus* London 1891 p. 103.

[2] *Supra* p. 524.

[3] M. Meurer 'Form und Herkunft der mykenischen Säule' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1914 xxix. 14 ff. fig. 6 f. thinks that the white objects affixed to the columns are not axes at all, but knobs for hangings, and compares the white-glazed and

Similarly small double axes of bronze (fig. 400)[1] were found inserted in the stalactite pillars of the famous cave in Mount Dikte (fig. 401)[2]. D. G. Hogarth gives a graphic description of their discovery:

'By June 11th,' he says[3], 'we had exhausted the Upper Grot and the Terrace, and seemed to be at the end of discoveries. I had always intended, however, to have the *talus* in the Lower Grot searched before leaving the place, and on the 12th put the men and women, now reduced to thirty in all, with petroleum candles on to the steep slope below the precipice. Various bronze objects were quickly brought to light, and some bits of gold appeared in the sieves. Meanwhile a few

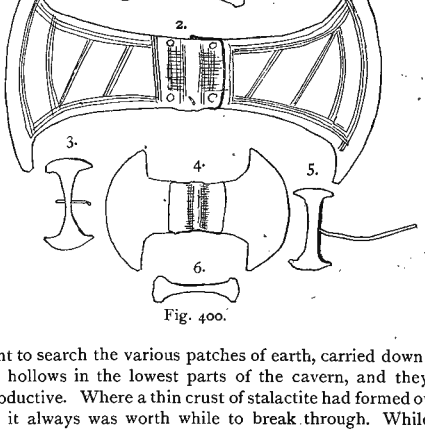

Fig. 400.

men were sent to search the various patches of earth, carried down by water and deposited in hollows in the lowest parts of the cavern, and they found these singularly productive. Where a thin crust of stalactite had formed over the mould and pebbles, it always was worth while to break through. While engaged on this work one of the men observed a bronze knife blade in a vertical slit of a stalactite pillar beside him, and, searching, soon found more blades and pins.

painted plates of terra cotta found at Ashur in the palace of Ashur-naṣir-pal iii (884—860 B.C.). He justly dismisses the notion that they are 'Phallusformen' (!), but does not even mention the highly probable view of their discoverer, that they are double axes.

[1] From the *Ann. Brit. Sch. Ath.* 1899—1900 vi. 109 fig. 40 (size *circa* 1 : 4). D. G. Hogarth *ib.* p. 108 f. says: 'Remains of 18 undoubted double axes were recovered, all found in the Lower Grot, and in almost every case *in situ* in the stalactite niches. Two retained their shafts, and many bronze pins, found in the same region, had doubtless been attached to other axes. Two specimens are of almost pure copper (Nos. 3, 5). The largest of all the axe heads, a perfect example 280 millimetres long (No. 2), found in a niche of a small lateral hall near the head of the subterranean pool, shows lines, drawn with a fine tool, crossing the blades obliquely.' Etc.

[2] *Infra* Append. B Crete. Fig. 401 is reduced from D. G. Hogarth's plan in the *Ann. Brit. Sch. Ath.* 1899—1900 vi pl. 8.

[3] *Ann. Brit. Sch. Ath.* 1899—1900 vi. 100 f.

I immediately set others, especially women and boys, to examine the pillars systematically, and found the vertical crevices so productive that, leaving only a small gang to finish the upper earth, I concentrated all hands in the lowest depths. Some of the chinks contained as many as ten bronze objects apiece—blades, fibulae and an occasional votive double axe. These stood up edgeways in the slits and in many cases could not be extracted without smashing the stalactite, which had almost closed over them. How many more there may not be completely hidden in the pillars I cannot say, but I do not think we left an accessible

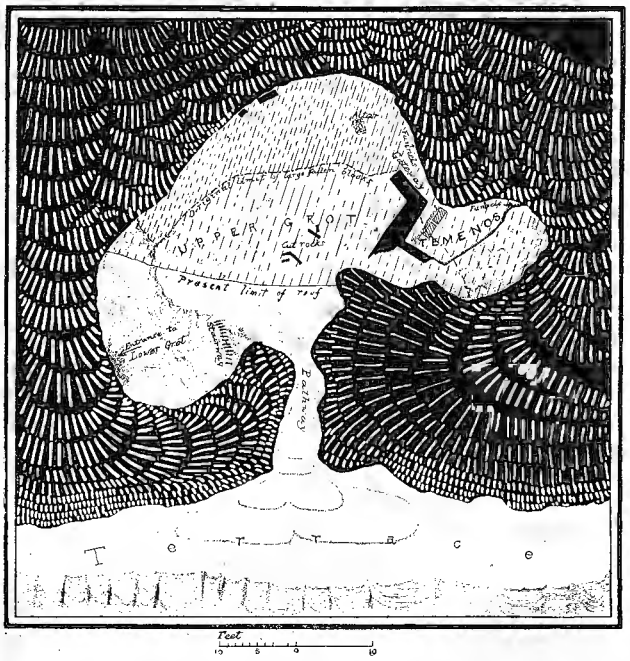

Fig. 401.

niche unexamined. Nor did we leave any part of the pebbly mud at the water's edge unwashed. Thence we obtained over a dozen bronze statuettes, and half a dozen engraved gems, beside handfuls of common rings, pins, and blades, perhaps sucked by floods out of the stalactite niches. In hope of the reward, which I gave for the better objects, and in the excitement of so curious a search, which, in their earlier illicit digging, it had not occurred to them to attempt, the villagers, both men and women, worked with frantic energy, clinging singly to the pillars high above the subterranean lake, or grouping half a dozen flaring lights over a productive patch of mud at the water's edge. It was a grotesque sight, without

precedent in an archaeologist's experience. But beyond a certain point the niches proved empty, and the icy water too deep to be dredged, and by the evening of the 14th there was no more to be done.'

The existence of wooden and stalactite columns into which axes were, so to speak, hafted throws light on another group of 'Minoan' monuments. Already in 1900 Sir A. J. Evans had drawn attention to two small chambers in the palace at Knossos, each of which contains a central pillar formed of four square gypsum blocks and

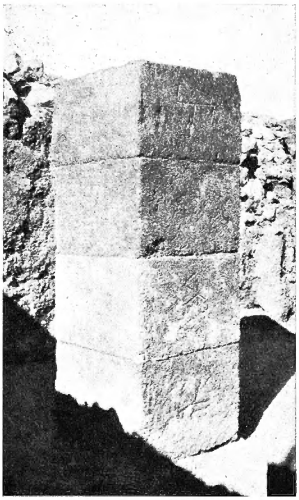

Fig. 402.

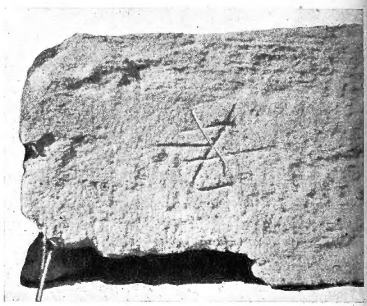

Fig. 403.

repeatedly engraved with the sign of the double axe (fig. 402)[1]. Commenting with great acumen on that signature he had said:

'There can, I venture to think, be little doubt that these chambers are shrines, probably belonging to the oldest part of the building, and the pillars thus marked with the sign of the God are in fact his aniconic images... It will be shown from a variety of evidence that the most typical form of the Mycenaean sacred pillar is represented as actually performing a structural function, and is in fact a "Pillar of the House[2]."'

[1] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1899—1900 vi. 32—34 fig. 6. Figs. 402 and 403 are from photographs taken by me in 1901. The latter shows an interesting block, in the palace wall, with a trident incised on the top of a double axe ('Middle Minoan iii': Sir A. J. Evans *ib.* 1903—1904 x. 28).

[2] Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 111 fig. 5.

Subsequent discoveries strengthened this conjecture. In 1914 Sir Arthur was able to write:

'An interesting parallel, highly illuminating as to the cult connected with these pillars, was supplied by a small house dating from the last Middle Minoan Period excavated on the south-east borders of the Palace. Here in a small chamber of fine ashlar masonry..., was a central pillar, the upper block of which was exceptionally marked with the double-axe sign. At the foot of the pillar on the north side, moreover, was a small limestone base of stepped pyramidal form, with a socket above, corresponding with the stands of the sacred Double Axes as seen on the Hagia Triada sarcophagus... The pillar cult is here clearly brought into connexion with the divinity of the Double Axes—the great Minoan Goddess... In the case of many of the smaller pillar-rooms with a single pillar—such as those of the South-East House and Royal Villa at Knossos, that of the house on the hill of Gypsades, and those in the two small rooms at Phylakopi—there is no obvious structural reason for such a central support. Yet it is probable that in all cases these stone pillars served a constructive purpose, and their presence, even in small chambers easily spanned by beams, is accounted for in the most natural manner by the assumption that they acted as supports of the wooden columns of a chamber above, as seems to have been certainly the case with pillars of the sanctuary quarter in the Knossian Palace... Of the sanctity of such wooden columns as "Pillars of the House" there is abundant evidence among the representations on Minoan and Mycenaean works of art[1].'

It will be observed that, where Sir Arthur spoke formerly of a 'God,' he speaks now of a 'Goddess.' In my own opinion the double axe belongs primarily to the sky-god, secondarily to the earth-goddess associated with him, while the tree, or column, or pillar, belongs primarily to the earth-goddess, secondarily to the sky-god associated with her. The combination of axe and tree, axe and column, axe and pillar, implies the union of both[2]. I take it, then, that the double axe hafted into a tree, or affixed to a wooden column, or incised on a stone pillar, is sign and symbol of the god, whereas

[1] Sir A. J. Evans in *Archaeologia* 1914 lxv. 68 f.

[2] We should perhaps compare the tall beam pierced by an iron nail and erected in honour of Thor (?) by the Lapps of Finmark (*supra* p. 423 n. 3), and also the high-seat pillars of the old Norsemen with their sacred nails (*supra* p. 57 n. 1). With regard to the latter Miss N. Kershaw has kindly sent me (Nov. 9, 1920) the following references: *Eyrbyggia Saga* 4 'Thorolfr Mostrarskegg...sailed along the south coast [of Iceland] westward past Reykjanes... Thorolfr threw overboard his high-seat pillars, which had been standing in the temple. The image of Thor was carved on one of them. He declared his intention of making his home in Iceland at the spot where Thor brought them ashore. There he had a temple erected. It was a big building. There was a door in the side-wall near one end. Inside stood the high-seat pillars, and there were pegs in them which were called *regin-naglar** ' [**naglar*, 'pegs.' The exact meaning of *regin* is uncertain. The word is used of the gods in the *Edda* poems.], *Landnamabok* 1. 6, 1. 7 f., 4. 5, *Vatnsdæla Saga* 15. See further G. Vigfusson—F. York Powell *Corpus Poeticum Boreale* Oxford 1883 i. 403, 406, ii. 686, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 364, *id.* in Hoops *Reallex.* ii. 313, H. Falk *ib.* ii. 538 f.

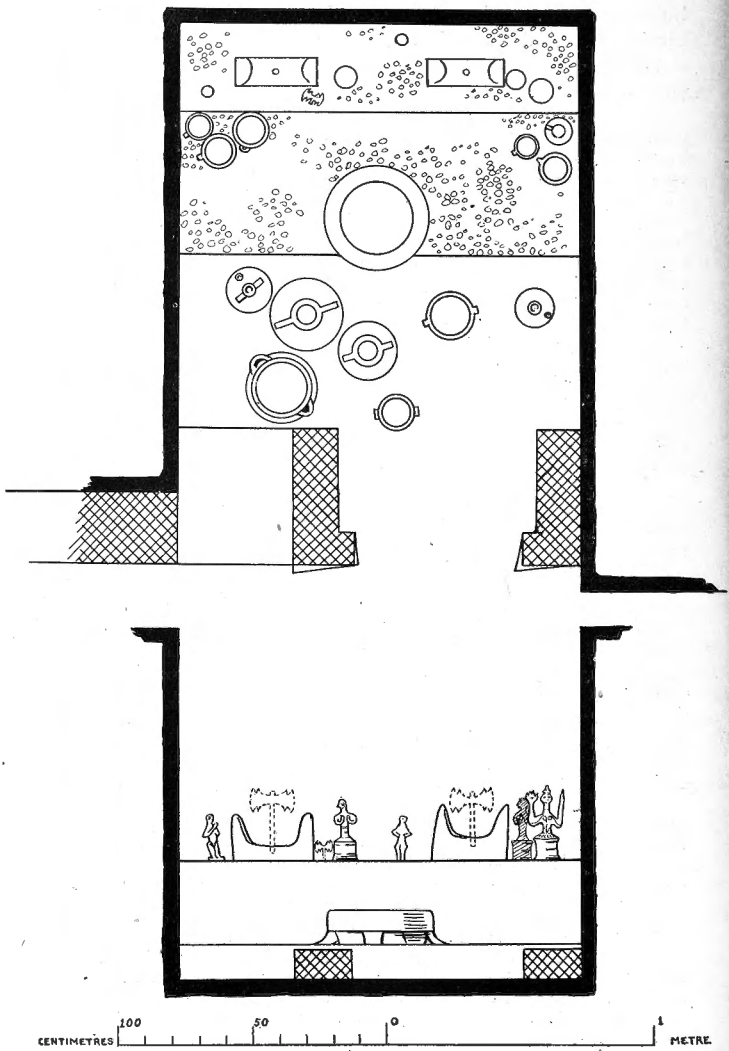

Fig. 404.

the tree, or column, or pillar, betokens the presence of the goddess—a view supported by the later emergence of the axe-bearing god[1] on the one hand and the pillar-shaped goddess or 'Caryatid[2]' on the other.

(δ) The double axe in relation to horns.

Fourthly, 'Minoan' religion brought the double axe into connexion with sacred horns. Of this we have already seen some examples[3]; and many more might be cited.

Fragments of pottery from Knossos show the double axe, in one case set between horns, in a second placed before a shrine[4]. An actual shrine of small size (only 1½ m. square) was found by Sir A. J. Evans in the Cnossian palace[5]. It was referable to the period of partial re-occupation ('Late Minoan iii'), and it was arranged as follows (fig. 404)[6]. On the floor of stamped clay were bowls and vases. A raised daïs or step had a plaster tripod fixed into its pebbly surface, on which stood also some cups and small jugs. A higher step with a pebbled floor and a plastered front had attached to it two pairs of horns made of white-coloured stucco with a clay core. Leaning against one of them was a miniature double axe of steatite with duplicated blades (fig. 405)[7]. And each pair of horns had a central socket, which in all probability was meant to receive the shaft of a double axe. On either side of these horned sockets stood painted terra-cotta figures of votaries and deities. To the left of the left-hand pair of horns was a male votary on a small flat base: he was wearing a loin-cloth and some sort of tunic laced behind, while he held out a dove as an oblation (fig. 406 *a*)[8]. To the right of the same horns was a goddess on a high cylindrical base: she had long hair falling down her back and over her shoulders; her head was turned towards the horns, and her hands were curved up over her breasts

Fig. 405.

[6] *Id. ib.* p. 97 fig. 55 (redrawn in my fig. 404).

[7] *Id. ib.* p. 101 fig. 57 ('slightly enlarged') = my fig. 405.

[8] G. Maraghiannis *Antiquités Crétoises* Troisième Série Candie s.a. pl. 50 (part of which = my fig. 406).

(fig. 406 *b*)[1]. To the left of the right-hand pair of horns was a female votary, whose type (a half-sitting posture) and technique (punctures and incisions with white gypsum filling) were alike primitive. To the right of these horns were two goddesses. One of them, except for the fact that she had a plant design painted on her back, closely resembled the goddess already described. The other rose from a higher cylindrical base. She wore necklaces, armlets, and signets on her

a *c* *b*

Fig. 406.

wrists. She raised both hands, one palm outwards, the other in profile, and each with a dark band drawn across it. Her breast was painted with a pair of wings[2]; and her body ended in a pattern perhaps meant to recall the spread tail of a bird. On her head rested a dove (fig. 406 *c*)[3]. It is clear that the little sanctuary thus furnished

[1] *Id. ib.*

[2] So at least I have ventured to suggest (J. E. Harrison in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 156 n. 1).

[3] G. Maraghiannis *loc. cit.*

was *c.* 1400—*c.* 1200 B.C. used for oblations to two double axes, beside each of which was placed a goddess, or a pair of goddesses, and a

single devotee. The duplication of the double axe, as in the cases of *Hagia Triada*[1] and Tenedos[2], suggests the joint cult of a god and a goddess.

[1] *Supra* p. 521.

[2] *Supra* p. 522, *infra* § 3 (c) i (ξ) and (ο).

An earlier[1] shrine of somewhat similar character was discovered by Miss H. A. Boyd, now Mrs Boyd-Hawes, at *Gournià* in eastern Crete[2]. Here too was a low earthen tripod thinly coated with plaster, 'four cultus vases bearing symbols of Minoan worship, the disk, consecrated horns and serpent, a terra-cotta female idol entwined with a snake, two heads of the same type as the idol, several small clay doves and serpents' heads, all of coarse terra cotta, and a fragment of a pithos, on which a double-ax and disk are modeled in relief[3].'

The horns that appear so frequently in connexion with the double axe are in all probability bovine. An agate intaglio from Knossos, belonging to the 'Late Minoan' period, shows a double axe rising between the curved horns of a bull's head (fig. 407)[4]. A lentoid sardonyx from the Argive Heraion, now in the Schliemann collection at Berlin, is engraved with a similar design (fig. 408)[5]. In the fourth shaft-grave at Mykenai were found about fifty-six specimens of bull's head-and-axe cut out of gold plate; some of these had a double axe of normal shape (fig. 409 *a*, *b*)[6]; others had its blades duplicated (fig. 409 *c*, *d*)[7]. Finally, a Mycenaean *kratér* from Salamis in Kypros (*Enkomi*), preserved in the British Museum[8], is decorated

[1] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 105 says 'of still later date,' but *ib.* 1902—1903 ix. 84 n. 1 'perhaps contemporary (as most of the remains at Gournia) with the First Period of the Later Palace at Knossos.' See also R. M. Dawkins *ib.* 1903—1904 x. 195.

with *bucrania* and ritual horns: both alike have a double axe set upon them (fig. 410)[1], and are plainly felt to be alternatives of like significance.

But what exactly did they signify? The old notion[2] that a single *bucranium*-and-axe denoted the sacrifice of an ox, and that a multiplicity of such symbols commemorated a hecatomb, will not do. The prominent position accorded to the axe, the duplication of its blades, the careful propping of its haft, imply that this was no commonplace tool, but a divine weapon. Are we then to conclude that the axe stands for the sky-god, and the ox-head for the sacrifice offered to him? The explanation is still inadequate; for why should an ox in particular be sacrificed to an axe or an axe-bearing god? and why

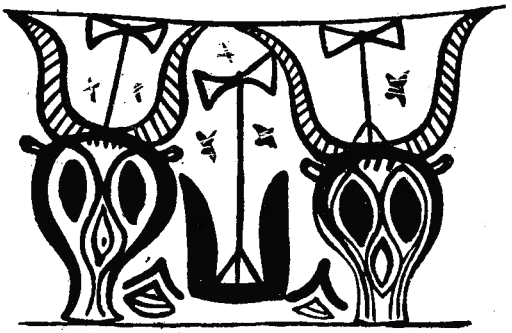

Fig. 410.

should the axe be set up between the ox-horns? To grasp the real meaning of this combination we must bear in mind (*a*) that the bull was the theanthropic animal of the Cretan Zeus, torn asunder in his service[3] and buried in his name[4]; (*b*) that ritual horns appear to have originated in the shrine of a buried bull, regarded as a centre or

[1] The design is completed by Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 107 fig. 3 (=my fig. 410), S. Reinach in *L'Anthropologie* 1902 xiii. 25 fig. 19, J. Déchelette *Manuel d'archéologie préhistorique* Paris 1910 ii. 1. 480 fig. 204, 3.

('vielleicht lediglich mit Beziehung auf die Opferhandlung'), Ohnefalsch-Richter *Kypros* pp. 238 ('a symbol of sacrifice'), 240, Ch. Tsountas—J. I. Manatt. *The Mycenaean Age* London 1897 p. 103 ('they are symbols of sacrifice offered to the dead, in conformity with the well-known ancient custom of offering to gods and heroes metal or terra-cotta simulacra of real victims'), W. H. D. Rouse *Greek Votive Offerings* Cambridge 1902 p. 301 ('perhaps representing sacrifice to the dead').

[3] *Supra* i. 660 ff.

Supra p. 345.

focus of life[1]; and (*c*) that the vital force of the divine beast was gathered into its horns[2], so that any object placed between them would be quickened to the uttermost. Was not this the right position for that dread weapon, which constituted the might of the Almighty?

Bucranium and double axe were for centuries associated in the popular mind. And the peculiar 'Minoan' combination of the two has left traces of itself over a wide area. L. Stephani published a pair of double axes (fig. 411) and eight *bucrania* (fig. 412) found in 1873 on the site of Olbia in Sarmatia[3]. They are flat lead castings with unworked back, and were presumably affixed to some smooth surface, perhaps that of a wooden coffin[4]. The *bucrania* are adorned with fillets and grape-bunches, occasionally also with ivy-leaves.

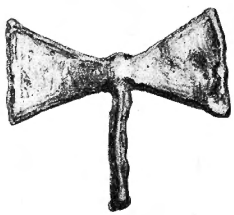

Fig. 411.

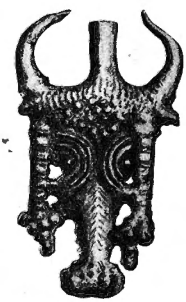

Fig. 412.

Between the horns in every case rises a vertical stem, which is hardly to be explained as a mere tag due to the casting, but more probably should be regarded as a vestige of the double axe once installed in that position of importance. R. Wünsch[5] has recently noticed that the Museum at Stettin possesses a large number of leaden *bucrania* from Pantikapaion (*Kerch*): most of them have an oblong handle between the horns, which he would complete by means of sundry loose heads of double axes found with the *bucrania* in question. Wünsch conjectures that these were amulets derived from the double axe of the ancient Cretan religion. Again, Count Albert de La

[5] R. Wünsch in the *Archiv f. Rel.* 1913 xvi. 632 f., *Am. Journ. Arch.* 1914 xviii. 227.

Marmora[1] in 1840 described and figured a thin *plaque* of lead in the Capuchin Museum at Palma, said to have come from the *talayot* of Son-Texeguet near Lluc-Major in Minorca (fig. 413). He supposed that it was of Phoenician or Carthaginian origin, and suggested, shrewdly enough, that it looked rather like the skin of an ox-head. The horns have degenerated into concentric circles like the eyes. And four small holes show that it was suspended as an amulet. A close parallel to it was published in 1892 by É. Cartailhac[2] from the

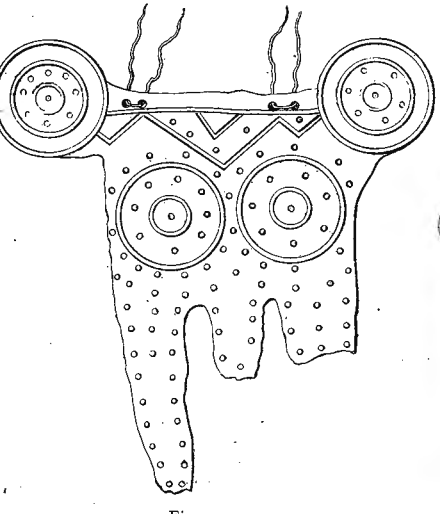

Fig. 413.

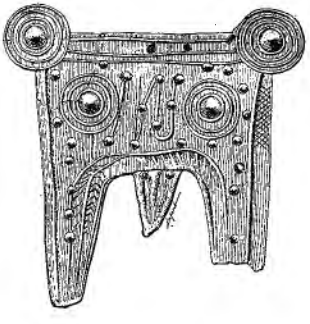

Fig. 414.

collection of M. Moragues (fig. 414)—another thin leaden *plaque* apparently representing a conventionalised *bucranium* with a similar treatment of the horns and eyes.

The decadence of the 'Minoan' type can, however, be best seen in the old indigenous pottery of Apulia. In 1908[3] I drew attention

[1] Le C^te^ A. de La Marmora *Voyage en Sardaigne* Paris 1840 ii. 533 Atlas pl. 39, 4 (=my fig. 413).

to certain specimens of this ware[1] now in the British Museum[2]. They are flat bowls with a high handle shaped like a pair of bovine horns. It differs from the ordinary *ansa lunata* or *Mondhenkel* of North Italy and Central Europe, because it represents the forehead and eyes of the beast as well as the horns. It has also an additional

Fig. 415.

Fig. 416.

Fig. 417.

Fig. 418.

feature of interest. Between the horns rises what I took to be a stylised form of the double axe (fig. 415). This double axe, if such

[1] See the elaborate articles of M. Mayer 'Ceramica dell' Apulia preellenica i. La Messapia' in the *Röm. Mitth.* 1897 xii. 201—252 figs. 1—22 pl. 10, 'ii. La Peucezia' *ib.* 1899 xiv. 13—80 figs. 1—20 pls. 2—5, 'Die Keramik des vorgriechischen Apuliens iii. [2] *Brit. Mus. Cat. Vases* i. 2. 266 f. nos. H 253 pl. 27, H 254 pl. 27, H 252 pl. 27. My figs. 415—418 are from photographs by the Museum photographer. H. B. Walters in the *Brit. Mus. Cat. Vases* i. 2. 264 assigns the ware to the period *c.* 700—500 B.C.

it be[1], tends to become vestigial (fig. 416), and sometimes disappears altogether (fig. 417). That we are on the right track in explaining these handles by a reference to 'Minoan' cult appears further from sundry vessels of similar fabric but different shape (fig. 418)[2]. Here we have a handle adorned with three cones grouped together in a manner suggestive of a lotus-bud. Before them stands a priestess with ear-rings, necklace, etc., who seems to be presenting the contents of this remarkable vase. Its body is painted with decorative bands, including a frieze of birds and a row of ritual horns quite in 'Minoan' style. Further, the 'hour-glass' ornament, so characteristic of these local Apulian vases[3], may well be viewed as a simple derivative of the double axe. It will be remembered that we have already come across literary evidence also of a 'Minoan' cult persisting into Hellenic times at Tarentum[4].

(ε) The deity of the double axe.

Thus far we have seen that the double axe, whether hanging in mid air or hafted into a tree or affixed to a pillar or set up between horns, is at least intelligible if viewed as the sky-god's weapon.

That this sky-god was conceived in human form is not only *a priori* probable, but *a posteriori* certain. We have observed him as an armed deity descending from above on the gold signets of Mykenai (fig. 18)[5] and Knossos (fig. 19)[6] and on the painted *lárnax* of Miletos (fig. 20)[7]. It is true, he was not actually holding his two-bladed weapon. But Sir A. J. Evans, *à propos* of the double axe on the Mycenaean ring, very justly remarked: 'It stands in a natural relation to the small figure of the warrior God to the left, and probably represents one of the cult forms under which he was worshipped[8].' Moreover, thanks to the kindness of a friend, I am

[1] M. Mayer in the *Röm. Mitth.* 1908 xxiii. 217: 'Zwecklos wäre es auch, an gewisse kretische Symbole, das Hörnerpaar mit der Doppelaxt, hier erinnern zu wollen.' Masner *Samml. ant. Vasen u. Terracotten Wien* p. 4 no. 38 pl. 1 mistook the whole arrangement for an idol with raised arms (!), and H. B. Walters *loc. cit.* p. 267 speaks of 'a vertical projection ending in two discs, perhaps intended for a rude human head.' It is, of course, quite conceivable that the double axe had become degraded (or exalted) into human features.

[2] *Brit. Mus. Cat. Vases* i. 2. 271 no. H 263 pl. 28, *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 189 fig. 9. Cp. M. Mayer in the *Röm. [8] Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 108.

enabled here to publish (fig. 419)[1] a lenticular gem of onyx-marble, probably from Melos, now in his possession. It shows a bearded god with wings on his shoulders[2] and winglets on his heels, who is

a

Fig. 419.

rushing through the air with a double axe in his hand. We can hardly be wrong in identifying him as the 'Minoan' sky-god in his stormy aspect.

It would seem, then, that, just as various nations of antiquity worshipped axe[3] or spear[4] or sword[5] meaning thereby to extol the

[1] Fig. 419 is drawn from an impression, to the scale of $\frac{3}{4}$. Fig. 419 *a* is a sketch of the gem itself.

[2] In accordance with a well-known convention of archaic art (*e.g.* Furtwängler *Vasensamml. Berlin* i. 38 no. 301, E. Gerhard in *Arch. Zeit.* 1854 xii. 180 ff. pl. 61 = Reinach *Rép. Vases* i. 380, 4, F. Studniczka in Roscher *Lex. Myth.* ii. 1751 f. fig. 7), which aptly illustrates E. Loewy's law of memory-pictures, the wings, seen in their greatest extension, are simply superposed on the figure without organic connexion.

[3] The Egyptian term for 'god,' 'spirit,' 'supernatural power' is *neter*—a word of very uncertain origin. The hieroglyph that is used both as the determinative of this word and also as an ideograph is . Thus or denotes 'god,' and or or or 'gods.' Birch, Brugsch, Budge and other competent Egyptologists hold that represents an axe-head let into and fastened in a long wooden handle (E. A. Wallis Budge *The Gods of the Egyptians* London 1904 i. 63 ff. and A. Wiedemann in J. Hastings *Encyclopædia of Religion and Ethics* Edinburgh 1913 vi. 275. See also F. Legge in the *Proceedings of the Society of Biblical Archæology* 1899 xxi. 310 f., A. Mosso *The Dawn of Mediterranean Civilisation* London 1910 p. 145 fig. 83). A dissentient is F. Ll. Griffith *A Collection of Hieroglyphs* London 1898 p. 46 col. pls. 3, 26 (=my fig. 421), 8, 114 (=my fig. 420), who says: 'A roll of yellow cloth (for bandaging?), the lower part bound or laced over, the upper end appearing as a flap at the top, probably for unwinding... In N. K. hatchets were made which in outline resemble this figure, perhaps intentionally. It is possible, indeed, that the present object represents a fetish, e.g. a bone carefully wound round with cloth, and not the cloth alone; but this idea is not as yet supported by any ascertained facts.' The green colouring of the handle in the two figures here given suggests that the haft of the sacred axe was conceived as a living vegetable stem, cp. the *sarcophagus* of *Hagia Triada* (*supra* p. 520 f.). Griffith *op. cit.* p. 63 f. col. pl. 5, 60 (=my fig. 422) is a graphic compound consisting of an open stand or funnel (?), an axe,

and a desert slope, together forming the word-sign for ḥr·t ntr (kher·t nether), 'that which belongs to a god,' *i.e.* the necropolis or place of the dead.

P. E. Newberry likewise demurs to the view that the *neter*-sign is an axe. In a letter to me, dated Oct. 3, 1908, he says: 'In outline it certainly looks as though it was so, but whenever the sign is coloured the coloured detail shows that it must have been a post (?) wrapped with a band of linen the end of which formed a kind of flag.' But, if this able scholar denies us the single axe, he grants us the double axe; *vide* his important paper 'Two Cults of the Old Kingdom' in the *Ann. Arch. Anthr.* 1908 i. 27: 'In the Fifth Dynasty there twice occurs†† [†† Mar. *Mast.*, D. 38, now in the National Museum at Copenhagen, No. 5129; Borchardt's, *Abusir*, p. 120; M. A. Murray, *Index*, pl. XXXIV.] a title ... *khet* '*khet*-priest of the Double Axe'‡‡ [‡‡ The Double Axe as a symbol is found as early as the First Dynasty in Egypt (Petrie *R.T.I.*, VII, 12, and Quibell, *Hierakonpolis* II, LXVIII).], which it is possible may be connected with HA, for in the Twenty-sixth Dynasty is recorded an Amasis who was 'Priest of HA of the Double Axe?'§§ [§§ *A.Z.*, XXXVIII, 116.] The context shows that HA is the name of a cult-object or divinity representing a mountain with two or more crests. And Newberry compares the Double Axe of 'Minoan' Crete with its 'Horns of Consecration.'

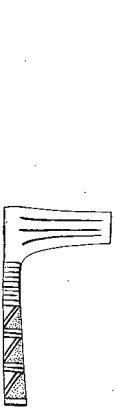

Fig. 420.

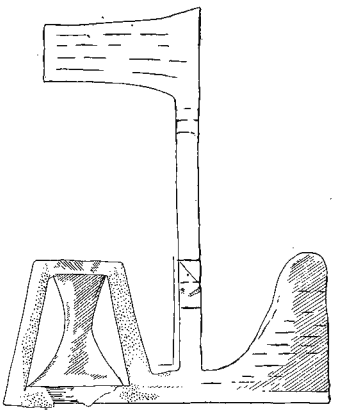

Fig. 422.

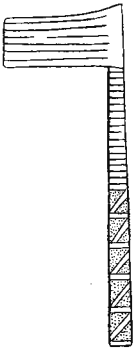

Fig. 421.

Sir W. M. Flinders Petrie *Tools and Weapons* London 1917 pp. 5—18 pls. 1—18 deals with the various forms of axe and adze found in Egypt and elsewhere, but does not include any detailed discussion of their religious significance.

A cylinder of grey chalcedony, now in the British Museum (no. 89470, as Dr R. Eisler kindly informs me), shows an Assyrian priest presenting a sacrifice to a deity, who is symbolised by a knobbed sceptre and an axe set upright on a high-backed throne. Behind the throne crouches an *ibex* or *oryx*, above which are the emblems of Ištar, Sin, and Sibitti (A. de Longpérier in the *Bulletin archéologique de l'Athenæum français* 1855 i. 101 f. = G. Schlumberger *Œuvres de A. de Longpérier* Paris 1883 i. 170 with fig. (= my fig. 423), *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 184 f. fig. 2, W. H. Ward in M. Jastrow *Bildermappe zur Religion Babyloniens und Assyriens* Giessen 1912 p. 110 pl. 56, no. 226). The deity thus repre-

sented by axe and sceptre is perhaps Adad, who on a cylinder of rock-crystal in the Museum at Florence (J. Ménant *Les pierres gravées de la Haute-Asie* Paris 1883—1886 ii. 60 fig. 52 (=my fig. 424), *Transactions of the Third International Congress for the*

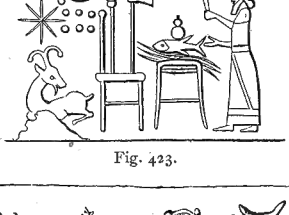

Fig. 423.

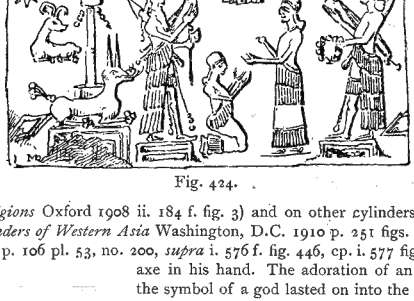

Fig. 424.

History of Religions Oxford 1908 ii. 184 f. fig. 3) and on other cylinders (W. H. Ward *The Seal Cylinders of Western Asia* Washington, D.C. 1910 p. 251 figs. 764, 766, *id.* in Jastrow *op. cit.* p. 106 pl. 53, no. 200, *supra* i. 576 f. fig. 446, cp. i. 577 fig. 447) bears an axe in his hand. The adoration of an axe erected as the symbol of a god lasted on into the Persian period, to judge from a seal-stone published by J. Ménant *op. cit.* ii pl. 9, 7 (=my fig. 425), *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 185 fig. 4, which possibly illustrates the *axinomantia* of the Magi (*infra* § 3 (c) i (ψ)).

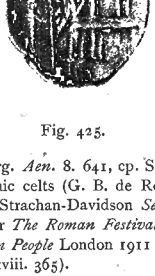

Fig. 425.

The flint held in the hands of those that swore the ancient oath by Iupiter *Lapis* (Polyb. 3. 25. 6 ff. Διὰ Λίθον, Cic. *epist. ad fam.* 7. 12. 2, Paul. ex Fest. p. 115, 4 ff. Müller, p. 102, 11 ff. Lindsay, Plout. *v. Sull.* 10, Apul. *de deo Socr.* p. 132 Oudendorp, Gell. 1. 21. 4), and the flint or flints taken by the Fetiales from the temple of Iupiter *Feretrius* for the purpose of striking a treaty (Liv. 1. 24, 9. 5, 30. 43, Paul. ex Fest. p. 92, 1 f. Müller, p. 81, 16 ff. Lindsay) and deemed equivalent to the effigy of Iupiter himself (interp. Serv. *in* Verg. *Aen.* 8. 641, cp. Serv. *in* Verg. *Aen.* 12. 206), are best explained as unhafted néolithic celts (G. B. de Rossi in the *Ann. d. Inst.* 1867 xxxix. 24 f., E. B. Tylor in J. L. Strachan-Davidson *Selections from Polybius* Oxford 1888 p. 77 n. 1, W. Warde Fowler *The Roman Festivals* London 1899 p. 231, *id. The Religious Experience of the Roman People* London 1911 p. 130. I have said my say on the subject in the *Class. Rev.* 1904 xviii. 365).

Barbarised copies of the *drachmé* of Rhode (*Rosas*) in Spain (shortly before *c.* 250 B.C.), struck in silver by the Volcae Tectosages of Gallia Narbonensis and the Sotiates of Aquitania, often exhibit an axe, the type of which is referable usually to the La Tène period, but sometimes to the Hallstatt period, and even to the Bronze Age (R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 p. 47 f. figs. 90—92, p. 67 fig. 118, p. 69 f. figs. 126 f., 129—134, pl. 5, 118, 129—134, pl. 22, 127, *id. Reallex.* p. 73 pl. 23, 11—20). It is at least possible that these axes are symbols of an axe-bearing god like Esus (Lucan. 1. 444 ff. with schol. *ad loc.*, Lact. *div. inst.* 1. 21), who in Gallia Lugudunensis was associated with Iovis and Volcanus, and in Gallia Belgica with Mercurius and Rosmerta (?) (*supra* i. 481 n. 9: see further S. Reinach 'Teutatès, Esus, Taranis' in the *Revue celtique* 1897 pp. 137—149=*id. Cultes, mythes et religions* Paris 1905 i. 204—216, M. Ihm in Pauly—Wissowa *Real-Enc.* vi. 694 ff.).

Latin tomb-inscriptions from Gallia Lugudunensis are very frequently marked with the sign of an adze, either incised or carved in relief, and end with the *formula*: 'So-and-so dedicated this monument under the adze.' The phrase *sub ascia dedicare* has for the last two centuries provoked the curiosity of the learned. Monographs have been devoted to it, and the literature is already large (a helpful summary in Sir J. E. Sandys *Latin Epigraphy* Cambridge 1919 pp. 78—82). Most scholars, including A. Mau in Pauly—Wissowa *Real-Enc.* ii. 1522 f., take it to mean that the monument was dedicated before it was finished, being still, so to say, 'under the adze' of the stone-mason. But O. Hirschfeld, who has edited these inscriptions for the Berlin *Corpus*, records his emphatic opinion that the tombs in question were under the protection of some Gallic divinity symbolised by a sacred adze (*Corp. inscr. Lat.* xiii p. 256). And É. Guimet *L'Ascia des Égyptiens* Lyon 1872 has adduced certain facts which point clearly in the same direction. For example, at Avignon ten sepulchral urns of stone were found arranged in a circle with a bronze axe in the middle of them (*id. op. cit.* p. 1), while in some Italian *columbaria* the urns are covered with a tile of marble or terra cotta on which is the representation of an adze—they are literally *sub ascia* (*id. ib.* p. 2 pl. 1, 10).

A parallel to these Gallic tombstones 'dedicated under the adze' may be found in certain runic tombstones dedicated under, or at any rate marked with, the hammer of Thor. Two good examples from Hanning and Læborg in Denmark were published by H. Petersen *Ueber den Gottesdienst und den Götterglauben des Nordens während der Heidenzeit* trans. M. Riess Gardelegen 1882 pp. 39—41 fig. 1 f., cp. P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 239. The parallel suggests that the adze on the Gallic tombs was, like Thor's hammer, the tool of a thunder-god.

R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 765, after Küentzle in Roscher *Lex. Myth.* iii. 1018, explains *et. Gud.* p. 581, 1 f. καὶ ἄτρον (*leg.* ἄστρον) οὕτω (*leg.* οὕτω) καλούμενον (*sc.* Ὡρίωνα), ἡ λεγομένη Σκεπαρνέα as an allusion to the shape of the constellation ('das Orionsternbild wegen seiner Form ·:· als σκέπαρνον="Doppelaxt" aufgefasst wurde').

[2] Kaineus once planted a javelin in the midst of the market-place and bade men count it as a god (schol. *Il.* 1. 264, Eustath. *in Il.* p. 101, 14 f.): the proverb τὸ Καινέως δόρυ arose from the fact that he forced passers by to swear by his spear (schol. Ap. Rhod. 1. 57). Parthenopaios the Arcadian used to swear by his spear and reverence it more than a god (Aisch. *s. c. Th.* 529 f.). The god whom the Chaeroneans honoured most was the sceptre that Hephaistos had made for Zeus. It had subsequently belonged to Hermes, Pelops, Atreus, Thyestes, Agamemnon. The Chaeroneans worshipped it, calling it Spear (Δόρυ). It had no temple; but the man who acted as priest kept it in his house for a year. Sacrifices were offered to it daily, and a table was set beside it covered with all sorts of flesh and cakes (Paus. 9. 40. 11 f.: *supra* i. 406. See further *Folk-Lore* 1904 xv. 371 f.).

The oldest image of Mars at Rome was a spear (δόρυ, *hasta*) kept in the *Regia* and apparently addressed as *Mars* (Varro *ap.* Clem. Al. *protr.* 4. 46. 4 p. 35, 23 f. Stählin and Arnob. *adv. nat.* 6. 11, Plout. *v. Rom.* 29, Serv. *in* Verg. *Aen.* 8. 3).

[3] The Scythian cult of Ares, according to Hdt. 4. 62, was as follows. Bundles of

power that wielded them[1], so the 'Minoans' paid divine honours to the double axe *qua* sign and symbol of an anthropomorphic sky-god.

But an important question remains to be answered. What was the name of this dread deity? He was, we have said, the consort of the great 'Minoan' earth-goddess, whom the Greeks continued to reverence at Knossos as Rhea[2]. Now in Greek myth the husband of Rhea is invariably called Kronos[3]. It follows that Kronos was the name by which the Greeks knew the axe-bearing sky-god of the 'Minoans.' Tradition declared that Kronos and Rhea had reigned together in Crete[4]. And some interesting details of the local cult are on record. Istros the historian, a learned follower of Kallimachos, in his *Collection of Cretan Sacrifices* noted that the Kouretes had in ancient times sacrificed children to Kronos[5]. Xenion

brushwood were heaped together till they formed a stack three stades long and wide. On this stack was constructed a level square. Three sides of it were sheer, the fourth sloping. Every year 150 carts brought brushwood to keep up the stack, which had a tendency to settle down in the winter. An ancient iron scimitar (ἀκινάκης) set on the stack was viewed as the image of Ares. To it was brought a yearly sacrifice of sheep and horses. Also one out of every hundred prisoners taken alive in war was sacrificed. The Scythians poured wine on the men's heads, slew them over a vessel, and drenched the scimitar with their blood. Others below cut off the right shoulders and arms of the victims, flung these into the air, and, leaving them to lie where they fell, offered the rest of their sacrifices and departed.

The Alani had no temple, but fixed a naked sword (*gladius*) in the ground with barbaric rites and worshipped it as Mars, the chief of the steppes through which they roamed (Amm. Marc. 31. 2. 23).

Attila, lord of the Hunni, was emboldened by the discovery of the sword (*gladius*) of Mars, which the kings of the Scythians always regarded as sacred. A herdsman noticed one of his heifers limping, followed the blood-drops, and found the sword, upon which the heifer while feeding had accidentally trodden. He dug up the sword and brought it to Attila, who thereupon deemed that he was ruler of the world and that the sword of Mars made him irresistible in war (Priscus Panites *frag.* 8. Bekker—Niebuhr (p. 224 ed. Bonn.) *ap.* Iordan. *de Getarum sive Gothorum origine et rebus gestis* 35. The original Greek account by Priscus (p. 201 ed. Bonn.) is somewhat less detailed). Cp. *infra* § 3 (c) i (*σ*).

Silver coins of the Bituriges, imitated from the gold *statér* of Philip ii (359—336 B.C.) of Makedonia, introduce a short sword of La Tène type over the horse on the reverse (R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 p. 47 fig. 89). This perhaps implies the cult of the sword (cp. A. de Longpérier in the *Bulletin archéologique de l'Athenæum français* 1855 i. 102 = G. Schlumberger *Œuvres de A. de Longpérier* Paris 1883 i. 171).

[1] See an eminently reasonable article on 'Weapon-worship' by A. Lang in the *Morning Post* for Oct. 14, 1910.

[2] *Supra* i. 649 n. 3.

[3] See *e.g.* A. Rapp in Roscher *Lex. Myth.* iv. 88 ff. (who, however, does not believe that Rhea was *ab origine* a Cretan goddess).

[4] Kedren. *hist. comp.* 29 B (i. 52 Bekker) κατὰ τούτους δὲ τοὺς χρόνους (*sc.* anno mundi 3413) ἐν οἷς Ἰσαὰκ ἐγεννήθη, ἐν Κρήτῃ ἄρξαι Κρόνον καὶ Ῥέαν Ἕλληνες ἱστοροῦσι.

[5] Istros *frag.* 47 (*Frag. hist. Gr.* i. 424 Müller) *ap.* Porph. *de abst.* 2. 56 Ἴστρος δὲ ἐν τῇ Συναγωγῇ τῶν Κρητικῶν θυσιῶν φησὶν τοὺς Κουρῆτας τὸ παλαιὸν τῷ Κρόνῳ θύειν παῖδας = Euseb. *praep. ev.* 4. 16. 7.

too in his work *On Crete* told how the cave on Mount Ide called *Arkésion* had come by its name. It had 'helped' (*arkésai*) the Kouretes, when they fled from Kronos and concealed themselves in its depths[1]. Since the Kouretes in the rites of Zeus *Idaîos* posed as Zagreus[2], the infant thunderer slain by the Titans[3], it is probable that originally one of the initiates was done to death and eaten by the rest as a re-birth of the 'Minoan' sky-god[4]. The grim legend of Kronos swallowing his own children finds at last an explanation[5].

And here it is permissible to conjecture that the word *Krónos*, whatever it meant to 'Minoan' ears, was understood by the Greeks as 'Chopper[6]'—a name appropriate, not only to the axe-bearer, but to the axe that he bore. The distinctive Homeric epithet of Kronos is *ankylométes*[7], which I would interpret as 'he of the crooked blade[8]'

[1] Xenion *frag.* 2 (*Frag. hist. Gr.* iv. 528 Müller) *ap. et. mag.* p. 144, 33 ff. 'Αρκέσιον· οὕτω καλούμενον ἄντρον τῆς Κρητικῆς Ἴδης· παρὰ τὸ ἀρκέσαι, τὸ βοηθῆσαι, φασὶν αὐτὸ ὑπὸ Κουρήτων ὀνομασθῆναι, ὅτι τὸν Κρόνον αὐτοῖς φεύγουσι, καὶ εἰς αὐτὸ καταδυεῖσι (F. Sylburg cj. καταδῦσι) καὶ κρυπτομένοις, ἐπήρκεσεν. οὕτω Ξενίων ἐν τοῖς περὶ Κρήτης.

[2] *Supra* i. 648 ff. [3] *Supra* i. 398 f., 647. [4] *Supra* i. 654 ff.

[5] For previous attempts to explain the myth see M. Mayer in Roscher *Lex. Myth.* ii. 1538 ff. Gruppe *Gr. Myth. Rel.* p. 425 speaks of it as 'den an ein Menschenopfer sich anlehnenden Mythos von der Verschlingung der eigenen Kinder.'

[6] As *θρόνος* is derived from the root *dher* (Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 187, Boisacq *Dict. étym. de la Langue Gr.* p. 349 f.), and *χρόνος* from the root *gher* or *ĝher* (Prellwitz *op. cit.* p. 515), so Κρόνος presupposes the *κερ* of *κείρω*, 'I cut.' My expert friend Dr P. Giles, whom I consulted on the matter, kindly sends me (Oct. 22, 1911) the following *responsum*: 'your derivation seems to be quite possible. The root would be in the weak grade *κρ-* and the suffix *-ονο-*' (see further Append. A.). The connexion of Κρόνος with *κείρω* had, in fact, long since been divined by that acute investigator H. D. Müller *Mythologie der griechischen Stämme* Göttingen 1861 ii. 137 f. ('Auch sein Name ist wohl der physischen Seite seines Wesens entlehnt. Derselbe, von *κείρω*,...ist = ὁ *κείρων*, was entweder...geradezu auf den Erndtegott sich beziehen lässt oder auf seine mythische That des Verzehrens, Verschlingens'), cp. *id.* in *Philologus* 1857 xii. 555 f. Support for it may be found in the words *κόρνος*, 'prick' (Hesych. *s.v. κόρνος· κέντρον. μυρσίνη* (M. Schmidt accepts Stephanus' cj. *κεντρομυρσίνη*, cp. Hesych. *s.v. σκόρνος*). Σικελοί), *κορνώπιδες*, 'pricking beasties' (Hesych. *s.v. κορνώπιδες· κώνωπες*, cp. Strab. 613 *Κορνοπίωνα* = Eustath. *in Il.* p. 34, 26). Other derivations of Κρόνος are listed by Gruppe *Gr. Myth. Rel.* p. 1104 n. 2. Add now A. Carnoy 'Le nom de Cronos' in *Le Musée Belge* 1920 xix—xxiv. 14—20 (cp. Celtic *Cera*, Italian *Cerus-Ceres*: the root is that of *creo, cresco*).

[7] H. Ebeling *Lexicon Homericum* Lipsiae 1885 i. 14 *s.v. ἀγκῦλο-μήτης*. The same word was used as an appellative of Zeus (Schöll—Studemund *anecd.* i. 264 no. 13 *ἀγκυλομήτεω* (*sc.* Διός), 266 no. 1 *ἀγκυλομήτεω* (*sc.* Διός), 274 *ἀγκυλομήτης* (*sc.* Ζεύς), 282 *ἀγκυλομήτης* (*sc.* Ζεύς)), and of Prometheus (Hes. *theog.* 546 Προμηθεὺς *ἀγκυλομήτης*, *o. d.* 48 Προμηθεὺς *ἀγκυλομήτης* with Proklos and Moschopoulos *ad loc.* In Orph. *h. Kron.* 13. 7 Kronos himself is addressed as Ῥέα πόσι, σεμνὲ Προμηθεῦ, on which see M. Mayer in Roscher *Lex. Myth.* ii. 1546).

[8] The analogy of *ἀγκυλότοξος* suggests that the epithet is objective, not subjective. For the second element in it see Walde *Lat. etym. Wörterb.*[2] p. 482 *s.v.* 'meto,' I mow: 'Idg. **met-* steht neben **mē-*...oder **amē-* in gr. *ἀμάω* "mähe, ernte," *ἀμάομαι* "sammle" ..., ahd. *māan*, ags. *māwan*, nhd. *mähen*, ahd. *mād* "Mahd," ags. *mæþ* "das Mähen, das gemähte Heu" = gr. *ἀμητός* "abgemähte Frucht, abgeerntetes Feld."'

This interpretation has been in part anticipated by E. Hoffmann *Mythen aus der*

in allusion to the god's *hárpe* or sickle-knife—a Thracian[1] weapon found also among many peoples of Asia Minor[2] (fig. 426)[3]. Saturn, as successor of Kronos, sometimes has a *hárpe* (fig. 427)[4] instead of his usual sickle or bill-hook.

An analogous figure, at once weapon-divinity and divine weapon, occurs among the Hittite rock-carvings of Boghaz-Keui. In the small gallery at Iasily Kaya may be seen a remarkable relief, some

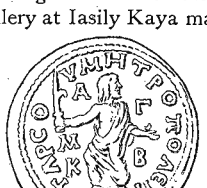

Fig. 426.

Fig. 427.

eleven feet high, which represents (fig. 428)[5] a vast dagger stuck vertically into the ground. Closer inspection shows that the handle is a human head wearing a conical cap with ribs and rings, and that below it, where we look for human shoulders and a human body, there is a curious combination of four lions, two with heads facing outwards, and two hung downwards each by a single hind-leg. Beneath the lions is the great tapering blade with its raised midrib. I would venture to regard this *Mischwesen* as no mere

Wanderzeit der graeko-italischen Stämme i *Kronos und Zeus* Leipzig 1876 pp. 63 f., 82, who supposes that Kronos, being armed with a sickle-shaped ἅρπη or ξάγκλη, was originally entitled 'Αγκυλο-μήδης, 'Sichel-Herrscher,'—a title later altered into the epithet ἀγκυλο-μήτης. Hoffmann, I conceive, was on the right track as regards the first half of the compound, but spoiled his explanation by an improbable, and indeed unnecessary, guess as to the second half.

This head appears on coins struck by the two *quaestores urbani*, who administered the *aerarium Saturni* (Babelon *op. cit.* i. pp. xl, xlix, ii. 657 Index).

[5] G. Perrot—E. Guillaume—J. Delbet *Exploration archéologique de la Galatie et de la Bithynie* etc. Paris 1872 i. 358 f., ii pls. 49 and 50, 3, Perrot—Chipiez *Hist. de l'Art* iv. 642 figs. 318 (face incorrectly turned to right) and 320, J. Garstang *The Land of the Hittites* London 1910 pp. 228, 239 ff., 360 pl. 70 (=my fig. 428), Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] i. 131, 139 f., E. Meyer *Reich und Kultur der Chetiter* Berlin 1914 p. 100 f. fig. 77.

'heraldic figure[1],' but as the youthful consort of the Hittite earth-

Fig. 428.

[1] J. Garstang *op. cit.* p. 228. Perrot—Chipiez *loc. cit.* say cautiously: 'un dieu.' J. Garstang *op. cit.* p. 239 f. would identify 'the dirk-deity'...' with the Sandon of Tarsus, Hercules son of Zeus,' pointing out that Hercules too wore a lion-skin. Frazer *op. cit.*[3] i. 139: 'their god was a lion, or rather a lion-man, a being in whom the bestial and human

mother. And that for two reasons. On the one hand, he is evidently a lion-god, and so a fit partner for a lion-goddess like Rhea[1]. On the other hand, he is a cutting blade, and so comparable with *Krónos*, the 'Chopper.' J. Garstang[2] and Sir J. G. Frazer[3] both agree that this dagger-god with his beardless head and leonine body must be identified with the youthful god standing on a lioness(?) in the large recess of the same rock-sanctuary[4]. And it will be remembered that the god in question carries a double axe as well as a short sword. But the double axe, as we have observed, was the weapon of the sky-god. It is, therefore, reasonable to surmise that the divine Dagger plunged into the ground, like the divine Axe hafted into a leafy stem, betokens the all-important union of Sky with Earth.

Returning to Kronos, we note that the 'Minoan' representation of him as posting through the sky with four wings[5] is not without Anatolian parallels. Silver coins of Mallos in Kilikia exhibit a four-winged and sometimes Janiform god hasting on his way with a disk in his hands; and we have already adopted the view that he is a solar Kronos[6]. Similarly bronze coins of Byblos in Phoinike, struck by the Syrian kings from Antiochos iv Epiphanes (175—164 B.C.) to Antiochos viii Grypos (125—96 B.C.)[7] or issued as autonomous and imperial pieces in the first century B.C., show Kronos, the founder of the city[8], as a nude deity equipped with three pairs of wings. He stands resting his right hand on a sceptre and wearing a head-dress of feathers (fig. 429)[9]. This representation of the god

natures mysteriously co-existed.' E. Meyer *op. cit.* p. 100: 'das Symbol eines mächtigen Gottes des Krieges und der Jagd' (cp. *ib.* p. 100 f. fig. 78 a relief from Sinjerli of a winged lion with a human head growing upright from his neck behind the ears).

[1] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1900—1901 vii. 28 ff. fig. 9 published a clay sealing from a recess off the central court of the palace at Knossos, which shows a warrior-goddess on a mountain-top flanked by two lions, with a male worshipper to the right and a sacred edifice to the left ('the prototype of the later Kybelê and Rhea'). *Id. ib.* 1902—1903 ix. 59 f. figs. 37 f. published two clay seal-impressions from the 'Temple Repositories' of the same palace. One represents a warrior-goddess accompanied by a lion; the other, a warrior-god accompanied by a lioness (?). *Id.* in the *Journ. Hell. Stud.* 1901 xxi. 163—168 figs. 43 and 44 f. further illustrates the 'Minoan' seal-types of a god or a goddess between two lions and concludes: 'The male divinity is not so much the consort as the son or youthful favourite. The relationship is rather that of Rhea than of Hera to Zeus, of Adonis rather than of Arês to Aphroditê.'

[7] Head *Hist. num.*[2] p. 791. G. F. Hill in the *Brit. Mus. Cat. Coins* Phoenicia p. lxii states: 'Byblus seems to have been a mint of the Seleucidae only from the time of Antiochus iv (175—164) to that of Antiochus vii (138—129).'

[8] Philon Bybl. *frag.* 2 (*Frag. hist. Gr.* iii. 568 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 19.

[9] E. Babelon *Les Rois de Syrie, d'Arménie et de Commagène* Paris 1890 p. 85 no. 671 pl. 14, 18, Imhoof-Blumer *Choix de monn. gr.*[1,2] pl. 7, 224 Antiochos iv (=my fig. 429),

agrees in the main with the description of him given by Sanchouniathon[1], whose words are thus rendered by Philon of Byblos[2]:

'Moreover, he (*sc.* the god Taautos, *i.e.* Thoth) devised a mark of royalty for Kronos, four eyes in front and behind, < two of them wide awake > and two quietly closing, and four wings on his shoulders, two of them as it were spread for flight, and two as it were drooped. This symbolised the fact that Kronos saw while he slept and slept while he waked; and likewise with his wings, that he flew while he rested and rested while he flew. To each of the other gods he assigned two wings upon the shoulders, on the ground that they shared in the flight of Kronos. Again, he gave Kronos two feathers on the head, one for the sovereignty of mind and one for sense-perception.'

The same four-winged deity appears in *quasi*-Assyrian garb as the central medallion of a silver-gilt bowl of *s.* vii(?) B.C., found by

cula or portable shrine with an Egyptian cornice: he holds a double axe in his right hand, a *hárpe* in his left, and is flanked by the fore-parts of two bulls.

When the Bronze Age passed into the Iron Age, the 'Minoan' Kronos was succeeded by the Hellenic Zeus—a succession facilitated by the similar character of the two gods. O. Gruppe[1] points out that Kronos, like Zeus, was worshipped on mountains, many heights in Greece[2], Libye, Italy, Sicily, and the west[3] being

Némethy *Euhemeri reliquiae* Budapestini 1889 *frag.* 10) ποικίλλ<εται, κ.τ.λ.>, Diod. 3. 61 δυναστεῦσαι δέ φασι τὸν Κρόνον κατὰ Σικελίαν καὶ Λιβύην, ἔτι δὲ τὴν Ἰταλίαν, καὶ τὸ σύνολον ἐν τοῖς πρὸς ἑσπέραν τόποις συστήσασθαι τὴν βασιλείαν· παρὰ πᾶσι δὲ φρουραῖς διακατέχειν τὰς ἀκροπόλεις καὶ τοὺς ὀχυροὺς τῶν τόπων [τούτων]· ἀφ' οὗ δὴ μέχρι τοῦ νῦν χρόνου κατά τε τὴν Σικελίαν καὶ τὰ πρὸς ἑσπέραν νεύοντα μέρη πολλοὺς τῶν ὑψηλῶν τόπων ἀπ' ἐκείνου Κρόνια προσαγορεύεσθαι, Cic. *de nat. deor.* 3. 44 de patre eorum Saturno id negari potest, quem vulgo maxime colunt ad occidentem?

Saturn was much in evidence throughout Roman Africa, where the Phoenician *Ba'al-hammân* (*supra* i. 353 f.) was Latinised as *Saturnus* and on occasion Grecised as *Krónos* (J. Toutain *De Saturni Dei in Africa Romana cultu* Lutetiæ Parisiorum 1894, *id. Les cités Romaines de la Tunisie* Paris 1896 pp. 213 ff., 222 f., *id. Les cultes païens dans l'empire romain* Paris 1907 i. 247 f., A. Schulten *Das römische Afrika* Leipzig 1899 p. 20 ff., G. Wissowa in Roscher *Lex. Myth.* iv. 441 ff., *id. Rel. Kult. Röm.*[2] p. 208). To give but a single example, Saturnus *Balcaranensis* (also *Balcaranesis*, *Balcharanensis*, *Balkharanensis*), that is *Ba'al Qarnaim*, 'Lord of the Two Horns,' was worshipped near Carthage on a two-peaked mountain, which still bears the name *Djebel Bou-Kournein*. Here on the highest summit the god had a *témenos* and an altar of masonry set against

the rock, but no temple. J. Toutain 'Le sanctuaire de Saturnus Balcaranensis' in the *Mélanges d'archéologie et d'histoire* 1892 xii. 1—124 figs. 1—3 pls. 1—4 (F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2822 f., M. Mayer in Roscher *Lex. Myth.* ii. 1500 f.) has published the finds made on this interesting site. They include some 60 terra-cotta lamps, a cylindrical jar containing bones of birds (probably doves), a few other vases, some small copper coins, and no less than 365 votive inscriptions (a selection in Dessau *Inscr. Lat. sel.* nos. 4444a—4445), many of them accompanied by reliefs (*e.g.* pl. 1, 2 = my fig. 433, pl. 1, 4 = my fig. 434, pl. 1, 6 = my fig. 435). The dedication takes various forms: *Saturno Augusto sacrum* or *Saturno Domino* or *Saturno Sancto*. And frequently the local epithet is added: *Saturno Augusto Balcaranensi*, *Saturno Balcaranensi Augusto*, *Saturno Domino Balcaranensi Augusto*; *sacerdos dei magni Balcaranensis*. M. Mayer *loc. cit.* observes that the god is always represented as a mere bust in a pediment, flanked by his bill-hook and *patera*, with Sol and Luna in the spandrels, and ingeniously suggests that he is an anthropomorphised *baitylos*. The 'Two Horns' recall the Egyptian hieroglyph of a desert

Fig. 433.

mountain (F. Ll. Griffith *A Collection of Hieroglyphs* London 1898 p. 31 col. pl. 3, 38), in which P. E. Newberry 'Two Cults of the Old Kingdom' in the *Ann. Arch. Anthr.* 1908 i. 24 ff. figs. 1—15 finds the prototype of the 'Minoan' ritual horns. He has argued his case well; but I adhere to my view that the 'Minoan' horns were originally bovine.

An island in the Ionian Gulf was known as Κρονία and gave its name to the Κρονία θάλασσα (Eustath. *in* Dionys. *per.* 32, cp. Ap. Rhod. 4. 327). Italy as a whole was sacred to Kronos—χῶροι δὲ πολλοὶ τοῦ δαίμονος ἐπώνυμοι, καὶ μάλιστα οἱ σκόπελοι καὶ τὰ μετέωρα (Dion. Hal. *ant. Rom.* 1. 34). For the identification of Kronos with Saturn and its results on Italian soil see G. Wissowa in Roscher *Lex. Myth.* iv. 432 ff.

Sicily too had its Κρόνιον (Diod. 15. 16, Polyain. 5. 10. 5). The most noteworthy link between this island and Kronos is, however, the tradition that, not merely the god's sickle (*supra* p. 448 n. o), but the god himself lay buried here (Philochoros *frag.* 184 (*Frag. hist. Gr.* i. 414 Müller) *ap.* Clem. Al. *protr.* 2. 30. 3 p. 22, 14 ff. Stählin Φιλόχορος δὲ ἐν Τήνῳ Ποσειδῶνά φησι τιμᾶσθαι ἰατρόν, Κρόνῳ δὲ ἐπικεῖσθαι Σικελίαν καὶ ἐνταῦθα αὐτὸν τεθάφθαι, Arnob. *adv. nat.* 4. 25 noster ille est auctor, qui Patrocles Thurius (*Frag. Gr.*

frag. p. 830 Nauck[2]) scriptorum in titulis indicatur, qui tumulos memorat reliquiasque Saturnias tellure in Sicula contineri? (Arnobius has apparently misread the context in

Fig. 434.

Clemens *loc. cit.*)). It is very possible that this belief in a Sicilian grave of Kronos, com parab e with the Cretan grave of Zeus, was a genuine heritage from 'Minoan' times.

named after him, and that the memory of him as a rain-god[1],

Fig. 435.

Finally, near Carthago Nova in Spain was yet another Hill of Kronos (Polyb. 10. 10. 11 *προσαγορεύεται Κρόνου*, Plin. *nat. hist.* 3. 19 a promunturio, quod Saturni vocatur).

[1] Allegorizing philosophers identified Kronos with dark air (anon. *ἀλληγορίαι ὀνομάτων θεῶν* in A. Westermann *Scriptores poeticae historiae Graeci* Brunsvigae 1843 p. 328, 11 f. *Ζεὺς ὁ καθαρὸς ἀὴρ καὶ τὸ ἄνω ἡμισφαίριον, Κρόνος ὁ ζοφώδης ἀὴρ καὶ τὸ κάτω ἡμισφαίριον*, cp. Tzetz. *Hom.* 289 *τοῦνεκα Νὺξ κατέβαινε ποτὶ Κρόνον ἠερόεντα*); Egyptians, with water (Sallustius *περὶ θεῶν καὶ κόσμου* 4 *οἱ Αἰγύπτιοι...αὐτὰ τὰ σώματα θεοὺς νομίσαντες καὶ καλέσαντες· καὶ Ἴσιν μὲν τὴν γῆν, Ὄσιριν δὲ τὸ ὑγρόν, Τυφῶνα δὲ τὴν θερμότητα, ἢ Κρόνον μὲν ὕδωρ, Ἄδωνιν δὲ καρπούς, Διόνυσον δὲ οἶνον* with J. Conrad Orelli *ad loc.* Cp. interp. Serv. *in* Verg. *georg.* 1. 12 quod Saturnus humoris totius et frigoris deus sit); 'dwellers in the west,' with winter (Theopompos *frag.* 293 (*Frag. hist. Gr.* i. 328 Müller) *ap.* Plout. *de Is. et Os.* 69 *τοὺς δὲ πρὸς ἑσπέραν οἰκοῦντας ἱστορεῖ Θεόπομπος ἡγεῖσθαι καὶ καλεῖν τὸν μὲν χειμῶνα Κρόνον, τὸ δὲ θέρος Ἀφροδίτην, τὸ δὲ ἔαρ Περσεφόνην· ἐκ δὲ Κρόνου καὶ Ἀφροδίτης γεννᾶσθαι πάντα*, cp. Prokl. *in* Plat. *remp.* ii. 61, 22 Kroll *διὸ καί φασι τῶν ὡρῶν τὴν μὲν χειμερινὴν εἶναι Κρονίαν, κ.τ.λ.*): neo-Platonists associated him with the pole (Prokl. *in* Plat. *remp.* ii. 213, 4 f. Kroll *τοῦ μὲν Κρόνου τὸν πόλον εἶναί φασι σύμβολον· κ.τ.λ.*, cp. Cougny *Anth. Pal. Append.* 6. 115. 5 an oracle *ap.* Porph. *περὶ τῆς ἐκ λογίων φιλοσοφίας ap.* Euseb. *praep. ev.* 6. 1. 4 *ὑψιπόλοιο Κρόνοιο*, Nonn. *Dion.* 41. 350 *ὑψιπόλοιο* (A. Ludwich cj. *ὑψιπόροιο*) *Κρόνου*). And nascent etymology connected his name with the words *ῥόος* or *κρουνός* (Plat. *Crat.* 402 B regards both *Ῥέα* and *Κρόνος* as *ῥευμάτων ὀνόματα*, Philodem. *περὶ εὐσεβείας* 12 = H. Diels *Doxographi Graeci* Berolini 1879 p. 546 b 21 ff. *καὶ Κρόνον [μὲν τὸ]ν τοῦ ῥεύ[μ]ατος ῥ[ὸο]ν, Ῥέαν δὲ τὴν γῆν, Δία δὲ τὸν αἰθέρα* (*supra* i. 29 n. 4), cp. *et. mag.* p. 540, 9 ff. *Χρύσιππος δέ φησιν ὅτι καθύγρων ὄντων τῶν ὅλων καὶ ὄμβρων καταφερομένων πολλῶν τὴν ἔκκρισιν τούτων Κρόνον ὠνομάσθαι*, Porphyrios in schol. B. D. *Il.* 15. 21 *καὶ Ἡσίοδος Οὐρανὸν μὲν λέγει τὴν ἐκπύρωσιν, Κρόνον δὲ τὸν ἄνωθεν κρουνηδὸν ἐπιφερόμενον ὄμβρον, Ῥέαν δὲ τὴν ἐπιρρεομένην ὕδασι γῆν, κ.τ.λ.*).

More weight attaches to the Pythagorean description of the sea as 'Kronos' tear' (Plout. *de Is. et Os.* 32 *τὸ ὑπὸ τῶν Πυθαγορικῶν λεγόμενον ὡς ἡ θάλαττα Κρόνου δάκρυόν ἐστιν*, Clem. Al. *strom.* 5. 8 p. 360, 20 f. Stählin *τοιαῦτα καὶ οἱ Πυθαγόρειοι ᾐνίσσοντο...*

if not also as a lightning-god (fig. 436)[1], lingered on into classical times.

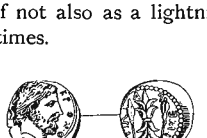

Fig. 436.

Κρόνου...δάκρυον τὴν θάλασσαν ἀλληγοροῦντες, Porph. *v. Pyth.* 41 ἔλεγε δέ τινα καὶ μυστικῷ τρόπῳ συμβολικῶς, ἃ δὴ ἐπιπλέον Ἀριστοτέλης (*frag.* 191 Rose) ἀνέγραψεν, οἷον ὅτι τὴν θάλατταν...ἐκάλει εἶναι (V. Rose cj. Κρόνου) δάκρυον. The Ophite sect of the Peratai in one of their sacred books described an androgynous primeval power, which ἐκλήθη Θάλασσα. ταύτην τὴν δύναμιν ἡ ἀγνωσία ἐκάλεσε Κρόνον, κ.τ.λ. (Hippol. *ref. haeres.* 5. 14 p. 184 Duncker—Schneidewin, where Gruppe *Cult. Myth. orient. Rel.* i. 515 f. would alter Θάλασσα into Θαλάτθ, from ילד 'to beget,' in view of Berosos *frag.* 1. 4 (*Frag. hist. Gr.* Müller ii. 497) *ap.* Alex. Polyhist. (*Frag. hist. Gr.* iii. 210 Müller) *ap.* Synkell. *chron.* 29 C (i. 52 Dindorf) ἄρχειν δὲ τούτων πάντων γυναῖκα ᾗ ὄνομα Ὁμόρωκα· εἶναι δὲ τοῦτο Χαλδαϊστὶ μὲν Θαλάτθ, Ἑλληνιστὶ δὲ μεθερμηνεύεσθαι θάλασσα, cp. Damask. *v. Isid.* 115 *ap.* Phot. *bibl.* p. 343 b 21 f. Bekker ὅτι Φοίνικες καὶ Σύροι τὸν Κρόνον Ἦλ καὶ Βὴλ καὶ Θολάθην (so H. A. Hamaker for βολάθην, βολαθὴν, βωλαθὴν codd.) ἑπονομάζουσιν. M. Mayer in Roscher *Lex. Myth.* ii. 1475 cites Stob. *ecl.* 1. 5. 14 p. 77, 16 Wachsmuth =Cougny *Anth. Pal. Append.* 3. 147. 10 (Theon Al. seu Hermes) δάκρυ μέν ἐστι Κρόνος, Ζεὺς δ' ἡ γένεσις, λόγος Ἑρμῆς | κ.τ.λ. from a poem on the seven planets).

Again, there seems to have been a popular belief that rain was the sweat of Kronos; for a charm preserved in a magical papyrus of *s.* iv A.D. makes the magician identify himself with Kronos (?): 'I am he whose sweat is rain falling upon the earth to impregnate it' (F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 64 ff. no. 46, 150 ff. ἐγώ εἰμι ὁ ἀστράπτων | καὶ βροντῶν· ἐγώ εἰμι, οὗ ἐστιν | ὁ ἱδρὼς ὄμβρος ἐπιπείπτων (*leg.* ἐπιπίπτων) ἐ|πὶ τὴν γῆν, ἵνα ὀχεύῃ· κ.τ.λ., A. Dieterich *Abraxas* Leipzig 1891 p. 25, M. Mayer in Roscher *Lex. Myth.* ii. 1474). Hence Nonnos speaks of 'Kronos dropping rain' (Nonn. *Dion.* 6. 178 ἅτε Κρόνος ὄμβρον ἰάλλων, *supra* i. 398).

The planet Kronos likewise brought rain, hail, wind, and thunderstorms (Epigenes of Byzantion *ap.* Sen. *nat. quaestt.* 7. 4. 2 huic videtur plurimum virium habere ad omnes sublimium motus stella Saturni: 'haec cum proxima signa Marti premit aut [in] lunae viciniam transit aut in solis incidit radios, natura ventosa et frigida contrahit pluribus locis aëra conglobatque. deinde si radios solis adsumpsit, tonat fulguratque: si Martem quoque consentientem habet, fulminat,' Serv. *in* Verg. *georg.* 1. 336 Saturnus deus pluviarum est...hic autem in Capricorno facit gravissimas pluvias, et praecipue in Italia...ut in Scorpio grandines: item in alio fulmina: in alio ventos = Myth. Vat. 3. 1. 3 stella Saturno deputata ortu suo tristitiam semper denuntiat. illa enim in Capricorno posita pluvias gravissimas, sed praecipue in Italia, commovet...in Scorpio vero grandines, item in alio signo fulmina, in alio ventos, in aliis alia nocua apportat).

[1] The Paris magical papyrus contains a *μαντεία Κρονική*, in which Kronos is invoked as a god of thunder and lightning (C. Wessely *Griechische Zauberpapyrus von Paris und London* Wien 1888 p. 98 pap. Par. 3102 *βροντοκεραυνοπάτωρ*, on which A. Dieterich *Abraxas* Leipzig 1891 p. 79 n. 9 remarks: 'Man beachte den Rest metrischer Form, die dieses Mühlenlied gewiss gehabt hat'). Cp. also a charm in the Anastasy papyrus (C. Wessely *op. cit.* p. 106 pap. Lond. 151, 155=F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 64 ff. no. 46, 150 f. ἐγώ εἰμι ὁ ἀστράπτων | καὶ βροντῶν, *supra* p. 558 n. 0). For the planet Kronos in relation to thunderstorms see the preceding n. *sub fin.*

A unique silver *litra* of Himera, struck *c.* 413—408 B.C., has for obverse type a bearded head of Kronos, bound with a fillet, and for reverse a thunderbolt between two corn-grains (Imhoof-Blumer *Monn. gr.* p. 21 pl. B, 4 (=my fig. 436), M. Mayer in Roscher *Lex. Myth.* ii. 1553 fig. 5, G. F. Hill *Coins of Ancient Sicily* Westminster 1903 p. 128, Head *Hist. num.*[2] p. 145). It is probable, though not quite certain, that we should connect the front of this coin with the back and recognise in the combined design a deity with his attributes.

(ζ) The double axe and Zeus *Kataibátes*.

We are, therefore, prepared to find that towns and districts formerly occupied by 'Minoans' might centuries later connect Zeus with the double axe that had belonged to his predecessor. This seems to have been the case, for example, in south Italy. Tradition derived the Iapyges from the Cretan followers of king Minos; and in Iapygia 'bolts from heaven forged of bronze were long to be seen.' The deity who hurled these bolts—'fire and bronze from the sky'—had a pillar-cult, and was called by the Tarentines Zeus *Kataibátes*[1]. A strong presumption is thus raised that the old 'Minoan' sky-god had here passed on the double axe of bronze to his Hellenic successor Zeus[2].

(η) The double axe and Zeus *Labráyndos*, etc.

The same thing happened repeatedly in Asia Minor. Evidence is forthcoming from Lydia, Karia, Kypros, and Kappadokia. Plutarch propounds, as one of his *Hellenic Questions*[3], the following problem: 'Why does the image of Zeus *Labradeús* in Karia bear an uplifted double axe, and not a sceptre or a thunderbolt?' His solution is this:

'Because Herakles slew Hippolyte, took her double axe along with the rest of her weapons, and gave it as a gift to Omphale. The kings, who, after Omphale, reigned over Lydia[4], used to carry it, receiving it in succession as a sacred heirloom, till Kandaules, disdaining to do so, gave it to one of his friends to carry[5]. But when Gyges revolted from him and made war against him, Arselis[6] came from Mylasa[7] with a force to help Gyges, and slew Kandaules and his friend. The double axe he took into Karia together with the rest of the spoils. He made

[1] *Supra* pp. 29–31.

[2] Not improbably bronze axes, regarded as thunderbolts (C. Blinkenberg *The Thunderweapon in Religion and Folklore* Cambridge 1911 p. 121), were from time to time dug up in the locality. *E.g.* T. E. Peet *The Stone and Bronze Ages in Italy and Sicily* Oxford 1909 p. 423 records the finding of a bronze winged axe in the *terramara* at Taranto.

[3] Plout. *quaestt. Gr.* 45 διὰ τί τοῦ Λαβραδέως Διὸς ἐν Καρίᾳ τὸ ἄγαλμα πέλεκυν ἠρμένον, οὐχὶ δὲ σκῆπτρον ἢ κεραυνόν, πεποίηται;

[4] See now Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] i. 182 ff. ('The Divinity of Lydian Kings').

[5] G. Radet *La Lydie et le monde grec au temps des Mermnades* (687—546) Paris 1893 pp. 88 f., 129 f.

[6] M. Duncker *Geschichte des Alterthums*[5] Leipzig 1878 i. 488 conjectured that Ἀρσηλις was not a historical personage, but the name or epithet of the Zeus of Mylasa—'eine Vermuthung, die dadurch Gewissheit wird, dass Chars-El in den semitischen Sprachen: Beil des El, Beil Gottes bedeutet[2] [[3]Lassen Z. D. M. G. 10, 381].' This ingenious explanation, first put forward by C. Lassen in the *Zeitschrift der Deutschen morgenländischen Gesellschaft* x. 381, is rightly rejected by R. Schubert *Geschichte der Könige von Lydien* Breslau 1884 p. 32 f. and G. Radet *op. cit.* p. 136 n. 2.

[7] A. Meineke corrects ἐκ Μυλέων codd. into ἐκ Μυλασέων.

an image of Zeus, put the double axe in his hand, and named the god *Labradeús* —for the Lydians call the double axe *lábrys*[1].'

Thus, according to Plutarch, the double axe belonged successively to the Amazons, the Lydians, and the Carians.

It is, in fact, constantly associated with the Amazons, and that in two forms—the double axe with a pair of blades (*lábrys*, *pélekys*, *amphipélekkon* (?)[2], *bipennis*) and the battle-axe with one broad blade and one pointed end (*ságaris*, *securis*). These types appear in art from the fifth century B.C. onwards, and thence make their way into literature as part of the regular Amazonian equipment[3]. Now the Amazons stand in intimate relation to the Hittites[4], and both types of axe occur on Hittite monuments[5]. The double axe in particular is borne by the youthful god who stands on a lioness (?) at Boghaz-Keui[6], and by his successor Herakles (Sandas) at Tarsos[7]. I should therefore infer from the story of Herakles taking the *lábrys* of Hippolyte to Lydia that the axe in question belonged to the younger Hittite god, who turns up in Lydia as Sandon Herakles[8].

[1] I. Thomopoulos Πελασγικά Athens 1912 p. 400 f. argues from the forms λαβρα-δεύς, λαβρα-νδεύς that the Carico-Lydian word for 'axe' or 'sword' was *λάβρα, not λάβρυς, and even suggests that the second element of the compound -δεύς is probably for Ζεύς (cp. Hesych. Δεύς· Ζεύς, etc.): ἐ"Οθεν λαβραδεὺς σημαίνει "τὸν λαβροφόρον Δία."' A highly precarious speculation.

[2] Hesych. ἀμφιπελέη (so Musurus with cod. G. Soping cj. ἀμφιπελέκη F. Guyet cj. ἀμφιπελέκκη H. Stephanus would read ἀμφιπελέκκη or ἀμφιπέλεκκον M. Schmidt, after L. C. Valckenaer, prints ἀμφιπελέκ.. (*Il.* 13. 612 ἀμφὶ πελέκκῳ))· πελέκιον δίστομον, Κυρηναῖοι. ὁ δὲ Ἀρίσταρχος τὸν τῆς ἀξίνης στελεὸν ἀπέδωκεν.

[3] Hippolyte, daughter of Ares (Schol. *Il.* 3. 189, Hyg. *fab.* 30), has a double axe on a copper of Perinthos struck by Elagabalos (F. Imhoof-Blumer in the *Num. Zeitschr.* 1884 xvi. 234 f. pl. 4, 4), a battle-axe on an Etruscan mirror (Gerhard *Etr. Spiegel* iv. 85 f. pl. 341, 2, A. Klügmann in Roscher *Lex. Myth.* i. 2680). See also Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 371 pl. 60, 19 a copper of Herakleia Pontike struck by Macrinus, *ib.* i. 377 pl. 61, 21 another copper of the same town struck by Gordianus iii Pius.

[4] So much, but no more, is clear from the facts cited by W. Leonhard *Hettiter und Amazonen* Leipzig—Berlin 1911 pp. 1—252. See *e.g.* J. Garstang *The Land of the Hittites* London 1910 pp. 213 n. 1, 357 n. 4, 372 n. 3, A. J. Reinach 'L'origine des Amazons' in the *Revue de l'histoire des religions* 1913 pp. 277—308, F. M. Bennett *Religious Cults associated with the Amazons* New York 1912 p. 73 f. n. 360, E. Meyer *Reich und Kultur der Chetiter* Berlin 1914 pp. 91, 159.

[8] Lyd. *de magistr.* 3. 64 p. 155, 18 ff. Wünsch (*à propos* of Lydian σάνδυκες) τοιούτῳ τὸν Ἡρακλέα χιτῶνι περιβαλοῦσα Ὀμφάλη ποτὲ αἰσχρῶς ἐρῶντα παρεθήλυνε. ταύτῃ καὶ Σανδὼν Ἡρακλῆς ἀνηνέχθη, ὡς Ἀπολλόδωρος ὁ Ῥωμαῖος φιλόσοφος ἐν τῷ ἐπιγραφομένῳ ἐρωτικῷ, καὶ Τράγκυλλος δὲ πρὸ αὐτοῦ ἐν τῷ περὶ ἐπισήμων ὀρνίθων ἀνενηνόχασιν. ἔνθεν οἶμαι σανδόνας ἔτι καὶ νῦν πρὸς διασυρμοῦ λέγεσθαι, κ.τ.λ. Hdt. 1. 71 mentions a prominent Lydian named Σάνδανις. See further O. Höfer in Roscher *Lex. Myth.* iv. 321, 326 f.

Plutarch's statement that this *lábrys* was a sacred heirloom of the Lydian kings, introduced into Karia in the time of Gyges (716—678 B.C.) and there placed in the hand of Zeus, is to some extent confirmed by the coin-types of Lydia and Karia. At Thyateira in Lydia the double axe appears by itself on bronze coins of Seleucid and imperial date (fig. 437)[1]. But on other bronze pieces of the same town, referred to the time of Trajan or Hadrian, it is shouldered by a young man on horseback inscribed *Týrimnos* (fig. 438)[2]. This youthful rider represents the Thyatirene hero[3], whose precinct[4] and temple[5] stood before the city[6]. He was

Fig. 437.

Fig. 438.

Fig. 439.

Fig. 440.

known as 'the forefather Tyrimnos[7]' or 'the forefather god Tyrimnos[8],' and gave his name to the local festival of the Tyrimneia[9]. As a youthful athletic god he was equated with Apollon under the

joint appellation 'Apollon *Týrimnos*[1],' and consequently also with Helios, his full title then being 'the forefather god Helios *Pýthios* Apollon *Tyrimnaîos*[2]' or 'the forefather god Helios *Pýthios Tyrimnaîos* Apollon[3].' Apollon *Týrimnos* is seen on bronze coins of Thyateira grasping the double axe. Sometimes he stands erect, a naked figure, long-haired and laureate, holding the axe in one hand and a bay-branch in the other (figs. 439, 440)[4]. Sometimes, wearing a *chlamýs*, he takes his stand with axe and branch in his temple

Fig. 441.

Fig. 442.

(fig. 441)[5], or with axe and agonistic urn as lord of the Pythian games (fig. 442)[6]. Occasionally, though not often before the third century A.D., he wears the radiate crown of Helios[7] and even appears in the solar chariot (fig. 443)[8]. It is clear, then, that at Thyateira the ancestral hero Tyrimnos, who bore the sacred axe of the youthful Hittite sky-god, came to be identified with Apollon and ultimately with Helios. And here we note that a heroic figure on horseback likewise bearing the *lábrys* occurs on the bronze

(fig. 447)[1]. Again, at Mostene[2] and at Tabala (fig. 448)[3], as at Thyateira[4], he wears a rayed crown. But he is never accompanied by a name, so that we cannot say whether he represents Tyrimnos or, as is more probable, the hero of the immediate neighbourhood. In any case he is a hero on his way to becoming a god. Indeed, he is apparently identified with Apollon at Hypaipa, where he adopts the guise of Apollon *Týrimnos* (fig. 449)[5]. We have, however, reason to think that the Lydians sometimes brought their *lábrys* into connexion with a goddess. At Mostene, where the hero

Fig. 449.

Fig. 450.

Fig. 451.

Fig. 452.

stood in some relation to a sacred cypress[6], imperial coppers show a goddess (Demeter?), with *kálathos* and long *chitón*, holding two corn-ears in her right hand and a double axe in her left (fig. 450)[7]; or else they show the axe alone between a bunch of grapes and two ears of corn (fig. 451)[8]. And at Nysa a copper of Maximinus represents a goddess (Kore?), with *chitón* and *himátion*, who has a snake (?) in her right hand and leans her left arm on a double axe (fig. 452)[9]. These types suggest that the Hittite god, who at Ivrîz

holds grape-bunches and corn-ears[1], had on Lydian soil come to be regarded as Dionysos[2] and had passed on his axe to Demeter and Kore.

What happened in Lydia, happened with some variation in Phrygia also. The *lábrys* alone occurs on coppers of Eriza[3] and Eumeneia[4]. On others of Abbaïtis it is surrounded by a bay-wreath

[2] A good collection of *data* for the worship of Dionysos in Lydia will be found in W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 pp. 175—188, 191 f. That the Lydian Dionysos had some Hittite(?) prototype may perhaps be inferred from Steph. Byz. *s.v.* Μάσταυρα· πόλις Λυδίας, ἀπὸ Μᾶς. Μᾶ δὲ τῇ Ῥέᾳ εἵπετο, ἡ παρέδωκε Ζεὺς Διόνυσον τρέφειν. καὶ ἡ Μᾶ παρὰ τῆς Ἥρας ἐρωτηθεῖσα, τίνος εἴη τὸ βρέφος, Ἄρεος, ἔφη. καὶ παρὰ Καρσὶν ὁ Διόνυσος Μάσαρις ἔνθεν ἐκλήθη. ἐκαλεῖτο δὲ καὶ ἡ Ῥέα Μᾶ καὶ ταῦρος αὐτῇ ἐθύετο παρὰ Λυδοῖς, ἀφ' ἧς ἡ πόλις (the etymologies of Μάσ-ταυρα and Μάσ-αρις are, of course, wholly unreliable).

Berlin* p. 252 no. 680 fig. (=my fig. 463). The inscription runs: Ἀντωνία Ἀντωνίου Ἀπόλ]λωνι θεῶ Βοζηνῶ διὰ τὸ ἀ]ναβεβη[κέ]νε με ἐπὶ τὸν χό]ρον (for τὸ χωρίον) ἐν

double axe in relief as the symbol of Apollon *Tarseús* (fig. 464)[1]. These two appellatives, both of the local order, deserve a moment's notice. *Bozenós* implies a place **Bozís* or **Bóza*. And Sir W. M. Ramsay[2] maintains that **Bozís* is the equivalent (with European vocalization) of *Bazis*[3], the name applied to the estate of Zeus *Asbamaîos* near Tyana in Kappadokia[4]. He further[5] contends that *Bazís* is for **Baghís*, to be connected, not only with Zend *bagha*, 'god,' Old Persian *baga*, 'god,' and Sanskrit *bhaga*, 'lord,' but also —as A. Fick declared[6]—with the Phrygian Zeus *Bagaîos*[7]. Thus

ῥιπαρῷ ἐπενδύτη, | κολασθῖσα δὲ ἐξωμολο|γησάμην κὲ ἀνέθηκα εὐλο|γίαν ὅτι ἐγενόμην ὁλό-[κλ]||ηρος.

[1] A. Conze in the *Arch. Zeit.* 1880 xxxviii. 38, Sir W. M. Ramsay in the *Journ. Hell. Stud.* 1889 x. 226 no. 19, *Ant. Skulpt. Berlin* p. 252 no. 681 fig. (=my fig. 464). Beneath the *lábrys* is inscribed : *ἀνθέστησαν οἱ Ἀρ|τέμωνος υἱοὶ τὸ | κατηαχθὲν* (for *κατεαχθέν*) *στηλ|λάριον ὑπὸ τοῦ βο|ὸς Ἀπόλλωνι Ταρσῖ.*

[2] Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* i. 153 : 'comparing Attalos—Ottalos, Atreus—Otreus, Tattes—Tottes, Anas—Onnes, Kadauas—Kadouas, Vavas—Vovas, Marsyas—Morsynos (p. 145) we find that Bozis is the exact equivalent to Bazis, the name of the god's estate at Tyana, used also as a personal name [Βάζεις or Βαζεὶς as a feminine personal name at Komana in Kappadokia (Sir W. M. Ramsay in the *Journal of Philology* 1882 xi. 148 no. 6, 1 f. *Ἀθηναῖς Σπίτου ἡ | καὶ Βάζεις*)].'

[3] Ptol. 5. 6. 17.

[4] Philostr. *v. Apoll.* 1. 6 p. 5 Kayser *ἔστι δέ τι περὶ Τύανα ὕδωρ Ὀρκίου Διός, ὥς φασι, καλοῦσι δὲ αὐτὸ Ἀσβαμαῖον, οὗ πηγὴ ἀναδίδοται ψυχρά, παφλάζει δέ, ὥσπερ ὁ θερμαινόμενος λέβης. τοῦτο εὐόρκοις μὲν ὕλεών τε καὶ ἡδὺ ὕδωρ, ἐπιόρκοις δὲ παρὰ πόδας ἡ δίκη· ἀποσκήπτει γὰρ καὶ ἐς ὀφθαλμοὺς καὶ ἐς χεῖρας καὶ ἐς πόδας, καὶ ὑδέροις ἁλίσκονται καὶ φθόαις, καὶ οὐδ' ἀπελθεῖν δυνατόν, ἀλλ' αὐτόθι ἔχονται καὶ ὁλοφύρονται πρὸς τῷ ὕδατι ὁμολογοῦντες ἃ ἐπιώρκησαν· οἱ μὲν δὴ ἐγχώριοί φασι παῖδα τοῦ Διὸς τὸν Ἀπολλώνιον γεγονέναι, ὁ δ' ἀνὴρ Ἀπολλωνίου ἑαυτὸν καλεῖ* = Aristot. *mir. ausc.* 152 and, much abbreviated, in Souid. *s.v.* *Ἀσβαμαῖον*, cp. Amm. Marc. 23. 6. 19 apud Asbamaei quoque Iovis templum in Cappadocia, ubi amplissimus ille philosophus Apolloniüs traditur natus prope oppidum Tyana, stagno effluens fons cernitur qui magnitudinè aquarum inflatus seseque resorbens numquam extra margines intumescit. D. G. Hogarth 'Modern and ancient roads in eastern Asia Minor' in the *Royal Geographical Society : Supplementary Papers* 1893 iii. 656 identifies this bubbling spring with 'the boiling pond near Ekuzli Hissar...still resorted to from far and wide by all afflicted with skin diseases.' Since the Iupiter *Asbamaeus* of Ammianus Marcellinus is the Zeus *Ὅρκιος* of Philostratos, S. Bochart *Phaleg*[3] Lugduni Batavorum—Trajecti ad Rhenum 1692 p. 535 proposed to derive *Ἀσβαμαῖος* from the Hebrew *seba*, 'oath' (*Me-seba* or *Me-hasseba*, 'aquae juramenti'). C. Lassen in the *Zeitschrift der Deutschen morgenländischen Gesellschaft* 1856 x. 377 attempted to connect it with the Zend and Old Persian *açman*, 'heaven,'—a view rightly rejected by P. Carolidis *Bemerkungen zu den alten kleinasiatischen Sprachen und Mythen* Strassburg 1913 p. 38 f. W. Robertson Smith *Lectures on the Religion of the Semites*[2] London 1907 p. 182, with much greater probability, took it to mean the 'seven waters,' in Syriac *shab'ā maya.*

Hogarth 'Prehellenic Monuments of Cappadocia' in the *Recueil de Travaux relatifs à la Philologie et à l'Archéologie Égyptiennes et Assyriennes* Paris 1893 xiv. 80.

[6] A. Fick *Die ehemalige Spracheinheit der Indogermanen Europas* Göttingen 1873 p. 412.

[7] Hesych. *Βαγαῖος·...ἢ Ζεὺς Φρύγιος. μέγας, πολύς, ταχύς* (the last three words are bracketed by M. Schmidt, but see *supra* p. 295 n. 2). H. L. Ahrens *De dialecto Dorica*

**Bozís* and *Bazís* would denote 'the estate of the god'; and with them might be ranked the Lydian *Bágis*, a town in the Katakekaumene[1]. Further, the epithet of Apollon *Bozenós* appears to be comparable with that of Zeus *Abozenós* in an inscription from Nakoleia[2], if not also with that of Zeus *Bozios* on copper coins of Hierapolis (fig. 465)[3]. If Apollon *Bozenós* possibly hails from Tyana, Apollon *Tarseús* certainly hails from Tarsos on the opposite side of Mount Tauros. Here the god is known to have had a sacred weapon of some sort. Dion Chrysostomos at the outset of his *First Tarsian Oration* mentions, among subjects likely to appeal to the patriotic pride of his audience, 'Apollon's trident[4].' But Plutarch, his contemporary, speaks of 'the sacred sword of Apollon at Tarsos,'

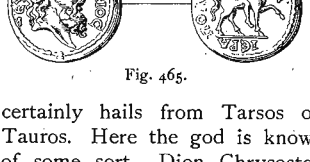

Fig. 465.

Gottingae 1843 p. 567 would restore ὦ Βαγαῖε Μαξεῦ or ὦ Βαγαῖε πᾶ Ζεῦ in Aisch. *suppl.* 892 Dindorf (*supra* p. 293 n. 4).

Fick's derivation of Βαγαῖος is supported by F. Solmsen in the *Zeitschrift für vergleichende Sprachforschung* 1895 xxxiv. 49 ('dass Βαγαῖος auf entlehnung aus dem apers. *baga* beruht'), O. Wiedemann in the *Beiträge zur kunde der indogermanischen sprachen* 1904 xxviii. 12 f., Walde *Lat. etym. Wörterb.*[2] p. 267 (who, however, abandons 'Die alte Verbindung mit *φαγεῖν*').

A. Torp 'Βαγαῖος' in the *Indogermanische Forschungen* 1895 v. 193 f., P. Kretschmer *Einleitung in die Geschichte der griechischen Sprache* Göttingen 1896 p. 81 (*supra* i. 400 n. 1), Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 486, K. Brugmann *Grundriss der vergleichenden Grammatik der indogermanischen Sprachen*[2] Strassburg 1897 i. 168 advocate the rival connexion of Βαγαῖος with *φηγός*, Doric *φαγός*, 'oak,' Latin *fagus*, Anglo-Saxon *boc*, 'beech,' etc. If so, cp. the Celtic divinities mentioned in inscriptions of the Allobroges: *Corp. inscr. Lat.* xii no. 2383 = Dessau *Inscr. Lat. sel.* no. 4620 (an altar found at Morestel) Iovi | Baginati | Corinthus | Nigidi | Aeliani | ex vot., Dessau *Inscr. Lat. sel.* no 4669 (found at Tarendel near Bellecombe) Felix Sme|ri f. Bagino | et Bagina|tiabus | [v.]s.l.m. That these too were oak-deities may be inferred from Max. Tyr. *diss.* 8. 8 Dübner Κελτοὶ σέβουσι μὲν Δία, ἄγαλμα δὲ Διὸς Κελτικὸν ὑψηλὴ δρῦς (see further *Class. Rev.* 1904 xviii. 79, *Folk-lore* 1904 xv. 296, and especially *ib.* 1906 xvii. 53).

[4] Dion Chrys. *or.* 33 p. 11 f. Reiske ἤ τινα ἔπαινον ὑπ' αὐτῶν (L. Dindorf has καθ' αὑτῶν) ἀκούσεσθαι οἰόμενοι καὶ δημόσιον ὕμνον τῆς πόλεως, περί τε Περσέως καὶ Ἡρακλέους καὶ τοῦ Ἀπόλλωνος τῆς τριαίνης καὶ περὶ χρησμῶν τῶν γενομένων, καὶ ὡς ἐστε Ἕλληνες καὶ Ἀργεῖοι καὶ ἔτι βελτίους, καὶ ἀρχηγοὺς ἔχετε ἥρωας καὶ ἡμιθέους, μᾶλλον δὲ Τιτᾶνας.

which had to be cleansed in water drawn from the river Kydnos[1]. Whether trident and sword were Hellenic substitutes for a Hittite double axe, we can hardly determine. On coins of Tarsos Sandas carries a double axe, a sword, and a bow-case into the bargain[2]. In Phrygia, however, it is clear that Apollon *Tarseús* had a double axe, and Phrygian coinage not infrequently arms Apollon with this primitive weapon. At Eumeneia he stands erect with a raven in his right hand and a double axe in his left (fig. 466)[3], while a very

Fig. 466.

Fig. 467.

Fig. 468.

Fig. 469.

similar type represents the local hero before a flaming altar with the double axe in his left hand and a *phiále* in his right (fig. 467)[4]. The latter design, *minus* the altar, occurs also at Hierapolis (fig. 468)[5]. In the course of the second and third centuries A.D. the emperor appears to have taken the place of this Apolline hero, as may be gathered from sundry Hierapolitan specimens, which show him standing with a branch (?) or corn-ears and poppy (?) in one hand, the double axe in the other (figs. 461, 469)[6]. Finally, at Laodikeia

[1] Plout. *de def. or.* 41 *περὶ δὲ τοῦ Κύδνου καὶ τῆς ἱερᾶς τοῦ Ἀπόλλωνος ἐν Ταρσῷ μαχαίρας, ὦ φίλε Δημήτριε, σοῦ λέγοντος ἠκούομεν, ὡς <οὔτε> ὁ Κύδνος ἄλλον ἐκκαθαίρει σίδηρον <ἢ> ἐκεῖνον οὔτε ὕδωρ ἄλλο τὴν μάχαιραν ἢ ἐκεῖνο.* I follow the text of W. R. Paton (Berolini 1893), who adopts the corrections of J. N. Madvig and A. Emperius for *ὡς ὁ κ. μᾶλλον ἐκκαθαίρει σίδηρον* (*τὸν σίδηρον* Ambr. Pal.) *ἐκεῖνον* codd.

[2] *Supra* i. 599 f. figs. 462—464. When St Paul, a citizen of Tarsos, bade his converts 'Put on the whole armour of God' (Eph. 6. 11, cp. 6. 13) and take 'the sword of the Spirit' (*ib.* 6. 17), was he thinking for a moment of the panoply worn by Sandas in his own native place?

Münzen* p. 211 f. no. 683 pl. 12, 21 Nero, *id. Kleinas. Münzen* i. 230 nos. 6 and 7 pl. 7, 23 Domitian, Head *Hist. num.*[2] p. 674. I figure a specimen, from my collection, struck by Nero: ΕΥΜΕΝΕΩΝ ΙΟΥΛΙΟΣ ΚΛ ΕΩΝ ΑΡΧΙΕΡΕΥΣΑΣΙΑΣ.

[4] Imhoof-Blumer *Kleinas. Münzen* i. 229 no. 4 pl. 7, 22 (=my fig. 467) time of Alexander Severus (?).

[5] *Brit. Mus. Cat. Coins* Phrygia p. 245 pl. 31, 6 (=my fig. 468), Imhoof-Blumer *Kleinas. Münzen* i. 239 no. 23.

[6] *Brit. Mus. Cat. Coins* Phrygia p. 231 no. 23 pl. 29, 8 (=my fig. 461), p. 235 no. 47 pl. 30, 4 (=my fig. 469), Imhoof-Blumer *Kleinas. Münzen* i. 237 no. 12.

The last two coins have as *obv.* type the head of Zeus Τρώιος, who appears—again with an Apolline *rev.*—on a coin of Hierapolis referred to the Hadrianic age (Imhoof-Blumer *Gr. Münzen* p. 214 f. no. 693 pl. 12, 22, cp. *Brit. Mus. Cat. Coins* Phrygia p. 233 pl. 30, 1).

on the Lykos *quasi*-autonomous coppers issued by Pythes in the time of Augustus exhibit a panther (?) shouldering a filleted double axe, the whole encircled by a bay-wreath (fig. 470)[1]. The device is Dionysiac rather than Apolline[2].

On the whole, I conclude that in Phrygia, as in Lydia, the ancestor or local hero inherited the double axe of the younger Hittite sky-god, and in Graeco-Roman times commonly acquired the traits of Apollon and Helios. The evidence from these adjacent countries prepares me, then, to accept as true Plutarch's assertion that a particular Amazonian (Hittite) axe was a sacred heirloom of the Lydian kings. Nothing more probable.

But what of his further statement that Arselis transferred the Lydian *lábrys* to the Carian Zeus *Labradeús*[3]? In Karia the simple *lábrys* occurs first on small gold pieces of the satrap Pixodaros (340—334 B.C.)[4], then as a symbol on bronze coins issued at Mylasa(?) by Eupolemos, the general of Kassándros, in 314—313 B.C.[5], and subsequently as an obverse or reverse type on coppers of Alinda[6], Euromos[7], Mylasa (fig. 471)[8], Orthosia[9], Plarasa and Aphrodisias[10], Sillyon (?)[11], as a symbol on coins of

[1] *Brit. Mus. Cat. Coins* Phrygia p. 287 f. pl. 34, 14, Imhoof-Blumer *Gr. Münzen* p. 218 nos. 712 pl. 12, 25 (=my fig. 470) and 712a.

[2] Imhoof-Blumer *loc. cit.* says 'Wolf oder Hund,' but thinks that the die-sinker was trying to represent a wolf as emblem of the river Lykos. Rasche *Lex. Num.* Suppl. i. 1379 f., after D. Sestini *Descriptio numorum veterum ex museis*...Lipsiae 1796 p. 467, had long since said 'lupus.' But B. V. Head in the *Brit. Mus. Cat. Coins* Phrygia p. 287 describes the creature as 'Lynx or Panther (?)' and in *Hist. num.*[2] p. 679 as 'Panther.' Cp. the pantheress with *thýrsos* on coins of Orthosia (*Brit. Mus. Cat. Coins* Caria, etc. p. 143 f. pl. 23, 5 f.).

[6] *Brit. Mus. Cat. Coins* Caria, etc. p. 78 pl. 12, 13 (=my fig. 483): 'an animal resembling a goat recumbent with fore-foot raised'...'The animal at the feet of the god on this coin resembles a goat or stag.'

of Commodus shows him, again clothed in a short *chitón* and accompanied by a lion, confronting a Zeus of more ordinary aspect (with *himátion*, tall sceptre, and eagle): both deities lay hold of the same vertical spear (fig. 484)[1].

Now Hekatomnos, who first introduced the figure of the axe-bearing Zeus on the coinage of Karia, hailed from Mylasa, of which town he and his forebears were regarded as benefactors[2]. Hekatomnos was, in fact, king of Mylasa before he became satrap of Karia; and it is highly probable that the Zeus whose effigy he struck on the Carian tetradrachms was but an ennobled form of the Zeus

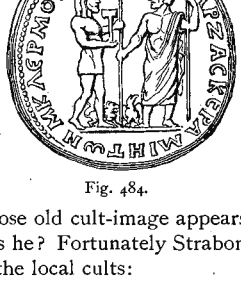

Fig. 484.

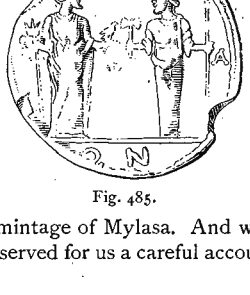

Fig. 485.

whose old cult-image appears on the mintage of Mylasa. And who was he? Fortunately Strabon[3] has preserved for us a careful account of the local cults:

'The Mylasians have two sanctuaries of Zeus, one of Zeus *Osogó*, as they call him, the other of Zeus *Labrandenós*. The former is in the city. Labranda is a village on the mountain, where the pass runs over from Alabanda to Mylasa, at some distance from the city. Here there is an ancient temple and a *xóanon* of Zeus *Strátios*, who is honoured by the neighbourhood in general and by Mylasa in particular. A paved way some sixty furlongs in length leads to the city; it is called the Sacred Road and is used for processions of the victims. The most

Dial.-Inschr.* iii. 2. 759 f. no. 5753 *a*, 6 ff. = Dittenberger *Syll. inscr. Gr.*[3] no. 167, 6 ff. (in a Mylasian decree of 367—366 B.C., found at *Melasso* and now in the Louvre) *ἐπεβούλευσε Μαυσσώλλωι, ὅτι εὐεργέτηι | τῆς πόλεως τῆς Μυλασέων καὶ αὐτῶι καὶ τῶι πατρὶ | Ἑκατόμνωι καὶ τοῖς προγόνοις τοῖς τούτων, κ.τ.λ., id.* 20 ff. (in a decree of 361—360 B.C.) *τοὺς Πελδέμω | παῖδας, παρανομήσαντας ἐς τὴν εἰκόνα | τὴν Ἑκατόμνω, ἀνδρὸς πολλὰ καὶ ἀγαθὰ ποιήσαν|τος τὴμ πόλιν τὴμ Μυλασέων καὶ λόγωι καὶ ἔργωι, | ἀδικεῖν καὶ τὰ ἱερὰ ἀναθήματα καὶ τὴμ πόλιν | καὶ τοὺς εὐεργέτας τῆς πόλεως· κ.τ.λ., id.* 33 ff. (in a decree of 355—354 B.C.) *Μανίτα τοῦ | Πακτύω ἐπιβουλεύσαντος Μαυσσώλλωι τῶι Ἑκατόμνω | ἐν τῶι ἱερῶι τοῦ Διὸς τοῦ Λαμβραΰνδου, θυσίης ἐνιαυ|σίης καὶ πανηγύριος ἐούσης, καὶ Μαυσσώλλου μὲν | σωθέντος σὺν τῶι Δί, κ.τ.λ.*

[3] Strab. 659.

distinguished citizens are priests for life. These sanctuaries, then, are specially attached to the city. But there is a third sanctuary of Zeus *Kários*, common to all the Carians, including the Lydians and the Mysians as members of the same family. It is recorded that Mylasa in former times was a mere village, the ancestral home and palace of the Carians belonging to Hekatomnos.'

From this it appears that the Mylasians were devoted on the one hand to Zeus *Osogôa*, on the other to Zeus *Strátios* or *Labrandenós*. The two deities stand face to face on a bronze coin of Mylasa struck by Caracalla and Geta (fig. 485)[1]. Zeus *Osogôa*, clad in *chitón* and *himátion*, rests with his right hand on a trident and holds an eagle in his left[2], while Zeus *Strátios* or *Labrandenós* has a *kálathos* on his head, a double axe in his right hand, and a spear in his left. Their

Fig. 486.

Fig. 488.

Fig. 487.

joint recognition is implied by the curious combination of trident with double axe found as a symbol on Alexandrine tetradrachms issued at Mylasa[3] and as a reverse type on Mylasian coppers of *s.* ii. B.C. and later (figs. 486, 487)[4]. In imperial times the compound weapon is based on a crab and surrounded by a bay-wreath (fig. 488)[5]. The fusion of Zeus *Osogôa* with Zeus *Strátios* is complete on a unique copper of Mylasa, struck by Antoninus Pius, which passed with the

[1] *Brit. Mus. Cat. Coins* Caria, etc. p. 133 no. 37. My fig. 485 is from a cast of this specimen.

[2] Zeus *Osogôa*, with trident, eagle, and crab, is seen on silver pieces issued by Hadrian at Mylasa (M. Pinder 'Über die Cistophoren und über die kaiserlichen Silbermedaillons der römischen Provinz Asia' in the *Abh. d. berl. Akad. 1855* Phil.-hist. Classe p. 627 pl. 7, 7 and 8=my figs. 489 and 490, Cohen *Monn. emp. rom.*[2] ii. 132 no. 302 fig. and no. 303, J. Hirsch *Auctions-Catalog* München 1907 xviii. 105 no. 1883 pl. 26). A similar figure of Zeus *Osogôa*, with trident and eagle, in a tetrastyle temple occurs on coppers of Mylasa struck by Septimius Severus (*Brit. Mus. Cat. Coins* Caria, etc. p. 132 no. 31 f.).

[3] L. Müller *Numismatique d'Alexandre le Grand* Copenhague 1855 pl. 16 nos. 1141—1143, Head *Hist. num.*[2] p. 622.

J. Schaefer *op. cit.* p. 390 f. gives as a separate series the decrees of the tribe Ὀτωρκονδέων relating to this deity:

(1) *Corp. inscr. Gr.* ii no. 2693 *f* = Lebas—Waddington *Asie Mineure* no. 414 (this and the three following inscriptions, *viz.* (2), (3), (4), date from *s.* i B.C. and deal with the sale or lease of lands belonging to the temple. Cp. W. Judeich in the *Ath. Mitth.* 1889 xiv. 373 ff.), 8 f. (so-and-so purchased the estates) τὰς οὔσας ἱερὰς Διὸς Ὀσογῶ, [τὰς] (so Schaefer: Waddington had supposed Ὀσογώ[ου]) σὺν τοῖς ἐνο[ῦσι δένδρεσι] κ.τ.λ.

(2) Lebas—Waddington *Asie Mineure* no. 415 (deals with the ἔμβασις or purchaser's entrance upon the divine estates), 6 ff. εἰς τὰς γέας τὰς ἐν τῷ Ὀμβιανῷ πεδίῳ κ.τ.λ.], εἰς τὰς οὔσας ἱερὰς Διὸς Ὀσογῶ, ἃς καὶ ἐκτηματώνηκαν τῷ Διὶ Ὀτωρκον[δέων, σὺν τ]οῖς ἐνοῦσι δένδρεσι πᾶσι καὶ ἀμπέλοις καὶ εἰς τὰ ἐποίκια καὶ εἰς τὰ οἰκόπεδα κ.τ.λ.

(3) G. Cousin in the *Bull. Corr. Hell.* 1898 xxii. 380 ff. no. 21, col. 1, 12 f. παρὰ τῇ γῇ τῇ οὔσῃ ἱερᾶι Διὸς Ὀσο[γῶ].

(4) A. Hauvette-Besnault—M. Dubois in the *Bull. Corr. Hell.* 1881 v. 107 ff. A, 13 ff. [γενομέ]νης δὲ τῆς ὠνῆς τῶν προγεγραμμένων τοῖς κτηματώναις ε[ἰς τὸ τοῦ θεοῦ (*sc.* Διὸς Ὀσογῶ) ὄνομα, μισθώσεται τὰ προγε][γραμμένα πάντα αὐτὸς Θρᾳσέας παρὰ τῶν ταμιῶν τῆς [φυλῆς κατὰ χρηματισμὸν ἐν τῷ αὐτῷ χρόνῳ] | κ.τ.λ.

(5) Lebas—Waddington *Asie Mineure* no. 411 (fragmentary decree of *s.* i B.C.), 5 ἀγῶνι τῶι συντελουμένωι Δ[ὶ] Ὀσ[ογῶι---] (so Schaefer, after Le Bas, for Δ. ΟΣ 'perincerte').

(6) Lebas—Waddington *Asie Mineure* no. 406 (honorary inscription of *s.* i B.C.), 12

of Pausanias[1] lead us to conclude that the native name of the former Zeus was spelled *Osogôa*, an indeclinable appellation which has the variants *Osogô* (genitive) and *Osogôi* (genitive[2], dative). The meaning of the epithet is quite unknown[3]. The god's temple was situated to the west of Mylasa, at the foot of the scarped mountain, which dominates the town. Traces of the precinct are still to be seen[4]—a wall of polygonal masonry set against the mountain-side and turned towards the east, with a row of fourteen unfluted columns at right angles to it. Five fluted columns, bearing dedicatory inscriptions by priests of Zeus *Osogôa*[5], have been recovered from the immediate neighbourhood. The practice of thus dedicating temple-columns recurs at Euromos[6] and was not unfrequent in Asia Minor[7]. An allusion to it may be detected in the familiar words of the New Testament: 'He that overcometh, I will make him a pillar in the temple of my God, and he shall go out thence no more: and I will write upon him the name of my God, and the name of the city of my God,...and mine own new name[8].' Zeus *Osogôa* is once at least identified[9] with the Zeus *Otorkondéon* of sundry late inscriptions[10].

[6] *Corp. inscr. Gr.* ii nos. 2713, 2714 = Lebas—Waddington *Asie Mineure* nos. 313, 314—318.

[7] A well-known example is that of the columns dedicated by Kroisos in the sixth-century Artemision at Ephesos (Hdt. 1. 92, E. L. Hicks *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1890 iii. 2. 173 no. 518 *a—e*, D. G. Hogarth *Excavations at Ephesus* London 1908 pp. 15, 294 f.) and by others in the fourth-century temple on the same site (Aristot. *oeconom.* 2. 2. 1349 *a* 9 ff., E. L. Hicks *op. cit.* iii. 2. 173 ff. no. 519 *a—i* with the examples, ancient and mediaeval, cited by Canon Hicks *ad loc.*).

[8] Rev. 3. 12.

[9] *Supra* p. 579 n. o no. (2) *bis*.

[10] J. Schaefer *op. cit.* p. 394 quotes the following decrees of the tribe Ὀτωρκονδέων:

(1) *Corp. inscr. Gr.* ii no. 2693 *c* = Lebas—Waddington *Asie Mineure* no. 403 (of *s.* i B.C.), 15 f. ἀναγράψαι δὲ τόδε τὸ ψήφισμα εἰς στήλην λιθίνην καὶ] | [στῆσ]αι ἐν τῶι ἱ[ερῶι τοῦ Δ]ιὸς Ὀτωρκονδ[έω]ν.

(2) Lebas—Waddington *Asie Mineure* no. 405, 14 f. ἀναγράψαι δὲ καὶ τόδε τὸ ψήφισμα ἐν τῶι περιβόλωι τῶ[ι] | [τῆ]ς φυλ[ῆ]ς Ὀτωρκονδέων.

Hence it has been inferred that the precinct belonged to the Mylasian tribe Otorkondeis, who took Zeus *Osogóa* as their patron deity[1]. The Greeks in general regarded him as a blend of Zeus with Poseidon. Pausanias, *à propos* of the sanctuary of Poseidon *Hippios* near Mantineia, observes:

'There is an ancient legend that a wave of the sea appears in this sanctuary. The Athenians tell a similar story of the wave on the Acropolis, and the Carians who dwell in Mylasa tell a like tale of the sanctuary of the god whom in their own tongue they call Osogoa. Now the sea at Phalerum is just twenty furlongs distant from Athens; and similarly at Mylasa the port is eighty furlongs from the city. But Mantinea is farther than either of them from the sea; therefore in ascending so far the sea shows forth most manifestly the will of the god[2]

A fragment of Theophrastos' treatise *On Waters*, preserved by Athenaios[3], says:

'Not only do bitter waters change their nature, but salt water as well, and so do whole rivers, as for example that on Kithairon, beside which is the sanctuary of Zeus, <and that in Karia, beside which is the sanctuary >[4] of Poseidon. The reason is that many thunderbolts fall in the locality.'

(3) Lebas—Waddington *Asie Mineure* no. 413 (of *s.* i B.C.) *b*, 2 f. περίβο[λ]ο[- - -] | 'Οτωρκονδέω[ν - - -].

[3] Theophr. *frag.* 159 Wimmer *ap.* Athen. 42 A.

[4] J. Dalechamps in 1583 restored the missing words in Latin from Plin. *nat. hist.* 31. 54 et in Caria, ubi Neptuni templum est, amnis, qui fuerat ante dulcis, mutatus in salem est. The Greek text καθὰ τὸν ἐν Κιθαιρῶνι, παρ' ᾧ Ζηνός, <καὶ τὸν ἐν Καρίᾳ, παρ' ᾧ> Ποσειδῶνος ἱερόν ἐστιν is due to I. Casaubon (1597). The passage thus cured has been injured again by a modern translator, C. D. Yonge, who renders ἐν Καρίᾳ, 'in Cairo'!!

And an extract from Machon the Alexandrine comedian, likewise cited by Athenaios[1], tells an anecdote which emphasises the dual aspect of the Mylasian deity:

> Once on a time the flute-player Dorion
> Came to Mylasa, but could find no lodging,
> So sat him down within a certain precinct
> That chanced to be before the city-gates,
> There saw the temple-sweeper sacrificing.
> 'I' the name,' quoth he, 'of Athena and the gods,
> Tell me, my friend, whose temple this may be.'
> 'Zenoposeidon's, sir!' the man replied.
> Then Dorion: 'And how could anybody
> Expect a room for one here, where they say
> The very gods are lodging two by two!'

The name *Zenoposeidôn*, which thus goes back to the time of Machon (*s.* iii B.C.), if not to that of Dorion (*s.* iv B.C.)[2], appears in the local inscriptions from *c.* 200 B.C. onwards[3], and is not altogether forgotten by the Byzantine scholarship of the twelfth century[4]. Concerning the ritual of the god we know little or nothing. But P. Le Bas points out that the Taurophonia, mentioned in a decree of the Otorkondeis as the occasion of a solemn traditional assembly, were perhaps celebrated on his behalf[5].

The fact that the Carians recognised a Zeus-like Poseidon or a Poseidon-like Zeus is to me at least of considerable interest. For I have long contended that the Hellenic Poseidon himself was originally but a specialised form of Zeus. In 1903[6], accepting with some modification the views of H. L. Ahrens[7] and W. Sonne[8], I took the name

Poteidán, Poseidôn, etc. to denote 'Zeus in the Water' (*pótos*), arguing that, when rain fell, the primitive Greeks believed Zeus to be present in the rain; that, when the rain collected into streams and rivers, they still held Zeus to be in the drinking-water; and that, when the rivers ran into the sea, they looked upon the sea itself as permeated with Zeus. In 1904[1] I re-stated the same argument and sought to reinforce it by a variety of pleas, which need not here be specified. But the proposed derivation of *Poteidán, Poseidôn*, etc. was not free from improbabilities and was rejected by O. Gruppe in 1908[2]. Indeed, I had myself by that time begun to entertain serious doubts of it. Shortly afterwards it occurred to me that *Potei-, Posei-*, etc., the first element in the compound, might be more convincingly connected with *pósis*, 'lord,' the whole name *Potei-Dán*[3] or the like meaning 'Lord Zeus' just as the Homeric *pótnia Hére*[4] meant 'lady Hera.' My friend Dr P. Giles, to whom I submitted this notion, not only gave it his general approval, but told me that it had been partially anticipated by German experts. K. Brugmann in the second edition of his *Grundriss* (1911)[5] was in fact able to cite the opinions of two other notable philologists, O. Hoffmann and P. Kretschmer. Hoffmann in 1906[6] had derived the various forms of Poseidon's

in seinem zweiten Theile nichts anderes als die dialektische Form Dan=Zeus, während der erste Theil des Namens die Beziehung auf das feuchte Element trägt. Poseidon= Potidan ist also Zeus in Beziehung zum Nass, zum himmlischen Nass. Erst im Laufe der Zeit hat sich diese Beziehung auf die Gewässer des Himmels in diejenige auf die Gewässer der Erde und hier speziell des Meers umgestaltet,' F. Durrbach in Daremberg—Saglio *Dict. Ant.* iv. 59 'D'après une autre interprétation, plus généralement acceptée, la première partie du nom est formée du thème *ποτ*, qu'on retrouve dans *ποταμός, πότος, πόσις*, et qui aurait la signification de *liquide, eau*; la fin du mot est un simple suffixe; ou encore elle recèle peut-être le nom de Ζεύς (Δήν, Δάν), en sorte que Poseidon, c'est le Zeus de l'élément humide. Ces tentatives d'étymologie ne sont qu'ingénieuses, et on ne saurait les prendre comme point de départ pour l'exégèse.'

[1] *Folk-Lore* 1904 xv. 267 ff., 277 ff.

[2] Gruppe *Myth. Lit.* 1908 p. 600. *Id.* in the *Neue Jahrb. f. klass. Altertum* 1918 xli. 296 treats '*Potīda* als vorgriechische, wenn auch vielleicht nicht kretische Benennung des im Regenzauber angerufenen Gottes.'

[3] The nom. sing. Δάν was used by the Boeotians in place of Ζεύς (*supra* p. 342 n. 0); and Boiotia was one of the oldest and most important centres of Poseidon-worship (Aristarchos *ap. et. mag.* p. 547, 16 f. ἡ Βοιωτία ὅλη ἱερὰ Ποσειδῶνος. See further Farnell *Cults of Gk. States* iv. 29 ff.—a thorough-going and wholly satisfactory investigation).

[6] O. Hoffmann 'Poseidon' in the *Jahres-Bericht der Schlesischen Gesellschaft für vaterländische Cultur* 1906 lxxxiv. 4 (Orientalisch-sprachwissenschaftliche Sektion) 8—16 reviews the forms Ποτειδάϝων (Corinthian), Ποσειδάων (Homeric), Ποσοιδάν (Arcadian), Ποτῖδάν or Ποτῖδάς (Doric), Ποσῖδᾶ- in Ποσιδήιον...ἄλσος (*Il.* 2. 506) and Ποσῑδηιών (Old Attic and Ionic month), and concludes that Ποτι- (Ποσι-), Ποτει- (Πόσει-), Ποσοι- are three vocatives of an *ι*- stem *ποτι-*: *ποσι-*. He assumes two types of address—a longer

name from a vocative *Pótei Dâwon* (*Póti Dâ*), 'Lord Dawon' ('Lord Da'), and had tentatively suggested a connexion with the name of

Fig. 492.

his Arcadian consort *Da mater*, 'Mother Da.' Kretschmer in 1909[1]

and more formal Πότει Δᾶϝον (Πόσει Δᾶϝον), whence the nominative Ποτει-δάϝων, or a shorter and more familiar Πότι Δᾶ, whence the nominative Ποτι-δάς—both being comparable with such expressions as *πότνια* "Ηρη, *πότνια* "Ηβη. On this showing the proper name of the god was Δάϝων, which is perhaps related to the Δᾶ of Δαμάτηρ (*ib.* p. 16: 'In derjenigen Landschaft, in welcher der Gott viele seinen alten Züge bewahrt hat, in Arkadien wurde er als Gemahl der Demeter vorgestellt: sollten *πότει Δᾶϝον*, *πότι Δᾶ* und *Δᾶ μᾶτερ* nur zufällig an einander anklingen?').

[1] P. Kretschmer in *Glotta* 1909 i. 27 f.: 'Sachlich erscheint daher die Annahme recht ansprechend, dass in dem Namen *πόσις* aus **πότις* "Herr, Eheherr, Gatte"=skr. *pátis*, lit. *pàt(i)s* und Δᾶ, der alte Name der Erdgöttin, enthalten in Δᾶμάτηρ, stecke. Also "Herr der Erde" oder "Gatte der Da." Es bestehen dabei nur zwei sprachliche Schwierigkeiten, der Diphthong *-ει-* statt *-ι-* und die Stellung der Glieder. Beide lassen sich beheben, wenn wir von einer Zusammenrückung *Πότει Δᾶς Vok. "Herr oder Gatte der Da!" ausgehen. Der alte Vokativ Sing. der *i*-Stämme endete auf *-εῖ*, musste also von **πότις* **πότει*=skr. *pátē* (vgl. lit. *naktẽ*, aksl. *noští*) lauten, wofür später **πότῐ*, mit Assibilation *πόσῐ* eintrat. Die ganze Benennung hat eine Analogie in der epischen Bezeichnung des Zeus als *ἐρίγδουπος πόσις* "Ηρης. Die Erhebung des Vokativs zum Nominativ aber ist bekanntlich bei Eigennamen nicht selten und hat eine berühmte Parallele in *Juppiter* =Ζεῦ *πάτερ*. Das dor. Ποτιδᾶς (Epicharm. 81. Sophron 131 Kaib.) kann direkt zusammengewachsenes *Πότι Δᾶς sein; davon abgeleitet das Adjektiv dor. Ποτίδαιος, ion. att. Ποσῐδήιος, Ποσίδειος (dazu der Monatsname Ποσῐδηών, Ποσῐδεών). Die Form Ποτειδάϝων mit den daraus entstandenen dor. Ποτειδάν, ark. Ποσοιδάν, ion. Ποσειδέων, att. Ποσειδῶν ist eine Weiterbildung nach Art von *'Αλκμάϝων 'Αλκμάν, Μαχάων, 'Αμυθάων, *Παιάων

had gone further in the same direction by supposing the original vocative to have been **Pótei Dâs*, 'Lord (Husband) of the Earth-goddess[1],' and thence forming the new nominatives *Potidâs*, *Poteidáwon*, etc. This is phonetically unimpeachable. But so also is my *Potei-Dán*, etc., 'Lord Zeus.' And on the whole it seems to me more likely that the god was named in his own right than in virtue of his relation to the goddess.

Zeus *Strátios* of Labranda bore a local appellative, which is spelled in very diverse ways. Kretschmer[2] has compiled a list of a dozen variants—*Labráyndos*[3] (fig. 492), *Lambráyndos*[4], *Labraúyndos*[5],

hom. Παιήων dor. Παιάν, 'Ερμάων 'Ερμάν. Es scheint nun, dass in der Zusammenrückung beide Vokativformen, die alte **πότει* und die jüngere **πότι*, neben einander gebraucht wurden.' Etc.

[1] On Δᾶ as an ancient pet-name ('*Lallnamen*') of the earth-goddess see P. Kretschmer 'Demeter' in the *Wiener Studien* 1902 xxiv. 523 ff.

[5] W. Judeich in the *Ath. Mitth.* 1890 xv. 259 no. 11 an altar at Mylasa inscribed Δημοσ(θ)ένης | representation of a double axe | Λαβραυύνδ[ῳ]| ἀνέ(θ)ηκεν.

Labraáyndos (?)[1], *Labratyndos*[2], *Labráindos* (?)[3], *Labráendos*[4], *Labrendos*[5], *Lábrandos* (?)[6], *Labrandeús*[7], *Labradeús*[8], *Labrandenós*[9]—and has drawn the obvious conclusion that Carian vocalisation was incommensurable with Greek spelling. Since the *nd*-suffix is found, not only in the names of places, but also sometimes in those of persons, Kretschmer[10] further conjectures that an axe-god Labrayndos gave his name to the sanctuary Labraynda and subsequently received from the sanctuary his appellative *Labrandeús* etc. That is, no doubt, a thinkable sequence of events. But it is simpler to suppose that *Lábranda* was called 'the place of the Double Axe' because repeatedly struck by lightning[11], the god being named from the spot, not the spot from the god.

This would square well with J. Schaefer's[12] surmise that originally the double axe alone was the object here worshipped. If so, the Carian cult must have been near akin to the Cretan. In which connexion we should observe that the Mylasians of the first century B.C.

[1] Lebas—Waddington *Asie Mineure* no. 348, 4 f. *καὶ τοῦ Διὸς τοῦ* | *Λαβραυΐνδου*. But A. Hauvette-Besnault—M. Dubois in the *Bull. Corr. Hell.* 1881 v. 98 ff. no. 2, 10 f. read *καὶ τοῦ Διὸς τοῦ* | *Λαβραΰνδου*: *supra* p. 578 n. 4 no. (3).

are known to have had priests of Zeus *Kretagenés* and the Kouretes[1]. Reverence paid to Cretan powers is at least suggestive of Cretan affinity.

Another point deserving of consideration is the possibility that the axe-god of Mylasa was at one time named *Labráyndos*, 'He of Labranda,' without any more exact determination. The *Etymologicum Magnum*[2] tells how the Kouretes Labrandos, Panamoros, and Palaxos or Spalaxos came in consequence of an oracle to Karia and, being overtaken by night, slept on the banks of a river which they therefore called the Heudonos. As two of these Curetic names were obviously cult-titles of Zeus, Labrandos being derived from the Zeus *Labráyndos* of Labranda and Panamoros from the Zeus *Panámaros* of Panamara[3], O. Höfer in 1894 suspected that the third name likewise, Palaxos or Spalaxos, might prove to be a '*Zeus-epitheton*[4].' His suspicion was well founded; for seven years later he triumphantly quotes[5] a dedication to Zeus *Spáloxos* on a small altar found by W. Kubitschek and W. Reichel at Mastaura and published by them in 1894[6]. The altar in question is decorated with a double axe also; and this tempts Höfer to hazard the guess that *Pálaxos* may be connected with *pélekys*, 'an axe.' In view of the various disguises worn by this much-travelled word[7] there is no phonetic

[1] Lebas—Waddington *Asie Mineure* no. 394, 8 f. = Michel *Recueil d'Inscr. gr.* no. 472, 8 f. (Mylasa) ἐπειδὴ Μοσ[χίω]ν Ἀριστείδου, ἱερεὺς Διὸς Κρηταγενοῦς καὶ Κουρήτων κ.τ.λ. [4] O. Höfer in Roscher *Lex. Myth.* ii. 1777 f.

[5] *Id. ib.* iii. 1276.

[6] W. Kubitschek—W. Reichel in the *Anzeiger der kaiserlichen Akademie der Wissenschaften* Phil.-hist. Classe 1893 (Wien 1894) xxx. 93 no. 2: 'aus Mastaura ein kleiner Altar, dessen Vorderseite in Relief die Büste eines unbärtigen Kopfes mit Schleier und die Worte γ' Διὶ Σπαλώξω Ἀμμι(ο)ν εὐχήν trägt, während auf der Rückseite eine Doppelaxt erscheint.'

[7] πέλεκυς, Sanskrit *paraçú-ḥ* (*párçu-ḥ*), was a loan-word from the east, cp. Babylonian-Assyrian *pilaqqu*, Sumerian *balag*, 'axe' (H. Lewy *Die semitischen Fremdwörter im Griechischen* Berlin 1895 p. 178, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 358, Boisacq *Dict. étym. de la Langue Gr.* p. 761 f.). Babr. 64. 9 καὶ τῶν πελύκων τῶν ἀεί σε τεμνόντων (so W. G. Rutherford, in his ed. of 1883, with excision of line 8) implies a form πέλυξ.

R. Eisler in *Philologus* 1909 lxviii. 126 n. 27 derives Βερεκύνδαι, Βερέκυντες, Βερέκυνθος,

impossibility to bar the way. Again, if the Mylasian axe-god was known as *Labráyndos* before he became Zeus *Labráyndos*, we can appreciate Euhemeros' statement that Zeus in the course of his journey round the world was entertained by a king or chieftain called Labryandos and bade his host in memory of the visit erect a temple to Zeus *Labryándios*[1]. Finally, one altar found at Mylasa exhibits the double axe and a dedication 'to *Labraúyndos*[2]' without any mention of Zeus. Nevertheless it is certain that, long before this altar was made, *Labráyndos* had been definitely identified with Zeus: the joint designation goes back to Herodotos[3] and probably to Gyges[4].

In 1840 Sir Charles Fellows[5] saw and described the Sacred Road that runs from Mylasa to Labranda:

'In descending the mountain towards Mellassa, we followed and continually crossed and re-crossed an ancient paved road, the large stones differing from those of later days by being wrought and fitted together with the protruding natural rock: the road, in passing ravines, was also built up with solid Greek masonry. This way doubtless continued to the ancient city of Mylasa.'

He also visited the temple at Labranda[6], but failed to recognise it as that of Zeus *Labráyndos*[7]. P. Lebas fared better. On March 16,

etc. from **βέρεκυς* 'offenbar eine aufgerauhte Nebenform von *πέλεκυς* = "Doppelaxt"' (accents amended). The *b* of *balag* and the *β* of *βέλεκυς, βέλεκος, βέλεκκος*, an axe-shaped bean (P. Kretschmer *Einleitung in die Geschichte der Griechischen Sprache* Göttingen 1896 p. 106 f.), might be alleged in support of this derivation. Dr Giles tells me that **βέρεκυς* for *πέλεκυς* would be possible as far east as Persia, where *r* occurs for *l*.

But when Eisler *loc. cit.* goes on to detect double axes in the Πελασγοί (=**Πελαγσκοι*), Πηλεγών son of Ἄξιος (*Il.* 21. 141), the Πηλαγόνες in general, Πλακία and ἡ Πλακιανή (accent rectified), *Peleg* (Gen. 10. 25), the Persians ('Wortspiel: "Prithu-Parçavah" "Axtführende Parther" Rig Veda 7, 83'), and the Amazonian *παλλακίδες* ('Nach ihrer Axt heissen natürlich diese Tempeldirnen'), even the Complaisant Man is unwilling *συμπαίζειν αὐτὸς λέγων...* '*πέλεκυς*'!

[1] Lact. *div. inst.* 1. 22 Historia vero Sacra testatur ipsum Iovem, postquam rerum potitus sit, in tantam venisse insolentiam ut ipse sibi fana in multis locis constituerit. nam cum terras circumiret, ut in quamque regionem venerat, reges principesve populorum hospitio sibi et amicitia copulabat et cum a quoque digrederetur, iubebat sibi fanum creari hospitis sui nomine, quasi ut posset amicitiae ac foederis memoria conservari. sic constituta sunt templa Iovi Ataburio, Iovi Labryandio (labryandio cod. [7] Fellows was misled by R. Chandler *Ionian Antiquities* London 1769 p. 55 ff. pls. iv, 1—5 and *Travels in Asia Minor and Greece* Oxford 1825 i. 245 ff., who took the ruins of an unfinished Corinthian temple at *Ayakli* to mark the site of Labranda. Others had

1844 he reached and identified Labranda (*Kodja Yaïla*), describing his experiences in an enthusiastic letter[1] and securing admirable views and plans of the extant remains (figs. 493 and 494)[2].

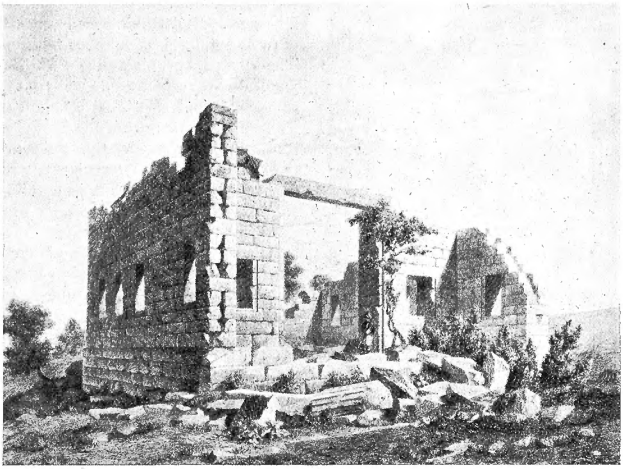

Fig. 493.

Later the spot was revisited by Lieut. R. M. Smith, when attached to Sir C. T. Newton's expedition to Asia Minor (1856—1859). Newton[3] introduces his report as follows:

'The ruins are very finely situated near the summit of the Kodja Yailih mountains, the ancient Mount Latmus, according to Kiepert. A principal ravine opens from it down to the valley of Mylasa. "The site is covered with ruins of massive Hellenic masonry, some of which appear to have been terrace walls. The most important of these ruins is that of a small distyle temple *in antis*, consist-

rightly identified them with Euromos, and W. M. Leake *Journal of a Tour in Asia Minor* London 1824 p. 231 f. had proposed to see in them the temple of Zeus Εὐρωμεύς (a 'second brass' of Caracalla, said to bear an archaic effigy of Zeus in a tetrastyle temple and the legend ΖΕΥϹ ЄΥΡΩΜЄΥϹ ЄΥΡΩΜЄΩΝ (Eckhel *Doctr. num. vet.*[2] ii. 581, Rasche *Lex. Num.* iii. 817, 854, Suppl. ii. 915, Head *Hist. num.*[2] p. 617) rests upon the authority of Vaillant and is discredited by J. Schaefer *op. cit.* p. 362).

ing of a *pronaos* and *cella*, with a square recess at the end. The length of the cella inside the walls is 38′ 3″ by a width of 33′ 6″. The doorway is 12′ 2″ in width. Two lintel stones still stretch across the top. The height of the doorway is about 18′. The flanking walls consist of twelve courses, each about 1½′ deep. The thickness of this wall is 6′ ½″. Beyond the doorway the side walls of the *pronaos* extend 16′ 8″. At a height of 12′ from the ground outside, and 2′ 3″ from the floor inside, the walls are pierced at regular intervals by windows 6′ 3″ by 3′ 6″ at the base, tapering slightly upwards. Round these windows is a slight sinking, as if to receive shutters. The view from them is most striking, embracing the plain of Mylasa, Paitschin, Leros, Calymnos, Cos, Budrum, and the mountains all round. Near this building drums of fluted marble columns were lying about[1]. The diameter of one was about 3′. A smaller one measured 2′ 1″."'

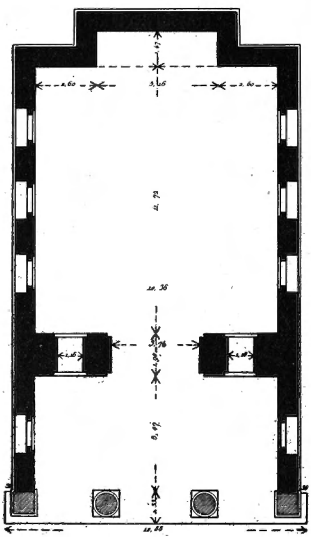

Fig. 494.

Labranda in its palmy days had other attractions besides this many-windowed fane with its large and well-built precinct. Here grew a fine grove of sacred plane-trees, to which the Carian troops fled for refuge after their disastrous defeat by the Persians under Daurises on the banks of the Marsyas (the modern *China Chai*) during the Ionian revolt[2]. Here too was a spring of clear water, in which were kept tame eels decked with earrings and chains of gold[3].

The Carians, being a warlike race, viewed their axe-bearing god

[1] *Id. ib.* p. 614 n.° says: 'Prokesch von Osten [A. Prokesch-Osten *Denkwürdigkeiten und Erinnerungen aus dem Orient* ed. E. Münch Stuttgart 1837 iii. 449] describes other ruins on this site. He saw a portico with twelve columns standing, now probably thrown down; a great number of pieces of frieze lying on the ground; a massive wall of hewn stone fitted without mortar, 134 paces long, connected with a row of chambers not less than 200 paces long; and at the end of the wall a tower. The whole area covered by the ruins he estimates as not more than 400 paces in width: he considers these remains to be of the Roman period.'

[2] Hdt. 5. 119.

[3] Plin. *nat. hist.* 32. 16 e manu vescuntur pisces...item in Labrayndi (*supra* p. 585 n. 3) Iovis fonte anguillae et inaures additas gerunt, Ail. *de nat. an.* 12. 30 *χειροήθεις δὲ ἰχθῦς καὶ ὑπακούοντες τῇ κλήσει καὶ τροφὰς ἀσμένως δεχόμενοι πολλαχόθι καὶ εἰσὶ καὶ τρέφονται, ὥσπερ οὖν...καὶ ἐν τῷ ἱερῷ δὲ τοῦ Λαβρανδέως Διὸς ἐν κρήνῃ διειδοῦς νάματος, καὶ ἔχουσιν ὁρμίσκους χρυσοῦς καὶ ἑλλόβια, χρυσᾶ μέντοι καὶ ταῦτα.*

as *in primis* a fighter, brought his old wooden effigy up to date by means of an added sword, and saluted him as *Strátios*, the 'Lord of Hosts[1].' This title occurs in several inscriptions from Mylasa[2]. But the martial aspect of the deity worshipped by Carian mercenaries from generation to generation never really eclipsed the original conception of him as a storm-god and fertilising power. Labranda is liable to rain of exceptional severity, as Sir Charles Fellows[3] found to his cost. He reached Mylasa on March 20, 1840, 'in a violent storm,' and here he was detained by the rain falling 'in such torrents' that, when he attempted an excursion to *Ayakli*, it completely soaked his pockets, portfolios, and carefully copied inscriptions. He complains that 'the thick branches of a group of evergreen oaks did not even afford shelter from the deluging rain.' After this we are not surprised to learn from Aelian[4] that Zeus *Labrandeús* got his name from the 'heavy downpour' that he sent. Modern man is apt to grumble at a shower. But the ancients knew better, and welcomed it as proof of the sky-god's gendering force.

If the sky-god was the fertiliser, the earth-goddess was the ferti-

[1] Ail. *de nat. an.* 12. 30 τὸ δὲ ἄγαλμα ξίφος παρήρτηται, καὶ τιμᾶται καλούμενος Κάριός τε καὶ Στράτιος. But Strab. 659 (*supra* p. 576 f.) expressly distinguishes the cult of Zeus Κάριος from that of Zeus Λαβρανδηνός or Στράτιος. No doubt Aelian has blundered; probably because, as C. Robert in J. Schaefer *De Iove apud Cares culto* (*Dissertationes philologicae Halenses* xx. 4) Halis Saxonum 1912 p. 357 n. 1 suggests, he is mixing the contents of Hdt. 1. 171 with those of Hdt. 5. 119.

[4] Ael. *de nat. an.* 12. 30 Ζεὺς δὲ Λαβρανδεὺς ὕσας λάβρῳ καὶ πολλῷ τὴν ἐπωνυμίαν τήνδε ἠνέγκατο.

C. Fellows *op. cit.* p. 75 fig. (=my fig. 495) noticed four keystones decorated with a double axe in relief, which were built into various walls at Mylasa. One of them, here shown, was *in situ* over a fine arched gateway carrying an aqueduct. We may perhaps infer that the water-supply was under the special protection of the rain-god.

lised. But, apart from the late inscriptions which associate Hera with Zeus *Strátios*[1], we have no evidence of a goddess at all in Labranda. It would seem that here throughout historical times the god was all in all[2]. Yet, remembering the similarity of the Carian to the Cretan cult, we may well suspect that in the former as in the latter a goddess had once played the leading part. Indeed, it would not be unreasonable to conjecture that in Karia the cult of the Indo-Europaean sky-father had been superposed on that of an indigenous earth-mother, and that Zeus had to a certain extent absorbed into himself her maternal characteristics. In point of fact, some such hypothesis is necessary to account for two very remarkable reliefs, in which the Zeus of Labranda is represented with the breasts of a goddess. One of these (fig. 496) is 'an archaic statuette in white marble' seen by J. T. Wood[3] 'in the garden of a Turkish gentleman at Mylassa.' It is of importance, because in all probability it preserves for us the type of the cult-image at Labranda on a larger scale than the coins already mentioned (figs. 476—479, 485)[4]. We are confronted by a beardless (?) deity, with *kálathos* on head, necklaces round throat, double axe and sceptre in either hand. The body below the waist is swathed with an *agrenón*[5] and above it exhibits

[4] *Supra* p. 574 ff. (figs. 476—479, 485). C. Lenormant *Nouvelle galerie mythologique* (Trésor de numismatique et de glyptique) Paris 1850 p. 52 f. no. 16 pl. 8, 11 and an enlarged fig. on p. 53: 'il porte une longue barbe et laisse voir deux mamelles de femme.' P. Foucart in the *Mon. Piot* 1910 xviii. 162 thinks that Lenormant's draughtsman meant to represent three breasts, not two. But Overbeck *Gr. Kunstmyth.* Zeus p. 270 is justly sceptical of the whole design. I fail to detect any breasts on the two examples of the coin in the British Museum (*Brit. Mus. Cat. Coins* Caria, etc. p. 133 nos. 38, 39); nor are they mentioned by G. Macdonald as present on the two specimens at Glasgow (*Hunter Cat. Coins* ii. 425 nos. 2, 3); while Foucart *loc. cit.* admits that 'M. Babelon est d'avis que la pièce du Cabinet des Médailles ne permet ni de nier ni d'affirmer.'

[5] *Supra* p. 574 n. 7.

four rows of female breasts. We are, of course, inclined to regard this effeminate form as a goddess, not a god, till we come to examine its counterpart on the second relief (fig. 497)[1]. That is a sunk panel of white marble surmounted by a pediment, found at Tegea near the temple of Athena *Aléa* and acquired in 1914 by the British Museum. In the centre of the relief stands a bearded god, definitely

Fig. 497.

inscribed *Zeús*. He faces us, in *chitón* and *himátion*, holding a double axe over his right shoulder and a spear in his left hand. A small piece of marble, filling the space between the head and the edge of the panel, suggests a *kálathos*. Round his neck Zeus wears a large necklace. On his chest, and apparently outside his *chitón*, he has six

H. Smith 'Some recently acquired reliefs in the British Museum' in the *Journ. Hell. Stud.* 1916 xxxvi. 67—70 fig. 1 f. My fig. 497 is from a photograph kindly supplied to me by Mr Smith. The inscriptions are published by F. Hiller von Gaertringen in the *Inscr. Gr. Arc. Lac. Mess.* ii no. 89 and by F. H. Marshall *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1916 iv. 2. 116 no. 950.

breast-like protuberances. M. Meurer[1] and A. H. Smith[2] have attempted to explain these as some sort of pectoral ornament. But Wood's relief is really conclusive in favour of admitting them to be female breasts[3]. Zeus is flanked by two smaller figures, who look towards him with gestures of adoration. The inscriptions, *Idrieús* and *Áda*, show that they are the king and queen of Karia, who were reigning together between 351 and 344 B.C.[4] As son and daughter of Hekatomnos, brother and sister of Maussollos, they naturally adore their ancestral god Zeus *Strátios* of Labranda. We cannot, however, suppose that this trumpery relief was a votive offering made by, or on behalf of, Carian royalty. Besides, how came it to be found at Tegea? In the absence of the lower half of the stone, which doubtless gave the circumstances of the dedication, certainty is unattainable. But P. Foucart has put forward a very plausible hypothesis[5]. Skopas, who is known to have decorated the temple of Athena *Aléa* before he worked at the Mausoleum, probably took with him from Tegea to Halikarnassos some of his best workmen. One of these, on returning to his native town, consecrated to the goddess a *souvenir* of his Carian journey, as like as not executed by his own hand.

The *bizarre* type of a Zeus with matronal breasts must not be taken, with E. Gerhard[6], to imply an androgynous deity, nor merely, with P. Foucart[7], to betoken that 'c'est lui qui nourrit les êtres vivants, qui répand l'abondance.' It occurs again at *Suwasa* in Kappadokia, where H. Rott[8] discovered an arcuated rock-cut niche

[8] H. Rott *Kleinasiatische Denkmäler aus Pisidien, Pamphylien, Kappadokien und Lykien* Leipzig 1908 p. 253 f. fig. 92 (=my fig. 498): 'Dass das Christentum hier bereits eine alte Kultstätte vorfand, ist ersichtlich aus einer Götterfigur, die wir an der senkrechten Felswand hinter dem Dorf ausgehauen fanden. In einer rundbogigen Nische sitzt eine Gottheit, die den linken Arm erhoben hatte. Der Oberkörper ist unbekleidet und zeigt Reste von Brüsten, ein faltiges Gewand fällt über Schoss und Kniee hinab. Vier Stufen führten zur Statue hinauf, der Raum davor ist geebnet und die Felswände rings geglättet... Ich halte die Figur für den Zeus Stratios, dessen Kult in Kappadokien allenthalben verbreitet war.' On Zeus *Strátios* in Kappadokia etc. see *in primis* F. Cumont 'Le

(fig. 498) containing a seated effigy of Zeus *Strátios* (?). The left arm is raised. The lower limbs are wrapped in a mantle. The upper part of the body is bare and shows remains of breasts. Here too we should infer that the Hellenic father-god had usurped the position of the Anatolian mother-goddess, and that local prejudice had to be

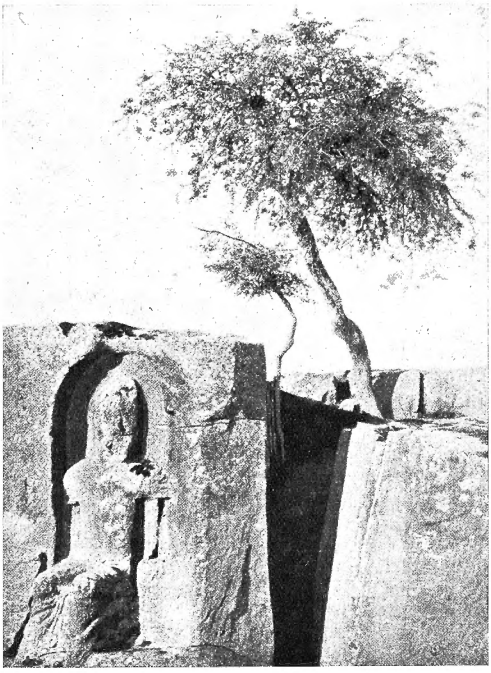

Fig. 498.

satisfied by the strange expedient of giving him 'the breasts of her consolations[1].' On occasion, no doubt, the old order triumphed over the new, and the resultant deity—despite his beard—was regarded as a goddess rather than a god. Thus at Zougo or *Zogui*, a village

Zeus Stratios de Mithridate' in the *Revue de l'histoire des religions* 1901 xliii. 47—57, F. Cumont—E. Cumont *Voyage d'exploration archéologique dans le Pont et la Petite Arménie* (*Studia Pontica* ii) Bruxelles 1906 pp. 171—184 ('Le temple de Zeus Stratios'), E. Kuhnert in Roscher *Lex. Myth.* iv. 1545—1550.

[1] Is. 66. 11.

near *Mersivan* at the entrance of the great marshy plain known to Strabon[1] as Chiliokomon and now called *Soulou-Ova*, F. Cumont[2] in 1900 photographed a crude relief (fig. 499), which represents a

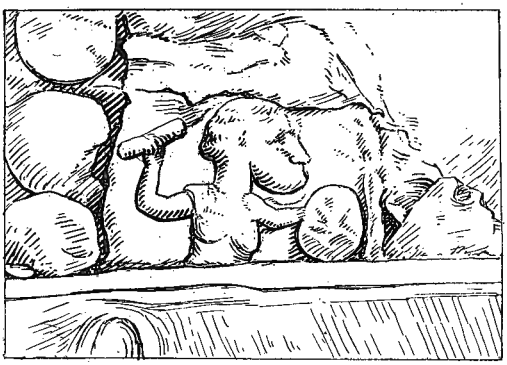

Fig. 499.

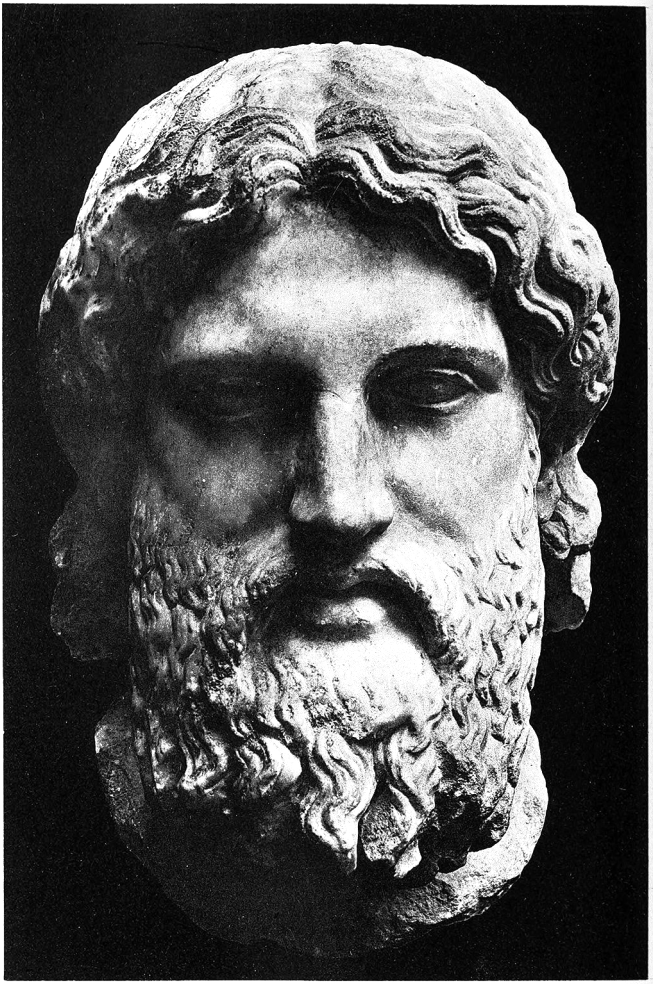
divinity, at once bearded and breasted, advancing from left to right with a thunderbolt brandished in one hand and a round shield grasped in the other. The accompanying dedication[3] describes this peculiar personage as *theá*, a 'goddess,' not *theós*, a 'god.'

[1] Strab. 561.

[2] F. Cumont—E. Cumont *op. cit.* p. 139 with fig. (=my fig. 499): 'il subsiste au village de *Zougo* un curieux morceau de sculpture. Ce bas-relief (H. env. $0^m,45$, L. $0^m,50$) est malheureusement placé derrière le tronc d'arbre creusé qui sert de lavoir communal et que nous ne pûmes faire enlever. On n'en aperçoit donc, dans notre reproduction, que la partie supérieure : le haut du corps d'un personnage à grosse tête barbue, brandissant le foudre de la main droite élevée et portant au bras gauche un bouclier rond. Le travail très grossier est manifestement l'œuvre d'un sculpteur indigène et j'inclinerais à reconnaître dans ce combattant quelque dieu anatolien ; peut-être l'ancêtre du Zeus Stratios, honoré dans ce pays à l'époque de Mithridate.'

[3] H. Grégoire 'Rapport sur un voyage d'exploration dans le Pont et en Cappadoce' in the *Bull. Corr. Hell.* 1909 xxxiii. 17: 'M. Cumont, en 1900, photographia au village de *Zougo*, à l'entrée du Χιλιόκωμον, un bas-relief de facture indigène et d'exécution très grossière, qui représentait une divinité anatolienne brandissant le foudre. Mais la moitié seulement de ce relief était visible. Nous le fîmes complètement dégager, et une inscription apparut, d'ailleurs fort effacée. Les premières lettres seulement en sont d'une lecture à peu près certaine : Ζώβη (ou Ζώγη?) *θεᾷ*. La ressemblance entre ce nom et le nom actuel du village (*Zougo* ou *Zogui*) est assurément frappante. La divinité représentée est féminine et cependant barbue. On peut rappeler que Zeus Stratios a été parfois vénéré sous la forme d'une idole androgyne.'

P. Foucart in the *Mon. Piot* 1910 xviii. 165 adds (after receipt of a photograph from F. Cumont): 'Quant à l'inscription, je pense, comme M. Cumont, qu'il vaut mieux considérer Ζώβη ou Ζωβη comme un nom propre féminin, à rapprocher du nom d'homme Ζώβεις qui se rencontre dans des inscriptions d'Olbia [*Corp. inscr. Gr.* ii no. 2079, 6]; les



Marble head of Zeus *Labráyndos* (?), found at Mylasa and now in the Boston Museum of Fine Arts.

See page 597 f.

Suwasa and *Zougo* were remote villages, where barbarism lingered to the last. But Mylasa under Hekatomnos was the chief city of Karia, and must needs move with the times. Accordingly, though the old cult-image of Zeus *Labráyndos* was still enshrined at Labranda, advancing civilisation began to demand that the god be represented after a newer and nobler pattern. Hekatomnos, as we have seen[1], placed an improved type of him on the satrapal coinage. And it is likely enough that other attempts were made to raise the ancient deity above the level of semi-barbaric art. Interesting proof of this upward tendency has recently come to light in connexion with a magnificent head of Zeus, which passed from private ownership into the Boston Museum of Fine Arts (pl. xxviii). A. Furtwängler, shortly before his death, made a detailed and penetrating study of this masterpiece[2]. His observations were to the following effect. The head is carved of a fine-grained marble, slightly bluish in tone. On the top of it is a round hole (5^{cm} deep, by $1-1\frac{1}{2}^{cm}$ broad) and further back an oblong dowel-hole (3^{cm} deep, 2^{cm} broad, 6^{cm} long). These marks presuppose that something light, made of metal, rested on the head: let us say, a *kálathos*. Probably, too, the groove that separates the front hair from the crown of the head implies a metal wreath[3]. The head (height of worked surface $0{\cdot}48^{m}$) was inserted in the neck of a statue, which presumably wore a *chitón* concealing the insertion. And, if a *chíton*, doubtless a *himátion* also. Since the god is turning his head somewhat towards his right, and since the right side of his head is more carefully finished than the left, it may be inferred that he was grouped with another figure, perhaps a seated female, on the left. The nearest stylistic parallels are to be found in the sculptures from the Mausoleum[4]. And Furtwängler

lettres *θεα* sont suivies d'autres lettres qui ne présentent aucun sens. Cette figure me paraît être une répétition grossière et altérée d'une divinité indigène, armée de la foudre, à la poitrine de femme et barbue, en un mot, d'un type assez voisin de celui du Zeus de Labranda.'

[4] Especially *Brit. Mus. Cat. Sculpture* ii. 126 no. 1054 pl. 20, 1, Collignon *Hist. de*

concludes that the artist was in all probability an Attic sculptor of the fourth century B.C., representing a non-Attic Zeus, some such deity as the Carian Zeus *Labráyndos* with *kálathos*, *chitón*, and *himátion*. 'In the new head from Asia Minor,' he says, 'I think we can catch for the first time a clearly perceptible echo of Pheidias' great creation—not, of course, in the true Pheidiac style, but in the soft flowing lines of a contemporary of Praxiteles.' This mention of Zeus *Labráyndos* was a conjecture worthy of the great critic. A *post scriptum* by P. Arndt goes far to confirm it, *viz.*, a report from the previous owner of the head that it was actually discovered at Mylasa[1].

Zeus *Labráyndos* can hardly be separated from Zeus *Labránios*, whose precinct is still to be traced near Amathous in Kypros. The site was first detected by Cesnola. In 1877 he records[2]—

'another range of hills west of these ruins [*sc.* Amathous], on the summit of one of which, very difficult of ascent, situated between the two small villages of Aghios Dimitri and Fasuli[3], I found the ruins of an elliptical structure measuring twenty-seven feet by sixteen. Its area was strewn with pieces of broken statues, upon two of which an eagle was carved. I discovered also on the bases of two life-size statues to which the feet still adhered, Greek characters roughly but deeply cut in the calcareous stone (see Appendix). I should have liked to explore this spot thoroughly, as these ruins are not improbably those of a temple dedicated to Jupiter, but I had brought neither a tent nor provisions with me,' etc.

One looks in vain for the inscriptions to Cesnola's Appendix. They are in the Metropolitan Museum of Art at New York[4], and were published in 1883 by I. H. Hall[5], who adds important extracts from

la Sculpt. gr. ii. 334 fig. 169. The style of the Boston head is happily expressed in Furtwängler's words: 'Es ist nicht die straffe und unnahbare Hoheit der phidiasischen Epoche, nicht das ruhelose stürmische Wollen der Alexanderzeit, es ist ein freundliches, edel menschliches Wesen, das in schlichten, ruhigen und milden Formen hier sich ausspricht.'

[1] Hence P. Arndt infers that the head represents Zeus *Kários* or *Osogôa* or *Labráyndos* or *Strátios*. He cites the view of Overbeck *Gr. Kunstmyth.* Zeus p. 124 f. that the colossal torso of a seated male figure from the Mausoleum (*Brit. Mus. Cat. Sculpture* ii. 124 no. 1047), identified as a divinity—perhaps Zeus—by Sir C. T. Newton (*A History of Discoveries at Halicarnassus, Cnidus, and Branchidæ* London 1862 ii. 1. 221), was rightly regarded by K. L. von Urlichs (*Skopas' Leben und Werke* Greifswa'd 1863 p. 197 f.) as Zeus *Labráyndos*, the national god of Karia. But A. H. Smith *Brit. Mus. Cat. Sculpture* ii. 124 justly remarks that 'the figure would do equally well for Mausolos, or some other heroified ruler.'

[2] L. P. di Cesnola *Cyprus* London 1877 p. 285.

[3] Ohnefalsch-Richter *Kypros* p. 19 calls the village 'Pasoulla.'

[5] I. H. Hall 'A Temple of Zeus Labranios in Cyprus' in the *Journal of the American Oriental Society* 1885 xi Proceedings at New Haven, October 24—25, 1883 pp. clxvi—

Cesnola's note-book. As to the elliptical temple, it appears that—

'the ellipse is truncated at one end, through the middle of which end was the entrance. Near the other end, inside, against either wall and opposite each other, are the pedestals (probably) of the two statues referred to.'

These statues were votive offerings by a man named Oliasas[1] and another named Demetris and may be dated between the third and the fifth centuries A.D. Fragments of a third statue seem to belong to the cult-image, though neither head nor double axe[2] were found. Hall saw that Zeus *Labránios* is simply the Cypriote equivalent of Zeus *Labráyndos*[3], remarking that 'this part of Cyprus was settled by Carians or Lycians.'

Whether the Iupiter *Laprius* mentioned by Lactantius[4] is another form of the same deity, as M. Mayer[5] supposes, is doubtful. O. Höfer[6] would find in him a Zeus *Láphrios* comparable with Apollon *Láphrios* and Artemis *Laphría*. Others[7] have thought of the Cretan Zeus *Elaphrós*. And a corruption of Zeus *Lapérsios*[8] is a further possibility. All these and dozens of other names—Greek, Latin, Etruscan, Iberian, and Celtic—are regarded by W. Vollgraff[9] as metamorphoses of the same Protean *lábrys*.

[9] W. Vollgraff 'Λάβρυς' in the *Rhein. Mus.* 1906 lxi. 149—165—one of the wildest articles ever perpetrated in the name of 'Philologie.'

(θ) The double axe and the Labyrinth.

M. Mayer[1] was the first to suggest that the word *Labýrinthos*, the 'Labyrinth,' should be brought into the same connexion and so taken to denote 'the place of the Double Axe.' A few years later a similar view was expressed independently by P. Kretschmer[2]. And this opinion, despite certain doubts and difficulties[3], has won its way to almost universal acceptance[4]. I share in the general conviction, and am here concerned merely to emphasise two aspects of the central fact.

One is this. The Cretan *Labýrinthos* is the equivalent of the Carian *Labráynda*, *Lábranda* both in point of its main formative element (*lábrys*) and in point of its suffix (*nth* = *nd*)[5]. If, therefore, we were right in thinking that *Lábranda* was called 'the place of the Double Axe' because repeatedly struck by lightning[6], we must give a like explanation of *Labýrinthos*. The place where the lightning fell in the form of the sky-god's axe would be deemed specially sacred to the sky-god. And mimetic dances in his honour provide the requisite transition from *Labýrinthos*, 'the place of the Double Axe,' to the classical Labyrinth, a dancing-ground made by Daidalos

[1] M. Mayer in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii. 191 (Λαβύρινθος is for *Λαβρύνθιος, a possible adjectival form of Λάβρυς).

[2] P. Kretschmer *Einleitung in die Geschichte der Griechischen Sprache* Göttingen 1896 p. 404 (Λαβύρινθος is a Cretan corruption of the Carian Λαβρυνδος or its alternative form Λαβραυνυδος).

[3] See the objections summarised by Gruppe *Myth. Lit.* 1908 p. 266. *E.g.* G. de Sanctis in the *Rivista di filologia* 1902 xxx. 100 f. observes that the double axe is represented in other structures (Phaistos) of the Cretan civilisation beside the palace at Knossos; why then should this alone have been termed 'the House of the Double Axe'? And W. H. D. Rouse in the *Journ. Hell. Stud.* 1901 xxi. 274 notes 'the metathesis of *v* which is unexampled.' E. Assmann too in *Philologus* 1908 lxvii. 190 f. complains of 'Der Einschub, die Epenthese eines *v* zwischen *β* und *ρ*.' (But have we not an analogous case in *laburnum*? The ancients may have fancied a resemblance to the λάβρυς in its flowers. Cp. *βέλεκυς supra* p. 588 n. o.)

[4] It has commended itself not only to archaeologists such as Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 109, H. R. Hall *The Oldest Civilization of Greece* London 1901 p. 294 n. 1, *id. The Ancient History of the Near East* London 1913 p. 53 n. 6, *id. Ægean Archæology* London 1915 p. 152, R. Dussaud *Les civilisations préhelléniques dans le bassin de la mer Égée* Paris 1910 p. 209, etc., but also to professed philologists such as Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 256 and Boisacq *Dict. étym. de la Langue Gr.* p. 548.

R. M. Burrows *The Discoveries in Crete* London 1907 p. 117 ff. (with Appendix B by R. S. Conway) prefers to connect Λαβύρινθος, Λαβράυνδα, etc. with λαύρα, a 'passage,' Λαύρειον, a 'Passage place.' On this showing Λαβύρινθος, Λαβράυνδα would signify properly a 'place of Passages.' Phonetically this appears to be possible. But?

[5] P. Kretschmer *op. cit.* p. 293 ff., R. S. Conway in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 154 ff., A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 28 (citing Steph. Byz. Σύριινθος· πόλις Κρήτης but Πύριινδος· πόλις Καρίας).

[6] *Supra* p. 586.

for Ariadne[1]. The mediaeval maze with its *ciel*[2] still retains a vestige of the original significance.

Again, the whole history of the *lábrys* in Asia Minor shows that it was essentially the weapon of a god, not a goddess. And this holds good for Crete as well as for Karia[3]. The Cretan double axe was, in my opinion, primarily the attribute of Kronos[4] and only secondarily, if at all, the attribute of Rhea. With the fall of the 'Minoan' civilization the axe passed from the old sky-god Kronos to the new sky-god Zeus[5], throughout preserving its character as the tangible token of the lightning-flash.

(*i*) The double axe and the *labarum*.

In 312 A.D. Constantine the Great crossed the Alps to attack Maxentius and pitched his camp over against the Mulvian Bridge near Rome. Lactantius[6], a contemporary authority (*c.* 314 A.D.), is careful to add that October 27, the anniversary of the day on which Maxentius had been proclaimed emperor, was approaching and that the Quinquennalia, four-yearly contests in honour of Iupiter *Capitolinus*[7], were drawing to a close. These contests began on October 15 and were originally connected with the temple of Iupiter *Feretrius*[8], whose special attribute was the *feretrum* or cross-shaped trophy-stand[9] suggestive of the *spolia opima*. Such were the circum-

[1] *Supra* i. 481. [2] *Supra* i. 486.

[3] I agree with H. R. Hall *Ægean Archæology* London 1915 p. 152: 'Since the Double Axe, the λάβρυς, was the special emblem of the Carian Zeus at Labraunda, it would appear that this national weapon was (as would naturally be expected) the emblem of the god rather than of the goddess. The Knossian Palace was probably one of the chief seats of the worship of the god, and as such obtained its traditional name of λαβύρινθος, the Labyrinth, "the Place of the Double Axe."' Also with D. Mackenzie in the *Ann. Brit. Sch. Ath.* 1905—1906 xii. 219: 'the cult of the God of the Labrys or Double Axe, which was common to Caria with Crete, does not necessarily lead us to the assumption of derivation either way. On the hypothesis of racial affinity between the people of Caria and the prehistoric inhabitants of Crete, the cult of the divinity in question may be native to south-west Anatolia, equally with Crete, without any need for the perilous assumption that it was from Caria the divinity passed to Crete. If the assumption of derivation one way or the other were to be at all admitted, the probability in the circumstances would appear more feasible were the derivation regarded as having been the other way about.'

[4] *Supra* p. 543 ff. [5] *Supra* p. 554 ff.

[6] Lact. *de mortibus persecutorum* 44 imminebat dies quo Maxentius imperium ceperat, qui est a. d. sextum Kalendas Novembres, et quinquennalia terminabantur. commonitus est in quiete Constantinus, ut caeleste signum dei notaret in scutis atque ita proelium committeret. facit ut iussus est et transversa X littera, summo capite circumflexo, χῖ ῥῶ (so I would restore the manuscript's *xρο*. S. Baluzius defended *circumflexo Christo*. S. Brandt and G. Laubmann, after Cuperus and others, read *Christum*) in scutis notat. quo signo armatus exercitus capit ferrum.

[7] Cp. Suet. *Dom.* 4 instituit et quinquennale certamen Capitolino Iovi etc.

[8] Wissowa *Rel. Kult. Röm.*[2] p. 117.

[9] *Supra* p. 109.

stances in which Constantine had his famous dream. Lactantius continues:

'Constantine while resting was warned to put the celestial sign of God as a mark upon his shields and so to give battle. He did as he was bidden and, setting the letter X aslant and bending round its topmost end, marked *chî rhô* upon the shields. Armed with this sign his soldiers advanced to the fight.'

The sign intended is almost certainly ☧[1], and it is highly probable that in this we should recognise a time-serving modification of Iupiter's trophy-cross.

Eusebios ten years later (*c.* 324 A.D.)[2] omits the dream, but states that after the victory over Maxentius Constantine had his own statue erected in the most public place at Rome with 'the trophy of the Saviour's passion' beneath his hand and 'the saving sign of the cross' on his right hand, a Latin inscription imputing his success 'to this sign of salvation, this true token of valour.'

The same author in his *Life of Constantine* (337 A.D.)[3] claims to

[1] E. Venables in Smith—Cheetham *Dict. Chr. Ant.* ii. 909 says: '"transversa X litera, summo capite circumflexo (*i.e.* with a line drawn through the middle and turned into a loop at the top, forming the letter *Rho*) Christum in scutis notat."' We thus obtain ☧, no doubt; but we cannot legitimately extract it from Lactantius' Latin,—at least I do not see how *transversa X litera* is to mean 'a line being drawn through the letter X.'

B. Schremmer *Labarum und Steinaxt* Tübingen 1911 p. 1: 'also ⋊ oder ☧.' But the first of these two is surely excluded by *summo capite*; for, if X be laid on its side as ✕, it has, to speak strictly, no *summum caput*.

[2] Euseb. *hist. eccl.* 9. 9 *αὐτίκα <τὸ (inserui)> τοῦ σωτηρίου τρόπαιον πάθους ὑπὸ χεῖρα ἰδίας εἰκόνος ἀνατεθῆναι προστάττει· καὶ δὴ τὸ σωτήριον τοῦ σταυροῦ σημεῖον ἐπὶ τῇ δεξιᾷ κατέχοντα αὐτὸν ἐν τῷ μάλιστα τῶν ἐπὶ Ῥώμης δεδημοσιευμένῳ τόπῳ στήσαντες, αὐτὴν δὴ ταύτην ὑπογραφὴν ἐντάξαι ῥήμασιν αὐτοῖς τῇ Ῥωμαίων ἐγκελεύεται φωνῇ· 'τούτῳ τῷ σωτηρώδει σημείῳ, τῷ ἀληθινῷ ἐλέγχῳ τῆς ἀνδρείας, κ.τ.λ.'* Cp. the parallel description in Euseb. *v. Const.* 1. 40.

[3] Euseb. *v. Const.* 1. 28—31 trans. E. C. Richardson (in H. Wace—P. Schaff *A select Library of Nicene and post-Nicene Fathers of the Christian Church* Oxford—New York 1890 i. 490 f.). The actual sign and the imitation of it are described in the following terms: 1. 28 *ἀμφὶ μεσημβρινὰς ἡλίου ὥρας, ἤδη τῆς ἡμέρας ἀποκλινούσης, αὐτοῖς ὀφθαλμοῖς ἰδεῖν ἔφη ἐν αὐτῷ οὐρανῷ ὑπερκείμενον τοῦ ἡλίου σταυροῦ τρόπαιον ἐκ φωτὸς συνιστάμενον, γραφήν τε αὐτῷ συνῆφθαι λέγουσαν· τούτῳ νίκα.... 1. 31 ἣν δὲ τοιῷδε σχήματι κατεσκευασμένον. ὑψηλὸν δόρυ χρυσῷ κατημφιεσμένον κέρας εἶχεν ἐγκάρσιον [σταυροῦ σχήματι πεποιημένον (seclusit* J. A. Heikel)], *ἄνω δὲ πρὸς ἄκρῳ τοῦ παντὸς στέφανος ἐκ λίθων πολυτελῶν καὶ χρυσοῦ συμπεπλεγμένος κατεστήρικτο, καθ' οὗ τῆς σωτηρίου ἐπηγορίας τὸ σύμβολον, δύο στοιχεῖα τὸ Χριστοῦ παραδηλοῦντα ὄνομα [διὰ τῶν πρώτων ὑπεσήμαινον χαρακτήρων (seclusit* J. A. Heikel)], *χιαζομένου τοῦ ῥῶ κατὰ τὸ μεσαίτατον· ἃ δὴ καὶ κατὰ τοῦ κράνους φέρειν εἴωθε κἀν τοῖς μετὰ ταῦτα χρόνοις ὁ βασιλεύς. τοῦ δὲ πλαγίου κέρως τοῦ κατὰ τὸ δόρυ πεπαρμένου ὀθόνη τις ἐκκρεμὴς ἀπηώρητο, βασιλικὸν ὕφασμα ποικιλίᾳ συνημμένων πολυτελῶν λίθων φωτὸς αὐγαῖς ἐξαστραπτόντων καλυπτόμενον σὺν πολλῷ τε καθυφασμένον χρυσῷ, ἀδιήγητόν τι χρῆμα τοῖς ὁρῶσι παρέχον τοῦ κάλλους. τοῦτο μὲν οὖν τὸ φᾶρος τοῦ κέρως ἐξημμένον σύμμετρον μήκους τε καὶ πλάτους περιγραφὴν ἀπελάμβανε· τὸ δ' ὄρθιον δόρυ, τῆς κάτω ἀρχῆς ἐπὶ πολὺ μηκυνόμενον ἄνω μετέωρον, ὑπὸ τῷ τοῦ σταυροῦ τροπαίῳ πρὸς αὐτοῖς ἄκροις τοῦ διαγραφέντος ὑφάσματος τὴν τοῦ θεοφιλοῦς βασιλέως εἰκόνα χρυσῆν μέχρι στέρνων τῶν τ' αὐτοῦ παίδων ὁμοίως ἔφερεν.*

have had a detailed account of the vision from the lips of the victor himself:

'He said that about noon, when the day was already beginning to decline, he saw with his own eyes the trophy of a cross of light in the heavens, above the sun, and bearing the inscription, CONQUER BY THIS. At this sight he himself was struck with amazement, and his whole army also, which followed him on this expedition, and witnessed the miracle. He said, moreover, that he doubted within himself what the import of this apparition could be. And while he continued to ponder and reason on its meaning, night suddenly came on; then in his sleep the Christ of God appeared to him with the same sign which he had seen in the heavens, and commanded him to make a likeness of that sign which he had seen in the heavens, and to use it as a safeguard in all engagements with his enemies. At dawn of day he arose, and communicated the marvel to his friends: and then, calling together the workers in gold and precious stones, he sat in the midst of them, and described to them the figure of the sign he had seen, bidding them represent it in gold and precious stones. And this representation I myself have had an opportunity of seeing. Now it was made in the following manner. A long spear, overlaid with gold, formed the figure of the cross by means of a transverse bar laid over it. On the top of the whole was fixed a wreath of gold and precious stones; and within this, the symbol of the Saviour's name, two letters indicating the name of Christ by means of its initial characters, the letter P being intersected by X in its centre: and these letters the emperor was in the habit of wearing on his helmet at a later period. From the cross-bar of the spear was suspended a cloth, a royal piece, covered with a profuse embroidery of most brilliant precious stones; and which, being also richly interlaced with gold, presented an indescribable degree of beauty to the beholder. This banner was of a square form, and the upright staff, whose lower section was of great length, bore a golden half-length portrait of the pious emperor and his children on its upper part, beneath the trophy of the cross, and immediately above the embroidered banner. The emperor constantly made use of this sign of salvation as a safeguard against every adverse and hostile power, and commanded that others similar to it should be carried at the head of all his armies[1].'

The celestial sign described by Eusebios as 'the trophy of a cross of light' may be identical with that described by Lactantius. But the standard made in imitation of it was more elaborate and involved some new features. In particular, while retaining the old *feretrum* or trophy-cross as the support for an embroidered banner, it added at the top of all a wreath containing the monogram ☧. And this fresh symbol was from the outset accepted as an essential part of the Christian standard. C. M. Kaufmann[2], building on the labours of F. W. Madden[3], has constructed a useful chronological table of

[1] See further Euseb. *v. Const.* 2. 3, 2. 6—9, 2. 12, 4. 21, Sokr. *hist. eccl.* 1. 2 (lxvii. 37 Migne), Sozom. *hist. eccl.* 1. 3 f. (lxvii. 865, 868 Migne), Gelasios of Kyzikos 1. 4 (lxxxv. 1204 B—C Migne).

[3] F. W. Madden 'Christian Emblems on the Coins of Constantine I. the Great, his Family, and his Successors' in the *Num. Chron.* New Series 1877 xvii. 11—56 pl. 1, 242—307 pl. 7 f., *ib.* 1878 xviii. 1—48 pl. 1 f., 169—215 pls. 8—10.

the monograms and crosses found on the coinage of Constantine etc. He maintains that already in 312(?)—317 the forms ☧ ☧ ✳ × occur on coins struck at Siscia in Pannonia Superior, the form ✳ on others struck at Tarraco on the east coast of Spain. But J. Maurice in his great work on Constantinian numismatics has given grounds for placing these mintages a few years later. According to him, the eighth issue at Siscia, comprising coins struck from 317 to 320, decorates the helmet of the emperor with two distinct forms of the Christian monogram—☧ for *CHRistós* on the central band and ☧ for *Iesoûs CHristós* to either side of it (fig. 501)[1], whereas the sixth issue at Tarraco, comprising coins struck between 320 and 324, has

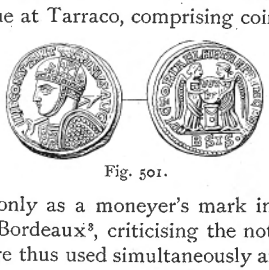

Fig. 501.

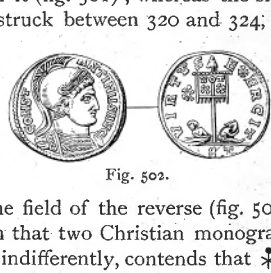

Fig. 502.

☧ only as a moneyer's mark in the field of the reverse (fig. 502)[2]. P. Bordeaux[3], criticising the notion that two Christian monograms were thus used simultaneously and indifferently, contends that ☧ is a regularised form of ☧, which is merely ☧ writ small. Bordeaux may well be right. In any case the monogram ☧ underwent many variations of shape, not on coins alone, but on monuments of all sorts[4]. A few fourth-century examples, found in our own country, are listed by T. Morgan and J. Romilly Allen[5]. Thus a fine mosaic pavement in the *exedra* of a Roman villa at Frampton in Dorset associates the Christian monogram (fig. 505) with the head of Neptunus and other pagan designs[6]. Again, in another villa at Chedworth

discussed. Gibbon[1] long since noted 'the efforts of the critics, who have ineffectually tortured the Latin, Greek, Spanish, Celtic, Teutonic, Illyric, Armenian, &c. in search of an etymology.' And E. Venables[2] as late as 1908 declared it to be 'most probably of Basque origin'! Meantime in 1903 E. Conybeare[3] had solved the problem: a modest foot-note in his *Roman Britain* puts the matter in a nutshell—'The Sacred Monogram known as *Labarum*. Both name and emblem were very possibly adapted from the primitive cult of the Labrys, or Double Axe, filtered through Mithraism.' The value of this acute suggestion obviously depends on the possibility of citing, not merely isolated examples of the Constantinian monogram from dates prior to that of Constantine[4], but rather a connected series of formal links between the *lábrys* and *labarum*. Accordingly in 1908 I published the following diagram (fig. 510)[5], which inserts a series of intermediate symbols taken in chronological order from the coinage of the Graeco-Scythian kings (*s.* iii—i B.C.). E. Rapp[6] had already in 1866 brought these symbols into connexion with the *labarum*, though not with the *lábrys*, and had assumed that they were solar

[10] In Euseb. *v. Const.* ind. p. 5, 4 f. Heikel λα'. *Ἔκφρασις σταυροειδοῦς σημείου, ὅπερ νῦν οἱ Ῥωμαῖοι λάβαρον καλοῦσιν* codd. T.V. read λάβορον, but V^2 has α over the first ο.

A Latin form with *o* is attested by Greg. Naz. *or.* 4 (*contra Iulianum* 1). 66 (xxxv. 588 A—B Migne) *τολμᾷ δὲ ἤδη καὶ κατὰ τοῦ μεγάλου συνθήματος, ὃ μετὰ τοῦ σταυροῦ πομπεύει, καὶ ἄγει τὸν στρατὸν εἰς ὕψος αἰρόμενον, καμάτων λυτήριον ὄν τε καὶ κατὰ Ῥωμαίους ὀνομαζόμενον καὶ βασιλεῦον, ὡς ἂν εἴποι τις, τῶν λοιπῶν συνθημάτων ' κ.τ.λ.* And Ducange *loc. cit.* quotes *laborum* for *labarum* from sundry late sources. In cod. Theod. 6. 25 de praepositis laborum (=cod. Iustin. 12. 18) qui...praeposuit laborum nostro iudicio et stipendiorum sudoribus promoventur the manuscripts' reading *laborum* has been defended by the fifth-century *carmen de Iona* (formerly ascribed to Tertullian) 40 f. palpitat antemna stridens, labor horret ab alto, | ipsa etiam infringi dubitans inflectitur arbor. But in cod. Theod. we should probably read the gen. plur. *laborum* and in *carmen de Iona* the nom. sing. *laborum*.

emblems adopted as an equivocal device by an emperor who wished to conciliate pagans and Christians alike. Finally in 1911 B. Schremmer[1], not realising that he had been anticipated by E. Conybeare, announced the derivation of *labarum* from *lábrys* as a discovery of his own[2]. He is, however, right in insisting[3], as against Rapp, that the Graeco-Scythian symbols are not solar signs at all, but mere

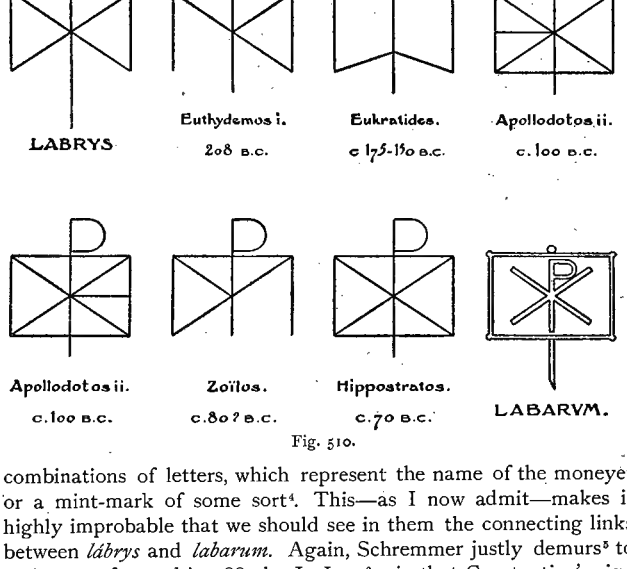

Fig. 510.

combinations of letters, which represent the name of the moneyer or a mint-mark of some sort[4]. This—as I now admit—makes it highly improbable that we should see in them the connecting links between *lábrys* and *labarum*. Again, Schremmer justly demurs[5] to a view put forward in 1884 by L. Jeep[6], *viz.* that Constantine's sign ☧ was not, originally at least, a Christian monogram, but a semi-cursive form of the astrological symbol ☿, which stands for the

lucky star of Venus[1]. Having disposed of a solar and of a stellar hypothesis, Schremmer attacks the problem *de novo*, indeed *ab ovo*. Surveying the whole history of the double axe, he argues that in the Stone Age and the Bronze Age it was worshipped first as 'ein selbständiges Zauberwerkzeug[2]' and then as the attribute of some deity; that in Asia Minor, to judge from numismatic evidence, the sacred weapon, there called the *lábrys*, survived, usually as a divine attribute, far into the historic period (*c.* 400 B.C.—*c.* 200 A.D.); that it received a fresh lease of life from its association with Iupiter *Dolichenus*, the Roman army taking it, under its old name[3], as his attribute through Pannonia and Raetia into Germany and Gaul; that in the north like met like, when the double axe of Iupiter encountered the hammer of Donar; and that from the north Constantine brought a military *signum*, bearing the ancient name of *labarum*, to which later the monogram of Christ was attached. Very ingeniously, but also very improbably, Schremmer supposes that Constantine ascribed his victories to the possession of an actual *lábrys* and finds a distorted allusion to it in a curious passage of Nikephoros Kallistos[4]. That belated historian (*s.* xiv A.D.) tells how Constantine brought a big porphyry pillar from Rome to Constantinople[5], set upon it a bronze effigy of himself holding in his right hand a large golden apple surmounted by the cross, and buried beneath its base a variety of sacred relics including 'the axe with which Noah made the ark.' The big pillar still stands in a square at *Stamboul* marking the site

[1] This symbol, usually regarded as the mirror of Venus (A. Bouché-Leclercq *L'astrologie grecque* Paris 1899 p. xix), is explained by Jeep *loc. cit.* p. 89 as a derivative of ϕ (=*φωσφόρος*).

[2] B. Schremmer *op. cit.* p. 21.

[3] *Id. ib.* p. 40 notes *Labirus* as the name of a god worshipped near Emona (*Laibach*) in Pannonia Superior (Orelli *Inscr. Lat. sel.* no. 2017=Dessau *Inscr. Lat. sel.* no. 4877 =*Corp. inscr. Lat.* iii no. 3840 Laburo | ex vot. | sacr. | etc.), *Labaro* (?) as perhaps the name of a god in a Spanish inscription (M. Ihm in Roscher *Lex. Myth.* ii. 1775 citing *Corp. inscr. Lat.* ii no. 732 (*San Vincente* near Norba in Lusitania) Labaro. n. e. n. | leg. p(ro ?). s(e ?). s(uisque ?). l. m), and *Labarus* as the name of a Gallic soldier (Sil. It. 4. 232).

[4] Nikephoros Kallistos *hist. eccl.* 7. 49 (i. 519 f. Ducaeus) *ἐν δὲ τῷ ἐπιλεγομένῳ ἐς δεῦρο Κωνσταντινείῳ φόρῳ καὶ τὸν πορφυροῦν μέγιστον κίονα ἀναστήσας, ὃν ἐκ Ῥώμης ἠγάγετο, ἐπὶ τούτῳ τὸν ἑαυτοῦ ἀνδριάντα ἀνίστη πεποιημένον χαλκοῦ. ἐν ᾧ καὶ χρύσεον μῆλον μέγιστον τῇ δεξιᾷ κατέχων χειρὶ ἐπάνω τὸν τίμιον κατεπήγνυ σταυρὸν ἐπιγράψας ταῦτα· 'σοί, Χριστὲ ὁ Θεός, παρατίθημι τὴν πόλιν ταύτην.' ἀψῖσι δὲ στερραῖς τέσσαρσι τὴν τοῦ στύλου περικύκλῳ βάσιν ἐδράσας, ὑποκάτω τῆς τοῦ στύλου βάσεως τοὺς ιβ' κοφίνους καὶ τὰς ζ' σπυρίδας, ἔτι δὲ καὶ τοὺς ζ' ἄρτους, οὓς εὐλογίας καταξιώσας Χριστὸς τὰ πλήθη διέθρεψεν, ἔτι δὲ καὶ τὴν τοῦ Νῶε ἀξίνην, ᾗ τὴν κιβωτὸν ἐτεκτήνατο, αὐτὸς ἰδίαις χερσὶν ὁ βασιλεὺς τῷ σφραγιστῆρι σημάνας κατέθετο· καὶ νῦν ἐς ἐμὲ τῇ πόλει ἄσυλος θησαυρὸς παραμένουσι.*

of Constantine's Forum[1]. But it is a charred ruin[2]. The statue on it was upset by a great south wind in 1105 A.D.[3] The porphyry drums were encircled by bands of iron before 1561 A.D.[4] The four marble steps then visible[5] were concealed, probably after the fire of 1779 A.D., by a clumsy cloak of masonry[6]. Does the base yet guard the axe of Noah as part of its 'inviolable treasure"?

Schremmer looks to the Germanic north for an explanation of the *labarum*. I should look rather to the east, where Constantine had served under Galerius for the best part of a decade (296—306 A.D.). When we remember, on the one hand, the *rôle* played by the double axe in the religion of Phrygia[8], on the other, the fact that Noah in the ark appears on coins of the Phrygian Apameia Kibotos from the end of the second to the middle of the third century A.D.[9], it does not seem extravagant to conjecture that the axe of Noah was but the ancient Anatolian *lábrys*, in a novel Jewish disguise. Indeed, it is more than probable that in the near east the cult of the *lábrys*, under various modifications, lingered on throughout the early centuries of the Christian era. F. Legge[10] has recently drawn attention to the Ophite diagram of the supramundane region, which included two pairs of concentric circles, the one pair inscribed 'Father' and 'Son,' the other pair coloured yellow and blue, and between them a barrier in the form of a double axe[11]. The original

home of the Ophites was Phrygia[1]; and there can be little doubt that in this, the central portion of their otherworld chart, they sought to combine old Phrygian beliefs with new Christian teaching[2]. The appearance of a *lábrys* in such a context is in the highest degree significant: it attests precisely the same spirit of accommodation that we detect in the Constantinian *labarum*. Another Gnostic reminiscence of the double axe has been recognised by F. de Mély[3] in the

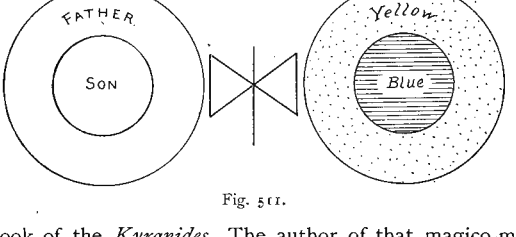

Fig. 511.

first book of the *Kyranides*. The author of that magico-medical compilation, who writes under the name of Hermes *Trismégistos* (the late Greek equivalent of the Egyptian Thoth)[4] at some date prior to *c.* 408 A.D.[5], informs us in his prologue that he has put together the book of Kyranos king of Persia[6] and another book dedicated by Harpokration of Alexandreia[7] to his own daughter.

ἀνωτέρω κύκλων ἐπιγεγραμμένα, ἄλλα τε καὶ δύο ἄπτα, μεῖζόν τε καὶ μικρότερον υἱοῦ καὶ πατρός.' εὕρομεν δ' ἡμεῖς ἐν τούτῳ τῷ διαγράμματι τὸν μείζονα κύκλον καὶ τὸν μικρότερον, ὧν ἐπὶ τῆς διαμέτρου ἐπεγέγραπτο 'πατὴρ' καὶ 'υἱός,' καὶ μεταξὺ τοῦ μείζονος, ἐν ᾧ ὁ μικρότερος ἦν, καὶ ἄλλου συγκειμένου (so. P. Koetschau, after E. Bouhéreau, for *ἄλλους συγκειμένους* cod. A.) *ἐκ δύο κύκλων, τοῦ μὲν ἐξωτέρου ξανθοῦ τοῦ δὲ ἐνδοτέρω κυανοῦ, τὸ ἐπιγεγραμμένον διάφραγμα πελεκοειδεῖ σχήματι, κ.τ.λ.*

[4] W. Kroll in Pauly—Wissowa *Real-Enc.* viii. 792 ff.

[5] F. de Mély *Les Lapidaires de l'antiquité et du moyen âge* Paris 1902 iii. 1. lxxi notes that the *Kyranis* is quoted *c.* 408 A.D. by Olympiodoros (M. Berthelot—C. E. Ruelle *Collection des anciens Alchimistes grecs* Paris 1888 Texte grec p. 101, 13 n. and 17 (Traduction p. 110) Olympiod. 52 *ἐν τῇ Κυρανίδι...ἐν τῇ ἀρχαϊκῇ βίβλῳ*).

Quis? F. de Mély *op. cit.* Paris 1902 iii. 1. lxxii conjectures that Kyranos may have something to do with Keï Kaous, a Persian king described by the Mobed Bahram as belonging to the dynasty of the Keïanides and living in the age of Solomon (J. Mohl in the *Journal Asiatique* Troisième Série 1841 xi. 321 ff.).

[7] C. Graux held that the Harpokration in question was the writer of the letter *Ἁρποκρατίων Καίσαρι Αὐγούστῳ* (*sc.* Julian) *χαίρειν κ.τ.λ.* (*Rev. Philol.* N.S. 1878 ii. 65 ff.), to be identified both with the Egyptian friend of Libanios (O. Seeck in Pauly—Wissowa

The double axe and the *labarum*

The extant text[1] shows that both sources contained a ritual invocation of the vine couched in poetic and to a large extent rhythmic language:

'The white vine has other orderly and most charming effects, making a man in his cups to be not only sober but merry as well. Thus far Kyranos. But from the aforesaid point, where my authorities diverged, this is how Harpokration continues: "*Blessed plant, leader of the gods, mistress of earth, sky, and air, thou that relaxest the mind by thy cluster-bearing drink, so loosening every limb, and causest sleep, no one by word, no healer by potion, nay none shall prevail against thee; but thou bringest to light all that is in the souls of mortal men, and of them that have mystic thoughts in secret thou, o Vine, having knowledge un-*

Real-Enc. vii. 2410) and with the Alexandrine rhetorician Valerius Harpokration (H. Schultz *ib.* vii. 2412 ff.). F. de Mély *op. cit.* Paris 1902 iii. 1. lxx ff. thinks that the Harpokration of the *Kyranides* may have come from Alexandreia near Babylon. *Non liquet.* See Gossen in Pauly—Wissowa *Real-Enc.* vii. 2416 f.

[1] F. de Mély *op. cit.* Paris 1898 ii. 1. 10, 7 ff. = *Kyran.* 1. A. 28. ἡ δὲ λευκὴ ἄμπελος ἔχει καὶ ἄλλας ἐνεργείας κοσμικὰς καὶ χαριεστάτας, ὥστε ἐν πότοις μὴ μόνον νηφάλιον εἶναί τινα, ἀλλὰ καὶ εὐωχίαν ἔχειν. 29. ἕως ἐνταῦθα μὲν ὁ Κυρανὸς οὕτως· ἀπὸ δὲ τῆς ἀνωτέρω γραφείσης τῶν ἀμφοτέρων διαφωνίας εἶχεν· ἐκεῖ (*an leg.* διαφωνίας ἔχει? The old Latin version gives: redarguis quaecumque sunt in animis mortalium et quae absconditae habent mysteria mentis. The sense seems to demand something like *τῶν δ' ἐγκρύφως ἐχόντων μυστικὰς φρένας τὴν <γνῶσιν> ἀρρήτως ἔχουσα* A. B. C.), *πάντ' ἐκφανεῖς μόναις ὅσα γραφαῖς ἢ φαρμάκοις γίνεται, ἢ φασγάνῳ ἢ πελέκει ὅσα τοιαῦτα κρύβεται. ταῦτα μὲν λελέχθω ἀμπέλου μυστήρια.*' ἔχει δὲ ἄλλα κοσμικά, ὡς ἐν βροτοῖς μὴ φαῦλον εἰπεῖν. 31. λέγει δὲ οὕτως ἐντεῦθεν ὁ ἱερὸς λόγος, καθώσπερ [γὰρ] εἶχεν καὶ ἡ Κυρανίς· '*μάκαιρα ἐκ θεοῦ ἄνασσα, ἐκ θεοῦ βοτρυοφόρε μήτηρ ἀπάσης θείας φύσιος †εὐαγοῦς ἐν φυτοῖς· τῇ πρώτῃ ἑάων ἱερεῖ· εὖ...ντο Ὀλύμπιος οὖσα†* (F. de Mély comments: '*ἑάων* pour *ἐήων*, bonorum (?).—*ἱερεῖ* A (?), R. F. l. *ἕδρει*?— *...ντο*] piqûre de ver A; *ἕως το* ὁλ. R.—Rédaction de l'hymne dans C: *Μάκαιρα ἐκ θεῶν ἄνασσα, μητὴρ θεῖα εὐηρεα ἐν φ. ἡ πρώτη εὔεα, ὄλυμπον οὖσα.*—Dans v. i.: Beata a Deo donata Regina, ex Deo botrum ferens, mater sacerrima et divinior omnibus plantis, natura prima botrum affectat, botrus vinum cœleste facit.' One might suspect that we have in the text remnants of a hexameter tag, *e.g. τῇ πρώτῃ <δωτῆρες> ἑάων | ἱρεύσαντο <θεοί ποτ'> Ὀλύμπια <δώματ' ἔχ>οντες*, were it not that from section 38 *infra* we can restore *ευα, γῆς ἐν φυτοῖς ἡ πρώτη, εαωε ιεω ευηιε, Ὀλυμπία οὖσα* or the like A. B. C.). 32. *ταῦτα εἶπας εἰς ποτήριον, βάλε εἰς κεράμιον, ὅθεν πίνουσιν ἅπαντες, καὶ ἀναλύουσιν εὐφρανθέντες, μηδενὸς συζητήσαντος.... 38. ἡ δὲ τοῦ Κυρανοῦ περὶ εὐφρασίας στήλη εἶχεν οὕτως· ὦ θειοτάτη βοτάνη βοτρυοφόρε, ἄμπελος λευκή, [ἡ] μῆτερ τῶν βοτανῶν, εὐδιε κυβαλητφόρε, γῆς ἐν φυτοῖς ἡ πρώτη. λέγε εἰς ποτήριον τοὺς λόγους τούτους· ἐυηὶ εὐοινὸν* (F. de Mély cj. *εὔοινον*) *φρενῶν μοῦ τήρησον ἀβλάβειαν εἶναι ευηιὲ Ὀλυμπία οὖσα, συντήρησόν μου νοὸς φρένας, εὔθυμος οὖσα καὶ θειοτάτη καὶ ὑγιής. ὑι εὖ ἀὲ ἰαυὼ αέ κιεὼ· ἑάωε (ευεὶ ευαε ἰαύω ηιαώ ἡ ἀυὲ* cod. R.). *ταῦτα εἰς ποτήριον οἴνου ἐπειπών, βάλε εἰς κεράμιον οἴνου, ὅθεν πίνουσιν ἅπαντες καὶ ἀναλύουσιν ἅπαντες εὐφρανθέντες οἱ φίλοι, μηδενὸς συζητήσαντος.* The invocation of section 30 is in cod. R. entitled *ὕμνος εἰς βρυωνίαν*. Those of sections 31 and 38 conclude with certain musical phrases, on which see C. E. Ruelle 'Le chant des sept voyelles grecques d'après Démétrius & les papyrus de Leyde' in the *Rev. Ét. Gr.* 1889 ii. 38 ff., *id.* 'Note additionnelle sur le chant des sept voyelles grecques' *ib.* 1889 ii. 393 ff., C. E. Ruelle—E. Poirée *Le chant gnostico-magique des sept voyelles* Paris 1901.

utterable wilt reveal all that is wrought by writings unique or sovereign remedies, yea all the hidden meaning of knife or double axe. Let these words be said as the mysteries of the Vine." It has also other orderly virtues, so that among mortals its name must not be taken in vain. Next, the sacred account, as given in the *Kyranis*, saith as follows: "*Blessed God-sent queen, God-sent cluster-bearing mother of every divine nature—EUA—thou that art foremost among plants of earth—EAŌE IEŌ EUĒIE—being a denizen of Olympos.*" Having said this into a cup, empty it into a jar, whence all drink and depart with good cheer, no man having come to words.'

Harpokration's allusion to 'the hidden meaning of knife or double axe' as 'the mysteries of the Vine' certainly seems to imply some *quasi*-Dionysiac survival of the *lábrys*. It is unfortunate that further details are wanting.

One other fact in connexion with the double axe should here be noted. Its pictograph passed readily into linear forms, and thence into syllabic and alphabetic characters. Sir Arthur Evans[1] has pointed out that the Aegean ⧖ or ⧗ is comparable with ⧗ the Sabaean form of the Semitic letter *zain*, whose name is held to denote 'a twofold weapon.' It follows that the double axe was the original source, from which was derived, not only the Phoenician 𐤆, but also the shape (though not the name) of the Greek Ξ or Ζ, the Latin Z, and the English Z[2]. Again, the monograms above cited from the Graeco-Scythian coinage of Bactria and India (*s.* iii—i B.C.) were clearly suggested in the first instance by the outline of a double axe[3]. Simias of Rhodes (*c.* 295 B.C.) even arranged a whole poem on the axe of Epeios in such a way as to resemble its two-bladed subject[4].

Suppose, then, that Constantine during his stay in the east had observed the double axe, a symbol of ancient and mysterious sanctity with a marked tendency to take on the shape of definite letters, he might well enough think of adopting it as a sign that would appeal at once to pagans and to Christians. For, just as the trophy-cross, symbol of Iupiter *Feretrius*, was modified into the

[1] Sir A. J. Evans in the *Journ. Hell. Stud.* 1894 xiv. 365 f., *id. Scripta Minoa* Oxford 1909 i. 81, 86 f. fig. 41.

[2] Other forms that fall to be considered are the Iberian ⋈ ⋈ ⋈ ⋈ *mem* on coins of the Turdetani (P. Berger *Histoire de l'écriture dans l'antiquité* Paris 1891 p. 336, Sir A. J. Evans *Scripta Minoa* i. 99 fig. 44*), the Cypriote ⧗ *le* (*id. ib.* i. 71 fig. 39), the Sicyonian ⧗ *epsilon* (Roberts *Gk. Epigr.* i. 136), the Venetic, Sabellian, Etruscan, and Faliscan sibilant ⋈ (J. Schmidt in Pauly—Wissowa *Real-Enc.* i. 1617 ff.), and the Latin numeral ⋈ *mille* (J. C. Egbert *Introduction to the Study of Latin Inscriptions* London—Bombay 1896 p. 75). Of course, it must not be hastily assumed that similar characters are of similar origin.

[3] *Supra* p. 608.

[4] C. Haeberlin *Carmina Figurata Graeca* Hannoverae 1887 p. 70.

Christian monogram ☧[1], so the double axe, symbol of the Anatolian Zeus, could be easily transformed into the Christian monograms ✱ ✱ ✱[2]. It was by no accident that Constantine in his *labarum* combined the token of the god supreme in the west with that of the god supreme in the east, thus linking Iupiter with Zeus under the name of One greater than either.

(κ) The double axe and other forms of Zeus in the East.

Zeus *Labráyndos* was by no means the only god that in Asia Minor armed himself with the primeval thunder-weapon. Of Zeus

Fig. 512.

Dolichaíos or Iupiter *Dolichenus* I have already spoken at length[3]. Another semi-oriental form of Zeus appears on red relief-ware of the seventh century B.C. found in Rhodes and Karia. A fragment

[1] *Supra* p. 601 f.
[2] *Supra* p. 603 f.
[3] *Supra* i. 604—633.

from Kameiros (fig. 512)[1] represents a male figure, presumably Zeus[2], grasping a pointed sword in one hand and a double axe in the other as he advances to fight a beardless Centaur, who holds before him a small tree, roots and all, behind him a branch. The type was repeated by means of a wooden cylinder rolled round the clay vessel, while yet moist: a second Centaur and parts of a second Zeus are

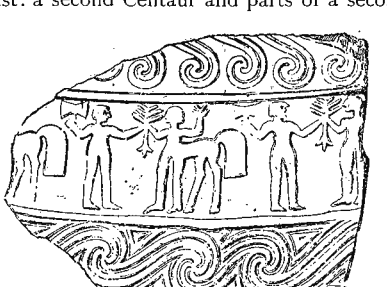

Fig. 513.

visible. Other fragments from *Datcha* on the Carian coast reverse the *motif* (fig. 513)[3], which was evidently popular for the decoration of large *pithoi* and is once at least treated in a more advanced style (fig. 514)[4]. P. V. C. Baur[5] rightly insists that this stamped pottery exhibits certain patterns characteristic of Hittite art. And we have noted Hittite traits, not only in the cult of Iupiter *Dolichenus*[6], but also in that of the Rhodian Zeus[7]. Very possibly, then, the axe-

[1] A. Salzmann *Nécropole de Camiros* Paris 1875 pl. 26 *a* (=my fig. 512).

[2] A. Salzmann *loc. cit.* regarded the subject as a combat between Centaurs and Lapiths. J. L. Stokes in the *Ann. Brit. Sch. Ath.* 1905—1906 xii. 78 speaks of 'An archaic Lapith and Centaur scheme.' B. Sauer in Roscher *Lex. Myth.* ii. 1046 f. fig. 3 took it to be the oldest representation of Herakles *v.* the Centaur. But P. V. C. Baur *Centaurs in Ancient Art* (The Archaic Period) Berlin 1912 p. 85 gives reasons for dissenting from Sauer's view. A. Milchhöfer *Die Anfänge der Kunst in Griechenland* Leipzig 1883 p. 75 fig. 48 with p. 116 pronounced in favour of Zeus on the ground of the double axe. E. H. Meyer *Indogermanische Mythen* Berlin 1883 i (Gandharven-Kentauren). 59, 131 reached the same conclusion; which is accepted also by P. Jacobsthal *'Der Blitz in der orientalischen und griechischen Kunst* Berlin 1906 p. 10 n. 2.

[3] F. Dümmler 'Pithosfragmente aus Datscha' in the *Ath. Mitth.* 1896 xxi. 230 f. fig. 1 (=my fig. 513), P. V. C. Baur *op. cit.* p. 85 fig. 17 (from a photograph). Baur states that the Berlin Museum has recently acquired fragments from Datcha stamped with the same design.

[4] F. Dümmler *loc. cit.* 1896 xxi. 233 ff. pl. 6 (=my fig. 514), P. V. C. Baur *op. cit.* p. 85 f. pl. 11 no. 217 (photograph).

[7] *Supra* i. 642 f.

bearer of the red relief-ware is the Hellenised form of an originally Hittite sky-god. If so, we shall best call him Zeus.

Strabon[1] in his account of Kappadokia states that next to the king in importance ranked the priest of Ma at Komana, the priest of

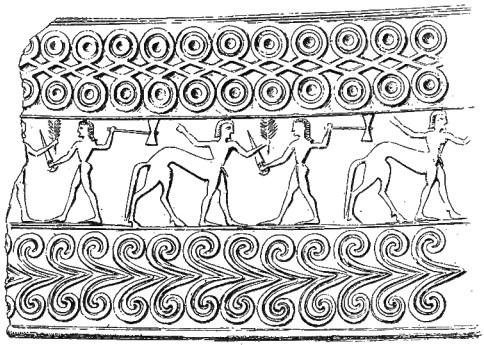

Fig. 514.

Zeus at Venasa, and the priest of Zeus *Dakienós*. The appellative of the latter Zeus is connected by P. Carolidis[2] with the Armenian word *daku*, 'an axe[3],' and taken to mean 'the Axe-bearer.'

Less probable is Carolidis' contention[4] that Zeus *Genetaîos*[5],

[1] Strab. 536 f. *ἐν δὲ τῇ Μορμηνῇ τὸ ἱερὸν τοῦ ἐν Οὐηνάσοις Διός, ἱεροδούλων κατοικίαν ἔχον τρισχιλίων σχεδόν τι καὶ χώραν ἱερὰν εὔκαρπον, παρέχουσαν πρόσοδον ἐνιαύσιον ταλάντων πεντεκαίδεκα τῷ ἱερεῖ· καὶ οὗτός ἐστι διὰ βίου, καθάπερ καὶ ὁ ἐν Κομάνοις* (cp. Strab. 535), *καὶ δευτερεύει κατὰ τιμὴν μετ' ἐκεῖνον. τρίτη δ' ἐστὶν ἱερωσύνη Διὸς Δακιηνοῦ* (T. Tyrwhitt cj. *Δακιήου* or *Δακιηνοῦ* for *Δακίη οὐ*. A. Koraës accepted *Δακιηνοῦ*. P. Carolidis thinks that the title was *Δακίης* or *Δάκιος*; but see F. de Saussure 'Les noms grecs en *-ηνός* et le phrygien' in E. Chantre *Mission en Cappadoce 1893—1894* Paris 1898 pp. 185—191) *λειπομένη ταύτης, ἀξιόλογος δ' ὅμως. ἐνταῦθα δ' ἐστὶ λάκκος ἁλμυροῦ ὕδατος, ἀξιολόγου λίμνης ἔχων περίμετρον, ὀφρύσι κλείσμενος ὑψηλαῖς τε καὶ ὀρθίαις, ὥστ' ἔχειν κατάβασιν κλιμακώδη· τὸ δ' ὕδωρ οὔτ' αὔξεσθαί φασιν, οὔτ' ἀπόρρυσιν ἔχειν οὐδαμοῦ φανεράν.* The reconstitution of the text is due to G. Kramer, who suggested that *τρίτη—φανεράν* should be transposed so as to follow *ἐν δὲ—ἐκεῖνον*. With the salt pool of Zeus *Δακιηνός* cp. the salt water of Zeus *Ὀσογῶα* (*supra* p. 581 ff.). P. Carolidis *Die sogen. Assyro-Chaldäer und Hittiten von Kleinasien* Athen 1898 p. 67 n. would identify the cult-centre of Zeus *Δακιηνός* with the modern *Ilgin*. Axes in jadeite and bronze have been found in the *tell* of *Kara-Euyuk* (E. Chantre *op. cit.* p. 78 f. figs. 56—59).

[4] P. Carolidis *op. cit.* p. 56 Zeus *Γενήτης* (*sic*), p. 62 Zeus *Γενέτης* (*sic*) with a wrong reference to Ap. Rhod. 1. 1032 (? Nonn. *Dion.* 9. 147 *Διὸς γενέταο*).

[5] Ap. Rhod. 2. 1009 *Γενηταίου Διὸς ἄκρην*, Val. Flacc. 5. 147 inde Genetaei rupem (so A. Poliziano for *indigena et aerupem* cod. V.) Iovis.

otherwise known as Zeus *Eúxeinos*[1] or *Xénios*[2], who had a sanctuary on the Genetaean headland adjoining the Pontic river Genes[3], derived his title from *geneîs*, 'an axe[4],' though that derivation would harmonise well with the neighbourhood of the Chalybes[5].

On the whole, it may be predicted with assurance that the thorough exploration of Asia Minor, which despite all drawbacks must some day be completed, will accumulate further evidence of an axe-bearing Zeus, successor and heir of a yet more ancient sky-god.

(λ) The double axe in the West.

It would seem, then, that over a wide area, from Doliche in Syria to Tarentum in Calabria, the prehistoric lightning-axe passed through the successive phases of fetish, attribute, and symbol. In western Europe analogous causes were doubtless at work; but their results are either wholly hidden from us by the darkness of barbarism or at best dimly discernible on the fringe of advancing civilisation.

Double axes of copper, with the hafting hole too small to be of use for tool or weapon, and therefore probably intended for purposes of exchange or ceremony, make their appearance in the west as far back as the Copper Age. A. Lissauer[6] holds that they were imports from Kypros and attempts to trace the routes by which they travelled through Europe. But Sir W. M. Flinders Petrie[7], arguing that double axes with effective hafting are limited to the Mediterranean area, whereas double axes with ineffective hafting belong almost exclusively to the north, denies that Kypros was the centre of distribution and classifies the northern axes under three local types of separate origin. In Bronze-Age deposits ceremonial axes

of a different sort have come to light. C. F. Herbst[1] published two of single blade found at Skogstorp near Eskilstuna in Sweden and another found in the Amt wood near Veile in Denmark. All three, in lieu of solid metal, had a thin coating of bronze over a clay core; and the first two were adorned with plates of gold and studs of amber. We have, however, no proof that any of these axes had a definitely religious significance. The copper double axes very possibly served as a currency unit for the living, the bronze single axes as suitable gifts to the dead.

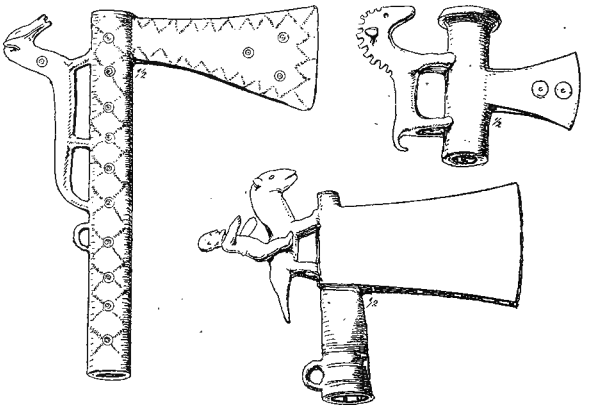

Fig. 515.

More *ad rem* is A. Blanchet's observation[2] that over and over again both in France and in Sweden axes of stone or bronze have been found carefully arranged in symmetric circles, perhaps with a view to solar cult. Besides, bronze axe-heads from the burial ground at Hallstatt are in some cases furnished with the small figure of a rider or a horse (fig. 515)[3], which J. Déchelette[4] takes to be an emblem of the sun, though it may have some other meaning.

[1] C. F. Herbst in the *Aarbøger for nordisk Oldkyndighed og Historie* 1866 pp. 124—132 with figs., Sir J. Evans *The Ancient Bronze Implements, Weapons, and Ornaments, of Great Britain and Ireland* London 1881 p. 450, J. J. A. Worsaae *The Pre-history of the North* trans. H. F. [4] J. Déchelette *op. cit.* ii. 1. 482 fig. 205, 5.

Not till we reach the Roman period can we beyond all question connect the axe with particular deities. A plate of copper discovered near Cadenet in the district of Apt amid a heap of ashes to the west of a circular wall records the gift of an axe to Mars and an axe to Dexsiva[1] (a Celtic goddess[2]) in fulfilment of a vow[3]. Six

at Mogontiacum (*Mayence*) Sucaelus the mallet-god[1] was apparently equated with Iupiter *Optimus Maximus*[2]. Finally, Saxo Grammaticus[3] in his *History of the Danes*, writing *c.* 1200 A.D., states that in 1130 A.D. Magnus, son of Nicolaus (the Danish king Niels), after demolishing an ancient heathen temple on an island in or near Gothia (Gøtland in Sweden), brought back in triumph certain enormously heavy bronze hammers known as 'Iupiter-mallets' and believed to be the means by which Iupiter (Thor) made his thunder.

It will be seen that in western and northern Europe the double axe as a divine weapon gave place, from the Bronze Age onwards, to the single axe and the hammer.

(μ) The axe carried by priests and priestesses.

Among the sculptures decorating the gateway of the Hittite palace at Eyuk[4] is a relief (fig. 518)[5], which represents two pairs of male figures engaged in some ritual or ceremonial action hard to interpret. On the left a couple of men clad in short tunics confront each other. The taller man wears a conspicuous earring and grasps a long staff, which is grasped also by his shorter companion. On the right is a second couple again consisting of a taller and a shorter man. The one wears a close-fitting cap, an earring, a trailing robe with a surplice over it, and tip-tilted shoes: he holds with both hands an axe of unique design[6]—the blade being crescent-shaped

[5] G. Perrôt—E. Guillaume—J. Delbet *Exploration archéologique de la Galatie et de la Bithynie* etc. Paris 1872 i. 360, ii pl. 56, 2, Perrot—Chipiez *Hist. de l'Art* iv. 672 f. fig. 335 (=my fig. 518), J. Garstang *The Land of the Hittites* London 1910 p. 266 f., E. Meyer *Reich und Kultur der Chetiter* Berlin 1914 p. 84 n. 1. Length 1·66^{m}: minimum height 1·22^{m}.

[6] Its character as an axe is recognised by A. J. Reinach in Daremberg—Saglio *Dict. Ant.* iv. 1167 n. 9 and by E. Meyer *loc. cit.* G. Perrot's original comparison with the

and perforated, the handle prolonged above it so that it could be grasped at either end. The other man, who is seemingly nude, stands at a little distance facing the axe-bearer with a gesture of respect. What these various figures signify, we cannot tell. But it is reasonable to suppose that the personage carrying the two-handled axe is a priest, who holds out the weapon of his god for the approaching worshipper to clasp, much as Ahasuerus held out to Esther the golden sceptre[1].

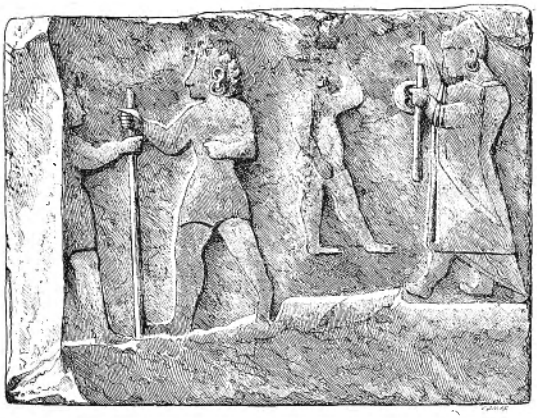

Fig. 518.

A glandular sardonyx from the Vaphio tomb (fig. 519)[2], now in the Central Museum at Athens[3], has incised upon it a beardless man in a long robe, who raises his right hand in the attitude of adoration and supports on his left shoulder an axe crescentic and holed as before. G. Perrot and C. Chipiez[4] took him to be perhaps a man sacrificing. A. Furtwängler[5] suggested that he might be meant for a priest, or for a god, possibly Zeus. And L. A. Milani[6] declares that he is an armed deity comparable with the Hittite

sceptre and ring on the rock-cut reliefs of Bavian (Perrot—Chipiez *Hist. de l'Art* ii. 636 ff. fig. 310) and Maltai (*ib.* ii. 642 ff. fig. 313) is misleading.

[4] S. A. Xanthoudides in the Ἐφ. Ἀρχ. 1900 p. 26 ff. pl. 3 f. (=my fig. 525 ff.), Milani

clude a couple of ornate double axes, large and small, with multiple blades (fig. 525); a pair of ritual horns (fig. 526); a large disk resembling a four-spoked wheel decorated with dots and rays (the sun?); a small disk, with central cross, two concentric rows of dots,

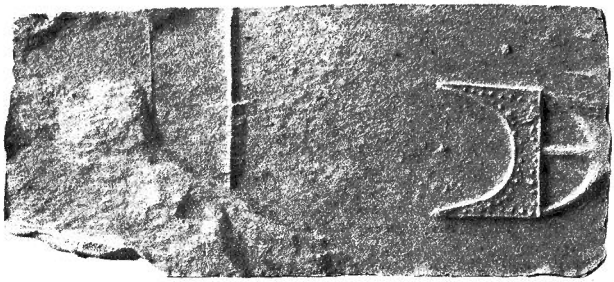

Fig. 526.

and a crescent between them (the moon and stars?), apparently carried by a little female figure[1], since a head with rayed head-dress is seen above and a wide-spread skirt(?) below; a female uplifting

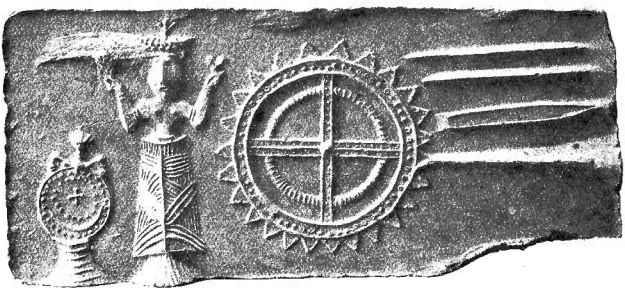

Fig. 527.

flowers or poppy-stalks(?) in either hand, while another flower springs from her flat head-dress (fig. 527); and lastly a similar female raising a brace of decorated double axes (fig. 528). The two

Stud. e mat. di arch. e num. i. 176, R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 299 f., Sir A. J. Evans *ib.* 1902—1903 ix. 92 f., G. Karo in the *Archiv f. Rel.* 1904 vii. 145 ff. figs. 27—30.

[1] G. Karo in the *Archiv f. Rel.* 1904 vii. 147 'darüber gleichsam Schädel und Arme eines Skeletts [!], unten ein weiter Frauenrock.'

large-sized females are regarded by Sir A. J. Evans[1] and by G. Karo[2] as goddesses. We should then assume—an easy assumption—that the earth-goddess had borrowed the sky-god's axe[3]. But the same figures are described by R. C. Bosanquet[4] as women; and there is, after all, nothing to prevent us from supposing that they are a pair of priestesses displaying the emblems of the goddess and the god.

Athena, who in various ways recalls the great mother-goddess of Crete, is on occasion equipped with the double axe. Simias of Rhodes in his picture-poem the *Double Axe* makes Epeios the

Fig. 528.

Phocian dedicate to Athena as an acceptable gift the axe with which he had made the wooden horse and thereby captured Troy[5]. The fateful tool was to be seen in her temple at Eilenia in the district of Lagaria near Metapontum[6]. Again, bronze coins of the Oxyrhynchite nome, struck by Domitian, Trajan (fig. 529), Hadrian (fig. 530), and Antoninus Pius, have for reverse type Athena bearing Nike in one hand and a double axe with straight or rounded edges in the other, while small pieces issued by Hadrian (fig. 531) show the double axe without the goddess[7]. Lastly, a 'Gnostic' amulet in the

St Geneviève collection (fig. 532) represents Athena armed with the double axe amid a group of Egyptising deities[1].

Traces of the Cretan axe might also be sought in the complex of myths relating to Theseus. For Theseus, though he became the

kóptes[1] the 'Cutter,' beat out his victims with the iron mallet[2] of his father Polypemon[3] or lopped their limbs to suit his fatal bed, till Theseus came and served him as he had served others. Attic red-figured vases from the end of the sixth century onwards depict the hero attacking his ferocious host with uplifted double axe[4]. Whence did he obtain the axe? Presumably he wrenched it from the hand of Damastes and carried it afterwards in token of his victory[5]. However that may be[6], the western pediment in the

C. Robert in U. von Wilamowitz-Moellendorff *Aus Kydathen* Berlin 1880 p. 227 pointed out that *προκρούειν* is the technical term for beating out a plate or bar of metal.

[1] Bakchyl. 17. 27 ff. Πολυπήμονός τε καρτερὰν | σφῦραν ἐξέβαλεν Προκό|πτας, ἀρείονος τυχὼν | φωτός with Sir R. C. Jebb *ad loc.* O. Höfer in Roscher *Lex. Myth.* iii. 2687 ff., following up a hint of Wilamowitz in the *Gött. gel. Anz.* 1898 clx. 142, holds that the subject of the sentence is still Theseus, who is here described as *προκόπτας*, the 'striker of a lightning-blow,' in opposition to the more ponderous Polypemon (Προκρούστης), who because stronger is spoken of as *ἀρείονος...φωτός*. Ingenious, but unconvincing.

[3] See J. Ilberg in Roscher *Lex. Myth.* iii. 2683. O. Höfer *ib.* iii. 2684 ff., after G. Kirchner *Attica et Peloponnesiaca* Greifswald 1890 p. 64 n. 4 and O. Wulff *Zur Theseussage* Dorpat 1892 p. 179, thinks that Πολυπήμων was originally an appellative of Hades, who sank successively from a god to a hero, and from a hero to a brigand. Gruppe *Gr. Myth. Rel.* p. 595 says: 'er bedeutete den Todesgott, der die Menschen auf das letzte, für alle gleiche Lager streckt' (but see the folk-parallels in Frazer *Pausanias* ii. 502) and *op. cit.* p. 595 n. 3 adds: 'Der Hammer...ist Symbol des Totengottes; Charun, der etruskische Totengott, führt den Doppelhammer' (*infra* p. 641).

[4] Listed by O. Wulff *op. cit.* p. 45 ff., E. Sarnow *Die cyclischen Darstellungen aus der Theseussage in der antiken Kunst und ihre literarische Quelle* Leipzig 1894 p. 57 ff., L. Séchan in Daremberg—Saglio *Dict. Ant.* v. 227 n. 3.

[5] We are nowhere actually told that Theseus took the weapon from Prokroustes, though that is perhaps implied by Plout. *v. Thes.* 11 and is commonly assumed as self-evident (Harrison *Myth. Mon. Anc. Ath.* p. 260, O. Höfer in Roscher *Lex. Myth.* iii. 2685, 2687). We need not think of the robber as possessing two implements, a hammer to lengthen out the short and an axe to shorten the long: an axe-hammer would have served both purposes.

[6] A late black-figured *skýphos* at Petrograd bears on both front and back a design, which has been interpreted as Theseus attacking Skiron with a double axe in the presence of Athena (Stephani *Vasensamml. St. Petersburg* i. 67 f. no. 116, *id.* in the *Compte-rendu St. Pét.* 1866 p. 155 fig., p. 177 f., Reinach *Rép. Vases* i. 55, 6, O. Waser in Roscher *Lex. Myth.* iv. 1011). And a red-figured *kýlix* at Florence with cyclic illustrations shows the hero making for Sinis with the same tool (L. A. Milani in the *Museo Italiano di antichità classica* 1890 iii. 239 ff. pl. 3, Reinach *Rép. Vases* i. 529). But it would be unsafe to infer from such isolated representations that Theseus had a double axe independently of Prokroustes. His ancestral weapon was, of course, the sword of Aigeus.

There is, however, some reason to associate the double axe with the legendary kings of Athens. When Kodros devoted his life for his country, he dressed as a woodman (Lyk. *Al.* 1378 *ἄνακτος τοῦ δρυηκόπου* with Tzetz. *ad loc.*) and took in hand a double axe (Tzetz. *chil.* 1. 194 f. *ὁ γονὺς ὁ Κόδρος καὶ στολὴν ἀψάμενος δρυτόμου,* | *πελέκει Δάκωνά τινα κτείνας ἀνταιρείτας*) or bill-hook (schol. Plat. *symp.* 208 D *γονὺς δὲ τοῦτο ὁ Κόδρος, στείλας ἑαυτὸν εὐτελεῖ σκευῇ ὡς ξυλιστὴν καὶ δρέπανον λαβών, ἐπὶ τὸν χάρακα τῶν πολεμίων προῆει.*

temple of Zeus at Olympia, carved before the middle of the fifth century perhaps by an Elean sculptor, figures him swinging the same trusty weapon against a brutal Centaur[1]. Finally, Theseus was said to have freed from robbers the old mountain-road that led from Athens to Delphoi[2]; and, whenever the Athenians sent a sacred embassy along that road[3], it was customary for the procession to be headed by men bearing double axes as though to clear the way[4]. In these peculiar axe-bearers I would venture to detect, not a meaningless company of pioneers[5], but the performers of an ancient 'Minoan' lustration, the true significance of which had long been forgotten[6]. It is noteworthy that a fine axe of bronze, inscribed with 'Minoan' characters, has come to light at Delphoi (fig. 533)[7],

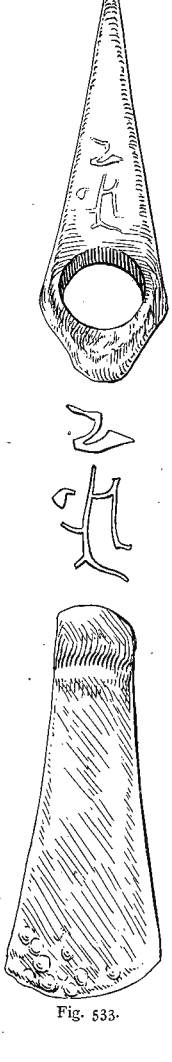

Fig. 533.

κ.τ.λ.). In the *Class. Rev.* 1904 xviii. 84 I suggested that this was an ancient ritual costume. But?

[5] E. Curtius 'Zur Geschichte des Wegebaus bei den Griechen' in his *Gesammelte Abhandlungen* Berlin 1894 i. 33 (cp. p. 69): 'Erinnerung an die alten Werkmeister, die einst zuerst dem Gotte die Stege bereitet hatten.'

[6] A. Boëthius *Die Pythaïs: Studien zur Geschichte der Verbindungen zwischen Athen und Delphi* Uppsala 1918 p. 31 ff. thinks that the axes were originally votive, like the Tenedian axe (*infra* § 3 (c) i (o)). G. C. Richards in the *Class. Rev.* 1919 xxxiv. 113 says: 'Either this was the case, or they were relics of the ancient ritual, as observed in the case of the Buphonia' (*infra* § 9 (h) ii (α)).

[7] Sir A. J. Evans in the *Journ. Hell. Stud.* 1894 xiv. 280 fig. 7, P. Perdrizet in the *Fouilles de Delphes* v. 1. 5 fig. 14 (=my fig. 533). The axe is now in the Ashmolean Museum at Oxford.

not to mention many little votive double axes of the same material (fig. 534, *a*—*d*)[1]. P. Perdrizet[2], indeed, conjectures that *Lábys*, the eunuch temple-sweeper sometimes credited with the Delphic maxim 'Know thyself[3],' was the eponym of the Delphian phratry *Labyádai*[4], and that both names should be connected with the words *Labýrinthos* and *lábrys*.

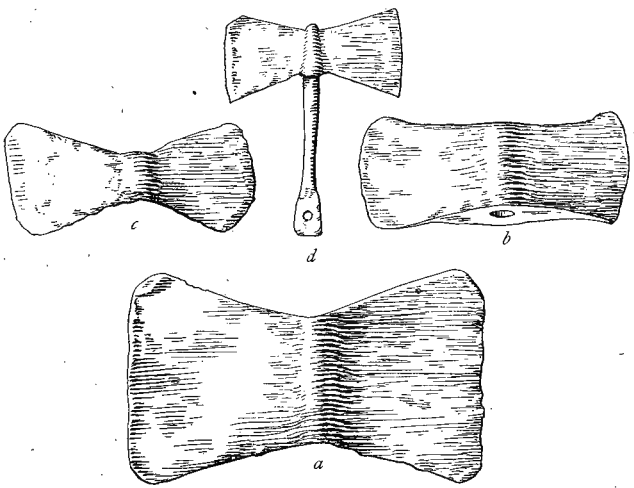

Fig. 534.

A good example of the *lábrys* surviving for ritual purposes has recently been published by Schweitzer[5]. It is a bronze medallion from Smyrna, of the first or second century A.D., now in the Ethnological Museum at Munich. On it we see (fig. 535) a man wearing a pointed *pîlos* with chin-band and a heavy cloak, who puts incense

[5] Schweitzer in the *Jahrb. d. kais. deutsch. arch. Inst.* 1919 xxxiv Arch. Anz. pp. 38—49 fig. 1 (=my fig. 535). Diameter of medallion 6·6^{cm}.

on a *thymiatérion* with his right hand and shoulders a double axe with his left. A cord from his girdle is perhaps attached to the dog that is seen behind him, while a second dog beyond the incense-burner barks at the smoke. In the field is a bay-branch, and a large star or sun shines in the sky. Interpretation is difficult. The *pîlos*, the dogs, and the brazier make one think of Hephaistos, whose temple on Mount Aitne had an ever-burning fire and a precinct full of sacred dogs[1]: the god himself appears to have been a Grecised

Fig. 535.

form of the Syrian Hadran[2]. Schweitzer justly remarks that the priest of the medallion resembles his deity, but seeks to relate the latter to the Roman Robigus, the Greek Apollon *Erethímios*, and the Phoenician Rešef or Rešup (fig. 536)[3],—a connexion hardly proven, though by no means impossible.

In Italy too the axe retained its sanctity well into classical times. The Iron Age notwithstanding, priests continued to sacrifice with a bronze axe called *acieris*[4] or, as some would have it, *seces-*

[6] Cp. *e.g.* a Persian axe-head of bronze, found at Ekbatana (*Hamadan*) and now in the British Museum, which ends in a stylised lion (W. Greenwell in *Archaeologia* 1902 lviii. 9 fig. 11, Forrer *Reallex.* p. 66 fig. 56); an Armenian axe-head of bronze from Van, which has a lion with two hounds in a like position (W. Greenwell in *Archaeologia* 1902 lviii. 9 fig. 10, Sir W. M. Flinders Petrie *Tools and Weapons* London 1917 p. 13 pl. 11, 140); Scythian model axe-heads of bronze, from Jarmolintsy and from the district of Romny, terminating in animal heads (E. H. Minns *Scythians and Greeks* Cambridge 1913 pp. 72, 178 fig. 73). See also the axe-heads from Hallstatt (*supra* p. 618 fig. 515).

the symbolic or model axe-head in bronze have come down to us. One in the British Museum has a perforated crescentic blade backed by a bull, the whole measuring some three inches in length (fig. 542)[1]. The other, once in the Forman collection, is very similar in design and size, but has a solid blade (fig. 543)[2]. The bull presumably, though not quite certainly, here stands for the victim sacrificed.

In this connexion a word may be added concerning the axes carried by Roman lictors. It seems probable that they were ori-

Fig. 542.

ginally no ordinary instruments of execution, but sacred weapons borne before the king as human representative of the sky-god. The lictor's axe-blade, at least in late republican times, was given a semi-equine form. *Denarii* of A. Postumius Albinus struck *c.* 82 B.C. show a togate figure erect between an eagle-standard and a lictor's axe, the blade of the latter being combined with the fore-

[1] *Brit. Mus. Cat. Bronzes* p. 357 no. 2959 (wrongly described), *supra* p. 622 n. 3. Fig. 542 is from a photograph by Mr R. B. Fleming.

[2] Sir C. H. Smith *The Forman Collection: Catalogue of the Egyptian, Greek & Roman Antiquities* London 1899 p. 29 no. 160 fig. (=my fig. 543): '**Sacrificial axe** (?). The blade, which has an almost lunate edge, appears never to have been sharpened. The thicker part above the blade is modelled in the form of a bull, whose hollow body is intended for receiving the heft. At the point where the heft is inserted is a slight prolongation with two grooves, intended for the attachment of the binding; between these grooves a hole is pierced, probably for a rivet, and two further holes are left, one on each side of the blade. Along the back of the animal a club is moulded in relief, the handle towards its tail; and below the bull's belly on each side is a sacrificial knife (?) in relief.... The form of knife here shown seems to be represented on Pergamene coins of Maximinus.... Height 0·08 in.; width 0·095 in.; greatest thickness, 0·025 in. [For 'in.' read 'm.' A.B.C.] On a label inside is written, "Pr. Vans, 1865."' The axe was acquired by Mr W. T. Ready.

part of a tiny galloping horse (fig. 544)[1]. *Denarii* of C. Norbanus issued at about the same date have a similar axe placed between a

noted by old Rasche[1], though ignored by recent numismatists[2]—may be compared with the horse on the bronze axe-heads from Hallstatt[3]. Further, the rods bound round the lictor's axe by means of a red leather strap[4] recall the bundle of divining rods used *e.g.* by the Scythians[5] and the Germans[6], and were perhaps in the far past employed for purposes of divination[7]. Be that as it may, rods thus brought into contact with a sacred axe[8] and thereby charged with its virtues would doubtless be deemed of especial value in expelling evil from a malefactor[9].

That the axe-bearers of the Byzantine court[10] had any such religious history behind them, we have no reason to think[11].

(*ν*) The decoration of the double axe.

Sacred and symbolic axes are sometimes characterised as such by their material or ornamentation. Thus the thin triangular axe-heads of jadeite, nephrite, and chloromelanite, which date from mesolithic or neolithic times and are widely distributed in southern and western Europe[12], have been regarded by W. Osborne as ceremonial or princely weapons[13]. And the magnificent axe-hammers of blue[14] or green stone[15] found in the *débris* of the second city at

Troy have been recognised by S. Reinach as cult-objects[1]: it might even be held that they were made of *lapis lazuli*, jadeite, etc. just because the colours of these stones were deemed suitable to the belongings of a sky-god.

Again, a perforated axe of amber, nearly five inches long, from

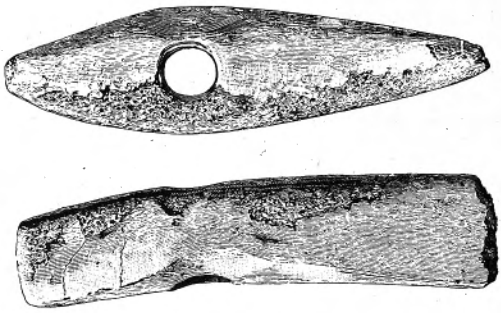

Fig. 548.

Fig. 549.

Fig. 550.

Bohuslän (fig. 548) is described by O. Montelius as a symbolic or votive weapon[2]. The same might be said of a smaller specimen discovered by A. Pasqui in a grave of the Early Iron Age at Bisenzio[3]. Amber beads in the form of double axes and hammers (figs. 549, 550) have frequently come to light in the long barrows of

Pigorini in the *Bullettino di paletnologia italiana* 1890 xvi. 75, M. Hoernes *Urgeschichte der bildenden Kunst in Europa* Wien 1898 p. 471 f., *id. ib.*[2] Wien 1915 p. 514.

Denmark and southern Sweden[1]: M. Hoernes[2] and B. Schnittger[3] take them to be symbols of the sky-god or thunder-god; and, remembering that jewelry in general often originates in magic[4], and that amber in particular seems to have been associated with the sun-god[5], we may readily grant that the beads in question had some such religious significance.

In the sanctuary at *Nirou Khani* near Knossos S. Xanthoudides discovered four enormous double axes of bronze, with flat blades rivetted to their sockets[6]. These were of course ritual in character. But miniature axes in gold, electrum, or gilt bronze would likewise be appropriate to the flashing god of heaven. The yellow double axes of the *sarcophagus* from *Hagia Triada* were supposed by R. Paribeni to represent originals in gold or gilded metal[7]. Bulls'-heads with double axes of thin gold were found by the score at Mykenai[8]. And small double axes made of bronze plated with gold came from a treasure-chamber in the palace at Knossos (fig. 551)[9]. The trinkets recovered by D. G. Hogarth from the statue-base of the oldest (*c.* 710—*c.* 660 B.C.) Artemision at Ephesos include a

of griffins, two starry disks, and an archaic female figure flanked by lines of zig-zags (fig. 554). Lastly, a gold hair-pin from the necropolis of Koban takes the form of an axe with recurved blade, the socket of which is adorned with a little group representing a stag attacked by two hounds (fig. 555)[1].

Sir Arthur Evans draws attention to the fact that the double axe in 'Minoan' art is frequently adorned with diagonals and zig-zags (fig. 556)[2]. He contends that

chevrons that appear on Charon's hammer in a tomb-painting at Vulci (fig. 557)[1]; for, if we may assume that he was originally a god of the Underworld[2], his hammer could betoken chthonian thunders, and the zigzags upon it chthonian lightnings. It were perhaps these 'nether thunderbolts[3]' that earned for him the very *sobriquet* of *Chárон*, 'He of the Flashing Eyes[4].' Further reflexion has,

Wilamowitz-Möllendorff in *Hermes* 1899 xxxiv. 227—230), A. Furtwängler 'Charon' in the *Archiv f. Rel.* 1905 viii. 191—202 with two figs., J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 pp. 98—117 ('Charon'). A fresh treatment of the theme is in preparation by my friend and former pupil Miss M. E. H. Lloyd. A survey of recent hypotheses is given by Gruppe *Myth. Lit.* 1908 pp. 438—441, who concludes: 'Man wird sich beim Lesen dieser Materialsammlung der...Konsequenz schwerlich entziehen können, die v. Wilamowitz-Möllendorff, Herm. 1898, 227 ff. ausspricht, dass *Ch.* ursprünglich wie der neugriechische Charos und der etruskische Charun nicht der Totenfährmann, sondern der Totengott selbst war,' etc.

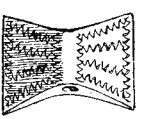

Fig. 558.

Personally I incline to think that Charon was, to begin with, an Anatolian god of the Underworld (J. C. Lawson *op. cit.* p. 116 makes him a Pelasgian god of death) much like Hephaistos, that he has left traces of his early cult in the various Χαρώνεια or Χαρώνια of the Maiandros-valley (O. Waser *Charon, Charun, Charos* p. 61 ff., *id.* in Pauly—Wissowa *Real-Enc.* iii. 2183, L. Bürchner and W. Ruge *ib.* iii. 2183 f.), and that he was brought by the Etruscans from Lydia to Italy. When and where he acquired the traits of the grim ferryman is a problem as yet unsolved. In any case he stands for the lower, as Zeus for the upper, world: cp. Aisop. *prov.* 5 (E. L. von Leutsch—F. W. Schneidewin *Paroemiographi Graeci* Gottingae 1851 ii. 228) ἢ Ζεὺς ἢ Χάρων· ἢ εὐδαίμονος βίος ἢ τέλος.

[3] A. Caecina *ap.* Sen. *nat. quaestt.* 2. 49. 3 and Plin. *nat. hist.* 2. 138 f., cp. Manil. 2. 892 (*fulmina* codd. R. Bentley cj. *culmina*). See further T. H. Martin *La foudre l'électricité et le magnétisme chez les anciens* Paris 1866 p. 178 and C. O. Thulin *Die etruskische Disciplin* i. *Die Blitzlehre* Göteborg 1906 pp. 34, 49.

[4] U. von Wilamowitz-Möllendorff *Homerische Untersuchungen* Berlin 1884 p. 225

however, led me to abandon any such view of the patterned axe or hammer, as involving a piece of—I do not say impossible, but at worst improbable and at best unproved, symbolism. I incline rather to take a hint from my friend Dr A. C. Haddon, who points out that patterns of the sort are often to be derived from the lashing used to hold an early axe-head in position[1]. The double axe, when a sacred weapon, would tend to be decorated; and its decoration need not have a more recondite meaning.

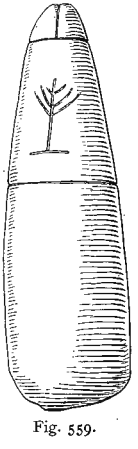

Fig. 559.

A neolithic celt of greenstone published by C. Blinkenberg[2] has incised upon it an arborescent design (fig. 559) resembling the *Donnerbesen*[3] or 'thunder-besom' marked on the walls of old-fashioned houses in Holstein, Vierlande, etc. as a protection against lightning[4]. Now *Donnerbesen* is the name popularly given in Germany and Switzerland to the mistletoe[5] or to any bushy

n. 23, O. Waser *Charon, Charun, Charos* p. 15 f., *id.* in Pauly—Wissowa *Real-Enc.* iii. 2177 ('Χάρων...ist eine Art Kurzform zu χαρ-οπό-ς, mit (wild) funkelndem Blick'). On lightning as a flash from the eye of a deity see *supra* p. 501 ff. B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 224 f. justly compares the fiery eyes of Charon as described by Verg. *Aen.* 6. 300 *stant lumina flamma* (in *culex* 216 f. *flagrantia taedis* | *lumina* is the reading of the better codd. B. C. H.) with the lightning glance repeatedly attributed to him in modern Greek folk-song (*e.g.* A. Passow *Popularia carmina Græciæ recentioris* Lipsiae 1860 no. 428. 4 *σὰν ἀστραπὴ 'ν' τὸ βλέμμα του*, no. 430. 10 and no. 516. 20 *τῆς ἀστραπῆς τὰ μάτια*: see also N. G. Polites *op. cit.* ii. 254 f., J. C. Lawson *op. cit.* p. 100).

growth on the boughs of trees[1], such parasitic plants being deemed the product of a lightning-flash[2]. Sir James Frazer[3] (herein following A. Kuhn[4]) points out that the Druids too regarded oak-mistletoe as fallen from heaven[5], and suggests that, in their view, the plant left on the oak by the lightning was nothing less than lightning itself, or at least a visible emanation of celestial fire. If so, a broom of mistletoe or the like would be the best possible lightning-rod; and even its effigy in the brick-work of the doorway would save the house from the most destructive storm. Since neolithic celts were in a later age held to be thunderbolts[6], they might well be adorned with such a symbol as this[7]. Precise parallels from the classical area are wanting[8]; for, though the double axe is intimately associated with sacred trees[9], no specimen as yet discovered bears a definitely arboreal device[10].

Passing from flora to fauna, we have next to notice a double axe of bronze discovered by the Italians at Phaistos (fig. 560)[11]. This masterpiece of the founder's art, which, according to A. Mosso[12],

[1] J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 183, cp. 1883 iii. 1191, 1888 iv. 1346, H. Friend *Flowers and Flower Lore* London 1883 i. 5, 73, E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 121.

A neolithic celt, found at Loudun (Vienne) in central France, had incised upon it, perhaps in Roman times, a sign resembling a key (W. Deonna 'Clef et hache' in the *Revue des études anciennes* 1919 xxi. 219–222 argues that the celt was a thunder-stone and the key a lightning-sign, the whole forming 'une amulette funéraire, où la clef doit ouvrir au mort les portes de l'au-delà'). Mr M. C. Burkitt, to whom I applied for further examples, tells me that there is in the Museum at Carnac 'an engraving of a fish (poor) on a flat celt,' and refers me to L. Giraux 'Hache polie avec gravures sur les deux faces' in the *Bulletin de la société préhistorique française* Séance du 23 Nov. 1911 (cruciform signs, etc.).

[8] Note, however, the combination of axe, pestle, and broom in the rites of Intercidona, Pilumnus, and Deverra (Varr. *antiquit. rer. div.* 14 *frag.* 61 Agahd *ap.* Aug. *de civ. Dei* 6. 9), on which see E. Samter *Geburt, Hochzeit und Tod* Leipzig—Berlin 1911 pp. 29 ff., 51 ff., G. Wissowa in Pauly—Wissowa *Real-Enc.* ix. 1608.

[1] *Supra* i. 723 f., 725 n. 5. Dr L. R. Farnell writes to me (July 31, 1919): 'You

superb moth of the stylised sort, with spiral *antennae*, a ringed body, and two scalloped wings showing circular eyes. It resembles the moths on the golden disks (figs. 561, 562)[1] and *plaques*[2] from the third shaft-grave at Mykenai[3] and, like them, betokens the presence of a soul[4]. Incidentally, its round open eyes on head and

take the Talos-story as proof that the Minoan artist knew hollow bronze casting—but the myth about the nail and the vein would be consistent with solid casting: there is as yet no archaeologic evidence that the Minoans knew the hollow process.'

[1] H. Schliemann *Mycenæ* London 1878 p. 165 ff. fig. 243, p. 196 ff. fig. 301 f., C. Schuchhardt *Schliemann's Excavations* trans. E. Sellers London 1891 p. 204 ff. fig. 193, Perrot—Chipiez *Hist. de l'Art* vi. 968 with fig. 543. My figs. 561, 562 are from electrotypes of three of the disks.

[2] H. Schliemann *op. cit.* p. 176 fig. 256, Perrot—Chipiez *op. cit.* vi. 968 with fig. 544.

[3] Sir A. J. Evans *The Palace of Minos* London 1921 i. 705 f. figs. 528, 529 shows that these 'Late Minoan i' representations were preceded by 'Middle Minoan iii' seal-types (Zakro, Knossos), in which eyed butterfly-wings formed one element in a complex of fantastic decoration.

[4] On the soul as a butterfly or moth see O. Jahn *Archäologische Beiträge* Berlin 1847 p. 138 ff., L. Stephani in the *Compte-rendu St. Pét.* 1877 pp. 66—79, 94—139, O. Waser in Roscher *Lex. Myth.* iii. 3234—3237, Frazer *Golden Bough*[3]: Taboo pp. 29 n. 1, 41, 51 f., O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 436—442, *supra* i. 532 n. 12.

According to O. Keller *loc. cit.*, the death's-head moth (*Acherontia atropos*), so common in southern Europe, flitting about the garden-tombs of a summer's evening, with its weird mask, its uncanny squeak, and its fondness for honey, was early held to be an embodiment of the soul and as such is represented on the gold-work from Mykenai. In the Alexandrine age the moth was displaced by the butterfly—a gayer and more frolicsome insect associated with Aphrodite and Eros, Dionysos and Priapos. Hence ψυχή came to be used of the butterfly, especially of the 'cabbage white' (*Pieris brassicae* or the like), first in Aristotle (H. Bonitz *Index Aristotelicus* Berolini 1870 p. 866 a *s.v.* ψυχή), while conversely *papilio* is sometimes found in the sense of 'soul' (*Corp. inscr. Lat.* ii no. 2146 = F. Bücheler *Carmina Latina epigraphica* Lipsiae 1897 ii. 850 f. no. 1851 (from Obulco in Hispania Baetica) heredibus mando etiam cinere ut m[era vina ferant,] volitet meus ebrius papilio, etc., cp. *Corp. inscr. Lat.* vi no. 26011 = F. Bücheler *op. cit.* ii. 489 no. 1063 (from Rome) papilio volita(n)s | texto religatus | aranist: illi prae|da rep(e)ns, huic | data mors subit|ast). Ultimately the brief life and the senselessness of the butterfly, which gets its wings singed in the nearest flame, led Christians to regard it as the very type of a careless and worldly soul. From sombre moth (all that!) to frivolous butterfly (only that!)—an instructive chapter in semantics.

A banded sardonyx at Copenhagen (L. Müller *Description des intailles et camées antiques du Musée Thorwaldsen* Copenhague 1847 p. 164 no. 1510, L. Stephani in the *Compte-rendu St. Pét.* 1877 p. 90, Furtwängler *Ant. Gemmen* i pl. 24, 59 (= my fig. 563), ii. 122) shows a butterfly approaching an ithyphallic herm, while a peacock is seated on the edge of the fountain-basin: fine work of the Roman period. Other gems combine a large *phallós* with a butterfly and a snail: so on an agate belonging to a private collection in the Netherlands (L. J. F. Janssen *Nederlandsch-Romeinsche Daktyliotheek* Leyden 1844 pl. 3, 58, L. Stephani in the *Compte-rendu St. Pét.* 1871 p. 282: the stone is inscribed Κύθων) and on a cornelian in the Hermitage (L. Stephani *ib.* 1877 p. 89). But the closest parallel is furnished by an early Attic black-figured *amphora* at Berlin (Furtwängler *Vasensamml. Berlin* i. 222 no. 1684: on the right, a bearded man dancing; on the left, a bearded man playing the double flute—'sein

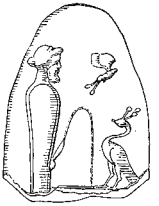

Fig. 563.

wing would serve as a powerful prophylactic. Thus the axe on which the creature appears was not only animate, instinct with divine life, but also sacrosanct, protected against the approach of evil. Mosso surmises that it was 'a weapon for ceremonial use.'

Small votive double axes of bronze, marked with concentric circles, are not uncommonly found in the Greek area. Two came

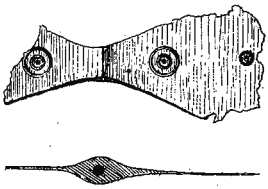

Fig. 564.

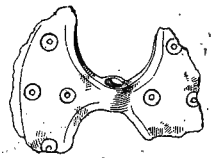

Fig. 565.

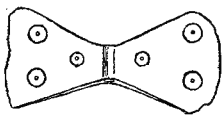

Fig. 566.

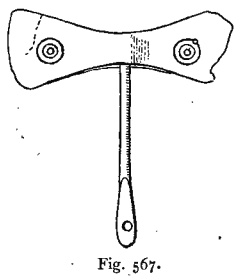

Fig. 567.

to light in the *Altis* at Olympia, one to the south-west of the temple of Zeus (fig. 564)[1], the other at its north-western angle (fig. 565)[2]. Another, from Athens, much like the first of these, is in the Museum at Copenhagen[3]. Two more turned up in the precinct of Artemis at Lousoi in Arkadia (figs. 566, 567)[4]. Another was associated

Phallus ist horizontal erigiert und vier r. Samentropfen fallen nieder in der Richtung auf einen Schmetterling..., der in der Luft fliegt und im Verhältnis viel zu gross gemalt ist'). Was the soul-butterfly popularly connected with the seminal fluid (*κραμβίδες* and *κάμπαι* spring from the dew that falls on cabbages (Aristophanes of Byzantion *hist. an. epit.* 1. 36 p. 8, 10 ff. Lambros *ἐκ δὲ τῆς δρόσου τῆς ἐπὶ τὰ φύλλα τῆς κράμβης πιπτούσης αἱ λεγόμεναι κραμβίδες καὶ κάμπαι*), while manure breeds *vermiculi* under a waxing moon (Fulgent. *myth.* 2. 9))?· Or should we assume a play on *φαλλός* and *φάλλη* (Hesych. *s.v. φάλλη· ἡ πετομένη ψυχή*)?

with geometric ware in the sanctuary of Artemis *Orthía* at Sparta (fig. 568)[1]. And yet another, made of bone, was acquired at Athens and is now in the interesting collection of Aegean antiquities lent by R. M. Dawkins to the Fitzwilliam Museum at Cambridge (fig. 569)[2].

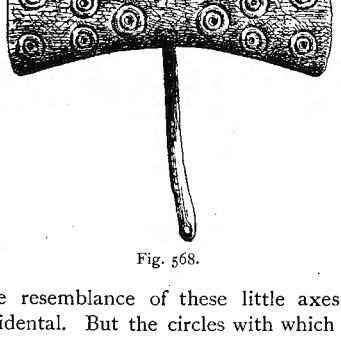

Fig. 568.

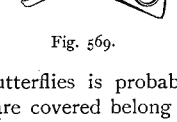

Fig. 569.

The resemblance of these little axes to butterflies is probably accidental. But the circles with which they are covered belong to a system of decoration widely prevalent in the Hallstatt period[3] and are almost certainly prophylactic in character[4]. J. Déchelette took them to be solar disks[5], and others have assumed that they are 'eyes[6].' In any case the axe as a sacred object was protected by their presence upon it.

Diminutive axes of bronze passed during the Early Iron Age

d. oest. arch. Inst. 1901 iv. 49 figs. 67 (=my fig. 567) and 68 (=my fig. 566): 'Gefunden an der Schuttstätte östlich des Buleuterion' (map *ib.* p. 16 fig. 6).

[1] J. P. Droop in the *Ann. Brit. Sch. Ath.* 1906—1907 xiii. 117 fig. 6, *e* (=my fig. 568).

[2] Scale ½.

[3] Numerous examples will be found in the plates of E. v. Sacken *Das Grabfeld von Hallstatt in Oberösterreich und dessen Alterthümer* Wien 1868.

[4] An analogy is afforded by the *swastika* found as a decorative device on axes, double or single. Thus A. Héron de Villefosse and E. Michon, among other acquisitions of the Louvre in 1899, mention: '109. Petite hachette votive à double tranchant, ornée sur ses deux faces de croix gammées légèrement gravées au pointillé et au trait; belle patine vert clair. Grèce' (*Jahrb. d. kais. deutsch. arch. Inst.* 1900 xv Arch. Anz. p. 157). And a single-bladed axe from Piedmont is similarly marked (O. Montelius *La civilisation primitive en Italie depuis l'introduction des métaux* Stockholm 1895 i. 183 pl. 33, 15, J. Déchelette *Manuel d'archéologie préhistorique* Paris 1910 ii. 1. 481 f. fig. 205, 2).

Vienna (fig. 572)[1]. But projecting lugs were also suggestive of

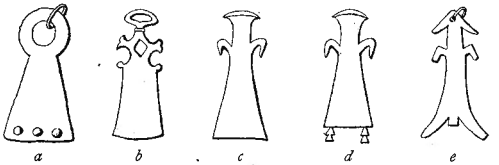

Fig. 575.

human arms, and it needed no great effort of imagination to transform the axe into a *quasi*-anthropomorphic pendant (fig. 575)[2], complicated at will by the addition of rings, chains, etc. I figure an advanced type from a grave at Tribano near Padua (fig. 576)[3] and two other examples from Italy that show an accumulation of apotropaeic elements (fig. 577)[4].

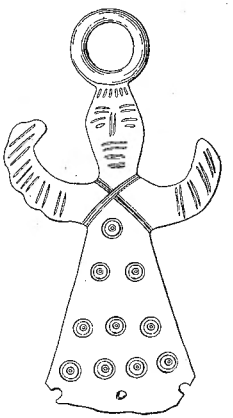

Fig. 576.

The prophylactic value of such pendants was doubtless high. It became higher still, when the sacred axe without losing all semblance of its essential shape was modified into a gong; for, as I have elsewhere insisted[5], great is the virtue of beaten bronze. Pythagoras, for instance, declared that the sound of bronze being beaten was the voice of some deity shut up within it[6]. Tombs of the Early Iron Age in the vicinity of Bologna have yielded a number of such gongs together with their

[1] M. Hoernes *Urgeschichte der bildenden Kunst in Europa* Wien 1898 pp. 443, 472 pl. 10, 9 (=my fig. 572) 'Antikensammlung des Allerh. Kaiserhauses zu Wien, Saal XII, Schrank VI, Nr. 315,' *id. op. cit.*[2] p. 519 fig. 5, J. Déchelette *op. cit.* ii. 1. 481 f. fig. 205, 3.

in the collection formed by Count Gozzadini (fig. 578)[1]. The gong as a rule is solid-cast, though one example is made of two thin

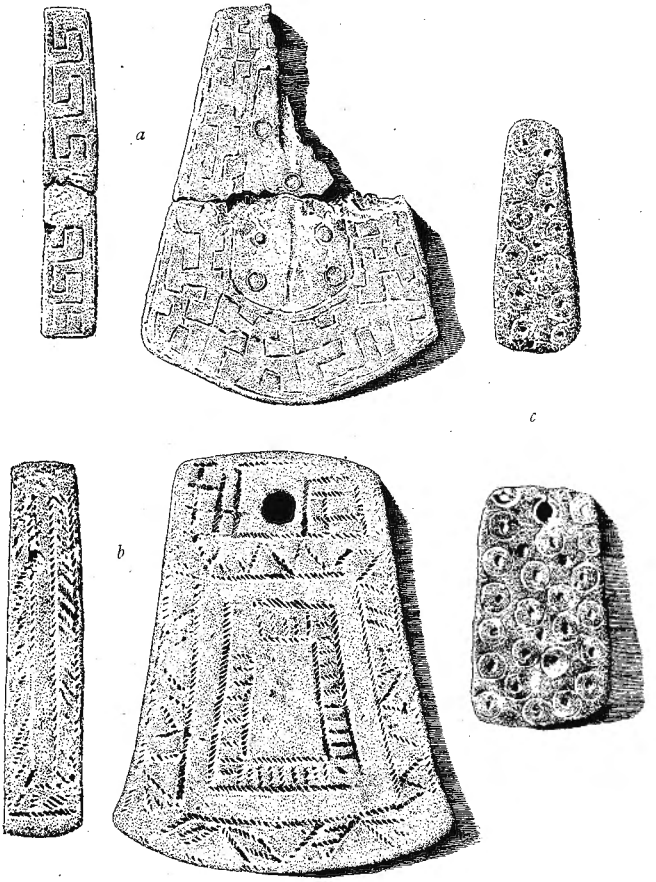

Fig. 579.

plates of bronze soldered at the edges so as to enclose an empty

[1] *Matériaux pour l'histoire primitive et naturelle de l'homme* 1874 ix. 289 figs. 105 and 106, G. Cotteau *Le Préhistorique en Europe* Paris 1889 p. 79, L. Pigorini in the *Bullettino di paletnologia italiana* 1890 xvi. 62 fig. (=my fig. 578: scale ½).

space two millimeters in depth[1] and might be regarded as a cross between a gong and a bell. The hammer is regularly a hollow-cast cylinder with spheroidal ends.

L. Pigorini[2] has pointed out that contemporary copies of these axe-gongs were made in terra cotta, and has published examples from the De Lucca estate at Bologna (fig. 579, *c*), from Monteveglio in the same neighbourhood (fig. 579, *b*), and from Solino near Imola (fig. 579, *a*). The Solino gong is decorated on both sides with circles, formerly filled with bronze studs, some of which are still to be seen fixed in the clay[3].

(ξ) The duplication of the double axe.

The 'Minoan' axe in religious surroundings exhibits a marked tendency towards duplication. To begin with, the sacred weapon

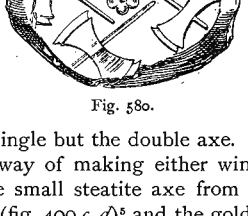

Fig. 580.

is normally not the single but the double axe. Then, the craftsman or the artist has a way of making either wing of the implement twofold—witness the small steatite axe from Knossos (fig. 405)[4], or the gold *bucrania* (fig. 409 *c*, *d*)[5] and the gold ring from Mykenai (fig. 18)[6], the clay sealing from *Kato Zakro* (fig. 524)[7], the painted *sarcophagus* from *Hagia Triada* (pl. xxvii, *a*)[8]. Or he may duplicate the whole axe, so that we see as objects of veneration a pair of double axes with twofold blades: the same *sarcophagus* provides an illustration (pl. xxvii, *b*)[9]. Or again he may duplicate this pair of double axes with twofold blades, as on a clay sealing found near the 'Room of the Archives' in the Cnossian palace (fig. 580)[10].

[10] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 103 fig. 61 (=my fig. 580: scale ⅔).

What are we to think of this *penchant* for binary forms? L. A. Milani[1] in a somewhat tangled passage of theogonic speculation declares that the duplicated blades of the double axe on the gold ring symbolise two pairs of gods, on the one hand the celestial Kronos and Zeus, on the other the solar Zeus and Apollon, either pair being conceived as Father and Son—an explanation which might have claimed support from the Ophites and their supramundane diagram (fig. 511)[2]. Sir Arthur Evans[3], without indulging in such subtleties, risks a similar conjecture *à propos* of the same ring: 'The curious reduplication of the axe blades suggests indeed

Fig. 581.

Fig. 582.

that it stands as an image of the conjunction of the divine pair—a solar and a lunar divinity.'

Personally I should contend that the double axe hafted in a leafy stem, as at *Hagia Triada* (pl. xxvii, *b*)[4] and Knossos (fig. 396)[5], betokened the union of the Sky-father with the Earth-mother, and that an ordinary double axe on its wooden handle came to be received as a symbol of like significance[6]. Nor would I deny that a pair of double axes, held up by a priestess (fig. 528)[7] or erected in a shrine (fig. 404)[8], were reverenced as the signs of god and goddess respectively. But I demur to regarding the duplicated

[1] Milani *Stud. e mat. di arch. e num.* 1899—1901 i. 197 f., Gruppe *Myth. Lit.* 1908 p. 287.

[8] *Supra* p. 535 ff.

blades as any evidence of the divine duality. In art, as in language[1], reduplication implies emphasis. The feeling that transformed the lightning-fork[2] into a thunderbolt, and thereby doubled the ability of the thunder-god to strike, augmented the cutting edges of the *lábrys* with the same result. Accentuated further, it produced not merely double but multiple blades, as in the case of the mould from *Palaikastro* (fig. 525)[3]. Finally, double axes with twofold blades and flower-like sepals, such as occur sporadically among the *bucrania* of Mykenai (fig. 409, *d*)[4], are found at Pseira, a small island in the Gulf of Mirabello, repeated as a pattern to cover the surface of ceramic vessels (figs. 581, 582)[5]. The vessels and their contents were thus protected by the whole armoury of heaven.

(*o*) The double axes of Tenedos.

The 'Minoan' conception of a bisexual axe is, as Sir Arthur Evans[6] has pointed out, confirmed by the coin-types of Tenedos. The obverse of these coins from the sixth century B.C. onwards—whether their style be archaic (fig. 583)[7], late archaic (fig. 584)[8], fine (figs. 585, 586)[9], or decadent (figs. 587, 588)[10]—shows a Janiform head consisting of a male and a female profile combined: the reverse has a double axe with a short handle. Sir Arthur Evans makes the

Fig. 585.

Fig. 586.

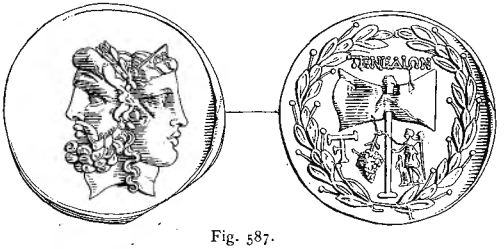

Fig. 587.

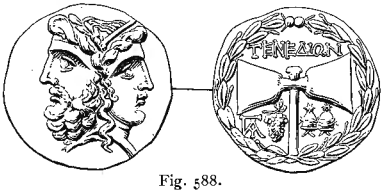

Fig. 588.

That the double axe at Tenedos was indeed a sacred symbol, or even the recipient of an actual cult[1], appears from the representation of it on certain remarkable specimens published by

[1] My friend and colleague Sir W. Ridgeway in his book *The Origin of Metallic Currency and Weight Standards* Cambridge 1892 pp. 49 f., 318 ff. argues that the axe on coins of Tenedos was 'not religious,' but represented rather 'the local unit of an earlier epoch.' He shows from *Il.* 23. 850 f., 882 f. (cp. schol. *Il.* 23. 851, Eustath. *in Od.* p. 1878, 57 ff., Hesych. *s.vv.* ἡμιπέλεκκον, πέλεκυς, and πε[λέκεϝας] in a Cypriote inscription from Idalion printed by W. Deecke in Collitz—Bechtel *Gr. Dial.-Inschr.* i. 27 ff.

F. Imhoof-Blumer. One of these, a *dídrachmon* extant in the collections of Berlin (fig. 589)[1] and Glasgow (fig. 590)[2], exhibits the double axe standing on the uppermost of three steps between a pair of pillars or pillar-like supports. We are reminded at once of the way in which 'Minoan' art depicted a double axe standing on

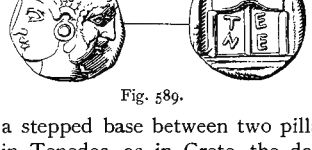

Fig. 589.

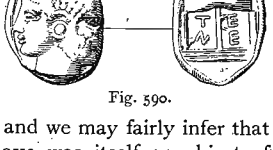

Fig. 590.

a stepped base between two pillars[3]; and we may fairly infer that in Tenedos, as in Crete, the double axe was itself an object of worship. The other coin, a *tetrádrachmon* of which specimens exist at Berlin (fig. 591)[4] and in the collections formed by Canon W.

no. 60, 15 and 26 = O. Hoffmann *Die griechischen Dialekte* Göttingen 1891 i. 68 ff. no. 135, 15 and 26 = F. Solmsen *Inscriptiones Graecae ad inlustrandas dialectos selectae*[2] Lipsiae 1905 p. 5 ff. no. 3, 15 and 26) that double axes formed part of the earliest Greek system of currency, and holds that the πελέκεις dedicated at Delphoi by Periklytos the Tenedian (Paus. 10. 14. 1) were probably offered to the god as being the 'especial product of Tenedos.' In *The Early Age of Greece* Cambridge 1901 i. 444 Sir W. Ridgeway makes the further suggestion that the Tenedian axes at Delphoi 'were not real, but only miniature axes like those from the Dictaean cave.'

Sir W. Ridgeway's views on the whole subject have been criticised with admirable fairness and acumen by G. Macdonald *Coin Types* Glasgow 1905 p. 23 ff. For my part, I am quite prepared to believe that double axes were in early times and in some places (*e.g.* Kypros) a recognised unit of exchange. But that, as Sir William himself allows (*The Origin of Metallic Currency and Weight Standards* p. 319 n. 2), is by no means inconsistent with the belief that they were sacred objects also. On the one hand, J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1906 ix. 161—181 pl. 2 ff. has published a series of bronze castings in the shape of double axes (?) from Salamis in Kypros, *Serra Ilixi* in Sardinia, Phaistos in Crete, Mykenai in Argolis, and Kyme in Euboia. These are marked with various characters (in one case with a double axe), and conform to definite weight standards. Presumably, therefore, they are a medium of exchange. But it is far from certain that these castings are double axes: Sir A. J. Evans in *Corolla Numismatica* Oxford 1906 p. 355 ff. treats them as mere ingots. More to the point are the copper double axes found in northern Europe (*supra* p. 617), if not also some of the bronze axes found in Gaul (J. Déchelette *Manuel d'archéologie préhistorique* Paris 1910 ii. 1. 254). On the other hand, the evidence for the cult of the double axe in Crete and Asia Minor is overwhelming. The implement had at once a commercial and a religious significance.

(pl. xxvii, *b*)[4]. Perhaps both in Crete and in Tenedos the bisexual axe, symbolising the union of the god with the goddess, was believed to bring fertility to field and vineyard[5].

Attention may here be called to a *drachmé* of fine style, represented in the cabinets of London (fig. 594)[6] and Paris[7], which gives the goddess of the obverse a necklace and connects the axe

[2] W. Greenwell in the *Num. Chron.* Third Series 1893 xiii. 89, F. Imhoof-Blumer in the *Zeitschr. f. Num.* 1897 xx. 274, Babelon *Monn. gr. rom.* ii. 1. 367 f. no. 624. Fig. 593 is from a cast of the Weber specimen, for which I am indebted to the kind offices of Mr C. T. Seltman.

[3] Mr G. F. Hill suggested to me that the alleged 'fillet' might be due to a mere crack in the die. But Mr C. T. Seltman justly observes that the occurrence of three specimens all showing a crack in precisely the same condition is most improbable.

[4] *Supra* p. 520.

[5] Cp. the coin of Mostene showing a double axe between a bunch of grapes and two ears of corn (*supra* p. 564 n. 8).

[6] *Brit. Mus. Cat. Coins* Troas, etc. p. 92 pl. 17, 8. I first noticed the details of the reverse, when examining the original. Fig. 594 is from a cast kindly supplied by Mr G. F. Hill, who is inclined to regard the 'fillet' as a line of fortuitous dots.

[7] Babelon *Monn. gr. rom.* ii. 2. 1307 f. pl. 166, 23. This coin appears to be from the same dies as the specimen in the British Museum.

of the reverse with a couple of adjuncts—on one side a handsome bunch of grapes, on the other a little Nike engaged in wreathing the haft. It will be observed that the grape-bunch actually touches the left blade, while the Nike is linked to the right blade by a short but clearly-marked fillet[1]. I should infer that, at the time when this coin was struck, grapes and a small Nike were kept dangling from the wings of the sacred weapon.

Of the grape-bunch there is more to be said. From about the year 420 B.C. onwards it is constantly associated with the Tenedian

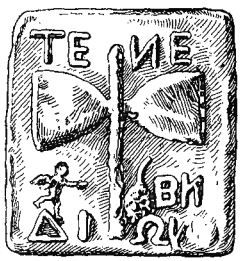

Fig. 595.

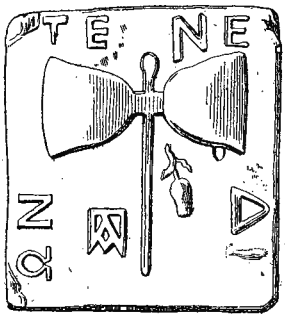

Fig. 596.

axe. And this, not only on the silver coins of Tenedos (*e.g.* figs. 585 ff., 593). Two leaden weights (*hemimnaia*) of the same island, now at Paris (fig. 595)[2] and Berlin (fig. 596)[3], show the grapes as well as the axe. And a bronze tablet of Hellenistic date (*c.* 300—250 B.C.) from Olympia, recording a decree in honour of the Tenedian wrestler Damokrates, is embellished with two double axes and a bunch of grapes (fig. 597)[4]. The grapes imply a Dionysiac divinity of some sort, and go far towards establishing the contention of L. Stephani[5] and F. Lenormant[6] that the axe refers to a Tene-

[1] For the fillet thus used as a means of magic connexion see *supra* p. 408 n. 0.

dian cult of Dionysos. Lenormant remarked that Simonides of Keos in one of his riddles speaks of an axe as the 'ox-slaughtering

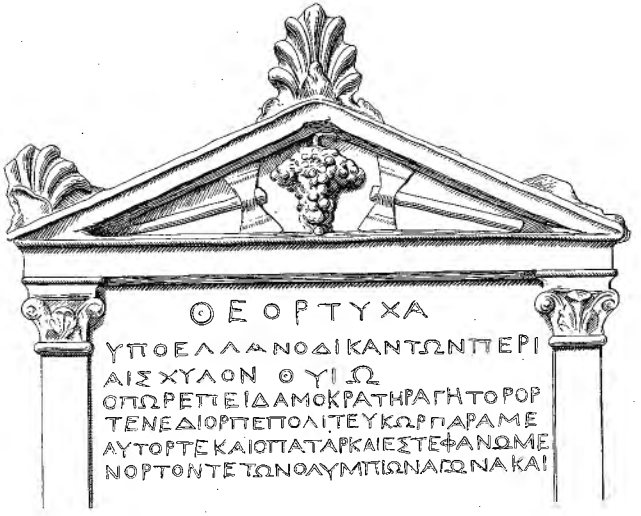

Fig. 597.

servitor of king Dionysos[1],' and—what is more convincing—that

[1] Simonid. *frag.* 172 Bergk[4], 163 Hiller—Crusius, *ap.* Athen. 456 C—E *γριφώδη δ' ἐστὶ καὶ Σιμωνίδη ταῦτα πεποιημένα, ὡς φησι Χαμαιλέων ὁ Ἡρακλεώτης ἐν τῷ περὶ Σιμωνίδου* (*frag.* 13 Köpke in E. Koepke *De Chamaeleontis Heracleotae vita librorumque reliquiis* Berlin 1856 p. 21 ff.)· '*μιξονόμου τε πατὴρ ἐρίφου καὶ σχέτλιος ἰχθὺς | πλησίον ἡρείσαντο καρήατα· παῖδα δὲ Νυκτὸς | δεξάμενοι βλεφάροισι, Διωνύσοιο ἄνακτος | βουφόνον οὐκ ἐθέλουσι τιθηνεῖσθαι θεράποντα.*' (*A*) *φασὶ δ' οἱ μὲν ἐπί τινος τῶν ἀρχαίων ἀναθημάτων ἐν Χαλκίδι τοῦτ' ἐπιγεγράφθαι, πεποιῆσθαι δ' ἐν αὐτῷ τράγον καὶ δελφῖνα, περὶ ὧν εἶναι τὸν λόγον τοῦτον.* (*B*) *οἱ δὲ εἰς ἐπιτόνιον ψαλτήριον δελφῖνα καὶ τράγον εἰργασμένον εἰρῆσθαι· καὶ εἶναι τὸν βουφόνον καὶ τὸν Διονύσου θεράποντα τὸν διθύραμβον.* (*C*) *οἱ δέ φασιν ἐν Ἰουλίδι τὸν τῷ Διονύσῳ θυόμενον βοῦν ὑπό τινος τῶν νεανίσκων παίεσθαι πελέκει. πλησίον δὲ τῆς ἑορτῆς οὔσης εἰς χαλκεῖον δοθῆναι τὸν πέλεκυν· τὸν οὖν Σιμωνίδην ἔτι νέον ὄντα βαδίσαι πρὸς τὸν χαλκέα κομιούμενον αὐτόν. ἰδόντα δὲ καὶ τὸν τεχνίτην κοιμώμενον καὶ τὸν ἀσκὸν καὶ τὸν καρκίνον εἰκῆ κείμενον καὶ ἐπαλλήλως ἔχοντα τὰ ἔμπροσθεν, οὕτως ἐλθόντα εἰπεῖν πρὸς τοὺς συνήθεις τὸ προειρημένον πρόβλημα. τὸν μὲν γὰρ τοῦ ἐρίφου πατέρα τὸν ἀσκὸν εἶναι, σχέτλιον δὲ ἰχθὺν τὸν καρκίνον, Νυκτὸς δὲ παῖδα τὸν Ὕπνον, βουφόνον δὲ καὶ Διονύσου θεράποντα τὸν πέλεκυν.*

An elaborate, but not very enlightening, attempt to make sense of all this will be found in W. Schultz *Rätsel aus dem hellenischen Kulturkreise* Leipzig 1909 i. 16, 31, 36 no. 17, Leipzig 1912 ii. 111—117 (=*Mythologische Bibliothek* iii. 1 and v. 1), who distinguishes *A* and *B* as partial solutions from *C* as relatively complete. In *A* Schultz emends *ἐν χαλκεί<ῳ τρίπο>δι*, holding that the bronze tripod of *A* is tantamount to the

The double axes of Tenedos

Alexander tyrant of Pherai was specially devoted to the cult of Diónysos *Pélekys*, Dionysos the 'Double Axe,' at Pagasai on the Thessalian coast[1]. Silver coins struck by this Alexander between 369 and 357 B.C. have as their reverse type a warrior sitting a horse, whose flank is marked with the double axe, another double axe being beneath it (fig. 598)[2], or a lion's head, sometimes with a double axe below it[3], or a double axe alone (fig. 599)[4]. Hence B. V. Head[5] suggested that the Janiform type of the Tenedian coins

strung lyre of *B* (cp. Artemon of Kassandreia *frag.* 12 (*Frag. hist. Gr.* iv. 342 f. Müller) *ap.* Athen. 637 B—F, where Pythagoras of Zakynthos invents a musical tripod composed of three lyres). In both *A* and *B*, according to Schultz, the 'goat' and 'dolphin' are wrongly conceived as *on* the ringing vessel, not *in* it; and 'dolphin' is a blunder for 'crab.' In *B* he supposes that 'Dithyramb' means 'Dionysos.' In *C* we are to assume that Dionysos was awakened out of his annual sleep by an axe used to strike a caldron containing bellows (*ἀσκός*) and tongs (*καρκίνος*): on account of its contents the caldron was dubbed a smithy (*χαλκεῖον*), on account of its rumbling echoes a bull (implied in *βουφόνος*). The whole riddle is translated as if there were a comma *after*, not *before*, *Διωνύσοιο ἄνακτος*: 'Der Vater des vermischt weidenden Böckleins (*Balg*) und der schreckliche Fisch (*Zange*) | stiessen die Häupter an einander: der das Kind der Nacht (*Schlaf*) | von den Lidern des Herrn Dionysos nehmen will— | dass dieser Rinder tötende Diener (*Axt*) gelabt werde—das wollen sie nicht.'

I fear that Simonides' riddle remains unread. See, however, *infra* p. 663 ff. for the combination of crab with double axe.

[1] Theopomp. *frag.* 339 (*Frag. hist. Gr.* i. 332, iv. 643 Müller) *ap.* schol. *Il.* 24. 428 *καὶ Θεόπομπός φησιν Ἀλέξανδρον Φεραῖον Διόνυσον τὸν ἐν Παγασαῖς, ὃς ἐκαλεῖτο Πέλεκος* (*leg.* Πέλεκυς with Preller—Plew *Gr. Myth.* i. 566 n. 2 rather than *πελεκᾶς* or *πελεκῶνος* with L. Stephani in the *Compte-rendu St. Pét.* 1863 p. 116 n. 4), *εὐσεβεῖν διαφέρως. καταποντωθέντος δὲ Ἀλεξάνδρου, Διόνυσος ὄναρ ἐπιστάς τινι τῶν ἁλιέων ἐκέλευσεν ἀναλαβεῖν τὸν φορμὸν τῶν ὀστῶν. ὁ δὲ ἀπελθὼν ἐς Κράννωνα τοῖς οἰκείοις ἀπέδωκεν, οἱ δὲ ἔθαψαν.* So cod. V. Cod. T. reads *ὃς ἐκαλεῖτο Πελάγιος*—a needless emendation (accepted by E. Maass '*ΔΙΟΝΤΣΟΣ ΠΕΛΑΓΙΟΣ*' in *Hermes* 1888 xxiii. 70—80). Parallels abound: *e.g.* *Κρόνος*, the 'Chopper' (? see *supra* p. 549); *Hamar* or *Hamer* as a title of the Germanic thunder-god (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 11 n. 1, 181 f., 1883 ii. 883, 885 n. 2, 1888 iv. 1344 f., 1605, E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 204, 208 ff. and Index *s.v.* 'Hammer'); Charles *Martel*, whose gigantic hammer is still to be seen cut in the hillside at Tours (H. Bayley *Archaic England* London 1919 p. 355). My brother-in-law the Rev. H. E. Maddox notes that the sixth incarnation of Vishnu was *Paraśu-rāma*, the 'Axe-Rāma,' a Brāhman who cleared the earth of the Kshatriya race twenty-one times till he was at last defeated by Vishnu's seventh incarnation *Rāma-ćandra*, the 'Moon-like-Rāma.' Paraśu-rāma forced the ocean to retire for the formation of the Malabar coast, caused vast fissures in the Western Ghāts and other mountains by blows of his axe, etc. He is still worshipped in Malabar and the Koṅkan (Sir M. Monier-Williams *Brāhmanism and Hindūism*[3] London 1887 pp. 110, 270 f.).

[2] *Brit. Mus. Cat. Coins* Thessaly etc. p. 47 pl. 10, 11 (= my fig. 598) didrachm, Head *Hist. num.*[2] p. 308 fig. 176.

[3] Head *Hist. num.*[1] p. 261 drachm: 'Lion's head; beneath, sometimes, bipennis.' *Id. ib.*[2] p. 308 omits all reference to the 'bipennis.' Are we to infer that this weapon figures only on the didrachm and the obol?

[4] Head *Hist. num.*[2] p. 308 obol. Fig. 599 = the *Pozzi Sale Catalogue* Genève 1920 p. 70 no. 1257 pl. 41.

has on the obverse a bearded head of Dionysos (?), on the reverse a double axe surrounded by a grape-vine (fig. 601)[1]. Finally, we have already seen reason to think that in Tenedos itself Dionysos *Anthroporrhaistes*, 'Smiter of Men,' was conceived as embodied in an axe[2].

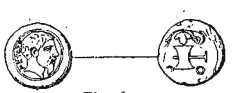

Fig. 601.

There are, then, strong grounds for supposing that the Tenedian coin-types relate to the cult of Dionysos. The main objection to that view is thus stated by W. Wroth[3]: 'if Dionysos were intended, the male head would almost certainly be wreathed with ivy. On those coins, however, on which the head is wreathed, the wreath is of laurel and not of ivy. Perhaps, therefore, the heads are those of Zeus and Hera.' Wroth's conclusion is quoted with approval by B. V. Head[4], and would doubtless have commended itself to C. Lenormant[5], who equated *Ténes* the eponym of Tenedos with the Etruscan *Tinia*[6] and the Cretan *Tán*[7]. Such an equation is, of course, philologically impossible. But the fact remains that the head with its bay-wreath resembles Zeus rather than Dionysos, and any hypothesis connecting it with the latter must account for its likeness to the former.

On the whole, I should summarise the situation as follows. Tenedos bears a name which is pre-Greek. A. Fick[8], comparing it with a second *Ténedos* on the borders of Lykia and Pamphylia, with *Lébedos* in Ionia (Lydia), and with *Sébeda* in Lykia, treats the name as Hittite, and points out that *Ténes* or *Ténnes* (for **Téndes*) was derived from *Ténedos*, not *vice versa*[9]. Now *Ténnes* occurs again as the name of a king of Sidon in the revolt of Phoinike from Artaxerxes iii Ochos[10]. And Tenedos itself, as Pliny[11] informs us, was once called *Phoinike*. It would seem, then, that in the pre-history of the island we have to reckon with the Phoinikes, whose relations to the 'Minoan' culture were of the closest[12].

[12] Sir A. J. Evans in the *Journ. Hell. Stud.* 1912 xxxii. 278: 'The people whom we

'Minoan' objects have in fact come to light in Tenedos (fig. 602)[1] and suggest that here in early days was a 'Minoan' settlement. The settlers called themselves Asterioi[2] and doubtless discovered with joy that at Asterion in their island were river-crabs marked with a double axe[3]. The curious combination of crab and double axe recalls the joint cult of Zeus *Osogôa* and Zeus *Labráyndos* at Mylasa[4]. The circumstances, however, though similar, are not identical. In Karia a local deity, whose attribute was the crab, having been Hellenised into a Zeus of the sea, was fused with a Zeus of the sky, inheritor of the ancient 'Minoan' double axe, the resultant god being known to the Greeks as Zenoposeidon. In Tenedos too we are concerned with the legacy of the double axe. But here, in the Thraco-Phrygian area, the principal sky-god was Dios, who was worshipped in twofold form as Father and Son —Zeus and Dionysos, said the Greeks[5]. It matters little, therefore, whether we assert that among the Tenedians the 'Minoan' axe passed into the hands of a Dionysiac Zeus or into those of a Zeus-like Dionysos. Not improbably the former developed into the latter, stress being laid first on the older and afterwards on the younger aspect of the god. But in either case we mean him who was at once the husband and the son of Semele. His effigy and hers are combined as the Thraco-Phrygian equivalent of the 'Minoan' Kronos and Rhea. What then of the crabs? Presumably in Tenedos, as in Karia, they belonged to some local deity identified with Zeus.

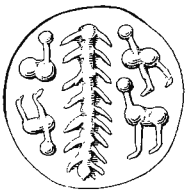

Fig. 602.

Confirmation is not far to seek. Thirty miles or so to the west of Tenedos lies Lemnos, a great centre of Cabiric cult[6]. Cor-

discern in the new dawn [*sc.* of classical Greece] are not the pale-skinned northerners—the "yellow-haired Achaeans" and the rest—but essentially the dark-haired, brown-complexioned race, the Φοίνικες or "Red Men" of later tradition, of whom we find the earlier portraiture in the Minoan and Mycenaean wall paintings.'

[1] I figure a coarsely-cut lenticular seal-stone, which I acquired in Athens in 1901. Material: haematite. Scale: ½. Alleged *provenance*: Tenedos.

[2] *Supra* i. 543 n. 6.

[3] *Infra* p. 669 n. 5. Mr L. A. Borradaile, Lecturer in Zoology to the University of Cambridge, informs me that the crabs in question probably belonged to the species *Telphusa fluviatilis*, the marking of whose back might be held to resemble the head of a double axe. He kindly refers me to Miss M. J. Rathbun 'Les crabes d'eau douce' in the *Nouvelles Archives du Muséum d'Histoire Naturelle* Quatrième Série Paris 1904 pp. 254—258 pl. 9, 1 and 5.

Cp. O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 491, 609.

[3] A. de Gubernatis *Zoological Mythology* London 1872 ii. 354—359 ('The crab'), L. Hopf *Thierorakel und Orakelthiere in alter und neuer Zeit* Stuttgart 1888 p. 226 ('Krebse'), O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 485—500 ('Krebse'), O. Dähnhardt *Natursagen* Leipzig and Berlin 1907—1912 i—iv Index to each vol. *s.v.* 'Krebs.'

The monstrous crab sent by Hera to attack Herakles during his fight with the Hydra (A. Furtwängler in Roscher *Lex. Myth.* i. 2198 f., 2224, 2243, O. Gruppe in Pauly—Wissowa *Real-Enc.* Suppl. iii. 1033 ff.) appears first on *fibulae* of the Geometric period (*Brit. Mus. Cat. Bronzes* p. 373 ff. no. 3205 (*a*) fig. 87, W. N. Bates in the *Am. Journ. Arch.* 1911 xv. 1 ff. figs. 2, 3). Okeanos on imperial coins of Tyre is a reclining figure with a head-dress of crab's-claws (*Brit. Mus. Cat. Coins* Phoenicia pp. cxlii, 289 no. 464, 296 pl. 35, 5): cp. a monochrome mask of Okeanos in a painting from Pompeii (Helbig *Wandgem. Camp.* p. 205 no. 1023 'mit Hörnern wie von Krebsscheeren,' figured by G. Fiorelli *Giornale degli scavi di Pompei* Napoli 1861 p. 16 pl. 3, 6). Thalassa on a coin of Perinthos likewise wears a head-dress of crab's-claws (*supra* i. 752 f. fig. 552), as did a statue in the Forum Constantini at Constantinople representing Thetis (Arethas *ap.* schol. Aristeid. ii. 710 Dindorf *ἧς ἀντικρὺ ἐν δεξιᾷ εἰσιοῦσι τῶν προπυλαίων καὶ ἡ τοῦ 'Αχιλλέως ἀνάκειται Θέτις, καρκίνοις τὴν κεφαλὴν διαστεφής· κ.τ.λ.*) or Amphitrite (Kedren. *hist. comp.* 323 A (i. 565 Bekker) *πρὸς δὲ τὴν ἀνατολὴν ἡ 'Αμφιτρίτη, χηλὰς ἔχουσα καρκίνου ἐπὶ τῶν κροτάφων. κ.τ.λ.*). This device became, in fact, a commonplace of marine subjects (*e.g. Brit. Mus. Cat. Bronzes* p. 176 no. 964 bust of Triton: 'above the forehead are two lobster's or crab's claws,' *ib.* p. 177 no. 971 sea-god (?): 'he has lobster's claws on his head,' Amelung *Sculpt. Vatic.* ii. 250 ff. *sarcophagus* with sea-divinities: 'ein bärtiger Meerkentaur mit Krebsscheren am Kopfe.' See also W. Drexler in Roscher *Lex. Myth.* i. 1585).

'Ασταϰός or Ἄσταϰος, a town on the Gulf of Olbia in Bithynia, had as eponym Astakos, son of Poseidon by the nymph Olbia (Arrian. *frag.* 29 (*Frag. hist. Gr.* iii. 592) *ap.* Steph. Byz. *s.v.* Ἄσταϰος). The name 'Ασταϰός or Ἄσταϰος has been plausibly derived from ἀστακός, 'a lobster' (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i. 162 'Krabbe'). For the lobster abounded in these waters (Archestratos *frag.* 8 Ribbeck *ap.* Athen. 104 f f., Aristot. *hist. an.* 5. 17. 549 b 15 f.) and furnished an obvious *type parlant* to silver coins of Astakos struck in *s.* v B.C., which

astrology[1] was serious enough,—it even lingered on into the middle

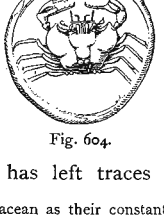

Fig. 604.

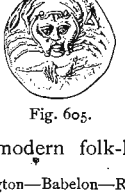

Fig. 605.

ages[2], and has left traces of itself in modern folk-lore[3]. The

have this crustacean as their constant device (Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 266 pl. 41, 1—6, Babelon *Monn. gr. rom.* ii. 2. 1489 ff. pl. 181, 1—6). Yet it hardly follows that Astakos in Bithynia, or for that matter Astakos in Akarnania, really drew its name from the lobster. A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 pp. 85 f., 135 refers these place-names to the Leleges.

Kern in Pauly—Wissowa *Real-Enc.* x. 1951 justly observes: 'Erst bei der Annahme dieser Gespenster versteht man ganz den Witz des Aristophanes in den Wolken v. 1260 f.: *τίς οὐτοσί ποτ' ἔσθ' ὁ θρηνῶν; οὗτι που τῶν Καρκίνου τις* **δαιμόνων** *ἐφθέγξατο.*'

[3] B. Schmidt *Griechische Märchen, Sagen und Volkslieder* Leipzig 1877 p. 83 ff. no. 9 ('Prinz Krebs') tells a Zakynthian tale in which the hero married to the king's daughter is a golden crab by day, but a prince by night, with power to change into an eagle at his pleasure. The story is a variant of the Beast-bridegroom *formula*, on which see *e.g.* J. Bolte—G. Polívka *Anmerkungen zu den Kinder- u. Hausmärchen der Brüder Grimm* Leipzig 1915 ii. 234 ff., especially p. 255.

affiliation of the creature to Hephaistos stood to reason: was not he a smith? and were not the smith's tongs or pincers commonly dubbed 'crabs' (*karkínoi*)[1], while a certain species of crab was known as 'tongs' (*pyrágra*)[2]? Finally, a parallel to the Tenedian river-crabs signed with the double axe can be found in the Agrigentine river-crabs marked with a bull's head (?) (fig. 604)[3] or a *Gorgóneion* (fig. 605)[4].

If we are justified in supposing that the double axe of Tenedos belonged to a god conceived as the rebirth of his own father, analogy with the Cretan Zagreus would lead us to expect that the Tenedian god too was served with rites of omophagy, in which a human victim, regarded as consort of the goddess[5], was dismembered and even devoured by the king[6]. This expectation is to some extent realised. For we have already had occasion to notice the horrible statement of Euelpis that in Tenedos, as in Chios, 'they used to rend a man in pieces, sacrificing him to Dionysos

[1] Stephanus *Thes. Gr. Ling.* iv. 971 B—C.

[2] Hesych. *s.v.* πυράγρα and πυράγρη ἡ πυράγρα.

[3] Tetradrachms of Akragas, struck *c.* 472—415 B.C., have for reverse type a large crab (*Brit. Mus. Cat. Coins* Sicily p. 8 no. 38 fig., *Hunter Cat. Coins* i. 156 pl. 11, 13, Babelon *Monn. gr. rom.* ii. 1. 1545 f. pl. 78, 4, Imhoof-Blumer and O. Keller *Tier- und Pflanzenbilder auf Münzen und Gemmen des klassischen Altertums* Leipzig 1889 p. 49 pl. 8, 1). Mr L. A. Borradaile agrees with O. Keller *loc. cit.* that this is *Telphusa fluviatilis*, a species of crab common in the sweet waters of central and southern Italy, Sicily, Greece, and Asia Minor. He adds that, apart from Japanese pictures, he has never seen a more exact representation of it in art. Fig. 604 is from a specimen in my collection. Mr E. J. Seltman, from whom I obtained it, holds that the crab is marked with a bull's head as sign of the tauriform river-god, and compares the didrachm inscribed A+∃ (*Brit. Mus. Cat. Coins* Sicily p. 7 no. 25, Babelon *Monn. gr. rom.* ii. 1. 1547 f. pl. 78, 12. Fig. 606 is from a specimen of mine), which he would read as an allusion to a festival of Acheloios (Babelon *Monn. gr. rom.* ii. 1. 1405 ff. pl. 66, 20, Head *Hist. num.*[2] p. 76 fig. 36 a *statér* of Metapontum with river-god inscribed AΨΕΛΟΣΟ ΑΕΟΙΛΟΝ. Schol. T. *Il.* 24. 616 says of the Acheloios καὶ Σικελιῶται αὐτὸν τιμῶσιν). This combination, which is undeniably ingenious, was accepted by the late J. R. McClean, but involves two doubtful assumptions: (*a*) that the markings on the crab's back were viewed as a bull's head by the ancients, and (*b*) that A+∃ is for A+E.

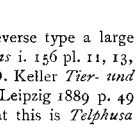

Fig. 606.

Omádios ("the god of Raw Flesh")[1].' That the man thus done to death was viewed as partner of the goddess, or was actually eaten by the king, we are not told. But some such beliefs, more than half forgotten, may underlie the later rationalised and romanticised legends of the island, which tell how a prince, caught in adultery, was savagely slain with an axe.

The oldest version of the story is preserved in a fragment of Aristotle's work *On the Government of Tenedos*[2]:

'A certain king in Tenedos made a law that he who found adulterers should slay them both with an axe. And, when it fell out that his son was found in adultery, he ordained that the law should be kept even in the case of his own son. The son having been slain, the thing passed into a proverb, which is used of cruel actions. Hence too the coins of Tenedos have stamped upon them an axe on the one side and two heads on the other, to remind men of the fate of the king's son.'

With this may be combined sundry statements occurring in the mediaeval collections of ancient Greek proverbs. Thus Makarios Chrysokephalos (*s.* xiv A.D.) *à propos* of the proverbial 'Tenedian axe' says: 'In the island of Tenedos were dedicated two axes, which were worshipped, and by means of them adulterers were slain[3].' Apostolios too, in explaining another proverb, that of the 'Tenedian advocate,' refers to the same alleged fact: 'The Tenedians among their dedicated objects honour a couple of axes[4].' Apostolios certainly is a very late authority (*s.* xv A.D.); but he appears to be copying *verbatim* from Souidas[5] (*s.* x A.D.) or Photios[6] (*s.* ix A.D.), and they in turn depend upon earlier and more reliable sources. If these allusions to the cult of *two* axes in Tenedos are trustworthy, they furnish an interesting point of comparison with Cretan practice[7]. For here, as there, the two axes might be taken to signify god and goddess respectively[8]:

Further evidence with regard to the Tenedian axe is forthcoming in connexion with another proverb, the 'man of Tenedos.' Photios[9] and Souidas[10] have the following paragraph:

[1] *Supra* i. 656, 659 n. 6.

[2] Aristot. *frag.* 551 Rose *ap.* Steph. Byz. *s.v.* Τένεδος, cp. Phot. *lex.* and Souid. *s.v.* Τενέδιος ξυνήγορος, Apostol. 16. 26 *s.v.* Τενέδιος συνήγορος. The same account of the coin-types is given by Herakleides Pont. *de rebus publicis* 7. 3 (*Frag. hist. Gr.* ii. 213 f. Müller).

[3] Makar. 8. 7 ἐν γὰρ Τενέδῳ τῇ νήσῳ δύο πελέκεις ἀνέκειντο σεβάσμιοι, δι' ὧν ἀνῃροῦντο οἱ μοιχοί.

[8] *Supra* pp. 537, 653.

[9] Phot. *lex. s.v.* Τενέδιος ἄνθρωπος.

[10] Souid. *s.v.* Τενέδιος ἄνθρωπος.

'Kyknos the son of Poseidon had begotten two children, Hemithea and Tennes, when he married again. Tennes was accused by his step-mother of making an attempt upon her. Kyknos believed her, put the young man into a chest, and, since Hemithea chose to share her brother's danger, dropped them both into the sea. The chest floated to the island that used to be called Leukophrys but was afterwards known as Tenedos, taking its name from Tennes. He became king of the island and made a law that behind those who bore false witness should stand the public executioner, with axe upraised so that, if convicted, they might instantly be put to death. This fearful sight gave rise to the proverb, the "man of Tenedos," which is applied to persons of fearful aspect.'

A briefer form of the same paragraph is found in Zenobios' collection of proverbs[1] together with the statement that the proverb in question occurred in Menander's *Ephesian*[2].

Different again, at least in its concluding portions, is the account given by Pausanias, who mentions certain Tenedian axes as among the objects dedicated at Delphoi near the eastern end of Apollon's temple[3].

'The axes,' he says[4], 'are an offering of Periklytos, son of Euthymachos, a native of Tenedos, and refer to an old tale[5]. They say that Kyknos was a son of Poseidon and reigned as king at Kolonai, Kolonai being a town in the Troad over against an island called Leukophrys. Kyknos had a daughter named Hemithea and a son called Tennes by Prokleia....This Prokleia died first, and the second wife Philonome, daughter of Kragasos, fell in love with Tennes, but failed to win his affection, and told her husband falsely that Tennes had consorted with her against her will. Kyknos believed the deceitful tale, put Tennes with his sister into a chest, and cast them adrift on the sea. The brother and sister got safely to the island Leukophrys, which received its present name from Tennes. But Kyknos was not destined to be ignorant of this deception for ever: he therefore set sail to find his son, meaning to confess his mistake and ask forgiveness for his offence. When he had come to an anchorage at the island, and had fastened the hawsers from his ship to a certain rock or tree, Tennes in anger cut the cables with an axe. Hence, when people deny a thing stoutly, it is customary to say that "so-and-so cut this or that with a Tenedian axe." The Greeks declare that Tennes was slain by Achilles in the act of defending his country. And the Tenedians in course of time were compelled by their weakness to attach themselves to the inhabitants of Alexandreia on the mainland of the Troad.'

The same version of the tale is given by Konon[6] and Eusta-

[1] Zenob. 6. 9. Cp. also Eustath. *in* Dionys. *per.* 536, Phot. *lex.* and Souid. *s.v.* Τενέδιος ξυνήγορος, Apostol. 16. 26.

[2] Menand. *Ephesius frag.* 5 (*Frag. com. Gr.* iv. 126 Meineke).

[3] On votive double axes of bronze found at Delphoi see *supra* p. 628 f.

[4] Paus. 10. 14. 1—4.

[5] Plout. *de Pyth. or.* 12 states that the men of Tenedos dedicated their axe at Delphoi because at a place called Asterion in their island there were crabs the shells of which were marked like an axe. We gather from Souid. and Phot. *lex. s.v.* Τενέδιος ξυνήγορος and from Apostol. 16. 26 that these crabs were found in a small river. The place-name Ἀστέριον is again suggestive of 'Minoan' cult (*supra* i. 543 n. 6, ii. 663).

[6] Konon *narr.* 28.

thios[1], though the latter calls the brother and sister Tenes and Leukothea, and speaks of their step-mother as Philonome or Polyboia. Diodoros[2] adds a few details. It was a flute-player who had falsely charged Tennes with attempting the honour of his step-mother: consequently, when Tennes, after leading a life distinguished for virtue and helpfulness, received divine honours, no flute-player was permitted to enter his precinct[3]; nor might any man there mention the name of Achilles, since it was Achilles who had slain him. Tzetzes[4] too contributes his quota. The name of the flute-player that denounced Tenes was Molpos[5] or, as a variant has it, Eumolpos[6]. Kyknos, on discovering the facts of the case, slew Philonome, and himself came and dwelt with his children in Tenedos. Here they were all three found and attacked by Achilles on his way to Troy. It had been fated that Achilles should die whenever he slew a son of Apollon, and Thetis had given him as an attendant one Mnemon, whose business it was to remind him of this special prohibition. But Tenes, though in reality a son of Apollon, passed as the son of Kyknos. Achilles, therefore, slew without hesitation both Kyknos and Tenes, and, when he realised what he had done, slew Mnemon into the bargain. He also pursued Hemithea, who fled from his embraces and was swallowed by the earth[7].

We fasten on this last statement as an indication that Hemithea was originally an earth-power. A goddess of the same name possessed a famous sanctuary at Kastabos on the Carian Chersonesos. According to local tradition[8], Staphylos had by Chrysothemis three daughters—Molpadia, Rhoio, and Parthenos. Finding that Rhoio was with child (by a man, as he supposed, but in reality by Apollon), he shut her up in a chest and flung her into the sea. The chest came ashore at Delos, where Rhoio gave birth to Anios and dedicated the babe on the altar of Apollon. The god hid the child, and later taught him seercraft and brought him to great honour. As to Molpadia and Parthenos, they were set to guard their father's wine—a recent invention—but fell asleep at their post. The swine they kept got in and broke the wine-jar. The maidens, fearing their

father's savage anger, fled to the shore and hurled themselves from a cliff. Apollon, however, established them in the Chersonesos, giving Parthenos a precinct at Boubastos and Molpadia a sanctuary at Kastabos, where 'owing to her divinely-contrived epiphany[1]' she received the name of Hemithea. Libations to her are made with honey-mixture (*melíkraton*), not wine; and no man that has touched a pig or eaten of its flesh may approach her precinct. Here she manifests herself by night, working cures and helping women in childbirth. Each successive detail confirms us in the belief that at Kastabos, as in Tenedos, Hemithea was essentially an earth-goddess.

The myths told of the two localities had other points in common. Not only are the names Molpos and Hemithea in Tenedos balanced by the names Molpadia and Hemithea at Kastabos, but the episode of Tennes and Hemithea sent to sea in a chest is paralleled by the episode of Rhoio and Anios similarly cast adrift. This *motif* is best known from the story of Danaë and Perseus. It occurs, however, in at least two other Greek tales, the Tegeate tale of Auge and Telephos[2], and that of Semele and Dionysos as told at Brasiai in Lakonike[3], not to mention Romulus and Remus in Italy. In fact, the Danaë-*formula*, as J. G. von Hahn[4] and T. F. Crane[5] have pointed out, recurs in modern *Märchen* from Naples[6], Tuscany[7], Wallachia[8], Epeiros[9], etc.[10]. The Epirote tale, entitled *The Half-Man*, deserves repetition:

[1] διὰ τὴν ἀπὸ τοῦ θεοῦ γενομένην ἐπιφάνειαν Ἡμιθέαν ὠνομάσθαι. P. Wesseling *ad loc.*: 'Mallem ἀπὸ τῆς θεοῦ. Ipsa Molpadia videtur indicari, quae praesentem opem aegris ferebat, τοῖς κάμνουσι κατὰ τοὺς ὕπνους ἐφισταμένη φανερῶς.'

[10] In a tale told by the Kirghiz of Siberia the daughter of a certain Khan, kept in a dark iron house, escapes into the bright world. Here the eye of God falls upon her and she conceives. Her angry father puts her in a golden chest and sends her floating across

A childless woman prayed for a child. God sent her a boy with half a head, half a nose, half a mouth, half a body, one hand, and one foot. He asked his mother for an axe and a mule, went off to the forest, and cut wood. One day, when riding to work, he caught sight of the king's daughter, who laughed at him so that from chagrin he dropped first his axe and then his cord, and did not even get down to pick them up. Staring disconsolately at a pool, he espied a fish, netted it in his rough cloak, and learnt from it a spell to obtain all his desires. He had but to say: 'At the first word of God, and at the second of the Fish,' this or that will take place. On his way home he saw the princess again and tried the spell upon her, bidding her to become pregnant. In due time she bore an apparently fatherless child. The king gave the child an apple, and told him to hand it to his father. The child handed the apple to the Half-Man. The king in anger had an iron vessel made, packed into it the princess, the Half-Man, and the child, and, giving them some figs for the child, flung the whole lot into the sea. Thereupon the Half-Man, tasting fig after fig, explained the whole situation to the princess, and at her suggestion, pronouncing his spell, brought the iron vessel safe ashore, provided a shelter from the rain, and built a magic castle with speaking stones, beams, and household utensils. It chanced that the king, when hunting, came that way and was entertained by the princess. The Half-Man, again eating a fig and using his spell, produced a splendid banquet with musicians and dancers complete. The king was astounded. But the princess, as a last experiment, bade the Half-Man by dint of fig and spell hide a spoon in the king's boot. She then pretended to miss something. The speaking spoon cried out and revealed its whereabouts. The king protested that he was being unjustly treated. The princess retorted that the wrong he suffered was nothing to the wrong he had committed, and told him all. So the king in amazement took his daughter back to the palace and married her to one of his lords. The Half-Man he made chief of his body-guard, and gave him his prettiest slave-girl to wife.

It is, no doubt, tempting to view the Half-Man with his axe as the complement of *Hemithéa*, the 'Half-Goddess,' and to assume some connexion with the coin-type of Tenedos. Nevertheless such an assumption would be extremely rash[1]. Other versions show that the Half-Man as such is not a constant feature of the folk-tale. The inference that I wish to draw is rather that the myth of Tennes and the earth-goddess Hemithea had as early as the time of Konon

the sea—a close parallel to Danaë (W. Radloff *Proben der Volkslitteratur der türkischen Stämme Süd-Sibiriens* St. Petersburg 1870 iii. 82 f. cited by Frazer *Golden Bough*[3]: Balder the Beautiful i. 74 n. 2).

In another, from *Ulaghátsh*, a village of Kappadokia, the boy destined to be king is placed in a chest by his father and mother, and thrown into the sea (R. M. Dawkins *Modern Greek in Asia Minor* Cambridge 1916 p. 358 f. text and translation).

See also die Brüder Grimm *Kinder und Hausmärchen* Göttingen 1850 i. 175 ff. no. 29, G. O. H. Cavallius—G. Stephens *Schwedische Volkssagen und Märchen* Wien 1848 p. 95, A. Chodsko *Fairy Tales of the Slav Peasants and Herdsmen* trans. E. J. Harding London 1896 p. 313 ff. (princess and Sluggard shut up in a crystal cask and sent into the air by means of a balloon).

[1] At most it may be conceded that the whimsical notion of a half-man arose from some more serious *stratum* of popular belief: cp. what Zeus says of men in Plat. *symp.* 190 D *ἐὰν δ' ἔτι δοκῶσιν ἀσελγαίνειν καὶ μὴ 'θέλωσιν ἡσυχίαν ἄγειν, πάλιν αὖ, ἔφη, τεμῶ δίχα, ὥστ' ἐφ' ἑνὸς πορεύσονται σκέλους ἀσκωλίζοντες.*

(between 41 B.C. and 17 A.D.) been run into the mould of a *Märchen* involving the popular feature of the floating coffer. Possibly, too, the original character of the heroine as an earth-goddess persists in the trait that she must give the hero a fig before he can work his magic.

Returning now to the coin-types, we note that J. H. Eckhel[1] more than a century ago identified the Janiform head as a combination of Tennes and Hemithea. His conclusion was, I believe, substantially correct. Indeed, it might be maintained that the very name *Hemithéa*, the 'Half-Goddess,' or *Amphithéa*, the 'Double-Goddess,' as Hekataios[2] called her, has reference to the twofold type[3]. Only it must, I think, be borne in mind that Tennes and Hemithea, who bulk so big in the later myths of Tenedos, are but heroic representatives of an earlier sky-god and earth-goddess. Behind them we can detect the Thraco-Phrygian Dionysos and Semele, who in turn conceal the faded forms of the 'Minoan' Kronos and Rhea. As to the outward expression of their worship, at first a double axe or a pair of double axes symbolised the union of the two great powers. Then, in the sixth century B.C., we find a Janiform image serving the same purpose. Ultimately the divine couple appear to have had separate effigies, and that of Tennes at least had some pretensions to beauty. The Tenedians, says Diodoros[4] in the first century B.C., 'made a precinct of Tennes and used to honour him as a god with sacrifices, which they kept up till modern times.' Verres, therefore, deeply offended them when—as Cicero[5] informs us—he carried off from their midst a very handsome statue of 'Tenes himself, who in Tenedos is deemed a god most holy.'

The 'Minoan' cult; which occasioned the Tenedian combination of god and goddess, seems to have led to a like result elsewhere. A scaraboid gem of striped brown sard, found in Kypros and now forming part of a private collection in this country, shows a double head closely resembling that on the early coins of Tenedos (fig. 607)[6]. Silver coins of the 'Philisto-Arabian' series, struck during the fifth century B.C. at Gaza *Minóa*, likewise represent a bisexual Janiform

[4] Diod. 5. 83 (*supra* p. 670) τελευτήσας δ' ἀθανάτων τιμῶν ἠξιώθη (sc. Τέννης)· καὶ γὰρ τέμενος αὐτοῦ κατεσκεύασαν καὶ θυσίαις ὡς θεὸν ἐτίμων, ἃς διετέλουν θύοντες μέχρι τῶν νεωτέρων καιρῶν.

[5] Cic. *in Verr.* 2. 1. 49 Tenedo...Tenem ipsum, qui apud Tenedios sanctissimus deus habetur, qui urbem illam dicitur condidisse, cuius ex nomine Tenedus nominatur,—hunc ipsum, inquam, Tenem, pulcherrime factum, quem quondam in comitio vidistis, abstulit magno cum gemitu civitatis.

[6] Furtwängler *Ant. Gemmen* i pl. 6, 65 (=my fig. 607: scale ⅔), ii. 31.

head (figs. 608, 609)[1]. One specimen, in the British Museum, gives the male face a snub nose and a pointed ear, thereby imparting a Satyric character to the head (fig. 610)[2]. Another, at Paris, turns the profile into a full face with broad nose (fig. 611)[3]. This very curious treatment suggests that the god is Bes, who—unlike the general run of Egyptian deities—commonly appears *en face*[4]. The suggestion is

Fig. 607.

Fig. 608.

Fig. 609.

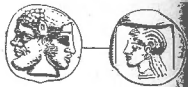

Fig. 610.

Fig. 611.

Fig. 612.

Fig. 613.

strengthened by a third specimen, also at Paris, which shows a bearded head with a mask of Bes attached to the back of it (fig. 612)[5]. It is possible too that both god and goddess stood in some relation to the lion; for the obverse of the first Parisian coin has two bearded heads surmounted by two lion-heads with lion-skins depending on either side (fig. 611), and the reverse of yet another Parisian coin

[1] *Brit. Mus. Cat. Coins* Palestine pp. lxxxiii ff., 176 f. pl. 19, 1—3, 7, p. 179 pl. 19, 20, *Hunter Cat. Coins* iii. 282 pl. 77, 30, Babelon *Monn. gr. rom.* ii. 2. 645 ff. pl. 123, 10, 11 f., 13 (=my fig. 608), 14, p. 651 ff. pl. 123, 25, Head *Hist. num.*[2] p. 805. Fig. 609 is from a specimen in the McClean collection at Cambridge. These coins are all drachms of Attic weight. As to their types, the owl and its accompanying inscription are certainly derived from Athenian originals modified to suit local requirements (J. P. Six in the *Num. Chron.* New Series 1877 xvii. 231, Babelon *op. cit.* ii. 2. 645 f., G. F. Hill in the *Brit. Mus. Cat. Coins* Palestine p. lxxxiv). The Janiform head has been referred to that of Lampsakos (Babelon *op. cit.* ii. 2. 645 f.), or to that of an Athenian trihemiobol (G. F. Hill *loc. cit.* p. lxxxiv f.): but both at Lampsakos and at Athens the double head is beardless.

[2] *Brit. Mus. Cat. Coins* Palestine p. 181 pl. 19, 30 (=my fig. 610).

[3] Babelon *Monn. gr. rom.* ii. 2. 657 f. pl. 124, 7 (=my fig. 611).

combines the profile of a goddess with that of a lion (fig. 613)[1]. If so, we may surmise that at Gaza, as in Tenedos, the Janiform head points backwards to the 'Minoan' cult of Kronos and Rhea. Rhea as the local Tyche kept her place from first to last. Kronos was succeeded by Zeus *Kretagenés*[2], otherwise known as Marnas[3], and apparently as Zeus *Aldémios* or *Áldos*[4], while Zeus in turn was partially eclipsed by the popular figure of Bes.

These Levantine examples of the male-*plus*-female head should

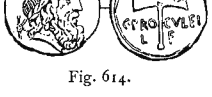

Fig. 614.

Fig. 615.

be compared, as J. P. Six[5] points out, with Berossos' description of the primeval androgynous being represented in the temple of Zeus *Bêlos* at Babylon[6].

A parallel to the survival of the 'Minoan' double axe in Tenedos might also be sought in Korkyra. Shortly before the battle of Aktion (31 B.C.) C. Proculeius, the partisan and friend of Octavian, struck copper coins in Korkyra with a head of Zeus on one side and a double axe on the other (figs. 614, 615)[7]. The head is accompanied

[1] Babelon *Monn. gr. rom.* ii. 2. 659 f. pl. 124, 10 (=my fig. 613) described as 'Tête imberbe d'Héraclès à droite, coiffée de la peau de lion.' But the head, which has an earring, is obviously derived from that of Athena on Attic tetradrachms etc.

[7] Fig. 614 is from Babelon *Monn. rép. rom.* ii. 388 fig.; fig. 615, from the cast of a specimen in the British Museum (*Brit. Mus. Cat. Rom. Coins* Rep. ii. 534 no. 235 pl. 116, 21).

by a monogram of the Greek letters KO, and there is frequently (figs. 614, 617) a countermark which appears to represent a double axe in a circle[1]. Now Proculeius is known to have been interested in the religious and mythical antiquities of the neighbourhood. For a small piece struck by him shows an *Agyieús*-pillar (fig. 616)[2], and

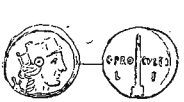

Fig. 616.

Fig. 617.

a large piece shows the ray-fish[3] whose poisonous tail, used as a spear-head[4] by Telegonos, caused the death of Odysseus (fig. 617)[5]. It is therefore likely enough that the double axe associated with Zeus in Korkyra was none other than the weapon of the old 'Minoan' sky-god.

[1] M. Bahrfeldt *Nachträge und Berichtigungen zur Münzkunde* Wien 1897 p. 227.

[2] M. Bahrfeldt *op. cit.* p. 227 fig. (=my fig. 616) pl. 10, 241.

[3] Numismatists for more than a century past (*e.g.* S. Havercamp in Morell. *Thes. Num. Fam. Rom.* i. 361 pl. Proculeia, 2, Rasche *Lex. Num.* vii. 171 f., 723) have described the type of this interesting coin as a ray-fish. F. Imhoof-Blumer and O. Keller *Tier- und Pflanzenbilder auf Münzen und Gemmen* Leipzig 1889 p. 43 pl. 6, 42 specify the thornback (*Raja clavata*). O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 376 f. pl. 2, 3 repeats this opinion, and further regards the death of Odysseus as due to the same fish. J. van Leeuwen, commenting on Od. 11. 134 ff. (ed. 2 Lugduni-Batavorum 1917), argues that the spear-head of Telegonos was the tail of a sting-ray (*Raja pastinaca*), which is not merely a formidable weapon (Plin. *nat. hist.* 9. 144) but actually poisonous (Opp. *de pisc.* 2. 470 ff., cp. A. C. L. G. Günther *An Introduction to the Study of Fishes* Edinburgh 1880 p. 190 fig. 98, p. 342, R. Lydekker *The Royal Natural History* London 1896 v. 545). A. C. Pearson, *à propos* of Soph. Ὀδυσσεὺς ἀκανθοπλὴξ ἡ Νίπτρα (*The Fragments of Sophocles* Cambridge 1917 ii. 105 ff.), by a curious slip takes Telegonos' fish to have been a roach. W. Radcliffe *Fishing from the Earliest Times* London 1921 justly protests that 'the absolutely harmless Roach' will not do, and agrees with J. van Leeuwen that the fish must have been a sting-ray. Returning to the subject in *The Times Literary Supplement* for Jan. 5, 1922 p. 13 Mr Radcliffe accepts a suggestion of Prof. D'Arcy W. Thompson (*ib.* for Dec. 15, 1921 p. 844) that the precise species was 'a great Eagle-Ray' (*Myliobatis aquila*).

[4] Dr A. C. Haddon informs me (Jan. 23, 1922) that spears tipped with spines of the sting-ray are well known in Melanesia generally and also in Queensland (*e.g. British Museum: Handbook to the Ethnographical Collections* London 1910 p. 121 fig. 99, *a* from the Fiji Islands). Kwoiam, a legendary hero of the Torres Straits, killed his mother by means of a spear pointed with three sting-ray spines (A. C. Haddon *Reports of the Cambridge Anthropological Expedition to Torres Straits* Cambridge 1904 v. 71)—a perfect parallel to the story of Telegonos.

[5] Fig. 617 is from Babelon *Monn. rép. rom.* ii. 388 fig. ('Jupiter en Terme.' Havercamp *loc. cit.*: 'Terminalis Jovis vel Neptuni.' Rasche *op. cit.* vii. 171: 'Neptuni.' Imhoof-Blumer *loc. cit.*: 'Hermenkopf').

(π) The hafted axe as a religious symbol.

The coins of Tenedos are by no means the only classical relic of pre-classical axe-cult. But before considering further evidence it will be well, for clearness' sake, to restate the essentials of the cult in question.

Throughout the Aegean and Adriatic area, as I maintain[1], we can trace the joint worship of a sky-father and an earth-mother. The former descends from above when the lightning flashes down and, in old aniconic days, leaves his weapon as a tangible token of himself. The latter ascends from below when vegetation springs up and, at the same early epoch, gives a visible proof of her presence in the sacred tree. Where, as was the case with the *sarcophagus* from *Hagia Triada*[2], we see the axe imbedded in the trunk, there we must recognise the union of the sky-father with the earth-mother, a union essential to the fertility of men and beasts and crops. The axe imbedded in a tree is the prototype of the axe imbedded in a wooden column[3] or a stalactite pillar[4]. Ultimately a hafted axe of the usual sort is found serving as a symbol of the united deities, the axe-head being the male, the axe-handle the female, element in their union.

(ρ) The axe and the sacred oak at Dodona.

The axe imbedded in the sacred tree is a feature of sundry cults, myths, and folk-tales. Early in the third century A.D. Philostratos described a real or imaginary painting of Dodona[5]. 'The golden pigeon,' he wrote, 'is still upon the oak-tree, she that is wise in sayings and oracles that she utters as from Zeus. And here lies the double axe left by Hellos the wood-cutter, from whom the Helloi of Dodona trace their descent. Fillets too are hung from the oak; for it gives oracles as does the tripod at Pytho.' This painting of the cult-scene at Dodona bears a curious resemblance to that of the cult-scene at *Hagia Triada*. In both we have the same noteworthy association of bird, axe, and tree. Moreover, the small votive axes of bronze found at Dodona (fig. 618)[6] recall the miniature votive

Jacobs cj. ἡ μὲν χρυσῆ πελειὰς ἡ ἐπὶ τῆς δρυὸς ἐν λογίοις ἣν σοφὴ καὶ οἱ χρησμοί, κ.τ.λ.), I would read ἡ μὲν χρυσῆ πέλεια ἕτ' ἐπὶ τῆς δρυὸς ἡ ἐν λογίοις σοφὴ καὶ χρησμοῖς, κ.τ.λ.

[6] *Supra* p. 648. Fig. 618 is from C. Carapanos *Dodone et ses ruines* Paris 1878 p. 100 f. pl. 54, 7 (length 0·12m).

axes of Crete. A fine double axe of iron, also from Dodona (fig. 619)[1], may give us some idea of Hellos' tool.

Philostratos' statement with regard to the axe left, apparently in the sacred tree, by the forefather of the Dodonaean priests is indeed remarkable. But still more remarkable is a folk-tale heard by J. G. von Hahn at *Jánina*, close to the site of the ancient Dodona. For in this tale not only do we get the incident of the

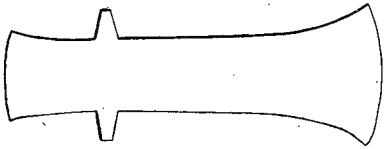

Fig. 618.

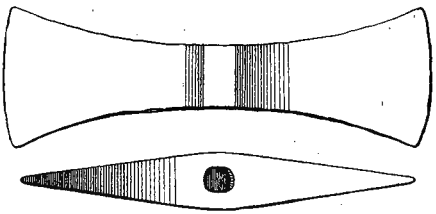

Fig. 619.

priestly wood-cutter leaving his axe in the tree, but also we have unmistakeable evidence of the axe being conceived as male and the tree as female. If I am right in my interpretation of the tale (and there is small room for error), it follows that here in an out-of-the-way corner of Europe survives a primitive conception which can be traced backwards, thanks to the Cretan *sarcophagus*, for the best part of four thousand years. The tale is this[2]:—

'A priest once went with his wife into the wood to cut timber. They found there a wood-cutter, with whom the woman went deeper into the wood. But the priest set about felling a wild pear-tree with his axe. He hewed and hewed till there was but a span left to cut through, and then he waited for his wife to come before cutting the rest. The tree, however, was so thick that it no longer held together, but collapsed of itself. No sooner had this happened than out of it came a she-bear, who said to the priest: "You must lie with me." "Hush!" replied the priest, "I am a holy man and dare not do so." "That's all one to me; do what I tell you," said the she-bear, and looked at him with so fierce a look that he was scared and, for good or ill, did what she wanted.

[1] C. Carapanos *op. cit.* p. 109 pl. 57, 6 and 6 *bis* (=my fig. 619). Length 0·21^{m}.

[2] Text unpublished; German translation in J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 72 ff. no. 75 'Das Bärenkind.'

Afterwards the she-bear had a child, who grew up strong, but being unlike the other bear-children got called a bastard. So one day the youngster asked his mother whether what his brothers said about him was true. And she made answer: "You have the axe for father." "Oh! mother, can the axe then beget children?" asked the boy, and pressed his mother for an answer till she said: "Take the axe, stand with it before the church, and ask—To whom does this axe belong? And, whoever recognises it, that man is your father." The boy did as he was bidden; but one after the other the people came out of church, and nobody would claim the axe. At last the priest too came out, and asked the boy: "Where did you get that axe from? It is mine!" And he replied: "If it is yours, so am I!" "Hush, blasphemer!" "Why so? You are in truth my father." So the boy went home with the priest, who said to his wife: "See, I've brought you this boy to serve you." The wife was pleased and said: "That's capital! Many thanks."

The first day the boy ate a loaf of bread. The second, he ate as much as the priest took in a whole month. Thereupon the priest said "You're no good to us!" and handed him over to a baker. Here the boy ate all the bread that the baker baked.

Then the king's cook came to the oven and, having had a look at him, told his master that he had seen such a fellow. The king was astonished, had the lad brought before him, and asked: "Can you load sixty mules with timber?" "Certainly," said he; "only you must have an axe made to suit me." Then the king had an axe made that weighed a hundred pounds. But the lad took it in his hands, broke it in pieces, and said: "That's no good to me; I must have a stouter one." After this they made him one that weighed five hundred pounds. He swung it with a single hand, and said: "That's the right axe for me!" He took the mules, went with them into a coppice, brought his axe to bear on the trees, and promptly had his sixty mules laden. On his way back he passed a plane-tree, seized it with his hands, wrenched it out of the ground, and carried it over his shoulder. Coming into the town like this, he tore down with his tree the roofs of the huts which stood beside his way. When the king saw him marching along, he was astonished and said to the baker: "He does indeed eat much, but he works much too; I will take him into my service." As time went on, the bear-child grew stronger and stronger. This great strength began to cause the king so much anxiety that he feared for his life. So he sent the lad forth to fetch the treasures of the Dogs-heads, hoping that these heads would devour him. But first they agreed that the king should give half his kingdom to the bear's son, if he brought the treasures. Off he went, beat the Dogs-heads, won thereby half the kingdom, and lived happily. But we here live more happily still.'

This folk-tale, which in part falls under J. G. von Hahn's thirty-seventh *formula*—'Strong Hans[1]'—and contains obvious parallels to the myth of Herakles, belongs to a very ancient *stratum* of human thought, and we need not hesitate to recognise in the axe-father and the tree-mother of the hero a genuine echo of primitive belief.

[1] J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 i. 59. The closest resemblance to our tale is borne by one from Argyllshire entitled 'The son of the Strong Man of the Wood' (J. Macdougall *Folk and Hero Tales* London 1891 p. 187 ff.).

(σ) The sword and the sacred tree at Rhegion.

The appearance of the tree-mother as a bear suggests comparison with Artemis, whose relations to that animal are well known[1]. It is therefore interesting to find that Orestes, when he fled from the Taurian land with the image of Artemis, touched at Rhegion for purposes of purification, built there a temple of Apollon, and on departure left his sword in a tree, where it was long to be seen[2]. The 'Swordsman's Harbour' at Rhegion perhaps commemorated his exploit[3]. Further, he bore the image of Artemis done up in a bundle of rods, from which circumstance she received her title *Phakelitis*[4] or *Phakeline*[5], the goddess 'of the Bundle.' I have elsewhere[6] argued that this title enables us to regard as analogous cases the axe projecting from a bundle of rods, which was carried by the Roman lictor[7], and the iron scimitar set up on numerous bundles of sticks, which was worshipped by the Scythians[8].

Another myth that should be considered in this connexion is that of Myrrha, the daughter of Kinyras. According to one version[9], she loved her own father, made him drunk, and consorted with him[10]. When he realised what had happened, he pursued her with a drawn sword. Hereupon she was changed into a 'myrrh'-tree. Her father struck it with his sword; and from the tree Adonis was born. It may be suspected that in this form of the story the sword has taken the place of a double axe. For a copper of Myra in Lykia issued by Gordianus iii Pius (238—244 A.D.) shows a tree, with a female

image in its branches, attacked by two men with double axes and defended by two snakes (fig. 620)[1]. This unusual design can be paralleled by *quasi*-autonomous coppers of Aphrodisias in Karia: here a leafless tree is attacked by two naked men, wearing Phrygian caps, of whom one brandishes a double axe and the other kneels or runs away (figs. 621, 622)[2]. On specimens struck by Saloninus (253—266 (?) A.D.) (fig. 623)[3] or Valerianus (253—260 A.D.) (fig.

624)[4] a third man is present, with uplifted arms. A. Löbbecke[5] and F. Imhoof-Blumer[6] interpret these coins of Myra and Aphrodisias as representing the myth of Myrrha. The latter scholar even supposes that the third person present (a grown man!) is meant for Adonis. In my opinion it is far more probable that the coins of both towns commemorate a local rite of threatening the sacred tree in order to make it fruitful. Sir James Frazer collects analogous

rites from the East Indies, Japan, Armenia, South Slavonia, Bulgaria, Lesbos, Sicily, the Abruzzi, etc.[1]. A sample will serve:

'On Christmas Eve many a South Slavonian and Bulgarian peasant swings an axe threateningly against a barren fruit-tree, while another man standing by intercedes for the menaced tree, saying, "Do not cut it down; it will soon bear fruit." Thrice the axe is swung, and thrice the impending blow is arrested at the entreaty of the intercessor. After that the frightened tree will certainly bear fruit next year[2].'

If this be the *drómenon* portrayed on our coins, it is obvious that they need not have anything to do with Myrrha and her 'myrrh'-tree.

The sword left in the tree is a circumstance which occurs in the tales of other nations also. The Volsung saga[3], for example, tells how king Rerir and his wife remained without a son till Ljod, daughter of the giant Hrimnir, was sent in the form of a crow by Freyia to bring them an apple. She let the apple fall into the lap of the king as he sat upon a mound. He took it home and came to the queen, who ate part of it. After a sickness lasting six winters she was forcibly delivered of a man-child, great of growth from his birth, who was called Volsung and became king of Hunland in the room of his father. He married Ljod, Hrimnir's daughter, and had by her ten sons and one daughter. Now king Volsung built his hall in such a manner that it enclosed a big oak-tree. The trunk stood in the hall; the branches and blossoms[4] spread out over the roof. The tree was termed a *barnstokk* or 'child-tree' and also, somewhat inconsequently, *apaldr*, an 'apple-tree.' At the marriage-feast of king Volsung's daughter Signy and Siggeir king of Gothland a huge one-eyed old man[5], bare-footed but wearing a spotted cloak and tight linen breeches, entered the hall. He drew his sword[6] and plunged it up to the hilts in the tree-trunk, declaring that whosoever could pull it out might keep it for his own. This said, he took his departure. Those present attempted to pull out the sword; but none succeeded save Sigmund, son of king Volsung.

Similarly in an Irish folk-tale[7], when Fin and the Fenians were at Fintra, a ship sailed into harbour with only one woman on board. She saluted Fin and asked whether he would play a game of chess

with her for a sentence. Fin agreed. They played. She won and sentenced him to take her for his wife. After a time she said: 'I must leave you now for a season.' Fin then drove his sword into a tree-stump and said: 'Call your son *Faolan* ("Little Wolf"), and never send him to me until he is able to draw the sword from this stump.' She took the stump with her and sailed away homeward. She nursed her son for three days only, and called him *Faolan*. When ten years old, he was taunted by a playmate for not knowing who his father was. He asked his mother, who told him about Fin and the tree-stump. With one pull he drew out the sword, and then set forth, accompanied by his mother's blessing, to find his father. His subsequent adventures do not here concern us; but it is obvious that thus far the story has at least some points in common with J. G. von Hahn's tale from Dodona and with the Volsung saga.

(τ) The axes and the sacred oaks at Dotion.

The enormous appetite of the strong man in the folk-tale from Dodona reminds us, not only of the ever-hungry Herakles, but also of the insatiate Erysichthon, whose myth again includes the incident of an axe left in a sacred tree.

The story is told by Kallimachos[1] as follows. The Pelasgians, before they migrated from Thessaly to Knidos, had planted a grove for Demeter at Dotion. Here dwelt the royal family of the Triopidai. Erysichthon, son of Triopas, acting under some infatuation, armed his followers with axes and hatchets, and invaded the grove. The first tree attacked was a magnificent poplar[2], which groaned aloud. Demeter heard it and, appearing in the likeness of her priestess, attempted to dissuade the madman. He at once threatened to fell her with his axe, being bent on fashioning the timbers of a house in which to feast with his friends. Demeter in wrath resumed her godlike form; and Erysichthon's comrades horror-struck left their axes sticking in the oaks[3]. She punished their chief by inflicting on him a hunger that nothing would satisfy.

Ovid[4] tells the same tale with some variations. He describes the tree cut down by Erysichthon as an ancient oak[5] adorned with fillets and tablets by the pious rustics. Though the Dryads had often danced beneath it, the son of Triops bade his servants fell it. When they hesitated, he caught up an axe and swore that the tree should fall, though it were not merely the favourite of the goddess,

[5] *Id. ib.* 8. 743 ingens annoso robore quercus.

but the goddess herself. Thereupon the 'Deoïan' oak[1] shivered and groaned and blanched, and at the first stroke shed blood. One of those present protested: Erysichthon beheaded him on the spot, and went on with his impious work. From the stricken trunk was heard the voice of the tree-nymph, who, ere she died, prophesied the evil end of the Thessalian. The Dryads implored Ceres to avenge their sister's fate. She banished Erysichthon to Scythia, the abode of Hunger[2].

It would seem that neither Kallimachos nor Ovid has preserved the primitive form of this myth[3]. In particular, the axe imbedded in the sacred tree has been treated as a mere symptom of surprise on the part of Erysichthon's followers, while the perpetual appetite of the strong man[4] has been misinterpreted as a punishment for his impious action. Such changes are indicative of a romantic and moralising age.

(*v*) The knife and the sacred oak at Phylake.

One other example of a weapon fixed in a sacred tree occurs, in the myth of Phylakos. It is related as follows by Apollodoros[5]. Phylakos, the eponym of Phylake in Phthiotis, having learnt that Melampous was a excellent seer, asked him to cure the childless condition of his son Iphiklos. Melampous sacrificed two bulls, cut them limb from limb, and invited the birds to the feast. From a vulture that came he learnt the facts of the case. Phylakos had once, when gelding rams, laid down his knife covered with blood on the severed portions beside Iphiklos[6]. The boy being terrified

[1] *Id. ib.* 8. 758 Deoïa quercus.

[2] What Kallimachos and Ovid relate of Erysichthon was by others related of Triopas himself. Diod. 5. 61 says that Triopas, son of Helios and Rhodos, helped the sons of Deukalion to drive the Pelasgians out of Thessaly. When he came to divide up the land, he laid waste the precinct of Demeter in the plain of Dotion, and used its timber to make a palace: hence he was hated by the natives and had to fly the country. He sailed to Knidos, and there founded the Triopion. Diodoros adds that some authorities made Triopas the son of Poseidon and Kanake (Kallim. *h. Dem.* 98 f.), others of Lapithes son of Apollon and Stilbe daughter of Peneios.

[3] On the development of the myth see O. Crusius in Roscher *Lex. Myth.* i. 1373—1384 and O. Kern in Pauly—Wissowa *Real-Enc.* vi. 571—574.

[4] Erysichthon occurs as the name of a Giant, probably the adversary of Demeter, on the frieze of the great altar at Pergamon (H. Winnefeld in *Pergamon* iii. 2. 154, M. Fränkel *ib.* viii. 1. 65 no. 114 Ἐρυσίχθων on a fragment found S.E. of the altar).

[5] Apollod. 1. 9. 12. *Supra* p. 452.

[6] παραγενομένου δὲ αἰγυπιοῦ, παρὰ τούτου μανθάνει δὴ ὅτι Φύλακός ποτε κριοὺς τέμνων ἐπὶ τῶν αἰδοίων παρὰ τῷ Ἰφίκλῳ τὴν μάχαιραν ἡμαγμένην ἔτι κατέθετο, δείσαντος δὲ τοῦ παιδὸς καὶ φυγόντος αὖθις κατὰ τῆς ἱερᾶς δρυὸς αὐτὴν ἔπηξε, καὶ ταύτην ἀμφιτροχάσας ἐκάλυψεν ὁ φλοιός. The words ἐπὶ τῶν αἰδοίων, which R. Hercher would delete, must—as the text stands—refer to the genitals of the rams. It is, however, possible that they arose from a gloss on παρὰ τῷ Ἰφίκλῳ, in which case Apollodoros will agree with schol.

had run away. Phylakos had then thrust the knife back into the sacred oak-tree, the bark of which had compassed it about and concealed it from view. If Melampous could now find the knife, scrape the rust off it, and give it to Iphiklos to drink for ten days in succession, Iphiklos would beget a child. Thus instructed by the vulture, Melampous found the knife, scraped the rust off it, and for ten days in succession gave it to Iphiklos to drink, the result being that a son Podarkes was born to him. In this story we may presume that the generative power of the rams[1] passed from them to the knife and so to the rust that was put in Iphiklos' drink[2]. But why was the knife thrust into the sacred oak? Or rather, why was it 'thrust *back*' into the oak? This implies that the gelding knife was kept in the tree. It was—we remember—'beneath the tall oaks' that Zeus himself gelded Kronos[3]. Perhaps the idea was that a blade so highly charged with procreative force would permanently fertilise the sacred oak. If so, we have here another instance of the weapon regarded as *quasi*-male, the tree as *quasi*-female.

(φ) Axe-blades and axe-hafts in the megalithic art of western Europe.

The connexion here suggested between weapon and tree, blade and haft, is to some extent confirmed by evidence from western Europe. As far back as 1867 A. de Longpérier put forward the idea that in Gaul there may have been a cult of the axe comparable with that of Assyria, Egypt, Karia, Tenedos, and Pagasai[4]. S. Reinach in 1894 grouped together the sacred axes of all ages from the quaternary era downwards and regarded them as symbols of the lightning-flash[5]. Lastly, J. Déchelette in his admirable *Manuel d'archéologie*[6], after a more detailed study of the subject, arrives at the following conclusion:

'Thus the representations of the axe symbol in prehistoric art offer three variants—the hatchet complete, that is to say the blade furnished with its handle, the blade alone, and the handle alone. It is impossible for us to deter-

include numerous examples of little men uplifting large axes (*id. ib.* 1910 ii. 1. 495 with fig. 209, 7—12, M. Hoernes *op. cit.*[2] p. 216 with fig. 2 on p. 215). They appear to be the work of Ligurian hands (G. Dottin *Les anciens peuples de l'Europe* Paris 1916 p. 187) during the earlier part of the Bronze Age (Sir A. J. Evans in *The Athenæum* Dec. 25, 1897, p. 890, *id.* 'The European diffusion of pictography and its bearings on the origin of script' in R. R. Marett *Anthropology and the Classics* Oxford 1908 p. 39 with fig. 20

(upside down)), and had almost certainly some religious or symbolic value. Figs. 630, 631

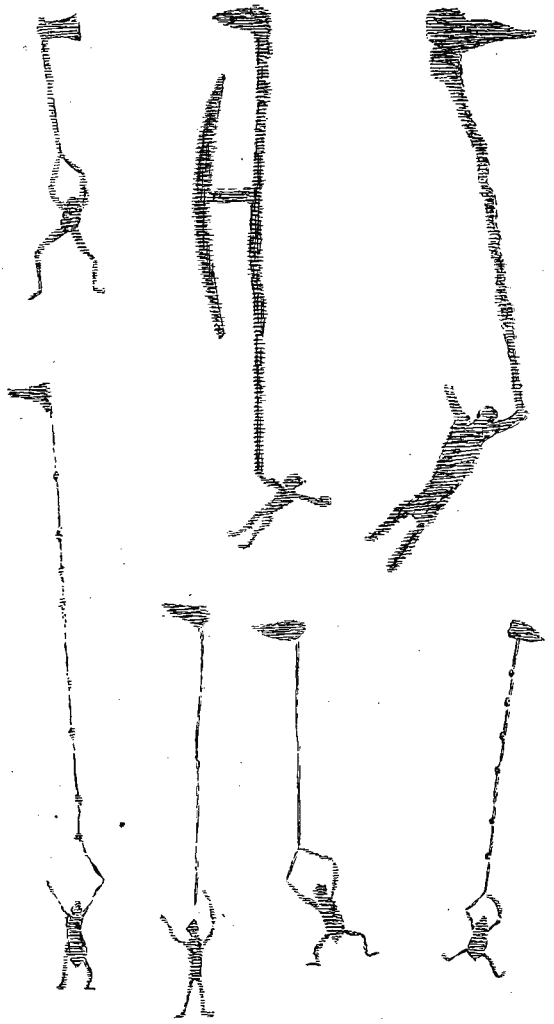

Fig. 631.

the carved slabs of the same age[1] from the dolmen of Collorgues in Gard, which represent a female bearing an axe-handle (fig. 629)[2], we may be disposed to allow that blade *plus* handle sometimes symbolised the union of male with female—a symbol that probably arose in neolithic times[3].

(χ) The axes of Penelope.

If in 'Minoan' times the hafted axe thus denoted the union of male with female, it is possible that there was some such notion underlying the marriage-test proposed by Penelope:

> Behold the dawn comes, dawn of evil name
> That is to take me from Odysseus' home;
> For now forthwith a contest will I make,
> To wit the axes, which within his halls
> My lord was wont to set, twelve in a row,
> Like ship-stays, and himself far off would stand
> And send a single arrow through them all.
> Now on the wooers will I lay this task:
> Whoso most easily shall string the bow
> And shoot a shaft through the axes, twelve in all,
> Him will I follow and forsake this house,
> Where I was wed, so fair, so full of wealth,
> That I shall mind me of it even in dreams[4].

The *Odyssey* certainly gives no hint that the contest was anything more than an athletic competition. Nevertheless, athletic competitions in Greece were often religious in their origin; and it may be that in this feature of the story, as in some others (*e.g.* the tree-bed of Odysseus[5]), the poet is modernising materials of immemorial antiquity.

[5] W. Crooke 'The Wooing of Penelope' in *Folk-lore* 1898 ix. 131 ('I may, perhaps, hazard the suggestion that in the earlier form of the tale this olive tree was the marriage tree

The name *Penelópe* or *Penelópeia* is a legitimate derivative of *penélops*[1], 'wild duck' or 'goose[2].' According to Didymos Chalkenteros, an Alexandrine *savant* whose life-time covered the beginning of our era, Penelope was first called Ameirake or Arnakia, but, when cast into the sea by Nauplios in revenge for the fate of his son Palamedes and rescued from that predicament by wild ducks, was re-named *Penelópe*[3]. Others said that her name had been changed from Arnaia[4] or Arnea (?)[5] to *Penelópe* because, when flung into the sea by her own parents, she was brought safely ashore and restored to them by wild ducks. Recent critics, discussing the Penelope of epic and non-epic tradition, have resolved her into an Arcadian or Laconian goddess[6]. Thus E. Meyer[7], laying stress on the common Greek belief[8] that she was by Hermes the mother of the Arcadian Pan[9], concludes that originally a goddess (Artemis ?) surnamed *Penelópe* gave birth to Pan at Mantineia[10], where in later days her grave was shown[11]. F. Solmsen[12] too regards it as certain that Penelope was an ancient goddess whose home was Arkadia, especially eastern Arkadia, and Lakonike. Here in the second millennium B.C., at a time when theriomorphic conceptions were wide-spread throughout Greece, she took the form of the bird *penélops*. Lastly, J. A. K. Thomson[13] in his venturesome but

of the lovers, and that a very primitive and obsolete incident of wedding ritual assumed this rather clumsy form in the later recension'). But *id. ib.* p. 131 n. 4 cites J. T. Bent *The Cyclades* London 1885 p. 22 for a parallel in modern Greece to the bed as described by Homer. In *Folk-Lore* 1906 xvii. 172 f. I have given some examples of life-trees built into castles.

[13] J. A. K. Thomson *Studies in the Odyssey* Oxford 1914 p. 48 ff. This book does not deserve all the hard things said of it by a somewhat petulant critic in the *Journ. Hell. Stud.* 1914 xxxiv. 335.

most suggestive *Studies in the Odyssey* maintains that Penelope, like Artemis *Stymphalía*[1], was a local Arcadian *kóre* in the shape of a water-fowl, and points out that her other titles *Arnakía, Arnaía, Arnéa* (?) mean 'She of Arne,' the famous spring near Mantineia. 'Penelope,' he says, '...was evidently the divine Penelops of Arne[2].' This is to treat a possibility as a certainty. But the hypothesis itself is by no means absurd[3].

In any case the occurrence of a bird-name in connexion with the episode of the axes *donne à penser*. It recalls the birds perched on the axes of the *sarcophagus* from *Hagia Triada*[4], and the bird on the axe-cleft tree at Dodona[5]. S. Wide[6], commenting on the complex, bird, axe, and tree, surmises that the bronze double axe, or rather its prototype the stone axe, belonged by rights to the bird regarded as *numen* of the sacred tree. The woodpecker with his chisel-shaped[7] beak was actually called *pelekâs, pelekán, spélektos*, the 'axe-bird[8]'; and many another popular name for him all over Europe bears witness to his reputation as a borer and fashioner of timber[9]. In this respect he has for rival the hoopoe, who is described by R. Lydekker as commonly breeding in hollow trees[10] and hammering on the ground at the production of each note[11]. D'Arcy W. Thompson[12] and Sir James Frazer[13] remark on the parallelism of these two birds in ancient belief. The myth of Tereus the hoopoe has a doublet in that of Polytechnos the woodpecker, the former being current on the western, the latter on the eastern side of the Aegean. Tereus, king

of Thrace, armed with a double axe (*pélekys*)[1], pursued Prokne and Philomela till the gods changed them all into birds—Tereus becoming a hoopoe, Prokne a nightingale, Philomela a swallow. Just so Polytechnos of Kolophon, to whom Hephaistos had given a double axe (*pélekys*), pursued Aëdon and Chelidonis till Zeus transformed the whole family into birds—Polytechnos into a woodpecker (*pelekán*), the brother of Aëdon into a hoopoe, etc.[2] The boast of Polytechnos and Aëdon that they loved each other more than Zeus and Hera suggests that *Polýtechnos* was originally an epithet of Zeus[3] conceived as a woodpecker[4]. If so, *Tereús* too may have been

[1] So Apollod. 3. 14. 8. Other mythographers arm Tereus with a sword (Konon *narr.* 31, Ov. *met.* 6. 666, 673, Ach. Tat. 5. 3 and 5. 5, schol. Aristoph. *av.* 212), Aristophanes equips him with shield and lance (Aristoph. *Lys.* 563), and an Apulian vase at Naples gives him a couple of spears (Heydemann *Vasensamml. Neapel* p. 533 f. no. 3233, J. Roulez in the *Nouv. Ann.* 1839 ii. 261 ff. pl. 21 and pl. D, Reinach *Rép. Vases* i. 239 f., 1, 2). F. G. Welcker *Die Aeschylische Trilogie Prometheus und die Kabirenweihe zu Lemnos* Darmstadt 1824 p. 502 n. 796, E. Oder in the *Rhein. Mus.* 1888 xliii. 555, and O. Höfer in Roscher *Lex. Myth.* iii. 2345 n.** take the *πέλεκυς* to be a trait borrowed from the Asia Minor version.

[2] Ant. Lib. 11 (citing Boios *ὀρνιθογονία*).

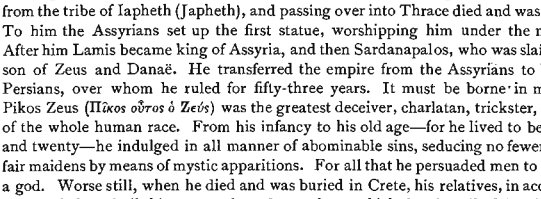
[3] Cp. the description of the Dodonaean Zeus in Pind. *frag.* 57 Schroeder *ap.* Dion Chrys. *or.* 12 p. 416 Reiske 'Δωδωναῖε μεγασθενὲς | ἀριστότεχνα πάτερ.' οὗτος γὰρ δὴ πρῶτος καὶ τελειότατος δημιουργός, χορηγὸν λαβὼν τῆς αὐτοῦ τέχνης, οὐ τὴν Ἠλείων πόλιν, ἀλλὰ τὴν πᾶσαν τοῦ παντὸς ὕλην. S. Wide in the *Sertum philologicum Carolo Ferdinando Johansson oblatum* Göteborg 1910 p. 66 ff. thinks that the priests of Dodona got their name *τόμαροι* (*τόμουροι*), 'carpenters,' from the sacred doves nesting in the hollow oak ('Es lag ja nahe, den in dem heiligen Baume pickenden Vogel Τόμαρος zu nennen, denn er war ja ein Zimmermann mit der Axt, vgl. die modernen Benennungen des Spechtes: Schweiz. *Zimmermann*, französ. Volksprache *Charpentier*, italien. *Carpentiere*,...u.s.w.'). Τόμουροι may indeed mean 'cutters,' as I conjectured years ago (*Class. Rev.* 1903 xvii. 180 f.), understanding thereby a clan privileged to cut the sacred oaks; but that they were named after a 'cutter'-dove seems to me improbable. It was the priestesses, not the priests, who, according to some, were known as *πελειάδες* (*supra* i. 443).

[4] The phrase Πῖκος ὁ καὶ Ζεύς, to which I drew attention some time since (*Class. Rev.* 1903 xvii. 412, *Folk-lore* 1904 xv. 387), has in sundry quarters *fait fortune*: see *e.g.* Miss J. E. Harrison in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 161, W. R. Halliday *Greek Divination* London 1913 p. 265 n. 1 with context, and especially the interesting little volume of my friend J. Rendel Harris *Picus who is also Zeus* Cambridge 1916. It seems, therefore, worth while to attempt some investigation of its antecedents, a task in which, so far as Byzantine literature is concerned, I have had the kind assistance of Prof. J. B. Bury.

The *Weltchronik*, as contained in the compilation of Georgios Kedrenos (*c.* 1100 A.D.), is to the following effect (Kedren. *hist. comp.* 15 B ff. (i. 28 ff. Bekker), cp. *ib.* 20 D (i. 37), 81 D (i. 144)):—Of the tribe of Sem (Shem) was Chous (Cush) the Aethiopian. He begat Nebrod (Nimrod) the founder of Babylon, called also Orion, who was the first to become king on earth: he ruled over Assyria and took as title the name of the planet Kronos. His wife was Semiramis, called also Rhea. Their children were Pikos, who took the name Zeus (Πῖκος, ὃς καὶ μετωνομάσθη Ζεύς), Belos, Ninos, and Hera. Ninos founded Nineui (Nineveh) and married his own mother Semiramis. Africanus adds that Kronos had another son, Aphros the forefather of the Aphroi (Africans), who married Astynome and begat Aphrodite. Kronos, expelled from his kingdom by his own son Zeus, went west-

wards and became ruler of Italy. Then Zeus, quitting Assyria, followed Kronos, who yielded to him the kingship of Italy. Having reigned for many years, Zeus died and was buried in Crete. Ninos as king of Assyria was succeeded by Thouros, called also Ares. The Assyrians changed his name to Baal or Bel, set up a statue of him, and worshipped him. After the death of Zeus, Phaunos his son became king and took the name Hermes. Aphrodite married Adonis son of Kinyras. Pikos, called also Zeus (Πῖκον τὸν καὶ Δία), was king of Assyria for thirty years and then, leaving the throne to his son Belos and to his wife and sister Hera, followed his father Kronos, who being old and infirm abdicated in his favour. So Pikos reigned in Italy for another sixty-two years. Belos his son was king of Assyria for two years. Ninos, the uncle of Belos, reigned for fifty-two years. A descendant of his was Zoroastres the famous astronomer, who prayed that he might be struck and consumed by celestial fire, and bade the Persians venerate his bones on pain of losing their empire (*supra* p. 35 f.)—a fate which they actually incurred. Ninos the brother of Zeus was succeeded as king of Assyria by Thouros, to whom Zamis his father, the brother of Rhea, gave the name of the planet Ares. This Ares slew the giant Kaukasos, who came from the tribe of Iapheth (Japheth), and passing over into Thrace died and was buried there. To him the Assyrians set up the first statue, worshipping him under the name of Baal. After him Lamis became king of Assyria, and then Sardanapalos, who was slain by Perseus, son of Zeus and Danaë. He transferred the empire from the Assyrians to his namesake Persians, over whom he ruled for fifty-three years. It must be borne in mind that this Pikos Zeus (Πῖκος οὗτος ὁ Ζεύς) was the greatest deceiver, charlatan, trickster, and magician of the whole human race. From his infancy to his old age—for he lived to be one hundred and twenty—he indulged in all manner of abominable sins, seducing no fewer than seventy fair maidens by means of mystic apparitions. For all that he persuaded men to regard him as a god. Worse still, when he died and was buried in Crete, his relatives, in accordance with his own behest, built him a temple and a tomb, on which they inscribed ἐνθάδε κεῖται θανὼν Πῖκος ὁ καὶ Ζεύς.

This wild *farrago*, which implies the genealogy



and involves obvious inconsistencies (Belos is both son of Kronos and son of Zeus; he is also distinguished from Baal or Bel), was taken over by Kedrenos or his immediate source (K. Krumbacher *Geschichte der byzantinischen Litteratur*[2] München 1897 p. 369) from earlier chroniclers such as Georgios Monachos (*s.* ix) and Georgios Synkellos (*s.* viii). Souidas (*c.* 950 A.D.) used a similar source *s.v.* Πῆκος ὁ καὶ Ζεύς, citing the Cretan epitaph as ἐνθάδε κεῖται θανὼν Πῆκος ὁ καὶ Ζεύς (*supra* i. 158 n. 2)—an itacism which occurs also in the narrative of Georg. Monachos *chron.* 1. 3 (i. 12 de Boor) ἔχων δὲ γυναῖκα Σεμίραμιν, τὴν καὶ Ῥέαν καλουμένην παρὰ Ἀσσυρίοις, ἔσχεν (*sc.* Κρόνος) υἱοὺς δύο καὶ θυγατέρα μίαν, καὶ τὸν μὲν προσηγόρευσε Δία εἰς ὄνομα τοῦ πλανήτου ἀστέρος, τὸν δὲ ἐπωνόμασε Νίνον, καὶ τὴν θυγατέρα Ἥραν, ἣν καὶ ἔλαβεν εἰς γυναῖκα Πῆκος (πῖκος codd. G.H.R. et L.[2] et sic deinceps πύκος hic cod. V.) ὁ καὶ Ζεὺς τὴν ἰδίαν ἀδελφήν, cp. *ib.* 1. 8 (i. 14) Περσεὺς ὁ υἱὸς Πήκου τοῦ καὶ Διός. Yet another spelling is found in Synkell. *chron.* 171 B (i. 322 f. Dindorf) ὅτι πρὸ Αἰνείου α' φασὶ Πεῖκον υἱὸν Κρόνου βασιλεῦσαι χώρας Λαυρέντου λζ'...μεθ' ὃν Φαῦνον τὸν υἱὸν αὐτοῦ Πείκου τοῦ καὶ Διὸς ἔτη μδ'. τοῦτον δέ φασί τινες Ἑρμῆν, κ.τ.λ. and *ib.* 237 C (i. 450) τινὲς βούλονται Κρόνον πρῶτον Ἀλβανὸν κρατῆσαι τῶν κατὰ τὴν ἑσπέραν τόπων. μεθ' ὃν φασι Πεῖκον υἱὸν αὐτοῦ, τὸν καὶ Δία, βασιλεῦσαι· εἶτα Φαῦνον Διὸς υἱόν, τὸν καὶ Ἑρμῆν· κ.τ.λ. Further, the *Chronicon Paschale* (early in *s.* vii) 36 A ff. (i. 64 ff. Dindorf) already has the

whole story, later retailed by Kedrenos, together with the names of one or two authorities, *viz.* 38 B (i. 68) ἅπινα συνεγράψατο Σεμηρώνιος ὁ Βαβυλώνιος Πέρσης and 38 C (i. 69) ὁ δὲ σοφώτατος Βρούττιος ὁ ἱστορικὸς καὶ χρονογράφος ἐξέθετο ὡς ὁ αὐτὸς Πῖκος ὁ καὶ Ζεὺς κ.τ.λ.: in 44 C (i. 80) it gives the epitaph in the form ἐνθάδε κεῖται θανὼν Πῖκος ὁ καὶ Ζεύς, ὃν καὶ Δία καλοῦσιν. The source of the *Chronicon Paschale* was, according to Prof. Bury (but see K. Krumbacher *op. cit.*[2] p. 337 f.), probably Ioannes Malalas (*s.* vi). The first book of his Χρονογραφία, missing in the unique Oxford manuscript, can be, for our purpose, virtually restored from the Exc. Salmasii in Cramer *anecd. Paris.* ii. 386, 11 ff. and from cod. Paris. 1630. These passages, printed as Io. Antioch. *frag.* 3 ff. (*Frag. hist. Gr.* iv. 541 ff. Müller), contain between them substantially the same account as that of Kedrenos (the only noteworthy differences are as follows: Belos is the son of Pikos Zeus by Hera (Io. Antioch. *frag.* 4. 4 in cod. Paris. 1630 ἔλαβε δὲ εἰς γυναῖκα Πῖκος ὁ καὶ Ζεὺς τὴν ἰδίαν αὐτοῦ ἀδελφὴν Ηραν, ἣν καὶ ζυγίαν Νέμεσιν ἐκάλουν τινὲς εὐχαριστοῦντες αὐτῇ ὡς ἀγαθῇ καὶ δικαίᾳ. ἔσχε δὲ ἐξ αὐτῆς ὁ Πῖκος Ζεὺς υἱόν, ὃν ὠνόμασε Βῆλον διὰ τὸ ὀξύτατον εἶναι); Aphros and Cheiron are the sons of Kronos by Philyra; Zeus is buried at Knossos in Crete (Io. Antioch. *frag.* 5 in Exc. Salmasii in Cramer *anecd. Paris.* ii. 386, 29 ff. ὁ δὲ Ζεὺς ἐν τῇ δύσει Φαῦνον τὸν Ἑρμῆν γεννᾷ, καὶ θανὼν θάπτεται ἐν Κνώσσῳ τῆς Κρήτης), where his epitaph runs ἐνθα κεῖται θανὼν Πῖκος ὁ καὶ Ζεύς, ὃν καὶ Δία καλοῦσι (Io. Antioch. *frag.* 6. 4 in cod. Paris. 1630)). The same may be said of the ἐκλογὴ τῶν Χρονικῶν ἀπὸ Ἰωάννου Ἱστορικοῦ in Cramer *anecd. Paris.* ii. 233, 32 ff. (p. 236, 18 f. 'ἐνθάδε κατάκειται Πῖκος ὁ καὶ Ζεύς, ὃν καὶ Δία καλοῦσι,' περὶ οὗ συνεγράψατο Διόδωρος ὁ σοφώτατος χρονογράφος), and of the ἐκλογαὶ ἱστοριῶν *ib.* ii. 250, 29 ff. (p. 257, 33 ff. καὶ Ἀσσυρίων, μετὰ Πῖκον τὸν βασιλέα τὸν πρῶτον, ὃς ἐν Κρήτῃ ἀπέθανεν, ὃς καὶ τοῖς τότε καιροῖς Ζεὺς μετωνομάσθη, κ.τ.λ.). Thus for over half a millennium the Byzantine chroniclers had been content to copy almost mechanically the traditional lore of their monkish predecessors. Can we get behind their tradition to any more authoritative source?

The *Excerpta Latina barbari* published by A. Schöne in his ed. of Euseb. *chron.* Berolini 1875 i. 174 ff. and, with a Greek retranslation, by C. Frick *Chronica minora* Lipsiae 1892 i. 183 ff. are a rendering into vulgar Latin made by an anonymous Gaul or Frank *c.* 700 A.D. from a Greek original probably written in Alexandreia soon after 412 A.D. and provided with a series of miniature illustrations. F. Jacoby in Pauly—Wissowa *Real-Enc.* vi. 1576 concludes that the first section of the *Excerpta* (fol. 1*a*—36*b*), a chronicle running from Adam to the death of Kleopatra, represents the Χρονικά of Hippolytos enlarged and interpolated with extracts from the Septuaguint, Sex. Iulius Africanus, the pseudo-Kallisthenes, and the Ravenna *annales* or *consularia Italica*. One of these interpolations, derived from Sex. Iulius Africanus(?), contains the following passage: fol. 20 *b*, 26 ff. unde Picus ille Cronu pronepus partibus occasu ipsis temporibus imperauit. Cronus quidem propater eius in diuisione terrae fuit occidentales partes tenens· sicut sine urbes et sine reges essent· de quo multus est sermo et sine interpraetatione sunt. Post Cronis autem perditionem secundum successiores annorum Picus pronepus eius per tempora regnauit in Italia primus. quem et Serafin quidam interpraetauerunt. alii autem Dia Olympium· ceteri autem Plutea Aidonium et alii Chthonium Posidona. Istorum autem nominum ei pertinuit pro eo quod ille multa potuisset super omnes. Iste autem in Assyrios in iuuentute regnans Ninus ibi uocabatur et condidit Niniuem ciuitatem Assyriorum. Uxor autem eius Semimaris mulier fuit maligna et praesumens et inpudica. quem Ream uocauerunt. alii autem Iram Zygiam. et alii Nemesim multiformem· ceteri autem Ecatin Chtonicam propter innumeram eius atrocitatem· Iste quidem relinquens uxori imperium occidentis partibus ueniens imperauit. Erant enim omnes partes illas sine urbes et sine regem secundum quod narrat historia. In illis uero temporibus Picus Croni pronepus inueniens terram illam spaciosam manentem imperauit· in illam annos LXXX· patrias possidens· et illas nobilissimas feminas per magicas et ingenia maligna conuertens et auortiuos faciebat et sic mulieres quae ab ipso deludebantur domos· et sedes praeparabant ei et scultilia multa multa illi configebant sicut placebat eis· et quasi dō eas conmiscuisset et in dm̄ eum esse gloriabantur.

If this is really an extract from the Χρονογραφίαι of Sex. Iulius Africanus,—and it must be borne in mind that Kedren. *hist. comp.* 15 D (i. 28 Bekker) definitely cited him (ὡς δὲ

'Αφρικανὸς φησι, κ.τ.λ.),—it would seem that the whole story of Πῖκος ὁ καὶ Ζεύς was already current *c.* 200 A.D.; for the chronographer, a native of Jerusalem (*The Oxyrhynchus Papyri* London 1903 iii. 36ff. no. 412, 59 ff.: but see B. P. Grenfell and A. S. Hunt *ad loc.*), is known to have been on intimate terms with Abgar ix of Edessa (179—216 A.D.) and his son Mannus (Iul. Afr. *tact.* 29: cp. W. Kroll in Pauly—Wissowa *Real-Enc.* x. 116). The common assumption that Malalas rests largely on Iulius Africanus is contested by K. Krumbacher *op. cit.*[2] p. 327, who holds that there were in all probability intervening authors, links now lost to us. Nor was Iulius Africanus the staple of the whole chain. For in Cramer *anecd. Paris.* ii. 236, 19 f. (*supra* p. 695) Diodoros is expressly quoted as a source, and the entire context, in which Πῖκος ὁ καὶ Ζεύς, brother of Ninos, is said to have reigned 120 years over the west, to have begotten sons and daughters, and to lie buried in Crete, is printed by F. Vogel the latest editor (Lipsiae 1890) as Diod. 6. 5. This brings us back to a date *c.* 60 B.C. and to a suitable atmosphere of Euhemerism (*supra* i. 662). But even so we have not reached the starting-point. I observe that the *Chronicon Paschale* 38 B (i. 68 Dindorf) cites a certain Σεμπρώνιος ὁ Βαβυλώνιος Πέρσης (*supra* p. 695), whose name has been curiously misinterpreted. C. Müller in the *Frag. hist. Gr.* iv. 492 would turn it into that of the Persian Σειράμνης (Plout. *reg. et imperator. apophth.* 172 D). H. Gelzer *Sextus Julius Africanus und die byzantinische Chronographie* Leipzig 1880 i. 77 says: 'Der Name selbst is aber echt assyrisch, er bedeutet einfach "der Sumerier."' I should rather suppose that Σεμπρώνιος is a blundered form of Σεμπρώνιος, *i.e.* the annalist C. Sempronius Tuditanus, consul in 129 B.C., who concerned himself much with the primitive history of Italy (*Hist. Rom. frag.* p. 89 ff. Peter): ὁ Βαβυλώνιος Πέρσης would then be an attempt or attempts to make sense of his misspelt name. On this showing the story of Πῖκος ὁ καὶ Ζεύς may be as early as the second century B.C.

Further than this we cannot trace it. But C. Trieber in his important article 'Die Idee der vier Weltreiche' (*Hermes* 1892 xxvii. 321—344) arrives at the heart of the matter, when he points out that, according to a view prevalent in antiquity, the end of the Assyrian empire coincided with the beginning of three others—the Medo-Persian, the Macedonian, and the Roman. The chronographer that first brought Rome into this scheme (Trieber *ib.* p. 340 n. 2 thinks it was Kastor of Rhodes, whose work J. W. Kubitschek in Pauly—Wissowa *Real-Enc.* x. 2348 dates in 61 B.C.) used Πῖκος ὁ καὶ Ζεύς as a tie between east and west. His procedure is not easy to explain. Πῖκος in the west we know: he was an ancient Italian power, who appears in tradition sometimes as a bird, the woodpecker, sometimes as a god, sometimes as a king (J. B. Carter in Roscher *Lex. Myth.* iii. 2494 ff.). But who was Πῖκος in the east? Pekah king of Israel (*c.* 735—730) is near enough in point of date to the foundation of Rome and might, I suppose, be regarded as a vassal of Assyria; but he was a monarch of no particular importance. Mr N. McLean, whom I consulted on the matter, suggested that Πῖκος perhaps covers *pekha*, a Hebrew word for 'governor' of Assyrian origin. So I applied to my friend Prof. S. Langdon, who kindly sent me the following comment (Feb. 24, 1920): 'The title *pihatu* "provincial governor," or originally *bêl pihāti* "lord of a province," passed into Hebrew as פֶּחָה *pĕchā* "governor," and Assyrian and Persian governors of Syria were known to the Hebrews under this title. It is probable that some governor of the late period at Tarsus or some other city may have received apotheosis and identified himself with Zeus. There is no Assyrian king whose name is similar to Πῖκος.' Prof. Langdon further informs me that 'The Assyrians and Babylonians never deified and worshipped birds,' and that 'No bird was ever known to have been identified with a king.' With regard to the woodpecker in Mesopotamia he says: 'The *pikakki* of Ishtar [M. Jastrow *Die Religion Babyloniens und Assyriens* Giessen 1912 ii. 2. 802 n. 1] probably is the woodpecker commonly called *kusazu* and *ḫanzizitu* the "gnawer," but what Houghton says in PSBA. 1885, 67 [W. Houghton 'The Birds of the Assyrian Monuments and Records' in the *Transactions of the Society of Biblical Archæology* 1885 viii. 67—70 with 119 f.] is totally erroneous. The "axe of Ishtar" is a poetical name for the woodpecker....But otherwise no connection between Ishtar and the woodpecker is known. The bird is described as "green" in a syllabary. It is certain that the woodpecker was not a deity, but it may have been the symbol of Ishtar.' Another possi-

an appellative of Zeus, who is known to have taken on occasion the shape of a hoopoe (*épops*)[1]. Popular etymology, always rife among the Greeks and busied with this myth in the fifth century B.C.[2], would readily equate *Tereús* the 'Watcher[3]' with Zeus *Epópsios* the 'Overseer[4].' In reality the Thracian *Tereús* correlates with the Phrygian *Tereíe*, an epithet of the mother-goddess worshipped on a mountain near Lampsakos[5]. This tends to confirm our impression that to Thracian believers Tereus the hoopoe was in some sense an embodiment of the father-god.

Those who see in Odysseus a former fire-god[6] or sun-god[7] and in Penelope a divinised duck can at least claim to detect a certain ap-

bility is mooted by Dr J. Rendel Harris, who in conversation has pointed out to me (Feb. 1920) that, since the woodpecker is named *Hadad* or *Heddad* the "Smith" in north Africa (J. Rendel Harris *Boanerges* Cambridge 1913 p. 394 f.), it is tempting to regard Πῖκος ὁ καὶ Ζεύς as the Greek translation of *Hadadrimmon* (*supra* i. 577) and *Picus* as the Italian equivalent of *Benhadad* (*Boanerges* p. 36 n. 1).

In weighing these various hypotheses we must not lose sight of the fact that Πῖκος ὁ καὶ Ζεύς is consistently said to have been buried in Crete. Now the Idaean Cave has yielded a *týmpanon* of the ninth or eighth century B.C., which represents the youthful Zeus or Zagreus in definitely Assyrian guise (*supra* i. 644 ff. pl. xxxv). Moreover, we have seen reason to surmise that at *Hagia Triada* the soul of the prince embodying this deity took the form of a jay (*pica*)—a bird whose bright plumage suggested comparison with the woodpecker (*picus*) (*supra* pp. 522, 523 f.). It is, then, conceivable that the phrase Πῖκος ὁ καὶ Ζεύς finds its ultimate explanation in an actual Cretan cult, and that this cult was known, at least by tradition, to the chronographer who first tacked the history of Rome on to that of Assyria. When Euelpides in Aristoph. *av.* 480 spoke of Zeus as 'soon destined to restore the sceptre to the Woodpecker,' it was no mere flight of fancy but a genuine piece of folk-belief (*Class. Rev.* 1904 xviii. 81, J. Rendel Harris *Boanerges* Cambridge 1913 pp. 15, 35 f., 357). A trace of it survives even in the dull catalogue drawn up by Niketas, bishop of Serrhai, towards the close of the eleventh century A.D. (Schöll—Studemund *anecd.* i. 265 Ἐπίθετα Διός no. 81 *πίκου*, 266 Ἐπίθετα Διός no. 76 *πίκου*, 274 Niket. *rhythm. de duodec. deor. epith.* 1. 1 ff. Ἐπίθετα Διός...*πίκος*, 281 f. 1 Ἐπίθετα τοῦ Διός...*πίκος*).

propriateness in this oddly assorted couple; for the solar sign of the Lycians was sometimes equipped with the heads of swans or ducks[1] (fig. 632)[2], and the swan (or duck[3]) was, according to J. Déchelette[4], 'le principal symbole ou compagnon du soleil pendant la seconde moitié de l'âge du bronze et au premier âge du fer dans l'Europe du

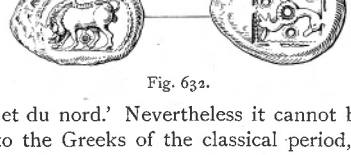

Fig. 632.

sud, du centre et du nord.' Nevertheless it cannot be too strongly insisted that, to the Greeks of the classical period, Odysseus and Penelope—whatever they may have been in the prehistoric past—were simply hero and heroine, and uncommonly human at that. After all, this is the secret of their immortality.

(ψ) Superstitious practices with axes.

Those who have weighed the evidence adduced in the course of this section (from page 505 onwards) will not hesitate to admit that the axe, whether double or single, was over a large part of the ancient world recognised as a visible token of the sky-god. Accordingly it is reasonable to expect that round it would spring up the usual crop of rites and ceremonies, which in process of time, obscured or misunderstood, would dwindle into a variety of superstitious practices.

Of such we have already noticed some; for instance, the habit of wearing axes or axe-shaped pendants, which ran through a whole series of evolutionary forms[5]. In this connexion I would recall a lively little passage in Theophrastos' description of 'The Complaisant Man':

'Then when he is asked to dinner he will request the host to send for the children; and will say of them, when they come in, that they are as like their father as figs; and will draw them towards him, and kiss them, and establish them at his side,—playing with some of them, and himself saying "Wineskin," "Hatchet," and permitting others to go to sleep upon him, to his anguish[6].'

[1] *Supra* i. 300 f. fig. 232.

[2] Fig. 632 represents a unique *statêr* of Lykia, which came to me from the Pozzi collection (*Pozzi Sale Catalogue* Genève 1920 p. 151 (wrongly described) no. 2751 pl. 80). The three branches of the Lycian symbol are here terminated by the heads of a cock, a swan (or duck), and a griffin respectively. Weight: 9·62 grammes.

[6] Theophr. *char.* 5 (=2 Jebb) trans. Sir R. C. Jebb. The new edition, revised by

On this Sir Richard Jebb remarked: 'Some child's-game, of which nothing is known. It may have consisted, for instance, in one of the players bringing down his hand edgewise ("hatchet") on the other's clenched fist, before he could snatch it away. That the words are not names which the guest calls the children—as they have usually been explained[1]—is clear from...the text, which shows that the children said them too. Casaubon's theory that the "wine-skin" and "hatchet" were little toys...hung round the children's necks, which the guest takes up and names successively, supposes the children to be infants.' The latest editors, J. M. Edmonds and G. E. V. Austen, likewise conclude that the words in question 'refer to some children's game, or possibly to an early lesson in spelling[2].' More probably Casaubon was right in suggesting the amulets hung round the necks of children (*peridéraia*)[3]. The imperial cabinet at Vienna possesses a handsome gold necklace to which are attached no fewer than fifty of these charms, including an excellent little hatchet (fig. 633)[4]. And the Museum at Reading has several bronze models of similar shape found during the excavations at Silchester (fig. 634)[5]. Analogous examples doubtless exist in other collections. They attest the curious fact that the dreaded weapon of the Thunderer can degenerate into an infant's toy without losing all trace of its superhuman quality.

Pliny[6] mentions, on the authority of 'Osthanes[7],' that one species

Sir J. E. Sandys (London 1909), leaves text, translation, and notes unaltered, so far as this passage is concerned.

[1] *E.g.* by H. G. Liddell—R. Scott *A Greek-English Lexicon*[8] Oxford 1897 pp. 232 *s.v.* *ἀσκός* 'Punch,' 1171 *s.v.* *πέλεκυς* 'a sharp blade.'

[2] Theophr. *char.* ed. by J. M. Edmonds and G. E. V. Austen London 1904 p. 58. They rightly scout the cjj. *κασκός*, 'little finger,' and *θύλακος*, 'wallet.'

[4] J. Arneth *Die antiken Gold- und Silber-monumente des k. k. Münz- und Antiken-Cabinettes in Wien* Wien 1850 p. 19 no. 1 pl. 1 (=my fig. 633), E. Fernique in Daremberg—Saglio *Dict. Ant.* i. 1561 fig. 2066. This necklace, together with a sumptuous gold *bulla*, fourteen gold medallions of various emperors, and other objects of interest, was found in 1797 by a couple of Walachian goat-herds at Szilágy-Somlyó in Siebenbürgen (Transylvania). Its central pendant is a ball of smoky quartz enclosed by gold bands and surmounted by two panthers or tigers on either side of a *kratér*.

[5] Fig. 634 is from a photograph kindly obtained for me by my friend Prof. P. N. Ure. I made a sketch of one of these trinkets many years ago, and mentioned it once as the best illustration of the passage in Theophrastos to Sir Richard Jebb. He told me that, if he ever brought out a second edition of his commentary, he would consider the point.

[6] Plin. *nat. hist.* 30. 14.

[7] Plin. *nat. hist.* 30. 8 and 11 distinguishes two writers on magic named Osthanes, one a contemporary of Xerxes, the other of Alexander the Great. Xanthos the Lydian *frag.* 29 (*Frag. hist. Gr.* i. 44 Müller) *ap.* Diog. Laert. *prooem.* 2 *Ξάνθος δὲ ὁ Λυδὸς εἰς τὴν Ξέρξου διάβασιν ἀπὸ τοῦ Ζωροάστρου ἑξακισχιλιά φησι* (*sc.* *ἔτη γεγονέναι*), *καὶ μετ' αὐτὸν γεγονέναι πολλούς τινας Μάγους κατὰ διαδοχήν, Ὀστάνας καὶ Ἀστραμψύχους καὶ Γωβρύας καὶ Παζάτας, μέχρι τῆς τῶν Περσῶν ὑπ' Ἀλεξάνδρου καταλύσεως* was taken by

Souid. *s.vv.* Μάγοι, Ὀστᾶναι to imply a succession of Magi called Ostanes: but the plural merely meant 'men like Ostanes' (R. Kühner—B. Gerth *Ausführliche Grammatik der griechischen Sprache*[3] Hannover—Leipzig 1898 i. 15). However, the exact number of persons named Ostanes is not worth discussing, since very serious doubts have been cast

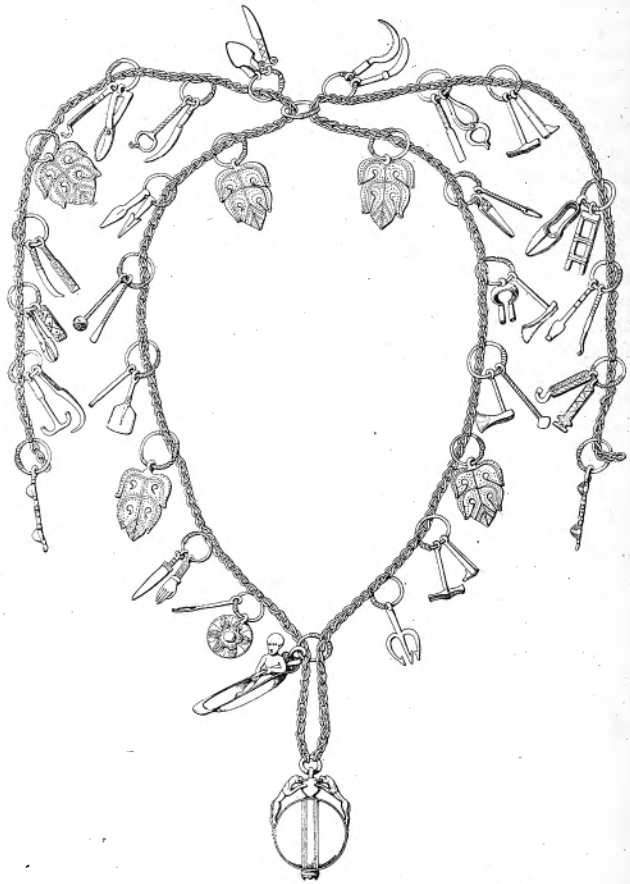

Fig. 633.

upon his historicity. C. W. Goodwin 'On the name Astennu' in the *Zeitschrift für ägyptische Sprache und Alterthumskunde* 1872 x. 108 f. pointed out that one of the appellations of the Egyptian god Thoth was *Astennu* and asked: 'Is not the name of the Magian Ostanes...a Grecised form of Astennu?' Sir G. Maspero in the *Proceedings*

of magic dealt in hatchets (*secures*). He adds elsewhere[1] that the Magi in their axe-divination (*axinomantia*) set fire to a piece of jet (*lapis Gagates*) and, if this was not consumed, announced that the

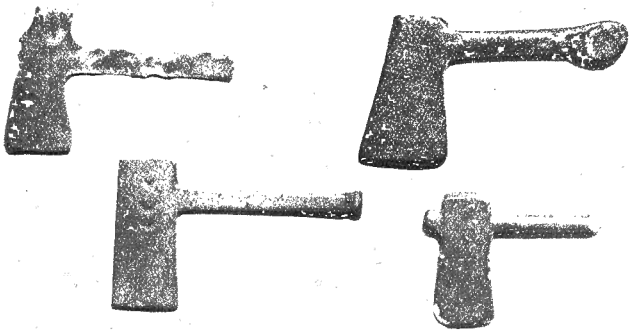

Fig. 634.

wishes of the worshipper would come true. The connexion between the axe and the burnt jet is not indicated and leaves room for conjecture[2]. J. Dalechamps[3] in 1587 said that the jet was placed on a red-hot hatchet—an assertion roundly rebuked by Salmasius[4] as

of the Society of Biblical Archæology 1898 xx. 140—144 argues that *Austanou, Ostané* was, to begin with, one of the cynocephalous deities forming the ogdoad of Hermopolis, that he was subsequently confounded with Thoth, that he acquired importance during the Ptolemaic period, and that Ostanes the god then gave rise to Ostanes the priest of Memphis, who according to Hermetic tradition initiated Demokritos of Abdera into the mysteries (Synes. *ad Dioscorum comment. in Democr.* in M. Berthelot *Collection des anciens alchimistes grecs* Paris 1888 Texte grec p. 57, 7 ff. = H. Diels *Die Fragmente der Vorsokratiker*[3] Berlin 1912 ii. 130 f.). Maspero further contends that 'Ostanés devient un Perse par là vertu de son nom, et par suite un mage, un chaldéen, d'où la variante qui lui donne une origine babylonienne.' F. Granger in *The Journal of Theological Studies* 1904 v. 398 f. carries the matter from Greece into Italy and makes it probable 'that Pliny depends upon Democritus for his mention of Ostanes.'

[1] Plin. *nat. hist.* 36. 142.

[2] On the virtues of jet in general see G. F. Kunz *The Curious Lore of Precious Stones* Philadelphia & London 1913 pp. 91 f., 263 f., *id. The Magic of Jewels and Charms* Philadelphia & London 1915 pp. 146 f., 352, 386. Burnt jet in particular had prophylactic, curative, and detective powers (Plin. *nat. hist.* 36. 141 f. Gagates lapis...cum uritur, odorem sulpureum reddit...fugat serpentes (cp. Nik. *ther.* 37 with schol. *ad loc.*) ita recreatque volvae strangulationes. deprendit sonticum morbum et virginitatem suffitus).

[4] C. Salmasius *Plinianae exercitationes in Caii Iulii Solini Polyhistora* Parisiis 1629 i. 252 E f. ('scribe : *in eam quam vocant causimomantiam*').

ridiculum, but not half so 'ridiculous' as that eminent scholar supposed; for in East Prussia it is still customary for the midwife to put red-hot coals on an axe and to step across it with the infant in her arms[1]. This, however, is a case of prophylaxis, not of divination. Axinomancy, strictly so called, has varied somewhat in its *modus operandi*. A hatchet suspended by a cord was used to detect criminals or discover secrets: it twisted and turned in answer to relevant questions[2]. Again, a hatchet poised in equilibrium on a pole was believed to bob at the name of the guilty party[3]. Lastly, a hatchet stuck in a pole and carefully balanced would turn or nod as soon as the right name in the list was reached[4]. These methods, detailed by

[2] J. J. Boissardus *De divinatione & magicis præstigiis* Oppenheimii s. a. [161–] p. 18: '*Axinomantia* eadem perficit (*sc.* detects criminals or secrets) ex securi suspensâ funiculo, quæ ad interrogata movetur & in gyrum vertitur,' E. B. Tylor in *The Encyclopædia Britannica*[11] Cambridge 1911 xx. 173 *s.v.* 'Ordeal': 'When a suspended hatchet was used in the same way (*sc.* as a sieve) to turn to the guilty, the process was called *axinomancy*.'

[3] J. Potter *Archæologia Græca*[7] London 1751 i. 352: 'Ἀξινομαντεία, from Ἀξίνη, i.e. an *Ax* or *Hatchet*, which they fixed so exactly upon a round Stake, that neither End might out-poise, or weigh down the other; then they pray'd, and repeated the Names of those they suspected; and the Person, at whose Name the *Hatchet* made any the least Motion, was found guilty.'

J. Tuchmann in *Mélusine* 1888—89 iv. 285 (followed by E. Riess in Pauly—Wissowa *Real-Enc.* ii. 2627) mentions, among other means of discovering witchcraft, both these forms of axinomancy: 'On suspendait une hache à une corde où on la posait, le manche en l'air, en équilibre sur un pieu. Après la récitation de certaines formules, on tournait autour de la corde ou du pieu en prononçant à haute voix le nom de toutes les personnes soupçonnées: la hache, dans le premier cas, tournait; dans le second, elle tombait.'

[4] C. Peucerus *Commentarius, de præcipuis divinationum generibus* Francofurti 1593 p. 321: 'Κοσκινομαντεία & ἀξινομαντεία, *divinatione ex cribro et securi*, ad pervestigandos atque aperiendos occultos scelerum authores, & res alias obscuras explorandas ac proferendas, incantatores utuntur. Hanc securi expediunt, rotundo palo infixa, aptataq; ad normam ac perpendiculum, & cum præfatione, ordine enumeratis nominibus eorum, qui in suspicione hærent: ad cuius se mentionem securis, vel levi impulsu circumagit aut nutat, eum culpæ reum peragunt. Illam' etc., M. Delrio *Disquisitionum Magicarum* libri sex Lugduni 1612 p. 245 *b* D: 'Decima ad eundem usum erat ἀξινομαντεία, quâ securim rotundo infigebant palo, & ex eius motu furem deprehendebant. Quando autem successûs futuri divinatio petebatur, tûc gagatem lapidem securi imponebant, ut Plinius[s] ([s]lib. 36. c. 19) refert,' J. Huic similis est ἀξινομαντεία, quæ *Securi* rotundo polo [*sic*] infixâ perficitur: sicut eô modô apud *Homerum* produntur proci Penelopes,' *ib.* E 2 'Dn. Meisnerus Phil. sobr. p. 2. l. 2. c. 3. q. 1. Descriptionem ἀξινομαντείας non tam commodè hic subjungit: ubi *securis* cylindraceo infigitur palo, adque normam aptatur; ut ille sons censeatur, cujus ad nomen se circumegerit,' A. Bouché-Leclercq *Histoire de la divination dans l'antiquité* Paris 1879 i. 183: 'Les vibrations ou oscillations d'une hache plantée dans un poteau constituaient la matière de l'*axinomancie* (ἀξινομαντεία), divination importée en Europe par les mages orientaux[2] ([2]PLIN., XXX, 1, 14; XXXVI, 19, 34).' So also W. Vollmer—W. Binder *Wörterbuch der Mythologie aller Völker*[3] Stuttgart 1874 p. 86, C. Kiesewetter *Die Geheimwissenschaften* Leipzig 1895 p. 375.

writers of the sixteenth century and later, have doubtless a long history behind them; and it is possible that Philon was thinking of the first when, instead of the sword of Damokles, he described 'a whetted axe hung by a slender cord[1].'

Axe-superstitions are with us still[2]. P. Sébillot in his *Folk-Lore de France* remarks that prehistoric stone implements are commonly supposed to act as a safeguard against a thunderstorm. Their efficacy

[1] Philon *ap.* Euseb. *praep. ev.* 8. 14. 29.

[2] My friend and colleague Prof. R. H. Kennett draws attention to one curious case: 'It was formerly the custom, if an offence were committed in the neighbourhood of Fordwich near Canterbury, to decide where the offender should be tried as follows. If a man from a boat in the middle of the river Stour could throw an axe weighing seven pounds beyond the place where the offence was committed, the offender was tried, and, if found guilty, punished at Fordwich' (R. H. Kennett—Mrs Adam—H. M. Gwatkin *Early Ideals of Righteousness* Edinburgh 1910 p. 11 f.). Prof. Kennett adds that he remembers to have heard his father mention the custom, which is duly noted both in king Cnut's grant of the Port of Sandwich to Christ Church Canterbury in 1023 A.D. (W. A. Scott Robertson 'Archæological Notes on Thanet' in *Archæologia Cantiana* 1878 xii. 339) and in a description of the Boundaries of the Liberty of Fordwich in 1272 A.D. (C. Eveleigh Woodruff 'Fordwich Municipal Records' *ib.* 1889 xviii. 92 n. † 'as far as a man being in a boat at *high* water can throw an axe of seven pounds weight, called a taper-axe, on to the land'). Cp. the throwing of a hammer, which in old German law ratified the acquisition of property (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 180 n. 3).

I append an even more suggestive usage from *A Guide to Criccieth & Pwllheli* published by Messrs Abel Heywood & Son of Manchester: p. 6 'After the subjugation of Wales, the constable appointed for Criccieth Castle was William de Leybourne,... This charge was afterwards given to Sir Hywel-y-Vwyall (Sir Howell of the Axe) by Edward the Black Prince, for his valour at Poictiers. According to the Welsh bards this redoubtable knight was the person who took the French King John prisoner at Poictiers,... A pole-axe formed part of the escutcheon of Sir Hywel in commemoration of his doughty deeds in that battle, which he had performed entirely with that weapon, and in perpetual memory of his services it was ordained that a mess of meat should be laid before the pole-axe every day, guarded by eight yeomen, and afterwards given to the poor. This ceremonial lasted till the time of Queen Elizabeth, when it became obsolete.'

Finally, Sir G. L. Gomme *Folklore as an historical science* London 1908 pp. 66—78 collects from the Germanic area much evidence tending to prove that it was formerly (in pre-Celtic times?) the custom to kill off the aged and infirm by means of a club or mallet (*e.g.* J. Aubrey *Remaines of Gentilisme and Judaisme* 1686—87 (London 1881) p. 19: 'An old Countrie Story'...'The Holy-mawle, w^{ch} (they fancy) hung behind the Church dore, w^{ch} when the father was seaventie the sonne might fetch, to knock his father in the head, as effœte, & of no more use.' Cp. *ib.* p. 127). Sir G. L. Gomme analyses a Gaelic folk-tale, which involves this *motif*, and notes that such mallets are still preserved at Osnabrück and in several towns of Silesia and Saxony. Mrs E. M. Leather *The Folk-Lore of Herefordshire* Hereford 1912 p. 171 f. with pl. adds a parallel from the Bargates, Leominster, where four small almshouses, founded in 1736 and since rebuilt, are adorned with 'a figure of a man, very quaint and rudely carved, holding an axe in his hand with these lines beneath:—"He that gives away all before he is dead, | Let 'em take this hatchet and knock him on ye head."' The rhyme is but the English form of that on the German mallet: 'Wer den Kindern gibt das Brod | Und selber dabei leidet Noth | Den schlagt mit dieser Keule todt' (W. J. Thoms in the *Gentleman's Magazine* 1850 i. 250—252).

is sometimes increased by the addition of a sort of prayer. Thus near Dinan as late as the year 1880 many people would carry a thunder-stone in their pocket during stormy weather and, if thunder were heard, would say:

Pierre, pierre,
Garde-moi du tonnerre.

Sébillot shows further that this *rôle* of acting as a lightning-rod passed from the neolithic celt to the iron axe:

Among the Basques, when a storm bursts, the best preservative is to place some cutting instrument, axe or scythe, outside the house with its edge turned to the sky. Peasants on the farms near Beuvray in Saône-et-Loire, as soon as they hear the first rumblings of thunder and feel the first drops of rain, bring out into the yard and set up near the threshold of their house an iron axe, with its handle against the ground and its blade uppermost, to preserve the place from lightning and hail. This custom is half-Christianised in the district of Saint-Gaudens in Haute-Garonne, where an iron axe, blade in air, is put in a plate containing holy water[1].

We come back, then, at length to the point from which we started[2], *viz.* the primitive belief that the thunderbolt falls in the form of an axe. By an axe therefore, according to the homœopathic principle of early thought, it must be averted.

ii. The spear of Zeus.

Lightning was sometimes, though not often, regarded by the ancient Greeks as the spear of Zeus. Pindar, ever on the look out for an effective epithet, coined a fine sonorous compound *encheikéraunos* to describe Zeus, 'whose spear is the lightning[3].' Bakchylides has the rival formation *keraunenchés*, Zeus 'whose lightning is his spear[4].' Aristophanes greets the lightning as

Immortal fiery spear of Zeus[5],

and an 'Apolline oracle quoted by Eusebios from Porphyrios calls it the

descending spear of Zeus[6].

Nonnos in the fifth century of our era makes Nike pray to Zeus as follows:

> Do thou in battle lift
> Thy lightning-flash, Olympos' luminous spear[1].

Accordingly, when Zeus meets Typhon,

> in the fray
> His shield was thunder and his corselet cloud,
> The spear he shook was lightning[2].

And elsewhere in the same poem Zeus is termed

> The javelin-thrower of the thunderbolt[3].

It is probable that the poets were but adopting a popular belief; for Eustathios in the middle ages explained that 'Zeus has a fiery spear[4],' and the modern Greek sailor with his eye on the storm-cloud will say 'God is throwing lightning like spear-strokes[5].'

The axe-bearing Zeus of Karia is not unfrequently represented with a spear[6]. And, since he was worshipped as *Strátios*, 'Lord of Hosts[7],' this weapon might no doubt be explained as an indispensable part of his panoply. Nevertheless it is probable that the old storm-god became the new war-god just because his thunderbolt was conceived as a potent weapon, first a double axe and then a spear or sword[8].

At Hydisos in Karia Zeus *Áreios*, the 'Warlike,' appears on a bronze coin struck by Hadrian (fig. 635)[9] as a soldier with helmet and shield, though he still brandishes a thunderbolt in his raised right hand. Bronze coins of the same town dating from the first century

B. V. Head was the first to transfer the coin from Iasos to Hydisos.

B.C. show him as he rests upon a spear (fig. 636)[1], while others give only the helmeted head (fig. 637)[2] or bust[3] of this martial deity. Whether the Zeus *Áreios*, before whom at Passaron in Molossis the kings and people of Epeiros plighted their troth[4], was a form of the ancient Epeirote thunder-god we cannot definitely assert; but it is likely enough. Again, the altar at Olympia, on which Oinomaos

Fig. 636.

Fig. 635.

Fig. 637.

used to sacrifice to Zeus *Áreios*[5], may have stood in some relation to the altar of Zeus *Keraúnios* adjoining the foundations of Oinomaos' house[6]. Be that as it may, the title *Áreios* was remembered for many centuries as one appropriate to the sky-god[7]; and Zeus *Áreios* was apparently Latinised as Iupiter *Militaris*[8].

[1] *Brit. Mus. Cat. Coins* Caria, etc. p. 122 pl. 20, 12, W. Wroth in the *Num. Chron.* Third Series 1896 xvi. 95 f. pl. 7, 12 (=my fig. 636), Imhoof—Blumer *Kleinas. Münzen* i. 134, Head *Hist. num.*[2] p. 620.

[4] Plout. *v. Pyrrh.* 5 *εἰώθεισαν οἱ βασιλεῖς ἐν* Πασσαρῶνι, *χωρίῳ τῆς* Μολοττίδος, *Ἀρείῳ Διὶ θύσαντες ὁρκωμοτεῖν τοῖς Ἠπειρώταις καὶ ὁρκίζειν, αὐτοὶ μὲν ἄρξειν κατὰ τοὺς νόμους, ἐκείνους δὲ τὴν βασιλείαν διαφυλάξειν κατὰ τοὺς νόμους.*

[5] Paus. 5. 14. 6 *τοῦ δὲ Ἡφαίστου τὸν βωμὸν εἰσιν Ἠλείων οἱ ὀνομάζουσιν Ἀρείου Διός. λέγουσι δὲ οἱ αὐτοὶ οὗτοι καὶ ὡς Οἰνόμαος ἐπὶ τοῦ βωμοῦ τούτου θύοι τῷ Ἄρεϊ Διί, ὁπότε τῶν Ἱπποδαμείας μνηστήρων καθίστασθαι μέλλοι τινὶ ἐς ἵππων ἅμιλλαν.* This altar of Zeus *Ἄρειος* explains the varying tradition that Oinomaos sacrificed on such occasions to Zeus (Diod. 4. 73: *supra* i. 36 ff., 407 ff.) or to Ares (Philostr. *imagg.* 9. 5). But the presence of Hephaistos at Olympia is unexpected, and his relation to Zeus *Ἄρειος* very problematic (cp. C. Robert in *Hermes* 1888 xxiii. 430 with n. 2). The coin which T. Panofka in the *Abh. d. berl. Akad. 1853* Phil.-hist. Classe p. 34 pl. 1—2, 3 takes to be a copper of Elis with *obv.* head of Hephaistos or Zeus *Ἄρειος*, *rev.* thunderbolt in wreath of wild olive, is a common mintage of Ithake (*Brit. Mus. Cat. Coins* Peloponnesus p. 105 pl. 21, 9) showing the head of Odysseus but lacking the legend [ΙΘΑ]! Equally unconvincing is the conjecture of Welcker *Gr. Götterl.* ii. 211 n. 127 that the altar was adorned with a relief representing the head of Hephaistos, whose cap was compared with the helmet of Zeus *Ἄρειος*. There is more to be said for the view advanced by F. Streber in the *Abh. d. bayer. Akad. 1835* Philos.-philol. Classe p. 234, *viz.* that the archaic helmeted figure standing beside the enthroned Hera in the Heraion at Olympia (Paus. 5. 17. 1) was none other than Zeus *Ἄρειος*. But even this is far from certain.

[8] Apul. *de mundo* 37 (Iupiter) est Militaris et Triumphator et Propagator, Tropaeo-

Zeus *Áreios* is hardly to be separated from Zeus *Strategós* who, together with Hera, is mentioned in an inscription of 69 A.D. as the patron deity of Amastris in Paphlagonia[1]. *Quasi*-autonomous coppers of the town, issued in early imperial times, exhibit his bust with a remarkable tress of wavy hair above the forehead (fig. 638)[2]. On coppers struck by Antoninus Pius he stands in a statuesque pose, his

Fig. 638.

Fig. 639.

Fig. 640.

Fig. 641.

left hand swathed in an ample *himátion*, his right holding a spear, and an eagle at his feet (fig. 639)[3]. Other pieces struck by the same emperor show him grouped with his consort, the sceptre-bearing Hera (fig. 640)[4],—a type repeated in inferior style by Tranquillina (fig. 641)[5]. It is probable that Zeus *Oúrios*, whose sanctuary stood on the eastern side of the Thracian Bosporos[6], was a god of like aspect.

phorus; et multo plura eiusmodi apud haruspices et Romanos veteres inveneris. The passage is thus printed by G. F. Hildebrand (ed. min. 1843). But for *Propagator* (E. Aust in Roscher *Lex. Myth.* ii. 746, 751, *supra* i. 552 n. 1 (?)) I should read *Propugnator* (E. Aust *loc. cit.* ii. 751), thereby obtaining an unbroken series of military titles. On imperial coins with the legends IOVI PROPVGNATORI (or PROPVGNAT) and IOVIS PROPVGNATOR see Rasche *Lex. Num.* iv. 921, Suppl. iii. 156 f., 162. I figure a 'first brass,' struck by Alexander Severus, from my collection.

[6] *Infra* § 7 (c).

For a similar figure on a silver *dekálitron* of Syracuse (215—212 B.C.) (fig. 643) almost certainly—as W. Abeken argued[1]—represents the famous statue of Zeus *Oúrios*[2] carried off from that city by Verres and known to the Romans as Iupiter *Imperator*[3], a manifest translation of Zeus *Strategós*.

The transition from storm-god to war-god may likewise be suspected in the case of that imperial favourite Iupiter *Victor*[4], whose

Fig. 643.

Fig. 644.

Fig. 645.

figure—again with spear reversed—on bronze coins and medallions of Claudius ii Gothicus (268—270 A.D.) is no doubt merely a religious expression for the victorious emperor himself (fig. 644)[5].

Other and less sophisticated examples of Zeus with spear in hand occur here and there among the Greek coins of south Italy, the Etruscan mirrors, the Gallo-Roman statuettes, and the Roman lamps.

Coppers of Petelia in Bruttium struck in the third century B.C.

Iupiter *Stator* (on whom see E. Aust in Roscher *Lex. Myth.* ii. 682—686, 758, H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 20—23, Wissowa *Rel. Kult. Röm.*[2] p. 122 f.) appears on Roman coins from Antoninus Pius to Carausius (Rasche *Lex. Num.* iv. 921, Suppl. iii. 157, 162, Stevenson—Smith—Madden *Dict. Rom. Coins* p. 484 fig.) usually as a nude figure standing erect with a spear (sceptre?) in one hand, a thunderbolt in the other (fig. 646 is from a silver coin of Gordianus Pius in my collection). His title was Grecised as Στήσιος (Plout. *v. Cic.* 16 *εἰς τὸ τοῦ Στησίου Διὸς ἱερόν, ὃν Στάτορα Ῥωμαῖοι καλοῦσιν*) or Ἐπιστάσιος (Plout. *v. Rom.* 18 *ἔστησαν οὖν πρῶτον οὗ νῦν ὁ τοῦ Διὸς τοῦ Στάτορος ἵδρυται νεώς, ὃν Ἐπιστάσιον ἄν τις ἑρμηνεύσειεν*) or, less accurately, as Ὀρθώσιος (Dion. Hal. *ant. Rom.* 2. 50 quoted *supra* p. 422 n. 1).

Plate XXIX

Etruscan mirror: the birth of Athena.

See page 709 ff.

sometimes show a naked Zeus advancing with thunderbolt and spear (fig. 645)[1]. The earliest specimen, however, gives him a long sceptre (fig. 647)[2] and most of the later specimens a short headless spear or sceptre (fig. 648)[3]—a type found also on the third-century federal coppers of the Bruttians (fig. 649)[4] and Lucanians (fig. 650)[5].

A magnificent mirror from Arezzo, now in the Museum at Bologna[6], represents (pl. xxix) the birth of Athena from the head

Fig. 647.

Fig. 648.

Fig. 649.

Fig. 650.

of Zeus (*Tina*)[7]. The god is seated upon the clouds of heaven, holding a leaf-shaped lance in his right hand and a sceptre in his left. Two goddesses occupy the place and perform the duty of the Eileithyiai. They are named *Thalna* and *Thanr*[8] respectively. The former clasps Zeus about the waist. The latter makes magic passes over his head, from which emerges the diminutive figure of Athena in full armour. Hephaistos, here called *Sethlans*[9], who has cleft the

[1] Garrucci *Mon. It. ant.* p. 157 pl. 112, 1 (=my fig. 645) describes this very obvious spear as a 'scettro.' If his illustration is right, his text is wrong.

[2] I am indebted to my friend Mr C. T. Seltman for the example of series A here illustrated (fig. 647).

[3] Garrucci *op. cit.* p. 157 pl. 112, 9 ('con lo scettro nella sin.'), *Brit. Mus. Cat. Coins* Italy p. 371 f. nos. 1 ('holding sceptre') and 5—8 ('holding sceptre'), *Hunter Cat. Coins* i. 139 nos. 1—3 ('holding sceptre in l.'), Head *Hist. num.*[2] p. 107. Fig. 648 is from a coin in my collection.

[4] Garrucci *op. cit.* p. 184 pl. 124, 23 (=my fig. 649) and 24 ('con iscettro nella sin.'), *Brit. Mus. Cat. Coins* Italy p. 330 f. nos. 93—98 ('sceptre in extended l.'), *Hunter Cat. Coins* i. 124 no. 55 pl. 9, 5 and nos. 56—61 ('spear in extended l.'), Head *Hist. num.*[2] p. 92.

[6] E. Brizio in the *Guida del Museo Civico di Bologna* Bologna 1882 p. 24.

[7] F. Inghirami *Monumenti etruschi o di etrusco nome* Poligrafia Fiesolana 1824 ii. 202—245 pl. 10—a careful detailed drawing, which served as the foundation of Gerhard *Etr. Spiegel* iii. 67—69 pl. 66 (=my pl. xxix). A fresh tracing of the mirror is published by E. Braun in the *Ann. d. Inst.* 1851 xxiii. 142 ff. pl. I—K. For further bibliography see C. Pauli in Roscher *Lex. Myth.* iv. 785.

[8] So E. Braun *loc. cit.* p. 143 ff. read the name, which had previously been transcribed as *Thana*. His attempt to identify *Thanr* with Iuno (*Uni*) is, however, hopeless.

[9] C. Pauli in Roscher *Lex. Myth.* iv. 786 ff. proposes to connect *śeθlans* with *σίδηρος*: 'Das Wort geht auf eine Form *śeθla zurück, die nach etruskischen Lautgesetzen für *śéθala stehen kann. Dies śéθala aber ist so klärlich gleich *σίδᾱρος*, dass es keiner weiteren Erörterungen darüber bedarf. Der śeθlans ist somit der "ferrarius," und die Form würde in griechischem Gewande Σιδηρηρός lauten.'

head of Zeus with his double axe, stands aloof on the right, his leg supported on a rock and his arm thrown up in astonishment at the result of his blow[1]. Behind *Thalna* is a pomegranate-tree[2] with an

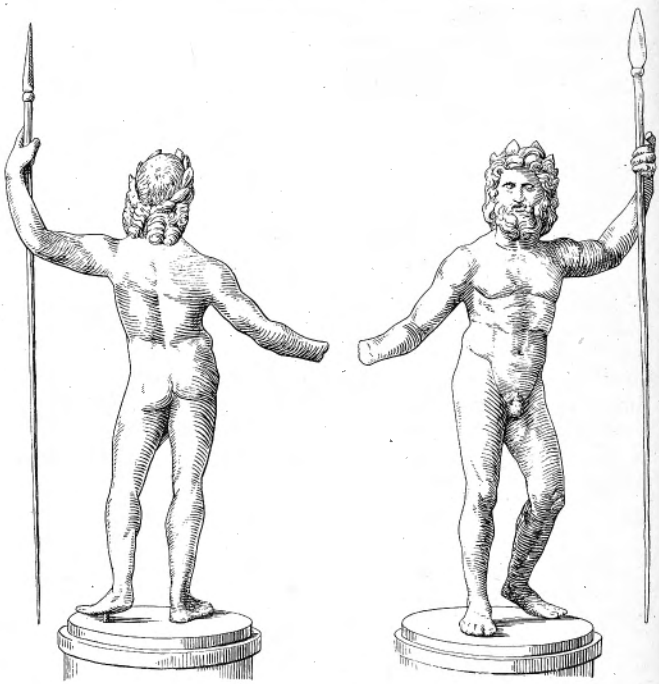

Fig. 651.

eagle[3] perched upon it; behind *Thanr*, a bay-tree. The back of the handle shows the face of Aphrodite, with a flower[4] in her hair, surrounded by leafage and flanked by a couple of doves. It will be

[1] His pose recalls on the one hand that of Hephaistos on a black-figured *amphora* in the Louvre (no. E 852, *infra* § 9 (h) ii (*θ*)), on the other hand that of Hermes in the east pediment of the Parthenon (*infra* § 9 (h) ii (*θ*)).

[2] Gerhard *op. cit.* iii. 68 takes it to be 'eine Myrtenstaude,' noting that the fruit of the myrtle resembles a small pomegranate.

[3] *Id. ib.* says 'mit darauf sitzender Taube,' but admits that the hooked beak is a difficulty. The suggestion of myrtle and dove would hardly have been made, had it not been for the erroneous notion that *Thalna* was a sort of Aphrodite (*Turan*).

[4] Gerhard *op. cit.* iii. 69: 'eine Rose.'

observed that in this imposing design the thunderbolt is definitely shaped like a short spear or javelin[1].

A Gallo-Roman bronze, found by labourers in 1914 on the site of a Roman house at Lyons, represents Iupiter, nude, bearded, and erect (fig. 651)[2]. His abundant hair is encircled with a wreath of bay or olive. His eyes show traces of incrustation in silver—a

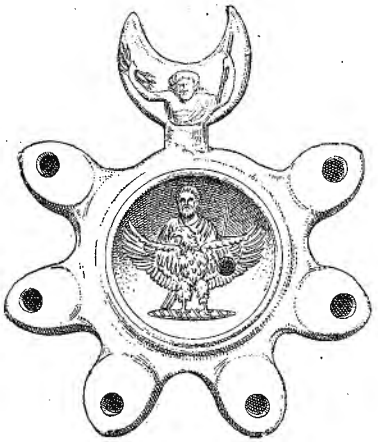

Fig. 652.

Fig. 653.

frequent and effective device. In his outstretched right hand, now lost, was some attribute, presumably a thunderbolt. In his raised left hand is a spear, still intact. H. Lechat in his excellent publication of the statuette, which he attributes to the first half of the second century A.D., rightly insists on its fine, almost Greek, style[3], but wrongly—to my thinking—denies that its attributes had any special significance[4]. On the contrary I should maintain that

[1] P. Jacobsthal *Der Blitz in der orientalischen und griechischen Kunst* Berlin 1906 p. 15 fig. 20: 'Die Knospe erscheint hier eher wie ein Blatt einer Lanzenspitze, auf dessen Fläche Ornamente graviert sind.' In E. Braun's plate (*Ann. d. Inst.* 1851 xxiii pl. I—K), the resemblance of the lance to a thunderbolt with a spike at either end is rather more pronounced.

[2] H. Lechat 'Statuette de Jupiter' in the *Rev. Arch.* 1917 i. 68—71 pl. 3 (=my fig. 651).

[3] The turn of the head towards the supporting leg implies the lasting influence of some fifth-century sculptor (Polykleitos?). But the thick mass of hair, the exaggerated swelling of the abdominal wall above the hip, and the *Schwung* of the whole figure betray the predilections of a much later period.

[4] H. Lechat *loc. cit.* p. 70: 'Au déclin du paganisme, dans ces minuscules figurations divines dénuées de tout caractère officiel, on voit des attributs qui sont comme vides de

Iupiter, grasping a bolt in one hand and a spear in the other, fittingly expressed the popular belief in a sky-god, whose weapons were thunder and lightning.

In conclusion, it should be noticed that Roman lamps with crescentic handles not unfrequently have the crescent embellished with a relief of Iupiter holding a thunderbolt in his right hand and a spear or sceptre in his left (fig. 652)[1]. An example in the British Museum gives him an unmistakable spear (fig. 653)[2]. The lightning-god was a suitable adornment of the light-giving lamp[3], and his threatensome attitude an excellent *apotrópaion*.

iii. The sword of Zeus.

Greek literature never equips Zeus with a sword. Can the same be said of Greek art? The question arises in connexion with an important Attico-Ionian *amphora* found at Caere in Etruria and now preserved in the Louvre (pl. xxx)[4]. The body of the vase exhibits two scenes, which together form one of our earliest representations of the Gigantomachia[5]. The main combat is that of Zeus, who single-handed attacks three Giants. Agasthenes is down and out; Ephialtes and Hyperbios still show fight. The Giants are armed like Greek hoplites. So too is Zeus, except that the round shield borne on his left arm is fringed with twenty bristling snakes

sens et ne servent plus que de prétexte à une pose, d'occasion à un geste.... De même, ici, la lance au lieu du sceptre.'

[1] J. Toutain in Daremberg—Saglio *Dict. Ant.* iii. 1327 f. fig. 4593 (=my fig. 652) from a terra-cotta specimen in the Louvre, *Brit. Mus. Cat. Lamps* p. 129 nos. 854—857 terra-cotta handles only.

[2] *Brit. Mus. Cat. Lamps* p. 129 no. 857 fig. 159 (=my fig. 653). Height 2⅝ inches. According to H. B. Walters, 'Zeus has three darts or arrows in r. hand.' But nos. 854—856 make it clear that a thunderbolt is intended.

[3] G. Supka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1915 xxx Arch. Anz. pp. 24, 27 f. fig. 6 publishes a large bronze lamp from Mór, now in the National Museum at Buda-Pesth, which has a fine bust of Zeus (eyes and lips originally incrusted), without thunderbolt, spear, or sceptre, between the horns of the crescent and below it on the crescent a bust of Helios. Other lamp-handles show Zeus between the horns, upborne on an eagle grasping a thunderbolt (A. C. P. de Tubières Comte de Caylus *Recueil d'antiquités égyptiennes, étrusques, grecques, romaines et gauloises* Paris 1764 vi. 305 pl. 97, 5, Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 11 no. 20 fig. Cp. *supra* p. 102 f. fig. 64).

[4] Pottier *Cat. Vases du Louvre* ii. 544 f. no. E 732, *id. Vases antiques du Louvre* 2me Série Paris 1901 p. 68 f. no. E 732 pl. 54 (views of front and back from photographs), O. Jahn 'Gigantomachia, dipinto vasculare ceretano' in the *Ann. d. Inst.* 1863 xxxv. 243—255, *Mon. d. Inst.* vi—vii pl. 78 (=my pl. xxx), Overbeck *Gr. Walters *History of Ancient Pottery* London 1905 ii. 13 f. fig. 111.

[5] M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 282 ff. no. 4.

Ionian (Cean ?) *amphora* from Caere, now in the Louvre : Zeus, in the Gigantomachia, fighting Agasthenes, Ephialtes, and Hyperbios.

See page 712 f.

and that the weapon brandished in his right hand appears to be a thunderbolt of unusual form. The other combatants are grouped in pairs[1]. Hera stabs Harpolykos (?). Athena seizes Enkelados by the crest of his helmet and swings up a short sword for the *coup de grâce*. Poseidon, in a scaled cuirass, with a black rock (the island Nisyros) on his left shoulder and a trident in his right hand, dispatches Polybotes. And Hermes, in *pétasos*, pelt, and *endromídes*, plunges a lance into Polybios. The inscriptions, according to P. Kretschmer[2], suggest that the painter hailed from Keos, or possibly Naxos or Amorgos. Our business, however, is not with the subject as a whole, but with the weapon of Zeus in particular. O. Jahn[3], J. Overbeck[4], and M. Mayer[5]—three highly competent critics—all took it to be a sword. But E. Pottier[6]—an authority of equal eminence—described it as the thunderbolt. And P. Jacobsthal[7] has argued in the same sense: he points out that Zeus, unlike the other swordsmen of the vase, has neither sheath nor sword-belt; that the attitude of his arm implies the action of hurling, not striking; and that the lines engraved on the bolt can be paralleled from the Etruscan mirror already discussed[8]. I accept this conclusion and assume that the front half of the thunderbolt is supposed to be hidden by the swan-head crests of Zeus' helmet.

We are on surer ground, though in a less Hellenic atmosphere, when we pass from the Kyklades to Karia. In the temple at Labranda near Mylasa Zeus was worshipped as *Stratios*, and his ancient image had a sword slung beside it[9]. Here we can be

[1] On this type-form see Overbeck *op. cit.* Zeus p. 341 ff. and H. B. Walters in the *Brit. Mus. Cat. Vases* ii. 9 ff.

[2] P. Kretschmer in the *Zeitschrift für vergleichende Sprachforschung* 1889—1892 xxxi. 292 ff., *id. tolerably certain that the old sky-god with his double axe (*lábrys*) has been modernised into a war-god with a handier blade[1].

At Stratonikeia, not twenty miles away from Mylasa, Zeus was *Chrysaoreús*[2] or *Chrysaórios*[3]. The town, indeed the whole district, had in early days been called *Chrysaoris*[4]. Its inhabitants, the *Chrysaoreîs*[5], were members of a league specially devoted to the cult of Zeus *Chrysaoreús*[6]. There was also a Carian hero Chrysaor,

[1] *Supra* p. 590 f. Similarly the Babylonian Zeus bore a dagger as well as a double axe for warlike purposes (Baruch 6. 15 ἔχει δὲ ἐγχειρίδιον δεξιᾷ καὶ πέλεκυν, ἑαυτὸν δὲ ἐκ πολέμου καὶ λῃστῶν οὐκ ἐξελεῖται): W. H. Roscher *Die Gorgonen und Verwandtes* Leipzig 1879 p. 78 n. 158.

[2] Strab. 660 ἔστι δ' ἐν τῇ χώρᾳ τῶν Στρατονικέων δύο ἱερά, ἐν μὲν Λαγίνοις τὸ τῆς Ἑκάτης ἐπιφανέστατον, πανηγύρεις μεγάλας συνάγον κατ' ἐνιαυτόν· ἐγγὺς δὲ τῆς πόλεως τὸ τοῦ Χρυσαορέως Διὸς κοινὸν ἁπάντων Καρῶν, εἰς ὃ συνίασι θύσοντές τε καὶ βουλευσόμενοι περὶ τῶν κοινῶν· κ.τ.λ. A base found at Delphoi records a decree of the Delphic Amphiktiones, between 205 and 202 B.C., in honour of Antiochos iii and of Antiocheia in Chrysaoris ὅτι τὸ κοινὸν τῶν Ἀμφικτιόνων τὰμ μὲν πόλιν τὰν Ἀντιο|χέων καὶ τὰν χώραν ἀναδεικνύει ἄσυλον καὶ ἱερὰν τοῦ Διὸς Χρυσαορέ|ως καὶ Ἀπόλλωνος Ἰσοτίμου, κ.τ.λ. father of the eponyms Idrieus[1] and Mylasos[2]. Philon of Byblos in his version of Sanchouniathon's history[3] gives *Chrysór* as the name of the Phoenician Hephaistos, whom he further identifies with Zeus *Meilíchios*[4].

With regard to this group of names some rather venturesome views have been advanced by P. Carolidis[5]. He holds that Zeus *Chrysaoreús* was the Hellenic form of the *non*-Hellenic Zeus *Osogós*, whose appellative he connects with the Armenian *vosghi* or *osghi*, 'gold.' *Chrysaoreús*, originally *Chrysáor*, involves—we are told—the suffix *-vor* (= *-phóros*), and this 'Golden' deity was the great sun-god of Asia Minor later fused with the war-god of the Chalybes, Zeus *Strátios*.

It must, I suppose, be conceded that the names *Chrysaoreus* etc. are Greek, at least in appearance. It is, however, an assumption that Zeus *Chrysaoreús* was one with Zeus *Osogóa* (so his title should be spelled[6]), and a further assumption that either of them was ever called Zeus *Strátios*. Again, it is obvious that the suffix *-phóros* cannot possibly enter into such forms as *Chrysáor*, *Chrysaoreús*. I should rather conclude that *Chrysaoreús*, if Greek, meant 'He of the Golden Sword,' the latter element in the compound being akin to *áor*, 'a sword,' itself a word of doubtful origin but best related to *aeíro* as 'a thing slung from, or attached to,' the wearer[7]. But, since the Greek *chrysós*, 'gold,' was borrowed from the Semitic *ḥárûṣ*[8], it is likely enough that we have here to do with a Greek attempt to extract sense from a Semitic (Phoenician?) name—a phenomenon already noted in other connexions[9].

On the whole, it seems probable that the Carian Zeus *Chrysaoreús* or *Chrysaórios* would have been regarded by neighbouring

Greeks—say Ionians of the coast-district—as the 'Bearer of a Golden Sword.' Now we have seen that the Ionians of the Kyklades had quite a *pènchant* for arming their deities with the sword: on the *amphora* figured above (pl. xxx) even Hera and Athena are using this weapon with effect. We are therefore prepared to find that Ionic minstrels, and after them the poets in general, spoke of this, that, and the other divine personage as 'bearer of a golden sword.' Apollon, for example, was *chrysáoros*[1] or *chrysáor*[2]—an epithet which certainly denotes him as god 'of the golden sword' (*áor*), not, as it was misinterpreted by later critics, 'of the golden quiver-strap (*aortér*), or lyre-strap, or lyre[3].' Artemis too in an oracle of Bakis was, like her brother, *chrysáoros*[4]. So was Demeter in the Homeric hymn[5]. Orpheus was described by Pindar as *chrysáor*[6]. And Chrysaor, Chrysaorios, Chrysaoreus occur as theophoric names, not only in Karia and countries adjacent[7], but also in places far afield[8].

Nor must we forget Chrysaor the twin-brother of Pegasos. Hesiod[9] tells us that, when Perseus cut off the head of the Gorgon Medousa,—

> Forth sprang Chrysaor huge and Pegasos
> The horse—this named from the founts of Ocean
> Where he was born; that grasped a golden sword.
> Pegasos, quitting earth the mother of flocks,
> Winged his way heavenward: in Zeus' home he dwells
> Bearing the thunder-peal and lightning-flash
> For Zeus the wise. Chrysaor met and knew
> Great Ocean's child, the maid Kallirrhoe,
> And had for son three-headed Geryon.

[2] So Millingen *loc. cit.* Wieseler *loc. cit.* took the horse ridden by Perseus to be a wingless Pegasos, as do Baumeister and Smith—Wayte—Marindin *locc. citt.* But Overbeck *loc. cit.* rightly points out that Perseus is on horseback just because Bellerophon rides a horse in the pendant relief, found in the same Melian tomb in 1819 (*Brit. Mus. Cat. Terracottas* p. 132 no. B 364).

Kypros, which forms part of the Cesnola collection at New York, has a graphic delineation of the scene (fig. 656)[1]. Perseus, with the head in a wallet (*kíbisis*), turns his back on the moribund Medousa and marches off, to be followed by his hound. A red-figured *amphora* at Munich (fig. 657)[2] gives Perseus the winged cap, the winged sandals, and even the winged *caduceus* of Hermes: Medousa is accompanied by a second Gorgon, and Perseus by Athena. An Etruscan scarab (fig. 658)[3] leaves the figure of Medousa to speak

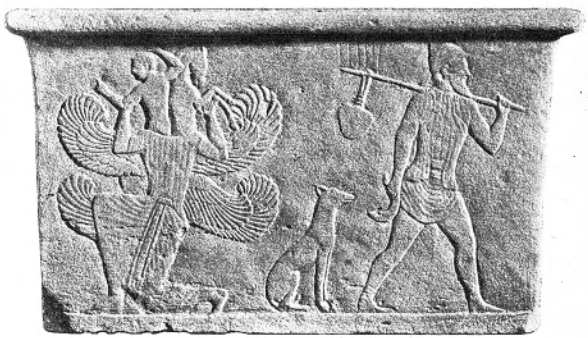

Fig. 656.

for itself. A small two-handled vase from Nola, formerly in the Campana collection (fig. 659)[4], had a stamped design representing a somewhat later moment. At the foot of an Ionic column surmounted by a Sphinx Medousa has fallen backwards in death. Chrysaor and Pegasos are already free from her neck, the former a naked infant kneeling on the ground, the latter a winged horse galloping up the sky. The two living Gorgons, Stheno and Euryale, with snakes in their right hands, pursue the hero, who keeping firm hold of his *kíbisis* and *hárpe* is conducted by Hermes into the

presence of Athena. Behind her back are three pairs of wings

Fig. 657.

hung up like weapons in an armoury[1]. This last touch was not

[1] E. Kuhnert *loc. cit.* describes these wings as 'Unverständlich.' But Perseus had been fitted out by the Nymphs with wings on head and foot, and these presuppose a divine store-house of such things.

particularly happy, and is abandoned in favour of a duplicated column on an *ὄλπε* of black glazed ware from Capua, now in the British Museum[1], which otherwise exhibits precisely the same stamped design. It would seem, then, that the artists of the fifth and fourth centuries B.C. ignored the Hesiodic tradition that Chrysaor 'grasped a golden sword,' but were well aware of his phenomenal birth.

Fig. 658.

Now F. Hannig[2] has argued that Chrysaor had originally nothing to do with Pegasos, but was none other than the Carian Chrysaor[3] (son of the Sisyphid Glaukos[4], as was also Bellero-

phon[1]), who first became attached to the birth-saga in Asia Minor, the story having been carried thither by Dorian colonists from its home in the northern Peloponnese. To this hypothesis in a modified form O. Gruppe[2] has given his assent. It should, however, be emphasised that what brought Chrysaor and Pegasos together in this peculiar twinship was their identity of function. According to Hesiod[3] and Euripides[4], Pegasos carries the thunder and lightning of Zeus. And scholars both ancient[5] and modern[6] have seen in Chrysaor a personification of the lightning[7]. I am no devotee of meteorological mythology, but I admit the attractiveness of this hypothesis, which explains well the 'golden sword' of our earliest

[1] E. Wilisch in Roscher *Lex. Myth.* i. 1688 ff., G. Weicker in Pauly—Wissowa *Real-Enc.* vii. 1408 ff.

[2] Hannig's views have been summarised and criticised by Gruppe in the *Berl. philol. Woch.* März 25, 1905 p. 380 ff., who however accepts his contention that Pegasos at first belonged to the Bellerophon-myth and concludes (*ib.* p. 386) with great ingenuity as follows: 'Endlich sind Pegasos und Bellerophontes wahrscheinlich nicht erst von Argos aus über Rhodos, sondern schon durch die troizenische Kolonie Halikarnassos, die früh den Vorderteil des Pegasos auf die Münzen setzte, in das benachbarte Bargylia, das er gegründet haben sollte, gekommen; auch Glaukos' Sohn Chrysaor ist vielleicht von Halikarnassos, also in letzter Linie von Troizen aus in eine Genealogie von Mylasa gelangt, und schliesslich ist sein Name als Entsprechung des mit der Doppelaxt dargestellten barbarischen Landesgottes von Karien gefasst worden. Nun ist natürlich Chrysaor, der Sohn des Glaukos, d. h. des Poseidon, und der Eurymede, nicht zu trennen von Chrysaor, dem Sohne Poseidons und der (Eury)medusa; beide sind niemand anders als Bellerophontes *χρυσάωρ*, der ebenfalls Glaukos' oder Poseidons und Eurymedes Sohn heisst. Der troizenische Hymnos erzählte also, wie aus dem Haupte der Medusa Bellerophontes das Goldschwert in der Hand und den Pegasos reitend hervorsprang: das ist eine Parallele und hat wahrscheinlich die Anregung gegeben zu der argivischen Sage von Athena, die in goldener Rüstung mit Ross und Wagen aus dem Haupt des Göttervaters hervorging.' See also Gruppe *Myth. Lit.* 1908 pp. 434, 590 f.

[7] It is noteworthy that in Orph. *lith.* 551 *χρυσαόρῳ Περσῆι* (*χρυσαύρῳ* ed. Ald. J. G. J. Hermann cj. *χρυσοπάτρῳ*. E. Abel cj. *χρυσογόνῳ*) the epithet *χρυσάορος* is applied to Perseus himself, whose sword (first mentioned in Hes. *sc. Her.* 221 f. *ὤμοισιν δέ μιν ἀμφὶ μελάνδετον ἆορ ἔκειτο | χαλκέου* (*χάλκεον* codd. K. L.) *ἐκ τελαμῶνος*) subsequently becomes a sickle-sword (first in Pherekyd. *frag.* 25 (*Frag. hist. Gr.* i. 75 f. Müller) *ap.* schol. Ap. Rhod. 4. 1515 *τῇ ἅρπῃ*) or sickle (so on a 'Lucanian' *hydria* from Anzi in the *Brit. Mus. Cat. Vases* iv. 95 f. no. F 185 pl. 7): see E. Kuhnert in Roscher *Lex. Myth.* iii. 1990, 2021.

authority and falls into line with the folk-concepts of various peoples[1]. If valid, it leads us to conclude that Zeus *Chrysaoreús* of Stratonikeia was viewed by the Greeks as a lightning-god, 'He of the Golden Sword,'—a deity essentially akin to Zeus *Strátios* the sword-bearer of Labranda.

iv. The thunderbolt of Zeus.

Zeus regarded as a lightning-god was, we have seen, sometimes armed with an axe, occasionally with a spear, very seldom with a sword or dagger, never—be it observed—with bow and arrows[2] (like Apollon) or with club (like Herakles). But far more frequent than any or all of these is another weapon. Innumerable passages of Greek literature and innumerable monuments of Greek art represent Zeus equipped with a thunderbolt. Of the literary allusions I have already said something and shall have to say more. We are here concerned only with the artistic representations, and with the light that they throw upon the development of popular belief[3].

(*a*) Gradual elimination of the thunderbolt.

O. Gruppe[4] has remarked that the thunderbolt, which from the sixth century B.C. onwards characterises the figure of Zeus, falls gradually into the background. 'Men seem to have realised,' he says, 'that a sense of majesty is produced not so much by the exercise of power as by the power to exercise it.'

To this progressive elimination of the thunderbolt there was one significant exception. In the Council Hall at Olympia even as late as the second century A.D. stood the formidable figure of Zeus *Hórkios*[5], 'God of Oaths,' still grasping a thunderbolt in either hand

[1] See F. L. W. Schwartz *Der Ursprung der Mythologie* Berlin 1860 pp. 103, 231, 235, 282 f., *id. Indogermanischer Volksglaube* Berlin 1885 pp. 26 n. 1, 104, 141, 143, 225, E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 92.

J. F. Campbell *Popular Tales of the West Highlands* Edinburgh 1860 i pp. lxxiv, 1 ff., ii. 238 ff. gives two tales, which have points in common with the myth of Perseus, Chrysaor, and Pegasos. In no. 1, 'The young king of Easaidh Ruadh,' the hero beheads the king of the oak windows and obtains two treasures belonging to him, *viz.* a white-faced black horse, the best in Erin, and a marvellous sword known as the Glaive of Light. In no. 46, 'Mac Iain Direach,' the hero obtains the yellow (bay) filly of the king of Erin and the white Glaive of Light kept by the seven Big Women of Dhiurradh.

[2] But cp. Nonn. *Dion.* 2. 480 f. (of Zeus *v.* Typhon) Δικτεέες δὲ κεραυνοὶ | ἠερόθεν πέμποντο πυριγλώχινες ὀιστοί.

Martin *La foudre l'électricité et le magnétisme chez les anciens* Paris 1866 pp. 1—418 *passim* and O. Gilbert *Die meteorologischen Theorien des griechischen Altertums* Leipzig 1907 pp. 620—637.

[4] Gruppe *Gr. Myth. Rel.* p. 119 f.

[5] Zeus is not known to have borne the cult-title Ὅρκιος elsewhere, except perhaps at

Tyana in Kappadokia (*supra* p. 569 n. 4). But all deities by whom men swore were ὅρκιοι θεοί, and none more so than Zeus (Farnell *Cults of Gk. States* i. 69 f., O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 2408 f.), who is described as ὅρκιος by poets of the classical and by prose-writers of the post-classical age (Soph. *Phil.* 1324 Ζῆνα δ' ὅρκιον καλῶ, Eur. *Hipp.* 1025 f. νῦν δ' ὅρκιόν σοι Ζῆνα καὶ πέδον χθονὸς | ὀμνυμι κ.τ.λ., Ap. Rhod. 4. 95 f. Ζεὺς αὐτὸς Ὀλύμπιος ὅρκιος ἔστω | Ἥρη τε Ζυγίη Διὸς εὐνέτις κ.τ.λ., Loukian. *Tim.* 1 ὦ Ζεῦ φίλιε καὶ ξένιε καὶ ἑταιρεῖε καὶ ἀστεροπητὰ καὶ ὅρκιε καὶ νεφεληγερέτα καὶ ἐρίγδουπε καὶ εἴ τί σε ἄλλο οἱ ἐμβρόντητοι ποιηταὶ καλοῦσι, Souid. *s.v.* Ὅρκιος Ζεύς. καί, Ὅρκιον σκῆπτρον, καθ' οὗ ὤμνυον οἱ βασιλεῖς· ἢ ῥάβδος (cp. *et. Gud.* p. 435, 17, Zonar. *lex. s.v.* ὅρκιον σκῆπτρον), Schöll—Studemund *anecd.* i. 265 Ἐπίθετα Διός no. 72 ὁρκίου, 266 Ἐπίθετα Διός no. 67 ὁρκίου, Favorin. *lex.* p. 1377, 18 ff. ὅρκιος Ζεὺς καὶ φίλιος καὶ ἑταιρεῖος (*leg.* ἑταιρεῖος), ὁμόγνιος, πατρῶος, πρὸς τούτοις ἑρκεῖος, ἐφέστιος Ἰωνικῶς· ἐν οἷς καὶ ξένιος καὶ ὁ φράτριος, κοινὰ ἐπίθετα τοῦ Διός). Accordingly, his wife is ὁρκία Themis (Eur. *Med.* 208 τὰν Ζηνὸς ὁρκίαν Θέμιν, cp. *ib.* 168 ff. κάπιβοᾶται | Θέμιν εὐκταίαν Ζῆνά θ', ὃς ὅρκων | θνητοῖς ταμίας νενόμισται) and his child the personified Ὅρκος (Soph. *O.C.* 1767 χὠ πάντ' ἄϊων Διὸς Ὅρκος, where Sir R. C. Jebb rendered 'servant of Zeus' because Hes. *o.d.* 804 makes Horkos the son of Eris). An actual cult of Zeus Ἐφόρκιος is to be inferred from Hesych. *s.v.* Ἐφόρκιος· Ζεὺς †ἐνκιταναπάμαται (J. Alberti prints Musurus' cj. ἐν Τιτάνων τάγματι, M. Schmidt cj. ἐν Πιτάνῃ τιμᾶται. Ptol. 5. 13. 16 mentions Κίταμον as a town in Armenia Maior. Κίτιον in Kypros is less probable).

Zeus Ὁράτριος is known from a treaty (*s.* ii B.C.) between Hierapytna and Lyttos (Michel *Recueil d'Inscr. gr.* no. 29, 13 ff. ὅρκος Λυκτίων· ὀμνύω τὰν Ἑστίαν καὶ Ζῆνα Ὁράτριον καὶ τὰν Ἀθαναίαν Ὠλερίαν καὶ Ζῆνα | Μο[νυίτιον καὶ Ἥρ]αν καὶ Ἀθαναίαν Πολιάδα καὶ Ἀπόλλωνα Πύτιον καὶ Λατὼ καὶ Ἄρεα καὶ Ἀφροδίταν καὶ Κωρῆτας καὶ Νύμφας καὶ θεὸς πάντας καὶ πάσας· κ.τ.λ., 19 ff. ὅρκος Ἱεραπυτνίων· ὀμνύω τὰν Ἑστίαν καὶ Ζῆνα Ὁράτριον καὶ Ἀθαναίαν Ὠλερίαν κα[ὶ] Ζῆνα Μονυίτιον καὶ Ἥραν καὶ Ἀθαναίαν Πολιάδα καὶ Ἀπόλλωνα Πύτιον καὶ Λατὼ καὶ Ἄρεα καὶ Ἀφροδί[την καὶ Κωρῆτας καὶ Νύμφας καὶ θεὸς πάντας καὶ πάσας· κ.τ.λ.), from another, of approximately the same date, between Hierapytna and one of its colonies (*Corp. inscr. Gr.* ii no. 2555, 11 ff. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 311 f. no. 5039, 11 ff. ὅρκος ὀμνύω τὰν Ἑστίαν καὶ Τ[ὴν]α Ὁράτριον καὶ Τ[ὴν]α | Δικταῖον καὶ Ἥραν καὶ Ἀθαναίαν Ὠλερίαν καὶ Ἀθαναίαν Πολιάδα | καὶ Ἀθαναίαν Σαλμωνίαν καὶ Ἀπόλλωνα Πύθιον καὶ Λατὼ καὶ Ἄρ[τε]μιν καὶ Ἄρεα καὶ Ἀφροδίταν καὶ Κωρήτας καὶ Νύμφας καὶ τὸς Κυρβάν|τας καὶ θεὸς πάντας καὶ πάσας· κ.τ.λ.), and from a third, somewhat later, between Gortyna and Hierapytna on the one side and Priansos on the other (F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 301 ff. no. 5024, 59 ff. ὅρκος Π[ριανσιέων.] | [ὁμ]νύω τὰν Ἰστίαν καὶ Τ[ὴ]να [Βιδάταν – (R. Bergmann suggests καὶ Τ[ὴ]να Δικταῖον?) καὶ Τ[ὴ]να] | [Σκ]ύλιον καὶ Τ[ὴ]να Ὁράτριον [καὶ Ἥραν καὶ – → καὶ Ἀ][θαν]αίαν Ὠλερίαν καὶ Ἀπόλλω[ν]α Πύτιον καὶ Λατὼ κἄρτεμιν κἄρεα καὶ Ἀ][φρο]δίταν καὶ Ἐρμᾶν [κ]αὶ Κύ[ρβαντας καὶ Κωρήτας καὶ Νύμφας καὶ Ἰλί][θυι]αν Βιατίαν καὶ θιὸς πάντ[ας καὶ πάνσας· κ.τ.λ.], 75 ff. ὅ[ρκ]ος Γ[ορ][τυνίων καὶ Ἰαραπυτνίων.] ὀμνύω τὰν Τ[ὴ]ναν καὶ Τ[τῆ][να Βιδάταν – – (R. Bergmann suggests καὶ Τ[ὴ]να Δικταῖον?) καὶ Τ[τ]ὴνα Σκύλιον καὶ Τ[ὴ]να [Ὁρά][τριον καὶ Ἥραν – –] καὶ Ἀθαναίαν Ὠλερίαν κ[αὶ Ἀ][πέλλωνα Πύτιον καὶ Λατὼ κἄρτεμιν κἄρε]α κἀφροδίταν καὶ Ἐρμᾶν κα[ὶ] | [Κύρβαντας καὶ Κωρήτας καὶ Νύμφας καὶ Ἰλί][υιαν Βιατίαν καὶ θιὸς πάν|τας καὶ πάνσας, κ.τ.λ. K. Hoeck *Kreta* Göttingen 1829 iii. 140 n. *g.* wanted to read καὶ Δία πάτριον καὶ Δία | Δικταῖον in the second inscription. A. Boeckh in the *Corp. inscr. Gr.* ii. 411 proposed καὶ [Ζ]ᾶνα [Φ]ράτριον, κα[ὶ Ζᾶ]να Δικταῖον. But modern philologists (F. W. Schneidewin in *Philologus* 1854 ix. 699 n. 2, H. Voretzsch in *Hermes* 1870 iv. 273, R. Meister in G. Curtius *Studien zur griechischen und lateinischen Grammatik* Leipzig 1871 iv. 406 f., É. Boisacq *Les dialectes doriens* Paris 1891 p. 114, A. Thumb *Handbuch der griechischen Dialekte* Heidelberg 1909 p. 127) recognise Ὁράτριον = Φράτριον, the 'Protector of Laws and Treaties' (ῥήτραι). 'The epithet would then be of Elean source (cf. El. ῥάτρα = ῥήτρα...), or else contain hyper-Doric ᾱ' (C. D. Buck *Introduction to the Study of the Greek Dialects* Boston 1910 p. 277 n.).

Zeus Πίστιος occurs in Dion. Hal. *ant. Rom.* 2. 49 Κάτων δὲ Πόρκιος (*frag.* 50 Peter) *τὸ μὲν ὄνομα τῷ Σαβίνων ἔθνει τεθῆναί φησιν ἐπὶ Σάβου τοῦ Σάγκου δαίμονος ἐπιχωρίου, τοῦτον δὲ τὸν Σάγκον ὑπό τινων Πίστιον καλεῖσθαι Δία*, 4. 58 *τούτων ἐστὶ τῶν ὁρκίων μνημεῖον ἐν Ῥώμῃ κείμενον ἐν ἱερῷ Διὸς Πιστίου, ὃν Ῥωμαῖοι Σάγκον καλοῦσιν*, 9. 60 *ἐν δὲ τῇ πόλει τὸν νεὼν τοῦ Πιστίου Διὸς Σπόριος Ποστούμιος...καθιέρωσε κ.τ.λ.*, as a rendering of the Latin Dius *Fidius* (cp. Schöll—Studemund *anecd.* i. 266 *Ἐπίθετα Διός* no. 78 *πιστίου*). The facts relating to this deity are collected by G. Wissowa in Roscher *Lex. Myth.* i. 1189 f., iv. 316 ff., *id. Rel. Kult. Röm.*[2] pp. 129 ff., 280 f., *alib.*, E. Aust in Pauly—Wissowa *Real-Enc.* v. 1246 f. In addition to literary allusions we have extant dedications to him as *Semo Sancus Sanctus Deus Fidius* (Dessau *Inscr. Lat. sel.* no. 3472), *Sancus Sanctus Semo Deus Fidius* (*ib.* no. 3473), *Semo Sancus Deus Fidius* (*ib.* no. 3474), *Semo Sancus* (*ib.* no. 3475), *Sancus Deus Fidius* (*ib.* no. 3476). Wissowa *Rel. Kult. Röm.*[2] p. 130 infers that his full name was *Semo Sancus* Dius *Fidius*, where *Semo Sancus* is not to be regarded as a distinct divinity blended with Dius *Fidius*, but as an appellative like *Duonus Cerus* in the case of Ianus (*supra* p. 328 n. 8), *Bona Dea* in that of Fauna, *Deus Bonus* in that of Aesculapius, etc. (G. Wissowa in Pauly—Wissowa *Real-Enc.* iii. 686 ff.). A corresponding Umbrian god was Iupater *Sancius*, mentioned in the *Tabulae Iguvinae* ii *b*, 17 Saŝi Iuvepatre, ii *b*, 24 Iupater Saŝe (R. S. Conway *The Italic Dialects* Cambridge 1897 i. 417, C. D. Buck *A Grammar of Oscan and Umbrian* Boston, U.S.A. 1904 p. 297) and apparently to be identified with the *Fisos Sancios* of i *a*, 15 Fise Saŝi, vi *b*, 3 Fiso Sansie and the *Fisovios Sancios* of vi *b*, 5 Fisoui Sansi, 6 Fisoui Sansi, 8 Fisoui Sanŝi (*bis*), 9 Fisouie Sanŝie, 10 Fisouie Sanŝie, 12 Fisouie Sanŝie (*bis*), 14 Fisouie Sanŝie, 15 Fisouie Sanŝie, vii *a*, 37 Fisoui Sansii (cp. also the *Vesticios Sancios* of ii *a*, 4 Vestiŝe Saŝe). But, although the historian of religion is strongly disposed to equate the Dius *Fidius* of the Romans with the *Fisos* (or *Fisovios*) *Sancios* of the Umbrians, the philologist sees lions in the way. W. Schulze 'Zur Geschichte lateinischer Eigennamen' in the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe 1904 N.F. v. 2. 473 ff. concludes (p. 475 n. 2): 'Die Identificirung mit lat. *Fīdius*...ist grammatisch unhaltbar, trotzdem sie sich sachlich aufs Beste zu empfehlen scheint.' And Walde *Lat. etym. Wörterb.*[2] p. 289 *s.v.* 'fīdo' says: '*fīsus*...ist mit o. *Fiisfaís*, u. *Fiso-*, *Fisiu*, *Fisovie* usw. nur dann vergleichbar, wenn es urit. *ī* enthält, was sehr unsicher ist, wie infolgedessen auch überhaupt (trotz lat. *Fīdius*) die etymologische Zugehörigkeit der o.-u. Götternamen zu unserer Wz.' Abandoning, then, the road that leads to Umbria and limiting our enquiry to Rome, we find that the connexion of *Fīdius* with *fides*, etc., has been almost universally assumed. For little weight can be attached to the dissent of L. Aelius Stilo, who took *Dius Fidius* to be for *Diovis Filius* (L. Aelius Stilo *frag.* 9 Funaioli *ap.* Varr. *de ling. Lat.* 5. 66 Aelius Dium Fidium dicebat Diovis filium, ut Graeci Διόσκορον Castorem, et putabat hunc esse Sancum ab Sabina lingua et Herculem a Graeca, cp. Paul. ex Fest. p. 147, 8 ff. Müller, p. 133, 1 ff. Lindsay, interp. Serv. *in* Verg. *Aen.* 4. 204, 8. 301, H. Hagen *anecdota Helvetica* Lipsiae 1870 pp. 212, 37 ff. and 260, 16 ff. (=*commentum Einsidlense in* Don. *artem minorem* de adverbio), G. Goetz—G. Gundermann in the *Corpus glossariorum Latinorum* Lipsiae 1888 ii. 54, 1 Diuus filius *διῶσυιος· ηρακλῆς*). There are, however, some points about the god and his ritual that provoke further investigation. He was, to begin with, a sky-god, to whom appeal must be made only under the open sky. Any one who swore by Dius *Fidius* stepped into the *compluvium* so as to have no roof over his head (Varr. *Cato vel de liberis educandis ap.* Non. Marc. p. 793, 23 ff. Lindsay itaque domi rituis nostri qui per Dium (so Scaliger for *deum*) Fidium iurare vult prodire solet in compluvium). Varr. *de ling. Lat.* 5. 66 rightly connects this custom with the fact that Iupiter's roof had a hole in it (*supra* i. 53). The sky-god was from of old the recipient of open-air worship (*supra* i. 117 ff.), and his relatives took after him. The oath by Dionysos must not be sworn beneath a roof, and boys who wanted to swear by Herakles were turned out of doors for the purpose (Plout. *quaestt. Rom.* 28). The bronze disks or wheels (*aenei orbes*) dedicated by the Romans to Semo Sangus out of the spoils of Privernum (Liv. 8. 20) were perhaps solar symbols, as I conjectured in *Folk-Lore* 1905 xvi. 272 n. 9. At Iguvium the man who offered a calf to Iupater *Sancius* held a wheel

(*urfeta=orbita*) in his hand (*Tabulae Iguvinae* ii *b*, 22 ff. pune seste, | urfeta manuve habetu. estu iuku habetu : | ' Iupater Saše, tefe estu vitlu vufru sestu,' which C. D. Buck *op. cit.* p. 297 translates 'Cum sistis, orbitam in manu habeto. Istas preces habeto : "Iuppiter Sanci, tibi istum vitulum votivum sisto" '). Cakes called *summanalia*, and presumably sacred to Iupiter *Summanus*, god of the nocturnal sky and sender of lightning by night (R. Peter in Roscher *Lex. Myth.* iv. 1600), were made in the shape of a wheel (Fest. p. 348 *b* 5 f. Müller, p. 474, 17 f. Lindsay, Paul. ex Fest. p. 349, 9 Müller, p. 475, 7 Lindsay). Lyd. *de mens.* 4. 90 p. 138, 1 f. Wünsch τὸ Σάγκος ὄνομα οὐρανὸν σημαίνει τῇ Σαβίνων γλώσσῃ is not conclusive (R. S. Conway *op. cit.* i. 357). But, on the whole, it seems clear that Dius *Fidius* was a specialised form of Iupiter, the sky-god by whom men swore. Now Iupiter was believed to sanction treaties with his thunderbolt (Verg. *Aen.* 12. 200 audiat haec genitor, qui foedera fulmine sancit with Serv. *ad loc.*). And Dius *Fidius* appears to have stood in very special relations to the lightning-flash. G. Wissowa in

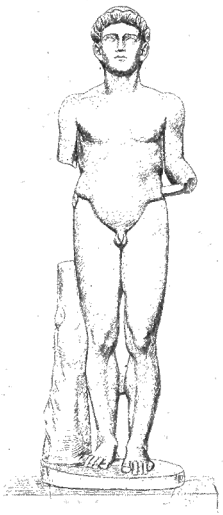

Fig. 660.

Fig. 661.

Roscher *Lex. Myth.* iv. 318 points out that of the inscriptions mentioning him the three most important are all dedications by the *decuria sacerdotum bidentalium* (Dessau *op. cit.* nos. 3472, 3473) or *decuria bidentalis* (*ib.* no. 3474), on which see E. de Ruggiero *Dizionario epigrafico di antichità romane* Roma 1894 i. 1005 f. One of these inscriptions (Dessau *op. cit.* no. 3472 Semoni | Sanco | Sancto Deo Fidio | sacrum | decuria sacerdot. | bidentalium) occurs on the base of a marble statue, found at Rome in 1879 and representing Dius *Fidius* himself in the guise of an archaic Apollon (H. Jordan 'Statua Vaticana di Semone Sanco' in the *Ann. d. Inst.* 1885 lvii. 105—126 pl. A. = my fig. 660 f., W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 226 f. no. 351, G. Wissowa in Roscher *Lex. Myth.* iv. 318 fig.). C. O. Thulin *Die etruskische Disciplin* i Die Blitzlehre (*Göteborgs Högskolas Årsskrift* 1905 v) Göteborg 1906 p. 42 f. thinks that the statue once held a thunderbolt in its left hand, an *orbis aeneus* in

to the terror of would-be perjurers. Pausanias was impressed by the sight:

'the image of Zeus in the Council House is of all the images of Zeus the best calculated to strike terror into wicked men: it bears the surname of the God of Oaths, and holds a thunderbolt in each hand. Beside this image it is the custom for the athletes, their fathers and brothers, and also the trainers, to swear upon the cut pieces of a boar that they will be guilty of no foul play in respect of the Olympic games. The athletes take an additional oath, that for ten successive months they have strictly observed the rules of training. Also those who examine the boys or the foals which are entered for the races swear that they will decide justly and will take no bribes, and that they will keep secret what they know about the accepted or rejected candidate. I forgot to ask what they do with the boar after the athletes have taken the oath. With the ancients it was a rule that a sacrificed animal on which an oath had been taken should not be eaten by man. Homer proves this clearly. For the boar, on the cut pieces of which Agamemnon swore that in good sooth Briseis was a stranger to his bed is represented by Homer as being cast by the herald into the sea:—

> He spake, and cut the boar's throat with pitiless bronze.
> Talthybius lightly wheeled and threw the boar
> Into the great deep of the gray sea, a food for fishes.

its right, and very ingeniously compares a bronze in the Baduitt collection at St Moritz in Switzerland (Reinach *Rép. Stat.* ii. 5 no. 9=my fig. 662). There is, therefore, a good deal to be said for G. Wissowa's contention (in Roscher *Lex. Myth.* iv. 318) 'dass Semo Sancus Dius Fidius in der Kaiserzeit (die Inschriften stammen etwa aus der Zeit der Antonine) besonders als Blitzgott verehrt wurde.' But, if so, I would suggest that his title *Fidius* meant originally 'the Cleaver' (cp. *findo*, *fidi*, bi-*fidus*, etc.) and was only later, by dint of popular etymology, associated with *fides*. The same god was in Christian times the subject of another curious confusion. For Iust. Mart. *apol.* 1. 26, 1. 56 (followed by Iren. *c. haeres.* 1. 23. 1, Tert. *apol.* 13, Euseb. *hist. eccl.* 2. 13. 3, 2. 14. 5, Kyrill. of Jerusalem *catech.* 6. 14 (xxxiii. 561 A—B Migne), Aug. *de haeres.* 1 (xlii. 25, Migne), Theodoret. *haeret. fab.* 1. 1 (lxxxiii. 344 B Migne)) declares that a statue on the Tiber-island dedicated ΣΙΜΩΝΙ ΔΕΩ ΣΑΓΚΤΩ was an effigy of Simon Magus (see *e.g.* G. Salmon in Smith—Wace *Dict. Chr. Biogr.* iv. 682), who was worshipped together with his consort the harlot Helene under the guise of Zeus and Athena (Iren. *c. haeres.* 1. 23. 4, Hippol. *ref. haeres.* 6. 20 p. 256 Duncker—Schneidewin, Epiphan. *panar.* 1. 21. 3, Aug. *de haeres.* i (xlii. 25 Migne)).

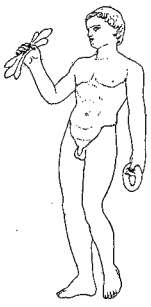

Fig. 662.

Iupiter *Iurarius*, worshipped at Rome on the island in the Tiber (Dessau *op. cit.* no. 3038 (in a pavement of *opus Signinum*, beneath the monastery of S. Giovanni Calibita, figured by F. Ritschl in the *Corp. inscr. Lat.* i Tab. lithogr. lix, *A*) C. Volcaci. C. f. har(uspex) de stipe Iovi Iurario.....[m]onimentom) and at Brixia in Cisalpine Gaul (Dessau *op. cit.* no. 3037 I.O.M. | Iur(ario) | d(e) c(onscriptorum) s(ententia)), was perhaps akin to Dius *Fidius*, who is known to have had a cult on the Tiber-island (E. Aust in Pauly—Wissowa *Real-Enc.* v. 1246). M. Besnier *L'île Tibérine dans l'antiquité* Paris 1902 p. 249 ff. would identify Iupiter *Iurarius* with Vediovis—a view somewhat too decisively rejected by H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 636 n. 37.

Such was the ancient custom. At the feet of the God of Oaths is a bronze tablet, with elegiac verses inscribed on it, the intention of which is to strike terror into perjurers[1].'

In view of the epic parallel adduced by Pausanias and of the connexion between Zeus and the boar in Crete[2] it may be inferred that the cult of Zeus *Hórkios* at Olympia goes back to 'Minoan' or sub-'Minoan' times, that the duplication of his thunderbolt was due to primitive insistence on his power as a storm-god, and that any deeper ethical meaning must be attributed to moralists of a later age[3].

[1] Paus. 5. 24. 9—11 trans. Sir J. G. Frazer.

[3] On Zeus in relation to oaths see further E. von Lasaulx *Der Eid bei den Griechen* Würzburg 1844 pp. 5 n. 13, 8 ff., *id. Der Eid bei den Römern* Würzburg 1844 p. 8 ff., E. Ziebarth *De iureiurando in iure Graeco quaestiones* Gottingae 1892 pp. 7, 17 ff., *id.* in Pauly—Wissowa *Real-Enc.* v. 2076 ff., L. Ott *Beiträge zur Kenntnis des griechischen Eides* Leipzig 1896 p. 39 ff., G. Glotz in Daremberg—Saglio *Dict. Ant.* iii. 748 ff., R. Hirzel *Der Eid* Leipzig 1902 pp. 121 ff., 145 n. 7, 147 n. 1, 155 n. 1 and Index p. 225 *s.v.* 'Zeus,' Schrader *Reallex.*[2] p. 228 f.

The *formulae* used by the Greeks in the affirmations of everyday life are collected and exemplified by P. Meinhardt *De forma et usu juramentorum, quae inveniuntur in comicorum Graecorum et Platonis, Xenophontis, Luciani sermone* Jenae 1892 pp. 17—23:

(1) The simple apostrophe ὦ Ζεῦ may be emphasised by duplication (Aristoph. *Lys.* 972 ὦ Ζεῦ Ζεῦ (so R. F. P. Brunck for ὦ Ζεῦ ὦ Ζεῦ codd.), cp. Eur. *Hipp.* 1363 Ζεῦ Ζεῦ, τάδ' ὁρᾷς;), or by the addition of an epithet heuristic (*e.g.* ὦ Ζεῦ Βασιλεῦ in Aristoph. *nub.* 153, *vesp.* 625, *av.* 223, *ran.* 1278, *Plout.* 1095, cp. Loukian. *Tim.* 1 ὦ Ζεῦ φίλιε καὶ ξένιε καὶ ἑταιρεῖε καὶ ἐφέστιε καὶ ἀστεροπητὰ καὶ ὅρκιε καὶ νεφεληγερέτα καὶ ἐρίγδουπε καὶ εἴ τί σε ἄλλο οἱ ἐμβρόντητοι ποιηταὶ καλοῦσι) or otherwise (*e.g.* Loukian. *asin.* 38 ὦ Ζεῦ σχέτλιε), or by both devices simultaneously (Aristoph. *vesp.* 323 ὦ Ζεῦ Ζεῦ μεγαβρόντα (so J. J. Reiske for *μέγα βρόντα* codd.)), or by an appeal to other gods (*e.g.* Xen. *Cyr.* 2. 2. 10 ὦ Ζεῦ καὶ πάντες θεοί).

(2) In the locution πρὸς (τοῦ) Διός the article was commonly dropped. Thus Meinhardt records four examples of πρὸς τοῦ Διός (Aristoph. *nub.* 314, Loukian. *Tim.* 16, *Menipp.* 2, *vit. auct.* 22), one of ὦ πρὸς τοῦ Διός (Plout. *symp.* 5. 7. 4), and one of πρὸς τοῦ Διὸς τοὐλυμπίου (Aristoph. *av.* 130) as against forty-five of πρὸς Διός, eight of ὦ πρὸς Διός, and two of πρὸς Διὸς φιλίου (Plat. *Min.* 321 C, *Phaidr.* 234 B).

(3) Very common are the phrases νὴ (τὸν) Δία, ναὶ μὰ (τὸν) Δία, and μὰ (τὸν) Δία, of which the first two are positive, the third negative. They may be strengthened either by an added epithet (*e.g.* the obvious νὴ τὸν Δία τὸν σωτῆρα in Aristoph. *ran.* 738, 1433, *eccl.* 79, 761, 1045, 1103, *Plout.* 877 or the more recondite νὴ τὸν Δία τὸν αἰθέριον in Loukian. *philopatr.* 4) or by a further sanction (*e.g.* Aristoph. *nub.* 1239 οὔ τοι μὰ τὸν Δία τὸν μέγαν καὶ τοὺς θεούς). The full phrase νὴ τὸν Δία readily passed into νὴ Δία (Aristoph. *ran.* 305 ΔΙ. κατόμοσον. ΞΑ. νὴ τὸν Δία. | ΔΙ. καὖθις κατόμοσον. ΞΑ. νὴ Δί'. ΔΙ. ὄμοσον. ΞΑ. νὴ Δία), which became a commonplace of Attic oratorical style (*Anth. Pal.* 11. 142. 4 (Lucilius) καί τοι "νὴ Δία" καὶ "μὰ Δία") and was even, according to some grammarians, colloquially clipped into νὴ Δί or νηδί (Herodian. περὶ παθῶν 126[11] (ii. 217, 16 ff. Lentz) πᾶσα αἰτιατικὴ ἐνικῶν μονοσύλλαβος ἀρσενικὴ ἢ θηλυκὴ αὐτὴ καθ' ἑαυτὴν οὖσα εἰς ν̄ λήγει· τὸ δὲ νὴ Δί οὐκ ἀντίκειται ἡμῖν, ἐπειδὴ οὐχ εὑρίσκεται αὐτὴ καθ' ἑαυτὴν ἀλλ' ἐν συντάξει, *id.* περὶ μονοσυλλάβων 1 (ii. 903, 22 ff. Lentz) πᾶν ὄνομα μονοσύλλαβον μακροκαταληκτεῖν θέλει εἴτε φύσει εἴτε θέσει...καὶ χωρὶς τοῦ Δί, ὅπερ ἀπὸ τοῦ Δία γέγονε κατ' ἀποκοπήν, ὅπερ καὶ μετὰ τοῦ νή ἐπιρρήματος γίνεται νὴ Δί, Choirobosk. *schol. in* Theodos. Al. *can. isag.* κανὼν ἀρσεν. ζ' (i. 192,

21 f. Hilgard) "καὶ χωρὶς τοῦ Δί," ὅπερ ἀπὸ τοῦ Δία γέγονε κατὰ ἀποκοπήν, ὅπερ καὶ μετὰ τοῦ νή ἐπιρρήματος γίνεται νὴ Δία, *ib.* τόνος τῆς αἰτιατικῆς τῶν ἑνικῶν (i. 382, 8 ff. Hilgard) πρόσκειται "αὐτὴ καθ' ἑαυτὴν οὖσα" διὰ τὸ νὴ Δία· αὕτη γὰρ ἡ αἰτιατικὴ γίνεται κατὰ ἀποκοπὴν νὴ Δί', καὶ ἰδοὺ ἐπὶ ἀρσενικῶν ὀνομάτων εὑρίσκεται αἰτιατικὴ μονοσύλλαβος μὴ λήγουσα εἰς ν̄, λέγω δὴ τὸ νὴ Δί'· ἀλλ' οὐκ ἀντίκειται ἡμῖν, ἐπειδὴ οὐχ εὑρίσκεται αὐτὴ καθ' ἑαυτὴν ἀλλ' ἐν συντάξει, Phot. *lex.* νὴ Δὶ καὶ νὴ Δία ἑκατέρως. In Aristoph. *eccl.* 778 f. λαμβάνειν | ἡμᾶς μόνον δεῖ νὴ Δία· καὶ γὰρ οἱ θεοί cod. R has νὴ δί' (*sic*). Dindorf here and in Aristoph. *eq.* 319 would restore νὴ Δί. F. Blass in R. Kühner *Ausführliche Grammatik der griechischen Sprache*[3] Hannover 1890 i. 177 approves the restoration. But the usage is at best doubtful). The elliptical νὴ τὸν—, μὰ τὸν— (Stephanus *Thes. Gr. Ling.* v. 1480 B, v. 478 B—C) are, sometimes at least, to be filled out with Δία (cp. Aristoph. *Ach.* 730 ναὶ τὸν φίλιον with F. H. M. Blaydes *ad loc.*).

The public, as compared with the private, oath called for greater solemnity (A. Martin *Quomodo Graeci ac peculiariter Athenienses foedera publica jurejurando sanxerint* Paris 1886). Accordingly, we seldom find a public oath by Zeus pure and simple (R. Heberdey in the *Jahresh. d. oest. arch. Inst.* 1899 ii Beiblatt p. 48 ff. publishes an archaic inscription from Ephesos ἐγμαρτυρῆσαι ἐπὶ τοῖς δι|κάζουσιν, ὀμνύντα κάπρωι τ|[ὸ(ν)] Ζῆνα ἐγμαρτυρὲν· τὸν δὲ κ|ά[π]ρον παρέχειν, ὃ ἂν τὸ πρῆχ|[μα . . . .]κλε, οἱ δικάζοντες | *κ.τ.λ.*).

More often in such a case Zeus was defined by the use of a cult-epithet (*e.g.* (1) Zeus Ὀλύμπιος in a fifth-century *rhêtra* of Elis (W. Dittenberger and K. Purgold in *Olympia* v. 39 ff. no. 16, 11 f. = Roehl *Inscr. Gr. ant.* no. 119, 11 f., *id. Imagines inscriptionum Graecarum antiquissimarum*[3] Berolini 1907 p. 116 no. 16, 11 f. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* i. 318 ff. no. 1151, 11 f. = Roberts *Gk. Epigr.* i. 295 f. no. 298, 11 f. with Append. p. 370 ff. ὀμόσαντες πο(τ)τὸν θεὸν τὸν Ὀλύν|[πιον]. (2) Zeus Σωτήρ in a third-century decree of Kalaureia (Michel *Recueil d'Inscr. gr.* no. 178, 28 f. = Dittenberger *Syll. inscr. Gr.*[2] no. 578, 20 f. = *Inscr. Gr. Pelop.* i no. 841, 30 f. καὶ ποτομοσοῦντι τὸν Δία τὸν Σ|ωτῆρα). (3) Zeus Φράτριος in a fourth-century enactment of the Attic phratry Demotionidai (*Corp. inscr. Att.* iv. 2 no. 841 *B*, 111 f. = Michel *op. cit.* no. 961 *B*, 53 f. = Dittenberger *op. cit.*[2] no. 439, 111 f. ἀληθῆ ταῦτα νὴ τὸν Δία τὸν Φράτριο|ν, cp. *ib.* 1 Διὸς Φρατρίο, 15 ff. διαδικάσαι περὶ αὐτῶν τὸς φράτερ|ας αὐτίκα μάλα, ὑποσχομένος πρὸς τὸ Δ|ιὸς τὸ Φρατρίο, φέροντας τὴν ψῆφον ἀπ|ὸ τὸ βωμό, 22 ff. ὀφε|ιλέτω ἑκατὸν δραχμὰς ἱερὰς·τῶι Διὶ τ|ῶι Φρατρίωι (so 39 f., 48 ff., 54 ff., 90 ff., 99 f.), 74 καὶ ἐπομνύντας τὸν Δία τὸν Φράτριον).

The appeal might be reinforced by the addition of other names appropriate to the place or occasion (*e.g.* (1) J. R. S. Sterrett 'Inscriptions of Assos' in *Papers of the American School of Classical Studies at Athens* 1882—1883 i. 50 ff. no. 26, 18 ff. with pl. (a bronze tablet recording a decree of Assos passed on the accession of Caligula in 37 A.D.) ὅρκος Ἀσσίων. | ὄμνυμεν Δία Σωτῆρα καὶ θεὸν Καίσαρα Σεβαστὸν (*sc.* Octavianus) καὶ τὴν | πάτριον ἀγνὴν Παρθένον (*sc.* Athena *Poliás*) εὐνοήσειν *κ.τ.λ.* = Dittenberger *Syll. inscr. Gr.*[2] no. 364, 18 ff. (2) Dittenberger *op. cit.*[2] no. 234, 22 ff. = Michel *Recueil d'Inscr. gr.* no. 187, 22 ff. = *Inscr. Gr. Arc. Lac. Mess.* ii no. 419, 22 ff. (a decree of the Messenians *c.* 240 B.C.) [ὅρκ][ος Μεσσανίων· ὀμνύω Δία Ἰθωμάταν, Ἥρα[ν . . . . .] | [. . . . . .]ον καὶ θεὸς ὁρκ[ῶς πάντας ἦ] | [μὰν *κ.τ.λ.*]. Cp. the oath of Demaratos in Hdt. 6. 67 f. ἔθυε τῷ Διὶ βοῦν· θύσας δὲ τὴν μητέρα ἐκάλεσε. ἀπικομένῃ δὲ τῇ μητρὶ ἐσθελς ἐς τὰς χεῖρας οἱ τῶν σπλάγχνων κατικέτευε λέγων τοιάδε· "ὦ μῆτερ, θεῶν σε τῶν τε ἄλλων καταπτόμενος ἱκετεύω καὶ τοῦ Ἑρκείου Διὸς τοῦδε, φράσαι μοι τὴν ἀληθηίην," *κ.τ.λ.*).

When several powers are invoked, the name of Zeus normally heads the list—a precedence dating back to epic times (*Il.* 19. 258 = *Od.* 19. 303 ἴστω νῦν Ζεὺς πρῶτα, θεῶν ὕπατος καὶ ἄριστος, *Od.* 14. 158 = 17. 155 = 20. 230 ἴστω νῦν Ζεὺς πρῶτα θεῶν). Homer, sometimes content with the witness of Zeus alone (*Il.* 7. 411 ὅρκια δὲ Ζεὺς ἴστω, ἐρίγδουπος πόσις Ἥρης, 10. 328 ἴστω νῦν Ζεὺς αὐτός, ἐρίγδουπος πόσις Ἥρης), more often associates with him either the domestic sanctities of the hearth (*Od.* 19. 303 f.) and table (*Od.* 14. 158 f. = 17. 155 f. = 20. 230 f.) or a variety of cosmic and chthonic divinities (*Il.* 3. 276 ff. Ζεῦ πάτερ, Ἴδηθεν μεδέων, κύδιστε, μέγιστε, | Ἥλιός θ', ὃς πάντ' ἐφορᾷς καὶ πάντ' ἐπακούεις, | καὶ ποταμοὶ καὶ γαῖα καὶ οἳ ὑπένερθε καμόντας | ἀνθρώπους τίνυσθον, ὅτις κ' ἐπίορκον ὀμόσσῃ, | ὑμεῖς μάρτυροι ἔστε, φυλάσσετε δ' ὅρκια πιστά, 19. 258 ff. ἴστω νῦν Ζεὺς

πρῶτα... | Γῆ τε καὶ Ἥλιος καὶ Ἐρινύες, αἵ θ' ὑπὸ γαῖαν | ἀνθρώπους τίνυνται, ὅτις κ' ἐπίορκον ὀμόσσῃ with W. Leaf *ad locc.*).

In *s.* iv B.C. and later the witness-group Zeus, Ge, Helios revived (?survived) in public contracts, usually in combination with other deities recognised by the contracting parties (*e.g.* (1) A. Wilhelm in the *Jahresh. d. oest. arch. Inst.* 1898 i. 149 ff. line 2 f. (treaty between Maussollos of Karia and Phaselis in Lykia) [– – – ὀμόσ]αντες Δία καὶ Ἄλιον καὶ Γᾶν καὶ | [– – –]. (2) Michel *Recueil d'Inscr. gr.* no. 1316, 1 ff. = Dittenberger *Syll. inscr. Gr.*[3] no. 360, 1 ff. (oath of citizens of Chersonesos Taurike *c.* 300—280 B.C.) ὀμνύω Δία, Γᾶν, Ἄλιον, Παρθένον, | [θ]εοὺς Ὀλυμπίους καὶ Ὀλυμπίας | [κ]αὶ ἥρωας ὅσοι πόλιν καὶ χώραν | καὶ τείχη ἔχοντι τὰ Χερσονασ¦τᾶν, *ib.* 50 f. Ζεῦ καὶ Γᾶ καὶ Ἄλιε [καὶ] | Παρθένε καὶ θεοὶ Ὀλύμπιοι. (3) Michel *op. cit.* no. 15, 20 ff. = Dittenberger *Orient. Gr. inscr. sel.* no. 266, 20 ff. (pact of Paramonos and other mercenary leaders with Eumenes i of Pergamon) ὅρκος ὃν ὤμοσεν Παράμονος κ.τ.λ. . . . . ὀμνύω Δία, Γῆν, | Ἥλιον, Ποσειδῶ, Δήμητρα, Ἄρη, Ἀθηνᾶν Ἀρείαν καὶ τὴν Ταυροπόλο[ν] | καὶ τοὺς ἄλλους θεοὺς πά[ν]τας καὶ πάσας, *ib.* 51 ff. ὅρκος Εὐμένους· ὀμνύω Δ[ία, Γῆ]ν, | Ἥλιον, Ποσειδῶ, Ἀπόλλω, Δήμητρα, Ἄρη, Ἀθηνᾶν Ἀρείαν καὶ τὴν [Ταυροπό]λον καὶ τοὺς ἄλλους θεοὺς πάντας καὶ πάσας. (4) Michel *op. cit.* no. 19, 59 ff. = Dittenberger *Orient. Gr. inscr. sel.* no. 229, 59 ff. (alliance between Magnesia ad Sipylum and Smyrna *c.* middle of *s.* iii B.C.) ὁμόσαι δὲ τοὺς μὲν ἐμ Μαγνησίαι κατοίκους κ.τ.λ. . . . . ὀμνύω Δία, Γῆν, Ἥλιον, Ἄρη, Ἀθηνᾶν Ἀρείαν καὶ τὴν Ταυροπόλον καὶ τὴ[μ] | Μητέρα τὴν Σιπυληνὴν καὶ Ἀπόλλω τὸν ἐμ Πάνδοις καὶ τοὺς ἄλλους θεοὺς πάντας καὶ πάσας καὶ τὴν τοῦ βασιλέως Σελεύκου τύχην, *ib.* 69 ff. ὁμόσαι δὲ καὶ Σμυρναίους τοῖς ἀπὸ Μαγνησίας τὸν ὅρκον | τόνδε· ὀμνύω Δία, Γῆν, Ἥλιον, Ἄρη, Ἀθηνᾶν Ἀρείαν καὶ τὴν Ταυροπόλον καὶ τὴμ Μη[τέρ]α τὴν Σιπυληνὴν καὶ Ἀφροδίτην Στρατονικίδα καὶ τοὺς ἄλλους θεοὺς | πάντας καὶ πάσας. (5) Dittenberger *Syll. inscr. Gr.*[3] no. 196, 38 f. (Athenian treaty of 356/5 B.C. with the Thracian Ketriporis, the Paeonian Lyppeios, and the Illyrian Grabos) [ὀμνύω Δία καὶ Γῆν] καὶ Ἥλιον καὶ Ποσει[δ]ῶ καὶ Ἀθηνᾶν καὶ | [Ἄρην]. (6) Dittenberger *Syll. inscr. Gr.*[3] nos. 434—435, 87 f. (Athenian treaty of 266/5 B.C. with Sparta) [ὀμ]νύω Δία, Γ[ῆ]ν, Ἥλιον, Ἄρη, Ἀθηνᾶν Ἀρε¦[ίαν, Ποσειδῶ, Δήμητραν]. (7) Dittenberger *Orient. Gr. inscr. sel.* no. 532, 8 f. (Paphlagonian oath of allegiance to Augustus in 3 B.C.) ὀμνύω Δία, Γῆν, Ἥλιον, θεοὺς πάντα[ς καὶ πά]σας καὶ αὐτὸν τὸν Σεβασ[τ]όν). The same group was concerned in the emancipation of slaves at Thermos in Aitolia (*Inscr. Gr. sept.* iii. 1 no. 412 = Michel *op. cit.* no. 1421 = Dittenberger *Syll. inscr. Gr.*[2] no. 837 (deed of enfranchisement, *s.* ii B.C.) Πολύφ(ρ)ων Λύκου Α[ἰνη]σαν τὴν ἰδίαν θρεπτ[ήν] | [ἀπηλ]ευθε[ρ]ωσεν ὑπ[ὸ] Δία, Γῆν, Ἥλιον, μηδε[νὶ] | [μη]δὲν προσήκουσαν κατὰ τοὺς Αἰτωλῶ[ν] | νόμους ἰσοτελῆ καὶ ἔντειμον) and on the N. coast of the Euxine ((1) C. T. Newton *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1883 ii. 38 no. 180, 8 ff. = B. Latyschev *Inscriptiones antiquae Orae Septentrionalis Ponti Euxini Graecae et Latinae* Petropoli 1890 ii. 53 ff. no. 54, 8 ff. (deed of enfranchisement in the reign of Sauromates (?v = 231—233 A.D.), obtained at Kerch) μετὰ δὲ τὴν [ζ]ω[ῆ]ν ἡμῶν ἡμῶν (*sic*) εἶναι αὐτὴν ἐλευθέ[ρ]αν ὑπὸ Δία, Γῆν, Ἥλιον, ἀνεπάφη[ν καὶ] | [ἀ]νεπηρέαστην ἀπό τ' ἐμοῦ καὶ παντὸς κληρο[ν]όμου. (2) B. Latyschev *op. cit.* ii 208 f. no. 400, 10 ff. (deed of enfranchisement in 41 A.D., with name of Polemon ii erased; now at Petrograd) ἐφ' ᾧ ἢ ἀνέπα|φος καὶ ἀνεπηρέαστο[ς] | ἀπὸ παντὸς κληρον[όμ]ου ὑπὸ Δία, Γῆν, Ἥλιο[ν]). At Eresos in Lesbos the judges swore by Zeus and Helios (F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* i 103 ff. no. 281 B, 54 f. = Michel *op. cit.* no. 358 *C*, 19 f. = Dittenberger *Orient. Gr. inscr. sel.* no. 8 *c*, 93 f. (*formula* of oath, end of *s.* iv B.C.) οὔτω ποήσω | ναὶ μὰ Δία καὶ Ἄλιον). H. Usener in the *Rhein. Mus.* 1903 lviii. 19 notes that in the group Zeus, Ge, Helios the sun-god is on occasion replaced by Apollon (R. Dareste—B. Haussoullier—T. Reinach *Recueil des inscriptions juridiques grecques* Paris 1891 i. 158 ff. no. 10 A, 4 = Michel *op. cit.* no. 1340 *A*, 4 (*formula* of oath for judges at Knidos in *s.* ii or i B.C.) ναὶ τὸν Δία καὶ τὸν Ἀπόλλω τὸν Αὐκ[ιον καὶ τὰν Γᾶν]).

At Athens the same tendency to swear by sky-god, sun-god, and earth-goddess can be traced further back (cp. G. Hofmann *De iurandi apud Athenienses formulis* Strassburg 1886 p. 27 f., E. Ziebarth *op. cit.* p. 17 f.), the oath being by Zeus, Apollon, and Demeter ((1) Michel *op. cit.* no 1428, 14 ff. = Dittenberger *Syll. inscr. Gr.*[3] no. 41, 14 ff. (decree concerning Erythrai, *c.* 465 B.C.) τῷμ βολευσόντ¦ων ἑξαστον Ἐρυθρᾶσι π[ρὶ]ν ἐσιέναι [ἐς

τὲν] | [ἀρχ]ὲν ὀμνύναι [μὲν Δ]ία καὶ] Ἀπόλλο καὶ Δέμε[τρα], ἐπαρόμ̣ε̣νο[ν ὲξ]|[ὸλ]ειαν ἐα[υτοῖ ἐπιορκ̣ὸντι κ]αὶ παι[σ]ὶν ἐαυτῶ· ὸ[μνύ]ν̣αι δὲ τὸν ὸ[ρ]|[κο]ν κατὰ [h]ιερὸν κ̣αιομ̣ένομ̣ενον. (2) Michel *op. cit.* no. 9, 23 f., 35 f. = Dittenberger *Syll. inscr. Gr.*[3] no. 151, 23 f. (treaty with Korkyra, 375/4 B.C.) ἀλη̣θῆ ταῦτα νὴ τὸ|[ν] Δία καὶ τὸν Ἀπόλλω καὶ τὴν Δήμητρα, *ib.* 35 f. [ἀλη̣θῆ δὲ ταῦ]τα ν[αὶ τ]ὸν Δία [κα]ὶ | [τὸν Ἀπόλλωνα καὶ τὰν Δά]ματ[ρα]. (3) *Corp. inscr. Att.* ii. 1 no. 578, 11 f. = Michel *op. cit.* no. 150, 11 f. (decree of the deme Myrrhinous, *s.* iv B.C.) [νὴ τ]ὸ[ν Δία, νὴ τ]ὸ[ν Ἀ]πόλλω, ν[ὴ] τὴ[ν] | [Δ]ήμ(η)τρα. (4) Aristoph. *eq.* 941 XO. εὖ γε νὴ τὸν Δία καὶ τὸν Ἀπόλλω καὶ τὴν Δήμητρα. (5) Dem. *adv. Callipp.* 9 καὶ μὰ τὸν Δία καὶ τὸν Ἀπόλλω καὶ τὴν Δήμητρα, οὐ ψεύσομαι πρὸς ὑμᾶς, ὦ ἄνδρες δικασταί), or by Apollon, Demeter, and Zeus (Demarchos *frag.* 89. 25 Sauppe *ap.* schol. *in* Aischin. *c. Tim.* 114 τοὺς ὁρκίους· Ἀπόλλωνα Πατρῷον καὶ Δήμητραν καὶ Δία, ὡς φησι Δείναρχος ὁ ῥήτωρ. The same order in Poll. 8. 122 ὤμυσαν δὲ ἐν Ἀρδήττῳ δικαστηρίῳ Ἀπόλλω Πατρῷον καὶ Δήμητρα καὶ Δία Βασιλέα: but cp. Bekker *anecd.* i. 443, 29 ff. ἐν τούτῳ δὴ τῷ χωρίῳ (*sc.* Ἀρδήττῳ) ὤμνυον οἱ δικασταὶ τὸν δικαστικὸν ὅρκον. τρεῖς δὲ θεοὺς ὤμνυον, Δία, Δήμητραν καὶ Ἥλιον). Whether this group had *ab initio* any cosmic significance is very doubtful. Zeus and Apollon, the ancestral gods of the Attic nobility (Aristot. Ἀθ. πολ. 55. 3, cp. Poll. 8. 85, states that the archon was formally asked εἰ ἔστιν αὐτῷ Ἀπόλλων Πατρῷος καὶ Ζεὺς Ἑρκεῖος, καὶ ποῦ ταῦτα τὰ ἱερὰ ἐστιν), may well have coöpted Demeter at the time when Eleusis was added to Athens (so J. Toepffer *Attische Genealogie* Berlin 1889 p. 45 n. 2, E. Ziebarth *op. cit.* p. 17).

Another Athenian triad equally susceptible of a cosmic interpretation was Zeus, Poseidon, and Demeter, divinities of sky, sea, and land. ((1) The heliastic oath in Dem. *c. Tim.* 151 ἐπομνύναι Δίᾳ, Ποσειδῶ, Δήμητρα: cp. schol. B. L. *Il.* 15. 36 διὰ τριῶν δὲ ἦν ἔθος ὀμνύναι, ὡς Δράκων ἔταξε, Δίᾳ, Ποσειδῶνα, Ἀθηνᾶν· οἱ δὲ Δίᾳ, Ποσειδῶνα, Δήμητραν, ὡς Δημοσθένης ἐν τῷ κατὰ Τιμοκράτους. (2) H. G. Lolling in the *Ath. Mitth.* 1879 iv. 201 no. 4, 16 ff. = *Corp. inscr. Att.* iv. 2 no. 584 *c* B, 16 ff. (decree of the deme Aixone towards the end of *s.* iv B.C.) ἀληθῆ ταῦτα | [ν]ὴ τὸν Δία, νὴ τὸν Πο[σε]ιδῶ, νὴ τὴν Δήμητ[ρα]). This group might be extended by the inclusion of Athena (Michel *op. cit.* no. 95, 66 ff., 79 f. = Dittenberger *Syll. inscr. Gr.*[3] no. 173, 66 ff. (decree of 363/2 B.C. concerning Ioulis in Keos) ταῦτα | [ἐμπεδορκήσω νὴ τὸν] Δία, νὴ τὴν Ἀθηνάαν, νὴ τὸν Ποσειδῶ, [ν]ὴ | [τὴν Δήμητρα], *ib.* 79 f. [ταῦτα ἐμπ]εδορκήσω ν[ὴ τὸν Δία, νὴ τὴν Ἀθηνάαν, νὴ τὸν Ποσειδῶ, νὴ τὴν Δ]ήμητρα).

The epic appeal to Zeus, Athena, and Apollon (*supra* p. 458 n. 4) was said by some to be an Athenian oath (schol. A. D. *in Il.* 2. 371 ἴδιον εἶναι τὸν ὅρκον φασὶ τῶν Ἀθηναίων, schol. B. L. *in Il.* 2. 371 πάτριοι γὰρ οὗτοι τοῖς Ἀθηναίοις θεοί, schol. T. *in Il.* 2. 371 πάτριοι τοῖς Ἀθηναίοις οἱ θεοί)—a statement supported by its actual occurrence in Dem. *c. Mid.* 198 ἐμοὶ μὲν νὴ τὸν Δία καὶ τὸν Ἀπόλλω καὶ τὴν Ἀθηνᾶν κ.τ.λ. and perhaps by the context of Plat. *Euthyd.* 302 C—D οὐκ ἔστιν, ἣν δ' ἐγώ, αὕτη ἡ ἐπωνυμία Ἰώνων οὐδενί, οὐθ' ὅσοι ἐκ τῆσδε τῆς πόλεως ἀπῳκισμένοι εἰσὶν οὐθ' ἡμῖν, ἀλλὰ Ἀπόλλων Πατρῷος διὰ τὴν τοῦ Ἴωνος γένεσιν· Ζεὺς δ' ἡμῖν Πατρῷος μὲν οὐ καλεῖται, Ἑρκεῖος δὲ καὶ Φράτριος, καὶ Ἀθηναίη Φρατρία. ἀλλ' ἀρκεῖ γε, ἔφη ὁ Διονυσόδωρος· ἔστι γάρ σοι, ὡς ἔοικεν, Ἀπόλλων τε καὶ Ζεὺς καὶ Ἀθηνᾶ. Ioul. *epist.* 38 p. 68 Heyler ἴστω Ζεύς, ἴστω μέγας Ἥλιος, ἴστω Ἀθηνᾶς κράτος, καὶ πάντες θεοὶ καὶ πᾶσαι, as in private duty bound (*supra* i. 187), puts Helios in the place of Apollon.

H. Usener 'Dreiheit' in the *Rhein. Mus.* 1903 lviii. 17 ff. dwells at length on the triplication of Greek oaths. In addition to the foregoing triads he remarks the oath of the Platonic witness (Plat. *legg.* 936 E τοὺς τρεῖς θεοὺς Δία καὶ Ἀπόλλωνα καὶ Θέμιν ἀπομόσας ἢ μὴν μὴ εἰδέναι), that of the Thessalian Magnetes (Michel *op. cit.* no. 842 *B*, 5 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 790, I *b* 54 ff. (decree of *s.* i B.C.) ὀμνύω Δία Ἀκραῖον καὶ τὸν Ἀπόλλω[να] | τὸν Κορο̣παῖον καὶ τὴν Ἄρτεμιν τὴν Ἰωλκίαν καὶ τοὺς ἀλ[λους] θε|οὺς πάντας καὶ πάσας), that of the Delphic Labyadai (*supra* p. 233 n. 7), and that of the Achaean League (*supra* i. 16).

Finally we observe that in treaties between state and state the oath-gods of the parties are combined, the result being an impressive series of divine witnesses. Examples of the process have already been given (*supra* i. 149 n. 2 Latos and Olous, i. 729 n. 2 Dreros

Apart from this exceptional case, it is certainly true to say that throughout classical times Zeus becomes less and less the impetuous thunderer, more and more the dignified ruler. He wields both the thunderbolt and the sceptre; but the former decreases, as the latter increases, in relative importance.

This may be illustrated by a short sequence of vase-paintings arranged in roughly chronological order. A 'Chalcidian' *hydría* at

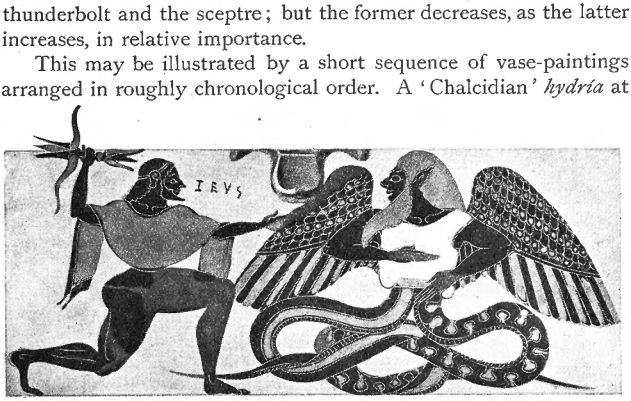

Fig. 663.

Munich, which can be dated *c.* 550 B.C., shows Zeus attacking Typhon (fig. 663)[1]. The god with a mighty thunderbolt gripped by his strong right hand is rushing against his foe in the attitude of rapid movement dear to archaic art. A red-figured *lékythos* at Paris, attributed to Hermonax, a painter of the late archaic period, represents Zeus in pursuit of Semele(?) (fig. 664)[2]. Semele, if it be she,

and Knossos, ii. 723 n. 0 Hierapytna and Lyttos, etc.), and it would be easy to multiply the number (*e.g.* (1) H. G. Lolling 'Symmachievertrag der Phoker und Böoter' in the *Ath. Mitth.* 1878 iii. 19 ff. line 14 ff. ὅρκος· | [ὀμνύω τ]ὸν Δία τὸμ Βασιλέα καὶ τὴν Ἥραν τὴμ Βασίλειαν καὶ τὸμ Ποσει[δῶνα καὶ τ]ὴν Ἀθηνᾶν καὶ τοὺς ἄλλους θεοὺς πάντας καὶ πάσας. (2) Michel *op. cit.* no. 440 *A*, 15 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 427, *a* 15 ff. (treaty of *s.* iv B.C. between Praisos and Stelai in Crete) ὀμνύω Δῆ[να Δικταῖον, Ποτ]ειδῶνα, Ἀθάναν, Ἀπόλλωνα Πύθι[ον], | [καὶ θεοὺς πάντας] καὶ πάσας. (3) F. Halbherr in the *Am. Journ. Arch.* 1897 i. 230 ff. no. 36, 19 ff. (treaty between Sybrita and Gortyna) [- - - Δί]α or [Τὴν]α Κρηταγενία καὶ [- - -] | [- - -]αν κ' Ἀπέλλωνα Πύ[θιον] or Πύ[τιον - - -] | [- - -'A]θαναίαν Πολιοῦχον [- - -] | [- - -] καὶ Νύμφανς καὶ τ[- - -]).

[1] Sieveking—Hackl *Vasensamml. München* i. 67 ff. no. 596 fig. 77 pl. 24, Furtwängler—Reichhold *Gr. Vasenmalerei* i. 161 ff. pls. 31 and 32 *c* (=my fig. 663), E. Buschor *Greek Vase-painting* trans. G. C. Richards London 1921 p. 75 ff. pl. 34 fig. 68. Zeus is inscribed ΙΕVς. He wears a fillet on his head and a *chlamýs* over his shoulders. Typhon, a monstrous figure with red hair and beard, has the ear of a horse, the wings of a bird, and two snaky tails by way of legs. He wears a short yellow-white *chitón*.

[2] De Ridder *Cat. Vases de la Bibl. Nat.* ii 362 no. 489, P. Milliet—A. Giraudon *Vases peints du Cabinet des Médailles & Antiques* (*Bibliothèque Nationale*) Paris 1891 vi[e] classe, xi[e] série ii. pl. 76 (=my fig. 664), J. D. Beazley in the *Journ. Hell. Stud.* 1914 xxxiv. 197 n. 15 no. 6, Hoppin *Red-fig. Vases* ii. 33 no. 21.

Fig. 664.

appears quaintly enough on the shoulder of the vase[1] as a woman running towards the right but looking behind her. Zeus, occupying the main field of decoration, advances with hasty steps, a thunderbolt in his right hand, a sceptre in his left. But it is noticeable that, as compared with the previous design, his bolt is not brandished so high and his onset, motived by love not hate, is less furious. On a red-figured *hydría* at Paris, assigned by J. D. Beazley to the 'master of the Berlin amphora,' a painter of the ripe archaic period,

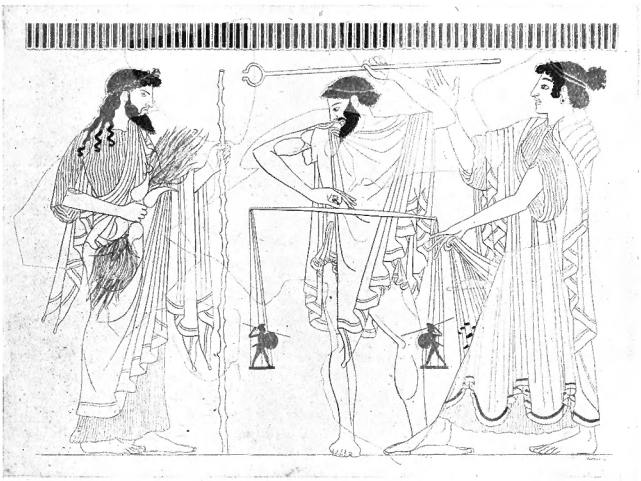

Fig. 665.

the same theme of amorous pursuit is rendered with even greater restraint (fig. 13)[2]. The bolt is held, not in the raised right hand, but in the lowered left.

Contemporary with that vase is a fragmentary *kratér*(?) at Paris, painted in all probability by the artist who worked for the potter Kleophrades. This noble sherd shows Hermes weighing the warrior-souls of Achilles and Memnon in the presence of Zeus (fig. 665)[3].

[1] J. D. Beazley *loc. cit.* notes: 'this is the only lekythos where the figure on the shoulder is related to the figure on the body.'

[2] *Supra* p. 27 n. 0. See J. D. Beazley 'The Master of the Berlin Amphora' in the *Journ. Hell. Stud.* 1911 xxxi. 294 no. 25 *a*, *id. Attic red-figured Vases in American Museums* Cambridge Mass. 1918 p. 36, Hoppin *Red-fig. Vases* i. 71 no. 83.

734 Gradual elimination of the thunderbolt

The scene was drawn from the *Aithiopis* of Arktinos[1], who made Eos, mother of Memnon, prevail upon Zeus to honour her slain son with the gift of immortality[2]. And here she intervenes, imploring the dread judge[3] for the mitigation of his sentence. He stands by,

Roscher *Lex. Myth.* ii. 1143 f. fig. 3, J. D. Beazley 'Kleophrades' in the *Journ. Hell. Stud.* 1910 xxx. 42 no. 4, Hoppin *Red-fig. Vases* ii. 147 no. 34. De Witte, Reinach, de Ridder, and Hoppin are wrong in supposing the *ψυχοστασία* to be that of Hektor and Achilles, for in that case the scales would have been held by Zeus, not Hermes (Gruppe *Gr. Myth. Rel.* p. 678 n. 6).

[1] F. G. Welcker *Der epische Cyclus* Bonn 1882 ii². 175, Gruppe *op. cit.* p. 681 n. 6.

[2] Prokl. *chrestom.* 2 (G. Kinkel *Epicorum Graecorum fragmenta* Lipsiae 1877 i 33) *ἔπειτα* 'Αχιλλεὺς *Μέμνονα κτείνει· καὶ τούτῳ μὲν* 'Ηὼς *παρὰ Διὸς αἰτησαμένη ἀθανασίαν δίδωσι.*

[3] The belief that the souls of men are weighed in a balance was common to the Greeks, the Egyptians (*supra* p. 99 n. 1), and perhaps the Babylonians (A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 113 f.: but see M. Jastrow *Aspects of Religious Belief and Practice in Babylonia and Assyria* New York and London 1911 p. 363 f.). It may be connected ultimately with the custom of divining by weight (W. R. Halliday *Greek Divination* London 1913 p. 222 ff.). But the subject is deserving of separate investigation.

The *Iliad* makes Zeus himself hold the scales. He uses *χρύσεια...τάλαντα* to weigh the fates of Trojans and Achaeans (*Il.* 7. 68 ff.) and, again, the fates of Achilles and Hektor (*Il.* 22. 208 ff.). The scales of Zeus were in fact already proverbial (E. Hedén *Homerische Götterstudien* Uppsala 1912 p. 172 f.): when Sarpedon fell before Troy, even Hektor fled, *γνῶ γὰρ Διὸς ἱρὰ τάλαντα* (*Il.* 16. 658); and men weary of the fight, *ἐπὴν κλίνῃσι τάλαντα | Ζεύς* (*Il.* 19. 223 f.). Later, Zeus weighs out to men wealth or poverty (Theogn. 157 f. *Ζεὺς γάρ τοι τὸ τάλαντον ἐπιρρέπει ἄλλοτε ἄλλως, | ἄλλοτε μὲν πλουτεῖν, ἄλλοτε μηδὲν ἔχειν*). Aeschylus too conceives of Zeus as holding the balance (*suppl.* 822 f. *σὸν δ' ἐπίταν ζυγὸν ταλάν|του*), and in his *Ψυχοστασία* showed Zeus aloft on the *theologeîon* (Poll. 4. 130) visibly weighing on his scales the souls of Achilles and Memnon (Plout. *de aud. poet.* 2, schol. A. *Il.* 8. 70, Eustath. *in Il.* pp. 699, 31 ff., 1266, 37 f.: see further *Trag. Gr. frag.* p. 88 f. Nauck²). Other allusions to the scales of Zeus (Iupiter) in *Anth. Pal.* 6. 267. 3 f. (Diotimos) *οὐ γὰρ ἀφαυρῶς | ἐκ Διὸς ἰθείης οἶδε τάλαντα δίκης*, 11. 380. 3 f. (Makedonios) *ἀλλὰ καὶ αὐτὰ τάλαντα Διὸς πάγχρυσα τελέσθη, | οἷσι ταλαντεύει πάντα νόμον βιότου*, Nonn. *Dion.* 2. 553 *ἰσοτύπου δὲ τάλαντα μάχης ἔκλινε Κρονίων*, Typhiod. *excid. Il.* 506 f. *ἤδη δὲ Τρώεσσιν ὀλέθριον εἵλκε τάλαντον | Ζεὺς ταμίης πολέμοιο*, Verg. *Aen.* 12. 725 f. Iupiter ipse duas aequato examine lances | sustinet, et fata inponit diversa duorum, with Serv. *ad loc.* and Macrob. *Sat.* 5. 13. 39.

For Achilles and Memnon as represented in art it is always Hermes that holds the scales (*e.g.* Roscher *Lex. Myth.* ii. 1142 f. figs. 1—4). The famous 'Boston relief' has Eros weighing two souls of men (best illustration in the *Ant. Denkm.* iii. 1. 5 ff. pl. 7). Aristophanes in *ran.* 797 f., 1365 ff.,—his parody of the *ψυχοστασία* (L. Stephani in the *Compte-rendu St. Pét.* 1873 p. 81)—makes Plouton superintend the weighing of the rival tragedians. A Campanian *hydria* figures Aphrodite with two Erotes in her scales (*Brit. Mus. Cat. Vases* iv. 109 f. no. F 220, F. Studniczka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1911 xxvi. 139 f. fig. 58: cp. *supra* p. 99 n. 1). Eris holds the balance for Achilles and Memnon in Quint. Smyrn. 2. 540 ff. The syncretistic Virgo weighs life and justice in Orelli—Henzen *Inscr. Lat. sel.* no. 5863, 1 ff. = *Corp. inscr. Lat.* vii no. 759, 1 ff. = F. Bücheler *Carmina Latina epigraphica* Lipsiae 1895 i. 15 f. no. 24, 1 ff. (*Caervoran, s.* iii A.D.) imminet Leoni Virgo caelesti situ | spicifera, iusti inventrix, urbium conditrix, | ex quis muneribus nosse contigit deos, | ergo eadem mater divum, Pax, Virtus, Ceres,| dea Syria, lance vitam et iura pensitans. Finally, Roman imperial art even descends to scenes of 'Phallenwägung' (A. Mau in the *Röm. Mitth.* 1896 xi. 11 f. no. 5, F. Hettner

a grand impartial figure, clad in *chitón* and *himátion*, with a knotted staff in his left hand and a red-flaming thunderbolt in his right.

Yet greater dignity attaches to him when he is represented, not only holding a sceptre, but also seated on a throne. And this very enthronement, by reducing his thunderbolt from an actual to a potential weapon (for no one sits to throw thunderbolts[1]), tended to render the god mild as well as majestic. As such he appears on

Fig. 666.

vases that portray the introduction of Herakles to Olympos. A bell-*kratér* from Gela, now at Palermo, referred by Beazley to the 'Altamura painter' at the beginning of the free style[2], shows Zeus seated on a magnificent throne and Herakles encouraged by Athena to draw near (fig. 666)[3]. The artist, who is not very adroit with the palmette on the throne-back, has made his Zeus clasp sceptre and thunderbolt in the same hand—an awkward handful[4]; the thunderbolt is distinctly *de trop*. Accordingly, on a somewhat later vase, a

Die römischen Steindenkmäler des Provinzialmuseums zu Trier Trier 1893 p. 186 f. no. 463 fig., F. Studniczka *loc cit.* p. 139 fig. 57).

[2] J. D. Beazley *Attic red-figured Vases in American Museums* Cambridge Mass. 1918 p. 144 no. 10, Hoppin *Red-fig. Vases* i. 24 no. 18.

[3] H. Heydemann in the *Arch. Zeit.* 1870 xxviii. 43 f. no. 24 pl. 33 (=my fig. 666), Reinach *Rép. Vases* i. 408, 3. The reverse design is Zeus pursuing a woman (Semele?). Height 0·41m.

[4] This clumsy combination occurs first on a *stámnos* in the Louvre (G 370) by the 'Providence painter' of the ripe archaic period (F. T. Welcker in the *Ann. d. Inst.* 1861 xxxiii. 293—298, *Mon. d. Inst.* vi—vii pl. 58, 2=Reinach *Rép. Vases* i. 157, 2, J. D. Beazley *Attic red-figured Vases in American Museums* Cambridge Mass. 1918 p. 80 no. 43, Hoppin *Red-fig. Vases* ii. 393 no. 34).

splendid *kelébe* at Bologna, sceptre and *phiále* are retained, but the

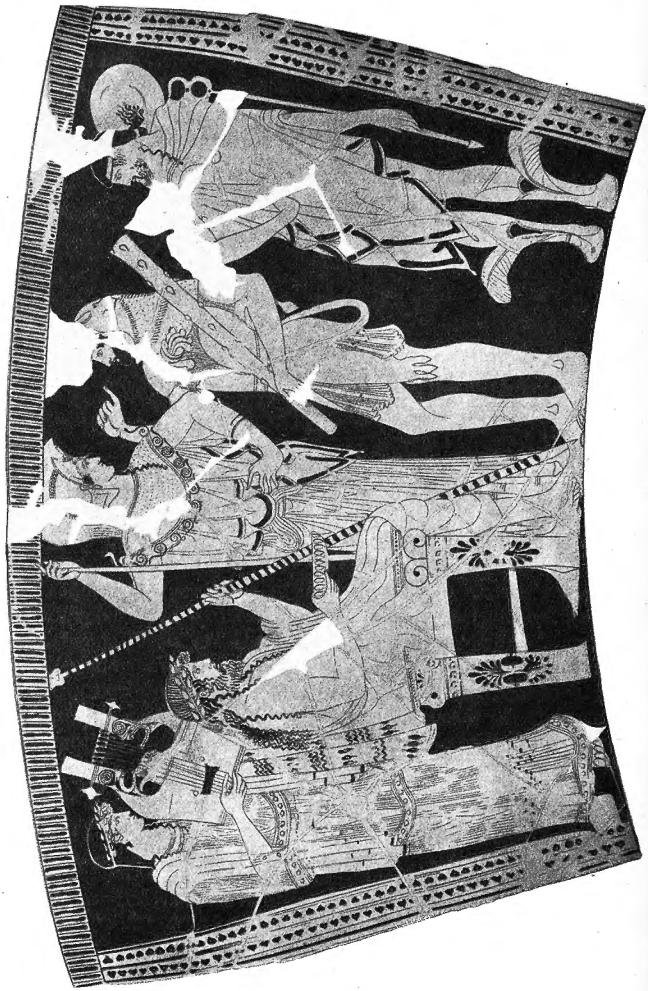

Fig. 667.

bolt is omitted (fig. 667)[1]. The resultant type of benevolent majesty

[1] G. Ghirardini in the *Ann. d. Inst.* 1880 lii. 100—117, *Mon. d. Inst.* xi pl. 19 (=my

is found again, with a suggestion of greater repose, on the bell-*kratér* from Falerii in the Villa Giulia at Rome, a vase attributed by G. Nicole[1], P. Ducati[2], and J. C. Hoppin[3] to the 'Talos painter,' and referable to the period of the Peloponnesian War (fig. 668)[4]. Its obverse design represents Herakles, his labours over at last, entering the presence of Zeus. Herakles is followed by Hebe, in whose ear Eros whispers of her coming wedlock. Hera, proud and resentful, will not look at Herakles, but turns her head away and addresses Hermes. Zeus in an attitude of dignified ease worthy of Pheidias[5] receives his heroic son. Wreath, sceptre, throne are there, and rightly there. But the thunderbolt would be out of place, and the god's right hand is empty.

The same transition from might to right in the popular conception of Zeus can be equally well illustrated from the remains of ancient sculpture. His earliest extant effigy, a bronze statuette from Mount Lykaion (*s.* vii B.C.), shows a nude bearded god standing erect with a thunderbolt in his raised right hand and an eagle on his outstretched left (*supra* i. 84 fig. 51). It is thus in all probability that we should conceive of such images as the Zeus in hammered gold dedicated at Olympia by Kypselos, tyrant of Corinth (655—625 B.C.)[6], or the Zeus *Hýpatos* in hammered bronze made by

[6] Plat. *Phaedr.* 236 B παρὰ τὸ Κυψελιδῶν ἀνάθημα σφυρήλατος ἐν Ὀλυμπίᾳ στάθητι, Strab. 353 ὧν ἦν καὶ ὁ χρυσοῦς σφυρήλατος Ζεύς, ἀνάθημα Κυψέλου, τοῦ Κορινθίων τυράννου, 378 τοῦ δὲ περὶ τὸν οἶκον τοῦτον πλούτου μαρτύριον τὸ Ὀλυμπίασιν ἀνάθημα Κυψέλου, σφυρήλατος χρυσοῦς ἀνδριὰς εὐμεγέθης. Kypselos vowed to Zeus that, if he became master of Corinth, he would dedicate all the property of the Corinthians. On becoming master, he bade them draw up a list of their possessions, took a tenth part from each citizen, and told them to trade with the remainder. As each year came round he did the same thing, till in ten years he had kept his vow (Aristot. *oec.* 2. 2. 1346 a 32 ff.). A Platonic gloss in Phot. *lex. s.v.* Κυψελιδῶν ἀνάθημα = Souid. *s.v.* Κυψελιδῶν ἀνάθημα quotes further from Agaklytos περὶ Ὀλυμπίας (*Frag. hist. Gr.* iv. 288 Müller) the statement that the golden colossus dedicated by Kypselos was kept in the old temple of Hera, from Didymos a moralising account to the effect that Periander made the colossus in order to limit the luxury and audacity of the Corinthians, from Theophr. περὶ καιρῶν 2 (*frag.* 128 Wimmer) a similar allusion, and finally a current epigram (Cougny *Anth. Pal. Append.* 1. 4) on the colossus εἰ μὴ (so Cobet for εἰμὶ Phot., αὐτὸς Souid.) ἐγὼ χρυσοῦς σφυρήλατός εἰμι κολοσσός, | ἐξώλης εἴη Κυψελιδῶν γενεά together with the variant given by Apellas Pontikos *frag.* 6 (*Frag. hist. Gr.* iv. 307 Müller) εἰ μὴ (so Cobet for εἰμὶ) ἐγὼ ναστὸς (so S. A. Naber for

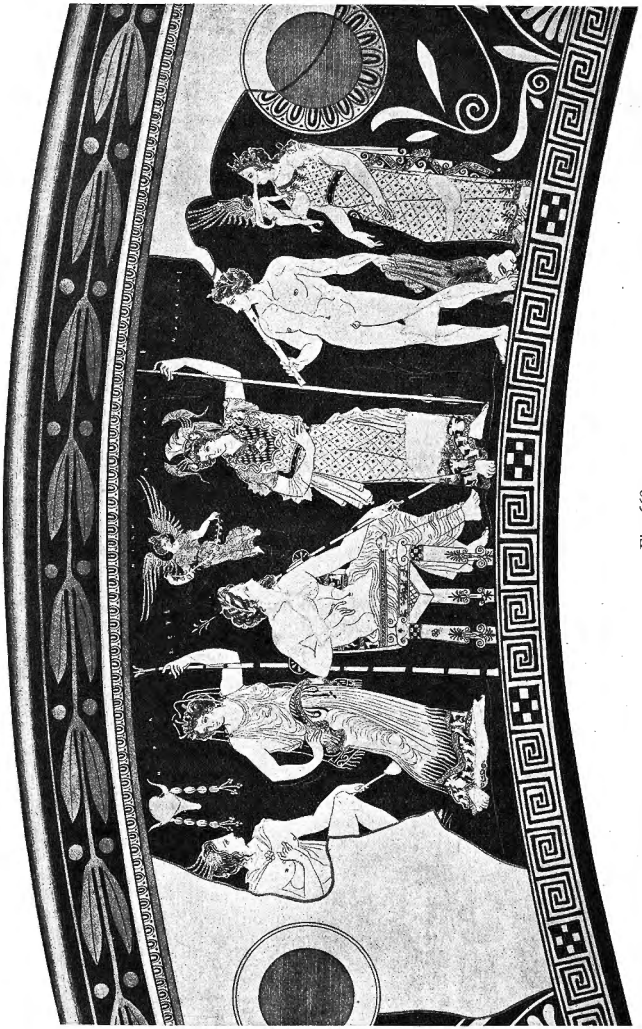

Fig. 668.

Klearchos of Rhegion (*c.* 520 B.C.) and still to be seen at Sparta in the time of Pausanias[1]. Klearchos was said to have learnt his craft from the Cretans Dipoinos and Skyllis; and the type that he employed for Zeus was presumably descended from that of the 'Minoan' fighter with right hand raised to hurl the lance and left outstretched to carry the shield[2].

When archaic sculpture shook off the trammels of strict frontality (*c.* 500 B.C.), one of the first types to attain comparative freedom was that of the fighting-man. A small bronze from Dodona[3] shows him in full armour advancing against the foe, his right arm raised for a spear-thrust, his left extended to support a notched shield. The type again served to represent Zeus the thunderer. Another brilliant little bronze from Dodona (fig. 669)[4], detailed and delicate work, the colour of lapis lazuli, gives us Zeus in a similar pose as conceived by some Aeginetan artist *c.* 490 B.C. Statuettes of the sort were multiplied during the early decades of the fifth century (*supra* i. 84 ff. figs. 52—54), the outstretched hand of the

νάξος Phot., Νάξιος Souid.) *παγχρύσεός εἰμι κολοσσός,* | *κ.τ.λ.* The schol. Plat. *Phaedr.* p. 962 a 44 ff. asserts that the sons of Kypselos, when driven out by the Corinthians, vowed that, if they recovered their power, they would dedicate to the god at Olympia *χρυσοῦν ἀνδριάντα...ὁλόσφυρον.* Hence in fulfilment of their vow *ἀνέθεσαν ἐκεῖσε μέγιστον ἄγαλμα χρυσοῦν τοῦ Διός.* Ephoros *frag.* 106 (*Frag. hist. Gr.* i. 262 f. Müller) *ap.* Diog. Laert. 1. 96 made Periander vow that, if he won a victory with a four-horse chariot at Olympia, he would dedicate *χρυσοῦν ἀνδριάντα.* He won; but, being short of gold and seeing the women's trinkets at some Corinthian festival, he appropriated their ornaments and so sent his promised offering. Paus. 5. 2. 3 has yet another yarn. Kypselos dedicated the golden image to Zeus at Olympia, but died before he had carved his own name on it. The Corinthians begged leave of the Eleans to grave on it the name of Corinth and, when met by a refusal, showed their anger by warning the Eleans to keep away from the Isthmian games.

From all this we gather that the archaic Zeus of beaten gold was a standing statue of large size, unaccompanied by an inscription, but traditionally connected with Kypselos or his sons and widely known as *τὸ Κυψελιδῶν ἀνάθημα* (? a hexameter tag). It was kept in the Heraion and, if it still existed in Pausanias' day, a description of it may have stood in the *lacuna* (Paus. 5. 17. 4) immediately preceding his description of Kypselos' chest (so A. Flasch in Baumeister *Denkm.* ii. 1104 n. 2: other views in the ed. of Pausanias by H. Hitzig and H. Blümner (Lipsiae 1901) ii. 287).

[1] Paus. 3. 17. 6 *τῆς Χαλκιοίκου δὲ ἐν δεξιᾷ Διὸς ἄγαλμα Ὑπάτου πεποίηται, παλαιότατον πάντων ὁπόσα ἐστὶ χαλκοῦ· δι' ὅλου γὰρ οὐκ ἔστιν εἰργασμένον, ἐληλαμένου δὲ ἰδίᾳ τῶν μερῶν καθ' αὑτὸ ἑκάστου συνήρμοσταί τε πρὸς ἄλληλα, καὶ ἦλοι συνέχουσιν αὐτὰ μὴ διαλυθῆναι.* Κλέαρχον δὲ *ἄνδρα Ῥηγῖνον τὸ ἄγαλμα ποιῆσαι λέγουσιν, δν' Διποίνου καὶ Σκύλλιδος, οἱ δὲ αὐτοῦ Δαιδάλου φασὶν εἶναι μαθητήν.*

[2] *E.g.* Perrot—Chipiez *Hist. de l'Art* vi. 752, 757 fig. 353, 758 fig. 354, Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 125 fig. 15, 126 fig. 16.

[2] *Supra* i. 622 n. 10.
[3] H. Brunn *Geschichte der griechischen Künstler* Stuttgart 1853 i. 96.
[4] Overbeck *Gr. Kunstmyth.* Zeus p. 16 f.

that the statue in question was made before the loss of Aigina's independence in 458 B.C. And there is much to be said for E. Babelon's[1] conjecture that it furnished the reverse design of certain rare Olympian *statêres* (figs. 670—672) referred by C. T. Seltman[2] to the periods *c.* 471—*c.* 452 and *c.* 452—*c.* 432 B.C. respectively[3].

Fig. 670.

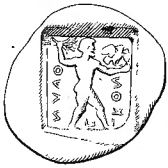

Fig. 671.

Fig. 672.

The statue of Zeus *Ithomátas*, which Hageladas made for the Messenians of Naupaktos[4], presumably not before 455 B.C.[5], seems to have perpetuated the type of the striding antagonist. For silver coins of Messene struck *c.* 369—330 (fig. 673)[6] and *c.* 330—280 B.C.

[1] Babelon *Monn. gr. rom.* ii. 1. 885 ff. no. 1254 pl. 39, 1 (Berlin) = my fig. 672, no. 1255 pl. 39, 2 (Paris).

[2] C. T. Seltman 'The Temple Coins of Olympia' in *Nomisma* 1913 viii. 24, 35 f. no. 37 pl. 2, ABα (Paris), 41 ff. no. 72 pl. 3, APβγ (Weber), no. 73 pl. 3, AQβγ (Berlin). Mr Seltman is certainly right in regarding the reverse type of no. 72 f. as a 'restitution' of no. 37. I figure the Paris and McClean specimens of the earlier coin and the Berlin specimen of the later. The legend ΛΟΧΙΠΛΛΛΟ is for 'Ολυνπικῶν (ἀγώνων) or (ἄθλων) : see A. Lambropoulos in the *Zeitschr. f. Num.* 1895 xix. 210, E. Babelon *loc. cit.* p. 893, and C. T. Seltman *loc. cit.* p. 41.

[3] Similar to the work of Aristonous in all probability was the image of Zeus, seven cubits high, holding an eagle in one hand, a thunderbolt in the other, dedicated at Olympia by the Leontines Hippagoras, Phrynon, and Ainesidemos (Paus. 5. 22. 7 with Sir J. G. Frazer *ad loc.*). If *Olympia* v. 735 f. no. 838 ΑΙΝ[---] is really part of its base, we must refer the image to the archaic period.

[4] Paus. 4. 33. 2 τὸ δὲ ἄγαλμα τοῦ Διὸς Ἀγελάδα μέν ἐστιν ἔργον, ἐποιήθη δὲ ἐξ ἀρχῆς τοῖς οἰκήσασιν ἐν Ναυπάκτῳ Μεσσηνίων. ἱερεὺς δὲ αἱρετὸς κατὰ ἔτος ἕκαστον ἔχει τὸ ἄγαλμα ἐπὶ τῆς οἰκίας (Clavier cj. ἐν τῇ οἰκίᾳ, cp. Paus. 3. 13. 3). ἄγουσι δὲ καὶ ἑορτὴν ἐπέτειον Ἰθωμαῖα (Nilsson *Gr. Feste* p. 32)· τὸ δὲ ἀρχαῖον καὶ ἀγῶνα ἐτίθεσαν μουσικῆς. κ.τ.λ. *Supra* i. 121 f., *infra* Append. B Messene.

[5] In 455 B.C. the Messenians besieged by the Lacedaemonians on Mt Ithome quitted their stronghold and settled at Naupaktos, a town given them by the Athenians, who had wrested it from the Ozolian Locrians (Paus. 4. 24. 6 f.). These Messenians doubtless commissioned Hageladas to make a statue of Zeus *Ithomátas*, to whose protection they were so deeply indebted, and brought it with them on their ultimate return to Messene, the new city founded by Epameïondas in 369 B.C. (E. Pfuhl in Pauly—Wissowa *Real-Enc.* vii. 2193).

Fig. 680.

Zeus militant with bolt and bird occurs sporadically throughout the classical period. He appears in this guise, now as a bronze statuette[5], now in a vase-painting[6], now again as a coin-type[7], now

Chron. Fourth Series 1902 ii. 323 f. no. 13 pl. 15, 13 (=my fig. 680), Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* ii. 84 f. pl. R, 13, Head *Hist. num.*[2] p. 413.

[4] In *Il.* 5. 733 ff. =8. 384 ff. Athena, when she arms herself for the fray, puts off her own *péplos* and puts on the *chitón* of Zeus. The passage was admired in antiquity (Eustath.

manners[1]) must be viewed as a concession to the increasing luxury of the age.

In general, the striding god was superseded either by the standing or by the seated god. The transition from stride to stand can be well seen in a Greek bronze from the Peloponnese, now at Paris (fig. 684)[2]. The left arm with the eagle is still outstretched, but the right with the thunderbolt is already lowered.

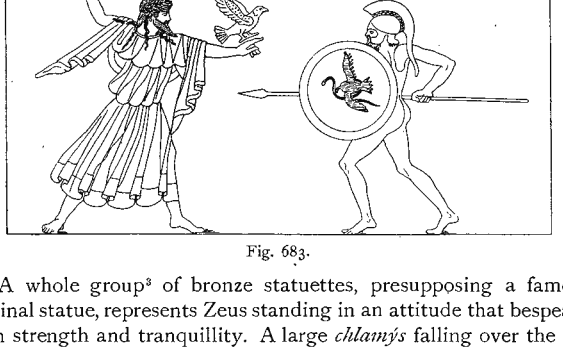

Fig. 683.

A whole group[3] of bronze statuettes, presupposing a famous original statue, represents Zeus standing in an attitude that bespeaks both strength and tranquillity. A large *chlamýs* falling over the left shoulder serves to set off his powerful chest. His right arm, grasping the bolt, has dropped to his side. His left, bent at the elbow, held a long sceptre. The finest extant example of this type, which derives from some great Attic sculptor of the fifth century[4], is in the Uffizi

in Il. p. 599, 32 ff.) and even allegorised (*id. ib.* pp. 600, 3 ff., 719, 21 ff.); but later parallels appear to be lacking.

Greek sculptors rarely represented Zeus in *chitôn* and *himátion* (*supra* i. 86 f. fig. 55 a seated statuette in bronze from Mt Lykaion, *c.* 550—500 B.C.). Greek vase-painters, however, often did so: cp. Spartan vases ('Laconian iv') *c.* 550—500 B.C. (*supra* i. 92 f. fig. 65, 782 pl. xlii) and Attic vases both black-figured (*e.g. infra* § 9 (h) ii (*θ*)) and red-figured (*e.g. supra* i. 707 n. 2 fig. 524, ii. 24 fig. 10, 273 fig. 177, 733 ff. fig. 665 f.). See further Overbeck *Gr. Kunstmyth.* Zeus p. 32 f., p. 124 ff. nos. 19—21, p. 129 no. 24, p. 181 ff. A—D, Farnell *Cults of Gk. States* i. 124, 133.

but tended to move the right hand from the side and raised the left

Fig. 685.

arm higher in order to obtain a more imposing effect (fig. 686)[1]. The

[1] Overbeck *Gr. Kunstmyth.* Zeus pp. 150—152 ('Elfte Gruppe') nos. 66—72 with fig. 18. I illustrate Overbeck's no. 69 from Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 1 f. no. 3 fig. (=my fig. 686). This is a statuette of praiseworthy Roman style. Its eyes were inlaid with silver, its nipples with red copper. Height: 0·166m. *Patina*: brown. It was found in 1763 at Chalon-sur-Saône, in an oaken box along with seventeen other bronzes, by a peasant at work on his vineyard. For other examples of careful Roman art see von Sacken *Ant. Bronzen Wien* i. 9 pl. 7, 6 = Reinach *Rép. Stat.* ii. 4 no. 3,

result was merely that the grand degenerated into the grandiose. Another sort of degeneracy produced the eclectic type of a Graeco-

Fig. 686.

Roman bronze in the British Museum (fig. 687)[1]. The beardless face

Einzelaufnahmen no. 1452 with Text v. 105 by H. Bulle=Reinach *Rép. Stat.* iii. 2 no. 7, etc. The finest figure of the sort is a bronze in the Antiquarium at Munich, which H. Bulle in Roscher *Lex. Myth.* iii. 2884 f. fig. 16 and in his *Der schoene Mensch im Altertum*[2] Muenchen—Leipzig 1912 p. 113 pl. 59 regards as a Greek 'Poseidon' of 400—350 B.C. Fine too is another in the Metropolitan Museum of Art, New York, which Miss G. M. A. Richter in the *Bulletin of the Metropolitan Museum of Art* 1907 ii. 18—20 fig. 4 and in her *Cat. Bronzes New York* p. 67 f. no. 110 fig. likewise takes to be a 'Poseidon (?),' by 'the school of Lysippos.'

[1] *Brit. Mus. Cat. Bronzes* p. 172 no. 930. Height: $3\frac{7}{8}$ ins. Fig. 687 is from a photograph by Mr W. H. Hayles.

recalls Hageladas' *Paîs*[1]. The pose is that of a Polyclitan *doryphóros*, though the left hand, which should carry the spear, is empty and meaningless. The hip is thrown out *à la* Praxiteles. The proportions are Lysippian. And the action of this tasteless aggregate is

Fig. 687.

as insipid as its composition: the would-be deity holds out his thunderbolt like a shopman offering his wares.

Meantime increasing mansuetude had transferred the bolt from the right hand, which could use it, to the left hand, which could not. That is the case with another small

Fig. 688.

[1] *Supra* p. 742 f. A chalcedony at Berlin (Furtwängler *Geschnitt. Steine Berlin* p. 246 no. 6714 pl. 48, *id. Ant. Gemmen* i pl. 43, 44 (=my fig. 688: scale $\frac{2}{1}$), ii. 207) has a youthful Zeus with a sceptre in his raised right hand, a thunderbolt in his lowered left. Furtwängler justly remarks: 'statuarisches Motiv;...polykletisierende Körperformen.'

group[1] of figures in marble and bronze. Of these the most interesting

Fig. 689.

[1] Overbeck *Gr. Kunstmyth.* Zeus p. 149 f. ('Zehnte Gruppe') nos. 64 and 65.

is a bronze statuette at Vienna (fig. 689)[1], which shows the god, associated with two little Lares, as the kindly guardian of a Roman house. His thunderbolt, despite its size, is reduced to the veriest symbol, a spiral ornament, a quaint old-fashioned curio.

Fig. 690.

Less formidable than the thunderbolt, but still reminiscent of the thunder, was the eagle[2] sometimes carried on the sky-god's hand. For standing figures as represented in sculpture[3] this type was not common, being confined to late reliefs[4] and bronzes (fig. 690)[5]. But it had

[1] Von Sacken *Ant. Bronzen Wien* i. 6 f. pl. 1 (=my fig. 689), Reinach *Rép. Stat.* ii. 9 no. 6. Height: 0·175^{m}. *Patina*: grey-green. This remarkable bronze was found in 1830 beside a spring near Verona together with a seated Hermes (von Sacken *op. cit.* i. 49 f. pl. 20), two water-carriers (*id. ib.* i. 109 f. pl. 44, 2), and two small lamps of acanthus-pattern—the furniture of a *lararium* hardly to be dated earlier than *c.* 150—200 A.D. Iupiter, for so we must call him, stands on a semi-octagonal base or *larophorum* (cp. Dessau *Inscr. Lat. sel.* no. 4106, 4 f. with E. Saglio in Daremberg—Saglio *Dict. Ant.* iii. 950 fig. 4352), the front of which forms a rounded niche. Beside him a tree-trunk, hollowed at the top, served as a thurible (?) (von Sacken thought it a stoup for holy water). On one side of the niche a short pillar supports the moulding. On the other side, in place of the pillar, was found a little Lar (0·045^{m} high) holding *rhytón* and *situla*. In the niche sits, and doubtless sat, a second Lar stretching his right hand in supplication towards Iupiter.

[2] Plin. *nat. hist.* 10. 15 negant umquam solam hanc alitem fulmine exanimatam. ideo armigeram Iovis consuetudo iudicavit (cp. *ib.* 2. 146), interp. Serv. *in* Verg. *Aen.* 1. 394 aut quia nec aquila nec laurus dicitur fulminari ideo Iovis ales aquila, Iovis coronam lauream accepimus. On the eagle as lightning-bearer see D'Arcy W. Thompson *A Glossary of Greek Birds* Oxford 1895 pp. 2, 8, O. Keller *Thiere des classischen Alterthums in culturgeschichtlicher Beziehung* Innsbruck 1887 p. 238 ff., *id. Die antike Tierwelt* Leipzig 1913 p. 2, E. Oder in Pauly—Wissowa *Real-Enc.* i. 374, H. Usener in the *Rhein. Mus.* 1905 lx. 24 ff. (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 491 ff.). The most learned account of the eagle in antiquity is still S. Bochart *Hierozoicon* rec. E. F. C. Rosenmüller Lipsiae 1794 ii. 739—770.

[3] As a coin-type, however, it is fairly frequent from the age of Alexander onwards: see the lists in K. Sittl *Der Adler und die Weltkugel als Attribute des Zeus* (*supra* i. 46 n. 2) Leipzig 1884 pp. 22 f., 27 f. Examples in Overbeck *Gr. Kunstmyth.* Zeus Münztaf. 2, 18—21, 24, 28 f.

[4] *Supra* i. 731 f. fig. 540.

[5] Eagle in the right hand of Zeus: (1) at Vienna (von Sacken *op. cit.* i. 10 pl. 2, 5 (=my fig. 690), Reinach *Rép. Stat.* ii. 7 no. 7. Height 0·06^{m}). (2) at Mont Joux (H. Meyer *Die römischen Alpenstrassen in der Schweiz* Zurich 1861 p. 126 pl. 2, 6, Reinach *Rép. Stat.* ii. 8 no. 6). (3) in the Pierpont Morgan collection (*Le Musée* 1907 iv. 140, Reinach *Rép. Stat.* iv. 7 no. 1). (4) in the P. du Chatellier collection, Cléden in Brittany (Reinach *Rép. Stat.* ii. 6 no. 1).

Eagle in the left hand of Zeus: (1) at Cologne (Reinach *Rép. Stat.* iii. 1 no. 3 'Zeus?'). (2) Bronze relief from Chalkedon (C. Friederichs *Kleinere Kunst und Industrie im Alterthum* Düsseldorf 1871 no. 1866). Cp. *supra* p. 246 f. fig. 164.

a long ancestry behind it[1] and its hold upon life must be attributed to the obscure persistence of early ideas. From the first the eagle appearing far up in the blue[2] was a visible manifestation, nay an actual embodiment, of Zeus[3]. To the last it remained his animal counterpart, born when he was born[4] and throughout associated with him in a hundred ways[5].

Fig. 691.

In the absence of both thunderbolt and eagle it is often difficult to decide whether an erect bearded god was meant for Zeus or Poseidon. But a magnificent bronze from Paramythia, now in the British Museum (fig. 691)[6], was rightly judged by E. Braun[7], J. Overbeck[8], and K. Wernicke[9] to be a representation of the former

[1] *Supra* i. 84 f. figs. 51, 53.

[2] Cp. the grand picture of an eagle's flight in Apul. *flor.* 2. When Apuleius describes how the great bird swoops down *fulminis vicem*, we are reminded of Tennyson's fragment *The Eagle* 6 'And like a thunderbolt he falls.'

[3] *Supra* p. 186 ff.

[4] Apostol. 8. 28 Ζεὺς ἀετὸν εἵλετο· ἐπὶ τῶν λυσιτελῆ καὶ καλὰ ἐκλεγομένων· λέγεται γὰρ κατὰ τὴν τοῦ Διὸς γέννησιν τὸν ἀετὸν γεννηθῆναι, ἐν δὲ τῇ πρὸς Γίγαντας μάχῃ παραπτῆναι· διόπερ ἐν τῇ διανεμήσει τῶν πτηνῶν Ζεὺς ἀετὸν εἵλετο, ᾧ καὶ προστάσσει καὶ ἀγγέλῳ χρῆται πρὸς ἐκείνους, οὓς ἐπιφανείας ἀξιοῖ (= Arsen. *viol.* p. 260 Walz), schol. *Il.* 8. 247, 24. 293, Eustath. *in Il.* p. 1351, 29 ff., *et. Gud.* p. 11, 46 ff. See also pseudo-Eratosth. *catast.* 30, Hyg. *poet. astr.* 2. 16, schol. Caes. Germ. *Aratea* p. 411, 16 ff. Eyssenhardt.

[5] K. Sittl *op. cit.* pp. 3—42.

[6] H. B. Walters *Brit. Mus. Cat. Bronzes* pp. xiv, 36 no. 274 pl. 6, 2. Height: 8⅝ ins., with base (ancient) 10¾ ins. *Patina*: dark green. Fig. 691 is from a photograph by Mr W. H. Hayles.

[7] E. Braun *Vorschule der Kunstmythologie* Gotha 1854 p. 9 pl. 13.

[8] Overbeck *Gr. Kunstmyth.* Zeus p. 153 no. 74.

[9] Müller—Wieseler—Wernicke *Ant. Denkm.* i. 22 f. pl. [illegible]2, 2.

deity[1]. The right hand probably held a long sceptre, the left a *phiále*[2]; and Zeus was conceived as the propitious recipient of his worshipper's oblation. The statuette, which in style is post-Lysippian, may well have been a votive object in the neighbouring precinct at Dodona.

The seated types of Zeus are of interest in relation to the work of Pheidias. That great craftsman never lost touch with the past and knew well how to appeal to local sentiment by taking accepted

Fig. 692.

Fig. 693.

forms and transmuting them into something higher with a touch of his own genius. A Pheidiac masterpiece is always on the one side the last term of a creative series, on the other the first term of an imitative series. For example, Zeus enthroned with a thunderbolt in his right hand and a sceptre in his left was an old Attic type[3] taken over by Pheidias from the vase-painters[4] and ennobled to serve as the centre-piece of the eastern pediment of the Parthenon (pl. xxxiii)[5].

[1] A. S. Murray *Greek Bronzes* London 1898 p. 76 ff. fig. 32 says 'Poseidon,' H. B. Walters *loc. cit.* and in his *British Museum: Select Bronzes* London 1915 pl. 19 with text 'Poseidon (?),' H. Bulle in Roscher *Lex. Myth.* iii. 2885 'die Beziehung auf Poseidon nicht...sicher... Diese Figur konnte auch für Zeus gehalten werden.'

[2] The fore-finger and the little finger of the left hand, contracted and drawn towards each other, might have held a *phiále*, but could hardly have clasped a model dolphin or tunny. K. Wernicke *loc. cit.* suggests an eagle or a Nike: so far as I can judge from a cast of the statuette, a *phiále* seems more likely.

[3] *E.g.* (1) An early black-figured *amphora* with the birth of Athena (*Brit. Mus. Cat. Vases* ii 103 ff. no. B 147, W. Henzen in the *Ann. d. Inst.* 1842 xiv. 90—103, *Mon. d. Inst.* iii. pl. 44 f. = Reinach *Rép. Vases* i. 115 f., Lenormant—de Witte *Él. mon. cér.* i. 217 ff. pl. 65 A) gives Zeus both thunderbolt and sceptre (upper part restored). In most vase-paintings of this scene either the bolt or the sceptre is absent, though the hand is held as if its missing attribute were present. (2) A red-figured *amphora* assigned to the Nikoxenos painter, a contemporary of Euthymides (Jahn *Vasensamml. München* p. 137 f. no. 405, Gerhard *Auserl. Vasenb.* i. 31 ff. pl. 7 = Reinach *Rép. Vases* ii. 21, 7 f., Hoppin *Red-fig. Vases* ii. 233 no. 6), shows Zeus with thunderbolt and eagle-sceptre seated among an assemblage of deities. (3) A fine red-figured vase from Girgenti, formerly owned by R. Politi (R. Rochette *Choix de peintures de Pompéi* Paris 1848 p. 5 vignette, p. 11 n. 6, Overbeck *Gall. her. Bildw.* i. 527 f. no. 66 Atlas pl. 22, 10, *id. Gr. Kunstmyth.* Zeus p. 28 no. b, Atlas pl. 1, 13 (Zeus only)), had Zeus with winged bolt and sceptre seated between Thetis and Heos, who supplicate him on behalf of their sons. Cp. also *supra* p. 274 fig. 177.

[4] *Infra* § 9 (h) ii (*θ*).

[5] See pocket at end of vol. ii.

Installed in this unique position it was naturally copied and re-copied by successive generations of artists. Indeed, with sundry slight modifications (the sceptre held higher, the bolt resting in the lap, the throne embellished, the footstool pushed forward) it lasted on

Fig. 694.

Fig. 695.

Fig. 696.

into imperial times, as may be seen, not only from countless coins (*e.g.* fig. 692)[1] and gems (*e.g.* fig. 695)[2], but also from numerous extant marbles and bronzes[3]. The finest of the latter is a statuette at New York (fig. 697)[4], of which Miss G. M. A. Richter well says:

[1] *E.g. supra* i. 44 fig. 13, 69 fig. 44, 90 fig. 62, 124 fig. 91 f., 781 fig. 566, ii. 16 figs. 3—6, etc. I add, on account of their handsome thrones, a couple of coppers issued at Taouion (Tavium) in Galatia (*Brit. Mus. Cat. Coins* Galatia, etc. p. 24 pl. 5, 2 (=my fig. 692) time of Titus to Septimius Severus, p. 27 pl. 5, 12 (=my fig. 693) Caracalla, Head *Hist. num.*[2] p. 749). Tavium (*Böyuk Nefez Keui*) was the chief town of the Galatian tribe of the Trokmoi, ὅπου ὁ τοῦ Διὸς κολοσσὸς χαλκοῦς καὶ τέμενος αὐτοῦ ἄσυλον (Strab. 567): see further J. R. S. Sterrett in the *Papers of the American School of Classical Studies at Athens* 1883—1884 ii. 310 f. W. Wroth in the *Brit. Mus. Cat. Coins* Galatia, etc. p. xxiii f. regards the coins here given as figuring the colossal Zeus and suggests that the bull was his victim. He further notes a dedication [Δι]ὶ Ταουιανῷ found at Ankyra (A. von Domaszewski in the *Arch.-ep. Mitth.* 1885 ix. 114 f. no. 65), another I.o.m. | Taviano | pro salu. | imp. Anto|nini et M. | Aureli Caes. | Gal[at]ae con|sistentes | municipio | posierunt at Napoca (*Klausenburg*) in Dacia (*Corp. inscr. Lat.* iii no. 860 with Suppl. p. 1380=Orelli *Inscr. Lat. sel.* no. 1285=Wilmanns *Ex. inscr. Lat.* no. 2449=Dessau *Inscr. Lat. sel.* no. 4082), and a third I. o. m. | Taviano | et dis deabusque | pro salute (et) victori[a] | domini n(ostri) sanctissi[m(i)] | Avianus Aug. lib. | subpro(curator) auraria[r(um)] | v. s. a(nimo) [l(ibens)] at Apulum (*Karlsburg*) in Dacia (*Corp. inscr. Lat.* iii. no. 1088=Orelli *Inscr. Lat. sel.* no. 1284).

[2] *E.g. supra* i. 42 fig. 12, ii. 318 fig. 200. I illustrate two Graeco-Roman gems of normal and exceptional design. Fig. 694 is a burnt onyx in the British Museum, formerly in the Mertens and Castellani collections (*Brit. Mus. Cat. Gems* p. 90 no. 577. Scale ½), a thoroughly commonplace specimen such as any Roman tradesman might have worn to bring him luck (cp. Furtwängler *Geschnitt. Steine Berlin* p. 266 no. 7132 pl. 54). Fig. 695 is a sapphirine chalcedony, which came to me from the Story-Maskelеyne collection (Sale Catalogue London 1921 p. 16 no. 85) and is here shown to the scale ¾: the corn-ears and *skýphos* set beside the god's throne mark him as the dispenser of food and drink (cp. *Brit. Mus. Cat. Gems* p. 90 no. 576, and *supra* i. 598 n. 2).

See page 756 *n.* 1.

even more of the sceptre and even less of the thunderbolt; for the former is held yet higher, while the latter has simply disappeared.

Another long-established[1] type was that of Zeus seated on a throne with an eagle flying either to him or from him. Laconian cups of *c.* 550–500 B.C.[2] adopted the former pose[3]; Arcadian coins of *s.* V preferred the latter[4]. This federal coinage, probably struck at Heraia in western Arkadia[5], was not unnaturally imitated at Olympia, hardly more than a dozen miles away, where a very

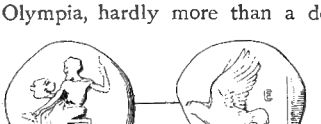

Fig. 700.

Fig. 701.

similar Zeus appears seated on a throne with a *himátion* about his waist, a sceptre in his left hand, a winged thunderbolt in his right, and an eagle flying before him (figs. 700, 701)[6]. The Olympian coins start the third of four series dated by Mr C. T. Seltman between *c.* 452 and *c.* 432 B.C.[7] It is therefore possible, not to say probable, that Pheidias, who quitted Athens for Olympia after the dedication of Athena *Parthénos* in 438[8], took a hint for his

[1] According to T. Wiegand *Die archaische Poros-Architektur der Akropolis zu Athen* Cassel and Leipzig 1904 p. 105 f. figs. 108, 109, the seated Zeus from the eastern pediment of the old Hekatompedon at Athens held an eagle in his left hand (hand holding bird's claws extant). A. Furtwängler too in the *Sitzungsber. d. kais. bayr. Akad. d. Wiss.* Phil.-hist. Classe 1905 p. 447 = his *Aegina* München 1906 i. 317 fig. 253 restores Zeus with an eagle in his left hand, a thunderbolt in his right. But G. Dickins *Catalogue of the Acropolis Museum* Cambridge 1912 i. 62 ff., 73 no. 25, accepting R. Heberdey's reconstruction of the pediment, first suggests that Zeus had a sceptre in his raised left hand, some object unknown in his lowered right, and then adds: 'The figure may be safely recognized as ZEUS holding a sceptre or a thunderbolt, and, probably, an eagle.' *vix liquet.*

There is no other known specimen of either piece.

[7] C. T. Seltman in *Nomisma* 1913 viii. 43, 57 f.

[8] This at least seems clear from Philochoros *frag.* 97 (*Frag. hist. Gr.* i. 400 Müller) *ap.* schol. Aristoph. *pax* 605, on the text of which see R. Schöll 'Der Prozess des Phidias' in the *Sitzungsber. d. kais. bayr. Akad. d. Wiss.* Phil.-hist. Classe 1888 i. 20 ff. J. Nicole *Le procès de Phidias dans les Chroniques d'Apollodore* Genève 1910 pp. 1—50 with fac-

Olympian Zeus[1] from the local coinage. He retained the throne and the sceptre in the god's left hand, but replaced the winged thunderbolt by a winged Victory, and transferred the eagle to the sceptre-top, thereby suggesting not so much the stormy strength of the thunder-god as the tranquil supremacy of the victor.

A little later than the *statêres* illustrated above are others (fig. 702)[2] with an obverse design of Zeus seated on a rock, the sceptre

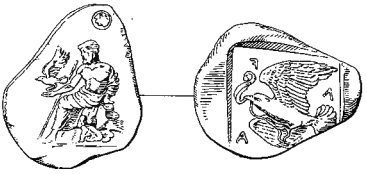

Fig. 702.

leaning against his right shoulder, the eagle about to fly from his right hand, and the thunderbolt omitted. P. Gardner conjectured that the rock was meant for Mount Olympos[3]—Olympos (let us suppose) in the neighbourhood of Olympia[4]. The comparative freedom of the seated figure, the arrangement of the *himátion* over the left upper arm, and the dropping of the thunderbolt were perhaps due to the influence of Pheidias' chryselephantine colossus. If the

simile published two mutilated columns of papyrus (pap. 263 and 264 of the Geneva collection), which contain portions of a life of Pheidias attributed by him to Apollodoros. According to Nicole's interpretation, Pheidias was accused at Athens of stealing the ivory (as Philochoros *loc. cit.* says), not the gold (as Plout. *v. Per.* 31 says), of the *Parthénos*; was released upon heavy bail, forty talents, paid by the Eleans, who wanted him to carry out their commission of the Zeus *Olýmpios*; and, on being condemned about four years later, was compensated by the Eleans with their citizenship. Immediately after this there is a record of the dedication of the Olympian Zeus. Nicole's reading of the papyrus is attacked by L. Pareti 'Il processo di Fidia ed un papiro di Ginevra' in the *Röm. Mitth.* 1909 xxiv. 271—316. But Pareti's own views are refuted by H. Lechat in the *Revue des études anciennes* 1911 xiii. 125 ff. And, though Nicole's interpretations are not all reliable (*e.g.* F. Jacoby in the *Berl. philol. Woch.* Sept. 10, 1910 pp. 1148—1156 shows that the papyrus has nothing to do with Apollodoros), yet it is evident that the new biography supports Philochoros as against Plutarch. See further E. A. Gardner in Ξένια Athènes 1912 p. 49 ff., A. J. B. Wace in *The Year's Work in Class. Stud.* 1912 p. 37, A. Frickenhaus in the *Jahrb. d. kais. deutsch. arch. Inst.* 1913 xxviii. 346—352.

earlier *statêres* were issued before its erection, these of more advanced style were issued after it.

Fig. 703.

Of the temple-statue itself no adequate copies[1] have come down to us. The small marble Zeus in the Musée Lapidaire at Lyons[2],

[1] For the numismatic evidence see R. Weil 'Der Zeus des Pheidias auf elischen Münzen der Kaiserzeit' in the *Zeitschr. f. Num.* 1912 xxx. 363—382 pl. 10, and *infra* Append. O.

[2] Clarac *Mus. de Sculpt.* iii. 20 pl. 397 fig. 665 (two views) = Reinach *Rép. Stat.* i. 186 no. 1 f., E. Wolff in the *Ann. d. Inst.* 1841 xiii. 52 f. pl. D, O. Benndorf in the *Arch. Zeit.* 1865 xxiii Anz. p. 73*, Müller—Wieseler *Denkm. d. alt. Kunst* ii. 4 pl. 1, 8, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 1. 50 f. pl. 4, 14. Restored: left lower arm from elbow, right lower arm with elbow, nose, neck with some locks of hair, front of right foot, parts of throne-back. Height (with base): 0·62m. On the base is ΑΠΟΛΛΩΝ (*Corp. inscr. Gr.* iii no. 6139), presumably a modern inscription (O. Benndorf *loc. cit.*), since the similarity of marble, style, and proportions makes it practically certain that the bearded head belongs to the body of the work.

cited by J. Overbeck[1] as nearer akin to the Pheidiac original than any other extant figure, can claim, if not the calm of conquest, at least a quiet dignity of its own, and must doubtless be classed as a later representative of the Olympian type. The left hand was raised to hold a sceptre. The right, to which the restorer has given a globe, very possibly, as Overbeck suggests, carried a Victory. And the thunderbolt is nowhere to be seen, unless we may detect a stylised form of it in the throne-legs and in the relief-pattern that connects them behind (pl. xxxv)[2]. The once dreaded missile of the sky-god could hardly undergo further attenuation without vanishing altogether.

When Alexander the Great placed upon his silver coinage the design of a seated Zeus, it might have been expected that he would choose for the purpose the great cult-statue at Olympia—and the more so as Mount Olympos was a prominent feature of his own domain. In point of fact, he did nothing of the sort. He set aside all the improvements introduced by Pheidias and deliberately reverted to the old pre-Pheidiac type. A comparison of his tetradrachms (fig. 704)[3] on the one hand with the federal coins of Arkadia, on the other with the Olympian statue, is instructive:

ARCADIAN COINS	PHEIDIAS' STATUE	ALEXANDER'S COINS
Right hand has eagle.	Right hand has Nike.	Right hand has eagle.
Left hand has sceptre held high.	Left hand has sceptre held low.	Left hand has sceptre held high.
Right leg is in advance of left leg.	Left leg is in advance of right leg.	Right leg is in advance of left leg.
Himátion is wrapped about lower limbs only.	*Himátion* covers left upper arm as well.	*Himátion* is wrapped about lower limbs only.
Throne has at first no back.	Throne has high back.	Throne has at first no back.

[1] Overbeck *Gr. Kunstmyth.* Zeus p. 123 f. no. 18.

[2] Pl. xxxv is from a couple of photographs kindly procured for me by Mr S. C. Cockerell. I add, for comparison, four throne-legs of white marble formerly in the collection at Deepdene (*Hope Sale Catalogue* 1917 p. 32 no. 205) and now in the Fitzwilliam Museum (fig. 703 from a photograph by Mr W. H. Hayles). Greatest height: 36½ ins. They are of similar design, but vary in detail and workmanship, and here and there have been patched by a modern restorer. Such legs are frequent in representations of ancient couches and thrones (L. Heuzey—H. Daumet *Mission Archéologique de Macédoine* Paris 1876 Texte p. 261 fig. (eight examples), C. L. Ransome *Studies in Ancient Furniture* Chicago 1905 pp. 20 ff., 44 ff., 72 ff., 90 ff. (with numerous figs.)), and their resemblance to a thunderbolt, though fortuitous in origin, would make them peculiarly suitable to a throne of Zeus (cp. the marble throne-leg at Palermo in Durm *Baukunst der Griechen*[2] p. 253 fig. 175, *ib.*[3] p. 239 fig. 209). The closest parallel to the Cambridge legs is afforded by *Ant. Skulpt. Berlin* p. 429 f. no. 1092 a. b., a marble leg which shows traces of red colour and gilding.

[3] From a specimen in my collection.

The inference is clear. Alexander, ignoring the idealised ruler at Olympia, harked back to the more ancient and popular type of Zeus *Lýkaios*. After all, Mount Lykaion too was called Olympos[1]. Yet so immense was the fame of the Pheidiac figure that tetradrachms issued later in the name and with the types of Alexander are increasingly influenced by it. The left leg is advanced instead of the right (figs. 705—707), and the throne is manifestly assimilated to that of Zeus *Olýmpios* (figs. 705, 707)[2]. Coins of the Syrian kings from Seleukos i Nikator to Antiochos ii Theos, and again from Antiochos iv Epiphanes onwards[3], exchange the eagle for Nike and

Fig. 704.

Fig. 705.

Fig. 706.

Fig. 707.

proceed to drape the *himátion* over the left shoulder—in short, frankly adopt the whole Pheidiac design.

So even Alexander failed to arrest the moral evolution of Zeus. What motive led him to make the attempt? Why did he select for his world-wide coinage the old eagle-bearer of Arkadia rather than the newer and nobler creation of Pheidias? Just here an interesting suggestion has been made by Mr C. T. Seltman. He points out to me (Aug. 27, 1921) that on some of the coins struck at Tarsos by Mazaios before 333 B.C.[4] *Ba'al-tars* precisely resembles the

[1] *Supra* i. 68.

[2] Figs. 705, 706 are from specimens in my collection. Fig. 707 is from one in the British Museum (Head *Coins of the Ancients* p. 63 pl. 31, 14, P. Gardner *Types of Gk. Coins* p. 186 pl. 12, 23), of which I possess a duplicate, formerly in the Pozzi collection.

[3] E. Babelon *Les Rois de Syrie, d'Arménie et de Commagène* Paris 1890 p. xcv. The coins of Antiochos iv are discussed and illustrated *infra* Append. N *sub fin.*

[4] For the dating see an important monograph by E. T. Newell 'Myriandros—Alex-

eagle-bearing Zeus of Alexander[1], seated as he is on a throne without a back, with an eagle in his right hand, a sceptre in his left, the right leg in advance, and the *himátion* wrapped about his lower limbs. Mr Seltman hazards[2] the brilliant conjecture that Alexander intentionally combined an obverse type, which in the west would represent Herakles, in the east Melqarth, with a reverse type, which in the west would represent Zeus, in the east *Ba'al-tars*, thereby pursuing his usual policy of welding together his Hellenic and barbarian subjects.

Fig. 708.

Lastly Greek art produced on Italian soil a fresh type of seated Zeus, in which the right hand held neither thunderbolt, nor eagle, nor even Victory, but was simply raised to the head in an attitude suggestive of thought. We have already seen that a wall-painting from Pompeii[3] and a well-mouth at Naples[4] presuppose a common exemplar of this type, not impossibly the great statue made by Lysippos for the market-place of the Tarentines. Here for the first time the sculptor endeavours

To bring the invisible full into play!

Fig. 709.

andria Kat'isson' in the *American Journal of Numismatics* 1919 liii. 2. 1—42 with 28 figs. and 2 pls. Babelon's chronology (*supra* i. 596 n. 2) must be revised accordingly.

[1] *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 172 nos. 57 and 58 pl. 31, 2, E. T. Newell *loc. cit.* p. 9 fig. 9.

[2] This conjecture is hardly to be reconciled with the contention of E. T. Newell 'Alexander Hoards' in *Numismatic Notes and Monographs* 1921 iii. 15 pl. 1, 16, 19, pl. 2, 25 that the first issue of tetradrachms under Alexander at Amphipolis together with the last issue under Philip at the same mint 'probably covered the years 336 to 334 B.C.'

[3] *Supra* i. 34 pl. i and Frontispiece.

[4] *Supra* i. 34 ff., pl. ii.

The sceptre (for both painting and relief postulate a sceptre in the god's left hand) as before symbolises outward sovereignty[1]. But a new note is struck by the gesture betokening inward reflexion. Henceforward omnipotence connotes omniscience, the Almighty

[1] I would here call attention to a very remarkable gold sceptre from Tarentum, formerly in the Castellani collection and now in the British Museum (F. H. Marshall *Brit. Mus. Cat. Jewellery* p. 232 f. no. 2070 fig. 65. Length: 0·52^{m}). It consists of a gold tube, covered by a network of gold wire with dots of dark blue or white enamel at each point of contact. The tube ends below in a disk decorated with a flower of fourteen petals, above in a Corinthian capital with leaves, volutes, and flowers all complete. Above the *abacus* is a large quince of opaque, greenish glass, surrounded by eight oak-leaves (F. H. Marshall, apparently misled by the foliage of the capital, takes them to be acanthus-leaves) and surmounted by a small flower of four leaves in gold. Figs. 708 and 709 are from photographs by Mr R. B. Fleming.

This would seem to be the only ancient Greek sceptre in existence (A. Sorlin-Dorigny in Daremberg—Saglio *Dict. Ant.* iv. 1115 knows of none). Tarentum in the time of Dareios son of Hystaspes had its kings (Hdt. 3. 136 Aristophilides). But the forms of the Corinthian capital point to a much later period, and F. H. Marshall *loc. cit.* says '3rd cent. B.C. (?).' If, as seems probable, the surrounding leaves are really meant for oak, closer identification may be attempted. They suggest that the sceptre belonged originally to some king of Epeiros, who stood for the worship of the Dodonaean Zeus. Now Alexander i of Epeiros, when he invaded Italy to assist the Tarentines against the Lucanians, Bruttians, and Messapians, struck at Tarentum between 334 and 330 B.C. certain exquisite gold *statêres* with *obv.* head of Zeus *Náios*

Fig. 710.

Fig. 711.

of Dodona wearing a wreath of oak, *rev.* ΑΛΕΞΑΝΔΡΟΥ ΤΟΥΝΕΟΠΤΟΛΕΜΟΥ thunderbolt and spear-head (*Brit. Mus. Cat. Coins* Thessaly etc. p. 110 pl. 20, 1 (=my fig. 710), Head *Coins of the Ancients* p. 66 pl. 33, 11, P. Gardner *Types of Gk. Coins* p. 149 f. pl. 5, 37, M. P. Vlasto in the *Journ. Intern. d'Arch. Num.* 1899 ii. 315 pl. IE′, 16). And the Tarentines, when Pyrrhos i of Epeiros had been called in to champion their cause against Rome, issued *c.* 281 B.C. other gold *statêres* with *obv.* laureate head of Zeus *Eleuthérios* to left, or right, and monogram ΝΙΚ, *rev.* ΤΑΡΑΝΤΙΝΩΝ eagle on thunderbolt, usually with symbol and magistrate's name (Head *Coins of the Ancients* p. 66 pl. 33, 12 and *Hist. num.*[2] p. 58, *Hunter Cat. Coins* i. 68 no. 22 pl. 5, 6, M. P. Vlasto in the *Journ. Intern. d'Arch. Num.* 1899 ii. 331 ff. pl. IZ′, 1—15. My fig. 711 is from a specimen formerly belonging to W. R. Hamilton, of which there is an electrotype in the Leake collection, Cambridge). It is permissible, therefore, to conjecture that the sceptre preserved in the British Museum was a votive offering either of Alexander or, more probably, of Pyrrhos to some Tarentine deity, presumably Zeus *Eleuthérios* (Hesych. *s.v.* Ἐλευθέριος Ζεύς· ... *τῶν Μήδων ἐκφυγόντες ἱδρύσαντο τὸν Ἐλευθέριον Δία. τοῦτον δὲ ἔνιοι καὶ Σωτῆρά φασι. τιμᾶται δὲ καὶ ἐν Συρακούσαις καὶ παρὰ Ταραντίνοις καὶ ἐν Πλαταιαῖς καὶ ἐν Καρίᾳ ὁ Ἐλευθέριος Ζεύς*). Be that as it may, the quince or apple enclosed by the leaves is a frequent decoration of sceptres (A. Sorlin-Dorigny *loc. cit.* p. 1116), which, at least in many cases, are to be regarded as the conventionalised form of a branch with golden apples (*supra* i. 87 n. 6 and *Folk-Lore* 1906 xvii. 158 ff.).

must needs be the All-wise. And what of the All-terrible? His eagle is relegated to a position near to, yet apart from, himself: it is retained for suitable service. But the thunderbolt, once the outstanding feature in the Zeus-cult of Tarentum[1], has wholly vanished. In its stead we discern, however darkly, the workings of divine Providence.

(β) Modifications in the shape of the thunderbolt.

Modifications may be noted, not only in the use of the thunderbolt, but also in its shape. P. Jacobsthal[2] in a monograph devoted to the subject distinguishes two varieties of ancient oriental repre-

Fig. 712.

Fig. 733.

(884—860 B.C.) and now in the British Museum nos. 28, 29 (A. H. Layard *A second series of the Monuments of Nineveh* London 1853 pl. 5, W. H. Ward *The Seal Cylinders* etc. p. 197 fig. 564, M. Jastrow *op. cit.* p. 87 f. pl. 39, no. 120): fight of a storm-god (Marduk?), holding two double forks, with a lion-headed monster (Tiamat?).

Fig. 729 from the rock-carving of Sennacherib (*c.* 705—682 B.C.) at Bavian north of Mosul (A. H. Layard *Discoveries in the Ruins of Nineveh and Babylon* London 1853 pp. 208—217 fig., W. J. Hinke *op. cit.* p. 88 fig. 25, M. Jastrow *op. cit.* p. 28 pl. 14, no. 46): symbol of Adad.

Fig. 730 from the dolerite *stèle* of Esar-haddon (682—669 B.C.) found at Sinjerli and now at Berlin (F. von Luschan *op. cit.* 1893 i. 11—43 fig. 4 and pl. i, Sir G. Maspero *The Passing of the Empires* London 1900 p. 375 fig., W. J. Hinke *op. cit.* p. 89 fig. 26, M. Jastrow *op. cit.* p. 30 pl. 14, no. 48): Adad standing on an ox with the double fork in his hand. Cp. the Susian god with bovine horns, axe, and double fork (*supra* i. 578 fig. 447).

[1] Fig. 731 from a cylindrical bar of lapis lazuli (0·2^{m} long) found at Babylon. It was dedicated by Esar-haddon (682—669 B.C.) to Marduk, but is inscribed as 'the seal of the god Adad in the temple of Esagila, belonging to the treasure of the god Marduk.' Adad, who is here conceived as a form of Marduk, holds a lightning-fork in either hand. One of these forks is double, the other treble—approximating at its tip to the shape of a lotos-bud. The god holds also by a couple of cords an ox (the beast of Adad) and a dragon (the beast of Marduk) (M. Jastrow *op. cit.* p. 7 f. pl. 5, no. 15, R. Koldewey *The Excavations at Babylon* trans. A. S. Johns London 1914 p. 221 fig. 134).

[2] Figs. 732, 733 from a rock-cut relief of the Sargonid dynasty (*c.* 700 B.C.) at

end to end. Between 650 and 550 B.C. it brought the potter, for example, a profusion of possible *motifs*—sphinxes, griffins, lions, panthers, the lotos, the palmette, even the Assyrian 'tree of life.' Thus when a 'Caeretan' *hydría* in the Louvre[1] figures a stag-hunt on one side, a pair of winged bulls on the other, we must not jump to the conclusion that its painter had witnessed the chase on the

Fig. 734.

plains of Mesopotamia or passed through the ruined portals of Nineveh: he was but repeating, for the sake of their decorative effect, designs that had been transmitted to him along the caravan-routes of anterior Asia. Accordingly it is not surprising to find that the lotiform lightning-fork of late Assyrian art makes its first[2] appearance as the Greek thunderbolt on the vases of Ionia. An

Malthayiah, 60 miles or so north of Mosul (A. H. Layard *Nineveh and its Remains* London 1849 i. 229—231, V. Place *Ninive et l'Assyrie* Paris 1867—1870 ii. 153—160 pl. 45, Perrot—Chipiez *Hist. de l'Art* ii. 642—647 fig. 313): two out of a procession of deities confronting the king; they are characterised as deities (Adad? and Marduk?) by the stars above their heads and the animals (ox? and dragon?) beneath their feet.

[1] E. Pottier *Vases antiques du Louvre* 2me Série Paris 1901 p. 65 no. E 697, *id.* in the *Bull. Corr. Hell.* 1892 xvi. 257 ff. figs. 7—9, Perrot—Chipiez *Hist. de l'Art* ix. 518 ff. figs. 250—252.

[2] F. Poulsen *Der Orient und die frühgriechische Kunst* Leipzig—Berlin 1912 p. 81 notes that on one of the *týmpana* from the Idaean Cave, referable to *s.* viii B.C., 'Ashur' is holding in either hand objects which may be meant for lightnings (F. Halbherr—P. Orsi *Antichità dell'Antro di Zeus Ideo in Creta* (= *Museo Italiano di Antichità Classica* ii)

early *kýlix* of 'Chalcidian' style[1] from *Siana* (Mnasyrion?) in Rhodes shows the introduction of Herakles to Olympos, where Zeus and Hera are seated on richly embellished thrones. Zeus (fig. 734) holds in his left hand a thunderbolt looking like a bunch of leaves or petals, while from the upper rail of his throne rises a lotos-bloom of absurdly large dimensions. Another 'Chalcidian' vase-painting already discussed (*supra* p. 731 fig. 663) treats the bolt in the god's hand as itself an unmistakable lotos.

Fig. 735.

And this floriform fashion once started had a considerable vogue throughout the Hellenic world. It lingered on even into imperial times. Indeed, a rare copper of Kibyra in Phrygia, struck by Diadumenianus (217—218 A.D.), actually represents Zeus enthroned with a simple lotos-flower, instead of a thunderbolt, in his right hand (fig. 735)[2].

The popularity of the lotos in this connexion was due in part, no doubt, to its obvious ornamental qualities, but in part also to long-standing significance. Fire in general, as P. Jacobsthal points out, was sometimes regarded by the ancients as a flower[3]. And the

pl. 5 (=my fig. 736)). If so, these are the earliest known lightnings of Greek art. But I suspect that they are rather to be regarded as flowers (cp. *supra* i. 208 figs. 153, 154).

Primitive belief and, its first cousin, poetic imagination still share the same idea. A. du Bois-Reymond in Jacobsthal *op. cit.* p. 10 n. 6 adduces Rudyard Kipling *The Jungle Book* London 1898 p. 21 '"Get the Red Flower." By Red Flower Bagheera meant fire, only no creature in the jungle will call fire by its proper name.' So A. C. Swinburne *Atalanta in Calydon* London 1896 p. 13 'I dreamt, and saw the black brand burst on fire | As a branch bursts in flower, and saw the flame | Fade flower-wise,' R. Browning *The Heretic's Tragedy* 9 'Ha ha, John plucketh now at his rose | To rid himself of a sorrow at heart! | Lo,—petal on petal, fierce rays unclose ; | Anther on anther, sharp spikes outstart ; | And with blood for dew, the bosom boils ; | And a gust of sulphur is all its smell ; | And lo, he is horribly in the toils, | Of a coal-black giant flower of hell!'

[1] On the lotos in its various aspects see the collections of A. de Gubernatis *La mythologie des plantes* Paris 1882 ii. 202—211, 255, R. Folkard *Plant Lore, Legends, and Lyrics* London 1884 pp. 418—422, 463, J. Murr *Die Pflanzenwelt in der griechischen Mythologie* Innsbruck 1890 pp. 281—283, and especially W. H. Goodyear *The Grammar of the Lotus* London 1891.

The religious significance of the plant was immediately derived from its habits. According to Theophrastos, the white lotos closes its bell and sinks at sunset, but reopens and comes up again at sunrise (Theophr. *hist. plant.* 4. 8. 9, *caus. plant.* 2. 19. 1, cp. Plin. *nat. hist.* 13. 108, Dioskor. 4. 112 (114) p. 601 f. Sprengel), and Proklos suggests that in so doing it is virtually adoring the sun (Prokl. *de sacrificio et magia* ed. M. Ficinus Leyden 1607 p. 276). In point of fact, the white lotos (*nymphaea lotus*) appears to be night-blooming, since it is said to open just after sunset and to close on the following morning about ten o'clock ; whereas the rose lotos (*nelumbium speciosum*) opens at dawn and closes soon after mid-day, and the blue lotos (*nymphaea caerulea*) opens soon after sunrise and closes an hour or two before sunset : see Goodyear *op. cit.* p. 18 n. 81. The lotos therefore naturally stood for reproduction, resurrection, and rebirth.

As a symbol of reproductive power it surmounts the shrine of the ithyphallic Khem (Lanzone *Dizion. di Mitol. Egiz.* p. 945 f. pl. 333, 2 ; p. 946 f. pl. 334, Goodyear *op. cit.* p. 10 pls. 1, 10 ; 4, 13, 16) and of Âmen-Râ in his ithyphallic form (Lanzone *op. cit.* p. 40 f. pl. 20, 1). Androgynous figures depicting the two Niles, Hapi Kema and Hapi Mehit, have lotos-plants springing from their heads (Lanzone *op. cit.* p. 521 ff. pls. 198 and 199, A. Erman *Life in Ancient Egypt* trans. H. M. Tirard London 1894 p. 425 fig.). A. de Gubernatis *op. cit.* ii. 211 says: 'En Égypte, on trouve le lotus dans les parties sexuelles des mômies de femmes.'

Again, the lotos symbolised resurrection. It is constantly associated with the mummy (Goodyear *op. cit.* p. 10 pls. 2, 12 ; 4, 14, E. A. Wallis Budge *The Gods of the Egyptians* London 1904 ii pl. 26) and with the guardians of its *viscera* (Lanzone *op. cit.* pl. 295, 1, Goodyear *op. cit.* p. 10 pls. 2, 3 ; 5, 1, 4, E. A. Wallis Budge *op. cit.* ii pl. 27). In the *Book of the Dead* cap. 81 A the deceased says: 'I am the pure lotus, which

springeth up from the divine splendour that belongeth to the nostrils of *Ra*,' and *ib.* 81 B: 'Hail, thou lotus, thou type of the god *Nefer-Tem*! I am he who knoweth you, and I know your names among the gods, the lords of the Underworld, and I am one of you.' The vignette of version A is a lotos: that of version B is a lotos-plant with a flower and buds growing out of a pool of water, while from the flower springs a human head, the head of the deceased (Goodyear *op. cit.* pl. 2, 9, E. A. Wallis Budge *op. cit.* i. 521 f.). Lotos-flowers and -buds are represented as rising out of the mummy Osiris at Philai (Goodyear *op. cit.* p. 19 fig. 1) and as connected in various ways with him at Denderah (Lanzone *op. cit.* pls. 268, 292, E. A. Wallis Budge *op. cit.* ii. 131 ff. nos. 1, 23). Karystios of Pergamon *frag.* 6 (*Frag. hist. Gr.* iv. 357 Müller) *ap.* Athen. 684 E quotes from Nikandros the statement that the flower called *ambrosia* sprang from the head of a statue of Alexander in Kos: the flower in question was a species of lily (Nik. *ap.* Athen. 681 B, 683 D: see further *Class. Rev.* 1906 xx. 377). Various divinities, divinised mortals, etc. appear on coins with head surmounted by a lotos-flower (list in Rasche *Lex. Num.* iv. 1825), *e.g.* Zeus Sarapis (H. P. Weitz in Roscher *Lex. Myth.* iv. 366 f.) on a bronze coin of Perinthos in Thrace (Mionnet *Descr. de méd. ant.* Suppl. ii. 397 no. 1161. Fig. 737 is from a specimen of mine, formerly in the Prowe collection) and Antinoos on a bronze coin of Alexandreia struck by Hadrian in 135 A.D. (Müller—Wieseler *Denkm. d. alt. Kunst* i. 94 pl. 70, 387 = my fig. 738, L. Dietrichson *Antinoos* Christiania 1884 p. 289 ff., G. Blum 'Numismatique d'Antinoos' in the *Journ. Intern. d'Arch. Num.* 1914 xvi. 53, 68 pl. 5,

Fig. 737.

Fig. 738.

Fig. 739.

1 (Berlin). Cp. the lotos-wreath of Antinoos on a relief in the Villa Albani (L. Dietrichson *op. cit.* p. 189 no. 21 pl. 5, 12, L. Julius in Baumeister *Denkm.* i. 85 fig. 89, Friederichs—Wolters *Gipsabgüsse* p. 672 f. no. 1663, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom* Leipzig 1913 ii. 424 f. no. 1872)). Gold and silver pieces bearing the legend and types of the apotheosized Arsinoe ii Philadelphos represent the reigning queen in a manner calculated to appeal alike to Egyptians and to Greeks. The former would note the horn of Ammon curling round her ear and the lotos-flower rising from her head. The latter would see but a braided tress of hair and the tip of the royal sceptre! (for examples *vide* J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1899 ii. 183 ff. pls. 8—11, 1900 iii. 73 ff. pls. 2, 4, 5. Fig. 739 is from a decadrachm in my collection).

Thirdly, the lotos was associated with the sun and solar deities. Horos is depicted as a young child seated upon an opening lotos (E. A. Wallis Budge *op. cit.* i pl. 34, A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 p. 26 fig. 33). 'When he rises in brilliance from the lotos, the whole world comes to life' (H. Brugsch *Religion und Mythologie der alten Aegypter* Leipzig 1885 i. 104, citing C. R. Lepsius *Ueber die Götter der 4 Elemente* pl. 1, 1). Egyptian paintings of the infant sun thus rising from the lotos are mentioned by Plout. *de Is. et Os.* 11, *de Pyth. or.* 12. At Denderah a king offers Horos the lotos with the words: 'I offer thee the flower, which was in the beginning, the glorious lily of the great water. Thou camest forth from the midst of its leaves in the town of Chmun (Hermopolis magna) and didst lighten the earth,

also in Indian[1] religion. The Greeks, therefore, who took lightning to be made of the same fiery substance as the sun[2], might well acquiesce in a lotiform thunderbolt. Moreover, the sky-god's older weapon, the double axe of immemorial sanctity, had been combined in most intimate union with the three-petalled lily[3]. Small wonder that its successor, the classical *keraunós*, retained at least a trace of the former affinity[4].

which was still wrapped in darkness' (H. Brugsch *op. cit.* i. 121, citing A. E. Mariette *Denderah* Paris 1880 I, 55, a). Another text at Denderah says: 'The sun, which was from the beginning, rises like a hawk from the midst of its lotos-bud. When the doors of its leaves open in sapphire-coloured brilliance, it has divided the night from the day' (H. Brugsch *op. cit.* i. 103, citing his *Geographische Inschriften altägyptischer Denkmäler* Leipzig 1884 p. 764 no. 55). Many monuments show the hawk, the embodiment of Horos (*supra* i. 241, 341), supported on a lotos (Goodyear *op. cit.* p. 6 f. pls. 1, 5; 5, 5—7; 43, 3, 9; cp. 44, 2, 6), Thothmes iii is portrayed presenting lotos-flowers and geese to a hawk-headed Râ at Amada (Goodyear *op. cit.* p. 6 pl. 1, 8). Amenophis iii similarly presents lotos-flowers to Âmen (*supra* i. 347) at Thebes (Goodyear *op. cit.* p. 6 pl. 1, 6). The third member of the Memphitic triad, Nefer-Tem, a god of the rising sun, was from the earliest times connected with the lotos. In the text of Unâs, a king of the fifth dynasty, the dead ruler is compared (392 ff. ed. Maspero) to a lotos at the nostrils of the Great Sekhem, and it is said: 'Unâs hath risen like *Nefer-Tem* from the lotus to the nostrils of *Ra*, and he goeth forth from the horizon on each day, and the gods are sanctified by the sight of him' (E. A. Wallis Budge *op. cit.* i. 520 f.). Nefer-Tem is commonly represented with a lotos-flower on his head (Lanzone *op. cit.* p. 385 ff. pls. 147 and 148, A. Erman *A Handbook of Egyptian Religion* p. 76 fig. 52).

[1] In India the lotos seems to have borne much the same character as in Egypt, though its significance is less readily perceived (on its decorative usage see A. Grünwedel *Buddhist Art in India* trans. A. C. Gibson, rev. J. Burgess London 1901 p. 19 f.).

While Vishnu was musing on his mission, a lotos with the brilliance of a thousand suns sprang from his navel, and in the midst of this lotos appeared Brahmā (*Bhâgavata-Purâṇa* 3. 20. 16). Hence Brahmā is enthroned on a lotos and holds a lotos in his hand (*Vishṇu-Purâṇa* 4. 1). Vishna too has a lotos in one of his four hands (W. J. Wilkins *Hindu Mythology* Calcutta 1882 p. 102); and the rosary of the Vishnu-devotee may be made of lotos-seeds (E. W. Hopkins *The Religions of India* Boston etc. 1895 p. 502 n. 3). Krishna had the mark of a lotos beneath each foot: he decorated himself with the flower, waving a rose lotos in his hand and having a blue lotos attached to his ear (*Bhâgavata-Purâṇa* 10. 23. 22, 10. 30. 25, 10. 32. 2, 10. 35. 16). Sarasvatī, the wife of Brahmā or—according to the Vishnuites in Bengal—of Vishnu, sits upon a lotos (E. W. Hopkins *op. cit.* p. 451) or appears in the middle of a lotos-wreath (W. J. Wilkins *op. cit.* p. 92). Çrī or Lakshmī, the bride of Vishnu, first emerged from the troubled waters of ocean and landed with a lotos in her hand: since that time the lotos has been one of her attributes (C. Joret *Les Plantes dans l'antiquité et au moyen âge* Paris 1904 i. 2. 527 f.). The blue lotos is one of the arrows of Kāma, god of love (*id. ib.* p. 528).

Vishnu is commonly regarded as a solar god. But this is doubtful (H. Oldenberg *La Religion du Véda* trans. V. Henry Paris 1903 p. 190 ff.). With his solarity stands or falls that of Brahmā, and that of Vishnu's *avatar* Krishna.

[2] *Supra* i. 578 n. 3, 777 n. 4, ii. 11.

[3] *Supra* p. 524 ff.

[4] Cp. the relation of Perun to the iris (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 183: 'The South Slavs call the iris *perunik*, Perun's flower,' etc.).

J. Grimm *op. cit.* 1882 i. 183, 1883 iii. 1191, 1888 iv. 1346, 1672, 1790 n. 1, and H.

Friend *Flowers and Flower Lore* London 1883 i. 72 f., 164 ff., 343 collect the names of flowers associated in the Germanic area with thunder or thunder-gods: *e.g.* in Germany the orpine is *Donnerkraut*, the ground-ivy *Donnerrebe*, the stonecrop or houseleek *Donnerbart* (cp. English *Jo-barbe*, *Jubard*, *Jupiter's Beard* (J. Britten—R. Holland *A Dictionary of English Plant-names* London 1879 ii. 280, 281, 282), French *Joubarbe* (P. Sébillot *Le Folk-lore de France* Paris 1906 iii. 472, 495, 507)), the fumitory *Donnerflug*, the field eryngo *Donnerdistel*, and a tangled vegetable growth *Donnerbesen* (*supra* p. 642 f.); in Denmark the burdock is *tordenskreppe*; in Norway the aconite is *Thor-hat* and *Thor-hjalm*; on Dartmoor the *Potentilla Tormentilla*, a plant used as a febrifuge, was *Thor-mantel* (a corruption of *tormentil*); in Somerset the ox-eye daisy is *dun-daisy* or *thunder-daisy*. P. Sébillot *op. cit.* iii. 472 adds French parallels: in the Walloon district the wild poppy is called *fleur du tôni* (at Liège), *fleur di tônir*, *tonir*, *tonoire* and placed in the timbers of the roof, while on the festival of the Assumption (Aug. 15) bunches of St-John's-wort called *Djèn fleur du tônir* are blest and sprigs of it thrown on the fire to keep off lightning; in Béarn a plant with a yellow flower named *periglade*, 'lightning,' is treated in the same way; etc.

The reason for such names is sometimes obscure, but often turns on a fancied resemblance in colour, sound, shape, etc. H. Friend *op. cit.* i. 72 says: 'The Thistle again was sacred to Thor, its blossom being supposed to receive its bright colour from the lightning, from which it consequently protected the person or building placed under its guardianship.' J. Britten—R. Holland *A Dictionary of English Plant-names* London 1884 iii. 468 note that *Silene inflata* is called *Thunderbolts* at Higham in Kent, 'where the children snap the calyxes, which explode with a slight report.' *Eid. ib.* adopt a similar explanation of the fact that in west Cumberland the *Stellaria Holostea* is known as the *Thunnerflower*. *Eid. op. cit.* 1879 ii. 305: '*Papaver Rhœas*...' About Wooler [in Northumberland] it was wont to be called the Thunder-flower or *Lightnings*; and children were afraid to pluck the flower, for if, perchance, the petals fell off in the act, the gatherer became more liable to be struck with lightning; nor was the risk small, for the deciduousness of the petals is almost proverbial." Bot. E. Bord., p. 31.'

Various plants were named after Zeus or Iupiter. Διὸς ἄνθος = some sort of pink, perhaps *Dianthus inodorus*, 'carnation' (Theophr. *hist. pl.* 6. 1. 1, 6. 6. 2, 6. 6. 11, 6. 8. 3 and *ap.* Athen. 680 E, Nik. *ap.* Athen. 684 B, Hesych. and Souid. *s.v.*, Plin. *nat. hist.* 21. 59 and 67 Iovis flos). Διὸς βάλανος usually = *Castanea vesca*, 'chestnut' (Theophr. *hist. pl.* 1. 12. 1, 3. 3. 1, 3. 3. 8, 3. 10. 1, Dioskor. 1. 145 p. 137 Sprengel: see also Hermippos φορμοφόροι *frag.* 1. 20 (*Frag. com. Gr.* ii. 407 ff. Meineke) *ap.* Athen. 28 A as glossed by Hesych. *s.v.*, Athen. 53 D, Mnesitheos *ap.* Athen. 54 C), though the Latin equivalent, *iuglans* for *Iovis glans*, means 'walnut' (Varr. *de ling. Lat.* 5. 102, Plin. *nat. hist.* 15. 86—91, Macrob. *Sat.* 3. 18. 2 ff., *alib.*); but the Greek name was sometimes given to a Pontic variety of nut (Hermonax and Timachidas *ap.* Athen. 53 B—C, cp. Hesych. *loc. cit.*), or applied to nuts in general (Zonar. *lex. s.v.* βαλάνους Διός· τὰ κάρυα· τοῦ Ψελλοῦ· Διὸς βαλάνους λέγουσι τὰ κάρυα οἱ πλείους, cp. Serv. in Verg. *ecl.* 8. 30 nam nuces in tutela sunt Iovis; unde et iuglandes vocantur, quasi Iovis glandes). Διὸς ἠλακάτη = vervain (*supra* p. 397 n. 0: but English *Jupiter's Distaff* is yellow wild clary, and *Jupiter's Staff* is great mullein (J. Britten—R. Holland *op. cit.* ii. 282, H. Friend *op. cit.* i. 164)). Διὸς ὄφρυα = *Chrysanthemum coronarium*, 'ox-eye' (anon. *carmen Graecum de herbis* 132, an Ionic poem of *s.* iii A.D. printed in F. S. Lehrs' ed. of Oppian and Nikandros Parisiis 1846 p. 172, equates it with *βούφθαλμον* and stresses its virtues as a prophylactic etc.). Διόσπυρον = *Diospyros Lotus*, a species of cherry (Theophr. *hist. pl.* 3. 13. 3, Galen *de alimentorum facultatibus* 2. 38 (vi. 621 Kühn)). *Iovis barba* = *Anthyllis Barba-Jovis*, the silver-bush, commonly called 'Jupiter's beard' (Plin. *nat. hist.* 16. 76). *Iovis flamma* = a flower with red stalks (Plin. *nat. hist.* 27. 44). See further J. Murr *Die Pflanzenwelt in der griechischen Mythologie* Innsbruck 1890 p. 268 f. ('Heilige Blumen des Zeus') and F. Olck in Pauly—Wissowa *Real-Enc.* v. 1082 f., M. C. P. Schmidt *ib.* v. 1144.

Note also κεραύνιον = *Tuber aestivum*, 'thunder-truffle' (Theophr. *hist. pl.* 1. 6. 5, where κεραύνιον is F. Wimmer's correction of κράνιον codd. The word is quoted by

The lotiform bolt was, however, differently treated in different parts of the Graeco-Italic world. Ionian art in the east and Etruscan art in the west commonly joined lotos-flower to lotos-bud[1]. The Greeks of Greece proper, during the sixth and fifth centuries B.C.,

Fig. 740.

preferred to add flower to flower or bud to bud[2]: the former scheme was a favourite with their vase-painters (fig. 740)[3], the latter was more convenient for their sculptors (fig. 669)[4].

The lightning-lotos on Greek soil underwent three distinct modifications. In the first place its petals, stylised into rays (fig. 740),

Athen. 61 F, 62 A as γεράνειον, cp. Eustath. *in Il.* p. 1017, 19). It was believed that autumn rains, and thunder-peals in particular, hardened these tubers (Theophr. *frag.* 167 *ap.* Athen. 62 B and *ap.* Plin. *nat. hist.* 19. 37, Iuv. 5. 116 ff.)—a notion which Plutarch is at pains to disprove (Plout. *symp.* 4. 2. 2).

[1] Jacobsthal *op. cit.* p. 13 ff.

[2] *Id. ib.* p. 23 ff.

[3] Fig. 740 is from a black-figured *kýlix*, found at Corneto, now at Berlin, which has inside a *Gorgóneion* on red ground, outside an assembly of gods on white ground (E. Gerhard *Griechische und etruskische Trinkschalen des königlichen Museums zu Berlin* Berlin 1843 p. 5 ff. pl. 4—5; Furtwängler *Vasensamml. Berlin* i. 449 f. no. 2060): the excerpt shows Zeus and Hera.

For red-figured examples see *e.g. supra* p. 25 pl. i, p. 26 f. fig. 13, p. 732 fig. 664.

[4] *Supra* p. 740 fig. 669.

were soon transformed into naturalistic flames issuing from the floral (fig. 665)[1] or *quasi*-floral calyx (fig. 741)[2]. The vases render such flames in red, and it may be presumed that this variation on the lotos was introduced by some painter with an eye to effective colouring. It spread to other arts because of its obvious suitability. After all, lightning-flashes are more like flames than flowers.

Secondly, the sepals of the calyx developed into wings. At first the calyx itself was feathered. This might happen either to the single calyx, as *e.g.* on the bronze reliefs of the chariot at Perugia[3], or to the double calyx, as *e.g.* on a red-figured *kotýle* signed by the potter Hieron[4]. Later, a pair of wings was detached from the calyx, as on many vase-paintings of the fifth century (figs. 10, 666)[5]. And ultimately a second pair of wings was added to balance the first, as on the coins[6] and vases of south Italy (*supra* i. 337 fig. 269)[7]. There can be little doubt that the winged thunderbolt, repeatedly mentioned or implied in Attic poetry[8], was originally modelled on the eagle, the recognised lightning-bird of the Greeks[9]. Aischylos in an extant fragment of his *Niobe* makes Zeus himself declare:

'Yea, Amphion's house
Will I burn down with eagles bearing fire[10].'

[1] *Supra* p. 733 fig. 665.

[2] From a red-figured *kýlix* at Berlin (E. Gerhard *Griechische und etruskische Trinkschalen des königlichen Museums zu Berlin* Berlin 1843 p. 14 ff. pl. 8, 2 (interior: Selene), p. 20 ff. pl. 10—11 (exterior: *Gigantomachía*, part of which = my fig. 741), Overbeck *Gr. Kunstmyth.* Zeus p. 361 f. no. 14 Atlas pl. 4, 12 a, 12 b, Furtwängler *Vasensamml. Berlin* ii. 589 ff. no. 2293) attributed to 'the Brygos painter' (J. D. Beazley *Attic Red-figured Vases in American Museums* Cambridge Mass. 1918 p. 94, Hoppin *Red-fig. Vases* i. 124 no. 19), who was at work during the first third of *s.* v B.C. Zeus, in *chitón* and *chlamýs*, steps on to his four-horse chariot and quits Olympos (pillar), escorted by Herakles, with *tricot*-costume, *chitón*, lion-skin, bow, etc., and by Athena, who already spears Enkelados.

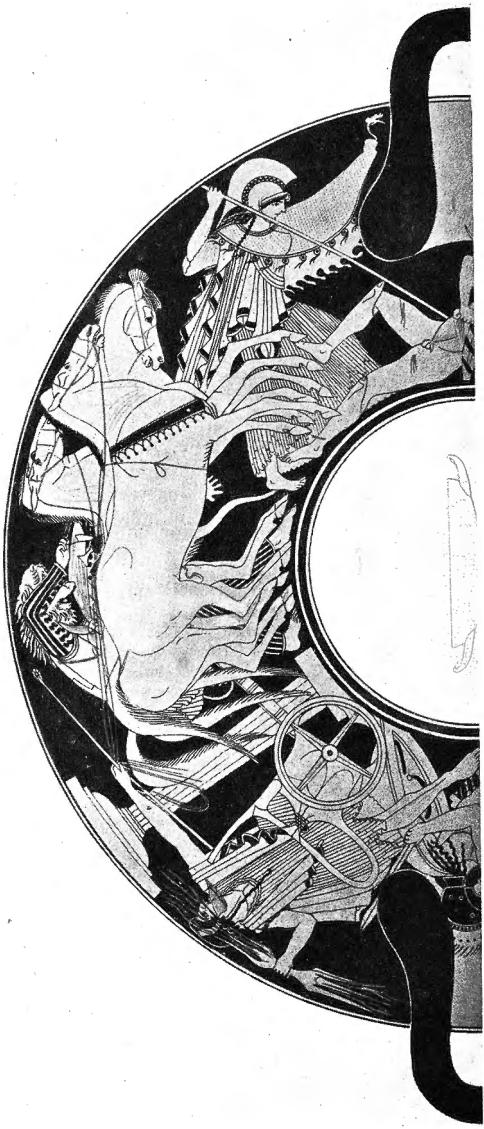

Fig. 741.

And H. Usener[1] rightly insisted that the phrase attests a long-standing popular belief. Those who regarded the eagle as the natural bringer of the lightning would of course take the wings of the thunderbolt to be eagle's pinions[2].

Thirdly, the central spike of the lotos came to be spirally twisted —a variation in shape which has been diversely explained. T. H. Martin[3], followed by G. Fougères[4], recalls the twist of tow wound round incendiary arrows. A. Conze and P. Jacobsthal[5] suggest a rendering of curled flames. P. Sarasin[6] contends that lightning in particular was often symbolised by a spiral line. Personally I suspect that lightning was from of old believed to strike with a screw-like or helical movement. This, as R. F. Crook[7] argues, is really implied by the Homeric epithet of Zeus, *terpikéraunos*[8], 'who twisteth the thunderbolt[9],' and its Virgilian equivalent, *cum fulmina torques*[10], 'when thou twistest thy bolt.' Such a belief might be strengthened by the occasional appearance of lightning in spiral form. As to this, Aischylos is explicit:

> Forth flash
> The lightning's fiery spirals[11].

And Mr C. T. R. Wilson, our first authority on the subject of electrical meteorology, tells me (Nov. 4, 1921) that he has himself seen lightning 'quite spiral.' But, be the explanation what it may, the spiral twine with its suggestion of rotatory, penetrating flight

became extremely popular in Hellenistic[1] and Roman times (*supra* i. 607 fig. 478, ii. 750 fig. 689, pl. xxxiv).

These three modifications of the lotos—flames, wings, and spiral twist—are all to be found on the wonderful series of silver coins struck by the temple-mints at Olympia (pl. xxxvi)[2]. The coins in question form the subject of an important monograph by C. T. Seltman, who has devoted a special section to their treatment of the thunderbolt[3]. It appears that the basis of the Olympian design was, from first to last, the duplicated lotos. Flame-lines, commencing as a detail on coins issued from *c.* 510 B.C. by the mint of Zeus (pl. xxxvi, 1 ff.), end by becoming the principal feature on coins issued from *c.* 421 B.C. by the mint of Hera (pl. xxxvi, 11 f.). Wings, which begin as a mere feathering of the calyx (pl. xxxvi, 1), develop into pinions of various shapes and sizes. The thunderbolt is, in fact, transformed before our eyes into a winged creature instinct with a life of its own. Now it spreads its glorious vanes like a

[1] *E.g.* on an Apulian *kratér* at Naples (Heydemann *Vasensamml. Neapel* p. 591 ff. no. 3256, E. Braun in the *Ann. d. Inst.* 1836 viii. 99 ff., *Mon. d. Inst.* ii pls. 30—32, Overbeck *Gr. Kunstmyth.* Zeus p. 182 ff. (N), Atlas pl. 1, 26 (Zeus only), C. Robert *Die Marathonschlacht in der Poikile und weiteres über Polygnot* Halle 1895 p. 36 ff. (omitting restorations), Reinach *Rép.* Vases i. 98—100).

[2] The arrangement of the coins on pl. xxxvi is not primarily chronological, but typological: nos. 1—4 = flower + flame + wings; nos. 5, 6 = two exceptional forms; nos. 7, 8 = closing wings; no. 9 = flower + flame, without wings; no. 10 = flower + wings, with flame reduced to a *minimum*; nos. 11, 12 = flames increased to a *maximum*. The specimens figured are the following:

Silver coins struck by the temple-mints at Olympia, showing various types of Thunderbolt.

See page 780 f.

butterfly in the sunlight (pl. xxxvi, 3). Now it half-closes them (pl. xxxvi, 7). Now again it furls them completely and relapses into rest (pl. xxxvi, 8). The wings, according to Seltman, are either those of Nike or those of a bird, usually of an eagle the lightning-bird, but sometimes perhaps of a swallow (pl. xxxvi, 2) the harbinger of rain[1]. The spiral twist is introduced soon after the middle of *s.* v B.C. It first affects the central spike of the lotos (pl. xxxvi, 3), but early in *s.* iv involves the wings and sepals as well (fig. 742), 'so that the thunderbolt may be thought of as spinning while it hurtles through the air[2].'

Two curious types discovered by Mr Seltman call for separate notice. A *statér* issued by the mint of Zeus between *c.* 471 and *c.* 452 B.C. makes the sepals on the upper half of the bolt curl over to form serpent-heads (fig. 743)[3]. These must be regarded as an

Fig. 742.

Fig. 743.

arbitrary, but not altogether inappropriate, variation of the tendrils, which on many specimens occupy a like position. If Aischylos could describe the arrow of Apollon as 'a winged glistering snake[4],' an artist contemporary with the poet might well conceive the thunderbolt of Zeus as in part serpentiform. The lord of the *aigís* had snakes enough and to spare.

Another *statér*, issued by the mint of Zeus *c.* 421 B.C., is of greater interest. The lower half of the bolt is here an unmistakable fly with head, eyes, body, wings, and legs complete (pl. xxxvi, 5). This is rightly, I think, interpreted by Mr Seltman[5] as an allusion to the local cult of Zeus *Apómyios*. Since the said cult has often been misunderstood, it is worth while to state the main facts concerning it. When animal sacrifices were offered in hot weather, flies of course arrived in swarms and fastened on the carcases. This

tended to disturb the ritual and was therefore undesirable. But to the superstitious Greek the buzzing myriads that claimed their share in the sacred feast seemed something of a divine visitation. If not the god himself[1], they might at least be his emissaries[2]. Biting flies meant coming storm[3]—and who could tell? The safest course was to placate the little pests. Accordingly the Leucadians, before celebrating the festival of Apollon *Áktios*, first sacrificed an ox to the flies[4]—an almost unique example of direct sacrifice to living animals on Greek soil[5]. Aelian tells us that the flies, when gorged with the blood of the ox, took themselves off, and contrasts their mercenary conduct with that of the flies at Olympia, which did the right thing through sheer respect for the god[6]. Olympic flies, it would seem, though countless victims were offered, blood poured out, and flesh hung up, yet retired discreetly across the Alpheios, returning only when the festival was over[7]. Aelian, being a pious priest, is fond of edifying conclusions[8]. Unfortunately Antiphanes the comedian, who lived five centuries and more before Aelian, had long since spoilt the moral: parasites—he says—ought to be treated like the uninvited flies at Olympia, for which an ox is cut up by way of preliminary sacrifice[9]. We gather, then, that in *s.* iv B.C. the Olympians, like the Leucadians, slew an ox for the special benefit of the flies. As time passed and men ceased to believe in the divinity of flies, their expulsion would be attributed to some local hero or god. Thus Pausanias informs us that the inhabitants of Aliphera in Arkadia, before keeping their festival of Athena (?), sacrificed to a hero *Myíagros*, the 'Fly-catcher[10].' Simi-

[1] I have suggested that Zeus became a fly in pursuit of Io (*supra* i. 532). Parallels are cited by J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1883 iii. 998 f. ('*Fly-shape*'), 1888 iv. 1604 f., G. Weicker *Der Seelenvogel* Leipzig 1902 p. 30 n. 3, M. Wellmann in Pauly—Wissowa *Real-Enc.* vi. 2745 f.

[2] In some parts of South Germany the stag-beetle is called *donnergwig*, *donnergüge*, *donnerpuppe*, perhaps because he likes to live in oak-trees, and it is believed that lightning will strike a house into which he is carried (J. Grimm *op. cit.* 1882 i. 183, 1883 ii. 692).

larly Pliny states that at the Olympic festival a bull was immolated to a god named Myiodes, after which clouds of flies departed from the locality[1]. Elsewhere he says that, when swarms of flies bring disease, the Eleans invoke a god called Myiacores and that, if he accepts their offering, the flies forthwith perish[2]. At Rome neither fly nor dog would enter the temple of Hercules in the Forum Boarium[3]; for the hero, on distributing the flesh of the sacrifice, had summoned the god Myiagrus, who kept the flies away, and had left his club in the porch, which frightened the dogs[4]. We are further told that the Romans sacrificed to Herakles *Apómyios*,

Fig. 744.

Fig. 745.

'Averter of Flies,' the Eleans to Zeus *Apómyios*[5]. Both Herakles and Zeus figure in the version preserved by Pausanias[6]:

'They say that Herakles the son of Alkmene, when sacrificing at Olympia, was worried by the flies. Thereupon it occurred to him, or perhaps somebody suggested to him, that he should sacrifice to Zeus *Apómyios*. And so the flies were sent packing across the Alpheios. The Eleans too are said to sacrifice in the same way to Zeus *Apómyios*, when they drive the flies out of Olympia.'

Thus by a strange, yet wholly understandable, *peripéteia* the sacrifice originally paid to the flies came ultimately to be paid to Zeus who drove them out[7].

Theriomorphism in the long run gives place to anthropomorphism, and the winged thunderbolts of Greek art lead up to a *quasi*-human form. Square bronze coins struck by Maues, a Scythic

[7] H. K. E. Köhler's attempt to identify '*Jupiter Apomyos*' on an engraved gem of the Orleans collection (Reinach *Pierres Gravées* p. 138 no. 59 pl. 126, E. Thraemer in Roscher *Lex. Myth.* i. 1153) was wholly misleading.

conqueror of the Greeks in northern India (? *c.* 130 B.C.), have for obverse design Zeus enthroned, holding a sceptre in his left hand and extending his right towards a small male figure, who seems to be an embodiment of the thunderbolt (figs. 744, 745)[1]. This humanised missile we may venture to name Keraunos[2].

Flames, wings, and spiral twist remained as characteristic traits of the thunderbolt throughout the classical period. Virgil[3] works all three into his description of Volcanus' smithy :

> Iron the Cyclops forged in that great cave—
> Brontes and Steropes and bare-limbed Pyracmon.
> Thereof their hands had wrought a thunderbolt
> Of such sort as the Sire oft hurls from heaven
> To earth, part burnished—part was yet to make.
> Three rays of twisted rain, three more of cloud,
> Three of red fire and the winged southern wind,
> They blent with flashes fell and sound and fear
> And fury with its still pursuing flames.

The Virgilian Cyclopes were fashioning their thunderbolt like armourers at work on some complicated engine of destruction. It was indeed natural that the sky-god's bolt should borrow some at least of its features from weapons wielded by human hands. In Italy and Sicily, as Jacobsthal[4] observed, the central spike of the lotos, and likewise the lotos-bud, developed into a dagger-blade (fig. 746)[5] or an arrow-head (fig. 747)[6]. Also in the same region half arrow-heads or hooks came to be added on the side spikes of the bolt (fig. 748)[7]. The earliest examples of such treatment are,

[1] P. Gardner in the *Brit. Mus. Cat. Coins* Greek and Scythic Kings pp. lviii, 70 pl. 16, 9, *id. Types of Gk. Coins* p. 210 pl. 14, 24 (=my fig. 744). In his description of both plates Prof. Gardner speaks of a 'female figure'; but in *Types of Gk. Coins* p. 210 he tacitly corrects his own blunder and says: 'we see a male figure, evidently an impersonation of the thunderbolt which is indeed not entirely transmuted into his form, but partly appears over his head and at his sides. This is a very interesting invention of the Indo-Greeks.' Fig. 745 is from another specimen in the British Museum.

[2] *Supra* p. 11 ff. Whether the naked boy with a torch, who on the Naples Prometheus-*sarcophagus* (Gerhard *Ant. Bildw.* i. 304 ff. pl. 61, Welcker *Alt. Denkm.* ii. 286 ff. pl. 14, K. Bapp in Roscher *Lex. Myth.* iii. 3108 f.) appears to be leaping down from the head of Zeus towards Hephaistos, is rightly regarded as the thunderbolt personified (so E. Petersen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1910 xxv. 126) is very doubtful.

(γ) The thunderbolt of Zeus and the trident of Poseidon.

The vase-painting just described raises a problem of considerable interest. Was the trident of Poseidon originally identical with the thunderbolt of Zeus?

It is commonly supposed that the trident was what Aischylos calls it—the 'fish-striking device' of a sea-god[1]. Indeed it can hardly be doubted that classical antiquity as a whole viewed the trident in this way[2]. But the point is not, what the Greeks and Romans of the classical age took the trident to be, but what it originally was. And here there is room for divergence of opinion.

In the middle of last century F. G. Welcker[3] argued that the trident, properly considered, was not a mere fish-spear, but rather a sign and symbol that Poseidon was lord over a third portion of the world. Welcker, who usually took a sane view of facts, has here been deserted by his better judgment. He is following the erroneous guidance of Plutarch and other allegorists of Graeco-Roman times[4].

H. B. Walters[5] in 1893 struck out a new line of investigation. Observing that Poseidon's trident, as represented on votive *pínakes* or terra-cotta tablets found at Penteskuphia near Corinth and referable to the period 650—550 B.C.[6], was often, especially on the earlier examples, shaped like a lotos, he inferred that the art-type of the trident had been developed out of the art-type of a lotiform sceptre. Poseidon—he suggested—was at first simply Zeus in his maritime aspect. Both deities were then entitled to bear the sceptre. But by a gradual process of differentiation Poseidon's sceptre was transformed into a trident, this transformation being prompted by another of the god's attributes, namely his tunny-fish. Thus the

p. 579 ff. pl. 3, 16, Reinach *Rép. Vases* i. 373, 2, Overbeck *Gr. Kunstmyth.* Zeus p. 260 ff.), because it appears to have been, not merely extensively restored, but fundamentally transformed. According to K. Wernicke (Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 1. 40 f. pl. 4, 1), its reverse showed originally three bearded men with long thorn-sticks: this commonplace *genre* scene the forger altered into a mythological group of deep significance, by giving each man a lotiform thunderbolt with dagger-blade ends, two of them a very suspicious lightning-flash, and the third a trident! Unfortunately the vase itself has disappeared, so that Wernicke's contention cannot be proved: still, it is all too probable, and the vase-painting must remain suspect.

evolution of Poseidon from Zeus was followed by the evolution of the trident from the sceptre. Two thorny questions are here intertwined—the relation of Poseidon to Zeus and that of the trident to

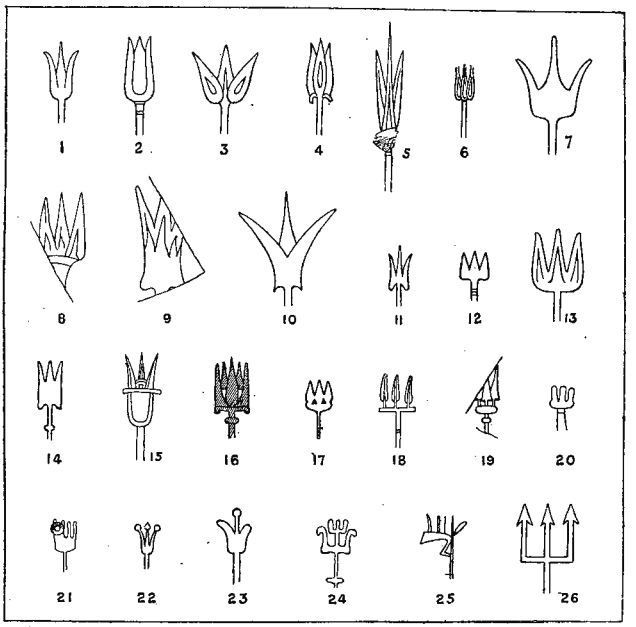

Fig. 750.

the sceptre. On the former and larger question I have already touched[1]. On the latter Mr Walters has got together a considerable array of evidence (fig. 750)[2]. But his facts, it seems to me, are

[1] *Supra* p. 582 ff.

[2] I reprint the illustration given by Mr Walters in the *Journ. Hell. Stud.* 1893 xiii. 17. Nos. 1—21 are taken from the Penteskuphia *pinakes* at Berlin, nos. 22—26 from vases in the British Museum:

L. Malten in the *Jahrb. d. kais. deutsch. arch. Inst.* 1914 xxix. 191 n. 2 says: 'Ursprünglich führt Poseidon das Feuersymbol in Blumenform..., ein Residuum davon z.B. noch auf den korinthischen Pinakes..., wo die florale Bildung der Poseidonwaffe nicht sekundäre Ornamentalisierung ist, sondern Rest der alten Blumenbildung.'

[2] *Supra* p. 769 ff.

as the lotos is concerned, no more cause to connect the trident with the sceptre than to connect it with the thunderbolt.

In 1898 O. Gilbert, undeterred by an emphatic protest on the part of C. Robert[1], announced that Poseidon's trident 'must be essentially identical with the lightning[2].' He pointed out that the *Iliad* describes Poseidon as—

> Holding in his stout hand a dread long-edged
> Sword like the lightning[3]—

and that the mark of Poseidon's trident to be seen on the Akropolis at Athens[4] is comparable with the *elýsia* or *enelýsia* caused by the lightning of Zeus[5]. H. Usener in 1905 likewise declared for the 'original identity of the Poseidonian trident with the thunderbolt[6].' He too quoted the lines from the *Iliad* and laid stress on the resemblance of the hypaethral[7] trident-mark at Athens to the hypaethral[8] *bidental* or lightning-monument of the Romans. Lastly he stated, on the authority of G. Loeschcke, that the weapon of Zeus is sometimes tridentiform[9]. Similar views were expressed in 1907 by the mythologist E. H. Meyer[10] and in 1909 by the historian E. Meyer[11].

[9] I suppose that Loeschcke had in mind the *kýlix* signed by Xenokles (*Brit. Mus. Cat. Vases* ii. 223 f. no. B 425, *supra* p. 785 fig. 749). H. Usener in the *Rhein. Mus.* 1905 lx. 27 n. 92 (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 494 n. 92) observes that on a coin of Taouion (Tavium) in Galatia (*Brit. Mus. Cat. Coins* Galatia etc. p. 27 pl. 5, 12, figured *infra* § 3 (c) iv (α)) Zeus holds 'dreizackigen Donnerkeil.'

[10] E. H. Meyer in Roscher *Lex. Myth.* iii. 2797 ('Dann fasst er (*sc.* Poseidon) seinen Dreizack, ein Sinnbild...des dreizackigen in eine Thunfischergabel umgestalteten Blitzes oder Sturmgeschosses').

[11] E. Meyer *Geschichte des Altertums*[2] Stuttgart—Berlin 1909 i. 2. 638 ('Als Attribut

In 1911 C. Blinkenberg[1] devoted a chapter to the subject and concluded that Poseidon's trident 'is an adaptation of the Hittite and Babylonian thunderweapon[2],' which entered Greece shortly after the Mycenaean age, that it was soon supplanted by the double form

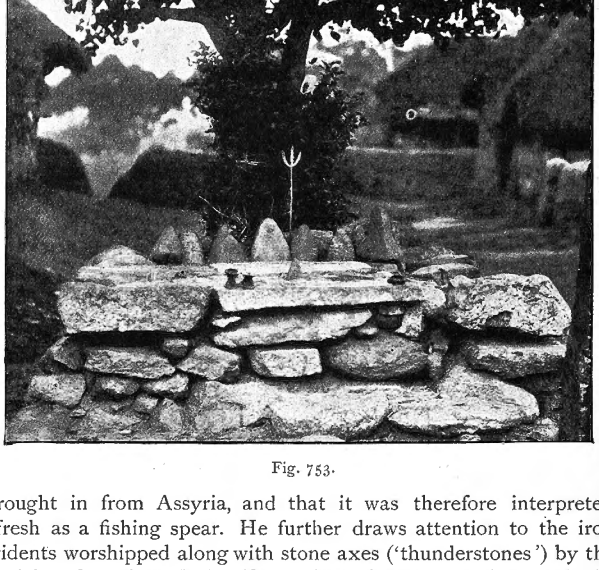

Fig. 753.

brought in from Assyria, and that it was therefore interpreted afresh as a fishing spear. He further draws attention to the iron tridents worshipped along with stone axes ('thunderstones') by the pariahs of southern India (fig. 753)[3], and compares them with the *trisula* or trident of Çiva, the post-Vedic successor of the Vedic

trägt er (*sc.* Zeus Osogô) den Dreizack, vielleicht erst unter griechischem Einfluss—oder ist etwa der Dreizack des Poseidon als sein Attribut nur aus dem Blitz umgedeutet?').

[1] C. Blinkenberg *The Thunderweapon in Religion and Folklore* Cambridge 1911 pp. 50—57.

[2] *Id. ib.* p. 55, cp. *ib.* p. 57: 'Briefly, then, the development was as follows:—from the old Babylonian representation of the lightning, *i.e.* two or three zigzag lines representing flames, a tripartite thunderweapon was evolved and was carried east and west from that ancient seat of civilization. Together with the axe (in western Asia Minor the double-edged and towards the centre of Asia the single-edged axe) it became a regular attribute of the Asiatic thundergods. The extreme limits of its extension are India in the east and Greece in the west. The Indian trisula and the Greek triaina are both its descendants.'

[3] *Id. ib.* p. 8 ff. figs. 1, 2 (=my fig. 753), 3, p. 55 f. The figure here reproduced shows an 'earth-temple' in a pariah quarter belonging to the village of Agrāvaram near Vellore. Dr Blinkenberg says: 'The actual altar is 2½ feet high, its surface 7½ × 9½ feet. On the altar are seen seven thunderstones... The trisula owes its white colour to the remains of

storm-god Rudra, as represented on coins of the Indo-Bactrian kings[1] (fig. 754)[2] and—I may add—as still to be seen in Çiva-shrines (fig. 755)[3]. That the trident of Poseidon was originally a lightning-fork, later re-interpreted as a fish-spear, is an opinion which has commended itself to an increasing number of scholars. C. Fries in 1911[4], Miss J. E. Harrison in 1912[5], L. Malten in 1914[6], O. Gruppe in 1918[7] and 1921[8], all accept this hypothesis, which—despite the efforts of reactionary criticism—continues to gain ground.

The arguments advanced in its support are not all equally valid. For instance, we must not, I think, attach importance to the passage cited from Homer; for it may refer to a sword of the usual pattern, not to a trident at all. More to the

the holy ashes (burnt cow-dung), of which something has been left from the last occasion of worship.'

point are the parallels adduced from the Indian area, where the association of iron tridents with 'thunderstones' is a very noteworthy fact. But most cogent of all is the analogy of the hypaethral trident-mark to the hypaethral *bidental*, and indeed the whole history of the Athenian Erechtheion.

The marks beneath its northern porch (fig. 756)[1] comprise

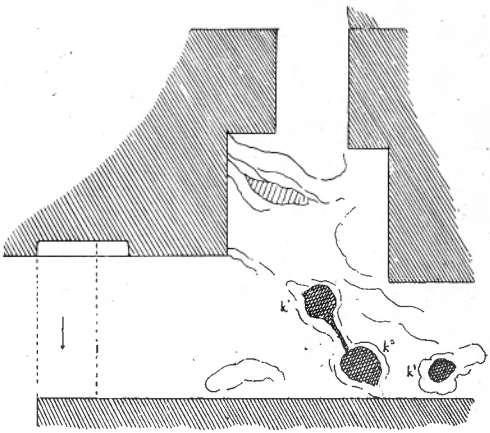

Fig. 756.

three small holes lying on a curve together with a fourth, larger and more irregular, at a little distance from them. These marks—I am disposed to conjecture—were originally a series of neolithic 'cup-marks[2].' If so, they are of peculiar interest as being the oldest traces of cult on the Athenian Akropolis. The exact significance of 'cup-marks' is unknown[3]; but it is noticeable that, wherever

[1] The plan given in the Πρακτικὰ τῆς ἐπὶ τοῦ Ἐρεχθείου ἐπιτροπῆς Athens 1853 pl. 3 is improved and completed by A. Michaelis in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 19 fig. 5 (=my fig. 756). Of the three trident-holes k^1 is 1·25^m deep, k^3 is 2·79^m, while k^2 is plugged at a depth of 0·70^m. These dimensions imply that the original 'cup-marks' had at some later time been bored much deeper to suit the trident-story. The Athenians were not above a γενναῖον ψεῦδος.

[2] Bibliography in J. Schlemm *Wörterbuch zur Vorgeschichte* Berlin 1908 pp. 500—504 figs a—d, J. Déchelette *Manuel d'archéologie préhistorique* Paris 1908 i. 618 n. 2. See also T. Rice Holmes *Ancient Britain and the Invasions of Julius Caesar* Oxford 1907 p. 205 n. 4.

[3] The Abbé Breuil suggested to me once in conversation that concentric circles with a prolonged radius may be highly stylised human figures, such as are met with in the neolithic and aeneolithic art of Spain (M. C. Burkitt *Prehistory* Cambridge 1921 pl. 38).

they occur, there is a tendency to explain them as the imprint of this, that, or the other superhuman power. P. Sébillot[1] has collected many cases of such popular interpretations. For example, at Pont-d'Aisy a 'cup-marked' stone is known as 'the Fairy's Kettle' or 'the Kettle of Giant Galaffre[2]'; and at Faux-la-Montagne the impress of the Devil's spoon and fork is yet visible on a dolmen where he dined[3]. Similarly the Greeks regarded these mysterious marks beneath the Erechtheion as the traces left by the trident of Poseidon, when he struck the Akropolis-rock and thereby created his 'sea[4].'

But Poseidon was not the first occupant of the Erechtheion. Before him, as H. Usener[5] showed, came Erechtheus, the true lord and owner of the building. And who was Erechtheus? Lykophron in one passage probably[6], in another certainly[7], uses *Erechtheús* as a synonym of Zeus. More than that, a learned *schólion* on the second passage states quite definitely that both at Athens and in Arkadia Zeus was called *Erechtheús*[8]. There is therefore much to be said for E. Petersen's contention[9] that *Erechtheús*, the 'Cleaver[10],' was in fact a lightning-god like Zeus *Kataibátes*[11], who during the fifth century B.C., if not earlier, was identified with Poseidon[12]. Two

[4] A good parallel is furnished by the sacred rock that juts up in the centre of the *Kubbet es-Sachra* in Jerusalem. Certain round holes, apparently 'cup-marks,' on its west side are said to be the finger-prints of the angel Gabriel: others of a like sort in the south-west corner are explained as the foot-prints of the prophet Muhammed (R. Kittel *Studien zur hebräischen Archäologie und Religionsgeschichte* Leipzig 1908 p. 19).

[5] H. Usener *Götternamen* Bonn 1896 p. 139 ff.

[7] Lyk. *Al.* 431 *τὸν δ' αὖ, τέταρτον ἐγγόνων* Ἐρεχθέως (*sc.* Idomeneus, son of Deukalion, son of Minos, son of Zeus).

[8] Schol. Lyk. *Al.* 431 Ἐρεχθεὺς γὰρ καλεῖται ὁ Ζεὺς ἐν Ἀθήναις καὶ ἐν Ἀρκαδίᾳ ἢ διὰ τὸ ὀρέξαι τὴν Ῥέαν τῷ Κρόνῳ λίθον ἀντὶ Διός, ἢ παρὰ τὸ ἐρέχθω τὸ κινῶ· δι' αὐτοῦ γὰρ οἱ σεισμοί. The association of Athens with Arkadia is noteworthy and points perhaps to a joint Pelasgian usage.

[9] E. Petersen *Die Burgtempel der Athenaia* Berlin 1907 pp. 61—93.

[10] H. Usener *op. cit.* p. 140 f. took the name to mean the 'Breaker' in the agricultural sense of a clod-'breaker': E. Petersen *op. cit.* understands it as the 'Render' or 'Cleaver' used of a lightning-god. In either case Ἐρεχθεύς is to be connected with ἐρέχθω (Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 155, Boisacq *Dict. étym. de la Langue Gr.* p. 277 f.).

[11] *Supra* p. 13 ff.

[12] See the inscriptions and texts cited by O. Jahn—A. Michaelis *Arx Athenarum* Bonnae 1901 p. 66 f. on Paus. 1. 26. 5. Erechtheus is already replaced by Poseidon in Hes. *frag.* 40 Flach, 101 Rzach[3] *ap.* Eustath. *in Il.* p. 13, 44 f. *ἦν δέ, φασι,* Βούτης *υἱὸς*

versions were current concerning Erechtheus' death. According to Euripides, he was slain by a blow of Poseidon's trident and hidden in a chasm of earth[1]. According to Hyginus, he was slain by a thunderbolt from Zeus at the request of Poseidon[2]. Hence Petersen concludes that Erechtheus was a figure essentially resembling 'Zeus-Amphiaraos, Zeus-Asklepios, Zeus-Trophonios[3]'; that the hypaethral opening in the Erechtheion floor was the chasm where he, the lightning-god, had entered the earth; and that this same chasm, on the advent of Poseidon, had been re-interpreted as his trident-mark[4]. The whole story thus becomes coherent, and I for one accept Petersen's reading of it—though I should stipulate that

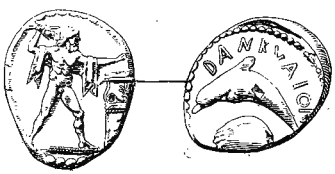

Fig. 757.

the epic Erechtheus was not a lightning-god, but a human king regarded as the lightning-god incarnate.

Now the transition from the cult of Erechtheus to that of Poseidon is much facilitated, if we may suppose that the latter, like the former, wielded the lightning,—that his trident, in short, was originally the thunderbolt.

So far, however, we have not met with any direct proof that Poseidon was a lightning-god. Once, and once only, in the extant remains of Greek art is he represented brandishing a bolt as though he were Zeus. A remarkable tetradrachm of Messana, formerly in the Hirsch collection and now at Brussels (fig. 757)[5], has for its obverse design a god wearing a *chlamýs* over his upper arms in the

Ποσειδῶνος, ὡς Ἡσίοδος ἐν Καταλόγῳ = Favorin. *ecl.* in W. Dindorf *Grammatici Græci* Lipsiae 1823 i. 361, 8 f. The oldest monumental evidence is that of a black-figured *amphora* by Amasis (*c.* 550—530 B.C.), now at Paris (De Ridder *Cat. Vases de la Bibl. Nat.* i. 129 ff. no. 222. Lenormant—de Witte *Él. mon. cér.* i. 254 ff. pl. 78), which shows Athena with her lance and Poseidon with his trident standing opposite to each other in peaceful attitudes. E. Petersen *op. cit.* p. 65 observes that the scene presupposes reconciliation after the contest at the Erechtheion—'also Poseidon statt des Erechtheus.'

Historical Greek Coins* London 1906 p. 32 n. 1 ('Poseidon'), G. Macdonald *Coin Types* Glasgow 1905 p. 143 f. pl. 5, 12 ('Poseidon'), Head *Hist. num.*[2] p. 154 fig. 82 ('Poseidon (?)').

manner of Poseidon and striding forward to a decorated altar with uplifted thunderbolt in the attitude of Zeus. Since the great god of Messana was Poseidon, not Zeus, we should interpret this unique type as Poseidon fulminant—an interpretation confirmed by the dolphin and scallop-shell of the reverse side. On grounds of style and *motif* the coin has been assigned to the middle of the fifth century B.C. Sir A. J. Evans[1] justly inferred from its legend *Danklaton* that, about the year 450, the old Zanclaean elements in the

Fig. 758.

Fig. 759.

Fig. 760.

Fig. 761.

population of Messana must have succeeded in regaining for a while their predominance: naturally they restored the earliest name of the town and, along with it, their former coin-types of the dolphin and the scallop. Now Zankle was an ancient foundation of the Sikels[2]. Here then, if anywhere, we should look to find Poseidon in his earliest form. And here we do find him with a thunderbolt, not a trident, in his hand—a god who bears a significant resemblance to Zeus[3].

[1] Sir A. J. Evans *loc. cit.*

[2] Thouk. 6. 4, Steph. Byz. *s. v.* Ζάγκλη.

[3] Coins of Poseidonia (*e.g.* Garrucci *Mon. It. ant.* p. 178 pl. 121, 29, 30, 31 = my figs. 762—764) show Poseidon brandishing his trident and Zeus brandishing his thunderbolt in precisely the same attitude. The resemblance is suggestive, though not of course conclusive.

Fig. 762.

Fig. 763.

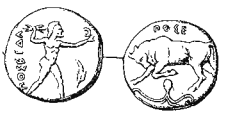

Fig. 764.

Garrucci says of the last piece: 'Nettuno qual Giove fulminante a d. dinanzi un delfino, a sin. ΠΟΣΕΙΔΑ.' *Id. ib.* p. 176 f. pl. 120, 8 wrongly infers from an early drachm

Different in character from this early representation are the attempts made occasionally throughout the classical period to equip

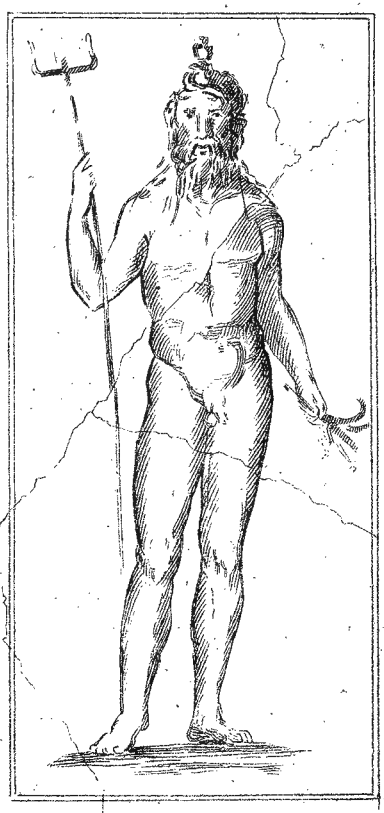

Fig. 765.

Poseidon with the attributes of Zeus, attempts possibly prompted by the lingering belief that the former was fundamentally akin to

inscribed ΠΟΜ ΟϟΔ that Poseidon is actually dubbed Διὸ(ς) (ἄγαλμα). Why not read Ποσσοιδ(ᾶν)? Cp. Babelon *Monn. gr. rom.* ii. 1. 1431 f. no. 2132 with n. 3, and F. Bechtel *Die griechischen Dialekte* Berlin 1921 i. 350 f.

the latter. Thus silver coins of Troizen, struck *c.* 400—322 B.C., duplicate the trident-head so that it looks much like a thunderbolt

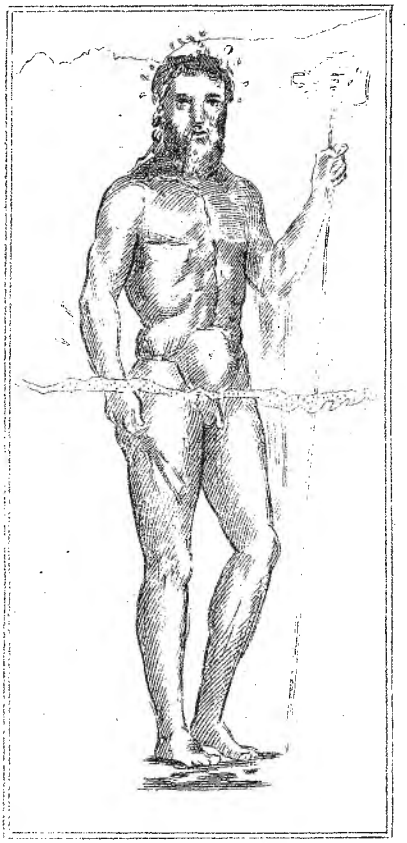

Fig. 766.

(fig. 758)[1]. The duplication was, however, presumably intended *in primis* to show that the coins were diobols. Certain rare coppers of

[1] *Brit. Mus. Cat. Coins* Peloponnesus p. 166 pl. 30, 21 (=my fig. 758) and 22, Head *Hist. num.*[2] p. 443.

Byzantion, issued *c.* 221 B.C., figure Poseidon erect with a trident in his left hand, but Nike crowning the magistrate's name in his right (fig. 759)[1]. A chalcedony scarab of late Etruscan style, formerly in the Dehn collection (fig. 760)[2], portrays an unbearded god, with a *himátion* over his left arm, in the act of stepping into a chariot. He grasps a thunderbolt in his right hand, and a trident in his left, while at his feet is a small sea-monster. The fusion of Poseidon with Zeus is complete. Similarly on a brown paste at Berlin (fig. 761)[3] we see the equivocal Zeus-Poseidon holding the thunderbolt in his right hand, the trident in his left, with an eagle perched before him. Finally, two deities painted in the Augustan house near the *Villa Farnesina* are—if we may trust Mau's publication (figs. 765, 766)[4]—perhaps to be described as Poseidon with the thunderbolt of Zeus (?) and Zeus with the trident of Poseidon (??)[5].

(δ) The thunderbolt of Zeus and the fork of Hades.

Zeus had a thunderbolt, and Poseidon a trident. It is sometimes contended that Hades, as his corresponding weapon, had a fork or two-pronged spear. But neither the existence nor the significance of this attribute is free from serious doubt, and some of our more cautious mythologists are inclined to dismiss it as altogether fictitious[6]. The evidence therefore must be scrutinized with care.

In the first place it may be conceded that weapons of the sort were not unknown in the Mediterranean area. Apart from mere

[6] *E.g.* Gruppe *Gr. Myth. Rel.* p. 1182 n. 2.

forks of bone[1] or bronze[2], and from forked spear-butts of bronze[3], a double-pointed spear-head of copper was found in the sepulchral deposit of Hagios Onuphrios near Phaistos[4], and a double-pointed lance is held by a Lycaonian warrior carved on the *stéle* of Ikonion[5].

Again, a weapon of this type figures in Greek mythology. Lesches the Lesbian, who wrote the *Little Iliad* about the middle of *s.* vii B.C., described the spear of Achilles as of similar make :

> The ring of gold
> Flashed lightning round, and o'er it the forked blade[6].

Aischylos in his *Nereids* said of the same weapon :

> The shaft, the shaft with its double tongue, will come[7].

And Sophokles mentioned it in his *Lovers of Achilles* :

> Or the two-mouthed striker, the spear ;
> For it rent him—the twofold pang
> Of the spear that Achilles bore[8].

The hero had been taught to use this engine by Peleus, and Peleus in turn by Cheiron[9],—a pedigree which points to Thessaly as its home. It is then not inappropriate that Kastor, depicted on a black-figured *amphora* from Corneto as advancing side by side with Peleus against the Calydonian boar, plunges a two-pronged spear into the monster's head[10].

[1] R. Munro *The Lake Dwellings of Europe* London, Paris, and Melbourne 1890 p. 157 fig. 39, 12, L. Savignoni in the *Mon. d. Linc.* 1903 xiii. 93 f. fig. 6 (from a pile-dwelling on the Mondsee, Austria).

[2] C. A. de Bode in *Archaeologia* 1844 xxx. 250 pl. 16, 11, L. Savignoni *loc. cit.* p. 93 fig. 5 (from a *tumulus* near Asterabad at the S.E. corner of the Caspian Sea).

[3] Sir W. M. Flinders Petrie in the *Journ. Hell. Stud.* 1890 xi. 273 ('spear-heads...of the forked form' from graves at Nebesheh dated *c.* 650—500 B.C. and regarded as those of the Carian mercenaries of Psammetichos), *id. Tools and Weapons* London 1917 p. 33 pl. 39 f., 182 ff. ('forked butts'). An example in the Fitzwilliam Museum, Cambridge, described on the label by Sir W. M. Flinders Petrie as a two-pronged spear, is almost certainly a spear-butt.

alia supplied Aithra's face and painted out half of Poseidon's trident-head! In view of this shameless tampering we cannot put much trust in an early publication of a bronze coin struck by Domitian at Nysa in Lydia, which purports to show Plouton, fork in hand, carrying off Persephone upon a four-horse chariot (fig. 769)[1].

Fig. 768.

The type is common enough on the coinage of Lydia[2]; but Plouton, where his attribute can be made out, regularly carries a sceptre, not a fork. I do not doubt that the specimen figured below has been tooled by some unscrupulous hand.

On Greek soil, then, there is no relevant evidence. It remains to enquire whether Italy is equally barren.

E. Braun in 1837 drew attention to the fact that Rafael and

[1] Morell. *Thes. Num. Imp. Rom.* ii. 485 ('Neptunus...rapiens Nympham Amymonem') pl. 21, 28.

[2] See *Brit. Mus. Cat. Coins* Lydia p. 393 Index, F. Imhoof-Blumer *Lydische Stadtmünzen* Genf—Leipzig 1897 p. 209 Index.

other painters represented Pluto with a two-pronged fork in his hand, and conjectured that this detail must have been taken from ancient monuments since lost[1]. F. G. Welcker in 1851[2], and again in 1857[3], confirmed his opinion, citing definite works of renaissance art in which Pluto is so portrayed[4]. These scholars and others following in their steps were also able to name a certain number of would-be classical monuments in support of their contention. But a more rigorous criticism would have curtailed or cancelled the list. Thus a statuette of Italian marble in the Pio-Clementino collection shows Pluto enthroned: he wears on his head a *modius* decorated with oak-leaves and acorns; he has at his right side a three-headed Cerberus, and in his left hand a two-pronged fork. But, as Visconti indicates, the fork together with the hand that holds it is a modern restoration[5]. Again, a desk-shaped terra cotta at Woburn Abbey has its slanting surface adorned with three bearded heads wearing the *modius*: they are characterised as Poseidon, Zeus, and Plouton by the attributes added below on the front—a trident, a thunderbolt, and a two-pronged fork. Beneath the thunderbolt is an inscription in raised letters:

Fig. 769.

Diis propi-	To the propitious gods
M· Herennii	of Marcus Herennius.
vivatis	Long life to you[6].

Replicas of this curious monument have been reported from Vienna[7], Paris[8], and Würzburg[9]. Unfortunately their genuineness is far from established[10]. Finally, a two-pronged fork figures among the amulets on a Tarentine cake-mould in the British Museum[11]. O. Jahn, who published this mould in 1855, thought that the fork might be a symbol of Hades, but regarded it as doubtful[12].

[12] O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1854 p. 52 n. 93 pl. 5, 3.

The failure of the proofs so far considered throws into relief the one valid piece of evidence that has been adduced[1]. At Urbs Salvia (*Urbisaglia*) in Picenum there came to light in 1853 portions of an ancient Roman aqueduct. Near it the year after were found four *tegulae mammatae*, which seem to have been used as covering tiles for the channel. When placed in position they had been painted, apparently by some encaustic process, with a series of figures representing, from left to right, Iuno (?), Iupiter, Minerva, and Victoria. To judge from the style, these deities were referable to early imperial times. And there can be little doubt that they were intended to protect the water of the aqueduct against all contamination. We are concerned only with the central figure of the Capitoline triad (fig. 770). Iupiter, with a violet mantle draped over his ochre body, confronts us fairly bristling with weapons: he has a thunderbolt and a trident in his left hand, and a two-pronged fork in his right, while a dolphin appears at his side. Clearly he is conceived as sky-god (thunderbolt), sea-god (trident, dolphin), and earth-god (fork) rolled into one—a deity competent to keep all evil at a distance. He is accompanied by the inscription IOVE · IVTOR ·, 'to Iupiter *the Helper*[2].'

J. Schmidt, to whom we are indebted for the first publication of this interesting tile, thinks[3] that Iupiter as earth-god got his fork from the Etruscan Charon[4]. But O. Waser in his monograph on Charon recognises no such attribute[5]. We cannot even admit the contention of J. A. Ambrosch that at least one Etruscan sepulchral relief equips a demon of the Underworld with a pitch-fork[6]. The ecclesiastical paintings of the middle ages did so[7]. But the alleged Etruscan example is illusory: the supposed fork is merely a flaming torch[8]. Again, we shall hardly venture to connect

[1] G. Schmidt 'Tre mattoni dipinti di Urbisaglia' in the *Ann. d. Inst.* 1880 lii. 59—73, *Mon. d. Inst.* xi pl. 17, 1—3, *Class. Rev.* 1904 xviii. 374 fig. 6. Length 0.47^{m}; breadth 0.31^{m}; thickness 0.05^{m} (nos. 1, 2), 0.045^{m} (no. 3).

[2] Th. Mommsen in *Corp. inscr. Lat.* ix no. 5531, followed by Dessau *Inscr. Lat. sel.* no. 3031, reads *Iove Iutori*. But Schmidt *loc. cit.* p. 63 n. 2 is positive that he has transcribed the lettering with absolute accuracy. In any case *Iove Iutor(i)* must be taken as a dative case: cp. *Corp. inscr. Lat.* xi no. 4766, 11 f. = Dessau *op. cit.* no. 4911, 11 f. (near Spoletium) *Iove bovid | piaclum datod, ib.* 15 f. *Iovei bovid piaclum | datod.*

[3] Schmidt *loc. cit.* p. 67 f.

cuto in cima,' on a red-figured *kratér* noted by G. Henzen in the *Bull. d. Inst.* 1856 p. 41 f. is not Plouton with a forked sceptre (*id. ib.* p. 42 n. 1, F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 632), but Hermes with his *caduceus*, perhaps wrongly inscribed [HΦA]ICTO[C].

Iupiter with the Getic Gebeleizis, whose name conceivably meant 'the god with a Fork[1].' Still less shall we maintain that he took over this implement from the fork-bearing figures of early Sardinia[2]. For most of these little bronzes are demonstrable forgeries[3].

Brushing aside such inadequate hypotheses, we approach the problem along other lines. The Etruscans believed in lightnings that sprang from the ground (*fulgura inferna*[4], *fulmina infera* or *terrena*[5]), wielded presumably by some chthonian deity[6]. And C. O. Thulin, the chief modern exponent of their lightning-lore, argues that the Etruscan word for 'lightning' was rendered by the Latin *bidens*[7]. Antecedently that is probable enough. 'Forked lightning,' as we call it, might well be represented by a lightning-fork. Moreover, the Romans, who in all matters of divination relied upon the wisdom of Etruria, habitually spoke of a place struck by lightning as *bidental*[8]. Hence H. Usener infers that they must have symbolised the flash as a *bidens* or 'two-pronged

[1] *Supra* p. 227 n. 4. For a better reading and rendering of the Getic name see *infra* p. 822 f.

It may at first sight seem rash to suppose that a chthonian god was ever armed with atmospheric terrors. But some at least of the Greek philosophers—in particular, Herakleitos, Aristotle, and Poseidonios—held that lightning was primarily due to telluric exhalations (O. Gilbert *Die meteorologischen Theorien des griechischen Altertums* Leipzig 1907 pp. 627 ff., 629 f., 634 ff.), thereby anticipating, not only the belief in electrical interaction between earth and sky, but also the part played by evaporation in modern theories of lightning (*id. ib.* p. 637). Besides, these philosophers, after their manner, were merely elaborating popular opinion. Greek literature makes frequent mention of chthonian thunder (Aisch. *P.v.* 993 f., *Edonoi frag.* 57, 10 f. Nauck[2], Soph. *O.C.* 1606, Eur. *El.* 748, *Hipp.* 1201, Aristoph. *av.* 1747, 1752. J. P. Mahaffy, as quoted by J. E. Harry on Eur. *Hipp.* 1201, states that '*βρόντειον* is used by the modern Boeotians of a mountain north of Thebes which constantly makes a rumbling sound.' See also *infra* § 4 (d) Zeus Βροντῶν), and Greek art on occasion treats lightning as the attribute of such chthonian powers as the Kyklopes (*supra* i. 318 f. figs. 252, 253) or Typhon (The three-bodied monster, from the right half of an archaic pedimental group, found on the Akropolis at Athens, holds in two of his left hands an attribute which has been variously interpreted: see G. Dickins in the *Catalogue of the Acropolis Museum* Cambridge 1912 i. 78 ff. no. 35. The most probable view is still that of Collignon *Hist. de la Sculpt. gr.* i. 208 'une sorte de foudre.' Good illustrations in Perrot—Chipiez *Hist. de l'Art* viii pl. 3, T. Wiegand *Die archaische Poros-Architektur der Akropolis zu Athen* Cassel and Leipzig 1904 pl. 4, R. Heberdey *Altattische Porosskulptur* Wien 1919 pl. 3, 2 and pl. 4).

[7] C. O. Thulin *op. cit.* p. 96 f., quoting A. Caecina *ap.* Sen. *nat. quaestt.* 2. 49. 1 dentanea (*sc.* fulgura), quae speciem periculi sine periculo adferunt.

[8] G. Wissowa in Pauly—Wissowa *Real-Enc.* iii. 429 ff.

fork[1].' True, several of the ancient grammarians expressly derive the term *bidental* from the fact that sheep (*bidentes*) were sacrificed on the spot[2]. But that explanation is rejected by Pomponius Porphyrio[3] (*s.* iii A.D.); and the learned scholiast on Persius couples it with another, namely, that the thunderbolt itself had two teeth[4]. Probably sheep with their two prominent fore-teeth[5] were sacrificed at the *bidental* just because their peculiarity connected them in the sacerdotal mind with the two-toothed lightning.

In short, it would appear that Iupiter on the Picentine tile has borrowed his *bidens* from an Etruscan god of the Underworld—the Etruscan bident being the exact counterpart of the Greek trident[6] in its original character of lightning-fork. If we may assume, as we are almost certainly entitled to do, that the Etruscans themselves hailed from Lydia, it becomes highly probable that the bident of Italy and the trident of Greece were respectively descended from the bipartite and tripartite forms of Mesopotamian lightning[7].

(*e*) Zeus *Keraunobólos, Keraúnios; Astrapaîos, Astrápton.*

As lord of the lightning Zeus was saluted by the poets with a variety of sounding epithets, which need not here detain us[8].

[1] H. Usener in the *Rhein. Mus.* 1905 lx. 22 (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 490).

A Greek parallel perhaps underlies Aristoph. *av.* 1239 f. ὅπως μή σου γένος παν-ώλεθρον | Διὸς μακέλλῃ πᾶν ἀναστρέψῃ Δίκη with schol. *ad loc.* τοῦτό φησι παρὰ τὸ Σοφόκλειον "χρυσῇ μακέλλῃ Ζηνὸς ἐξαναστραφῇ," where Fritzsche's ingenious cj. ἐν Χρύσῃ is accepted by A. Nauck (Soph. *frag.* 659) and A. C. Pearson (Soph. *frag.* 727 Jebb). Retaining the text with W. Dindorf (Soph. *frag.* 767), we may adopt the suggestion of F. Ellendt *Lexicon Sophocleum* Regimontii Prussorum 1835 ii. 48 '*fulmen* intellexit coruscum cum ligonis dentibus comparatum.' Mr A. D. Nock suggests to me (Dec. 15, 1921) that Aristophanes was thinking rather of Aisch. *Ag.* 525 f. Τροίαν κατασκάψαντα τοῦ δικηφόρου | Διὸς μακέλλῃ, τῇ κατείργασται πέδον, or possibly of both the Aeschylean and the Sophoclean passages. As to the shape of a μάκελλα opinion varied: Apollon. *lex. Hom.* p. 109, 33 μάκελλαν δίκελλαν, κακῶς· ἔστι γὰρ τὸ πλατὺ σκαφεῖον, Hesych. *s.v.* μακέλλη· δίκελλα. πλατὺ σκαφίον..., Phot. *lex. s.v.* μάκελλα· δίκελλα, Souid. *s.v.* μάκελλα· δίκελλα, schol. Arat. *phaen.* 7 μάκελλα δὲ ἡ μονόθεν κέλλουσα ἤγουν τέμνουσα, δίκελλα δὲ ἡ διχόθεν = Eustath. *in Il.* p. 1235, 56 f.

[2] Paul. ex Fest. p. 33, 10 f. Müller, p. 30, 17 ff. Lindsay, P. Nigidius Figulus *de extis frag.* 39[a] Funaioli *ap.* Non. Marc. p. 75, 23 f. Lindsay, Fronto *de diff. vocab.* p. 523, 24 f. Keil.

[4] Schol. Pers. *sat.* 2. 27.

[5] F. Olck in Pauly—Wissowa *Real-Enc.* iii. 427.

[6] Bident and trident are sometimes exchanged. Sen. *H. f.* 564 ff. makes Hades attack Herakles with a trident (*telum tergemina cuspide praeferens*). *En revanche* the late schol. Augustan. *in* Eur. *Phoen.* 188 arms Poseidon with a bident (τρίαινά ἐστι τὸ δόρυ < οὗ (ins. L. C. Valckenaer) > τὸ ἓν σίδηρον ὀρθόν, τὸ δὲ ἕτερον στρεβλόν).

[7] *Supra* p. 764 ff.

[8] Gruppe *Gr. Myth. Rel.* p. 1111 n. 3 has collected examples of the following: ἀργικέραυνος, κεραύνειος, κεραυνοβρόντης, τερπικέραυνος; ἀστεροπήτης, ἀστράπιος, στεροπη-γερέτα, φοινικοστερόπας.

Of greater moment are the titles of similar meaning sanctioned by actual cult; for these afford proof that the zoïstic conception of Zeus as the downward-flashing bolt passed into the anthropomorphic conception of him as hurler of the same. Thus Mantineia in Greek times worshipped Zeus *Keraunós*, 'the Thunderbolt[1].' But Tegea in Roman times worshipped Zeus *Keraunobólos*, 'the Hurler of the Thunderbolt[2].'

As the somewhat vaguer[3] god 'of the Thunderbolt' (*Keraúnios*) Zeus was recognised in literature[4] and had numerous cults from Palmyra in the east to Rome in the west[5].

(14) Argos (P. Roussel—J. Hatzfeld in the *Bull. Corr. Hell.* 1909 xxxiii. 510 no. 27 a small round altar of marble inscribed in late lettering Διὸς | Κεραυ|νίου).

(15) Olympia (Paus. 5. 14. 7 ἔνθα δὲ τῆς οἰκίας τὰ θεμέλιά ἐστι τῆς Οἰνομάου, δύο ἐνταῦθά εἰσι βωμοί, Διός τε Ἐρκείου—τοῦτον ὁ Οἰνόμαος ἐφαίνετο αὐτὸς οἰκοδομήσασθαι—, τῷ δὲ Κεραυνίῳ Διὶ ὕστερον ἐποιήσαντο ἐμοὶ δοκεῖν βωμόν, ὅτ' ἐς τοῦ Οἰνομάου τὴν οἰκίαν κατέσκηψεν ὁ κεραυνός).

(16) Alban Mt (*Inscr. Gr. Sic. It.* no. 1118 Διὶ Κεραυνίωι on a rude altar found at the foot of the mountain).

(17) Rome (P. Gauckler in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1907 p. 148 ff. records an altar in white marble (height 0·92^{m}), found in the grove of Furrina on the east slope of the Ianiculum, adorned with two eagles, two Ammon-masks, two *bucrania*, festoons, ewer, *patera*, *Gorgóneion*, etc. and inscribed Διὶ | Κεραυνίῳ | Ἄρτεμις | ἡ καὶ Σιδωνία | Κυπρία | ἐξ ἐπιταγῆς | ἀνέθηκεν | καὶ Νύνφες (*sic*) | Φορρίνες (*sic*), *i.e.* a dedication to Zeus Κεραύνιος and the Nymphae Forrinae by a Phoenician woman of Kypros, called Artemis the Sidonian. The Gorgon's head perhaps symbolises the *Forrinae* assimilated to the *Furiae*. See further G. Wissowa in Pauly—Wissowa *Real-Enc.* vii. 383).

(18) Sicily (*Inscr. Gr. Sic. It.* no. 2407, 3*a*—*d*: see *infra* p. 812 ff.).

Of these the most instructive is that of Seleukeia in Syria, the port of Antiocheia. Here—says Appian[1]—Seleukos i Nikator, when founding the city, followed the guidance of a thunderbolt, regarding it as a 'Zeus-sign' (*Diosemía*)[2]. He therefore bade the citizens treat the thunderbolt as a god: which they did, worshipping it with ritual and hymns. Probably the object of their veneration was an actual bolt wrought of gold, like those that were borne along in the great pageant of Ptolemy ii Philadelphos[3]. In favour of this supposition is the fact that at Seleukeia in the reign of Seleukos iv

Fig. 771.

Fig. 772.

Philopator (187—175 B.C.) certain priests were annually appointed to act as *keraunophóroi* or 'thunderbolt-bearers[4].' Silver and bronze coins of Seleukeia from *c.* 108 B.C. onwards have as their reverse type (fig. 771) a large thunderbolt bound with a fillet and placed on a cushioned stool[5]. That this was the missile of Zeus *Keraúnios* appears, not only from a gloss in Hesychios[6], but also from sundry bronze coins on which the same type is accompanied by the name of the god (fig. 772)[7].

With these coins of Seleukeia must be compared bronze pieces of Diokaisareia in Kilikia, struck by Iulia Domna (figs. 773, 774)[1] and M. Iulius Philippus the younger[2]. Their reverse type shows a high-backed throne: its foreposts are surmounted by two lions, and on its box-like seat is a winged thunderbolt erect in a *quasi*-human attitude. The lions suggest that Zeus had here taken over the throne of the Anatolian mother-goddess[3] or her consort[4]. And the thunder-

Fig. 773.

Fig. 774.

bolt was appropriate, not only to Zeus, but also to the reigning representative of the *gens Iulia*[5].

H. Usener has collected analogous designs from the coinage and sculpture of the west[6]. A silver coin of Vespasian issued in the year 77 or 78 A.D. represents a winged thunderbolt lying on a draped stool[7]. This has been regarded[8] as an allusion to Vespasian's rebuilding of the temple of Iupiter *Capitolinus*[9], which contained a golden thunderbolt of fifty pounds' weight presented on the advice of the *decemviri* in 217 B.C.[10] But the type probably hints that Vespasian himself was Iupiter's vicegerent[11]. Titus in 80 A.D. issued gold[12] and silver coins with the same design (fig. 775)[13]. Trajan, a

Galatia, etc. p. 276 no. 56 Caracalla pl. 33, 6 (=my fig. 772) gives a different description of the type ('Large thunderbolt of Zeus Keraunios resting on roof of shrine [within which, sacred stone of Zeus Kasios?]') and is followed by Head *Hist. num.*[2] p. 783, Anson *Num. Gr.* iv. 57 no. 587 pl. 11: CЄΛЄVK ... [ZЄV]C KЄPAVNIOC.

Ant.* ii. 1610 fig. 3624 (with inscription ACIPE (?) for *accipe*, retrograde; found in Spain, and probably used in the war of Caesar against Pompey, cp. *bell. Hisp.* 13 and 18), fig. 3628 (with inscription ΔΕΞΑ[Ι], cp. *Corp. inscr. Gr.* iv no. 8529, a; found on the Akropolis at Athens), *British Museum: A Guide to the exhibition illustrating Greek and Roman Life* London 1908 pp. 99, 105 no. 220 fig. 86 (with inscription ΖΩΙΛΟΥ; found on the battle-field of Marathon), and many others listed by C. Zangemeister 'Glandes plumbeae Latine inscriptae' in the *Ephemeris epigraphica* 1885 vi p. xlv *s.v.* '*fulmen*.'

as king[1] with purple robe, silver sceptre, and regal diadem[2] was a Cilician by birth, and had perhaps brought the cult of the lightning-god with him from Asia Minor.

In view of the foregoing examples it may be maintained that the Graeco-Roman age witnessed, not indeed a recrudescence of the old zoïstic conception of Zeus *Keraunós*[3], but the rise and spread of a new theistic conception—that of Zeus *Keraúnios*, a deity too sublime to be represented in human form[4], whose potency might yet be inferred from the shape of his dreaded weapon. In a word, the thunderbolt, once a primitive fetish, had become, not merely the attribute of a human, but the symbol of a superhuman, power.

At Tegea in Arkadia there have from time to time been found numerous small four-sided pillars of Doliana marble, capped in each case by a diminutive pyramid and often inscribed with the

[1] Appian. *Mithr.* 59.

[2] Flor. 2. 7. 10.

[3] A fragmentary relief from Emesa (*Homs*), now at Brussels (F. Cumont *Catalogue des sculptures & inscriptions antiques* (*monuments lapidaires*) *des Musées Royaux du Cinquantenaire*[2] Bruxelles 1913 p. 68 ff. no. 55 fig.: height 0·41 m, breadth 0·32 m), represents a series of at least four Syrian deities, from left to right—(*a*) a divinity of whom one foot only remains; (*b*) a god in Roman military costume, with a spear in his right hand, a thunderbolt (?) in his left, and a rayed *nimbus* round his head; (*c*) a veiled goddess, with a javelin or sceptre in her left hand, a necklace round her throat, and an oval shield partly hidden by her head; (*d*) a god in oriental military costume, with a lance in his right hand, a circular shield on his left arm, and a turban (?) round his head. Above (*c*) and (*d*) are the dedications ΑΘΗΝΑ and ΚΕΡΑΥ|ΝΩ. Below (*a*)—(*d*) runs a longer inscription: [- - - -]λῳ, Ἰαρεβώλῳ, Ἀγλιβώλῳ, καὶ Σε[. . . .] | [- - - -] ὑπὲρ σωτηρίας αὐτοῦ κὲ τ[ῶν ἰδίων]. This has been variously completed. S. Ronzevalle in the *Rev. Arch.* 1902 i. 387 ff. and in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1902 p. 235 ff. with pl. (=my fig. 780), 1903 p. 276 ff. proposes: [θεοῖς πατρῴοις Βήλῳ, Ἰαριβώλῳ, Ἀγλιβώλῳ καὶ Σεμ[ιράμει]. | [ὁ δεῖνα τοῦ δεῖνος] ὑπὲρ σωτηρίας αὐτοῦ κὲ τ[ῶν τέκνων (?) ἀνέθηκεν]. Semiramis is here the goddess Semea or Sima, on whom see O. Höfer in Roscher *Lex. Myth.* iv. 660 ff. R. Dussaud in the *Rev. Arch.* 1903 i. 143 f., 1904 i. 206 ff., *id. Notes de mythologie syrienne* Paris 1903 p. 104 ff. fig. 27 (=Reinach *Rép. Reliefs* ii. 163 no. 3), *id. Les Arabes en Syrie avant l'Islam* Paris 1907 p. 130 ff. fig. 28 suggests: [θεοῖς πατρῴοις Βήλῳ Ἰαριβώλῳ, Ἀγλιβώλῳ | Ἀθηνᾷ, Κεραυνῷ | καὶ Σε[μίᾳ] | [ὁ δεῖνα τοῦ δεῖνος] ὑπὲρ σωτηρίας αὐτοῦ κὲ τ[ῶν τέκνων]. F. Cumont *loc. cit.* would read: [θεοῖς πατρίοις Μαλαχβήλ?]ῳ, Ἰαρεβώλῳ, Ἀγλιβώλῳ καὶ Σε[μίᾳ] [ὁ δεῖνα τοῦ δεῖνος] ὑπὲρ σωτηρίας αὐτοῦ, (*sic*) κὲ τ[ῶν ἰδίων], but hesitates between Μαλαχβήλῳ, Βήλῳ, and Ἐλαγαβάλῳ. He would identify (*b*) with *Iarhibol*, 'Lord of the Months,' an originally lunar but later solar god of Palmyra (*id.* in Pauly—Wissowa *Real-Enc.* ix. 750 f.), (*c*) perhaps with Seimia, and (*d*) possibly—but not very probably—with some form of *Ba'al* heading the dedication. Amid much that remains uncertain it is clear that Keraunos is here conceived as a god of military aspect, equipped with lance and shield,—a great advance upon primitive zoïsm.

[4] See, however, *supra* p. 808 n. o no. (13).

name of a god or goddess[1]. The oldest of the series is the fifth-century pillar of Zeus *Storpâos* (fig. 781)[2], whose appellative denotes the god 'of the Lightning-flash[3].'

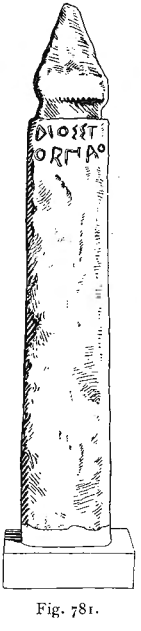

Fig. 781.

Another form of the same title was *Astrapaîos*, applied to Zeus both in literature[4] and in cult. His worship is attested for Bithynia by inscriptions of the second century A.D.[5] At Antandros in Mysia he had a festival lasting more days than one[6]. At Athens there was a hearth (*eschára*) of Zeus *Astrapaîos* on the city wall between the Pythion and the Olympion: here, for three days and nights in each of three successive months, the Pythaïstai watched a place near Phyle known as the Chariot (*Hárma*); if they saw a flash of lightning above it, they had to send a certain sacrifice to Delphoi[7]. The custom must

[7] Strab. 404 *ὡς δ' αὖτως καὶ τὸ Ἅρμα, τῆς Ταναγραϊκῆς κώμη ἔρημος περὶ τὴν Μυκαληττόν, ἀπὸ τοῦ Ἀμφιαράου ἅρματος λαβοῦσα τοὔνομα, ἑτέρα οὖσα τοῦ Ἅρματος τοῦ κατὰ τὴν Ἀττικήν, ὃ ἐστι περὶ Φυλήν, δῆμον τῆς Ἀττικῆς ὅμορον τῇ Τανάγρᾳ. ἐντεῦθεν δὲ ἡ παροιμία τὴν ἀρχὴν ἔσχεν ἡ λέγουσα "ὁπόταν δι' Ἅρματος ἀστράψῃ," ἀστραπήν τινα σημειουμένων κατὰ χρησμὸν τῶν λεγομένων Πυθαϊστῶν, βλεπόντων ὡς ἐπὶ τὸ Ἅρμα καὶ τότε πεμπόντων τὴν θυσίαν εἰς Δελφούς, ὅταν ἀστράψαντα ἴδωσιν· ἐτήρουν δ' ἐπὶ τρεῖς μῆνας, καθ' ἕκαστον μῆνα ἐπὶ τρεῖς*

have been an ancient one, for it had already passed into a proverb in the fifth century B.C.[1] Indeed, it not improbably dates back to the time when Zeus the lightning-god was lord of Pytho[2]. Apollon, who took over so much from his predecessors[3], may well have retained the ominous flash of Zeus[4]. As to the ritual of the ensuing sacrifice, inscriptions of the second and first centuries B.C. tell how Pythaïstai of various noble families took first-fruits from Athens to Delphoi, and brought back a sacred tripod on a chariot, together with a priestess called the Fire-bearer[5]. The rites thus practised in

ἡμέρας καὶ νύκτας, ἀπὸ τῆς ἐσχάρας τοῦ Ἀστραπαίου Διός· ἔστι δ' αὕτη ἐν τῷ τείχει μεταξὺ τοῦ Πυθίου καὶ τοῦ Ὀλυμπίου. B. Niese 'Apollodors Commentar zum Schiffskataloge als Quelle Strabo's' in the *Rhein. Mus.* 1877 xxxii. 267 ff. showed that Strabon drew his information from Apollodoros' note on the Boeotian Harma (*Il.* 2. 499) in his work *περὶ νεῶν καταλόγου*. Strabon in turn was the source of Steph. Byz. *s.v.* "Αρμα and Eustath. *in Il.* p. 235, 44 ff., p. 266, 33 ff.

[1] *Frag. com. anon.* 110 (*Frag. com. Gr.* iv. 631 f. Meineke) *ap.* Hesych. *ἀστράψῃ διὰ Πυκνός· ἀντὶ τοῦ δι' "Αρματος.* The subject of *ἀστράψῃ*, as Meineke saw, is probably Perikles in his character of human Zeus: cp. Aristoph. *Ach.* 530 f.

The proverb is recorded by Zenob. 1. 37 (cod. M) *ὅταν δι' "Αρματος ἀστράψῃ· ἡ παροιμία εἴρηται ἐπὶ τῶν χρονίως γινομένων· ἐπειδὴ Ἀθηναῖοι εἰώθασι πέμπειν εἰς Δελφοὺς θυσίαν, τηρήσαντες ἀστραπὴν ἀπό τινος τόπου φανεῖσαν, ὃν "Αρμα προσαγορεύουσιν* (cp. Souid. *s.v.* "Αρμα, Hesych. *s.vv. ἀστραπὴ δι' "Αρματος* and *δι' "Αρματος*, Bekker *anecd.* i. 212, 16 f.), who is known to have epitomised the proverbs of Didymos and Loukillos of Tarrha (Souid. *s.v.* Ζηνόβιος, cp. schol. Aristoph. *nub.* 134). It is used by Plout. *symp.* 5. 5. 2 *οἱ γὰρ σπανίως καὶ "δι' "Αρματος," ὥς φασιν, ἐστιῶντες κ.τ.λ.*

[2] *Supra* pp. 179 f., 186 ff., 231 ff., 267.

[3] *Supra* pp. 231, 266.

[4] Lightning was occasionally connected with Apollon (Gruppe *Gr. Myth. Rel.* p. 1226 n. 1): see *e.g.* Eur. *Ion* 285 *τιμᾷ σφε* (*sc.* the Long Cliffs on the N. side of the Akropolis at Athens) *Πύθιος ἀστραπαί τε Πύθιαι*; Apollod. 1. 9. 26 *πλέοντες δὲ νυκτὸς σφοδρῷ περιπίπτουσι χειμῶνι. Ἀπόλλων δὲ στὰς ἐπὶ τὰς Μελαντίους δειράς, τοξεύσας τῷ βέλει εἰς τὴν θάλασσαν κατήστραψεν. οἱ δὲ πλησίον ἐθεάσαντο νῆσον, τῷ δὲ παρὰ προσδοκίαν ἀναφανῆναι προσορμισθέντες Ἀνάφην ἐκάλεσαν. ἱδρυσάμενοι δὲ βωμὸν Ἀπόλλωνος Αἰγλήτου καὶ θυσιάσαντες ἐπ' εὐωχίαν ἐτράπησαν* (cp. Ap. Rhod. 4. 1701 ff., Orph. *Arg.* 1353 ff.). Coins of Axos in Crete, struck in *s.* iv. B.C., have *obv.* head of Apollon, *rev.* tripod; but from *c.* 300 B.C. onwards the head of Apollon is replaced usually by a head of Zeus, and the tripod sometimes gives place to a thunderbolt, sometimes has a thunderbolt resting upon it (*Brit. Mus. Cat. Coins* Crete etc. p. 14 f. pl. 3, 12, 17, J. N. Svoronos *Numismatique de la Crète ancienne* Mâcon 1890 p. 40 pl. 3, 10 and 11, cp. p. 38 pl. 3, 1, Head *Hist. num.*[2] p. 459). Similarly a copper of Antiochos xi Epiphanes (? Antiochos viii Grypos) has *rev.* a winged thunderbolt resting on a tripod (*Brit. Mus. Cat. Coins* Seleucid Kings of Syria p. 99 pl. 26, 7).

the Hellenistic age—the offering of first-fruits, the carrying of the tripod, and the fetching of need-fire—were doubtless a later revival of earlier usage. But the only fifth-century evidence is Aischylos' allusion to 'the road-making sons of Hephaistos' as expounded by the scholiast, who informs us that sacred processions from Athens to Delphoi were headed by men bearing double axes[1]. The weapon, whatever its precise usage in the ceremony, confirms us in the impression that we have here to do with an ancient cult of Zeus.

Near Laodikeia Katakekaumene in Lykaonia Zeus was worshipped under the fuller title 'He that Thunders and Lightens[2].' The combination of these alternative epithets is unusual, but occurs again on an oblong altar of Roman date found in Thera[3].

(ζ) Zeus *Zbelsoûrdos*.

G. Seure, who during the last five and twenty years has done more than any man to help forward the study of Thracian archaeology, published in 1913 a whole series of monuments relating to the cult of Zeus *Zbelsoûrdos*, and added an important discussion of

his name and nature[1]. The monuments in question comprise seven reliefs, two coins, and three votive inscriptions.

Of the reliefs there are three distinct types. The first, represented by five examples[2], shows a bearded god, usually clad in a

Fig. 782.

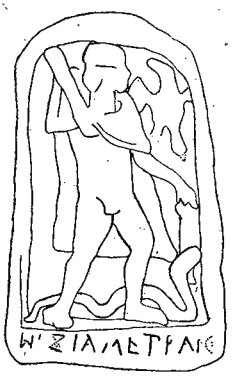

Fig. 783.

chlamýs, advancing from left to right with a thunderbolt in his raised right hand and an eagle on his outstretched left arm. Beneath his left hand there is a pillar (figs. 782, 783) or altar (fig. 784), and at his

[1] G. Seure 'Les images thraces de Zeus Kéraunos ΖΒΕΛΣΟΥΡΔΟΣ, ΓΕΒΕΛΕΙΖΙΣ, ΖΑΛΜΟΞΙΣ' in the *Rev. Ét. Gr.* 1913 xxvi. 225—261.

[2] (1) Relief in white marble, at Sofia (G. Seure *loc. cit.* p. 226 f. fig. 1), inscribed ΡΘΜΙSΡΔ (?), of which the only traces now legible are ⌊∠ of the last two letters. The original reading may have been [Ζιβε]ρθ[ιού]ρδ[ω] (*id. ib.* p. 242 n. 3): cp. *infra* p. 821 f. Nude bearded (?) god, brandishing bolt (?) in raised right hand and extending left arm, on which an eagle is perched, over a four-sided pillar. Height: 0·16m.

(2) Marble relief from *Pascalevetz* near Nikopolis in Moesia, now at Sofia (Reinach *Rép. Reliefs* ii. 157 no. 1 (=my fig. 782), G. Seure *loc. cit.* p. 228 f. fig. 2), inscribed Σούρα εὐχήν. Bearded god, with *chlamýs*, brandishing bolt in raised right hand and extending left arm, on which an eagle is perched, over a pillar (probably not a tree). At his feet, a snake. Height: 0·20m.

(3) Marble relief from *Samovoden* near Nikopolis in Moesia, now at Sofia (G. Seure in the *Rev. Arch.* 1908 ii. 52 f. no. 53, *id.* in the *Rev. Ét. Gr.* 1913 xxvi. 229 f. fig. 3 (=my fig. 783)), with an inscription, which was read by Dobrousky as Δι[ΐ] Ζιαμέγρα, by Seure first as Δι[ΐ] Ζιαμέτρα and later as [θε]ῶι Ζιαμέτρ[α]λις with *compendium* of αλ. Bearded god, with *chlamýs*, brandishing club-like bolt in raised right hand and extending left arm, over which is an eagle, to touch a pillar with moulded top. At his feet, a snake. Height: 0·205m.

(4) Marble relief from *Biéla Tcherkva* near Nikopolis in Moesia, now at Sofia (G. Seure in the *Rev. Arch.* 1908 ii. 75 no. 5, *id.* in the *Rev. Ét. Gr.* 1913 xxvi. 231 ff. fig. 4), uninscribed. Bearded god, with *chlamýs*, brandishing bolt in raised right hand and

feet two of the reliefs give a gliding snake (figs. 782, 783). In the main this type is clearly adapted from a common Hellenic scheme, that of Zeus advancing to the attack[1]. Accordingly, its least barbaric

Fig. 784.

example (fig. 784) is accompanied by the dedication 'To Zeus *Zbelthioûrdos*.'

The second type, of which there is but one specimen (fig. 785)[2],

extending left arm, on which an eagle is perched, to touch a pillar. At his right side, on a smaller scale, stands a draped female figure. Height: 0·17m.

(5) Marble relief from *Bouzadjilar* in the district of *Sliven*, now at Sofia (S. Reinach in the *Bulletin archéologique du comité des travaux historiques et scientifiques* 1894 p. 425 f. pl. 20, 1 (=my fig. 784), P. Perdrizet in the *Revue des études anciennes* 1899 p. 23 no. 2, G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 235 f. fig. 6), inscribed Διὶ Ζβελθιούρδ[ω] | Μοκάπορις δῶρον. Zeus, bearded and wearing *himátion*, stands towards the right, with a twisted bolt in his raised right hand and an eagle on his extended left, beneath which is a small rectangular altar. Height: 0·35m.

[1] *Supra* p. 739 ff.

[2] Marble relief from *Soukhatché* in the district of *Bièla Slatina*, now at Sofia (G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 233 ff. fig. 5 (=my fig. 785)), uninscribed. Height: 0·19m.

shows the same god still brandishing his bolt, but mounted on a two-horse chariot, which carries also a draped and veiled goddess. She holds in both hands attributes hard to determine—in her right perhaps two ears of wheat (? a *cornu copiae*), in her left perhaps a long torch (? a sceptre). The chariot is preceded by the snake, of which the tail alone is visible. This relief, despite its extreme clumsiness, is again composed of Hellenic elements, the *motif* of Zeus fulminant in a chariot with a snaky tail before him being

Fig. 785.

probably drawn from the Gigantomachy[1]. And here it is of interest to remember that in the neighbourhood of Constantinople thunder is nowadays attributed to St Elias, who drives his chariot across the sky in pursuit of a dragon, and that the modern Greek as like as not will say 'The lightning is chasing the snakes[2].'

The third type, again represented by a single relief (fig. 786)[3], shows the Thracian god once more in the guise of a Greek Zeus[4], a nude, bearded figure facing us with sceptre held high and lowered

[1] For an analogous case see *supra* p. 82 f.

[2] *Supra* i. 183.

[3] Marble relief, found in 1875 near the church of S. Eusebio at Rome, *i.e.* on a part of the Esquiline where foreign troops, including Thracians, had their barracks, and now to be seen in the Palazzo dei Conservatori (R. Lanciani in the *Bull. Comm. Arch. Comun. di Roma* 1880 viii. 12 no. 157.pl. 1 (=my fig. 786), Matz—Duhn *Ant. Bildw. in Rom* iii. 146 no. 3771, P. Perdrizet in the *Revue des études anciennes* 1899 p. 24 no. 4, G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 236 ff. fig. 7, Reinach *Rép. Reliefs* iii. 203 no. 3), inscribed *θεῷ Ζβερθούρδῳ καὶ Ἰαμβαδούλῃ ἐπιφα|νεστάτοις Αὐρ(ηλιος) Διονύσιος στρατ(ιώτης) χώ(ρ)της | τοῦ πραιτ(ωριανοῦ) ἑκατοντάρχ(ου) Φλωρεντίνου θέλω[ν] | ἀνέθηκα=Inscr. Gr. Sic. It.* no. 981. After *χώ(ρ)της* there is space for a missing numeral.

[4] *Supra* p. 749 ff.

bolt. But this time he is grouped with a younger god on horseback, recognisable by his effeminate limbs and abundant hair. G. Seure does not hesitate to name him Dionysos, a hypostasis or by-form of the Thracian rider. He points out that the relief was dedicated by one Dionysios (*nomen omen*) 'to the god *Zberthoûrdos* and to *Iambadoúles*'—a title which recalls the horse-riding Dionysos, 'the

Fig. 786.

god *Asdoúles*,' of the Brussels relief[1]. I may add[2] that the curious tradition of *Iámbe* the *doúle*[3] or 'slave,' who beguiled Demeter by her jokes and is herself described as a Thracian[4] or a Bacchant[5], was not improbably founded on a misunderstanding of this cult-epithet.

The coins of Serdike and Pautalia in Thrace adduced by Seure[6] are only variants of a wide-spread numismatic type[7] and do not

[1] *Supra* p. 270 n. 3.

[2] Since this paragraph was penned I find that I have been anticipated in the suggestion by Seure himself (*Rev. Ét. Gr.* 1913 xxvi. 257 n. 4).

[7] *Supra* p. 743 n. 7.

increase our knowledge of the Thracian god. But the inscriptions[1] contribute other spellings of his name: Zeus *Zbelsoûrdos*[2], Zeus *Zlethoûrdos*[3], the god *Zberturdus*[4].

The name is presumably a compound. But attempts to fix its meaning are precarious. Tomaschek[5] thought that the first element was akin to the Lithuanian *žaîbas*, 'lightning,' *žiburỹs*, 'light, torch,' etc. and might denote either 'brilliance' or 'lightning.' For the second he suggested some connexion, near or remote, with the Slavonic *sver-d-*, 'to twist, to bore.' On this showing we should, I suppose, obtain a Thracian equivalent of *terpikéraunos*[6]. Baron Nopcsa believes that Zibel-*Thiurdos* lives on in Šn *Šurdh*, 'Saint Deaf' (*surdus*), whom he describes as the storm-god of the modern Albanians[7]. G. Seure[8], with far greater circumspection, argues that the original form of the Thracian name was **Zibelesoûrdos*, which by a double syncopation became *Zbelsoûrdos*. He finds the same first element in *Zibeleîzis*, a well-attested variant[9] of the Getic *Gebeleîzis*[10], and urges that **Zibelesoûrdos*, *Zibeleîzis*, and *Zalmóxis* were three of the epithets attached to the great national god of Thrace, a Zeus-like deity whose name is unknown[11]. The second element *Soûrdos* he regards as the patronymic of *Soûras* (*Soúris*, *Surus*, *Surio*), pointing out that on one of the reliefs already mentioned (fig. 782) the name *Soûra* may possibly be that of the god[12], and emending a disputed sentence of Cicero's accordingly[13].

[1] G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 242 f.

[2] A statue of Domitian erected by a trierarch of the Perinthian fleet was dedicated Διὶ Ζβελσούρδῳ (A. Dumont—T. Homolle *Inscriptions et monuments figurés de la Thrace* Paris 1876 p. 381 no. 72 a). But the Ashburnham MS. of Ciriaco de' Pizzicolli (Cyriacus of Ancona), to whom we owe the preservation of this title, reads ΔII ZIBEΛCOYPΔωI (Th. Mommsen in the *Ephem. epigr.* 1877 iii. 236 no. 8).

[3] A votive column, found at *Chaprovo* near *Doubnitza*, is inscribed in coarsely cut letters ΔIIZΛC|ΘOYPΔω| *τῶ κυρίω* | Βολβαβρι|ηνοὶ κω|μῆται ἀνέθη|καν (G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 242, 247).

[12] Σούρα, if nominative, is the dedicator; if genitive, the dedicator's father; if dative, the god to whom the dedication is made.

[13] In Cic. *in Pis.* 85 a te Iovis Velsuri fanum antiquissimum barbarorum sanctis-

These tentatives, however, are at best unconvincing. Indeed, scientific etymology is hopelessly handicapped by our comparative ignorance of the Thracian tongue. But, if the name of the god escapes us, his nature does not. Zeus *Zbelsoûrdos* was at once a sky-power and an earth-power—witness on the one hand his thunder-bolt, on the other his snake. His consort was a goddess perhaps akin to Demeter or to Semele. His offspring was *Iambadoúles*, Dionysos in the likeness of the Thracian rider-god[1]. For further knowledge we must be content to wait till Thrace yields up more of her buried secrets.

Thus much I had written, in some despondency, when I received (Jan. 24, 1922) a most encouraging communication from Mr B. F. C. Atkinson of Magdalene College, Cambridge. Knowing him to have made a special study of things Illyrian, I had challenged him to furnish me with a possible derivation of *Zbelsoûrdos*.

I append his reply: 'With regard to the variant form *Zibel-* of the first part of this compound, it has occurred to me'—he says—'that we may have here simply the root *div-* with suffix *-el-*. There is some reason to believe that original unaspirated voiced stops became in the Thracian and Illyrian dialects spirants; and it is reasonable to suppose that *zeta* was the symbol used by the Greeks to represent this sound (similar to the initial sound of English *then*), which did not normally occur in most Greek dialects. If this is the explanation of the *zeta* used in the Elean dialect in words such as *zíkaia*, *zé* (in three early inscriptions), where *delta* would be normal, we have a parallel use of the sound and of the symbol *zeta* to express it. We may compare the much later similar development of *delta*, which is a spirant in Modern Greek. As to the suffix *-el-*, I suggest that *Zibel-* is a parallel form to *Iûvil-*as, several times occurring in dedicatory inscriptions in Campania (vd. Conway *Italic Dialects* i. 101 ff.). The use of *beta* to express a *w-* or *v*-sound is of course comparatively common.

simumque direptum est Turnebus cj. *Iovis* [*vels*] *Uri*<*i*>, J. H. Mordtmann in the *Rev. Arch.* 1878 ii. 302 cj. *Iovis* <*S*>*velsur*<*d*>*i*; G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 243 ff., 249 divides *Iovis vel Suri*—a restoration more ingenious than probable.

[1] This conception of Dionysos may account for the use of the word ἥρως as applied to him in the chant of the Elean women (*carm. pop.* 5 Hiller—Crusius *ap.* Plout. *quaestt. Gr.* 36 ἐλθεῖν, ἥρω Διόνυσε, | κ.τ.λ.). My former attempt to re-cast the line (in Miss Harrison's *Themis* Cambridge 1912 p. 205 n. 1 ἐλθεῖν ἦρ', ὦ Διόνυσε, | κ.τ.λ.) was, I now think, ill-advised.

Since Dionysos was essentially a younger form of his own father (*supra* p. 287 ff.), it is not surprising to find that the word ἥρως attached to the older god likewise: (1) *Corp. inscr. Lat.* iii no. 7534=Dessau *Inscr. Lat. sel.* no. 4063 (Tomoi) I. O. M. | Heroi | Q. Trebellius | Q. f. (F)ab. Maxi|mus Roma, | 7 leg. V Mac. | trecenarius | coh. III pr. | v. s. (2) G. Seure in the *Rev. Ét. Gr.* 1913 xxvi. 239 n. 10 (Pannonia) I. O. M. Heroni.

This leaves the second half of the compound still to be determined[1]. But it may be observed that it strengthens the conjecture [*supra* p. 277 ff.] that the Thracian form of the name of Zeus was **Di(v)-os.*'

v. The whip of Zeus.

Dr Rendel Harris in a brief but important chapter[2] collects evidence from China, India, and Wallachia of lightning conceived as a whip. He holds that the same conception has left traces of itself in Greek mythology, but does not quote some definite statements, which might be adduced from Greek authors.

Kapaneus, when attacking the Electran gate of Thebes, defied Zeus and compared his lightning to mere midday heat[3]. Thereupon Zeus struck him down with a thunderbolt. The incident was notorious; but Lykophron[4] the pedant adds interest to it by describing Kapaneus as lashed with a lightning-whip:

> The third[5] is son of him who undermined
> With his rude mattock the Ectenian[6] towers.
> The Thunderer[7], Adviser[8], God of Mills[9],

[1] Mr Atkinson subsequently supplied me with a '*Further Note on* Ζβελσοῦρδος. The second part of the compound presents greater difficulty owing to the variant readings. It is hard to resist the conclusion that the sound represented now by σ, now by θ, is the unvoiced dental spirant. The ι which is supposed by some to be present after the θ is, I understand, a doubtful factor. Seure (*Revue des Études Grecques*, 1913 p. 247) rejects it, and thus simplifies matters, making the form a variant between *-σουρδος* and *-θουρδος*. If the initial sound is the unvoiced dental spirant, the form may well be connected with the root appearing in Sanskrit as √*tṛd*, *tṛṇatti*, which is commonly used of Indra "splitting" or "cleaving" with his bolt (*e.g.* vájreṇa khány atṛṇan nadīnām = "with his bolt he split open the clefts of the waters," RV II. 15). The root *tṛd* is commonly supposed to be an extension of the root *tṛ*, I-E. *√*ter*, seen in Greek *τείρω*, *ἔτορε*, Lat. *tero*, *terebra*, etc. The Thracian change of *t* to þ, though not resting upon any established or tested sound-law, is not inconsistent with other evidence, scanty as it is, and we may compare the similar change in Avestan especially under the influence of a liquid. If this etymology is well-founded, we thus have as the meaning of the whole compound "Zeus," or "the son of Zeus, the Splitter" (referring of course to the thunderbolt).'

[4] Lyk. *Al.* 433 ff. *τρίτον δέ, τοῦ μόσσυνας Ἐκτήνων ποτὲ | στερρᾷ δικέλλῃ βουσκαφήσαντος γόνον, | ὃν Γογγυλάτης εἶλε Βουλαῖος Μυλεύς, | ἀγηλάτῳ μάστιγι συνθραύσας κάρα, | ἥμος ξυναίμους πατρὸς αἱ Νυκτὸς κόραι | πρὸς αὐτοφόντην στρῆνον ὤπλισαν μόρου.* The version printed above is by G. W. Mooney.

[5] Sthenelos, son of Kapaneus.

[6] The Ἔκτηρες were the first inhabitants of Thebes, their king Ogygos being autochthonous (Paus. 9. 5. 1).

[7] Mooney follows C. von Holzinger, who on the strength of Hesych. *γογγυλεῖν* (C. G. Cobet cj. *γογγύλλειν*)· *συστρέφειν* (M. Schmidt cj. *συστρέψειν*) translates 'Blitzeschleuderer.' Tzetz. *ad loc.* says *ὁ Ζεὺς ὁ Γογγυλάτης, δι' οὗ αἱ γογγύλαι καὶ συνεσφιγμέναι χεῖρες κινοῦνται*—a desperate guess. In all probability (*supra* p. 260) Γογγυλάτης was a local appellative from * Γογγύλη, the 'Round' Rock or Island (cp. Στρογγύλη = *Stromboli*), a site as yet unidentified.

[8] *Supra* p. 258 n. 3.

[9] *Supra* p. 260 *sub fin.*

Crushed in his head with his avenging scourge,
What time Night's daughters[1] armed with fell desire
The father's brothers[2] to shed brother's blood.

The scholiast[3], commenting on Lykophron's word 'scourge,' remarks simply: 'he means "with his thunderbolt."'

Oppian[4] (*c.* 170 A.D.) describes a storm at sea in similar terms:

Beneath the scourge of Zeus etherial fire
Strikes the sea-farer's keel, and the burning stroke
Devours it, while the sea blent with dread flames
Still higher tosses and still onward drives.

Again the scholiast[5] observes: '"scourge," that is, "thunderbolt."'

Now learned poets of the Hellenistic age would hardly have ventured upon such a locution, unless they had (or fancied they had) some warrant for it in earlier Hellenic poetry. Accordingly we find Hesychios noting the Homeric phrase 'by the scourge of Zeus' and carefully explaining that this means 'by the thunderbolt[6].' Unfortunately his explanation is wrong. The phrase occurs twice in the *Iliad*, and in neither passage is there the least allusion to a thunderstorm[7]. The fact is, Homer's language was already old, and this particular expression even in his day had lost much of its original force. 'The scourge of Zeus,' scholiasts[8] and lexicographers[9] notwithstanding, was the merest metaphor for the driving power of the god. For all that, the phrase must have arisen at a time (? Early Iron Age) and in a place (? Thessaly) when and where Zeus was conceived as the driver of a celestial chariot. His cracking whip made the lightning; his echoing wheels, the thunder. Salmoneus, who during the Early Iron Age came from Thessaly to Elis[10], was an adept at the self-same art.

A vague remembrance of Zeus the charioteer with his lightning-lash clings about the tradition of his primeval contests. In representations of the Gigantomachy we frequently see him fulminant on a four-horse chariot[11]. More than that, his lightning-lash was not

forgotten by poets who told of his fight with Typhoeus. Homer[1] himself works it into the *simile* with which he concludes the list of the Greek combatants before Troy:

> They marched as though the land were all devoured
> With fire. Earth groaned beneath them as when Zeus
> In anger twists his bolt and plies his lash
> About Typhoeus—him who lies abed
> (Men say) i' the land of Arima. Even so
> Beneath their feet, as on they came, earth groaned,
> And speedily they passed across the plain.

Hesiod[2], relating the same myth, is even more explicit:

> Zeus armed his might and all his weapons took,
> Thunder and lightning and fierce levin-bolt,
> Sprang from Olympos, struck, and blasted all
> The wondrous heads of the monster. He at length
> Laid low by strokes of the lash fainted and fell
> Maimed of his power, and monstrous earth made moan.

This old belief in the whip of the lightning-god accounts for a curious dedication in the precinct of Zeus *Nάios*. According to Aristotle[3], there was at Dodona a couple of columns, which supported respectively a caldron (*lébes*) and a boy (*paîs*) grasping a whip. The bronze lashes of the whip, when swayed by the wind, struck the caldron and produced a reverberant sound. Strabon[4], probably following Apollodoros[5], adds that the whip was dedicated by the Corcyraeans, that it consisted of three chains tipped with buttons, and that you could count four hundred before the echo died away. Now Sir James Frazer has conjectured that the Dodonaean gong was 'meant to mimick the thunder that might so often be heard rolling and rumbling in the coombs of the stern and barren mountains which shut in the gloomy valley[6].' If so, the Corcyraean whip, which lashed its silence into sound, was an equally vivid and appropriate emblem of the lightning.

[5] See *Journ. Hell. Stud.* 1902 xxii. 12.

[6] Frazer *Golden Bough*[3]: The Magic Art ii. 358 f. Sir James Frazer's further conjecture (*ib.* p. 358 n. 4) that 'the bronze statuette...would represent Zeus himself making his thunder' would have to meet the objection that the said statuette is described as *παῖς*, *παιδάριον*, or at most *νεανίας* (see the passages adduced in the *Journ. Hell. Stud.* 1902 xxii. 8 f.). But cp. the Zeus Παῖς of Aigion (*supra* p. 742 f.).

§ 4. *Zeus and the Thunder.*

(*a*) Thunder as a sound independent of Zeus.

Thunder was sometimes, perhaps originally[1], venerated as an independent phenomenon, not connected, or at least not expressly connected, with the name of Zeus. Thus at Bathos in Arkadia, where—according to local tradition—the battle of the gods and giants took place, sacrifices were offered to Lightnings, Storms, and Thunders[2]. Similarly the writer of the proëm to the Orphic *Hymns* addresses his prayer to 'Winds, Thunders, and parts of the four-pillared World[3].'

This conception of Lightnings and Thunders as *Augenblicksgötter* has left a trace of itself in a custom common to both Greeks and Romans. When a lightning-flash was seen, folk at once made a loud smacking noise with their lips[4]. Why? Pliny seems to have thought that the worshipper was thus, so to speak, blowing a kiss to his god: 'the nations by common consent,' he says, 'adore the Lightnings with smacking sounds[5].' More probably the sounds in question were prophylactic[6] and meant to avert the danger of being struck by the lightning[7]. To the same primitive stage of formless fear belongs one of the strange taboos[8] by which the wife of the

[7] E. Riess in Pauly—Wissowa *Real-Enc.* i. 42 f. (on the strength of Aristot. *anal. post.* 2. 11. 94 b 32 ff. *ὥσπερ εἰ βροντῷ ἀποσβενὺμένου τε τοῦ πυρὸς ἀνάγκη σίζειν καὶ ψοφεῖν, καὶ εἰ ὡς οἱ Πυθαγόρειοί φασιν ἀπειλῆς ἕνεκα τοῖς ἐν τῷ Ταρτάρῳ, ὅπως φοβῶνται* and Iambl. *v. Pyth.* 156 *ὅταν δὲ βροντήσῃ, τῆς γῆς ἅψασθαι παρήγγελλε*) supposes that a thunderstorm was regarded as a repetition of the Titanomachy and that men could help the gods to win by these apotropaeic noises.

[8] Frazer *Golden Bough*[3]: Taboo p. 14.

flamen Dialis was bound. If she chanced to hear a peal of thunder, she was incapacitated for duty till she had pacified the gods[1].

But Thunder and Lightning early developed into *Sondergötter*. At first, as we might have anticipated, they took shape as divine animals. For, not only does Hesiod make Pegasos the bearer of thunder and lightning[2], but Eumelos (*s.* viii B.C.), using the self-same words, calls two of the sun's horses *Bronte*, 'Thunder,' and *Steropē*, 'Lightning[3].' Already, however, in Hesiod's time this theriomorphic conception was giving way before the ubiquitous advance of anthropomorphism. The *Theogony* speaks of 'Brontes and Steropes and strong-souled Arges' as Kyklopes resembling the gods in all points, except for the single eye set in their forehead[4]. Even this *non*-human trait disappeared in due course. Pliny says of Apelles: 'He painted the unpaintable too—thunders, lightnings, and thunderbolts, Bronte, Astrape, and Ceraunobolia, as they are called[5].' The reference here is certainly[6] to allegorical female figures such as those introduced by Philostratos into his picture of Semele—'stern-looking Thunder and Lightning with flashing eyes[7].' Finally these daemonic personifications are transformed into angels, or at least controlled by angelic powers. Ioannes of Gaza (*c.* 536 A.D.)[8] in his description of the cosmic picture, which adorned the Winter Bath of that town, represents Bronte and Sterope surrounded by clouds[9]. Bronte has her hands held behind her by an angel; Sterope, hurling her flash, is directed by another angel—an ingenious way of suggesting that we see the lightning before we hear the thunder[10].

The lively imagination that inspired such figures is not yet extinct. A folk-song well known throughout Greek lands[11] involves the following plot. A Dragon (*Drákontas*) threatens to devour a young man. But his victim's lover by claiming to be the daughter of Lightning and Thunder so scares the Dragon[12] that he lets the young man go free. Similarly in a song from Epeiros a Lamia, disguised as a woman, begs a widow's son to recover her ring,

[11] N. G. Polites Δημώδεις μετεωρολογικοὶ μῦθοι (extract from Παρνασσός) Athens 1880 p. 9 f. quotes variants from Kypros, Crete, the mainland of Greece, and Korkyra.

[12] Since it is a long-standing belief that snakes are chased by the lightning (*supra* i. 183, ii. 820).

which has dropped inside a willow-tree, all blackened by lightning. She lowers him into the hollow trunk, where he finds nothing but snakes, and refuses to draw him up:

'"Now thou art in, my pretty youth, forth shalt thou come, ah, never!
For I'm the Lamia of the Sea, devourer of the Heroes!"
"And I, I am the Lightning's Son, I'll lighten, and will burn thee!"
She of the Lightning was afraid, and up again she drew him[1].'

Even more suggestive of a *Sondergott* is the question put to Mr J. C. Lawson by an aged crone, who was rain-making on the edge of the cliff in Thera (*Santorini*). She knew 'the god above and the god below,' but 'One thing she could not make out—who was the god that caused the thunder; did I know?[2]'

(*b*) Thunder as a sound uttered by Zeus.

Usually, however, thunder was brought into some direct connexion with Zeus. The modern mind, steeped in Semitic thought[3], readily conceives thunder as the voice of God[4]. But this was not a classical conception. Thunder was at most an ominous sound preceding divine speech. Thus, when Oidipous the aged wanderer of the Sophoclean play is about to be translated, Zeus *Chthónios* thunders; after which there is silence for a while, and then the god cries in ringing tones:

Oidipous, Oidipous, why tarry we
To go? Too long already they delay[5]!

Phaedrus also, describing a scene on the Roman stage, says:

The curtain dropped, the thunder was rolled down,
And the gods spoke as they are wont to speak[6].

But, though the Greeks of the classical age did not regard thunder as the articulate voice of Zeus, they thought of it sometimes in a more homely fashion as an inarticulate sound proceeding from his body[7].

[7] See the conversation between Strepsiades and Sokrates in Aristoph. *nub.* 382 ff., which is probably based upon folk-belief (cp. Strab. 675, Sen. *nat. quaestt.* 5. 4. 2).

(*c*) Thunder as a sound caused by the Chariot of Zeus.

According to another popular belief, thunder was the noise made by the chariot of Zeus as it rattled across the sky. Of this conception there is no certain trace in epic verse[1]. But Pindar began one of his lost poems with the words:

'Thunder-driving son of Rhea[2].'

On which Hesychios comments: 'The thunder is thought to be the chariot of Zeus[3].' A second Pindaric exordium was as follows:

'Driver on high of the tireless-footed thunder,
Zeus,' etc.[4].

Hereupon one scholiast remarks: 'Recent writers assign the thunder to Zeus as his chariot and say "O Zeus the Charioteer."' Another: 'Pindar takes the thunder to be the horse of Zeus, and so calls it "tireless-footed."' A third: 'Recent writers after a manner of their own hold the thunder to be the chariot and horse of Zeus[5].' The reference to recent writers is meant to include such poets as Horace[6]. But we can hardly doubt that the Thunderer's chariot was genuinely Greek. For, not only does it occur elsewhere in literature[7]

[1] Zeus in the *Iliad* has his 'well-wheeled chariot and horses' (*supra* i. 338 n. 1, where —as Mr C. T. Seltman points out to me—I should have noted *Il.* 8. 41 ff. rather than *Il.* 8. 438 ff. as the earliest allusion); but they are not said to cause thunder.

Τψίζυγος, an epic epithet of Zeus (*Il.* 4. 166, 7. 69, 11. 544, 18. 185, Hes. *o. d.* 18, Cougny *Anth. Pal. Append.* 2. 373. 1), might conceivably be rendered 'who driveth his team aloft' (though it would describe horse or chariot more naturally than driver) and viewed as a virtual equivalent of ὑψιβρεμέτης, 'who thundereth aloft' (*Il.* 1. 354, 12. 68, 14. 54, 16. 121, *Od.* 5. 4, 23. 331, *h. Herm.* 329, Hes. *o. d.* 8, *theog.* 568, 601, Aristoph. *Lys.* 773, Orph. *Arg.* 1278, Cougny *Anth. Pal. Append.* 6. 95. 3, 6. 210. 2, Tzetz. *alleg. Od.* 5. 75: cp. Orph. *h. Ker.* 19. 1, where J. Pierson cj. ὑψίβρομον for ὑψίδρομον). But ὑψίζυγος is traditionally taken to mean 'who sitteth aloft' (H. Ebeling *Lexicon Homericum* Lipsiae 1880 ii. 396)—an epithet appropriate to a steersman (Noumenios *ap.* Euseb. *praep. ev.* 11. 18. 24, Euseb. *de laud. Const.* 10 p. 223, 12 f. Heikel), which may well have descended to Homer from the days of the 'Minoan' thalassocracy.

Atlas pl. 10 f.).

A Hellenistic group in terra cotta, found at Gnathia (*Fasano*) in Apulia and bequeathed by Sir W. Temple to the national collection, is described as follows by H. B. Walters (*Brit. Mus. Cat. Terracottas* p. 324 no. D 157. My pl. xxxvii is from a photograph by Mr R. B. Fleming): 'Zeus in four-horse chariot, on a large plinth. His figure is visible as far as the knees; his head is inclined to his l., r. hand extended with open palm, and in l. he holds up an apple (?). He has a thick straight beard and curly hair with laurel-wreath; drapery is twisted round his waist and l. arm, covering the l. leg. The body of the chariot is represented by a high narrow box on a base, with an arched railing round the front and sides; the horses together with the pole and yoke of the chariot are much restored, as are the wheels of the chariot, from the axles of which project lions' heads. Ht. of Zeus (with base), 11¼ in... Back of Zeus slightly modelled.'

a bronze car. In time of drought they shook this car and prayed the god for rain. The *parásemon* or 'badge' of their city showed two ravens perched on the car; and enquirers were told that two ravens, never more than two, were to be seen at Krannon. Theopompos stated that these two stayed till they had chicks, and then left[1]. Ktesias told a similar tale about Ekbatana[2]. And Myrsilos of Methymna said that on Lepetymnos, a mountain of Lesbos, there was a temple of Apollon and a shrine of the eponymous hero Lepetymnos, on which again two ravens perched and no more[3].

Fig. 788.

Fig. 789.

Fig. 790.

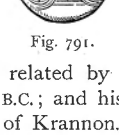

Fig. 791.

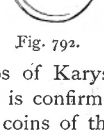

Fig. 792.

All this is duly related by Antigonos of Karystos, a paradoxographer of *s.* iii B.C.; and his account is confirmed by the fourth-century coinage of Krannon. Bronze coins of that town have for their reverse type an *amphora* resting on a car (fig. 788)[4]. Some specimens show a raven seated on the right-hand wheel (figs. 789—791)[5]; others, a pair of ravens on the two wheels (fig. 792)[6]. A. Furtwängler made it probable that the ravens were believed to bring rain from the sky[7], and that water was spilt from the *amphora* as a

[7] He refers to Ail. *de nat. an.* i. 47 (Apollon sent the raven to get water. He found a green cornfield and, wishing to eat the grain, waited till it grew dry, thereby forgetting his errand. Hence he is punished by thirst in the summer, and proclaims his punishment by croaking), pseudo-Eratosth. *catast.* 41 (When the gods were sacrificing, the raven was sent to get water for a libation from a fountain. He saw beside it a fig-tree and waited for

rain charm[1]. Sir J. G. Frazer added that the rattling of the car was probably meant to imitate thunder[2]. We are not indeed told that this was the car of Zeus: but, since Zeus was the Greek rain-god[3], that is a legitimate assumption; he appears, moreover, on later coins of Krannon[4].

A similar imitation of the thunders of Zeus by means of a rattling chariot is found in the myth of Salmoneus, who likewise hailed from Thessaly[5].

Lastly, it will be remembered that the Thracian Zeus *Zbelsoûrdos* was at once a thunder-god and a charioteer (fig. 785)[6].

(*d*) Zeus *Brontaîos, Brontôn, Brontésios.*

Zeus *Brontaîos*, the god 'of Thunder,' figures in late literature[7] and twice at least on monuments of the Kyzikos district. A marble *stéle* from Mihallitch, preserved at Constantinople[8], is decorated with a relief of *s.* ii or iii A.D. (fig. 793)[9]. It shows Zeus standing on a broad pedestal, with a thunderbolt in his raised right hand, a sceptre in his lowered left, and an eagle at his feet. Near him, on a smaller

the figs to ripen. Then, realising his fault, he caught the water-snake of the fountain, brought it along with the bowl, and explained that the snake daily drank the water of the fountain. Apollon punished him with thirst, as is stated by Aristotle [*frag.* 329 Rose] and Archelaos in his 'Ιδιοφυῆ) [A similar account is given by schol. Arat. *phaen.* 449, schol. Caes. Germ. *Aratea* p. 419, 15 ff. Eyssenhardt, Ov. *fast.* 2. 243 ff., Hyg. *poet. astr.* 2. 40, Myth. Vat. 1. 115], Cramer *anecd. Paris.* i. 25, 20 ff. = Dionysios περὶ ὀρνίθων (When Koronis was bearing Asklepios at Trikke, the raven was told to bring water. Instead of that, he indulged in lust. Apollon in anger turned him black and so shaped his crop that he cannot bring water to his chicks) [Cp. Hyg. *fab.* 202, *poet. astr.* 2. 40, Myth. Vat. 1. 115, 2. 22, 2. 128].

On the raven as a weather-prophet in antiquity see *supra* p. 518 n. 4.

[1] Furtwängler *Masterpieces of Gk. Sculpt.* p. 471 suggests the same use for the problematic *Kesselwagen* or 'caldron-chariots' of the late Bronze Age and the Early Iron Age. These are bowls mounted on carriages of four wheels apiece and frequently decorated with birds or birds' heads. For examples and bibliography see J. Schlemm *Wörterbuch zur Vorgeschichte* Berlin 1908 pp. 282—286. Cp. also R. Kittel *Studien zur hebräischen Archäologie und Religionsgeschichte* Leipzig 1908 pp. 189—242 ('Die Kesselwagen des salomonischen Tempels'—an interesting discussion leading up to the conclusion: 'Sie sind die Symbole der regenspendenden Gottheit'), J. Déchelette *Manuel d'archéologie préhistorique* Paris 1910 ii. 1. 284 ff. fig. 107, 442 ff. fig. 183.

Perhaps Syntrophus, like Pythagoras[1], had been 'purified with the thunder-stone' and 'lying prone' in the appointed place had been warned to erect this monument to Zeus *Hýpsistos Brontaîos*. Another marble *stéle*, found between Tchakyrdja and Hadji Paon, represents in relief an altar, the sacrifice of a bull, and four worshippers. Below is the inscription: 'Meleagros and Theoxenos and Menandros, the sons of Protomachos, (discharged) a vow to Zeus *Brontaîos*[2].'

Thunder, says Sir William Ramsay, 'in early summer is exceedingly common on the Phrygian uplands[3].' Hence one of the chief cults of northern and eastern Phrygia was that of Zeus *Brontôn*, 'He that Thunders.' Scores of inscriptions from this[4] and adjoining districts[5] make mention of him; and his worship, thanks to the traffic in Phrygian slaves, spread at a comparatively early date to Rome[6].

As to the character of this deity, apart from vague epithets such

1881 vi. 134 f. no. 3). The order of the words suggests that Βροντᾶῖ was added as an afterthought.

The Roman Iupiter *Tonans*, a very different deity, was likewise represented in Greek by Zeus Βροντῶν (Dion Cass. 54. 4) or Βροντήσιος (*res gestae divi Augusti* 19 p. 22 f. Diehl cited *supra* p. 111 n. 0, *ib.* 2 p. 38 f. Diehl).

as 'Great' and 'Holy[1]' and 'Hearer of Prayer,' he is called 'the Father god[2]' and 'the Victorious Father[3],' on the strength of which appellations he has been identified[4] with the Phrygian *Pápas* or *Papâs*[5]. His art-type was that of a late provincial Zeus—witness a crude bust from Dorylaeion (*Eskishehir*) in the British Museum (fig. 794)[6]. A marble altar from *Gümbet* in Phrygia, described by A. Körte[7], makes it clear, however, that Zeus *Brontôn*—like Zeus *Díos* of the same region[8]—had also a Dionysiac aspect. The altar-front is adorned with a lunar crescent, beneath which is a bearded bust of Zeus in relief, with an eagle perched on his right shoulder. The altar-back shows two ox-heads with a plough below them. The small sides of the monument have vases and a vine-stem. Other altars dedicated to Zeus *Brontôn* at or near *Inönü* repeat the elements of this decoration—eagle, plough, vine, etc.[9] And it cannot be a mere coincidence that a whole series of tombstones from *Altyntach* represents the deceased surrounded by the same sacred emblems—eagle, plough, and vine[10]. Presumably Zeus *Brontôn* was not only a celestial but also a terrestrial power. Indeed, his chthonian character is fairly established by the fact that almost every inscription from Phrygia in which he is mentioned occurs on a gravestone[11]. Those who had worshipped him in life would naturally claim his protection in death.

What forms his worship took we are not expressly told. But there is good reason to suppose that he was served with mystic rites in a cave. *Inönü*, a stronghold of his cult, derives its name ('Cave-front') from a great cavern visible in the rock above the village. The cavern comprises an upper and a lower chamber, con-

[1] A. Körte in the *Ath. Mitth.* 1900 xxv. 419 ff. no. 32 Διὶ ἐξ αὐλῆς ἐ|πηκόῳ θεῷ | κ.τ.λ. *Supra* p. 249 n. 2.

limestone altar, decked with the god's emblems (an eagle, two *bucrania*, a garland, a vine-stem) and bearing an inscription 'to Zeus *Telesphóros*,' is built into a fountain at the north-east end of the village[1]. Moreover, a priest of *Bronton* and Hekate is known to have consecrated a cave (*speleum*) to Mithras at Rome[2]. Hence it is highly probable that the cult of the Phrygian cave-Zeus resembled that of the Cretan cave-Zeus. As the mystics of Zeus *Idaîos* had themselves to make the thunders of nocturnal Zagreus before attaining the sanctity of their god[3], so in all likelihood the devotees of Zeus *Brontôn* by some *mímesis* of his thunder sought to become partakers of his godhead. This assumes, no doubt, that the Phrygians, like the Greeks[4], recognised subterranean thunders. But it will be remembered that in Orphic, and therefore Thraco-Phrygian, story the infant Zagreus sat on a throne grasping the thunderbolt of Zeus[5]. If Zeus was *hypsibremétes*[6], Dionysos at least was *Brómios*[7].

Bearing in mind, then, the Dionysiac and *quasi*-Orphic nature of Zeus *Brontôn*, we are better able to appreciate a votive relief in the Villa Panfili (fig. 795) dedicated to him under the title of Iupiter *Sanctus Bronton*[8]. This monument, purely Greek in its design, shows a youthful lyre-player seated on a rock-cut throne, against the side of which appears a female panther. Before him stand two women carrying a jug and a bowl respectively. Panther, jug, and bowl betoken a Dionysiac company. The rock-cut throne recalls the throne of Zeus in the Idaean Cave[9]. And it is reasonable to surmise that the scene as a whole portrays the ritual enthronement of a worshipper in the cave of Zeus *Brontôn*. If it be urged that the seated figure resembles Apollon rather than Dionysos, we might reply that Dionysos from *s.* v B.C. onwards tends to become Apolline and is sometimes equipped with the lyre[10]. But it would, I think, be

more relevant to observe that the cult of Zeus *Brontôn* stood in some relation to that of Phoibos. A marble altar found near *Kurshumlu*, between Brouzos and Dorylaeion, was dedicated to Zeus *Brontôn* by two brothers Paulos and Phoibos together with their mother Rufina 'in accordance with a command of the god Phoibos[1].' Here it is clear that the dedicant Phoibos is directed by his namesake god; and it is at least possible that in Phrygia, as at Delphoi[2],

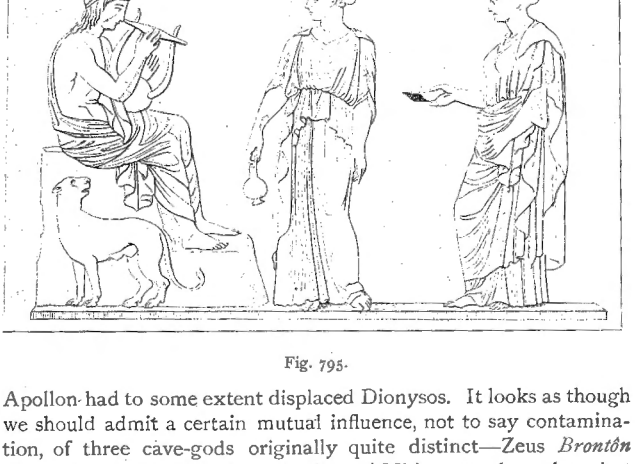

Fig. 795.

Apollon had to some extent displaced Dionysos. It looks as though we should admit a certain mutual influence, not to say contamination, of three cave-gods originally quite distinct—Zeus *Brontôn* whose thunders issued 'from the Cave[3],' Mithras to whom the priest of *Bronton* dedicated a *speleum*[4], and Phoibos the last occupant of the Delphic *ádyton*. In this accommodating system it may well be that the worshipper, playing the lyre of Phoibos '.the Pure[5],' was believed to be making the thunders[6] of the reborn Zeus.

[6] In Nonn. *Dion.* i. 427 ff. (*supra* p. 449 n. 2 (2)) Typhoeus describes the thunders of Zeus as a musical instrument (432 ὄργανον αὐτοβόητον Ὀλύμπιον).

Retrospect.

Most of the evidence available for a study of Zeus as god of Thunder and Lightning now lies behind us. But, lest I be accused of inveigling my readers into an irremeable labyrinth of detail, I shall endeavour in a few concluding paragraphs to emphasise afresh the main outlines and salient points of my design.

Zeús, 'the Bright One,' was originally nothing but the day-light Sky, conceived in zoïstic fashion as alive with a life of its own; and traces of that primitive conception could be detected here and there throughout the classical period. But already in Homeric days, indeed long before Homer, the divine Sky had developed into the Sky-god, a weather-making ruler, who dwelt in upper glory (*aithér*). As such he became the recognised head of the Hellenic pantheon, and in the Hellenistic age was brought into connexion with other manifestations of celestial brightness—sun, moon, and stars alike.

So much had been made clear in the first volume of this work. The second, beginning with the obvious reflexion that the sky is not always bright, went on to observe that Zeus god of the bright sky naturally became god of the weather in general[1], any sudden atmospheric change being interpreted as an ominous 'Zeus-sign' (*Diosemía*)[2].

Of such changes the most momentous was the thunder-storm. For it was then, when all was dark, that Zeus would rend the heavens and come down in the form of a bright blinding flash (Zeus *Keraunós*)[3].

Investigation of Zeus *Kataibátes*, 'who descends' in the lightning[4], and of his *elýsia* or *enelýsia*, sacred precincts where none might tread[5], led us to examine into the curious belief that the 'Zeus-struck' man (*Dióbletos*), though he lay blasted and blackened on the ground, was for all that a divinised mortal even now 'in Elysium' (*enelýsios*)[6].

Hence a long but necessary digression on the Elysian Way from earth to heaven, 'the road of Zeus' as Pindar called it, in plain prose the Galaxy, which was regarded by Pythagoreans as a soul-path and associated by Platon in Pythagorising mood with 'a straight light like a pillar' stretched along the axis of the universe[7]. This enquiry disclosed a new and not unimportant conception of the sky as resting on a sky-prop[8]—a conception which helped to explain, not only the Iupiter-columns of Rhenic Germany[9], but also such monúments as the column of Mayence[10], and even the great commemorative columns of Rome and Constantinople[11].

[1] *Supra* p. 1 ff. [2] *Supra* p. 4 ff. [3] *Supra* p. 11 ff. [4] *Supra* p. 13 ff.
[5] *Supra* p. 21 f. [6] *Supra* p. 22 ff. [7] *Supra* p. 36 ff. [8] *Supra* p. 50 ff.
[9] *Supra* p. 57 ff. [10] *Supra* p. 93 ff. [11] *Supra* p. 100 ff.

Further consideration of the sky-prop, as exemplified by the Diana-pillars of Italy[1] and the *Agyieús*-pillars of Greece[2], threw light on some perplexing phenomena of popular cult, *e.g.* the wooden balusters of Diana *Nemorensis*[3] and the *dókana* of the Dioskouroi[4]. Moreover, the occurrence of an *Agyieús*-pillar set on an *omphalós* at Byzantion[5] turned our thoughts to Delphoi[6], where the *omphalós* lately discovered by F. Courby[7] was seen to be the base of an *Agyieús*-post[8] covering the navel-string of Zeus, in accordance with a custom still traceable in various parts of Greece[9], and safeguarded by the eagles that betokened his presence[10]. The Delphic *Agyieús*-pillar was in a manner duplicated by the Delphic tripod with its central stem[11]. On this sat the *Pythía* as bride of Apollon[12]—a usage implying the caldron of apotheosis[13], which an Orphic myth located at Delphoi and connected with the death of Dionysos[14].

And here an attempt was made to determine the stratification of this very complex cult[15]. It appeared that the first Hellenic occupants of the oracular seat were the sky-god Zeus *Aphésios* (?), 'He that lets fly[16],' and the earth-goddess Ge *Thémis* (?), 'She that produces[17],' their respective tokens being the eagles and the *omphalós*. Then followed Dionysos, brought in by a wave of Thracian immigrants[18], who told how their god was done to death by the Titans, boiled in the Delphic tripod, and buried beside it[19]. Thus the *sanctum sanctorum* in the Pythian temple contained, not only the *omphalós* with its eagles attesting the joint worship of Zeus and Ge, but also the tripod and tomb of Dionysos[20]. Finally, Apollon to a large extent displaced Dionysos[21], who however down to the close of antiquity retained at least the wintry quarter of the Delphic year[22]. The latest comer was fittingly affiliated to Zeus as his *prophétes*[23] (if the one was *Aphésios*, the other was *aphétor*[24]) and took over the properties of his various predecessors—the eagles of Zeus, the *omphalós* of Ge, the tripod of Dionysos—importing in addition his own Thessalian bay[25]. His installation was completed before the epic age[26].

Delphoi is vital. Here, if anywhere, we touch the very heart of Greek religion. And the gods whom the Delphic succession associated with Zeus demand closer scrutiny than they have yet received. It seemed worth while therefore to tackle afresh a whole

series of problems concerned with the relation of Zeus on the one hand to Dionysos, on the other to Apollon.

Zeus and Ge were purely Hellenic. Their counterparts in the Thraco-Phrygian area proved to be a sky-god Dios and an earth-goddess Zemela, whose son was known as Dios *Nysos*, that is Dios 'the Younger[1].' From inscriptions and literary sources we learnt that these names were Grecised as Zeus *Dios*, Semele, and Dionysos[2]. Further, it was pointed out that the Thraco-Phrygians conceived Dios the son to be a rebirth of Dios the father. And this conception, to which parallels could be adduced from many backward races[3], served to explain the odd fact that the youthful consort of Kybele was commonly called *Attis*, 'Daddy,' or *Papas*, 'Papa[4].' It accounted also satisfactorily for a feature of old Anatolian worship often noticed but hitherto not fully understood—the constant grouping of the mother-goddess with a youthful *paredros*, at once her husband and her child[5]. It even suggested a reason for the speed and success with which early Christianity permeated the regions of Phrygia and Thrace[6].

Akin to the Thracian Father and Son were the Samothracian Kabeiroi or Megaloi Theoi[7], consideration of whom led to a discussion of the double Zeus[8] and the Dioskouroi[9].

After dealing with the Phrygian Zeus *Tetraotos*[10], the Celtic Janiform god[11], Iupiter *Ambisagrus* and Iupiter *Dianus* at Aquileia[12], we proceeded to examine the relationship of Ianus to Iupiter[13]. The view here maintained is that an ancient Illyrian (?) sky-god was worshipped on the west of the Adriatic as Ianus or Ian, on the east as Zan. Ianus was in effect an older Iupiter[14], Zan an older Zeus[15]. Neither Zan nor Ianus was, to begin with, anthropomorphic. Zan as being the broad Sky had the title *Megas*[16], but was left without an effigy[17]. Ianus was represented as a vault or archway with four supporting pillars[18]—a mimic sky which gave rise to the Roman triumphal arch[19]. When Ianus became iconic, he was figured as a double-faced deity standing beneath his arch[20]. The double face, a characteristic of other sky-gods, showed a tendency towards differentiation[21] (beardless *v.* bearded, blonde *v.* black-haired, etc.) and perhaps signified that the divine Sky was bright by day and dark by night[22]. Among differentiated types was that of Virbius as Dianus or Ianus, the consort of Diana at Nemi[23]: he was plastered

over with oak-leaves because she was an oak-goddess[1], whose sacred tree, or a descendant of the same, was subsisting as late as the eighteenth century[2].

A section on Zeus and the Twins showed first how the supports of the Sky were gradually transformed into its supporters, passing through successive stages as pillars, pillars with personal names, pillars with individual effigies, and pillars in the shape of the Dioskouroi[3]. When the old popular belief in a flat earth overarched by a solid sky resting on side-props gave place to the philosophic idea of a globe enclosed in a sphere half light, half dark, room was still found for the Dioskouroi by a daring personification of the two hemispheres[4]. Next it was contended that the Sky, appearing alternately as Day and Night, is essentially of a twin character. Hence the savage notion that twins in general are 'Children of the Sky[5].' Hence too the contrast between numerous mythical pairs of Twins[6], for instance Kastor and Polydeukes[7], Romulus and Remus[8], Zetes and Kalaïs[9], Zethos and Amphion[10], Herakles and Iphikles[11]. A recurring feature in such cases is the comparative feebleness of one of the Twins, a feebleness sometimes amounting to effeminacy, which therefore paves the way for the recognition of Twins male and female[12]. Lastly, in this connexion we investigated the supposed twinship of Apollon and Artemis[13]. A survey of recent opinions with regard to the *provenance* of Apollon[14] was followed by a detailed discussion of the crucial Hyperborean myth[15]. The 'wondrous way' to the land of the Hyperboreoi mentioned by Pindar was held to be none other than the celestial 'road of Zeus,' but the Hyperborean sacrifice of asses to Apollon suggested rather a terrestrial abode in or near Thrace[16]. And this bilocation squared with other mythical happenings—Herakles' capture of the hind with golden horns among the Hyperboreoi of 'the Istrian land[17],' his introduction of the white-poplar to Olympia from Thesprotia[18], and the metamorphosis of the Heliades into black-poplars on the banks of the Eridanos[19]—the poplar, white or black, being a Borderland or Otherworld tree[20]. Special attention was here drawn to a neglected statement by Apollonios of Rhodes to the effect that the Keltoi took amber to be the tears, not of the poplars, but of Apollon, when banished by Zeus to the Hyperborean haunts[21].

Ultimately the following conclusions were reached: (1) that Apollon came to Greece from the land of the Hyperboreoi, dwellers 'Beyond the Mountains,' about the source of the Danube[1]; (2) that the road to their northern home was described sometimes as an earthly, sometimes as a heavenly track, the former being the old trade-route for amber along the eastern shore of the Adriatic, the latter its aërial counterpart the Milky Way[2]; (3) that the *Agyieús*-pillars of Illyria and Epeiros marked out the 'Way' by which the god travelled, and pointed onwards to Delphoi, where his oracle was established by the Hyperboreans Pagasos and Agyieus[3]; (4) that on his journey southward he was associated with different trees in different regions—possibly, as Dr Rendel Harris urges, with the apple-tree[4] in north Europe (Balder?[5], Phol??[6]), probably with the black-poplar (*ápellon*) in the Balkans[7], certainly with the bay in Thessaly[8]; (5) that Phoibos *Apóllon*—for such was his full name—may have been originally a sky-god, who was affiliated to Zeus at Delphoi and specialised by the Greeks into a sun-god[9]; (6) that he met Artemis first in Asia Minor or the Archipelago, where she originated as the younger form of the Anatolian mother-goddess[10]. Thus at the close of a somewhat lengthy excursion we were brought back—like Apollon himself—by the Elysian route to Delphoi.

Resuming the main thread of our argument, we next dealt with lightning as a flash from an eye, the evil ~~eye, of~~ Zeus[11]. The subject afforded an opportunity of explaining the superstition, not only of the evil eye, but of the good eye also[12].

Then followed a study of lightning as the weapon of Zeus—axe, spear, sword, or what not? A notice of neolithic celts, which the Greeks still term 'lightning-axes' (*astrapopelékia, astropelékia*)[13], prefaced a collection and discussion of the *data* with regard to the double axe in 'Minoan' and post-'Minoan' times[14]. This implement

was seen falling from heaven to earth, as on a gold ring from Mykenai[1], incorporated with tree- or plant-forms, as on the *sarcophagus* from *Hagia Triada* (here interpreted afresh)[2] and on that from *Palaikastro*[3], stuck into the pillars of a sacred building, as at Knossos[4], or into the stalactite columns of a cave, as on Mount Dikte[5], set up between a pair of bovine horns, as in Cretan art *passim*[6],—*motifs* appropriate each and all to the weapon of a sky-god. A lenticular gem, hitherto unpublished, showed this god posting along through the air with wings on shoulders and heels and a double axe in his hand[7]. We identified him with Kronos, the husband of Rhea, and conjectured that the Greeks took his name to mean 'Chopper[8].' The Homeric Kronos *ankylométes*, 'of the crooked blade' (for so it should be rendered), passed on his *hárpe* to the Italian Saturn[9]. An analogous figure, part deity, part dirk, was recognised among the Hittite carvings at Boghaz-Keui[10]. The multiple wings could be paralleled from the coins of Mallos and Byblos; the double axe and *hárpe*, from the coins of Ake or Ptolemaïs[11].

When the Bronze Age succumbed to the Iron Age, the 'Minoan' Kronos was succeeded by the Hellenic Zeus, another storm-god of like proclivities[12], who became the inheritor of the double axe over a wide area of the ancient world.

At Tarentum 'bolts from heaven forged of bronze,' traditionally connected with early settlers from Crete, were taken over by Zeus *Kataibátes*[13].

In Asia Minor, if we may trust Plutarch, the double axe (*lábrys*) belonged in turn to the Amazons, the Lydians, and the Carians, being eventually placed by Arselis of Mylasa in the hand of Zeus *Labradeús*[14]. The statement is broadly correct. The Amazonian axe was in fact of Hittite origin: it is borne by the youthful god at Boghaz-Keui and by his successor Herakles (Sandas) at Tarsos[15]. On coins of Thyateira and other Lydian towns it is carried by the local hero (Tyrimnos or the like), who in Graeco-Roman times tends to be identified with Apollon and Helios[16]. Similar coin-types prevail in Phrygia, where again the axe-bearing hero (Lairbenos, Lairmenos, etc.) is equated with the same divinities. Not improbably these are all Hellenised forms of the younger Hittite sky-god[17]. As to the Carians, Hekatomnos early in *s.* iv B.C. struck coins with

the type of Zeus shouldering a double axe. This was an adaptation from the cult-image of Zeus *Strátios* or *Labráyndos* (*Labrandeús, Labrandenós*, etc.), who was worshipped at Labranda near Mylasa[1]. The Mylasians just outside their city had a second sanctuary, that of Zeus *Osogóa*, whose attributes the eagle, the trident, and the crab procured for him the title *Zenoposeidôn*[2].

And here, by way of parenthesis, we contended that the Hellenic Poseidon himself was but a specialised form of Zeus, his name *Potei-Dán*, etc., denoting originally 'Lord Zeus,' just as *pótnia Hére* meant 'lady Hera[3].'

In Karia the cult of Zeus had probably been superposed on that of an indigenous earth-mother, whose characteristics he had to some extent absorbed. Two queer reliefs show the Zeus of Labranda grasping a double axe but equipped with female breasts[4]—an abnormal figure, which recurs at *Suwasa* in Kappadokia[5] and is balanced by a bearded goddess brandishing a thunderbolt at *Zogui* in Pontos[6].

A short section followed in which, accepting M. Mayer's connexion of *lábrys* and *Labýrinthos*, we maintained (1) that the Carian *Labráynda, Lábranda* and the Cretan *Labýrinthos* both denoted a place where lightning, the sky-god's *lábrys*, had fallen, and (2) that in Karia and Crete alike the *lábrys* was primarily the attribute of a god and only secondarily, if at all[7], the attribute of a goddess[8].

More space was devoted to E. Conybeare's suggestion that the *labarum* was derived from the *lábrys*, and a fresh attempt was made to trace the steps by which the pagan symbol developed into the Christian monogram[9]. It was shown (1) that the old Anatolian double axe was still recognised as a sacred object or sign throughout the Levant in the opening centuries of our era—witness the coin-types and reliefs discussed above, the reputed axe of Noah[10], the Ophite diagram[11], the Gnostic mystery of the double axe[12], and (2) that the pictograph of the *lábrys*, having already given rise to a variety of syllabic and alphabetic characters, might readily be adapted to other significant uses[13]. Accordingly it was suggested that Constantine, who during his stay in the east had observed the *lábrys* and noted its possibilities, later deliberately transformed it into the *labarum*, an emblem at once old and new, pagan and Christian, in a word thoroughly Constantinian[14].

Further examples of the double axe in the east[1] and in the west[2] did not detain us long; and we passed on to discuss the axes carried by priests and priestesses in Greece and Italy[3]. Traces of the 'Minoan' *lábrys* were detected in the double axe of Athena[4], the double axe of Theseus[5], the double axes taken in procession from Athens to Delphoi[6], etc. Attention was also drawn to Italian pontifical axes[7]. And it was held that the lictor's axe in particular had been a sacred weapon borne before the king as representative of the sky-god: the rods bound round it and so charged with its virtue would be potent to expel evil from a malefactor[8].

Sacred axes, from neolithic times onward, have been distinguished by their colour, or size, or decorative design[9]. The decoration often consists in diagonals and zig-zags probably derived from lashings[10], sometimes in dendritic patterns resembling the 'thunder-besom[11],' or in stylised moths with circular 'eyes[12].' Such embellishment indicated the presence of a soul in the axe, and simultaneously protected it from possible harm. Further progress towards anthropomorphism was discernible in the Early Iron Age, when small axes of bronze became axe-shaped pendants and took on sundry animal or human features[13]. Finally the pendant was modified into a gong and thus endowed with divine utterance[14].

A marked trait in the 'Minoan' axe was its tendency towards duplication. Without denying that a pair of axes might be used to symbolise a pair of deities, we concluded that in general double or multiple blades were intended to augment the striking-power of the god that wielded them[15].

We next handled at some length the difficult but interesting case of Tenedos[16], and saw that to treat the double axe on its coins merely as a barter-unit[17] involved a very partial and inadequate hypothesis, contradicted alike by the coin-types themselves[18] and by the express testimony of the ancients, who record a definite cult of two axes in the island[19]. Rather there was reason to suppose that here the 'Minoan' weapon had passed into the hands of a Dionysiac Zeus or a Zeus-like Dionysos, paired as usual with the earth-goddess[20]. Their local names were Tennes and Hemithea, and their effigies were combined in the male-*plus*-female head, which appeared on the obverse of the Tenedian coins[21].

[21] *Supra* p. 668 ff.

The 'Minoan' conception of the sky-father's weapon imbedded in the earth-mother's tree[1] could be traced here and there in Hellenic cult and myth. In this connexion we discussed the axe of Hellos in the oak at Dodona[2], the sword of Orestes in the tree at Rhegion[3], the sword of Kinyras in the myrrh-tree[4], the axes of Erysichthon's comrades in the oaks at Dotion[5], and the knife of Phylakos in the oak at Phylake[6]. Scandinavian saga and Celtic folk-tale attested a similar relation of weapon to tree[7]; and confirmatory evidence was sought in the megalithic art of western Europe[8]. Penelope's marriage-test perhaps presupposed the same set of half-forgotten ideas[9]. And the sanctity of the sky-god's axe may even be regarded as the ultimate ground of more than one modern superstition[10].

As civilisation advanced, the double axe gave place to spear and sword. Lightning therefore came to be viewed on occasion as the spear of Zeus—a view which facilitated his transition from storm-god to war-god[11]. Zeus *Labráyndos* of Mylasa bore, not only an axe, but a spear and a sword to boot, and was worshipped by the martial Carians as *Strátios*, 'Lord of Hosts[12].' Zeus *Áreios* of Hydisos is represented in military costume, now brandishing a thunderbolt, now resting on a spear[13]. Zeus *Strategós* of Amastris likewise holds a spear[14]. Analogous figures in Roman religion were Iupiter *Militaris*, Iupiter *Imperator*, Iupiter *Victor*, etc.[15]. And the spear in the god's hand was illustrated from an Etruscan mirror, a Gallo-Roman statuette, and the handle of a Roman lamp[16].

More rarely lightning was symbolised by a sword[17]. Comparable with the cult of Zeus *Strátios* at Mylasa was the cult of Zeus *Chrysaoreús* or *Chrysaórios* at Stratonikeia. This title, perhaps of Semitic origin, was presumably taken by the Greeks to mean 'Bearer of a Golden Sword,' that is, of the lightning[18].

Axe, spear, and sword by no means exhausted the armoury of Zeus. Far more frequent than any of them as his attribute in literature and art is the thunderbolt (*keraunós*)[19]. Nevertheless from *s.* vi B.C. onwards this tremendous tool, as O. Gruppe observed, falls gradually into the background[20]. Little by little the thunderbolt gives way to the sceptre, and the impetuous thunderer in time becomes the dignified ruler—a change sufficiently evidenced by vase-paintings[21], statues, and other works of art[22]. To this moral development there was one notable exception. At Olympia Zeus

Hórkios, 'God of Oaths,' continued to grasp a thunderbolt in either hand. But that primitive insistence on the storm-god's power was not after all devoid of ethical significance; it served, says Pausanias, 'to strike terror into perjurers[1].' In this context we discussed the part played by Zeus in relation to Greek oaths, private and public[2]. We also investigated the disputed personality of Dius *Fidius* and found him to be an old lightning-god with an appellative originally denoting 'the Cleaver' (*findo*) but later misinterpreted as 'Protector of Pledges' (*fides*)[3]. Our survey of the monuments enabled us to follow through several centuries the successive art-types of Zeus—striding, standing, seated—till they culminated in the masterpiece at Olympia. It was shown that Pheidias in all probability took a hint for his great statue from the seated Zeus of the local coinage, replacing the winged thunderbolt by a winged Victory to emphasise tranquil supremacy rather than stormy strength[4]. Further, it appeared that Alexander, ignoring this elevated conception of the godhead, deliberately reverted to an old pre-Pheidiac type and placed upon his silver money a seated Zeus, with eagle and sceptre, closely resembling Zeus *Lýkaios* on the federal coins of Arkadia. His purpose in so doing is problematic: we noted a possible explanation[5]. Finally, on Italian soil Greek art portrayed the sceptred Zeus in a pose suggestive of inward reflexion. The outward symbols of the storm-god had wholly disappeared. The worshipper was confronted with Providence incarnate[6].

The thunderbolt was a conventional representation of lightning and as such underwent modifications of shape from time to time and from place to place. In Mesopotamian art it was first a bipartite and then a tripartite fork, composed of zig-zags or curved lines[7]. These forks, duplicated in *s.* ix B.C., were subsequently (*c.* 700 B.C.) stylised into the shape of a lotos-flower[8]. In that form they made their way through Asia Minor into Greece (650—550 B.C.), appearing there for the first time on vases of Ionian fabric[9]. Among the Greeks the lotiform bolt ran through three changes. Its petals became rays or flames[10]. Its sepals developed into wings—eagle's wings, for the eagle was the lightning-bearer[11]. And its central spike took on a spiral twist, to suggest the lightning's rotatory flight[12]. These changes can all be exemplified from the coinage of the temple-mints at Olympia[13]. Ultimately, in the east the

[1] *Supra* p. 722 ff. [2] *Supra* p. 727 n. 3. [3] *Supra* p. 724 ff. n. o.
[4] *Supra* p. 757 f. [5] *Supra* p. 760 ff. [6] *Supra* p. 762 ff. [7] *Supra* p. 764 ff.

thunderbolt was anthropomorphised into a youthful male divinity[1], in the west skeuomorphised into a barbed or hamate missile[2]. In discussing these various transformations we touched incidentally on the symbolism of the lotos[3], collected the names of thunder-flowers[4], and examined the singular cult of Zeus *Apómyios*[5].

Our next business was to consider whether the thunderbolt of Zeus bore any ascertainable relation to the trident of Poseidon, or to the alleged fork of Hades. With regard to the first question we concluded (1) that Greeks and Romans of the classical age doubtless took the trident of Poseidon to be the fish-spear of a sea-god[6], but (2) that originally Poseidon had been a by-form of Zeus[7] and his trident almost certainly a lightning-fork[8]. The latter contention was supported on the one hand by parallels from India[9], on the other by the similarity of the hypaethral trident-mark at Athens to the hypaethral lightning-shrines of Rome[10]. Besides, if Poseidon had been *ab origine* a lightning-god, we can understand why he was represented as fulminant on a fifth-century coin of Zankle[11], and we can see some fitness in the later fusion of Zeus-Poseidon into a single syncretistic type[12].

With regard to the second question it appeared (1) that no valid evidence could be produced for the fork as an attribute of the Greek Hades[13], but (2) that Iupiter *Iutor* was actually depicted with thunderbolt, trident, and fork—this last implement being probably borrowed from an Etruscan god of the Underworld[14].

In short, it was argued that the bident of Italy and the trident of Greece were respectively descended from the bipartite and tripartite forms of Mesopotamian lightning[15].

A bunch of cult-titles designated Zeus as god of the Thunderbolt (*Keraunós, Keraunobólos, Keraúnios*) or god of Lightning (*Storpâos, Astrapaîos, Astrápton*)[16]. The cults in question had their features of interest. The Arcadians in *s.* v B.C. worshipped Zeus *Storpâos* under the form of an aniconic pillar topped by a small pyramid[17]. Sling-bullets used in Sicily by the slave-troops of Athenion (103—100 B.C.) bore the device of a thunderbolt and the name of Zeus *Keraúnios*[18]. Coins of Seleukeia in Syria showed his bolt bound with a fillet and resting on a cushioned stool[19]—a type that recurs on the Roman mintages of Vespasian, Titus, and other

emperors[1]. Coins of Diokaisareia in Kilikia even figure the thunderbolt enthroned in a would-be human attitude[2].

It remained to deal with the Thracian Zeus *Zbelsoûrdos*, who is represented by several semi-barbaric reliefs as advancing to the attack with a thunderbolt in his right hand, an eagle on his left, and a snake at his feet[3]. One relief showed him in his chariot escorting a draped and veiled goddess[4]. Another grouped him as a standing Zeus with a youthful rider named *Iambadoúles*[5]. The elder god, the goddess, and the younger god give us the familiar Thracian triad of the sky-father, the earth-mother, and their son Dionysos. The two appellations, outlandish enough in appearance, were provocative of further enquiries. *Iambadoúles*, as G. Seure pointed out, can hardly be dissociated from *Iámbe* the *doúle* of Demeter—a mythical figure born of a misconception[6]. And *Zbelsoûrdos*, with which Seure rightly connected *Zibeleïzis*, a Getic name of Salmoxis[7], has been here for the first time elucidated by Mr B. F. C. Atkinson, who takes it to mean 'Zeus' or 'the son of Zeus, the Splitter,' with reference to the thunderbolt in the god's right hand[8].

In conclusion, the lightning, as Dr Rendel Harris surmised, was sometimes deemed the whip of Zeus—a notion which not only left its mark on Greek poetry from Homer to Oppian[9], but called forth at least one memorable dedication, 'the Corcyraean whip' at Dodona[10].

So much for Zeus as lord of the lightning. We had yet to investigate his relation to the thunder[11]. Lightnings and Thunders were on occasion treated by the ancients as momentary gods (Usener's *Augenblicksgötter*) independent of Zeus[12]. From this primitive stage they soon developed into departmental gods (*Sondergötter*), being conceived as divine animals, the horses Bronte and Sterope, or as monstrous giants, the Kyklopes Brontes and Steropes, before they became wholly human figures, the personifications Bronte and Astrape or Sterope. These allegorical powers still survive in the folk-poetry of modern Greece[13]. Commonly, however, thunder was connected with a personal god (*persönlicher Gott*), Zeus the thunderer, not indeed as his voice, but as an inarticulate sound proceeding from him[14], or more often as the rumble of his chariot rolling rapidly across the sky[15]—a belief which, originating perhaps in Thessaly[16], certainly entered into Thessalian ritual[17] and myth[18].

[17] *Supra* p. 831 ff. [18] *Supra* p. 833.

Zeus as god of Thunder had a wide vogue in the north-western parts of Asia Minor. He bore the title of *Brontaîos* in the Kyzikos district[1], that of *Brontôn* in northern and eastern Phrygia[2]. As *Brontôn*, if not also as *Brontaîos*, he was served with mystic rites in a cave, being a divinity akin to Zagreus or Dionysos, whose appellative *Brómios* seems to have meant 'god of the roaring Thunder[3].' We gather that in Phrygia, as in Crete, the worshipper, seated on the rocky throne of his god, himself imitated the thunders of the reborn Zeus. Cretan timbrel and Phrygian lyre had between them transformed the thunder into something strangely like music[4].

* *
*

And here we pause. It might have been supposed that the religion of Zeus, a god of Thunder and Lightning, would be throughout a religion of terror. It was not so. The populace, taught by the playwrights, was vaguely conscious that above the shifting scenes of human life somewhere and somehow Zeus sat enthroned to mete out justice with impartial balance. If he used his thunderbolt, it would be to punish the proud and to lay their towering ambitions in the dust. The philosophers with clearer insight perceived that Zeus must be all or nought. Most of them, amid much diversity of detail, grasped the same essential fact that there is a Power Supreme, which in every place and at every moment is engaged on the godlike task of turning chaos into cosmos. Not a few of them—Pherekydes[5], Herakleitos[6], Empedokles[7], Platon[8], the Stoics[9]—spoke of It, spoke of Him, as Zeus. And to these the thunderbolt was but a symbol of his omnipotence.

It would be easy to parade both the popular and the philosophic view by marshalling an array of quotations. I choose rather to exemplify each by a single characteristic product—on the one hand a picture, on the other a poem.

The Dareios-vase is an Apulian *kratér* of magnificent proportions, found at Canusium (*Canosa*) in 1851 and now preserved in the Museum at Naples[10]. Its principal design (pl. xxxviii)[11] represents the tragic downfall of the Great King, as the result of his presumptuous invasion of Greece. Two and twenty figures are disposed

The main design on a *kratér* from Canusium[w] in the Museum at Naples: the doom of Dareios.

See page 852 ff.

[From Furtwängler—Reichhold *Griechische Vasenmal*[38] by permission of Messrs F. Bruckmann A.-G., Munich.]

in three registers, of which the lowest shows the vast resources available for the expedition. The royal treasurer is seated at a table, on which are letters corresponding with our £ *s. d.*[1] His right hand arranges the pebbles in their proper columns. His left holds an open wax-diptych inscribed '100 talents[2].' From both sides approach the satraps: one brings a pile of golden bowls, another a sack full of money, while three others empty-handed prostrate themselves in attitudes of grovelling submission. We gather that tribute will be exacted to the uttermost farthing: the royal project must be carried out, cost what it may. The second register reveals the king in council. In the centre is Dareios himself, serene and splendid. He is seated, with tiara, sceptre, and sword, on a throne worthy of a god. Indeed we recall how Aischylos described him as 'peer of the gods[3]' and how Gorgias called his son 'the Persian Zeus[4].' To left and right are grouped five of his chosen councillors, partly in Greek, partly in oriental, attire: their faces display eager interest and concern, not unmixed with doubt. Before Dareios on a circular plinth of gold stands an anxious-looking man in traveller's dress, who uplifts a warning hand. He alone dares to dissuade the king from his purpose. If successful, he will receive the brick of gold as his reward, but will be scourged for opposing the king's expressed intent[5]. If unsuccessful,—there waits the executioner with a drawn sword in his hand. In the council-chamber, then, there is debate and foreboding. The third register transports us to a higher level, where the issue has been already determined. We see the gods assembled on the summit of Olympos, here indicated simply by the rising ground-line and a couple of stars. Above the head of Dareios is seated the genuine Zeus, a thunderbolt winged for swift service at his side. Nike, leaning on his lap, points to a stately draped figure led forward by Athena. She is Hellas, presented to Zeus as the coming victor.

[1] The letters are M (*μύριοι*), Ψ (*χίλιοι*), H (*ἑκατόν*), ▷ (*δέκα*), Γ (*πέντε*), O (*ὁβολός*), < (*ἡμιωβέλιον*), T (*τεταρτημόριον*). The western Ψ is retained as a numeral, though superseded for alphabetic purposes by the eastern X (Furtwängler—Reichhold *op. cit.* ii. 148).

[2] The inscription should be read ΤΑΛΝ | ΤΑ: Η, that is *τάλ(α)ν|τα : (ἑκατόν)* (P. Kretschmer *Die Griechischen Vaseninschriften* Gütersloh 1894 p. 213).

[3] Aisch. *Pers.* 633 *μακαρίτας ἰσοδαίμων βασιλεύς.*

[4] Gorg. *frag.* 2 Thompson *ap.* Longin. *de sublim.* 3. 2 *Ξέρξης ὁ τῶν Περσῶν Ζεύς* (*supra* i. 338 n. 2).

[5] Ail. *var. hist.* 12. 62. So Com. Quaranta in the *Bull. Arch. Nap.* Nuova Serie 1854 ii. 170, H. Heydemann in the *Ann. d. Inst.* 1873 xlv. 30, A. Baumeister in his *Denkm.* i. 408. But A. Furtwängler *op. cit.* ii. 146f. objects that the circular plinth is of the wrong shape for a brick of gold and must be viewed as an orator's platform (*βῆμα*). Furtwängler's objection would, I think, apply at least as forcibly to his own proposal.

On the left are Artemis riding a horned doe[1] and Apollon with a swan on his knee. Artemis may hint at Marathon, where the battle took place on her festival[2], or may anticipate the sea-fight off Artemision[3], and the full moon that shone on Salamis[4]. Apollon recalls the Delian confederacy. On the right Asia, with crown and sceptre, has fled for refuge to the altar of a terminal goddess, perhaps Aphrodite *Ourania*[5]. Before her stands a sinister figure in the guise of a Fury with a panther-skin round her shoulders, snakes in her hair, and a pair of torches in her hands. This is *Apá*[*te*] 'Deception,' a lying spirit[6] whose mission is to lure Asia away from the protection of the Asiatic goddess[7]. So the three zones of decoration present us with three acts from one historic drama. The vase-painter must have been inspired by some lost tragedy, not improbably the *Persians* of Phrynichos[8], for on the circular plinth in the very centre of his design is written the single word *Pérsai.*

The populace, assembled in the theatre, regarded Zeus god of Thunder and Lightning as a power that on sundry momentous occasions had intervened to punish pride. And what of the philosophers? They saw in the 'ever-living bolt' a pledge and promise of continuous divine activity—witness one nearly contemporary document, the Stoic *Hymn to Zeus*[9]. Let us, before closing the volume, join Kleanthes in that great ascription of praise:

[1] *Supra* p. 465 f.

Cleanthes) Gottingae 1889 p. 3 ff., W. L. Newman, 'Cleanthes' Hymn to Zeus' in the *Class. Rev.* 1892 vi. 181, J. von Arnim *Stoicorum veterum fragmenta* Leipzig 1905 i. 121 ff. o. 537, *id.* in Pauly—Wissowa *Real-Enc.* xi. 558 ff.

κύδιστ' ἀθανάτων, πολυώνυμε, παγκρατὲς αἰεί,
Ζεῦ, φύσεως ἀρχηγέ, νόμου μέτα πάντα κυβερνῶν,
χαῖρε· σὲ γὰρ πάντεσσι θέμις θνητοῖσι προσαυδᾶν.
ἐκ σοῦ γὰρ γένος ἐσμέν, † ἧχου[1] μίμημα λαχόντες
μοῦνοι, ὅσα ζώει τε καὶ ἕρπει θνήτ' ἐπὶ γαῖαν·
τῷ σε καθυμνήσω καὶ σὸν κράτος αἰὲν ἀείσω.

Most glorious of immortals, many-named[2],
Almighty Zeus, creation's primal lord,
Whose lawful government is over all,
Hail!—for we mortals unto thee may speak.
We are thine offspring[3]; we alone of all things
That live and move on earth can copy God.
Thee therefore I will praise, thy power will sing.

[1] Corrections either save or sacrifice *γένος ἐσμέν*. On the one hand, J. J. Scaliger cj. *ὄχου* ('corpus enim *ὄχημα ψυχῆς*'), R. F. P. Brunck cj. *ἴῆς*, C. W. Ahlwardt cj. *ἴσου* ('wir sind theilhaftig geworden des Bildes deiner Gleichheit, des Bildes von dir selber'), C. Petersen cj. *ὃ σοῦ*, T. Bergk cj. *ὅλου*, H. Usener cj. **ὑδῆς* (cp. *ὑδεῖν* etc.), C. Wachsmuth cj. *νοῦ σοῦ τμῆμα* or *ἃ δὴ σοῦ τμῆμα*, W. L. Newman cj. *ἀγοῦ* ('leader'), E. B. Birks cj. *ἴχνους*. On the other hand, F. Gedike cj. *ἐκ σοῦ*, A. Meineke cj. *γενόμεσθα λόγου*, C. Wachsmuth cj. *ἦχου τίμημα* ('linguae honorem'), A. C. Pearson formerly cj. *γενόμεσθα μόνου* or *ἐκ σοῦ*, J. von Arnim cj. *γένος εἶσ' ἦχου μίμημα*.

I am indebted to Prof. Pearson for the following new and attractive solution (June 17, 1922): 'I have looked up my notes and find that I have suggested *θεοῦ* to Powell and E. V. Arnold... I should account for the mysterious *ἧχου* as a supra-linear gloss *i.e.* *ἡ Χου* = *ἡ Χριστοῦ*. That this would be a natural Christian gloss may perhaps be supported by 1 Cor. xi. 1 *μιμηταί μου γίνεσθε καθὼς κἀγὼ Χριστοῦ*, Eph. v. 1 *γίνεσθε οὖν μιμηταὶ τοῦ θεοῦ*, 1 Th. i. 6 *μιμηταὶ ἡμῶν ἐγενήθητε καὶ τοῦ Κυρίου*. Now from the Stoic point of view *cf.* Musonius *ap.* *Stob. flor.* 117. 8 *ἄνθρωπος μίμημα θεοῦ μόνον τῶν ἐπιγείων*, which sounds like an echo of Cleanthes. The only objection I see is that it involves the adoption of *γενόμεσθα*, and I don't like to suggest confusion with Aratus.'

[2] E. Zeller *The Stoics, Epicureans and Sceptics*[2] trans. O. J. Reichel London 1880 p. 358: 'To the Stoics, as to their predecessor Heraclitus, Zeus is the one primary Being, who has engendered, and again absorbs into himself, all things and all Gods. He is the universe as a unity, the primary fire, the ether, the spirit of the world, the universal reason, the general law or destiny. All other Gods, as being parts of the world, are only parts and manifestations of Zeus—only special names of the one God who has many names.' *Id. ib.* p. 358 n. 2 cp. Diog. Laert. 7. 147 *θεὸν δ' εἶναι ζῷον ἀθάνατον, λογικόν, τέλειον ἢ νοερὸν ἐν εὐδαιμονίᾳ, κακοῦ παντὸς ἀνεπίδεκτον, προνοητικὸν κόσμου τε καὶ τῶν ἐν κόσμῳ· μὴ εἶναι μέντοι ἀνθρωπόμορφον. εἶναι δὲ τὸν μὲν δημιουργὸν τῶν ὅλων καὶ ὥσπερ πατέρα πάντων κοινῶς τε καὶ τὸ μέρος αὐτοῦ τὸ διῆκον διὰ πάντων, ὃ πολλαῖς προσηγορίαις προσονομάζεσθαι κατὰ τὰς δυνάμεις. B. L. T. *Il.* 16. 233 *τινὲς δὲ "ἀναδωδωναῖε" ὑφ' ἓν, παρὰ τὴν ἀνάδοσιν τῶν ἀγαθῶν.*

[3] *Supra* i. 664 n. 3.

σοὶ δὴ πᾶς ὅδε κόσμος, ἑλισσόμενος περὶ γαῖαν,
πείθεται, ᾗ κεν ἄγῃς, καὶ ἑκὼν ὑπὸ σεῖο κρατεῖται·
τοῖον ἔχεις ὑποεργὸν ἀνικήτοις ἐνὶ[1] χερσὶν
ἀμφήκη, πυρόεντ', ἀειζώοντα[2] κεραυνόν·
τοῦ γὰρ ὑπὸ πληγῆς φύσεως πάντ' ἐρρίγα<σιν>[3]·
ᾧ σὺ κατευθύνεις κοινὸν λόγον, ὃς διὰ πάντων
φοιτᾷ, μιγνύμενος μεγάλοις μικροῖς τε φάεσσι·
[ὡς τόσσος γεγαὼς ὕπατος βασιλεὺς διὰ παντός,][4]
οὐδέ τι γίγνεται ἔργον ἐπὶ χθονὶ σοῦ δίχα, δαῖμον,
οὔτε κατ' αἰθέριον θεῖον πόλον οὔτ' ἐνὶ[5] πόντῳ,
πλὴν ὁπόσα ῥέζουσι κακοὶ σφετέρῃσιν[6] ἀνοίαις·

Lo, the whole world[7] revolving round the earth
Obeys thy lead and wills to do thy will[8].
Such the strong help thou hast in hands supreme,
A two-edged, fiery, ever-living bolt[9].
Beneath its blows all nature shuddering reels.
Herewith thou makest one great law to rule
The universe, larger and lesser lights.
[So vast the power of thy kingly sway.]
Nay, nought on earth befalls apart from thee,
Nor in the heaven above, nor in the deep,
Save folly wrought by the wicked[10]. Yet here too

[1] J. von Arnim keeps *ὑπὸ* as read by cod. F. R. F. P. Brunck cj. *ἐνὶ*, A. Meineke cj. *μετὰ*.

[2] U. von Wilamowitz-Moellendorff and J. von Arnim keep the *πυρόεντα ἀειζώοντα* of cod. F, the hiatus notwithstanding. C. Wachsmuth corr. *πυρόεντ', αἰειζώοντα*. A. C. Pearson's *ἀειζώοντα* might be defended by *Od.* 13. 109 *ἀενάοντα* and the like.

[3] Cod. F has *ἔρηγα* followed by space for ten letters. Fulvius Ursinus cj. *ἐῤῥίγασιν*. C. Wachsmuth says: 'num fuit *Ζεῦ, πάντ' ἐρριγεν*?' U. von Wilamowitz-Moellendorff cj. *πληγῇ φύσεως ἔρριγε τὰ πάντα*. A. C. Pearson cj. *ἔργα <δαμάσθη>*. J. von Arnim cj. *πάντ' ἔργα <τελεῖται>*.

[4] A. Meineke assumed a lacuna before this line. A. C. Pearson condemned the line as spurious or corrupt. J. von Arnim cj. *ᾧ σὺ τόσος γεγαὼς ὕπατος βασιλεὺς διὰ παντός*.

[5] So R. F. P. Brunck for *ἐπὶ* cod. F.

[6] Cod. F, followed by J. von Arnim, reads *σφετέραισιν*.

[7] Diog. Laert. 7. 138 *καὶ αὐτὴν δὲ τὴν διακόσμησιν τῶν ἀστέρων κόσμον εἶναι λέγουσι.*

[8] Cp. Kleanthes *frag.* 91 Pearson *ap.* Epiktet. *man.* 53 *ἄγου δέ μ', ὦ Ζεῦ, καὶ σύγ' ἡ πεπρωμένη, | οποι ποθ' ὑμῖν εἰμὶ διατεταγμένος, | ὡς ἕψομαί γ' ἄοκνος· ἢν δὲ μὴ θέλω | κακὸς γενόμενος, οὐδὲν ἧττον ἕψομαι* with A. C. Pearson's commentary.

[9] Kleanthes is building on the foundations of Herakleitos (*supra* i. 28 n. 6).

[10] A. C. Pearson *ad loc.*: 'The explanations given by the Stoics of this weak point in their system are hopelessly confused and contradictory, as may be seen from an examination of the passages cited in the notes to Zeller, p. 189—193.... we may perhaps suppose that Cleanthes accounted for the existence of moral evil somewhat as follows:—evil is not directly due to God, but is a necessary accompaniment of the process, whereby he created the world out of himself. At the same time, the omnipotence of God is vindicated by the consideration that evil is ultimately swallowed up in good,

ἀλλὰ σὺ καὶ τὰ περισσά <τ'[1]> *ἐπίστασαι ἄρτια θεῖναι,*
καὶ κοσμεῖν τἄκοσμα καὶ οὐ φίλα σοὶ φίλα ἐστίν[2]*,*
ὧδε γὰρ εἰς ἓν πάντα[3] *συνήρμοκας ἐσθλὰ κακοῖσιν,*
ὥσθ' ἕνα γίγνεσθαι πάντων λόγον αἰὲν ἐόντα,
ὃν φεύγοντες ἐῶσιν[4] *ὅσοι θνητῶν κακοί εἰσι,*
δύσμοροι, οἵ τ' ἀγαθῶν μὲν ἀεὶ κτῆσιν ποθέοντες
οὔτ' ἐσορῶσι θεοῦ κοινὸν νόμον, οὔτε κλύουσιν,
ᾧ κεν πειθόμενοι σὺν νῷ βίον ἐσθλὸν ἔχοιεν.
αὐτοὶ δ' αὖθ' ὁρμῶσιν ἄνοι κακὸν ἄλλος ἐπ' ἄλλο[5]*,*
οἱ μὲν ὑπὲρ δόξης σπουδὴν δυσέριστον ἔχοντες,
οἱ δ' ἐπὶ κερδοσύνας τετραμμένοι οὐδενὶ κόσμῳ,
ἄλλοι δ' εἰς ἄνεσιν καὶ σώματος ἡδέα ἔργα
Thou knowest how to even up the odd,
Order disorder, and turn hate to love[6].
Thou hast so welded all things into one,
Joined good with evil, that there runs for ever
One law through all, which bad men scorn and scape.
Ill-fated folk! They hanker after wealth,
And neither see God's universal law,
Nor hear it and in wise obedience
Attain the life worth living. But themselves
Speed their own witless way to diverse ills—
Some sunk in desperate strife for glory vain,
Some bent on money-making's reckless quest,
Others on ease and bodily delights.

and that the apparent irregularity of nature is in reality only a phase in the working of a higher law.'

[1] So H. Sauppe for *περισσὰ ἐπίστασαι* cod. F, which is kept by U. von Wilamowitz-Moellendorff.

[2] U. von Wilamowitz-Moellendorff cj. *τεύχειν* for *ἐστίν*, to escape the hiatus.

[3] R. F. P. Brunck cj. *ἅπαντα*.

[4] U. von Wilamowitz-Moellendorff suspects *ἐῶσιν*.

[5] Cod. F has *ἄνευ κακοῦ ἄλλος ἐπ' ἄλλα*. Fulvius Ursinus cj. *καλοῦ*. H. Sauppe corr. *κακὸν* and *ἄλλο*. C. Wachsmuth restored *ἄνοι κακὸν ἄλλος ἐπ' ἄλλο*. U. von Wilamowitz-Moellendorff, on the ground that honours, wealth, and pleasure were not *κακὰ* but *ἀδιάφορα*, would read *ἄνευ λόγου ἄλλος ἐπ' ἄλλα*.

[6] It is interesting to remember that Kleanthes hailed from Assos, where there was a cult of Zeus Ὁμονῶος (J. R. S. Sterrett in the *Papers of the American School of Classical Studies at Athens* 1882—1883 i. 35 ff. no. 15, 1 ff. *ὁ ἱερεὺς τοῦ Σεβαστοῦ θ|εοῦ Καίσαρος, ὁ δὲ αὖ[τ]|ὸς καὶ πάτριος βασιλεὺ|ς καὶ ἱερεὺς τοῦ Διὸς τ|οῦ Ὁμονώ(ι)ου, καὶ γυμ|νασίαρχος, Κοΐντος Λό|λλιος Φιλέταιρος τὴν | στοὰν ἀνέθηκεν θεῷ Κ|αίσαρι Σεβαστῷ καὶ τῷ δή|μῳ* κ.τ.λ.), whose title—perhaps a variant form of Ὁμολώϊος, Ὁμολῶος (A. Boeckh on the *Corp. inscr. Gr.* ii no. 3569, Gruppe *Gr. Myth. Rel.* pp. 309 n. 9, 1117 n. 1, O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 2263 f., 2269. See further *infra* Append. B Boiotia)—was probably connected by folk-etymology with *ὁμόνοια* (cp. Istros *ap.* Phot. *lex.*, Souid. *s.v.* Ὁμολώϊος *Ζεύς*·... *Ἴστρος δὲ ἐν τῇ ιβ' τῆς Συναγωγῆς, διὰ τὸ παρ' Αἰολεῦσι τὸ ὁμονοητικὸν καὶ εἰρηνικὸν ὅμολον λέγεσθαι*).

.....ἐπ' ἄλλοτε δ' ἄλλα φέροντες[1],
σπεύδοντες μάλα πάμπαν ἐναντία τῶνδε γενέσθαι.
ἀλλὰ Ζεῦ πάνδωρε, κελαινεφές, ἀργικέραυνε[2],
ἀνθρώπους <μὲν[3]> ῥύου ἀπειροσύνης ἀπὸ λυγρῆς,
ἣν σύ, πάτερ, σκέδασον ψυχῆς ἄπο, δὸς δὲ κυρῆσαι
γνώμης, ᾗ πίσυνος σὺ δίκης μέτα πάντα κυβερνᾷς[4],
ὄφρ' ἂν τιμηθέντες ἀμειβώμεσθά σε τιμῇ,
ὑμνοῦντες τὰ σὰ ἔργα διηνεκές, ὡς ἐπέοικε
θνητὸν ἐόντ', ἐπεὶ οὔτε βροτοῖς γέρας ἄλλο τι μεῖζον,
οὔτε θεοῖς, ἢ κοινὸν ἀεὶ νόμον ἐν δίκῃ ὑμνεῖν.

Yea, diverse ills they reap, now this, now that,
Though fain to win the very opposite.
But thou, Zeus, giver of all, with thy black cloud
And glittering bolt[5], save men from folly's bane.
O Father, cleanse our soul, grant us to find
Wisdom wherewith thou governest all aright[6],
That honoured thus we too may honour thee,
Hymning thy deeds for ever, as befits
A mortal man; for, mortal or immortal,
None hath a greater guerdon than to hymn
The common rule rightly for evermore.

[1] So cod. F with space for sixteen letters at the beginning of the line. A. H. L. Heeren cj. *ἄλλοτέ γ'*. H. Usener cj. *ἄλλοτεν*. A. Meineke cj. *φέρονται*. U. von Wilamowitz-Moellendorff prints <*οὐδέ ποτ' ἐς τέλος ἦλθον,*> *ἐπ' ἄλλοτε δ' ἄλλα φέρονται*. J. von Arnim 'exempli causa' supplies <*ἀλλὰ κακοῖς ἐπέκυρσαν*>, *ἐπ' ἄλλοτε δ' ἄλλα φέρονται*.

[2] So A. Meineke for *ἀρχικέραυνε* cod. F, which is kept by U. von Wilamowitz-Moellendorff.

[3] J. J. Scaliger add. *μὲν*. C. Petersen cj. *εἴρυσσαι*. A. C. Pearson cj. *ἐκρύου*. U. von Wilamowitz-Moellendorff transposes *ῥύου μὲν*, which may be right.

[4] C. Wachsmuth, A. C. Pearson, and J. von Arnim prefer the spelling *κυβερνᾶς*.

[5] *Supra* i. 31 n. 4.

[6] Herakleitos again (*frag.* 19 Bywater, 41 Diels *ap.* Diog. Laert. 9. 1 *εἶναι γὰρ ἓν τὸ σοφόν, ἐπίστασθαι γνώμην, ὁτέη ἐκυβέρνησε πάντα διὰ πάντων*).

APPENDIX A.

KAIROS.

Kairos as a distinct personification first emerges in the middle of *s.* V B.C., when Ion of Chios composed a hymn in his honour. Pausanias[1] mentions it *à propos* of an altar to him in the north-eastern part of the *Áltis*: 'Hard by the entrance into the *Stádion* are two altars. One they call the altar of Hermes *Enagónios*, the other that of Kairos. I am aware that Ion of Chios actually made a hymn to Kairos and in his hymn gives the genealogy of Kairos as the youngest of the sons of Zeus.' It has been conjectured with some probability that this hymn was written for the original dedication of the Kairos-altar at Olympia[2].

Whether Kairos was definitely worshipped elsewhere, we cannot say. Menandros 'spoke of him as a god[3],' and Lysippos 'enrolled him among the gods[4]' by making his famous effigy. But neither phrase can be pressed to imply a practical cult.

Of the Lysippean Kairos numerous late descriptions and copies are extant[5]. These, however, differ widely among themselves: some must, many may, all might, refer to subsequent modifications of the type. Our earliest and most trustworthy source is Poseidippos (*c.* 270 B.C.), who devotes an epigram to the statue[6]. He informs us that it was fashioned by Lysippos of Sikyon, that it stood on tip-toe as a runner with wings attached to its feet, that it carried a razor in its right hand, that it was long-haired in front but bald behind, and that it was set up 'in the vestibule'—presumably of some Sicyonian building.

But how came Lysippos, the sculptor of athletes, to attempt such a curious piece of allegory? That is a problem which has never been squarely faced. My own conviction is that the statue was not, to speak strictly, allegorical at all. Lysippos, who excelled in the rendering of graceful male forms and is said to have paid special attention to the hair[7], wished simply to portray the Age of Puberty. He therefore modelled a youthful runner, with wings[8] on his feet, holding the razor[9] that had shorn his votive tress for the well known puberty-

[1] Paus. 5. 14. 9.

[3] Anth. Pal. 10. 52. 1 (Palladas) *εὖ γε λέγων τὸν Καιρὸν ἔφης θεόν, εὖ γε, Μένανδρε,* | *κ.τ.λ.*

[4] Himer. *ecl.* 14. 1 *ἐγγράφει τοῖς θεοῖς τὸν Καιρόν, κ.τ.λ.*

[5] The fullest list is given by Lamer in his admirable article in Pauly—Wissowa *Real-Enc.* x. 1508—1521.

[6] *Anth. Pal.* 16. 275. 1 ff. (Poseidippos).

[7] Plin. *nat. hist.* 34. 65.

[8] These may of course have been a later addition; but similar wings are attached to the feet of the 'Resting Hermes' at Naples (*Guida del Mus. Napoli* p. 208 f. no. 841, Brunn—Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 282), which—in the opinion of most critics (*e.g.* M. Collignon *Lysippe* Paris 1904 pp. 112, 115 with fig. 24)—emanated from the school, and reflects the style, of Lysippos.

[9] Lamer *loc. cit.* p. 1516 on grounds which to me seem inadequate denies that Lysippos' Kairos held a razor, and hence infers that even Poseidippos was not describing the original statue.

rite[1]. The resultant figure took the popular fancy, and moralists soon[2] discovered a deep significance in the contrast between the front hair and the back, a significance hardly intended by the sculptor. A further aptitude was perhaps found[3] in the fact that the name *Kairós* is related to the verb *keiro*, 'I shave[4].'

Symbolism, once introduced, grew apace. Gems of the Hellenistic age[5],

Fig. 796.

Fig. 798.

Fig. 797.

when Eros and Psyche were prime favourites[6], added wings on the shoulders (fig. 796 ff.) and a butterfly on the hand (fig. 796 f.). The globe beneath the foot[7] (fig. 798) and the balance suspended in the air (fig. 796 f.) or poised on the razor's edge (fig. 798), are attributes appropriate to divinities of fate such as Nike[8] and

[1] *Supra* i. 23 n. 6.

[2] First in Poseidippos' epigram (*Anth. Pal.* 16. 275. 7 ff.).

[3] Cp. Poll. 2. 33 *ἀκαρὴς καιρός* and context.

[4] So P. Persson in the *Zeitschrift für vergleichende Sprachforschung* 1895 xxxiii. 288 (*καιρός* < *καρ-ιο-*). Dr Giles too told me (Oct. 22, 1911) that, starting from the root of *κείρω* in the weak grade *κρ-*, we could assume *kr̥-i̯o-s* > *καρ-ιο-s* > *καιρός*, cp. *khr̥-i̯ō* > *χαρ-ιω* > *χαίρω*.

[5] (*a*) Convex cornelian in the collection of C. Newton-Robinson. Kairos, bearded, with forelock and bald head, wings on shoulders and heels, steps towards the right, holding a butterfly in his right hand and supporting with his left the depressed pan of a balance suspended before him (Furtwängler *Ant. Gemmen* i pl. 43, 49 (=my fig. 796), ii. 207).

(*b*) Gem with the design of (*a*) reversed (Furtwängler *Ant. Gemmen* i pl. 43, 51, ii. 208). This gem appears to be identical with (*b'*).

(*b'*) Gem from the Blacas collection. 'Kairos, bearded, with wings on shoulders and on heels, holding out pair of scales, and a butterfly' (*Brit. Mus. Cat. Gems* p. 143 no. 1199. My fig. 797 is from a cast kindly furnished by Mr A. H. Smith).

(*c*) Convex gem in an unknown collection. Kairos, bearded, with wings on shoulders and heels, runs towards the right. His right foot rests on a ball. His right hand carries a razor, on the edge of which is poised a balance. His left hand is held beneath one of its pans (Furtwängler *Ant. Gemmen* i pl. 43, 50, ii. 207 f.). This gem appears to be identical with (*c'*).

(*c'*) Convex onyx from the Blacas collection. 'Kairos, bald on back of head, bearded, wings on shoulders and heels; runs to r. [with right foot on ball], holding out scales in front [balanced on razor], but without butterfly' (*Brit. Mus. Cat. Gems* p. 143 no. 1200. My fig. 798 is from a cast kindly furnished by Mr A. H. Smith).

[6] *Infra* Append. G *sub fin.* and *supra* p. 645 n. 4.

[7] Kallistrat. *ἐκφράσεις* 6. 1—4 ('On the statue of Kairos at Sikyon') states that the figure wrought by Lysippos for the Sicyonians was a bronze boy in the bloom of youth, for the most part resembling Dionysos, but with unusual hair—long in front and at the sides, free of tresses at the back—and with winged heels set on a sphere. Nothing is said of razor or scales.

[8] F. Studniczka *Die Siegesgoettin* Leipzig 1898 p. 20 pl. 4, 23, 26 f. See also *supra* i. 48 f. figs. 20, 22.

Nemesis[1]. But the most remarkable innovation of the period remains to be mentioned. The gems in question all represent the nude and agile figure, not merely with well-marked forelock and smooth occiput, but also with a full beard. This can only mean that the verbal misuse of *kairós* for *chrónos*[2] has led to a corresponding typological confusion of Kairos with Chronos.

It is, indeed, likely that confusion became more confounded, since Chronos was constantly interchanged with Kronos[3] and Kronos too appears as a bald-

Fig. 799.

headed god hastening along with a sickle-knife in his hand[4]. Thus we reach the singular result that Kairos 'youngest of the sons of Zeus' has actually been transformed into a figure resembling that of his own grandfather Kronos[5], while by a further surprising coincidence *Krónos*, as we have seen[6], is derivable from the same root as *Kairós*.

Others distinguished the types and continued to portray Kairos as a youthful god. A relief at Turin (fig. 799)[7] shows him, with forelock and tonsure, balancing

[1] H. Posnansky *Nemesis und Adrasteia* Breslau 1890 p. 113. See also *supra* pp. 99 n. 1, 734 n. 3.

[3] *Supra* p. 374.

[4] *Supra* p. 550 fig. 426.

[5] We are almost reminded of Zagreus the shape-shifter, who appeared now as a youthful Zeus, now as an aged Kronos (*supra* i. 398 f., 647).

[6] *Supra* p. 549 n. 6.

[7] A. Rivautella—J. P. Ricolvi *Monumenta Taurinensia* Augustæ Taurinorum 1747 ii. 4 ff. no. 22 with pl., E. Curtius 'Die Darstellungen des Kairos' in the *Arch. Zeit.* 1875 xxxiii. 5 f. pl. 1, 1 (photograph of cast=my fig. 799), H. Heydemann *Winckelmannsfest-Progr. Halle* 1879 p. 35 Turin: Museo Lapidario no. 1 (thinks the slab a modern copy of an ancient relief: unconvincing), H. Dütschke *Antike Bildwerke in Oberitalien* Leipzig 1880 iv. 73 f. no. 117, Friederichs—Wolters *Gipsabgüsse* p. 751 no. 1897, A. Baumeister

the scales on the edge of a razor and depressing one pan with his finger[1]. The would-be archaic wings, floating tresses, muscular body, and barocco pose all point to Pergamene influence.

Equipoise on the razor was a trait naturally suggested by the old Greek proverb 'it stands on the razor's edge[2].' An engraved cornelian of imperial date in the Berlin collection figures Kairos himself, scales in hand, treading gingerly along the narrow loom of a steersman's paddle (fig. 800)[3]. And Phaedrus must have seen similar representations in which the light-footed god even trod the razor's edge—*cursu volucri, pendens in novacula*[4],—unless indeed we venture with G. Thiele[5] to translate the last phrase '*weighing* on the razor's edge,' in which case Phaedrus and the Turin relief would be in exact agreement.

Fig. 800.

The recognition of Kairos on Italian soil was attended by a certain grammatical awkwardness. Phaedrus describes the god in words of the masculine gender[6], but names him *Tempus* in the neuter[7], and says that he signifies *occasionem rerum...brevem*[8]. *Occasio*, as the Latin equivalent of *Kairós*, was in fact the name current during the third[9] and fourth[10] centuries of our era; and, being a feminine term, it entailed a change of sex. Ausonius in one of his epigrams[11] professes to expound a group of Kairos and Metanoia carved by in his *Denkm.* ii. 771 f. fig. 823 ('aus spät-römischer Zeit, aber unzweifelhaft echt'), B. Sauer in Roscher *Lex. Myth.* ii. 900 fig., F. Durrbach in Daremberg—Saglio *Dict. Ant.* iii. 787 fig. 4251 ('la reproduction d'un original grec'), Reinach *Rép. Reliefs* iii. 423 no. 3. Italian marble. Height 0·60^{m}; breadth 0·65^{m}.

For an exact *replica* on sale at Florence see Friederichs—Wolters *op. cit.* p. 751 f. no. 1898 n.; and for a fragmentary relief of the same type at Athens, E. Curtius *loc. cit.* 1875 xxxiii. 6 pl. 2, 4, L. von Sybel *Katalog der Sculpturen zu Athen* Marburg 1881 p. 375 no. 5987, Friederichs—Wolters *op. cit.* p. 751 f. no. 1898.

[1] Cp. Himer. *ecl.* 14. 1 ποιεῖ (*sc.* ὁ Λύσιππος) παῖδα τὸ εἶδος ἁβρόν, τὴν ἀκμὴν ἔφηβον, κομῶντα μὲν τὸ ἐκ κροτάφων εἰς μέτωπον, γυμνὸν δὲ τὸ ὅσον ἐκεῖθεν ἐπὶ τὰ νῶτα μερίζεται· σιδήρῳ τὴν δεξιὰν ὡπλισμένον, ζυγὸ τὴν λαιὰν ἐπέχοντα, πτερωτὸν τὰ σφυρά, οὐχ ὡς μετάρσιον ὑπὲρ γῆς ἄνω κουφίζεσθαι, ἀλλ' ἵνα δοκῶν ἐπιψαύειν τῆς γῆς λανθάνῃ κλέπτων τὸ μὴ κατὰ γῆς ἐπερείδεσθαι.

[2] First in *Il.* 10. 173 ἐπὶ ξυροῦ ἵσταται ἀκμῆς. See further Stephanus *Thes. Gr. Ling.* v. 1692 B—D.

[3] Furtwängler *Geschnitt. Steine Berlin* p. 273 no. 7358 pl. 55, E. Curtius in the *Arch. Zeit.* 1875 xxxiii. 4 pl. 2, 2 (=my fig. 800).

[4] Phaedr. 5. 8. 1.

[5] G. Thiele 'Phaedrus-Studien' in *Hermes* 1906 xli. 577 ff. Dr J. P. Postgate in a letter to me (Aug. 30, 1917) says: 'The absolute use of *pendēre* is certainly possible though at first strange, and this perhaps bas led to the belief that the participle comes from *pendere*. The expression of the thought is compressed in other respects; and Havet reads Curs*or* uolucri pendens in nouacula, Caluus comosa fronte, nudo *occipitio* for curs*u*.' Dr Postgate adds that in *Il.* 10. 173 ἵσταται 'should I suppose be understood of "weighing," a common meaning of ἵστημι, though the commentators do not say so.'

[6] Phaedr. 5. 8. 2 f. [7] *Id.* 5. 8 *titulus*, 5. 8. 7. [8] *Id.* 5. 8. 5.

[9] Cato *disticha* 2. 26. 2 fronte capillata, post est Occasio calva.

[10] Paulin. Nolan. *epist.* 16. 4 (lxi. 230 B Migne) unde et Spes et Nemesis et Amor atque etiam Furor in simulacris coluntur, et occipiti calvo sacratur Occasio, et tua ista Fortuna lubrico male nixa globo fingitur (*figuratur* codd. F.P.U.). nec minore mendacio Fata simulantur vitas hominum nere de calathis aut trutinare de lancibus.

[11] Aus. *epigr.* 33 Peiper.

Pheidias (!). *Metánoia* is comfortably Latinised as *Paenitentia.* But the god *Kairós* must needs become the goddess *Occasio,* poised on a little wheel[1], with winged feet and the traditional *coiffure.*

[1] Furtwängler *Ant. Gemmen* i pl. 30, 38, ii. 149 publishes a gem, on which Kairos as a nude youthful runner, with wings on shoulders, winglets on ankles, small round mirror (?) in right hand and whip in left, sets one foot on a four-spoked wheel. Inscription: **L · S · P.**

A limestone relief (height on left 0·40^{m}, breadth at bottom 0·27^{m}) of *s.* iii or iv from Thebes, now at Cairo, shows a youthful figure in military costume, with wreath, shoulder-wings, knife, wheel, and balance, running towards the right. Below are two females, one flying at the same pace, the other left behind in an attitude of dejection. J. Strzygowski *Koptische Kunst* (*Service des Antiquités de l'Égypte: Catalogue général des Antiquités Égyptiennes du Musée du Caire*) Vienne 1904 p. 103 f. no. 8757 fig. 159 calls them Kairos, *πρόνοια* and *μετάνοια.* Cp. A. Muñoz in *L'Arte* 1905 viii. 150 fig. 5, O. M.

Fig. 801.

Dalton *Byzantine Art and Archaeology* Oxford 1911 p. 158 with fig. 65 (=my fig. 801). But P. Perdrizet in the *Bull. Corr. Hell.* 1912 xxxvi. 263 ff. fig. 1 takes the subject to be Nemesis trampling on Hybris (*supra* i. 269 fig. 195), with Metanoia behind. Cp. Lamer in Pauly—Wissowa *Real-Enc.* x. 1514. The latter interpretation is probably correct, though the type of Nemesis here is influenced by that of Kairos.

A relief from Thasos, now at Constantinople, has two niches side by side. In the one stands a youthful winged figure in short *chitón* and *himátion,* with balance in right hand and wheel beneath feet. In the other is a pair of draped females, touching bosom of dress with right hand and holding short rod in left. A. Muñoz in *L'Arte* 1906 ix. 212 ff. fig. 1 viewed them as Kairos (or Bios) with Pronoia and Metanoia. But O. Rossbach in

Having rung the changes from youth to eld and from male to female, this Protean personage reappears in Byzantine letters and art, sometimes under the old name of Chronos, sometimes under the new name of Bios.

Georgios Kedrenos (*c.* 1100 A.D.) states that the masterpieces collected in the House of Lausos[1] at Constantinople included 'the figure by Lysippos representing Chronos, bald behind, long-haired before[2].' Kedrenos' statement is very possibly true[3], though Lamer infers from the name Chronos that we have here to do, not with the original Lysippean figure, but with a bearded copy of it[4] Again, Ioannes Tzetzes (born *c.* 1110 A.D.) in his historical poem twice over nforms us that, when Alexander had let slip an opportunity, Lysippos of Sikyon made him an effigy of Chronos

> 'Deaf, bald behind, wing-footed on a sphere,
> And offering naught but a knife to his follower[5].'

Tzetzes further spends a score of lines on insisting that this was Chronos, not, as sundry wiseacres maintained, Bios[6]. He had already said the same thing in greater detail in one of his letters[7]. And, after him, Nikephoros Blemmydes (1197/8—1272 A.D.) describes the group in almost identical terms[8]. We gather

Roscher *Lex. Myth.* iii. 157 f. fig. 6 proved that they are Nemesis and the Nemeseis; and P. Perdrizet *loc. cit.* p. 267 suggested the Nemesis of Alexandreia and the Nemeseis of Smyrna (*supra* i. 270 fig. 197, 273). Cp. A. Legrand in Daremberg—Saglio *Dict. Ant.* iv. 54 fig. 5300, Reinach *Rép. Reliefs* ii. 174 no. 3, Lamer *loc. cit.*

that some copy of Lysippos' runner, mounted on a ball, had been amplified by the addition of a second figure portraying the man who has allowed his opportunity to pass by and now pursues it in vain.

Among the wiseacres denounced by Tzetzes must be reckoned his contemporary Theodoros Prodromos (first half of *s.* xii A.D.), who in an extant epigram[1] describes Bios as a naked man, with wheels beneath his feet and wings about his shins, bearing a balance in his hand, and easily escaping from his pursuer, though holding out hopes of return. The poem is well illustrated by a fragmentary relief (fig. 802)[2] let into the pavement under the steps of the ambo in

ὁποίαν ἔχει τὴν φυγὴν ὁ χρόνος ἐποίησε τοῦτον κωφόν, ὀπιστοφάλακρον (*leg.* *ὀπισθοφάλακρον*), *πτερόποδα, καὶ ἐπάνω τοῦ τροχοῦ βεβηκότα, μάχαιραν διδόντα κάτωθεν ἱσταμένῳ τινί· κωφὸν μέν, ὡς πρὸς τοὺς αὐτὸν φωνοῦντας, μηδαμῶς αἰσθανόμενον· φαλακρὸν δὲ τὰ ὄπισθεν, ὡς ἀδυνάτου ὄντος ὄπισθεν διώκοντα τινὰ κρατῆσαι αὐτόν· πῶς δέ τις αὐτὸν παραδραμόντα φθάσαι ἰσχύσειε πτερόποδα ὄντα καὶ ἐπὶ σφαίρας ἱστάμενον; διδόντα δὲ ξίφος, διότι οἱ μήτε δυνάμενοι τῆς κόμης κρατῆσαι μήτε φθάσαι φεύγοντα τιτρώσκονται τῷ βέλει τῆς λύπης ὡς τῆς ζημίας ἐπαισθανόμενοι. [1] Theod. Prodr. *εἰς εἰκονισμένον τὸν βίον* (cxxxiii. 1419 A—1420 A Migne)

ἐμὲ τὸν Βίον, ἄνθρωπε, δέξαι σου παραινέτην.
ἔτυχες, εὗρες, ἔλαβες, κατέσχες μου τὰς τρίχας;
μὴ πρὸς ῥᾳστώνην ἐκδοθῇς, μὴ πρὸς τρυφὴν χωρήσῃς,
μηδὲ φρονήσῃς ὑψηλὰ καὶ πέρα τοῦ μετρίου.
γυμνόν με βλέπεις· νόησον γυμνόν μου καὶ τὸ τέλος.
ὑπὸ τοὺς πόδας μου τροχοί· φρίττε μὴ κυλισθῶσι.
περὶ τὰς κνήμας μου πτερά· φεύγω, παρίπταμαί σε.
ζυγὰ κατέχω τῇ χειρί· φοβοῦ τὰς μετακλίσεις.
τί με κρατεῖς; σκιὰν κρατεῖς· πνοὴν κρατεῖς ἀνέμου.
τί με κρατεῖς; καπνὸν κρατεῖς, ὄνειρον, ἔχνος πλοίου.
ἐμὲ τὸν Βίον, ἄνθρωπε, δέξαι σου παραινέτην.
οὐκ ἔτυχες, οὐκ ἔλαβες, οὐκ ἔσχες μου τὰς τρίχας;
μὴ σκυθρωπάσῃς τοῦ λοιποῦ, μηδὲ δυσελπιστήσῃς.
γυμνός εἰμι, καὶ τῶν χειρῶν ἐξολισθήσας τούτων
ἴσως μεταρρυήσομαι πρὸς σὲ καὶ μεταπέσω.
ὑπὸ τοὺς πόδας μου τροχοί· τάχα σοι κυλισθῶσι.
περὶ τὰς κνήμας μου πτερά· τρέχω, προσίπταμαί σοι.
ζυγὰ κατέχω· τάχα σοι τὴν πλάστιγγα χαλάσω.
μὴ τοίνυν ἀποπροσποιοῦ τὰς ἀγαθὰς ἐλπίδας.

There is a line lost from the second of the two stanzas, which were clearly meant to correspond.

[2] O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1853 pp. 49—59 pl. 4, E. Curtius 'Die Darstellungen des Kairos' in the *Arch. Zeit.* 1875 xxxiii. 6 f. pl. 1, 2, Friederichs—Wolters *Gipsabgüsse* p. 752 no. 1899, A. Baumeister in his *Denkm.* ii. 772 fig. 824, B. Sauer in Roscher *Lex. Myth.* ii. 900 fig., F. Durrbach in Daremberg—Saglio *Dict. Ant.* iii. 787 f. fig. 4252, A. Muñoz in *L'Arte* 1904 vii. 132 ff. fig. 4, O. M. Dalton *Byzantine Art and Archaeology* Oxford 1911 p. 158 f. fig. 91, Reinach *Rép. Reliefs* iii. 422 no. 3.

A further fragment of the relief, found by the architect R. Cattaneo in a mason's shop at Venice, was published by him in the drawing here reproduced (R. Cattaneo *L'architettura*

the Duomo at Torcello near Venice. The relief, which may be dated *c.* 1100 A.D., represents Bios as a half-naked youth hastening on winged wheels from right to left. His left hand, stretched forward, carries the scales; his right, drawn backward, brandishes a knife. In front of him stands a young man, who succeeds in grasping his hair. Behind him stands an old man, who fails in the attempt. To

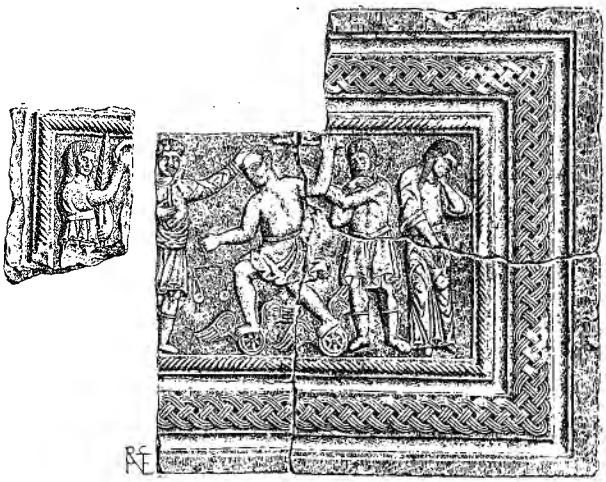

Fig. 802.

the left of the former is Nike with wreath and palm; to the right of the latter is Metanoia in an attitude of despair. Less elaborate is the symbolism of a later epigram on the same subject by Manuel Philes (*c.* 1275—*c.* 1345), who speaks of life (*bios*) as a nude youth, with bald head and winged feet, admonishing a frustrated follower[1].

in Italia dal secolo VI al mille circa Venezia 1888 p. 287 fig., trans. Contessa I. Curtis-Cholmeley in Bermani London 1896 p. 334 ff. fig. 165=my fig. 802) and by A. Muñoz from a photograph (A. Muñoz in *L'Arte* 1906 ix. 214 f. fig. 2). The completed design is discussed by R. von Schneider 'Ueber das Kairosrelief in Torcello und ihm verwandte Bildwerke' in the *Serta Harteliana* Wien 1896 pp. 279—292 with figs., P. Perdrizet in the *Bull. Corr. Hell.* 1912 xxxvi. 264 ff. fig. 2, Lamer in Pauly—Wissowa *Real-Enc.* x. 1513 f.

R. Cattaneo *loc. cit.* was the first to assign this relief to its right place among the decorative sculptures of *s.* x and *s.* xi A.D. A. Muñoz *locc. citt.* first showed that the central figure was that of Bios.

[1] Philes *carm.* 67 (i. 32 Miller) *εἰς μειράκιον γυμνόν, εἰκόνα φέρον τοῦ βίου*

φεύγω, πτερωτός εἰμι· τί λαβεῖν θέλεις;
τὰς τρίχας; ἀλλ' ἔρρευσαν. ἀλλὰ τοὺς πόδας;
καὶ πῶς πτερωτοὺς εὑρεθέντας ἂν λάβοις;
τὸ σῶμα; γύμνόν ἐστι· τί σπεύδεις μάτην;

Yet another turn of the kaleidoscope, and this shifting personality puts on, if not a fresh form, at least a new colouring. Bios the naked runner on winged wheels, who has hitherto, in accordance with pagan thought, been represented as a good thing eagerly pursued by mankind, is now, within the pale of the medieval Church, viewed as a bad thing itself in hot pursuit of men. A Vatican manuscript of the *Ladder of Paradise* by Saint John Klimax[1], written about the close of *s.* xi A.D., has two relevant miniatures. In the one[2] Bios, a naked youth on wheels, makes after a monk, who bearing a small basket on his shoulder and looking behind him in terror does his best to escape, under the escort of a woman in blue and violet dress called *Aprospátheia*, 'Indifference to the World.' In the

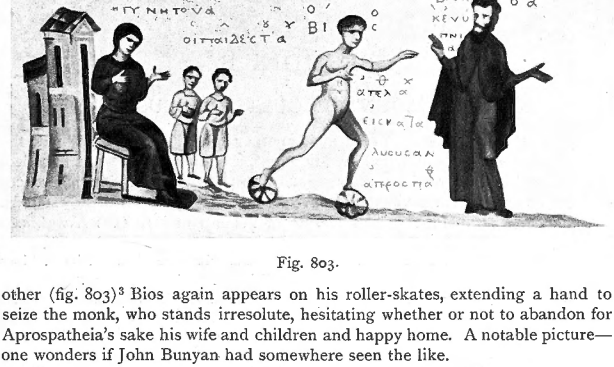

Fig. 803.

other (fig. 803)[3] Bios again appears on his roller-skates, extending a hand to seize the monk, who stands irresolute, hesitating whether or not to abandon for Aprospatheia's sake his wife and children and happy home. A notable picture—one wonders if John Bunyan had somewhere seen the like.

We have traced the career of Kairos *alias* Chronos *alias* Bios for close upon eighteen centuries. It is possible that further investigation might find him with us still, 'offering' as of old 'naught but a knife to his follower.' 'It would be interesting to know,' says Prof. E. A. Gardner[4], 'whether the scythe of Time is the ultimate development of this same symbol, and his hour-glass of the balance.'

> *ἄνθρωπε ταλαίπωρε, λῆξον τοῦ δρόμου,*
> *μὴ κατενεχθῆς τῷ δοκεῖν τι λαμβάνειν.*
> *σκιὰ γάρ εἰμι, κἂν δοκῶ τέως μένειν.*
> *ἀφίπταμαί σου καὶ πρὸς οὐδὲν ἐκτρέχω,*
> *καὶ γίνομαι ῥοῦς ἂν συνέξῃς δακτύλοις.*

Another MS. of Philes (cod. Paris.) has the *lemma εἰς τὸν βίον μειράκιον ἐζωγραφημένον*, whence A. Muñoz in *L'Arte* 1904 vii. 131 n. 2 justly concludes that the poem alludes to some work of art.

[1] *Supra* p. 134 f. The MS. is cod. Vat. Gr. 394.

[2] A. Muñoz in *L'Arte* 1904 vii. 132 with fig. 2. The three characters are inscribed *ὁ βίος*, *ὁ μοναχός*, and *ἡ ἀπροσπάθεια*, above whose name is written *ἡ φυγὴ κόσμου*.

[3] A. Muñoz in *L'Arte* 1904 vii. 132 with fig. 3 (part of which = my fig. 803). The inscriptions are *ἡ γυνὴ τοῦ μοναχοῦ*, *οἱ παῖδες τοῦ μοναχοῦ*, *ὁ βίος*, *ὁ μοναχός*, and in the field *ἄπελθε μοναχὲ εἰς καταλύουσαν ἀπροσπάθειαν* and *ὁ δὲ βίος σκιὰ καὶ ἐνύπνια*.

[4] E. A. Gardner *A Handbook of Greek Sculpture* London 1897 ii. 411 n. 1.

The scythe of Time[1] should, I think, rather be derived from the scythe of Death, who was often conceived as a reaper or mower[2] and in folk-celebrations of Mid-Lent was sometimes represented by a straw puppet with a scythe in his hand[3]. The hour-glass of Time likewise copies the hour-glass of Death so frequently figured in the *Danse Macabre*[4] of the Middle Ages. But Time himself is presumably the lineal descendant of the Byzantine Chronos or Bios. And it may well be that the knife, if not the balance, of Bios was modified to suit the popular effigy of Death. After all, the Church's idea of Life has often borne a suspicious resemblance to the world's idea of Death. *τίς δ' οἶδεν εἰ τὸ ζῆν μέν ἐστι κατθανεῖν, | τὸ κατθανεῖν δὲ ζῆν κάτω νομίζεται*[5]*;*

If the main lines of the pedigree are as I have supposed, a further point may be descried. As at the first the razor of Kairos, so at the last the scythe of Time, was a symbol drawn from ritual usage. Such symbols live longest.

APPENDIX B.

THE MOUNTAIN-CULTS OF ZEUS.

Since the mountain-cults of Zeus have not, even in Germany, been made the subject of separate and detailed investigation[6], it seemed worth while to collect the evidence both literary and monumental bearing upon them. The inferences that can be drawn from the evidence have for the most part been already stated[7].

The Greeks worshipped Zeus *Óreios* 'of the Mountain[8],' Zeus *Koryphaîos*

[1] Ancient, medieval, and modern representations of Time are discussed by F. Piper *Mythologie und Symbolik der christlichen Kunst* Weimar 1851 i. 2. 389—409.

Andrian *Der Höhencultus asiatischer und europäischer Völker* Wien 1891, is a slight and disappointing book. C. Albers *De diis in locis editis cultis apud Graecos* Zutphaniae 1901 pp. 1—92 is likewise quite inadequate (see Gruppe *Myth. Lit.* 1908 pp. 115, 316). The lists given by Welcker *Gr. Götterl.* i. 169 ff., Preller—Robert *Gr. Myth.* i. 116 f., Farnell *Cults of Gk. States* i. 50 ff., 152 ff., Gruppe *Gr. Myth. Rel.* p. 1103 f., though useful, are incomplete.

[7] *Supra* i. 117 ff. *et passim.*

[8] Zeus Ὄρειος. E. Renan *Mission de Phénicie* Paris 1864 p. 396 f. recorded two identical inscriptions on blocks of gritstone formerly used for the lintel of the church-door at *Halalieh*: *ἔτους ζγϛ', μηνὸς Ἀπελλαίου ιε', Θρεπτίων (Ν)είκωνος τοῦ Σωσίππου τοὺς δύο | λέοντας Διὶ Ὀρείῳ, κατ' ὄναρ, ἐκ τῶν ἰδίων, εὐσεβῶν ἀνέθηκεν.* The year 257 in the Seleucid era would be 55 B.C., in that of Antioch 209 A.D., in that of Sidon 147 A.D. Renan held

'of the Peak[1],' Zeus *Aktaîos* 'of the Point[2],' Zeus *Akraîos* 'of the Summit[3],'

that the last date agrees best with the lettering. He pointed out that a little lion in white stone, found in 1863 at the foot of the hill on which the church stands, may well have been one of the two lions here mentioned. G. F. Hill in the *Journ. Hell. Stud.* 1911 xxxi. 57 notes that 'the lion, as an inhabitant of the mountain rather than the plain, is naturally sacred to the mountain deity' [cp. 2 Kings 17. 25 f.], in this case to the Mountain Baal, Hellenised as Zeus Ὄρειος, whose consort Astarte (?) rides a lion on coppers of Sidon struck by Severus Alexander (G. F. Hill in the *Brit. Mus. Cat. Coins* Phoenicia pp. cxiii n. 6, 198 pl. 25, 8).

Zeus Ὀρομπάτας. E. Sittig in *Hermes* 1915 l. 158 f. publishes a dedication on a block of dark limestone at Amathous in Kypros: Κυπρ////////// | Πολυξένου: Αἰνιᾶν[ος θυ]γάτηρ: Εὐβιότα | Παναίτιον Πολυξένου Αἰνιᾶνα, | Διὸς Ὀρομπάτα ἱερέα, τὸν αὐτῆς ἄνδρα, | αὐτὴ καὶ τὰ παιδία. The lettering suggests *s.* iii B.C.; and Sittig regards Ὀρο-μπάτας as = ὀρειβάτης ('Offenbar neigte das Kyprische dazu, *β* spirantisch zu sprechen; da in dem Dialekte der Ainianen *β* Verschlusslaut blieb, vollends in einem sakralen Worte, so half man sich bei der Schreibung so, dass man ΜΠ statt des B setzte, mit dem die Eingeborenen einen anderen Lautwert verbanden'). This is ingenious; but, apart from the fact that *μπ* for *β* is unexampled at so early a date, ὀρειβάτης is an epithet which suits Pan (*Anth. Pal.* 16. 226. 1 (Alkaios of Messene)) rather than Zeus. I suspect that Zeus Ὀρομπάτας was a god of streams worshipped by the Ainianes. We hear of Ainianes as settled in Kirrha the harbour of Delphoi (Plout. *quaestt. Gr.* 13 and 26), and of ὀρεμπότης as a Delphic term for 'river' (Plout. *de Pyth. or.* 24 ἀπέπαυσε δὲ τὴν Πυθίαν ὁ θεὸς πυρικάους μὲν ὀνομάζουσαν τοὺς αὐτῆς πολίτας, ὀφιοβόρους δὲ τοὺς Σπαρτιάτας, ὀρεᾶνας δὲ τοὺς ἄνδρας, ὀρεμπότας δὲ τοὺς ποταμούς). On this showing Zeus Ὀρομπάτας resembled his neighbour Zeus Νάιος, a god 'of Streaming Water' (*supra* i. 369). The head of Zeus on coins of the Ainianes (*Brit. Mus. Cat. Coins* Thessaly etc. p. 10 ff. pl. 2, 1, 4, Head *Hist. num.*[2] p. 292), which in the case of coppers struck *c.* 168—146 B.C. often has a thunderbolt in the field (so on two specimens in my collection), may be that of Zeus Ὀρομπάτας.

[1] Zeus Κορυφαῖος. Seleukeia Pieria, at the foot of Mt Koryphaion (Polyb. 5. 59. 4), had a priest of Zeus Ὀλύμπιος and Zeus Κορυφαῖος (*Corp. inscr. Gr.* iii no. 4458, 3 f., 3 ff., = Dittenherger *Orient. Gr. inscr. sel.* no. 245, 3 f. Διὸς Ὀλυμπίου | καὶ Διὸς Κορυφαίου, 27 ff. Διὸς Ὀλυμπίου [καὶ] | τῶν θεῶν τῶν | Σωτήρ[ων] καὶ Διὸς | Κ[ορυφ]αίου, cp. Liban. *legat. ad Iulian.* 79 (ii. 152, 10 f. Foerster) τὸν Δία τὸν τε ἐπὶ τῆς κορυφῆς καὶ τὸν ἐν ἄστει, παρ' ὃν εἰσῆλθες ὕπατος, ὅθεν ἐξῆλθες θαρρῶν, ᾧ γέγονας ὀφειλέτης). Philadelpheia in Lydia, at the base of Mt Tmolos, also had a cult of Zeus Κορυφαῖος (*supra* p. 285 n. 0 no. (3) and Addenda *ad loc.*), whose head is seen on an imperial bronze coin of the town (*Brit. Mus. Cat. Coins* Lydia p. 190 pl. 21, 9 = my fig. 804 (from a cast), Head *Hist. num.*[2] p. 655). The title has a variety of meanings in Paus. 2. 4. 5 (Corinth) ὑπὲρ δὲ τὸ θέατρόν ἐστιν ἱερὸν Διὸς Καπετωλίου φωνῇ τῇ Ῥωμαίων· κατὰ Ἑλλάδα δὲ γλῶσσαν Κορυφαῖος ὀνομάζιοτο ἄν, Aristeid. *or.* 1. 8 (i. 11 Dindorf) οὗτος βασιλεύς, πολιεύς, καταιβάτης, ὑέτιος, οὐράνιος, κορυφαῖος, πάνθ' ὅσα αὐτὸς εὗρε μεγάλα καὶ ἑαυτῷ πρέποντα ὀνόματα, Max. Tyr. *diss.* 41. 2 Dübner τὸν Δία...τὸν κορυφαῖον τῆς τῶν ἄστρων περιφορᾶς καὶ διηγήσεως καὶ χορείας καὶ δρόμου, cp. Fig. 804.

[2] Zeus Ἀκταῖος. Dikaiarch. 2. 8 (*Geogr. Gr. min.* i. 107 Müller) ἐπ' ἄκρας δὲ τῆς τοῦ ὄρους (*sc.* of Mt Pelion) κορυφῆς σπηλαῖόν ἐστι τὸ καλούμενον Χειρώνιον, καὶ Διὸς Ἀκταίου

[3 For note 3 see p. 871.]

(F. Osann, followed by C. Müller, cj. *Ἀκραίου) ἱερόν, ἐφ' ὃ κατὰ κυνὸς ἀνατολὴν κατὰ τὸ ἀκμαιότατον καῦμα ἀναβαίνουσι τῶν πολιτῶν οἱ ἐπιφανέστατοι καὶ ταῖς ἡλικίαις ἀκμάζοντες, ἐπιλεχθέντες ἐπὶ τοῦ ἱερέως, ἐνεζωσμένοι κώδια τρίποκα καινά· τοιοῦτον συμβαίνει ἐπὶ τοῦ ὄρους τὸ ψῦχος εἶναι.* On this passage see *supra* i. 420 f. The sanctuary of Zeus *Ἀκταῖος* has been located and partially explored by A. S. Arvanitopoullos in the *Πρακτ. ἀρχ. ἑτ.* 1911 pp. 305—312 fig. 5 (=my fig. 805). The discoveries there described may be here summarised (brief notice also in *Am. Journ. Arch.* 1913 xvii. 109):

The highest peak of Pelion (1635^{m}), now called *Plissídi* or *Pliassídi*, has been repeatedly ransacked by treasure-seekers, some of whom coming from *Drákeia* are said to have been devoured by wolves. The rocky eastern side of the summit shows traces of ancient hewn habitations, like those of Demetrias, Pagasai, Phthiotic Thebes, etc., with holes for roof-timbers and coarse tiles perhaps manufactured on the spot. These dwellings are called by the shepherds *Skoleió*, because they resemble the benches in a school.

Close by is a ruined gate of hewn stone (E) with two towers (Π, Π), continued as a wall some 3^{m} thick, which forms a large elliptical precinct and probably had another gate on the south, though most of the stones have here disappeared. The wall and towers may date from *s.* v B.C. Adjoining this precinct, on the south-east, is another, of whose

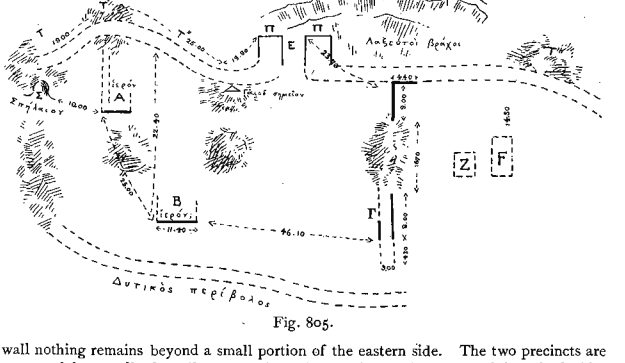

Fig. 805.

wall nothing remains beyond a small portion of the eastern side. The two precincts are separated by a wall of small stones (Γ), again 3^{m} thick, which was roofed on both sides so as to make a *stoá* for the sale of commodities during festival seasons.

At the north-west end of the large precinct is a steep rock-face, in which is the mouth of a cave (Σ), 2^{m} across, blocked with stones by the natives in recent times. The walls of the cave appear to have been hewn. Near it are traces of a building (A), which seems to have been of apsidal or horse-shoe shape, like the temple of Athena *Poliás* at Gonnoi (Arvanitopoullos *loc. cit.* p. 316 fig. 6), and was presumably the temple of the divinity worshipped in the cave. Further west was the quadrilateral temple (B) of another related deity: this was on a larger scale, one side partly excavated reaching a length of 11·40^{m} with a wall 0·55^{m} thick. Both buildings were carefully constructed of clay, the roofs being supported on trunks of trees. Numerous red tiles and black cover-tiles remain. Miscellaneous finds in this area include small cups of *s.* v—iv B.C., a copper coin of Chalkis of *s.* iv, butts and blades of iron lances, a flat unpainted idol like those of island make, three fragments of votive marble *stêlai*, six *amphorae* buried full of embers and ashes. In the gateway (E) was a fragmentary *stêle* of hard white limestone inscribed in lettering of *s.* iv B.C. *[οἱ δεῖνες ἀνέθηκ]αν Μ[ούσ(?)]αις.*

Inside the second precinct are two buildings (F and Z). Of these one (F) is a rect-

angular structure, built of large hewn blocks, with many roof-tiles. It stands on a slight elevation and, as the finest building on the site, is probably to be identified with the temple of Zeus Ἀκραῖος. Its position outside the large precinct is curious [and may imply that Zeus was a later comer than the deity worshipped in the cave—Cheiron son of Kronos and Philyra (?) A. B. C.]. Arvanitopoullos was unable to complete the excavation of this temple, because at midnight on Aug. 15, 1911, a storm burst on the summit of the mountain, inundated his tent, and forced him to beat a retreat. The small neighbouring structure (Z) was left wholly unexcavated.

[3] Zeus Ἀκραῖος. (1) The cult of Zeus Ἀκραῖος on Mt Pelion is attested by an inscription found near *Bupha* on the Gulf of Pagasai and now in the Museum at *Volo* (J. v. Prott and L. Ziehen *Leges Graecorum sacrae* ii no. 82, 1 ff. = O. Kern in the *Inscr. Gr. sept.* iii. 2 no. 1110, 1 ff. [---- παριστάναι τὰ θύμα]τα λευκὰ ὁλόκληρα [κα][θαρὰ ἃ δεῖ θύ]εσθαι τῶι θεῶι καὶ τὰ ἄλλα τὰ ἐθιζόμενα καθὼς [καὶ] | [πρὶν ἐ]γίνετο, τὰς δὲ τούτων δορὰς πωλεῖσθαι ἀπὸ τοῦ [νῦν χρό][νου κα]τ' ἐνιαυτὸν ὑπὸ κήρυκα τῆι ἕκτηι ἐπὶ δέκα τοῦ Ἀρτεμισι[ῶνος μη][νὸς πρὸ τῆς ἐκκλησίας γινομένης ἐννόμου ἀπὸ τοῦ -----|ρίου ὑπὸ τῶν προγεγραμμένων ἀρχόντων, συμπαρόντων καὶ τοῦ ἱερέως τοῦ Διὸς τοῦ Ἀκραίου καὶ τῶν ἐξεταστῶν, καὶ τὸ ἐκ τούτων | γενόμενον διάφ[ορον ἱερὸν εἶναι] τοῦ Διὸς τοῦ Ἀκραίου . . . . . |νου τὰς ἀγορὰς ------ αμα τῶι θεῶι συναχθείσηι | --- κ.τ.λ. (eight lines badly mutilated)) : on this see *supra* i. 421 f. In *s.* ii B.C. the priest of Zeus Ἀκραῖος was a personage of importance, who proposed decrees along with the chief magistrates of the Magnetes (Michel *Recueil d'Inscr. gr.* no. 307, 7 f. = *Inscr. Gr. sept.* iii. 2 no. 1103, 7 f. Ἀδαῖος Ἀδύμο[υ] ὁ ἱερεὺς τοῦ Διὸς τοῦ [Ἀ]κραίου, *ib.* iii. 2 no. 1105, 11, 6 f. Θηβαγένης Ἀπολλωνίου ὁ ἱερεὺς τοῦ Διὸς τοῦ | Ἀκραίου, Michel *op. cit.* no. 309, 6 = *Inscr. Gr. sept.* iii. 2 no. 1108, 6 [Αὐ]σίας Ἐπιτέλου ὁ ἱερεὺς τοῦ Διὸς τοῦ Ἀκραίου). About 100 B.C. the priest of Zeus Ἀκραῖος was eponymous magistrate of the Magnetes, and those who were charged with the up-keep of the oracle of Apollon Κοροπαῖος took oath by Zeus Ἀκραῖος, Apollon Κοροπαῖος, and Artemis Ἰωλκία (Michel *op. cit.* no. 842 *A*, 1 ff., *B*, 5 ff., 21 f. = Dittenberger *Syll. inscr. Gr.*[3] no. 1157, 1 *a*, 1 ff., 1 *bc*, 54 ff., 1 *d*, 70 f. = *Inscr. Gr. sept.* iii. 2 no. 1109, 1, 1 ff. ἱερέως Κρίνωνος τοῦ Παρμενίωνος, μηνὸς Ἀρείου δεκάτηι, | Κρίνων Παρμενίωνος Ὁμολιεὺς ὁ ἱερεὺς τοῦ Διὸς τοῦ Ἀκραί[ου κ.τ.λ., 54 ff. (cited *supra* p. 730 n. 0 *sub fin.*), 11, 70 f. ἱερέως Κρίνωνος τοῦ Παρμενίωνος, μηνὸς Ἀρτεμισιῶνος δεκάτηι, | Κρίνων Παρμενίωνος Ὁμολιεὺς ὁ ἱερεὺς τοῦ Διὸς τοῦ Ἀκραίου κ.τ.λ.). Cp. *Inscr. Gr. sept.* iii. 2 no. 1128, 1 ff. Αὐρ. Τειμασίθεος | Κενταύριος ὁ ἱερ[εὺς τῷ Ἀκραίῳ Δι[ί].

(2) On the Pindos range between Thessaly and Epeiros there was a sanctuary of Zeus Ἀκραῖος (Liv. 38. 2 templum Iovis Acraei), whose figure seated on a rock or throne appears on coins of Gomphoi or Philippopolis (*supra* i. 124 figs. 90—92).

(3) At Trapezous in Arkadia, heneath Mt Lykaion, sacrifices were offered to Zeus Ἀκραῖος (Nikol. Damask. *frag.* 39 (*Frag. hist. Gr.* iii. 377 Müller) ταχὺ δὲ καὶ τοὺς υἱεῖς (*sc.* Κρεσφόντου) ἤθελον (*sc.* οἱ ἐγχώριοι ἀποκτεῖναι), οὓς τότε ὁ μητροπάτωρ (*sc.* Κύψελος) ἅμα τῇ θυγατρὶ κυούσῃ θύειν μέλλων Διὶ Ἀκραίῳ εἰς Τραπεζοῦντα μετεπέμψατο).

(4) At Praisos in eastern Crete, where there was a temple of Zeus Δικταῖος (*supra* i. 660), the god seems to have borne the second appellative Ἀκραῖος. He appears on silver

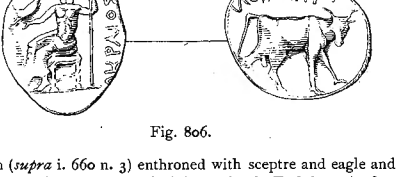

Fig. 806.

coins of the town (*supra* i. 660 n. 3) enthroned with sceptre and eagle and accompanied by the title ΑΚΡΑΙΟΣ (first correctly deciphered by C. T. Seltman) : fig. 806 is from a

specimen in my collection. Since the coins in question go back to a date *c.* 400 B.C., this is the earliest known example of ΑΚΡΑΙΟΣ as a numismatic legend.

(5) At Halikarnassos Aphrodite, who shared a temple with Hermes on high ground beside the spring Salmakis (Vitr. 2. 8. 11), probably bore the title Ἀκραία, since the Halicarnassians are known to have built a temple of Aphrodite Ἀκραία beneath the *akrópolis* of their mother-city Troizen (Paus. 2. 32. 6). Zeus too was worshipped at Halikarnassos under the same title (Lebas—Waddington *Asie Mineure* no. 501 Διονύσιος | Διὶ Ἀκραίωι εὐχή[ν]). T. Bergk *Exercitationum criticarum specimen VI* Marburgi 1850 p. vi (=*id. Kleine philologische Schriften* ed. R. Peppmüller Halle a. S. 1886 ii. 297), K. Keil in *Philologus* 1854 ix. 454, and G. Wentzel in Pauly—Wissowa *Real-Enc.* i. 1193, would read Ἀκραίῳ for Ἀσκραίῳ in Apollon. *hist. mir.* 13 ἐν τῷ κατὰ τόπους μυθικῷ· ἐν Ἁλικαρνασσῷ θυσίας τινὸς τῷ Διὶ τῷ Ἀσκραίῳ συντελουμένης ἀγέλην αἰγῶν ἄγεσθαι πρὸ τοῦ ἱεροῦ καὶ ἱστασθαι· τῶν δὲ κατευχῶν συντελεσθεισῶν προβαίνειν μίαν αἶγα ὑπὸ μηδενὸς ἀγομένην καὶ προσέρχεσθαι τῷ βωμῷ, τὸν δὲ ἱερέα λαβόμενον αὐτῆς καλλιερεῖν. But I have argued in the *Class. Rev.* 1903 xvii. 415 f. that Zeus Ἀσκραῖος, to whom the Lydians brought their first-fruits (Plout. *animine an corporis affectiones sint peiores* 4 οὗτοι συνελθόντασι...οὐκ

Fig. 807.

Fig. 808.

Fig. 809.

Fig. 810.

Fig. 811.

Ἀσκραίῳ Διὶ Λυδίων καρπῶν ἀπαρχὰς φέροντες), had a cult in Halikarnassos also; that he was an oak-Zeus (Hesych. ἄσκρα· δρῦς ἄκαρπος, cp. O. Schrader *Prehistoric Antiquities of the Aryan Peoples* trans. F. B. Jevons London 1890 p. 226, Prellwitz *Etym. Worterb. d. Gr. Spr.*[2] p. 59, Boisacq *Dict. étym. de la Langue Gr.* p. 90); and that he is to be seen on imperial coppers of the town as a bearded god crowned with rays and standing between two oak-trees, on each of which is a bird (raven? dove?) (*Brit. Mus. Cat. Coins* Caria, etc. p. 110 no. 83 pl. 19, 2 (=my fig. 807) Trajan, no. 85 (=my fig. 808) Antoninus Pius, p. 111 no. 88 (=my fig. 810) Septimius Severus, W. M. Leake *Numismata Hellenica* London 1854 Asiatic Greece p. 64 (=my fig. 809) Commodus, Overbeck *Gr. Kunstmyth.* Zeus p. 210 f. Münztaf. 3, 12, Head *Hist. num.*[2] p. 619 fig. 305. Fig. 811 Gordianus Pius is from a specimen in my collection). It is of course possible that Ἀκραῖος was a second appellative of Zeus Ἀσκραῖος (cp. *supra* no. (4)).

(6) W. R. Paton in the *Class. Rev.* 1907 xxi. 47 f. publishes an inscription, in lettering of about *s.* i B.C. or *s.* i A.D., found at Myndos: [Πο]σίδεος Κλεωνύμου καθ' ὑοθεσία[ν] | [δὲ] Ποσιδέου καὶ ἡ γυνὴ Ἡδεῖα Ἀπολλωνίδου | [καὶ] οἱ υἱοὶ Κλεώνυμος καὶ Ἀπολλωνίδης | [Ἀλ]ικαρνασσεῖς Διὶ Ἀκραίῳ. Paton proposes Ἀκραίῳ for Ἀσκραίῳ, not only in Apollon.

Zeus *Epákrios* 'on the Summit[1],' Zeus *Karaiós* 'of the Head[2],' Zeus *Lopheítes* *loc. cit.*, but also in Plout. *loc. cit.* Both passages were emended in the same manner 224 years before by G. Cuper *Apotheosis vel consecratio Homeri* Amstelodami 1683 p. 16.

(7) Imperial coppers of Magnesia ad Maeandrum show Zeus 'Ακραῖος as a nude standing figure, with right hand supported on sceptre, left holding thunderbolt (Imhoof-Blumer *Gr. Münzen* p. 120 no. 312 ΑΚΡΑΙΟC ΜΑΓΝΗΤΩΝ Geta, *id. Kleinas. Münzen* i. 79 no. 27 ΜΑΓΝΗΤΩ Ν ΖΕΥC ΑΚΡΑΙΟC Antoninus Pius).

(8) At Smyrna Ulpius Traianus, father of the emperor Trajan, brought an aqueduct to the precinct of Zeus 'Ακραῖος (*Corp. inscr. Gr.* ii no. 3146, 1 ff. *ἐκ τοῦ εἰσαχθέντος | ὕδατος ἐπὶ τὸν Δία τὸν | 'Ακραῖον ἐπὶ Οὐλπίου | Τραϊανοῦ τοῦ ἀνθυπάτου,* | *κ.τ.λ.*). *Quasi*-autonomous and imperial coppers show the god's head, usually inscribed ΖΕΥC ΑΚΡΑΙΟC or ΖΕVC ΑΚΡΑΙΟC or ΖΕVC ΑΚΡΑΙΟC (*Brit. Mus. Cat. Coins* Ionia p. 253 ff. pl. 27, 1, 2, 5, 6, 8, *Hunter Cat. Coins* ii. 368 ff. pl. 52, 8, Head *Hist. num.*[2] p. 594.

Fig. 812.

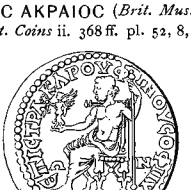

Fig. 813.

Fig. 814.

Fig. 812 is from a specimen of mine), or seated figure holding Nike and sceptre, sometimes inscribed ΑΚΡΑΙΟC or ΑΚΡΑΙΟΣ (*Brit. Mus. Cat. Coins* Ionia pp. 250 pl. 26, 8, 266, 272 pl. 28, 15, 287 pl. 29, 12 (=my fig. 813), 297, 302 pl. 39, 5, 307 pl. 39, 11 (=*supra* p. 319 fig. 201), *Hunter Cat. Coins* ii. 378 no. 202, 379 no. 203, 389 pl. 52, 18, Head *Hist. num.*[2] p. 594).

(9) At Temnos in Aiolis, on a hill above the Hermos, *quasi*-autonomous coppers of *s.* iii A.D. bear the bust of Zeus 'Ακραῖος, inscribed ΣΕVC ΑΚΡΑΙΟ C (*Brit. Mus. Cat. Coins* Troas, etc. p. 145 no. 22, *Hunter Cat. Coins* ii. 311 no. 7, Head *Hist. num.*[2] p. 557. Fig. 814 is from a specimen of mine).

(10) L. Holstein on Steph. Byz. *s.v.* Μυτιλήνη (ed. Lipsiae 1825 ii. 457) says: 'In Cimeliarchio Mediceo nummus habetur, in cuius uno latere circum Iovem, Neptunum et Plutonem: ΘΕΟΙ ΑΚΡΑΙΟΙ ΜΥΤΙΛΗΝΑΙΩΝ. in averso circum caput Iovis: ΖΕΥC ΒΟΥΛΑΙΟC. quinam sint Θεοὶ ἀκραῖοι...docet Pollux lib. IX. cap. 5. his verbis: *Τὰ δὲ δημόσια, ἀκρόπολις· ἣν καὶ ἄκρον ἂν εἴποις καὶ πόλιν· καὶ τοὺς ἐν αὐτῇ θεούς, ἀκραίους καὶ πολιεῖς.*' This coin, cited by numismatists from Eckhel *Doctr. num. vet.*[2] ii. 504 to Head *Hist. num.*[1] p. 488 inclusive, has disappeared from Head *Hist. num.*[2] p. 562 f.

(11) At Akrai (*Palazzolo*) in Sicily the Museum of Baron Judica had a base inscribed ΔΙΟΣ | [ ]ΡΑΙΟΥ. J. Schubring in the *Jahrb. f. Philol. u. Pädag.* Suppl. 1867 iv. 672 fig. 2 supplies ['Αγο]*ραίου*. But U. von Wilamowitz-Moellendorff in the *Inscr. Gr. Sic. It.* no. 203 with greater probability cj. ['Ακ]*ραίου*.

See further Schöll—Studemund *anecd.* i. 265 *Ἐπίθετα Διός* (20) *ἀκραίου*, Kallim. *h. Zeus* 81 f. *ἴζεο δ' αὐτὸς | ἄκρης ἐν πολίεσσιν*, Aristeid. *or.* 1. 6 (i. 7 Dindorf) *τὰς ἀκροπόλεις ἐξεῖλον Διί, κ.τ.λ.*

[1] Zeus *Ἐπάκριος*. Polyzelos *Μουσῶν γονὰ frag.* 1 (*Frag. com. Gr.* ii. 869 f. Meineke) *ap. et. mag.* p. 352, 49 ff. *Ἐπάκριος Ζεύς· ἐπ' ἄκρας γὰρ τῶν ὀρῶν ἱδρύοντο βωμοὺς τῷ Διί, οἷον τοῦ Τμηττίου, τοῦ Παρνηθίου. Πολύζηλος Μουσῶν γοναῖς· "ἱερὸν γὰρ ὄν* (A. Meineke cj. *ἱερεὺς γὰρ ὤν*, cp. Metagenes *Αὖραι frag.* 4 Meineke *ap.* schol. Aristoph. *av.* 873) *τετύχηκας Ἐπακρίου Διός."* So Hesych. *s.v.* *Ἐπάκριος· Ζεύς. ὁ ἐπὶ τῶν ἄκρων τῶν ὀρῶν*

[2] For note 2 see p. 874.]

'of the Crest[1].' These titles, and perhaps certain others[2], proclaim him to be a

ἱδρυμένος. ἐπὶ γὰρ τῶν ὀρῶν τοὺς βωμοὺς αὐτῷ ἵδρυον ὡς ἐπιπολύ, Eustath. *in Od.* p. 1747, 59 *ὅθεν καὶ Ζεὺς ἐπάκριος, ᾧ ἐπ' ἄκρων ὀρέων ἱδρύοντο βωμοί*. E. Ziebarth in the *Rhein. Mus.* 1900 lv. 502 f. published an inscription from Athens, in which certain *ὀργεῶνες* let on lease (?) [*τὸ ἱερὸν τ*]*οῦ Διὸς τοῦ Ἐπα*[*κρίου*]. But the reading of the appellative is doubtful: ΕΠ / are the only surviving letters.

[2] Zeus Καραιός. Hesych. *s.v.* Καραιός· Ζεὺς παρὰ Βοιωτοῖς οὕτω προσαγορεύεται· ὡς μέν τινές φασι διὰ τὸ ὑψηλὸς εἶναι, ἀπὸ τοῦ κάρα, *Inscr. Gr. sept.* i no. 3208 on a small unfluted column at Orchomenos in Boiotia [*Διὶ*] Καραιοῖ | [· · · · · · · · ἀρχ]οντος Κλωνίω (W. Dittenberger *ad loc.* says: 'Vocem ἄρχοντος (aut ἱαραρχίοντος, ἱαρατεύοντος) mediam sumpsi interpositam fuisse inter nomen proprium et adiectivum patronymicum. Sed id quoque fieri potest, ut [*Αἰ*]*οντος*, [*Σπένδ*]*οντος* aut aliud simile nomen proprium fuerit'). Maybaum *Der Zeuskult in Boeotien* Doberan 1901 p. 6 draws attention to the proper names derived from this appellative: Καραιόγειτος (Thespiai), Καραΐς (Anthedon), Καράϊχος (Lebadeia, Orchomenos), Καραῖων (Orchomenos). E. Sittig *De Graecorum nominibus theophoris* Halis Saxonum 1911 p. 13 extends the list, adding Καραῖος (*Corp. Inscr. Att.* ii. 2 no. 1045, 5 (Athens), *Inscr. Gr. Pelop.* i no. 729, 16 (Hermione), F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 235 f. no. 4942 *a*, 10 (Aptara in Crete)). The title suits a mountain-god, cp. *Il.* 20. 5 *κρατὸς ἀπ'* Οὐλύμποιο, 1. 44 *κατ'* Οὐλύμποιο *καρήνων* (Eustath. *in Il.* p. 1193, 9 f., Apollon. *lex. Hom.* p. 95, 22 ff. Bekker), *alib.* On Kratinos *Nemesis frag.* 10 see *supra* i. 280 n. 4. Phot. *lex.* Κάριος Ζεύς· ἐν Θεσσαλίᾳ καὶ Βοιωτίᾳ refers more probably to the Carian Zeus (*supra* p. 577), cp. the Boeotian name Καρίων (*Inscr. Gr. sept.* i no. 2787, 5 Kopai, 2974 Koroneia).

Zeus Κλάριος (Aisch. *suppl.* 359 f. ἵδοιτο δῆτ' ἄνατον φυγὰν | *ἱκεσία Θέμις* Διὸς Κλαρίου, Paus. 8. 53. 9 f. τὸ δὲ χωρίον τὸ ὑψηλόν, ἐφ' οὗ καὶ οἱ βωμοὶ Τεγεάταις εἰσὶν οἱ πολλοί, καλεῖται μὲν Διὸς Κλαρίου (*καρίου* codd. Vb. M.), *δῆλα δὲ ὡς ἐγένετο ἡ ἐπίκλησις τῷ θεῷ τοῦ κλήρου τῶν παίδων ἕνεκα τῶν* Ἡρκάδος. *ἄγουσι δὲ ἑορτὴν αὐτόθι Τεγεᾶται κατὰ ἔτος· κ.τ.λ.*). Farnell *Cults of Gk. States* i. 56, 71 takes Κλάριος to mean 'he who sanctified the original allotment of land,' 'the god of allotments' (*κλῆροι*) (so already Paus. *loc. cit.* and schol. Aisch. *loc. cit. παντάπασι* (H. Weil corr. *πάντα πᾶσι*) *κληροῦντος καὶ κραίνοντος*). W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i. 666 cite Hesych. *κλάρες· αἱ ἐπὶ ἐδάφου(ς) ἐσχάραι*, which might be held to justify Κλάριος = *ἐφέστιος* (O. Höfer in Roscher *Lex. Myth.* ii. 1212). But F. Solmsen in the *Rhein. Mus.* 1898 liii. 157 f., observing that the Tegeate tribe Κλαρεῶτις (Paus. 8. 53. 6: Schwedler cj. Κλαριῶτις) had tribesmen Κραριῶται (F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* i. 351 ff. no. 1231, 357 ff. no. 1247), and that the names of the three other tribes Ἱπποθοῖτις, Ἀπολλωνιᾶτις, Ἀθανεᾶτις are all derived from deities, contends that Zeus Κλάριος is for Zeus *Κράριος, 'ein "höchster Zeus" oder ein "Zeus der Bergeshöhe."' His view is accepted by Adler in Pauly—Wissowa *Real-Enc.* xi. 552 and may well be right.

Zeus Κλάριος of Eustath. *in* Dionys. *per.* 444 λέγεται δὲ καὶ Διὸς Κλαρίου μαντεῖον εἶναι *αὐτόθι* (*sc.* at Κλάρος near Kolophon) must not be confounded with Zeus Κλάριος.

[1] Zeus Λοφείτης. A cult of this deity at Perinthos (later known as Herakleia) on the Propontis is evidenced by the following inscriptions: (1) on the back of a rectangular marble altar, between *Rodosto* and *Eregli* (Perinthos), in letters of *s.* ii A.D. Διὶ Λοφείτῃ Ε[ὐ(?)]*δίων* Φιλλόδ[ου] | *ἱερεὺς νέοις* λυ|· · ·*ρίοις δῶρον* (E. Kalinka in the *Arch.-ep. Mitth.* 1896 xix. 67 f., F. Hiller von Gaertringen in the *Ath. Mitth.* 1906 xxxi. 565. Kalinka suggests that the altar was a gift to a corporation of *νέοι αὐράριοι*). (2) From Perinthos: Διὶ Λοφείτῃ | *ὑπὲρ* Οὐα(τ)ει|νίου Καλλιμά|χου οἱ φίλοι καὶ | οἰκιακοὶ *εὐχήν* (A. Baumeister in *Philologus* 1854 ix. 392 f. no. 15, F. Hiller von Gaertringen in the *Ath. Mitth.* 1906 xxxi. 565, *id. ib.* 1908 xxxiii. 161 f. Baumeister wrongly supposed that this inscription had come from Herakleia, the small island off the coast of Naxos). (3) From Perinthos: gable with garland, beneath which [Διὶ] Λοφείτ(ῃ)ι καὶ | [συ]ναγωγῆι ⁻NA | · · ων *νέων* Ιρεῖ[σκ]ος *ἐκ τῶν* (*εἰδ*)*ίων* | *καθιέρω*[*σε*]ν (F. Hiller von Gaertringen in the *Ath. Mitth.*

[2 For note 2 see p. 875.]

god of mountain-tops. And, when he is called *Hýpatos* 'the High[1]' or

1908 xxxiii. 162 suspects an allusion to the *νέοι αὐράριοι* (?) of (1) and proposes [*συ*]*ναγωγῇ* (*τῶν*) *ν* Α[*ὐ* – –][*ρί*]*ων νέων*). The title *Λοφείτης* was due to the situation of the town: *ἡ γὰρ Πέρινθος κεῖται μὲν παρὰ θάλατταν ἐπί τινος αὐχένος ὑψηλοῦ χερρονήσου, σταδιαῖον ἐχούσης τὸν αὐχένα· τὰς δ' οἰκίας ἔχει πεπυκνωμένας καὶ τοῖς ὕψεσι διαφερούσας. αὗται δὲ ταῖς οἰκοδομαῖς ἀεὶ κατὰ τὴν εἰς τὸν λόφον ἀνάβασιν ἀλλήλων ὑπερέχουσι, καὶ τὸ σχῆμα τῆς ὅλης πόλεως θεατροειδὲς ἀποτελοῦσι* (Diod. 16. 76). For Zeus *Ἐπιλόφιος* at Naïssos see *infra* Moesia.

[2] Gruppe *Gr. Myth. Rel.* p. 1103 n. 2 suggests that Zeus *Φαλακρός* at Argos (Clem. Al. *protr.* 2. 39. 2 p. 29, 6 f. Stählin *οὐχὶ μέντοι Ζεὺς φαλακρὸς ἐν "Αργει, τιμωρὸς δὲ ἄλλος ἐν Κύπρῳ τετίμησθον;*) was a mountain-god. This is probable enough, for the summit of Mt Ida was called *Φάλακρον*, *Φάλακρα*, *Φαλάκρα*, *Φαλάκραι*, a promontory in Korkyra *Φάλακρον*, *Φαλακρὸν ἄκρον*, another in Epeiros *Φάλακρον*, another in Euboia *Φαλάκραι* (Stephanus *Thes. Gr. Ling.* viii. 604 B—D). For Zeus *Κλάριος* see *supra* p. 874 n. 2.

[1] Zeus *Ὕπατος* was worshipped (1) on Mt Hypatos above Glisas in Boiotia (Paus. 9. 19. 3 *ὑπὲρ δὲ Γλισάντός ἐστιν ὄρος Ὕπατος καλούμενον, ἐπὶ δὲ αὐτῷ Διὸς Ὑπάτου ναὸς καὶ ἄγαλμα*). The mountain, now called *Sagmatás*, rises to a height of 749[m]: 'it is bold and rocky, and has a flat summit which is crowned with a monastery of the Transfiguration, founded by Alexis Comnenus. The church of the monastery contains fine mosaics, and stands on the foundations of the temple of Zeus. Both the church and the monastery, as well as two neighbouring chapels, contain many considerable fragments of antiquity built into the walls. The dome of the church is supported by two ancient monolithic columns, with their bases and capitals' (Frazer *Pausanias* v. 61). The view from the monastery embraces the three lakes Kopaïs, Hylike, Paralimne, the Euboean sea, and on the horizon a whole series of mountains—Messapion, Dirphys, Parnes, Kithairon, Helikon, Sphingion, Parnassos, Ptoion (H. N. Ulrichs *Reisen und Forschungen in Griechenland* Berlin 1863 ii. 28 f.). Maybaum *Der Zeuskult in Boeotien* Doberan 1901 p. 6 notes the frequent Boeotian name *Ὑπατόδωρος*. E. Sittig *De Graecorum nominibus theophoris* Halis Saxonum 1911 p. 13 f. quotes examples of *Ὑπατόδωρος* from Thebes, Tanagra, Delphoi, Smyrna, of *Ὑπατίας* from Thebes, of *Ὑπατοκλῆς* from Rhodes.

(2) He had an altar, founded by Kekrops 'in front of the entry' to the Erechtheion at Athens, where he was served with cakes but no wine- or animal-offerings (Paus. 1. 26. 5 *ἔστι δὲ καὶ οἴκημα Ἐρέχθειον καλούμενον· πρὸ δὲ τῆς εἰσόδου Διός ἐστι βωμὸς Ὑπάτου, ἔνθα ἔμψυχον θύουσιν οὐδέν, πέμματα δὲ θέντες οὐδὲν ἔτι οἴνῳ χρήσασθαι νομίζουσιν*, 8. 2. 3 *ὁ μὲν γὰρ* (*sc.* Κέκροψ) *Δία τε ὠνόμασεν Ὕπατον πρῶτος* (*πρῶτον* cod. La.), *καὶ ὁπόσα ἔχει ψυχήν, τούτων μὲν ἠξίωσεν οὐδὲν θῦσαι, πέμματα δὲ ἐπιχώρια ἐπὶ τοῦ βωμοῦ καθήγισεν, ἃ πελάνους καλοῦσιν ἔτι καὶ ἐς ἡμᾶς Ἀθηναῖοι*). He was on occasion associated with Athena *Ὑπάτη* and other deities (Dem. *c. Macart.* 66 (a Delphic response) *συμφέρει Ἀθηναίοις περὶ τοῦ σημείου τοῦ ἐν τῷ οὐρανῷ γενομένου θύοντας καλλιερεῖν Διὶ Ὑπάτῳ, Ἀθηνᾷ Ὑπάτῃ, Ἡρακλεῖ, Ἀπόλλωνι Σωτῆρι, καὶ ἀποπέμπειν Ἀμφιόνεσσι*). Cp. Cougny *Anth. Pal. Append.* 1. 201. 1 ff. = *Corp. inscr. Att.* iii. 1 no. 170, 2 ff. *Ὑψιμέδων Ὕπατε, πάτερ εἰρήνης βαθυκάῤῥου[ντος,] | σὸν Ἐλαίου* (for *Ἐλέου*) *βωμὸν ἱκετεύομεν ἡμεῖς*, (scansion!) *| Θρῃΐκες οἱ ναίοντες ἀγάκλυτον ἄστυ τὸ [Σά]ῤῥδε[ων(?),] | κ.τ.λ.*

(3) The tetrapolis of Marathon sacrificed to him in Gamelion (R. B. Richardson in the *Am. Journ. Arch.* 1895 x. 209 ff. col. 2, 13 *Διὶ ὑπ[άτῳ οἷς* Δ⊢⊢(?)] = J. de Prott *Leges Graecorum Sacrae* Lipsiae 1896 Fasti sacri p. 46 ff. no. 26, B 13 *Διὶ Ὑπ[άτωι – – – –]*).

(4) At Sparta he had a statue of hammered bronze by Klearchos of Rhegion (Paus. 3. 17. 6 (*supra* p. 739 n. 1), 8. 14. 7 *τοῦ ἐς Σπαρτιάτας λόγου τὰ ἐπὶ τοῦ ἀγάλματος τοῦ Ὑπάτου Διός*).

(5) In Paros on the top of Mt *Kounádos* the little church of the Prophet Elias has built into it boundary-stones belonging to Zeus *Ὕπατος*, to Aphrodite, to Histie *Δημίη* (O. Rubensohn in the *Ath. Mitth.* 1901 xxvi. 215). The first of these, a rough block of white marble, is inscribed in lettering of *s.* v B.C. [*ὅ*]*ρος Ὑπάτο· δ*[*τε*]|[*λ*]*έστοι οὐ θέμ*[*ι*]*ς οὐδὲ γυναι*[*κ*]*ί* (*sc.* *εἰσελθεῖν*) (*Inscr. Gr. ins.* v. 1 no. 183 with fig.).

Hýpsistos 'the Most High[1],' there is reason to suspect that the epithet had originally a literal rather than a metaphorical sense.

(6) At Rome the road between the Curia and the Basilica Aemilia yielded a block inscribed Διὶ Ὑπάτωι (*Inscr. Gr. Sic. It.* no. 994).

(7) An honorary inscription of *s.* ii A.D. found at Priene contains the clause ἀναγραψάτω (*sic*) (τὸ)δε [τ]ὸ ψήφισμα εἰς στήλην λευ|κοῦ λίθου καὶ ἀνατεθῆ[τ]ω ἐν τῶι ἱερῶ[ι τ]οῦ Διὸς τοῦ Ὑπάτου (*sc.* in Thessaly (?)) (F. Hiller von Gaertringen *Inschriften von Priene* Berlin 1906 no. 71, 28 f.).

(8) M. Schweisthal 'L'image de Niobé et l'autel de Zeus Hypatos au mont Sipyle' in the *Gaz. Arch.* 1887 xii. 224 argues that Zeus on Mt Sipylos was invoked under the name of Ὕπατος, cp. Nonn. *Dion.* 13. 533 ff. ὀψὲ δὲ δύσνιφον οἶδμα καὶ ὑδατόεσσαν ἀνάγκην | Ζεὺς ὕπατος (ὕδατος codd. F. M.) πρήνυε, καὶ ἑκ Σιπύλοιο καρήνων | κλυζομένης Φρυγίης παλιν-άγρετον ἤλασεν ὕδωρ. But ὕπατος is a commonish epithet of Zeus in the poets (Bruchmann *Epith. deor.* p. 141) and is used elsewhere by Nonnos (*Dion.* 33. 162 Ζεὺς ὕπατος καὶ θοῦρος Ἄρης καὶ θέσμιος Ἑρμῆς) without local significance.

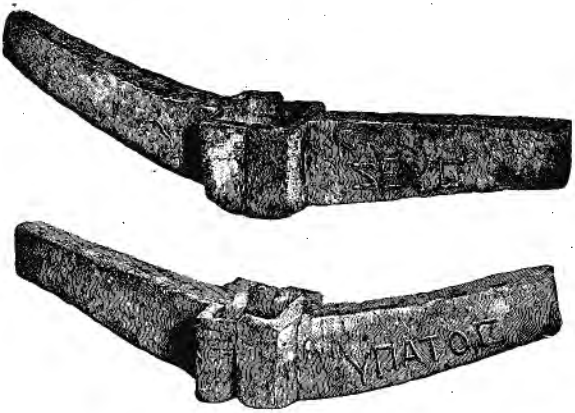

Fig. 815.

A leaden anchor, found off the coast of Kyrene and now in the British Museum, bears in relief the ship's name ΣΕΥΣ ΥΠΑΤΟΣ (C. Torr *Ancient Ships* Cambridge 1894 p. 71 f. pl. 8, 45, 46 and 47 (=my fig. 815)). The lettering points to *s.* i A.D.

According to schol. T. *Il.* 13. 837 some persons understood Διὸς αὐγάς as denoting τὰ ὑψηλὰ τῶν ὀρῶν!

[1] Examples of this appellative have been collected, classified, and discussed by E. Schürer in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1897 pp. 200—225 and F. Cumont *Hypsistos* (Supplément à la *Revue de l'instruction publique en Belgique*, 1897) Bruxelles 1897 pp. 1—15, *id.* in Pauly—Wissowa *Real-Enc.* ix. 444—450 *s.v.* Ὕψιστος. I am under deep obligation to their labours, as the following list will show.

Zeus Ὕψιστος was worshipped (1) at Athens in the Pnyx. For a good survey of the problems that cluster about this much-disputed site see *in primis* J. M. Crow and J. Thacher Clarke 'The Athenian Pnyx' in *Papers of the American School of Classical Studies at Athens* 1885—1886 iv. 205—260. The view adopted from H. N. Ulrichs by

F. G. Welcker *Der Felsaltar des Höchsten Zeus oder das Pelasgikon zu Athen, bisher genannt die Pnyx* Berlin 1852 pp. 1—75 with pl., *id.* 'Pnyx oder Pelasgikon' in the *Rhein. Mus.* 1856 x. 30—76, *id.* 'Ueber C. Bursians "Athenische Pnyx"' *ib.* 1856 x. 591—610, and defended especially by E. Curtius *Attische Studien* i Pnyx und Stadtmauer in the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe 1862 xi. 53—132 with pls. 1, 2, *viz.* that the so-called Pnyx was an ancient sanctuary of Zeus Ὕψιστος with the so-called *bêma* for its altar, is nowadays discredited. But it is generally admitted that in imperial times, when the Pnyx had long ceased to be used for public assemblies, a cult of Zeus Ὕψιστος as a healing god was here carried on. In the rock-cut back-wall of the Pnyx, between its eastern angle and the *bêma*, there are more than fifty rectangular niches cut to receive tablets. Many of the tablets that had been in the niches were found by Lord Aberdeen in 1803 buried in the earth at the foot of the wall and are now in the British Museum (*Corp. inscr. Gr.* i nos. 497—506, C. T. Newton in *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1874 i nos. 60—70, *Corp. inscr. Att.* iii. 1 nos. 147—156, 237, 238). They are dedications, mostly by women of the lower class, to Zeus Ὕψιστος (*Corp. inscr. Att.* iii. 1 no. 148 Σύντροφος | Ὑψίστῳ Διὶ | χαριστήριον,

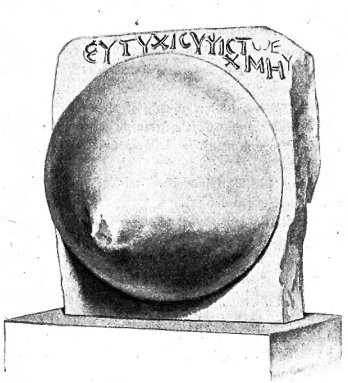

Fig. 816.

no. 153 Ὀνησίμη εὐχὴν | Διὶ Ὑψίστῳ with relief representing a female breast) or to θεὸς Ὕψιστος (*ib.* no. 237 .....α θεῷ Ὑψ[ιστω] | [ε]ὐχήν with relief of part of a shoulder) or more often to Ὕψιστος alone (*ib.* no. 149 Εὔοδος Ὑψίστου εὐχὴν with relief of a pair of eyes (cp. *ib.* no. 238=C. T. Newton *loc. cit.* no. 69), no. 150 Ὀλυμπιὰς Ὑψίστου | εὐχήν with relief of a woman's abdomen, no. 151 Τερτία Ὑψίστῳ | εὐχήν with relief of a face from the bridge of the nose downwards, no. 152 Κλαυδία Πρέπουσα | εὐχαριστῶ Ὑψίστῳ with relief of a pair of arms, no. 154 Εὐτυχὶς Ὑψίστῳ εὐ|χ(ήν) with relief of a female breast (=my fig. 816), no. 155 Εἰσιὰς Ὑψ[ίστω] | εὐ[χήν] with relief of a female breast).

Sporadic inscriptions attest the existence of the same cult elsewhere in Athens. L. Ross *Die Pnyx und das Pelasgikon in Athen* Braunschweig 1853 p. 15 cites three inscriptions discovered in the foundations of a house on the northern slope of the Akropolis (*Ann. d. Inst.* 1843 xv. 330 ff.) and now at Berlin (*Ant. Skulpt. Berlin* p. 270 no. 718 Εὐτυχία | Ὑψίστῳ | εὐχήν with relief of a female breast, no. 719 Εὐπραξ[ι]ς | εὐχήν with relief of a female breast, no. 720 Εἰσιδότη Διὶ Ὑ|ψίστῳ with relief of eyebrows, eyes, and bridge of nose. Cp. no. 721 an uninscribed relief from the same spot, representing the middle part of the body of a nude female). A column of Pentelic marble, found to the

west of the *Propylaia*, has Γλαῦκος, | Τρύφαινα, | Δέων | [Τ]ψίστῳ | [εὐχὴν] ὑπὲρ | [τῶν γονέων(?)] (*Corp. inscr. Att.* iii. 1 no. 146). A small Ionic capital from the southern slope of the *Akropolis* is surmounted by a broken eagle, beneath which is inscribed ἀγαθῇ τύχῃ. | Ἰουλ(ία) Ἀσκληπιανὴ | θεῷ Ὑψίστῳ ὑπέ[ρ] | Μαξίμου τοῦ υἱ[οῦ] | εὐχαριστήριον ἀνέθ[ηκεν].

(2) At Thebes near the Hypsistan Gates (Paus. 9. 8. 5 πρὸς δὲ ταῖς Ὑψίσταις Διὸς ἱερὸν ἐπίκλησίν ἐστιν Ὑψίστου). H. Hitzig—H. Blümner *ad loc.* note that these Gates are assumed to have been on the soutb-western side of the city, where they are shown, adjoining a hill of Zeus Ὕψιστος, in the map given by Frazer *Pausanias* v. 32.

(3) At Corinth three statues of Zeus stood in the open air. One of them had no special title; the second was Χθόνιος; the third, Ὕψιστος (Paus. 2. 2. 8 τὰ δὲ τοῦ Διός, καὶ ταῦτα ὄντα ἐν ὑπαίθρῳ, τὸ μὲν ἐπίκλησιν οὐκ εἶχε, τὸν δὲ αὐτῶν Χθόνιον καὶ τὸν τρίτον καλοῦσιν Ὕψιστον). We are hardly justified in asserting with Welcker *Alt. Denkm.* ii. 87 that the nameless Zeus was 'ohne Zweifel ein...Zenoposeidon,' or in conjecturing with P. Odelberg *Sacra Corinthia, Sicyonia, Phliasia* Upsala 1896 p. 7 that he was a Zeus ἐνάλιος. Such a god would surely have had a distinctive appellation. See, however, Gruppe *Gr. Myth. Rel.* p. 1094 n. 27, *supra* p. 582 ff.

(4) At Argos Smyrna, the wife of Maenius Apollonius and apparently priestess of Zeus, in an interesting epitaph describes her tomb as a barrow adjoining the sanctuary of Zeus Ὕψιστος (*Inscr. Gr. Pelop.* i no. 620, 4 = Cougny *Anth. Pal. Append.* 2. 286. 8 ὑψίστου δ' ἡρίον ἄγχι Διός]).

(5) At Olympia Zeus Ὕψιστος had a couple of altars on the way to the Hippodrome (Paus. 5. 15. 5 πλησίον δὲ καὶ Μοιρῶν βωμός ἐστιν ἐπιμήκης, μετὰ δὲ αὐτὸν Ἑρμοῦ, καὶ δύο ἑφεξῆς Διὸς Ὑψίστου. K. Wernicke's cj. μετὰ δὲ αὐτὸν δύο ἑφεξῆς Ἑρμοῦ καὶ Διὸς Ὑψίστου is unnecessary).

(6) In Skiathos is a marble slab inscribed with a dedication [Διὶ Ὑ]ψίστῳ καὶ τῇ Πόλει | κ.τ.λ. (*Inscr. Gr. ins.* viii no. 631).

(7) At Hephaistia in Lemnos is a round altar of white marble inscribed in lettering of *s.* ii or iii A.D. Ἐπηκόῳ | θεῷ Ὑψίστῳ | Βεῖθυς ὁ καὶ | Ἄδωνις | εὐχήν (*Inscr. Gr. ins.* viii no. 24).

(8) In Imbros was a slab of white marble, broken at the right side, with the inscription Διὶ Ὑψίσ[τῳ] | Ἀθηναίῳ[ν] | Ἀρίστωρ[os] | εὐχ<ης>ήν (A. Conze *Reise auf den Inseln des Thrakischen Meeres* Hannover 1860 p. 90 pl. 15, 2, *Inscr. Gr. ins.* viii no. 78. In line 4 Conze suggests εὐχῆς (ἕ)ν[εκα]. Wilamowitz says: 'Fortasse Διὶ ὑψίστωι [ὑπὲρ τοῦ δήμου τῶν vel καὶ τῶι δήμωι τῶι] Ἀθηναίω[ν τῶν ἐν Ἴμβρωι ἀνέθηκεν] Ἀρίστων [patris ἑξ] εὐχῆς ἣν [εὔξατο ὁ δεῖνα]').

(9) Makedonia has furnished dedications from Aigai (L. Duchesne—C. Bayet *Mémoire sur une mission au mont Athos* Paris 1877 no. 136 Διὶ Ὑψίστῳ εὐχὴν Μάκρος Διβύρνιος Οὐάλης, no. 137 Διὶ Ὑψίστῳ Πο. Αἴλιος Τερεντιανὸς Ἀττικὸς κατ' ὄναρ), Kerdylion (P. Perdrizet in the *Bull. Corr. Hell.* 1895 xix. 110 M. Λευκεΐλιο[ς] | Μακλᾶς θεῷ[ι] | Ὑψίστωι χα|ριστήριον), and elsewhere (Delacoulonche *Le berceau de la puissance macédonienne* no. 20 to Zeus Ὕψιστος, cited by P. Perdrizet in the *Bull. Corr. Hell.* 1898 xxii. 347 n. 2).

(10) In Thrace we have inscriptions from Anchialos (C. Jireček in the *Arch.-ep. Mitth.* 1886 x. 173 no. 3 ΔΗΥΨΙΣΙΙΔΕΣ▩ | ΓΗΠΟΛΥΠΡΟΣ▩ | ▩ΟΝΤΕΙΙΝΩΝ-ΚΑΙΣ | ΑΥΤΟΥΕΥΧΑΡΙΣΗ | PION, which is read by O. Benndorf *ib.* n. 32[a] as Διὶ ὑψίσ[τῳ] ἐ[πόπ]τῃ(?) Πολύ[βι]ος [τ]ῶν τέ[κ]νων καὶ [ἑ]αυτοῦ εὐχαριστήριον) and Selymbria (R. Cagnat *Inscriptiones Graecae ad res Romanas pertinentes* Paris 1911 i. 255 no. 777 Θεῶι ἀγίωι ὑψίστωι | ὑπὲρ τῆς Ῥωιμη|τάλκου καὶ Πυθο|δωρίδος ἐκ τῶν κα|τὰ τὸν Κοιλα[λ]ητικὸν | πόλεμον κινδύνου | σωτηρίας εὐξάμενος | καὶ ἐπιτυχὼν Γάιος | Ἰούλιος Πρόκ(λ)ος χαρι|στ[ήρι]ον).

(11) Moesia. An altar of reddish limestone, found among Roman remains between the villages of *Selenigrad* and *Miloslavci*, and now in the Museum at *Sofia*, is inscribed Ὦ θεῶι Ὑψί[στωι] | ὑπὲρ Αὐφιδίων οἴκων | [·····Αὐ]φίδιο[s·····] (E. Kalinka *Antike Denkmäler in Bulgarien* Wien 1906 p. 133 f. no. 145). A limestone altar at *Pirot* reads ἀγαθῇ [τύ]χ[ῃ] | Θεῷ ἐπηκόῳ ὑψίστῳ | εὐχὴν ἀνέστησαν | τὸ κοινὸν ἐκ τῶν ἰ|δίων διὰ

ἱερέως | Ἑρμογένους καὶ προ|στάτου Αὐγουστιανοῦ | Ἀχιλλεύς, Αὐρ̣ήλις, Δῖο(ς), Ἀλέ|ξανδρος, Μόκας, Μο[κι]ανός, | Δομ̣ῆτις, Σοφεῖνος, Παυ|λεῖνος, Πύρος, Ἀπολινά|ρις, Μοκιανός, [Σ(?)]ῆ-λυς | καὶ Ἀλέξανδρος Ἀσκ|ληπιάδου· θία[σος (?)] Σεβαζ[ιανὸς θη[…]τουτας | – – (A. von Domaszewski in the *Arch.-ep. Mitth.* 1886 x. 238 f. no. 2).

(12) Korkyra (*Corp. inscr. Gr.* ii no. 1869 Φαιακοσίνη Διεὶ Ὑψίστω | εὐχήν).

(13) Rome. A round base in the Galleria Lapidaria of the Vatican is inscribed Θεῶι Ὑψίστωι εὐχὴν ἀνέθηκεν | Κλαυδία Πίστη (*Inscr. Gr. Sic. It.* no. 995).

(14) Crete. T. A. B. Spratt *Travels and Researches in Crete* London 1865 ii. 414 no. 1 pl. I, 1 Κο[ί]ρανος θε|ῶι ὑψίστωι | εὐχὴν δη|μόσιος (C. Babington's reading *ib.* is wrong) from Knossos.

(15) Kypros. Dedications to the Θεὸς Ὕψιστος have come to light at *Hagios Tychon* near Amathous (M. Beaudouin—E. Pottier in the *Bull. Corr. Hell.* 1879 iii. 167 a round *cippus* inscribed Θεῷ ὑψίστῳ | Νεικόδημος | κατ[ὰ] χρηματισ|μόν), Golgoi (P. Perdrizet in the *Bull. Corr. Hell.* 1896 xx. 361 ff. published a series of tablets in yellowish tufa, with holes for suspension; said to have come from a spot near *Athienou* and then in the hands of Z. Malis at *Larnaka*: no. 1 Θεῶ Ὑψίστω ἀνέθη|κεν Πρόκτυος εὐξαμέ|[ν]ῃ with relief of two female breasts. no. 2 Θεῶ Ὑψίστω εὐξαμέ|[νη – – –] with two eyes painted in black, cp. no. 3 three square tablets with *phallós* in relief but without inscription, no. 4 several fragmentary tablets of larger size with remains of painting or drawing, *e.g.* horse), and Kition (Lebas—Waddington *Asie Mineure* iii no. 2740 read by Perdrizet *loc. cit.* [Θεῶ Ὑ]ψίστω Θέων οἰκοδόμος εὐχήν).

(16) Pisidia. At Oinoanda is a dedication built into the wall near the town-gate (*Corp. inscr. Gr.* iii Add. no. 4380 *n*[2] Χρ(ω)μα|τὶς θεῶ | Ὑψίστω | τὸν λύ|χνον | εὐχ[ήν]= Lebas—Waddington *Asie Mineure* no. 1231). At Termessos a *cippus*, which once supported a votive foot (commemorating a visitation or epiphany of the god), is inscribed Θεῶ ἐπηκόῳ Ὑ|ψιστότυχος ὁ καὶ Ἀττα|λιανὸς Ἐρ(μαῖος) β′ | Σύρου π̄ᾱτ̄ κα|τὰ κέλευσιν | αὐτοῦ ἔστη | ᾧ σεν ☿ | σὺν τῷ ἐπόντι | ἴχνει θεοῦ (K. Lanckoroński—G. Niemann—E. Petersen *Städte Pamphyliens und Pisidiens* Wien 1892 ii. 76 fig. 27, 220 no. 178. *Eid. ib.* p. 32 rather doubtfully take the name of the dedicator to be 'Hephaistotychos.' F. Cumont *Hypsistos* (Supplément à la *Revue de l'instruction publique en Belgique*, 1897) Bruxelles 1897 p. 14 reads Θεῷ ἐπηκόῳ Ὑ(ψ)ιστ(ῳ) Τυχ(ί)ος and Σύρου πά(π που(?))).

(17) Karia. Zeus Ὕψιστος had cults in Iasos (B. Haussoullier in the *Bull. Corr. Hell.* 1884 viii. 456 a boundary-stone of white marble inscribed Διὸς Ὑψίστου. Zeus had a temple at Iasos (*Corp. inscr. Gr.* ii no. 2671, 26=Michel *Recueil d'Inscr. gr.* no. 462, 26)), Lagina (C. Diehl—G. Cousin in the *Bull. Corr. Hell.* 1887 xi. 159 no. 67 Διὶ Ὑψίστῳ | καὶ θειωσ[···]σιλικω Σ[τε]|φανίων ὑπὲρ | αὐτοῦ καὶ | τῶν ἰδίων | πάντων εὐ|χαριστήρι[ον]. I should conjecture Θείῳ (as at Stratonikeia: see below) τῷ βασιλικῷ, 'the royal Zeus Ὕψιστος καὶ Θεῖος'), Miletos (O. Kern in the *Ath. Mitth.* 1893 xviii. 267 no. 1 a column of white marble, found at *Palatia* near the big mosque, inscribed Διὸς | Ὑψίστου, Dittenberger *Orient. Gr. inscr. sel.* no. 755 built into a Byzantine church τὸν ἱερέα τοῦ ἁγιωτά|του [Θεοῦ Ὑψ]ίστου Σωτῆρος | Οὐλπιον Κάρπον | βουλευτὴν ὁ στατίων (*sc.* assembly) | τῶν κατὰ πόλιν κηπου|ρῶν τὸν ἴδιον εὐεργέτη[ν] | ὑπὲρ τῆς ἑαυτῶν σωτηρί[ας], no. 756 built into the same Byzantine church Οὐλπιον Κάρπον, | τὸν προφήτην τοῦ | ἁγιωτάτου Θεοῦ | Ὑψίστου, | ὁ στόλος τῶν σωληνο|κεντῶν (*sc.* spikers of razor-fish) τὸν ἴδιον εὐ|εργέτην διὰ πάντων. T. Wiegand in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1904 p. 87 infers from these two inscriptions that in early Byzantine days a Christian church was founded on the site of a temple dedicated to the Θεὸς Ὕψιστος), Mylasa (*Corp. inscr. Gr.* ii no. 2693 *e*, 1 f. = Lebas—Waddington *Asie Mineure* no. 416, 1 f. = A. Hauvette-Besnault—M. Dubois in the *Bull. Corr. Hell.* 1881 v. 107 ff. no. 11, B, 1 f. ἐπὶ στεφανηφόρου | Ἀριστέου τοῦ Μέλανος τοῦ Ἀπολλωνίου ἱερέως Διὸς Ὑψίστου καὶ Τύχης Ἀγαθῆς, Panamara (G. Deschamps —G. Cousin in the *Bull. Corr. Hell.* 1888 xii. 271 f. no. 57 [Διὶ] Ὑψίστῳ | καὶ Ἑκάτῃ Σω[τείρᾳ] | [κ]αὶ Διὶ Καπε[τωλίῳ] | [κ]αὶ Τύχῃ τοῦ μ[εγίστου] | [Αὐτ]οκράτορος Κ[αίσαρος] | [Τίτου] Αἰλίου Ἀδριανοῦ [Ἀντω][νίνου] Σεβαστοῦ | [···κα]ὶ ταῖς τοῦ Δι[ὸς····] | [·····τολε – – –]), Stratonikeia (Lebas—Waddington *Asie Mineure* no. 515 on a *stèle* in the form of an altar, with a horse (*supra* i. 20) advancing below, Διὶ Ὑψίστῳ καὶ |

'Αγαθῷ 'Ανγέλῳ, | Κλαύδιος 'Αχιλ(λ)εὺς καὶ Γαλατ[ί]α ὑπὲρ σωτηρί[ας] | μετὰ τῶν ἰδίων | πάντων, χαριστ[ή]ριον, A. Hauvette-Besnault—M. Dubois in the *Bull. Corr. Hell.* 1881 v. 182 f. no. 3 Διὶ Ὑψίστῳ | καὶ Θείῳ 'Αγ|γέλῳ Νέων | καὶ Εὐφροσύ|νῃ ὑπὲρ τῶν | ἰδίων, no. 4 [Διὶ(?)] Ὑψίστῳ καὶ | Θείῳ Φρό|νιμος καὶ | Πειθὼ κα[ὶ](*sic*) | ὑπὲρ τῶν [ἰ]δίων χαρι|στήριον, G. Cousin in the *Bull. Corr. Hell.* 1891 xv. 418 f. no. 1 at *Djîdé* [Δ]ιὶ Ὑψίστ[ῳ] | καὶ Θείῳ Εὐ|τύχης καὶ Σ[υν]|φιλοῦσα, 'Αν|δρέας, 'Αν|τίοχος ὑ|πὲρ ἑαυτῶ[ν] | καὶ τῶν ἰδίων χαριστή|ριον), and Tralleis (I. Misthos in the Μουσεῖον καὶ Βιβλιοθήκη τῆς Εὐαγγελικῆς Σχολῆς ἐν Σμύρνῃ 1873—1875 p. 95 no. 89 Θεῷ Ὑψίστῳ | κατ' ὄναρ on a small quadrilateral *stéle*).

(18) Kos. W. R. Paton—E. L. Hicks *The Inscriptions of Cos* Oxford 1891 p. 116 no. 63 record a small *stéle*, with *aedicula* and rosette, inscribed Θεανὸς | Θεῷ Ὑψί|στῳ εὐ|χήν.

(19) Delos. Two votive inscriptions, the one certainly, the other probably, from Rheneia, both dating from the close of *s.* ii B.C. and couched in terms so similar as to be practically identical, record prayers to the Θεὸς Ὕψιστος for speedy vengeance on behalf of

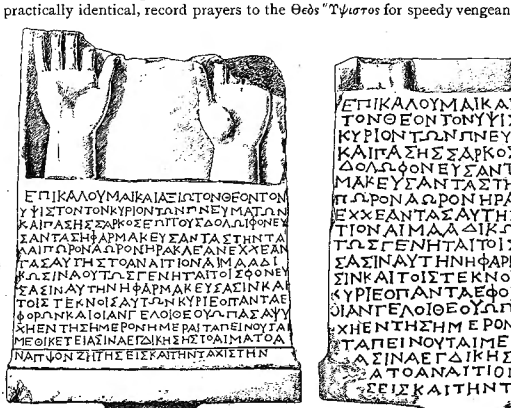

Fig. 817.

two Jewish maidens named Marthine and Heraklea respectively (the names recur in the *Corp. inscr. Gr.* ii Add. no. 2322 *b*[68] and no. 2322 *b*[69] = Lebas—Foucart *Îles* no. 2041 and no. 2039), who had been done to death by violence or witchcraft. The Marthine-inscription, much mutilated, is now in the National Museum at Athens (best published by A. Wilhelm in the *Jahresh. d. oest. arch. Inst.* 1901 iv Beiblatt p. 9 ff. fig. 2). The Heraklea-inscription, better preserved, is in the Museum at Bucharest (*id. ib.* p. 9 ff. fig. 3 = my fig. 817): its text and relief are repeated on the back as well as on the front of the *stéle* (Dittenberger *Syll. inscr. Gr.*[3] no. 1181, 1 ff. ἐπικαλοῦμαι καὶ ἀξιῶ τὸν Θεὸν τὸν | Ὕψιστον, τὸν κύριον τῶν πνευμάτων | καὶ πάσης σαρκός, ἐπὶ τοὺς δόλῳ φονεύ|σαντας ἢ φαρμακεύσαντας τὴν τα|λαίπωρον ἥρωα Ἡράκλεαν, ἐχχέαν|τας αὐτῆς τὸ ἀναίτιον αἷμα ἀδίκως, ἵνα οὕτως γένηται τοῖς φονεύ|σασιν αὐτὴν ἢ φαρμακεύσασιν καὶ | τοῖς τέκνοις αὐτῶν, κύριε ὁ πάντα ἐ|φορῶν καὶ οἱ ἄνγελοι Θεοῦ, ᾧ πᾶσα ψυ|χὴ ἐν τῇ σήμερον ἡμέραι ταπεινοῦται | μεθ' ἱκετείας, ἵνα ἐγδικήσῃς τὸ αἷμα τὸ ἀναίτιον ζητήσεις καὶ τὴν ταχίστην (Dittenberger *op. cit.*[2] on no. 816 says: 'Exspectes ἵνα ζητήσῃς τὸ αἷμα τὸ ἀναίτιον καὶ ἐγδικήσῃς τὴν ταχίστην.' The Marthine-text, however, runs: ἵνα ἐγδικήσῃ[ς] | τὸ αἷμα τὸ ἀναίτιον καὶ τὴν ταχίστη[ν],

Marble *stéle* from Panormos near Kyzikos, now in the British Museum, with dedication to Zeus *Hýpsistos* and votive reliefs representing Zeus, Artemis (?), Apollon and a banquet.

See page 881.

omitting the second verb altogether. A. Deissmann, who has a detailed discussion of both *stēlai* in his *Licht vom Osten* Tübingen 1908 pp. 305—316 figs. 55—57, thinks that the archetype had ἵνα ἐγδικήσῃς τὸ αἷμα τὸ ἀναίτιον καὶ ζητήσῃς τὴν ταχίστην)). The uplifted hands are those of the suppliant : cp. *infra* no. (33) Aigyptos.

(20) Lydia. Hierokaisareia (A. M. Fontrier in the Μουσεῖον καὶ Βιβλιοθήκη τῆς Εὐαγγελικῆς Σχολῆς ἐν Σμύρνῃ 1886 p. 33 no. *φί* = P. Foucart in the *Bull. Corr. Hell.* 1887 xi. 95 no. 16 at *Sasoba* Λούκιος Θε|ῷ Ὑψίστῳ ε|ὐχήν). Koloe in Maionia (M. Tsakyroglou in the Μουσεῖον καὶ Βιβλιοθήκη τῆς Εὐαγγελικῆς Σχολῆς ἐν Σμύρνῃ 1878—1880 p. 161 no. *πκδ'* Ἀπολλωνίσκος | ὑπὲρ τοῦ υἱοῦ Ἐρ|μογένους Θεῷ | Ὑψίστῳ εὐχήν). Philadelpheia (*Ala-Shehir*) (J. Keil—A. von Premerstein 'Bericht über eine Reise in Lydien und der südlichen Aiolis' in the *Denkschr. d. Akad. Wien* 1910 ii Abh. p. 27 no. 39 on a *stēle* with gabled top *ἔτους σξθ'* (269 of Actian era = 238/9 A.D., of Sullan era = 184/5 A.D.), *μη(νὸς)* | Αὐδ(ν)αίου *ί.* Φλα|βία Θεῷ Ὑψίστῳ | εὐχήν). *Sari-Tsam* (A. M. Fontrier *ib.* 1886 p. 68 no. *φνζ'* = P. Foucart in the *Bull. Corr. Hell.* 1887 xi. 84 f. no. 4, *a* Τειμόθεος Διαγόρου | Λαβραντίδης (Foucart justly cp. the epithet Λαβρανδεύς) καὶ Μόσχιο[ν] | Τειμοθέου ἡ γυνὴ αὐτοῦ | Θεῶι Ὑψίστωι εὐχὴν τὸν | βωμόν, *b* (by another hand) Διαγόρας, Τειμόθεος, Πύθεος | οἱ Τιμοθέου τοῦ Διαγόρου υἱο[ί] | Λαβραντίδαι τὰς λυχναψίας | Ὑψίστῳ (Ὑψίστωι Fontrier) ἀνέθηκαν). Silandos (Lebas—Waddington *Asie Mineure* no. 708 Θεῷ Ὑψίστῳ | εὐχὴν ἀνέθη|κε Ἑλένη ὑ|πὲρ Θρασυβού|λου τοῦ υἱοῦ | Θρασυβούλ|ου). *Tchatal Tepe* (K. Buresch *Aus Lydien* Leipzig 1898 p. 119 no. 57 on a small marble altar Θεῷ Ὑψίστῳ Ἀ|γαθόπους καὶ | Τελέσειρα εὐ|χὴν· ἔτους σν' | *μη(νὸς)* Δαισίου *κ'*). *Phata*, three hours east of *Theira* (A. M. Fontrier in the Μουσεῖον καὶ Βιβλιοθήκη τῆς Εὐαγγελικῆς Σχολῆς ἐν Σμύρνῃ 1876—1878 p. 32 on an altar-step Θεῷ Ὑψίστῳ. | Νεικηφόρος Ἐρμοκράτου ἱερε[ὺ]ς σὺν καὶ Ἑρμο[κρ]άτει τῷ ἀδ[ελ][φῷ] τὸν βωμὸ[ν][ἀνέσ]τησαν· | [ἔτ]ους σκ'). Thyateira (A. Wagener in the *Mémoires de l'académie royale des sciences, des lettres et des beaux-arts de Belgique* Série in 4° Classe de Lettres 1861 xxx. 39 = A. M. Fontrier in the *Revue des études anciennes* 1902 iv. 239 no. 4 a relief of an eagle: on the base is inscribed Μοσχιανὸς Βασιλεὺς | Ὑψίστῳ Θεῷ εὐχήν. J. Keil—A. von Premerstein 'Bericht über eine zweite Reise in Lydien' in the *Denkschr. d. Akad. Wien* 1911 ii Abh. p. 17 f. no. 28 on a small altar of bluish marble in lettering of the end of *s.* ii or *s.* iii A.D. Εὐελ(πί)στ[η] | [Θ]εῶ Ὑψ[ισ][τ]ω εὐχὴ[ν][ἀν]έθη[κεν] | [εὐτ]υχῶ[ς], no. 29 on a small altar of similar material and date [Τ]ρυφῶσα | [Θ]εῶ Ὑψίστω | εὐχήν). Cp. *Ak Tash* (Temenothyrai ?) (*eid. ib.* p. 129 no. 237 on a *stēle* of whitish marble with gabled top, in lettering of *s.* ii A.D., beneath an incised wreath Τύρανις Ἀφ[ρι]|άδος Ὑ[ίστω] | εὐ[χήν]) and *Gjölde* near Koloe (*eid. ib.* p. 97 no. 189 on a *stēle* of whitish marble, in lettering of *s.* i or ii A.D., beneath a sunk panel representing in front view a male (?), with *chitōn* and *himātion*, raising the right hand in adoration and holding a staff in the lowered left Θεᾶ Ὑ[ίστη Γλύκων | εὐχήν). The references to J. Keil—A. von Premerstein were kindly furnished to me by Mr A. D. Nock.

(21) Mysia. At Kyzikos a small cubical base of pink St Simeon marble, found near the theatre, reads [Σ]ωγ[ένης(?)] | Νεικάνδ[ρου] | Διὶ Ὑ[ίστῳ] | εὐχήν (Sir C. Smith—R. de Rustafjaell in the *Journ. Hell. Stud.* 1902 xxii. 207 no. 14, F. W. Hasluck *Cyzicus* Cambridge 1910 p. 271 no. 11). From Panormos (*Panderma*) near Kyzikos came a votive *stēle* of white marble, presented by A. van Branteghem in 1890 to the British Museum (A. H. Smith in the *Brit. Mus. Cat. Sculpture* i. 374 f. no. 817, F. H. Marshall in *The Collection of Ancient Greek Inscriptions in the British Museum* London 1916 iv. 2. 153 no. 1007 with fig. I am indebted to Mr Smith for the photograph by Mr R. B. Fleming from which my pl. xxxix is taken). This relief, which has aroused much interest (see *e.g.* A. S. Murray in the *Rev. Arch.* 1891 i. 10 f. no. 1, H. Lechat—G. Radet in the *Bull. Corr. Hell.* 1893 xvii. 520 f., F. Cumont *Hypsistos* Bruxelles 1897 p. 12 no. 3 pl., P. Perdrizet in the *Bull. Corr. Hell.* 1899 xxiii. 592 f. pl. 4, E. Ziebarth 'ΧΟΤΣ' in the *Ath. Mitth.* 1905 xxx. 145 f., F. Poland *Geschichte des griechischen Vereinswesens* Leipzig 1909 p. 370, F. W. Hasluck *Cyzicus* Cambridge 1910 pp. 207, 271 no. 13, Reinach *Rép. Reliefs* ii. 493 no. 3), represents three deities standing side by side in a sunk panel—Zeus in *chitōn* and *himātion*, with a *phiale* in his right hand, a sceptre in his left; Artemis (Persephone, or perhaps

Hekate, according to Murray *loc. cit.* Dionysos, according to Smith and Reinach *locc. citt.*) in short *chitón, chlamýs,* and high boots, with a *phiále* in her right hand, a torch in her left; Apollon in long *chitón* and *himátion*, with a *phiále* in his right hand, a *kithára* in his left, and a snake-twined *omphalós* beside him. Beneath, in low relief, is a banquet of six men, who recline on cushions placed upon a long mattress. On the right a cup-bearer, in a short *chitón*, holds an *oinochóe* in one hand, an *askós* in the other, and draws wine from a large *kratér* partially sunk in the floor. On the left a seated musician plays two flutes, one straight, one curved, while his feet beat time with *krousmáai*. In the centre a girl, stark naked, is dancing, and a man in the costume of a mime-performer, with a pair of long *krótala* in his hands, is running round her at a lively pace. The pediment above is filled with an inscription, whose ligatures point to a date in *s.* ii A.D. Δι·ἰ· Ὑ·|ψίστῳ·κ(αὶ)· | τῷ χώρῳ Θάλλος | ἐπώνυμος·τὸν· | τελαμῶνα·ἀπέδωκα, 'I Thallos, the name-giver (of the *thíasos*), duly presented the relief to Zeus *Most High* and to the Place (where the *thiasôtai* assemble).' So Marshall *loc. cit.* Perdrizet *loc. cit.* understood: 'Thallos, magistrat éponyme, a voué ce cippe à Zeus céleste et au bourg.' Murray, Smith, and Cumont *locc. citt.* thought χώρῳ a blunder for χορῷ (to which not one of them gives the right accent). Ziebarth *loc. cit.*, following T. Reinach in the *Rev. Et. Gr.* 1894 vii 391, will have it that χῷ was the name of the *thíasos*, cp. T. Wiegand in the *Ath. Mitth.* 1904 xxix. 316 an altar-shaped base of white marble from *Nuserat*, one hour south of *Kebsud* in Mysia, inscribed τὸν Βρομίου μύστην | [ἱ]ερῶν, ἄρξαντα χοῦ, | κ.τ.λ. At Pergamon the Θεὸς Ὕψιστος, presumably Zeus (M. Fränkel *Die Inschriften von Pergamon* Berlin 1895 ii. 243 f. no. 331 on a small altar of white marble Γλύκινα | Θεῷ Ὑψίστῳ | εὐχὴν ἀνέθηκα, ἐρωμένη μετὰ τὸν | [ὄνειρον(?) – – –] | [– – – – –] (the last two lines covered with white daub)), was further identified with Helios (*id. ib.* ii. 243 no. 330 on a small altar of white marble from the precinct of Athena [Ἡλ]ίωι, | Θ[ε]ᾷ· | Τ̣ψ̣[ί]στωι, | Τάτιον | ε[ὐ]χήν). At Plakia near Kyzikos was another thank-offering to the Θεὸς Ὕψιστος (*Corp. inscr. Gr.* ii no. 3669 ἀγαθῇ τύχῃ. | Γ. Πεσκέννιος Ὀνήσιμος | Θεῷ Ὑψίστῳ σωθεὶς ἀνέθηκα ἐκ μεγάλου κιν|δύνου μετὰ τῶν ἰδίων. | νείκης εὐχαριστήριον | ἀναθεῖναι (the last two lines are incomplete: *sc.* ἐπέταξεν ὁ θεός or the like). On the remarkable dedication to Zeus Ὕψιστος Βρονταῖος, now in the Tchinili Kiosk at Constantinople, but probably derived from the Cyzicene district, see *supra* p. 833 ff. fig. 793.

(22) Lesbos. Several dedications to the Θεὸς Ὕψιστος have been found at Mytilene (*Inscr. Gr. ins.* ii no. 115 on a large base or altar of white marble, above and below a relief representing an eagle with spread wings in a great olive-wreath Θεῷ Ὑψίστῳ ε[ὐ]χ[α]ριστήριον Μάρκος || Πομπήιος Λυκάων μ[ετ]ὰ τῆς συμβίου Φοίβης | καὶ τῶν ἰδίων, no. 119 on a small base or altar Γ. Κορνήλι(ο)ς | Χρηστίων, Κορ|νηλία Θάλλου|σα, Γ. Κορν<ι>ήλιος | Σεκοῦνδος χει|μασθέντες ἐν | πελάγει Θεῷ Ὑ[ψίστῳ χρηστήρι]ον (the last word a blunder for χαριστήριον), no. 125 (=A. Conze *Reise auf der Insel Lesbos* Hannover 1865 pp. 5, 12 pl. 5, 3) Θεῷ | Ὑψίστῳ | Π. Αἴλιος Ἀρ|ριανὸς Ἀλ[έ]|ξανδρος, | βουλευ(τὴς) | Δακίας κο|λωνείας | Ζερμιζεγ[ε]|θούσης, εὐχὴ[ν] | ἀνέθηκεν), and one of these by adding the title Κεραύνιος makes it clear that Zeus is meant (*supra* p. 807 n. 3 no. (3)).

(23) Phrygia. Here too the Θεὸς Ὕψιστος had a considerable vogue—at Aizanoi (Lebas—Waddington *Asie Mineure* no. 987 = *Corp. inscr. Gr.* iii Add. no. 3842 *d* [ὁ δεῖνα] Ἀλε[ξά]νδρου |Ε|όνιος ([Π]ειδνιος Lebas. Cp. Πειονίου = *Pioni* in *Inscr. Gr. Sic. It.* no. 1363, 5 ff., Πιονίου in the *Corp. Inscr. Gr.* iv no. 8866, 9. A. B. C.) | [Θεῷ *vel* Διὶ] Ὑψίστῳ εὐχήν), at *Hadji-keui* near Aizanoi (A. Körte in the *Ath. Mitth.* 1900 xxv. 405 no. 9 on an altar of half-marble Αὐρ. Ἀσκληπιάδ[ης] | ἐλεηθεὶς ἀπ' ὄλλων (!) τῶν παθημάτ[ων] | εὐξάμενος Θεῷ Ὑ[ψ]ίστῳ μετὰ | τῶν εἰδίων (so Körte. Better ἀπὸ <πο>λλῶν by lipography. A. B. C.), at *Yenije* near Akmoneia (W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1897 ii. 652 f. no. 563 [ἐὰν δέ τις ἕτερον σῶμα εἰσενέγκῃ, ἔσ]ται αὐτῷ πρὸς τὸν θεὸν τὸν ὕψιστον, καὶ τὸ ἀρᾶς δρέπανον εἰς τὸν ὄκον αὐτοῦ [εἰσέλθοιτο καὶ μηδέναν ἐκκατα-λείψαιτο], where the *formula* ἔσται αὐτῷ πρὸς τὸν θεόν and the phrase τὸν θεὸν τὸν ὕψιστον suit the epitaph of a Jew or perhaps a Jewish Christian), at *Hadji-Eyub-li* near Laodikeia (W. M. Ramsay *op. cit.* 1895 i. 78 no. 14 [. . . .]s Θεῷ Ὑψίστῳ εὐχήν), at Nakoleia (*Seidi Ghazi*) (W. M. Ramsay in the *Journ. Hell. Stud.* 1884 v. 258 n. 2 no. 9 on a small

slab of marble Θεῷ Ὑψίσ|τῳ εὐ|χὴν Αὐ|ρήλιος | Ἀσκλάπω|ν, ἣν ὁμο|λό(γ)ησεν ἐ[ν] | Ῥώμῃ), at *Arslan Apa* in the upper valley of the river Tembrogios or Tembrios (J. G. C. Anderson in W. M. Ramsay *Studies in the History and Art of the Eastern Provinces of the Roman Empire* Aberdeen 1906 p. 211 no. 9 on an altar with a garland in relief [. . . . η] Νικο[μά(?)]χου [. .] | [ἔτου]ς πλη' (=253/4 A.D.)· Αὐρ. Ἰάσων Θεῷ | Ὑψίστῳ εὐχήν). The Θεὸς Ὕψιστος was here, as Anderson saw, Zeus Βέννιος or Βεννεύς the native god of the district (W. M. Ramsay in the *Journ. Hell. Stud.* 1884 v. 259 f. no. 11 on a marble *cippus* from *Karagatch Euren* near *Altyntash*, below a relief representing a bunch of grapes, an eagle, and a radiate head of the sun-god Διὶ Βεννίῳ | Διογένης ὑπὲρ | Διογένους πάππου | καὶ Κλ. Χρυσίου | μάμμης καὶ τῶν | κατοικούντων | ἐν Ἰσκόμῃ καθιέρω|σεν. | Ἀπολλώνιος Ἰσγερεανὸς ἐποίει. Ramsay refers the *cippus* 'most probably to the second century after Christ,' adding 'I understand this inscription to be placed by Diogenes on the grave of his grandparents; in preparing the grave Diogenes considers that he is dedicating the spot to Zeus Bennios. The grave is a shrine of Zeus, and the funeral offerings to the dead were considered at the same time as offerings to Zeus.' *Id. ib.* p. 258 f. no. 10 on a *stèle* at Serea (*Kuyujak*), three hours north-west of Nakoleia Μάρκος | Μάρκου | Διὶ Βροντῶν|τι καὶ Βεννεῖ | Σερεανῷ στ|έφανον. Ramsay remarks: 'Here it is evident that Benni-s, or Zeus Benneus, the god of the western side [of the mountains], and Papas, or Zeus Bronton, the god of the eastern side, are expressly identified.' Lebas—Waddington *Asie Mineure* no. 774=*Corp. inscr. Gr.* iii Add. no. 3857 *l*=G. Perrot—E. Guillaume—J. Delbet *Exploration archéologique de la Galatie et de la Bithynie* etc. Paris 1872 i. 122 f. no. 86 on a cylindrical *cippus* at *Altyntash* ὑπὲρ τῆς αὐτοκράτορος | Νερούα Τραϊανοῦ Καίσαρος | Σεβαστοῦ Γερμανικοῦ | Δακικοῦ νείκης Διὶ Βεννίῳ | Μηνοφάνης Τειμολάου | τὸν βωμὸν ἀνέστησεν | Βεννεισοηνῶν. W. M. Ramsay *The Historical Geography of Asia Minor* (*Royal Geographical Society: Supplementary Papers* iv) London 1890 p. 144 f. (cp. S. Reinach *Chroniques d'orient* Paris 1891 p. 498) was the first to read the concluding line aright as Βεννεῖ Σοηνῶν, Soa being the chief town of the Praipenisseis in the neighbourhood of *Altyntash*), whose priests, the Βεννεῖται, are mentioned in another inscription from the same locality (*Corp. inscr. Gr.* iii no. 3857 between Aizanoi and Kotiaeion Τρύφων Μενίσκου Διὶ | καὶ τοῖς Βεννείταις). W. M. Ramsay in the *Journ. Hell. Stud.* 1887 viii. 512 f. takes Zeus Βέννιος or Βεννεύς to mean 'he who stands on a Car,' cp. the Gallic (Paul. ex Fest. p. 32, 14 Müller, p. 29, 24 f. Lindsay benna lingua Gallica genus vehiculi appellatur, unde vocantur conbennones in eadem benna sedentes), Messapian (W. Deecke in the *Rhein. Mus.* 1882 xxxvii. 385 f. no. 22), and Thraco-Illyrian word *benna* (Steph. Byz. *s.v.* Βέννα, πόλις Θράκης, κ.τ.λ., *Thes. Ling. Lat.* ii. 1907, 48 ff. Bennius, 69 f. Bennus).

(24) Bithynia (?). J. H. Mordtmann in the *Arch.-ep. Mitth.* 1885 viii. 198 no. 18 publishes a miniature base from the coast of Asia Minor inscribed ἀγαθῇ τύχῃ· | Θεῷ Ὑψίστῳ | Ἀσκληπιόδο|τος Σωσιπά|τρου κατὰ ὄ|ναρ.

(25) Paphlagonia. Inscriptions from the district of Sinope record the cult of the Θεὸς Ὕψιστος (G. Doublet in the *Bull. Corr. Hell.* 1889 xiii. 303 f. no. 7=D. M. Robinson in the *Am. Journ. Arch.* 1905 ix. 306 no. 29 Θεῷ Ὑψίσ[τῳ] | Αἴλιος Θρεπτίων, | Ποντιανός, Σευ|ῆρος, Μάκερ, οἱ | ἀδελφοὶ ('brethren' in a religious sense) εὐξάμενοι) or Θεὸς Μέγας Ὕψιστος (G. Mendel in the *Bull. Corr. Hell.* 1903 xxvii. 333 no. 49=D. M. Robinson *loc. cit.* p. 304 no. 26 with fig. on a marble altar pierced to serve as base for a post at *Emirlè* near *Chalabdé* Θεῷ Μεγάλ[ῳ] | Ὑψίστῳ εὐχῆ[ς] | χά[ριν ἀνέ]θη|κε ....[λ]ος | μετὰ [τῆς γυ]ναι[κ]ὸς Ῥου[φ]ει[νης]).

(26) Pontos. J. G. C. Anderson—F. Cumont—H. Grégoire *Recueil des Inscriptions grecques et latines du Pont et de l'Arménie* (*Studia Pontica* iii) Bruxelles ii no. 284 Sebastopolis (cited by F. Cumont in Pauly—Wissowa *Real-Enc.* ix. 448).

(27) Bosporos Kimmerios. Gorgippia (*Anapa*) (B. Latyschev *Inscriptiones antiquae Orae Septentrionalis Ponti Euxini Graecae et Latinae* Petropoli 1890 ii. 208 ff. no. 400, 1 ff. (manumission of a slave) Θεῶι Ὑψίστωι παντο|κράτορι εὐλογητῷ, βα|σιλεύοντος βασιλέ|ως [Πολέμωνος] φιλο|γερμα[νι]κοῦ καὶ φιλοπάτ|ριδος, ἔτους ηλ' (338 of the Bosporan era =41 A.D.), μη|νὸς Δείου, Πίθος Στ[]ράτ|ωνος ἀνέθηκεν <ἐν> |τῆι [προσ]ευχῆι κατ' εὐχ[ὴ]|ν θρεπτὴν ἑαυτοῦ, ᾗ ὑνο|μα Χρύσα, ἐφ' ᾧ ᾗ ἀνέπα|φος καὶ ἀνεπηρέαστο[ς] | ἀπὸ παντὸς κληρο-

ν[όμ]ου ὑπὸ Δία, Γῆν, Ἥλιο[ν] (cp. *supra* p. 729 n. o), no. 401, 1 ff. = R. Cagnat *Inscriptiones Graecae ad res Romanas pertinentes* Paris 1911 i. 299 no. 911 (manumission of a slave) [Θεῷ Ὑψ]ίσ[τῳ παν][τοκράτ]ορι εὐλο[γη][τ]ῷ· βασιλέωντ[ος] | βασιλέως Τιβερίου Ἰ<ω>ουλίου<λίου> Σαυρομά[του (*sc.* Tib. Iulius Sauromates ii, king of Bosporos in the time of Caracalla) φιλοκαίσαρος καὶ φι[λορωμαίου εὐσεβοῦς | Τειμόθεος Νυμφα[γόρου Μακαρίου σὺν | ἀδελφῇ Ἡλιδος γν[ησιακὸς Ναυοβαλα[μύρου κατὰ εὐχὴν | πατρὸς ἡμῶν Νυμ[φαγόρου Μακαρίου | ἀφείομεν τὴν θρε[τὴν ἡμῶν Δ]ωρέαν | [ἐλευθέραν – – –], B. Φούρτας Ἀγαθοῦ, Ἀγα-θῆμερος Ποπλίου. | ἐν τῷ εκφ' ἔτει (525 of the Bosporan era = 228 A.D.), Γορπιαίου α', no. 454, 1 ff. ἀγαθῇι τύχηι· | Θε[ῷ Ὑψίστ]ῳ ἐπηκόῳ εὐχῆι· ἡ σύνοδος περὶ | ἱερέα Πάπαν Χρήστου καὶ [σ]υναγωγὸν Νυμ[φέρωτα Ὀχωζιάκου κ[α]ὶ φιλάγαθον Θέωνα | Φαζινάμου κ[α]ὶ παραφι[λ]ά(γ)αθον Φαζίναμ[ον Καλλιστί[ω]νος κ[αὶ γ]υμνασιάρχην Μακάρι[ον Μαστοῦ καὶ νεανισκάρχην Ζήθον Ζήθου | κ[α]ὶ οἱ λοιποὶ θι[α]σῶται· κ.τ.λ.

These inscriptions have been studied by L. Stephani, I. V. Pomjalóvskij, V. V. Látyshev, E. Schürer, E. H. Minns, and others. L. Stephani in the *Compte-rendu St. Pét.* 1870—1871 p. 228 ff. argued that the Θεὸς Ὕψιστος, whose emblem was an eagle, must have been the Greek Zeus, but that the regular omission of the name Zeus implies an incipient Christianisation of his cult. I. V. Pomjalóvskij in the *Transactions of the Sixth* (1884) *Archaeological Congress at Odessa* (published in Russian) Odessa 1888 ii. 24 ff. compared the god with Zeus Σωτήρ, Zeus Στράτιος, Zeus Λαβράϋνδος, Zeus Χρυσαορεύς, etc. and saw no reason to regard his epithets Ὕψιστος, Ἐπήκοος as indicative of Christian influence. B. Latyschev *op. cit.* Petropoli 1890 ii 246 f., in view of the dedication Θεῷ Ἐπηκόῳ Ὑψίστῳ by a θίασος Σεβαζιανός (*supra* no. (11)), concluded that here too the god worshipped was *Sabázios*—a possible link between Zeus and the κύριος Σαβαώθ (*supra* i. 234 n. 4, 400 n. 6, 425 n. 2). But E. Schürer 'Die Juden im bosporanischen Reiche und die Genossenschaften der σεβόμενοι θεὸν ὕψιστον ehendaselbst' in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1897 p. 200 ff. (followed *e.g.* by E. H. Minns *Scythians and Greeks* Cambridge 1913 p. 620 ff. and F. Cumont in Pauly—Wissowa *Real-Enc.* ix. 448) has made it clear that the worshippers were Bosporan Jews, who however did not scruple to use the gentile *formula* ὑπὸ Δία, Γῆν, Ἥλιον. Their worship was a compromise between the strictly Semitic and the strictly Hellenic ('weder Judenthum noch Heidenthum, son-

dern eine Neutralisirung beider'). At Tanais, for example, there were several small religious societies (*θίασοι, σύνοδοι*), each comprising some 15 to 40 members (*θιασῶται, θιασῖται, θιασεῖται, συνοδεῖται*). These members were either of recent introduction (*εἰσποιητοὶ ἀδελφοί*) or of senior standing (*πρεσβύτερος*). Their officers in descending order were *ἱερεύς, πατὴρ συνόδου, συναγωγός, φιλάγαθος, παραφιλάγαθος, γυμνασιάρχης, νεανισκάρχης, γραμματεύς* (omissions and transpositions occur). Their aims included the cult of the Θεὸς Ὕψιστος, the education of the young, and (to judge from similar inscriptions at Pantikapaion) the due burial of the brethren.

(28) Kappadokia. An analogous blend of Jewish and Persian beliefs is found in the case of the Ὑψιστάριοι, according to Gregory of Nazianzos, whose own father had belonged originally to this sect (Greg. Naz. *or.* 18. 5 (xxxv. 989 D—992 A Migne) *ἐκεῖνος τοίνυν... ῥίζης ἐγένετο βλάστημα οὐκ ἐπαινετῆς...ἐκ δυοῖν τοῖν ἐναντιωτάτοιν συγκεκραμένης, Ἑλληνικῆς τε πλάνης καὶ νομικῆς τερατείας· ὧν ἀμφοτέρων τὰ μέρη φυγὼν ἐκ μερῶν συνετέθη. τῆς μὲν γὰρ τὰ εἴδωλα καὶ τὰς θυσίας ἀποπεμπόμενος τιμῶσι τὸ πῦρ καὶ τὰ λύχνα· τῆς δὲ τὸ σάββατον αἰδούμενος καὶ τὴν περὶ τὰ βρώματα ἔστιν ἃ μικρολογίαν τὴν περιτομὴν ἀτιμάζουσιν. Ὑψιστάριοι τοῖς ταπεινοῖς ὄνομα, καὶ ὁ Παντοκράτωρ δὴ μόνος αὐτοῖς σεβάσμιος*). Gregory of Nyssa speaks of the same sect as *Ὑψιστιανοί* (Greg. Nyss. *contra Eunomium* 2 (xlv. 481 D—484 A Migne) *ὁ γὰρ ὁμολογῶν τὸν πατέρα πάντοτε καὶ ὡσαύτως ἔχειν, ἕνα καὶ μόνον ὄντα, τὸν τῆς εὐσεβείας κρατύνει λόγον...εἰ δὲ ἄλλον τινὰ παρὰ τὸν πατέρα θεὸν ἀναπλάσσει, Ἰουδαίοις διαλεγέσθω ἢ τοῖς λεγομένοις Ὑψιστιανοῖς· ὧν αὕτη ἐστὶν ἡ πρὸς τοὺς Χριστιανοὺς διαφορά, τὸ θεὸν μὲν αὐτοὺς ὁμολογεῖν εἶναί τινα, δν ὀνομάζουσιν Ὕψιστον ἢ Παντοκράτορα· πατέρα δὲ αὐτὸν εἶναι μὴ παραδέχεσθαι*). See further C. Ullmann *De Hypsistariis, seculi post Christum natum quarti secta, commentatio* Heidelbergae 1823 pp. 1—34, G. Lebas—Waddington *op. cit.* iii no. 2575 on a small bilingual altar from the same site *Διὶ Ὑψίστῳ καὶ* Ἐπηκόῳ *τὸν βωμὸν ἀν*[*έθηκεν*] *εὐχαριστ*[ῶ]‖[*ν ὁ δεῖνα*] | [– – –] = C. J. M. de Vogüé *op. cit.* p. 68 no. 101, who reads *εὐχαρίστ*[*ω*]‖[*ς* – – –] and renders the Palmyrene text 'Que soit béni son nom à toujours : le bon et le miséricordieux !' etc. M. Sobernheim *Palmyrenische Inschriften* (*Mitteilungen der Vorderasiatischen Gesellschaft* 1905 x, 2) Berlin 1905 p. 38 f. no. 31 on a *stèle* built into the western wall of the steps leading up to the roof of the 'Fahnenheiligtum'; the pilasters of the *stèle* have Corinthian capitals adorned with filleted wreath and winged thunderbolt [*Διὶ Ὑψί*]*στ*[*ῳ καὶ*] Ἐ[*πηκόῳ* – – –] | [– – –] *τῶν κα*[*ρ*]*πῶν, οὓς* [*ἐ*]*κ* [*ταύτ*]*ης* · [*τῆς χώρας*] | [– – –] *κατ' ἔτος τ*[*ε ἀ*]*γαθῇ ἡμέρᾳ διὰ π*[*α*]*ντὸς ε*[– – –]

[– – – ἔτους] δου', μηνὶ Ξανδικῷ ϛ (= April 6, 163 A.D.). M. Sobernheim *op. cit.* p. 40 no. 20 on a *cippus* built into the eastern wall of the small court in front of the 'Fahnenheiligtum' Διὶ Ὑψίστῳ καὶ Ἐ[πηκόῳ ὁ δεῖνα] | ὁ καὶ Ἰαριβω[λέης τοῦ δεῖνα]. M. Sobernheim *op. cit.* p. 40 ff. no. 34 pls. 16, 17 on a bilingual *cippus* in the court before the 'Fahnenheiligtum' Διὶ Ὑψίστῳ καὶ Ἐπηκ[όῳ τὸν βωμὸν] | ἀνέθηκεν Ζαβδίβω[λος τοῦ] Ἰαριβωλέους] | τοῦ Λισαμσαίου τοῦ Αἰ[ράνου ὑπὲρ τῆς] | ὑγείας αὐτοῦ καὶ τέκνω[ν καὶ] | ἀδελφῶν, ἔτους δμυ' Ἁ[περβερεταίου] (= October 132 A.D.) followed by a Palmyrene text, which he translates 'Diesen [Altar] brachte dar dem, dessen Namen in Ewigkeit gesegnet sei,' etc. *Corp. inscr. Gr.* iii no. 4500 = Lebas—Waddington *op. cit.* iii no. 2627. Some 3½ hours from Palmyra on the road to Emesa are three large altars of similar size placed close together; that on the east has a relief representing a large thunderbolt and a bilingual inscription; that on the west has a similar relief and inscription, except for a variant in the Palmyrene text; that in the centre is damaged and appears to have a different emblem but the same inscription Διὶ Ὑψίστῳ καὶ Ἐπηκόῳ ἡ πόλις εὐχήν· | ἔτους εκυ', Δύστρου ακ' (= March 21, 114 A.D.), ἐπὶ ἀργυροταμιῶν Ζεβείδου Θαιμοαμέδου καὶ | Μοκίμου Ἰαριβωλέους καὶ Ἰαραίου Νουρβήλου καὶ Ἀνάνιδος Μάλχου = C. J. M. de Vogüé *op. cit.* p. 74 f. no. 124, who renders the Palmyrene text 'La ville (de Thadmor) a élevé (cet autel) à celui dont le nom est béni à toujours,' etc. R. Dussaud *Mission dans les régions désertiques de la Syrie* (extr. from the *Nouvelles Archives des missions scientifiques et littéraires* x) Paris 1903 p. 238 no. 2 a dedication, south of Damaskos, Διὶ Μεγίστῳ Ὑψίστῳ (quoted by F. Cumont in Pauly—Wissowa *Real-Enc.* ix. 445). The Syrian Zeus Ὕψιστος is probably *Ba'al-šamin* (M. Sobernheim *op. cit.* pp. 41, 43, 44 f.; *supra* i. 8, 191 f.).

(30) Phoinike. Sanchouniathon of Berytos (*supra* i. 191) in Philon Bybl. *frag.* 2. 12 f. (*Frag. hist. Gr.* iii. 567 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 14 f. κατὰ τούτους γίνεταί τις Ἐλιοῦν καλούμενος Ὕψιστος καὶ θήλεια λεγομένη Βηρούθ, οἳ καὶ κατῴκουν περὶ Βύβλον. ἐξ ὧν γενῆται Ἐπίγειος ἢ Αὐτόχθων (W. Dindorf reads Ἐπίγειος αὐτόχθων), ὃν ὕστερον ἐκάλεσαν Οὐρανόν· ὡς ἀπ' αὐτοῦ καὶ τὸ ὑπὲρ ἡμᾶς στοιχεῖον δι' ὑπερβολὴν τοῦ κάλλους ὀνομάζειν οὐρανόν. γενῆται δὲ τούτῳ ἀδελφὴ ἐκ τῶν προειρημένων, ἣ καὶ ἐκλήθη Γῆ, καὶ διὰ τὸ κάλλος ἀπ' αὐτῆς, φησίν, ἐκάλεσαν τὴν ὁμώνυμον γῆν. ὁ δὲ τούτων πατὴρ ὁ Ὕψιστος ἐν συμβολῇ θηρίων τελευτήσας ἀφιερώθη, ᾧ χοὰς καὶ θυσίας οἱ παῖδες ἐτέλεσαν. Here Ἐλιοῦν is but the Phoenician for Ὕψιστος, who naturally weds Βηρούθ because he is the solar Ba'al of Berytos (R. Dussaud *Notes de mythologie syrienne* Paris 1905 p. 140 f.). W. W. Baudissin *Adonis und Esmun* Leipzig 1911 p. 76 supposes a blend of Adonis (killed by the boar) with the 'Kronos' of Byblos. Two votive hands of bronze formerly in the collection of M. Péretié at *Beirut* are dedicated to the Θεὸς Ὕψιστος (M. Beaudouin—E. Pottier in the *Bull. Corr. Hell.* 1879 iii. 265 no. 20 [ἡ δεῖνα] | εὐξ[α]μένη ὑπὲρ αὐτῆ[ς] | καὶ Θ[ε]οδώρου ἀνδρὸ[ς] | καὶ τέκνων | Θεῷ Ὑψίστῳ, *ib.* no. 21 Θεῷ Ὑψίστῳ Γηρίων εὐξά[μ]ενος ἀνέθη[κ]εν in dotted letters), as is a third described in the *Catalogue de la Collection Hoffmann*, Bronzes, no. 570 (F. Cumont in R. Dussaud *Notes de mythologie syrienne* p. 122). The god in question is presumably Adad or Ramman, the Zeus or Iupiter of Heliopolis (R. Dussaud *ib.* p. 123 f., F. Cumont in Pauly—Wissowa *Real-Enc.* ix. 445). Possibly some confusion of *Ramman* (*supra* i. 576) with *Rama, Ramath, Ramatha*, 'Height' (Beer in Pauly—Wissowa *Real-Enc.* i A. 132), underlies the glosses in Hesych. ῥαμά· ὑψηλή, ῥαμάς· ὁ ὕψιστος θεός, and the aetiological tale in Steph. Byz. *s.v.* Λαοδίκεια· πόλις τῆς Συρίας, ἡ πρότερον Λευκὴ ἀκτὴ λεγομένη καὶ πρὸ τούτου Ῥάμιθα. κεραυνωθεὶς γάρ τις ἐν αὐτῇ ποιμὴν ἔλεγε ῥαμάνθας, τουτέστιν ἀφ' ὕψους ὁ θεός· ῥάμαν γὰρ τὸ ὕψος, ἄθας δὲ ὁ θεός. οὕτω Φίλων. At *Sahin*, five hours from Antarados (*Tortosa, Tartûs*), is the dedication [Θε]ῷ Ὑψίστῳ Οὐρανίῳ Τ[πάτῳ καὶ Ἡλίῳ Ἀνικήτῳ (?)] | [Μί]θρᾳ ὁ βωμὸς ἐκτισθ[η·····] | [δ]ρθῶς ἐν τῷ κφ' (= 208 A.D.), ἐπ[ικρατείας (?)·····] | [ὑπέ]ρ σωτηρίας Θεο[φ]ρά[στου·····] | ἐπὶ ἀρχῆς Σολωμάνο[υ····] (E. Renan *Mission de Phénicie* Paris 1864 p. 103 f., F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 ii. 92 no. 5).

At *Abédat* above the door of the church of Mar-Eusebios is a block inscribed ἀγαθῇ τύχῃ· | ἔτους ιζ' Καίσαρος Ἀντωνείνου τοῦ κυρίου, | μηνὸς Λώου (= August 154 A.D.), Διὶ Οὐρανίῳ Ὑψίστῳ Σααρναίῳ (a title derived from the ancient name of the village (?)) Ἐπηκόῳ | Γ. Φλάουιος [Γλ]άφυρος ἐκ τῶν ἰδίων τὸν βωμὸν ἀνέθηκα (E. Renan *op. cit.*

p. 234 ff. = R. Cagnat—G. Lafaye *Inscriptiones Graecae ad res Romanas pertinentes* Paris 1906 iii. 406 no. 1060). At Byblos (*Djebeil*), some six hours north of Berytos, is a square statue-base lettered Διὶ Ὑψίστῳ | Πεκουλιάριος [Μάρθας Δ(ημ)η[τρίου (?)]. The upper part of the base shows in relief a bust of the god, facing. He is bearded, and clad in *chitôn* and *himâtion*, with thunderbolt and sceptre to his right and left (R. Dussaud in the *Rev. Arch.* 1896 i. 299 f. with fig. (inadequate), S. Ronzevalle in the *Revue biblique internationale* 1903 xii. 405 ff. with photographic cut). Ronzevalle *loc. cit.* contends 'que l'*Hypsistos* de Byblos n'est autre que l'antique *Moloch-Kronos* de la même ville': cp. W. W. Baudissin *op. cit.* p. 76 n. 4.

(31) Samaria. On Mt Argarizon (Gerizim) near Neapolis (*Nablûs*) was a sanctuary of Zeus Ὕψιστος, to whom Abraham had devoted himself (Marinos in Damask. *v. Isid. ap.* Phot. *bibl.* p. 345 b 18 ff. Bekker ὅτι ὁ διάδοχος Πρόκλου, φησίν, ὁ Μαρῖνος, γένος ἦν ἀπὸ τῆς ἐν Παλαιστίνῃ Νέας πόλεως, πρὸς ὄρει κατῳκισμένης τῷ Ἀργαρίζῳ καλουμένῳ. εἶτα βλασφημῶν ὁ δυσσεβὴς φησιν ὁ συγγραφεύς, ἐν ᾧ Διὸς Ὑψίστου ἁγιώτατον ἱερόν, ᾧ καθιέρωτο Ἄβραμος ὁ τῶν πάλαι Ἑβραίων πρόγονος, ὡς αὐτὸς ἔλεγεν ὁ Μαρῖνος); cp. Deut. 11. 29, 27. 12 with Gen. 12. 6 f.: Jehovah, from the heathen point of view, was 'a god of the hills' (1 Kings 20. 23). Sanballat built a temple on Mt Gerizim (Ioseph. *ant. Iud.* 11. 8. 4), which during the persecutions of Antiochos iv Epiphanes was dedicated to Zeus Ἑλλήνιος (*id. ib.* 12. 5. 5, Zonar. 4. 19 (i. 317 Dindorf)) or Ξένιος (2 Macc. 6. 2, Euseb. *chron. ann. Abr.* 1850 versio Armenia (ii. 126 Schoene) = Hieron. *chron. ann. Abr.* 1849 (ii. 127

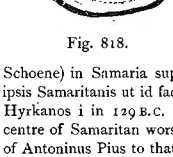

Fig. 818.

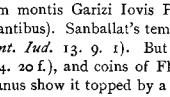

Fig. 819.

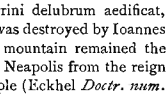

Fig. 820.

Schoene) in Samaria super verticem montis Garizi Iovis Peregrini delubrum aedificat, ipsis Samaritanis ut id faceret praecantibus). Sanballat's temple was destroyed by Ioannes Hyrkanos i in 129 B.C. (Ioseph. *ant. Iud.* 13. 9. 1). But the mountain remained the centre of Samaritan worship (John 4. 20 f.), and coins of Flavia Neapolis from the reign of Antoninus Pius to that of Volusianus show it topped by a temple (Eckhel *Doctr. num. vet.*[2] iii. 433 ff., T. L. Donaldson *Architectura Numismatica* London 1859 p. 116 ff. no. 33, G. F. Hill in the *Brit. Mus. Cat. Coins* Palestine pp. xxviii ff., 48 f. pl. 5, 14—16 Antoninus Pius, 59 pl. 6, 12 Macrinus, 60 f. nos. 94—100 Elagabalos, 63 nos. 112—115 Severus Alexander, no. 116 f. Philippus Senior, 66 f. pl. 7, 5 Philippus Senior and Philippus Iunior, 68 no. 135 Otacilia Severa, 69 pl. 7, 9 Philippus Iunior, 70 f. pl. 7, 13 Trebonianus Gallus, 73 pl. 7, 19 Volusianus; cp. pl. 39, 7 f., 12, pl. 40, 1, *Hunter Cat. Coins* iii. 278 pl. 77, 25 Antoninus Pius, 281 pl. 77, 27 Volusianus, Head *Hist. num.*[2] p. 803. My figs. 818 and 820 are from F. De Saulcy *Numismatique de la terre sainte* Paris 1874 p. 247 f. pl. 13, 1 Antoninus Pius and pl. 14, 2 Volusianus. Fig. 819 is from a specimen struck by Macrinus, in my collection. Mt Gerizim is often supported by an eagle (*e.g. Brit. Mus. Cat. Coins* Palestine pp. 63 no. 116 f. Philippus Senior, 66 f. pl. 7, 5 Philippus Senior and Philippus Iunior, 69 pl. 7, 9 Philippus Iunior, 73 pl. 7, 19 Volusianus) and sometimes flanked by a star (sun ?) on the left and a crescent (moon) on the right (*ib.* p. 71 no. 153 f. Trebonianus Gallus): eagle and heavenly bodies would alike suit the worship of Zeus). Mr G. F. Hill *loc. cit.* p. xxviii f. describes the coin-type as follows: 'It shows two distinct peaks, the steepness of which is certainly exaggerated. On the left-hand peak is the

temple which, since it first appears on coins of Pius, is doubtless the temple of Zeus Hypsistos built by Hadrian [E. N. Adler—M. Séligsohn 'Une nouvelle chronique samaritaine' in the *Revue des études juives* 1902 xlv. 82 'le roi Hadrien vint à Sichem et fit du bien aux Samaritains; il fit construire pour lui un grand temple près du mont Garizim et le nomma Temple de Saphis...Le roi Hadrien prit les battants d'airain qui avaient été mis à la porte du temple de Salomon, fils de David, et les plaça à la porte du temple de Saphis,' *ib.* p. 233 'les battants d'airain que les gens de l'empereur Hadrien avaient enlevés du temple des Juifs à Jérusalem et placés dans le temple construit sur l'ordre d'Hadrien dans l'endroit choisi, le Mont Garizim...les battants d'airain enlevés par Hadrien au temple juif et placés par lui au temple qu'il a construit au pied du Mont Garizim.' Cp. the parallel passages in E. Vilmar *Abulfathi annales Samaritani* Gothæ 1865 and T. G. J. Juynboll *Chronicon Samaritanum, Arabice conscriptum, cui titulus est Liber Josuae* Lugduni Batavorum 1848 cap. 47 p. 188. But the chroniclers' description can hardly refer to a temple on the mountain-*top*. And C. Clermont-Ganneau in the *Journal des Savants* Nouvelle Série 1904 ii. 40 f., in view of the variants *saqaras* lib. Jos., *sapîs*, *sîpas* Abu'l Fath, *sapîs* chron. Adler, concludes that the god established by Hadrian was Iupiter Sarapis. This is certainly better than Iupiter *Sospes* the conjecture of E. N. Adler—M. Séligsohn *loc. cit.* p. 82 n. 2 or *Caesaris* the suggestion of T. G. J. Juynboll *op. cit.* p. 334 f.]. Behind it is a small erection which may be an external altar. On the other (right-hand) peak is a construction which seems again to be rather an altar than a small temple. Since the mountain is doubtless supposed to be seen from the town, i.e. from the north, this smaller peak must lie to the west of the larger. We may perhaps identify it with the spur west of the main summit on which are the ruins known as *Khûrbet Lôzeh* or *Luzah*, where is still the Samaritans' sacrificing place. The 300 steps by which, in the time of the Bordeaux Pilgrim (A.D. 333), one ascended to the summit [*Palestine Pilgrims' Text Society: Itinerary from Bordeaux to Jerusalem* trans. A. Stewart annot. Sir C. W. Wilson London 1887 p. 18], are indicated on the coins, with chapels at intervals, as on many another *sacro monte*; but no trace of them has been recorded as surviving to the present day. Along the foot of the mountain was a long colonnade; an opening gave access to the foot of the stair and to the road, perhaps for wheeled traffic, which wound up the hill between the two peaks, branching about half-way up.' Prokop. *de aed.* 5. 7. 2 states that the Samaritans worshipped the actual mountain-top, but denies that they had ever built a temple on it (*τοῦτο δὲ τὸ ὄρος κατ' ἀρχὰς μὲν οἱ Σαμαρεῖται εἶχον· ὡς εὐξόμενοί τε ἀνέβαινον ἐς τὴν τοῦ ὄρους ὑπερβολήν, οὐδένα ἀνιέντες καιρόν· οὐχ ὅτι νεών τινα ἐνταῦθα ᾠκοδομήσαντο πώποτε, ἀλλὰ τὴν ἀκρώρειαν αὐτὴν σεβόμενοι ἐτεθήπεσαν πάντων μάλιστα*). He goes on to say (*ib.* 5. 7. 7) that Zenon, emperor of the East, expelled the Samaritans from the mountain, handed it over to the Christians, and built on the summit a church dedicated to the Virgin (*τῇ θεοτόκῳ*) with a wall, or rather a fence, about it. The *Chronicon Paschale* 327 B (i. 604 Dindorf) for the year 484 A.D. remarks *ὁ δὲ βασιλεὺς Ζήνων εὐθέως ἐποίησε τὴν συναγωγὴν αὐτῶν τὴν οὖσαν εἰς τὸ καλούμενον Γαργαρίδην εὐκτήριον οἶκον μέγαν τῆς δεσποίνης ἡμῶν τῆς θεοτόκου καὶ ἀειπαρθένου Μαρίας*=Io. Malal. *chron.* 15 p. 382 f. Dindorf. For an account of the ruins still traceable on the mountain see Sir C. W. Wilson 'Ebal and Gerizim, 1866' in *Palestine Exploration Fund: Quarterly Statement for 1873* pp. 66—71 with plan, and for modern celebrations on the site J. A. Montgomery *The Samaritans* Philadelphia 1907 p. 34 ff. with photographic view (*ib.* pp. 322—346 Samaritan bibliography). I. Benzinger in Pauly—Wissowa *Real-Enc.* vii. 767 comments: 'Der Berg verdankt den heiligen Charakter seiner kosmischen Bedeutung: Ebal und G. zusammen sind für Palästina der doppelgipfelige Weltberg, der Gottesberg mit dem Pass dazwischen' —a dogmatic statement of a possible (cp. *supra* p. 422 ff.), but by no means proven, hypothesis.

(32) Ioudaia. The Hebrew Godhead in the later books of the Old Testament, in the Apokrypha, and in the New Testament is often styled (ὁ) Ὕψιστος, sometimes (ὁ) Θεὸς (ὁ) Ὕψιστος or Κύριος (ὁ) Ὕψιστος (details and statistics by E. Schürer in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1897 p. 214 f.). Cp. Philon *in Flaccum* 7 *ὁ τοῦ Ὑψίστου Θεοῦ νεώς*, *leg. ad Gaium* 23 *ἀπαρχὴν τῷ Ὑψίστῳ Θεῷ*, 40 *θυσίας ἐντελεῖς ὁλοκαύτους τῷ Ὑψίστῳ*

Hýpsistos, however, was obviously susceptible of a less material interpretation. Accordingly, in Hellenistic times, the name of Zeus *Hýpsistos* became attached to the supreme deity of more than one non-Hellenic area. In Syria it meant *Ba'al-šamin*. In Samaria it meant Jehovah. Further denationalised, but still recognisable by his eagle (Athens, Thyateira, Mytilene, Tanais), the *Theòs Hýpsistos*—often called *Hýpsistos* and nothing more—was worshipped throughout the Greek-speaking world in early imperial days. The propagation of his cult was due, partly perhaps to a general trend towards monotheism, but mainly to definite Jewish influence. The Jews of the Dispersion, accustomed to use the term *Hýpsistos* of their own august Godhead, carried it with them into Gentile lands, where they formed small and—truth to tell—somewhat accommodating circles of worshippers (Moesia, Bosporos Kimmerios, Kappadokia). Here and there they continued to light their ceremonial lamps (Pisidia, Lydia); but they could hardly be described as whole-hearted devotees of the Mosaic law. Thus

Θεῷ καθ' ἑκάστην ἡμέραν, Ioseph. *ant. Iud.* 16. 6. 2 ἀρχιερέως Θεοῦ Ὑψίστου, Celsus *ap.* Orig. *c. Cels.* 1. 24 μετὰ ταῦτά φησιν ὅτι οἱ αἰπόλοι καὶ ποιμένες ἕνα ἐνόμισαν θεόν, εἴτε Ὕψιστον εἴτ' Ἀδωναΐ εἴτ' Οὐράνιον εἴτε Σαβαώθ, εἴτε καὶ ὅπῃ καὶ ὅπως χαίρουσιν ὀνομάζοντες τόνδε τὸν κόσμον, 5. 41 οὐδὲν οὖν οἶμαι διαφέρειν Δία Ὕψιστον καλεῖν ἢ Ζῆνα ἢ Ἀδωναῖον ἢ Σαβαὼθ ἢ Ἀμοῦν, ὡς Λίγύπτιοι, ἢ Παπαῖον, ὡς Σκύθαι, 45 Κέλσος οἴεται μηδὲν διαφέρειν Δία Ὕψιστον καλεῖν ἢ Ζῆνα ἢ Ἀδωναῖον ἢ Σαβαὼθ ἤ, ὡς Λίγύπτιοι, Ἀμοῦν ἤ, ὡς Σκύθαι, Παπαῖον, Lyd. *de mens.* 4. 53 p. 110, 4 ff. Wünsch καὶ Ἰουλιανὸς δὲ ὁ βασιλεύς, ὅτε πρὸς Πέρσας ἐστρατεύετο, γράφων Ἰουδαίοις οὕτω φησίν· ' ἀνεγείρω γὰρ μετὰ πάσης προθυμίας τὸν ναὸν τοῦ Ὑψίστου Θεοῦ,' A. Dieterich 'Papyrus magica musei Lugdunensis Batavi' in the *Jahrb. f. class. Philol.* Suppl. 1888 xvi. 797 verse 23 ff. κατ' ἐπιταγὴν τοῦ Ὑψίστου Θεοῦ Ἰάω Ἀδωναὶ αβ[λα]ναθαναλβα (cp. A. Audollent *Defixionum tabellae* Luteciae Parisiorum 1904 p. 500 f.), | σὺ εἶ ὁ περιέχων τὰς χάριτας | [ἐ]ν τῇ κορυφῇ λαμπρᾷ, C. Wessely *Griechische Zauberpapyrus von Paris und London* Wien 1888 p. 47 pap. Par. 1068 καλὸν καὶ ἱερὸν φῶς τοῦ Ὑψίστου Θεοῦ, *ib.* p. 104 Brit. Mus. pap. 46. 45 ff. = F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 66 no. 46, 44 ff. καὶ διατήρησόν με καὶ τὸν παῖδα | τοῦτον ἀπημάντους ἐν ὀνόματι | τοῦ Ὑψίστου Θεοῦ, *oracl. Sib.* 2. 245 Geffcken ἥξει καὶ Μωσῆς ὁ μέγας φίλος Ὑψίστοιο. Aisch. *frag.* 464. 12 Nauck² *ap.* Iust. Mart. *de monarch.* 2 δόξα δ' Ὑψίστου Θεοῦ (δ' om. Clem. Al. *strom.* 5. 14 p. 415, 15 Stählin = Euseb. *praep. ev.* 13. 13. 60) is a Jewish forgery.

(33) Aigyptos. The Jews of Athribis (*Bencha*) in Lower Egypt dedicated a house of prayer to the Θεὸς Ὕψιστος (S. Reinach in the *Bull. Corr. Hell.* 1889 xiii. 178 ff. no. 1, cp. *id. Chroniques d'Orient* Paris 1891 p. 579, Dittenberger *Orient. Gr. inscr. sel.* no. 96 ὑπὲρ βασιλέως Πτολεμαίου (*sc.* Ptolemy v Epiphanes (205—181 B.C.) or Ptolemy vi Philometor (181—146 B.C.)) | καὶ βασιλίσσης Κλεοπάτρας | Πτολεμαίδος Ἐπικύδου | ὁ ἐπιστάτης τῶν φυλακιτῶν | καὶ οἱ ἐν Ἀθρίβει Ἰουδαῖοι | τὴν προσευχὴν | Θεῷ Ὑψίστῳ). A woman of Alexandreia invokes his aid (*Bulletin de l'Institut Egyptien* 1872—1873 no. 12 p. 116 f. cited by E. Schürer in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1897 p. 213 and by J. G. C. Anderson—F. Cumont—H. Grégoire *Recueil des Inscriptions grecques et latines du Pont et de l'Arménie* (*Studia Pontica* iii) Bruxelles 1910 i. 17 Θεῷ Ὑψίστῳ καὶ πάντων Ἐπόπτῃ καὶ Ἡλίῳ καὶ Νεμέσεσι αἴρει Ἀρσενόη ἄωρος τὰς χεῖρας· ἢ (= εἰ) τις αὐτῇ φάρμακα ἐποίησε ἢ καὶ ἐπέχαρέ τις αὐτῆς τῷ θανάτῳ ἢ ἐπιχαρεῖ, μετέλθετε αὐτούς. For the raised hands cp. *supra* no. (19) Rheneia).

(34) Africa. At Hadrumetum in Byzacium several curse-tablets invoke the *Deus Pelagicus Aerius Altissimus* Ἰάω (A. Audollent *Defixionum tabellae* Luteciae Parisiorum 1904 p. 403 ff. no. 290 ff., *e.g.* no. 293, B adiuro te demon | quicunque es et de|mando tibi ex hanc | die ex hanc ora ex oc·| momento ut crucie|tur; adiuro te per eum | qui te resolvit ex vite | temporibus deum pela|gicum aerium altissimu[m] | Ιαω οι ου ιαιαα ιωιωε | ο οριυω αηια | Lynceus (*sc.* the name of the horse to be cursed)). *Altissimus* = Ὕψιστος (F. Cumont in Pauly—Wissowa *Real-Enc.* ix. 449).

their *milieu* on occasion provided a congenial soil for the growth of the Christian church. Indeed, it is sometimes difficult to decide whether a given dedication to the *Theòs Hýpsístos* was the work of a Jew or of a Jewish Christian (Phrygia). After all, *Hýpsistos* was a title that any honest man could use with a clear conscience[1].

Zeus appears as a mountain-god in connexion with the following localities:

Lakonike

Mount Taleton, a peak of Mount Taygeton[2].
The *Akrópolis* at Sparta[3].
Cape Malea[4].
Cape Tainaros (?)[5].

Messene

Mount Ithome[6].

[1] For ὕψιστος as applied to Zeus by the Greek poets see Bruchmann *Epith. deor.* p. 142.

[2] A broken *stéle* of white marble, now at Sparta (M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 43 f. no. 222), mentions Zeus Ταλετίτας along with Auxesia and Damoia (J. de Prott *Leges Graecorum sacrae* Lipsiae 1896 Fasti sacri p. 35 f. no. 14, 1 f. = *Inscr. Gr. Arc. Lac. Mess.* i no. 363, 1 f. cited *supra* i. 730 n. 6). The god derived his title from Mt Taleton (*supra* i. 155 f. pl. xiv), on which horses were sacrificed to Helios (Paus. 3. 20. 4 ἄκρα δὲ τοῦ Ταϋγέτου Ταλετὸν ὑπὲρ Βρυσεῶν ἀνέχει. ταύτην Ἡλίου καλοῦσιν ἱεράν, καὶ ἄλλα τε αὐτόθι Ἡλίῳ θύουσι καὶ ἵππους· τὸ δὲ αὐτὸ καὶ Πέρσας οἶδα θύειν νομίζοντας. *Supra* i. 180 n. 5): cp. the Cretan sun-god Talos (*supra* i. 719 ff.). The goddesses, Peloponnesian equivalents of Demeter and Kore, were worshipped at the foot of the mountain in Bryseai (*Kalybia Sochiotika*), where traces of an Eleusinion have come to light (H. von Prott in the *Ath. Mitth.* 1904 xxix. 8. *Id. ib.* p. 7 holds that Taleton was not the very summit of Taygeton, but a lower and more accessible crest).

[3] Zeus Ὕπατος (*supra* p. 875 n. 1 no. (4)).

[4] Zeus Μαλειαῖος (Steph. Byz. *s.v.* Μαλέα· ... καὶ ἀπὸ τοῦ Μάλεια Μαλειαῖος Ζεύς).

[5] Tainaros, who founded the Taenarian temple of Poseidon, was the son of Zeus (Steph. Byz. *s.v.* Ταίναρος). *Supra* i. 156.

[6] Zeus Ἰθωμάτας had a cult, but no actual temple (D. Fimmen in Pauly—Wissowa *Real-Enc.* ix. 2306 quoting Oikonomakis Τὰ σωζόμενα Ἰθώμης, Μεσσήνης 1879 p. 14 f.), on the top of Mt Ithome, where he had been brought up by the nymphs Ithome and Neda (Thouk. 1. 103, Paus. 4. 3. 9, 4. 12. 7 ff., 4. 27. 6, 4. 33. 1 f.). Water was carried daily from the spring Klepsydra to his sanctuary (Paus. 4. 33. 1). The statue of him made by Hageladas for the Messenians of Naupaktos was kept in the house of a priest annually chosen (Paus. 4. 33. 2 cited *supra* p. 741 n. 4): its type is reflected on coins of Messene (*supra* p. 741 f. figs. 673, 674). At Messene (M. N. Tod in the *Journ. Hell. Stud.* 1905 xxv. 53 f. no. 11, 1 f. = *Inscr. Gr. Arc. Lac. Mess.* i no. 1399, 1 ff. τειχιόεσ|σα παρ' ἀγλαὸν | ἱρὸν Ἰθώμης Μεσ|σήνη) in *s.* i—ii A.D. the priest of Zeus Ἰθωμάτας was eponymous magistrate (*Inscr. Gr. Arc. Lac. Mess.* i no. 1468, 4 ff. ἐπὶ ἱερέος τοῦ | Διὸς τοῦ Ἰθω|μάτου Ἀπελ|λίωνος τοῦ Φι|λίπου, cp. *ib.* no. 1467, 1 and no. 1469, 1). The yearly festival (*ib.* nos. 1467—1469 record as its officials ἀγωνοθέτης, ἱεροθύται, γραμματεύς, χαλειδοφόρος (= ἀκρατοφόρος, cp. χάλις, 'pure wine')) was called Ἰθωμαῖα (Paus. 4. 33. 2), Ἰθωμαία or Ἰθωμαῖς (Steph. Byz. *s.v.* Ἰθώμη· ... καὶ Ζεὺς Ἰθωμάτας, καὶ ἑορτὴ Ἰθωμαία καὶ Ἰθωμαῖς). It dates back to the time of Eumelos (*s.* viii B.C.), and originally involved a musical competition (Paus. 4. 33. 2 ἄγουσι δὲ καὶ ἑορτὴν ἐπέτειον Ἰθωμαῖα· τὸ δὲ ἀρχαῖον καὶ ἀγῶνα ἐτίθεσαν μουσικῆς. τεκμαίρεσθαι δ' ἔστιν ἄλλοις τε καὶ Εὐμήλου τοῖς ἔπεσιν· ἐποίησε γοῦν καὶ τάδε ἐν τῷ προσοδίῳ τῷ ἐς Δῆλον (Eumel. *frag.* 13 Kinkel, cp. Paus. 4. 4. 1, 5. 19. 10)· 'τῷ γὰρ Ἰθωμάτᾳ καταθύμιος ἔπλετο Μοῖσα | ἀ καθαρὰ <ν κίθαριν (ins. T. Bergk; but see H. W. Smyth *ad loc.*) > καὶ ἐλεύθερα σάμβαλ' ἔχοισα.' οὐκοῦν ποιῆσαί μοι δοκεῖ τὰ ἔπη καὶ μουσικῆς ἀγῶνα ἐπιστάμενος τιθέντας). A tradition of human sacrifice (Nilsson *Gr. Feste* p. 32) attached

Elis

Mount Olympos[1].

Olympia[2].

Arkadia

Mount Lykaion[3].

to Mt Ithome, as to Mt Lykaion (*supra* i. 70 ff.); for Aristomenes is said to have slain 300 persons, including Theopompos king of Sparta, as an offering to Zeus Ἰθωμάτας (Clem. Al. *protr.* 3. 42. 2 p. 31, 23 ff. Stählin (=Euseb. *praep. ev.* 4. 16. 12) Ἀριστομένης γοῦν ὁ Μεσσήνιος τῷ Ἰθωμήτῃ Διὶ τριακοσίους ἀπέσφαξεν, τοσαύτας ὁμοῦ καὶ τοιαύτας καλλιερεῖν οἰόμενος ἑκατόμβας· ἐν οἷς καὶ Θεόπομπος ἦν < ὁ (Euseb.) > Λακεδαιμονίων βασιλεύς, ἱερεῖον εὐγενές, Kyrill. Al. *c. Iul.* 4 (lxxvi. 696 D—697 A Migne) Ἀριστομένης μὲν γὰρ ὁ Μεσήνιος τῷ ἐπίκλην Ἰθωμήτῃ Διὶ τριακοσίους ὁμοῦ νεκροὺς ἐχαρίζετο· προσετίθει δὲ τούτοις καὶ τῶν Λακεδαιμονίων βασιλεύσαντα· Θεόπομπος οὗτος ἦν. ἀξιάγαστος ἐντεῦθεν ὁ τῶν θεῶν ὕπατός τε καὶ ὑπέρτατος. ἐπεμειδία γὰρ κατὰ τὸ εἰωθὸς ἀνδράσιν ἀθλίως διολωλόσι, καὶ πλήρη βλέπων τὸν ἐκείνων βωμὸν δαιτὸς ἔδεσης. ἐντρυφᾶν γὰρ ἔθος αὐτοῖς τῶν ἀνθρώπων συμφοραῖς). Philippos v of Makedonia (in 214 B.C.?) sacrificed to Zeus on Mt Ithome, took the entrails of the ox in both hands, and showed them to Aratos of Sikyon and Demetrios of Pharos, asking each for his interpretation of the omens (Plout. *v. Arat.* 50). The latest notice of Zeus Ἰθωμάτας is in Schöll—Studemund *anecd.* i. 265 Ἐπίθετα Διός (51) ἰθωμήτου, 266 Ἐπίθετα Διός (43) ἰθωμήτου. Nowadays on the highest peak of Ithome the traveller sees a ruined monastery, a branch from that at *Vourkano*: its paved threshing-floor is the scene of the annual festival of the Panagia [Aug. 15], at which the peasants dance crowned with oleander-blossom (Frazer *Pausanias* iii. 437). Among the ruins lives a solitary monk (D. Fimmen *loc. cit.* p. 2307).

Wide *Lakon. Kulte* p. 22 infers a tree-cult of Zeus Ἰθωμάτας at Leuktron or Leuktra (*Leftro*) in Lakonike from Paus. 3. 26. 6 ὃ δὲ οἶδα ἐν τῇ πρὸς θαλάσσῃ χώρᾳ τῆς Λευκτρικῆς ἐπ' ἐμοῦ συμβάν, γράψω. ἄνεμος πῦρ ἐς ὕλην ἐνεγκὼν τὰ πολλὰ ἠφάνισε τῶν δένδρων· ὡς δὲ ἀνεφάνη τὸ χωρίον ψιλόν, ἄγαλμα ἐνταῦθα ἱδρυμένον εὑρέθη Διὸς Ἰθωμάτα. τοῦτο οἱ Μεσσήνιοί φασι μαρτύριον εἶναί σφισι τὰ Λεῦκτρα τὸ ἀρχαῖον τῆς Μεσσηνίας εἶναι. δύναιτο δ' ἂν καὶ Λακεδαιμονίων τὰ Λεῦκτρα ἐξ ἀρχῆς οἰκούντων ὁ Ἰθωμάτας Ζεὺς παρ' αὐτοῖς ἔχειν τιμάς. He justly cp. the figure of Dionysos found in a plane-tree broken by the wind at Magnesia ad Maeandrum (A. E. Kontoleon in the *Ath. Mitth.* 1890 xv. 330 ff. no. 1 = Michel *Recueil d'Inscr. gr.* no. 856). We might also cite in this connexion a modern parallel from Ithome itself. Miss M. Hamilton (Mrs G. Dickins) *Greek Saints and Their Festivals* Edinburgh and London 1910 p. 170 f. writes: 'According to the popular legend, the monks of the monastery of St. Basil on Mount Eva, opposite Ithome, saw one night a flaming tree on the opposite ridge. They crossed the valley and found this ikon of the Panagia on a tree, with a lighted candle beside it. They conveyed it across to their monastery, but it transferred itself miraculously back to the place at which it was found, and the monks believed themselves forced to change to the other ridge. Since then the monastery of St. Basil has been deserted. The trunk of the tree was made into the lintel of the monastery door, and it is said that at the festival it is hacked by the faithful, who take pieces of it as a cure for fever. The ikon is inscribed with reference to the legend—The Guide to the Hill of Ithome—Ὁδηγήτρια τῷ ὄρει Ἰθωμάτει. In celebration of the festival this ikon makes a short tour of the country. On 12th August it goes up from Voulkano to its old home with pomp and ceremony, accompanied by the monks and its worshippers, a goodly company, comprising a large number of babies brought to be baptised on the top of Ithome ... On the 15th a solemn procession reconducts the ikon to the lower monastery, and nine days later it is taken to Nisi, near Kalamata, where a fair ends the celebrations of the district. The rest of the year the ikon remains at Voulkano.'

Mount Apesas[4].

Argolis
The Larisa at Argos[5].

[1] The high place on which stood most of the altars of the Tegeates was called after Zeus Κλάριος (Paus. 8. 53. 9 f. cited *supra* p. 874 n. 2). Sir J. G. Frazer and H. Hitzig—H. Blümner *ad loc.* identify this eminence with the hill of St Sostis. See further *supra* p. 807 n. 2.

[2] Zeus Ἀκραῖος (*supra* p. 871 n. 0 no. (3)).

[3] Zeus Ὕψιστος (*supra* p. 878 n. 0 no. (3)).

[4] Apesas (*Phouka*) is a mountain which rises north of Nemea to a height of 873^{m}. It figured in two distinct myths. On the one hand, Perseus here sacrificed for the first time to Zeus Ἀπεσάντιος (Paus. 2. 15. 3 *καὶ ὄρος* Ἀπέσας *ἐστὶν ὑπὲρ τὴν Νεμέαν, ἔνθα Περσέα πρῶτον Διὶ θῦσαι λέγουσιν* Ἀπεσαντίῳ, cp. Stat. *Theb.* 3. 460 ff., 633 ff.), also known as Zeus Ἀπέσας (Steph. Byz. *s.v.* Ἀπέσας· *ὄρος τῆς Νεμέας, ὡς Πίνδαρος* (*frag.* 295 Bergk[4]) *καὶ Καλλίμαχος ἐν τρίτῃ* (*frag.* 29 Schneider), *ἀπὸ* Ἀφέσαντος (*sic*) *ἥρωος βασιλεύσαντος τῆς χώρας, ἢ διὰ τὴν ἄφεσιν τῶν ἁρμάτων ἢ τοῦ λέοντος· ἐκεῖ γὰρ ἐκ τῆς σελήνης ἀφείθη. ἀφ' οὗ Ζεὺς* Ἀπεσάντιος. Καλλίμαχος *δὲ ἐν τοῖς ἰάμβοις* (*frag.* 82 Schneider) *τὸ ἐθνικὸν* Ἀπέσας *φησί* 'κοὐχ ὧδ' Ἀρείων *τῷ* Ἀπέσαντι *πὰρ Διὶ | ἔθυσεν* Ἀρκὰς Ἵππος'). On the other hand, Deukalion on escaping from the deluge here built an altar of Zeus Ἀφέσιος (*et. mag.* p. 176, 33 ff. Ἀφέσιος Ζεὺς *ἐν* Ἄργει *τιμᾶται. εἴρηται δὲ ὅτι Δευκαλίων τοῦ κατακλυσμοῦ γενομένου διαφυγὼν καὶ εἰς τὴν ἄκραν τὴν* Ἄργου (so H. Usener for Ἀργοῦς) *διασωθεὶς ἱδρύσατο βωμὸν* Ἀφεσίου Διός, *ὅτι ἀφείθη ἐκ τοῦ κατακλυσμοῦ. ἡ δὲ ἄκρα ὕστερον Νεμέα ἐκλήθη ἀπὸ τῶν* (τοῦ add. cod. V) Ἄργου *βοσκημάτων ἐκεῖ νεμομένων. οὕτως* Ἀρτεμιδώρου *ἐτυμολογεῖ ἐν τῷ β' τῶν Βιθυνιακῶν* (Arrian. *frag.* 26 (*Frag. hist. Gr.* iii. 591 Müller))). H. Usener *Die Sintfluthsagen* Bonn 1899 pp. 65 ff., 233 (cp. *id.* in the *Rhein. Mus.* 1901 lvi. 482 ff. = *Kleine Schriften* Leipzig—Berlin 1913 iv. 383 ff.) contends that Δευκαλίων presupposes a simpler form *Δεύ-καλος (whence Δευκαλίδαι), 'kleiner Zeus,' 'Zeusknäblein.' Other views are collected by K. Tümpel in Pauly—Wissowa *Real-Enc.* v. 275 f. and Gruppe *Gr. Myth. Rel.* pp. 446 n. 7, 718 e, 1100 n. 1, 1608 n. 3, *id. Myth. Lit.* 1908 p. 456. Imperial coppers of Kleonai represent Mt Apesas as a rock surmounted by an altar with an eagle perched upon it (Rasche *Lex. Num.* Suppl. i. 1836 Septimius Severus, *Brit. Mus. Cat. Coins* Peloponnesus p. 155 pl. 29, 8 = Anson *Num. Gr.* v. 9 no. 57 pl. 2 Iulia Domna, *Hunter Cat. Coins* ii. 154 no. 1 Geta, Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* i. 33 f. Septimius Severus, Iulia Domna, Geta). Traces of the altar of Zeus are still to be seen on the flat rocky summit (É. Puillon Boblaye *Recherches Géographiques sur les ruines de la Morée* Paris 1836 ii. 41 'M. Peytier y a vu quelques ruines qui doivent avoir appartenu à l'autel de Jupiter Apésantius,' E. Curtius *Peloponnesos* Gotha 1852 ii. 505 'der Apesas, auf dem sich bei einer verfallenen Kapelle Paläá Ekklesía genannt, noch Ruinen vom Heiligthume des Zeus Apesantios finden').

[5] Zeus Λαρισαῖος had a roofless *naós* with a wooden statue on the top of the Larisa at Argos (Paus. 2. 24. 3 *ἐπ' ἄκρᾳ δέ ἐστι τῇ Λαρίσῃ Διὸς ἐπίκλησιν Λαρισαίου ναός, οὐκ ἔχων ὄροφον· τὸ δὲ ἄγαλμα ξύλου πεποιημένον οὐκέτι ἐστηκὸς ἦν ἐπὶ τῷ βάθρῳ*). Near it was a *naós* of Athena containing a three-eyed *xóanon* of Zeus, said to have been the paternal god of Priamos (Paus. 2. 24. 3 f. continues *καὶ* Ἀθηνᾶς *δὲ ναός ἐστι θέας ἄξιος· ἐνταῦθα ἀναθήματα κεῖται καὶ ἄλλα καὶ Διὸς ξόανον, δύο μὲν ἢ πεφύκαμεν ἔχον ὀφθαλμούς, τρίτον δὲ ἐπὶ τοῦ μετώπου. τοῦτον τὸν Δία Πριάμῳ φασὶν εἶναι τῷ Λαομέδοντος πατρῷον, ἐν ὑπαίθρῳ τῆς αὐλῆς ἱδρυμένον, καὶ ὅτε ἠλίσκετο ὑπὸ Ἑλλήνων Ἴλιον, ἐπὶ τούτου κατέφυγεν ὁ Πρίαμος τὸν βωμόν. ἐπεὶ δὲ τὰ λάφυρα ἐνέμοντο λαμβάνει Σθένελος ὁ Καπανέως αὐτόν, καὶ ἀνάκειται*

Phalakron (?)[1].
Mount Kokkygion[2].

μὲν διὰ τοῦτο ἐνταῦθα· τρεῖς δὲ ὀφθαλμοὺς ἔχειν ἐπὶ τῷδε ἄν τις τεκμαίροιτο αὐτόν. Δία γὰρ ἐν οὐρανῷ βασιλεύειν, οὗτος μὲν λόγος κοινὸς πάντων ἐστὶν ἀνθρώπων. ὃν δὲ ἄρχειν φασὶν ὑπὸ γῆς, ἔστιν ἔπος τῶν Ὁμήρου (Il. 9. 457) Δία ὀνομάζον καὶ τοῦτον· 'Ζεύς τε καταχθόνιος καὶ ἐπαινὴ Περσεφόνεια.' Αἰσχύλος δὲ ὁ Εὐφορίωνος (frag. 436 b Dindorf, who cp. Prokl. in Plat. Crat. 148 p. 83, 28 f. Pasquali ὁ δὲ δεύτερος δυαδικῶς καλεῖται Ζεὺς ἐνάλιος καὶ Ποσειδῶν) καλεῖ Δία καὶ τὸν ἐν θαλάσσῃ. τρισὶν οὖν ὁρῶντα ἐποίησεν ὀφθαλμοῖς ὅστις δὴ ἦν ὁ ποιήσας, ἅτε ἐν ταῖς τρισὶ ταῖς λεγομέναις λήξεσιν ἄρχοντα τὸν αὐτὸν τοῦτον θεόν. This remarkable figure is mentioned also in schol. Eur. *Tro.* 16 *τὸν δὲ ἔρκειον Δία ἄλλοι ἱστορικοὶ ἀναγράφουσιν ἰδίαν τινὰ σχέσιν περὶ αὐτοῦ ἱστοροῦντες, τρισὶν ὀφθαλμοῖς αὐτὸν κεχρῆσθαί φασιν, ὡς οἱ περὶ Ἀγίαν (frag. 3 (Frag. hist. Gr. iv. 292 f. Müller)) καὶ Δερκύλον (frag. 1 (Frag. hist. Gr. iv. 386 Müller)).* I formerly accepted Pausanias' explanation of the three eyes (*Class. Rev.* 1903 xvii. 174 f., 1904 xviii. 75 f., 325), but later came to the conclusion that it was merely a sophisticated attempt to account for a very primitive feature, plurality of eyes implying superhuman powers of sight and three being a typical plurality (*Folk-Lore* 1904 xv. 282 ff., 1905 xvi. 275 f.). Excavations in the large court of the Venetian castle on the Larisa have brought to light the tufa foundations (11·70^{m} broad) of a building orientated towards the east. On the rock were sherds of geometric ware, and 14^{m} east of the building was a fifth-century inscription mentioning the Θαλεῖς (W. Vollgraff in the *Bull. Corr. Hell.* 1904 xxviii. 429 no. 11). On the lower terrace of the Larisa, to the east, are the ruined foundations of a second building. These two may well be the temples of Zeus Λαρισαῖος and of Athena respectively (*id. ib.* 1907 xxxi. 149). Steph. Byz. *s.v. Λάρισσα·...καὶ ἡ ἀκρόπολις τοῦ Ἄργους Λάρισσα. καὶ ὁ πολίτης Λαρισσαῖος καὶ Λαρισσεὺς Ζεύς.*

[1] Zeus Φαλακρός (*supra* p. 875 n. 2).

[2] There was a sanctuary of Zeus on the top of Mt Kokkygion (Paus. 2. 36. 2 *ἱερὰ δὲ καὶ ἐς τόδε ἐπὶ ἄκρων τῶν ὀρῶν, ἐπὶ μὲν τῷ Κοκκυγίῳ Διός, ἐν δὲ τῷ Πρωνί ἐστιν Ἥρας*), where Zeus had become a cuckoo in order to woo Hera (schol. vet. Theokr. 15. 64 *Ἀριστοτέλης δὲ ἐν τῷ περὶ τῶν Ἑρμιόνης ἱερῶν (frag. 287 (Frag. hist. Gr. ii. 190 f. Müller) = Aristokles frag. (id. iv. 330 f. Müller)*: but Grashof's cj. *Ἀριστοκλῆς* (cp. Ail. *de nat. an.* 11. 4) for *Ἀριστοτέλης* codd. is far from certain) *ἰδιωτέρως ἱστορεῖ περὶ τοῦ Διὸς καὶ [τοῦ τῆς* (om. Wilamowitz)*] Ἥρας γάμου. τὸν γὰρ Δία μυθολογεῖται ἐπιβουλεύειν τῇ Ἥρᾳ μιγῆναι, ὅτε αὐτὴν ἴδοι χωρισθεῖσαν ἀπὸ τῶν ἄλλων θεῶν. βουλόμενος δὲ ἀφανὴς γενέσθαι καὶ μὴ ὀφθῆναι ὑπ' αὐτῆς τὴν ὄψιν μεταβάλλει εἰς κόκκυγα καὶ καθέζεται εἰς ὄρος, ὃ πρῶτον μὲν Θρήνακ* (Hemsterhuys cj. *Θόρνακ* (cp. Paus. 2. 36. 1)) *ἐκαλεῖτο, νῦν δὲ Κόκκυξ. τὸν δὲ Δία χειμῶνα δεινὸν ποιῆσαι τῇ ἡμέρᾳ ἐκείνῃ· τὴν δὲ Ἥραν πορευομένην μόνην ἀφικέσθαι πρὸς τὸ ὄρος καὶ καθέζεσθαι εἰς αὐτό, ὅπου νῦν ἐστιν ἱερὸν Ἥρας Τελείας. τὸν δὲ κόκκυγα ἰδόντα καταπεπασθῆναι καὶ καθεσθῆναι ἐπὶ τὰ γόνατα αὐτῆς πεφρικότα καὶ ῥιγῶντα ὑπὸ τοῦ χειμῶνος. τὴν δὲ Ἥραν ἰδοῦσαν αὐτὸν οἰκτεῖραι καὶ περιβαλεῖν τῇ ἀμπεχόνῃ. τὸν δὲ Δία εὐθέως μεταβαλεῖν τὴν ὄψιν καὶ ἐπιλαβέσθαι τῆς Ἥρας. τῆς δὲ τὴν μίξιν παραιτουμένης διὰ τὴν μητέρα, αὐτὸν ὑποσχέσθαι γυναῖκα αὐτὴν ποιήσασθαι. καὶ παρ' Ἀργείοις δέ, οἱ μέγιστα (οἱ μέγιστοι* codd. Hemsterhuys cj. *οἳ μέγιστον* vel *μάλιστα*. Ahrens cj. *οἳ μέγιστα*) *τῶν Ἑλλήνων τιμῶσι τὴν θεόν, τὸ [δὲ* (om. Hemsterhuys)*] ἄγαλμα τῆς Ἥρας ἐν τῷ ναῷ καθήμενον ἐν [τῷ* (om. Wendel)*] θρόνῳ τῇ χειρὶ ἔχει σκῆπτρον, καὶ ἐπ' αὐτῷ τῷ σκήπτρῳ κόκκυξ* = Eudok. *viol.* 414^{h}, cp. Paus. 2. 17. 4, 2. 36. 1). For the chryselephantine statue by Polykleitos see Overbeck *Schriftquellen* p. 166 f. nos. 932—939, *id. Gr. Plastik*[4] i. 509—511, Collignon *Hist. de la Sculpt. gr.* i. 509—512, 516, C. Waldstein (Sir C. Walston) 'The Argive Hera of Polycleitus' in the *Journ. Hell. Stud.* 1901 xxi. 30—44 with pls. 2, 3, A. B. Cook '*Nephelokokkygia*' in *Essays and Studies presented to William Ridgeway* Cambridge 1913 pp. 213—221 with pl. Cp. *supra* i. 532. The old name of the mountain, *Θόρναξ* or *Θρόναξ*, is said to have meant 'foot-stool' (Hesych. *s.v. θόρναξ*) and perhaps implies an ancient throne-cult (*supra* i. 134 f.). On Mt Thornax in Lakonike was a statue of Apollon Θορνάκιος (Hesych. *s.v. θόρναξ*, cp. Stcph. Byz. *s.v. Θόρναξ*) or Πυθαεύς resembling that at

Mount Arachnaion[1].
Epidauros[2].

Aigina
The mountain of Zeus *Panhellénios*[3].

Amyklai (Hdt. 1. 69, Paus. 3. 10. 8), *i.e.* standing on a throne (Frazer *Pausanias* iii. 351 ff.). The hero Bouphagos shot by Artemis on Mt Pholoe was the son of Iapetos and Thornax (Paus. 8. 27. 17).

[1] Mt Arachnaion above Lessa had altars of Zeus and Hera, on which sacrifices were offered when there was a dearth of rain (Paus. 2. 25. 10 cited *supra* p. 467 n. 2). Frazer *Pausanias* iii. 233 f. says: 'This is the high, naked range on the left or northern side of the road as you go to the Epidaurian sanctuary from Argos. The most remarkable peak is Mt. *Arna*, the pointed rocky summit which rises immediately above the village of *Ligourio*. It is 3540 feet high. The western summit, Mt. *St. Elias*, is a little higher (3930 ft.)... The name Arachnaea is said to have been still used by the peasantry in the early part of this century. The altars of Zeus and Hera...appear to have stood in the hollow between the peaks of *Arna* and *St. Elias*, for there is here a square enclosure of Cyclopean masonry which would appear to have been an ancient place of worship.'

[2] Zeus Κάσιος (P. Kabbadias in the 'Εφ. 'Αρχ. 1883 p. 87 no. 22 = W. Prellwitz in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 150 no. 3330 = *Inscr. Gr. Pelop.* i no. 1287 a rectangular base of limestone inscribed Διὶ Κασίωι | 'Ελλανοκράτης | 'Ηρακλείδου with the numeral λα' and the symbol , on which see *infra* Append. L *init.*). M. Fränkel in the *Inscr. Gr. Pelop.* i. 286 observes: 'Iuppiter Casius notus erat in Graecia, postquam Traianus spolia e victoria contra Getas reportata in eius templum in Cario (*sic*) monte ad Euphratem situm dedicavit [*infra* Append. B Syria]... Hadriani fere aetate collocatus fuerit lapis noster.'

[3] The highest peak in Aigina (531^{m}), a landmark for many miles around, is known nowadays as the *Oros*, sometimes also as *Hagios Elias* from the little chapel that crowns its summit. A. Furtwängler *Aegina* München 1906 i. 473 f. reports that excavations carried out in the spring of 1905 discovered an ancient settlement on the mountain-top. The site yielded a quantity of local ware, not unlike that from Troy, and also imported vases of late Mycenaean make. The inhabitants appear to have been Myrmidones, a division of the Thessalian Hellenes (C. Mueller *Aegineticorum liber* Berolini 1817 p. 14 ff.), whose heroes were Aiakos and the Aiakidai. They brought with them the cult of their Zeus 'Ελλάνιος, and Pindar represents the sons of Aiakos, when they prayed for the welfare of Aigina, as standing πὰρ βωμὸν πατέρος 'Ελλανίου (*Nem.* 5. 19). Zeus being a weather-god (*supra* p. 1 ff.), his mountain served as a public barometer (Theophr. *de signis tempest.* 1. 24 καὶ ἐὰν ἐν Αἰγίνῃ [καὶ (om. J. G. Schneider)] ἐπὶ τοῦ Διὸς τοῦ 'Ελλανίου νεφέλη καθίζηται, ὡς τὰ πολλὰ ὕδωρ γίνεται). Tradition said that during a great drought the foremost Hellenes besought Aiakos, as son of Zeus by Aigina daughter of Asopos, to intercede with his father on behalf of all, that Aiakos did so with success, and that on the spot where he had prayed the whole people raised a common sanctuary (Isokr. 9 *Euagoras* 14 f., Diod. 4. 61, Apollod. 3. 12. 6, Clem. Al. *strom.* 6. 3 p. 444, 13 ff. Stählin, schol. Pind. *Nem.* 5. 17, Eudok. *viol.* 13). Accordingly this came to be called the sanctuary of Zeus Πανελλήνιος (Paus. 1. 44. 9 cited *infra* p. 895 n. 1, 2. 29. 7 f., 2. 30. 3 f.). Frazer *Pausanias* iii. 265 describes the site: 'On the northern slope of Mt. *Oros*..., in a wild and lonely valley, there is a terrace supported upon walls of great blocks of trachyte. On this terrace there is a ruined chapel of the Hagios Asomatos (the Archangel Michael), which is entirely built of fine pieces of ancient architecture. About the middle of the terrace there are a number of large flat stones laid at equal intervals, as if they had been the bases of columns.' In the ruins of St Michael's chapel was found a stone block bearing an

Megaris

A height near Megara[1].

archaic Greek inscription (Roehl *Inscr. Gr. ant.* no. 352, Roberts *Gk. Epigr.* i. 146 f. no. 120, F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 195 no. 3408, *Inscr. Gr. Pelop.* i no. 6 Κωλιάδαις Ἀβλίων ἐποίησε Ἀντίλλου), perhaps the base of some offering to Zeus, whose cult was in time superseded by that of the Archangel (cp. G. F. Hill 'Apollo and St. Michael: some analogies' in the *Journ. Hell. Stud.* 1916 xxxvi. 134 ff., especially p. 145). It was however reserved for Furtwängler by the latest excavations of 1905 to produce definite epigraphic evidence that the terrace of Hagios Asomatos was indeed the sanctuary of Zeus Πανελλήνιος (A. Furtwängler *op. cit.* i. 5 f. with the excellent map by H. Thiersch appended to the volume). For Zeus Ἑλλήνιος in the wider sense of the 'Hellenic,' *i.e.* national as opposed to foreign, god see O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 176.

[1] Paus. i. 44. 9 ἐπὶ δὲ τοῦ ὄρους τῇ ἄκρᾳ (above the Scironian Rocks) Διός ἐστιν Ἀφεσίου καλουμένου ναός· φασὶ δὲ ἐπὶ τοῦ (H. Hitzig cj. ἐπί του) συμβάντος ποτὲ τοῖς Ἕλλησιν αὐχμοῦ θύσαντος Αἰακοῦ κατά τι δὴ λόγιον τῷ Πανελληνίῳ Διὶ ἐν Αἰγίνῃ †κομίσαντα δὲ ἀφεῖναι καὶ διὰ τοῦτο Ἀφέσιον καλεῖσθαι τὸν Δία. Many attempts have been made to mend this broken passage. T. Panofka *Der Tod des Skiron und des Patroclus* Berlin 1836 pp. 4, 17 would read κομίσαντα δὲ <ἄετον (*sic*) τὴν χελώνην> ἀφεῖναι on the strength of an engraved chalcedony at Berlin (Furtwängler *Geschnitt. Steine Berlin* p. 121 f. no. 2614 pl. 23, T. Panofka *op. cit.* p. 23 pl. 4, 7, E. Braun in the *Ann. d. Inst.* 1836 viii. 317 f., Overbeck *Gr. Kunstmyth.* Zeus p. 267 Gemmentaf. 3, 10=my fig. 821), which represents Zeus with a sceptre in his left hand, a tortoise in his right, and an eagle at his feet. This is ingenious; for ἠφίει... ἀφεθέντα... used in Paus. i. 44. 8 of Skiron and his tortoise prepare us for a second tortoise-story in explanation of the title Ἀφέσιος: but, as Frazer *Pausanias* i. 567 f. points out, the sentence remains ungrammatical. C. L. Kayser in the *Zeitschrift für die Alterthumswissenschaft* 1848 vi. 503 cj. ἐν Αἰγίνῃ <καὶ εὐξαμένου ὕδωρ ἀφεῖναι ἐς τὴν Ἑλλάδα γῆν ὑπα> κούσαντά τε ἀφεῖναι. H. G. Lolling in the Ἐφ. Ἀρχ. 1887 p. 214 proposed ἐν Αἰγίνῃ <ἀετὸν ἁρπάσαι τὸ ἱερεῖον εἰς δὲ τὴν ἄκραν> κομίσαντα ἀφεῖναι, cp. schol. Aristoph. *nub.* 52. L. C. Valckenaer (see H. Hitzig in the *Jahrb. f. class. Philol.* 1889 xxxv. 819) had suggested κομίσαντα <ἐνθά> δε, which 'would still leave the verb ἀφεῖναι without either subject or object' (Frazer *loc. cit.*). And J. F. Facius in his edition (Lipsiae 1794 i. 173) had cj. Αἰγίνῃ καὶ ὕσαντά τε ἀφεῖναι. After all this stirabout H. Hitzig and F. Spiro are content to print the passage as it stands.

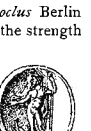

Fig. 821.

In 1887 H. G. Lolling recognised the site of this sanctuary, about an hour and a half to the south-west of Megara, at a place called *Sta Marmara*, some 850 ft above sea-level, though far below the mountain-crest (H. G. Lolling in the Ἐφ. Ἀρχ. 1887 p. 213 ff. with sketch-plan). D. Philios, who excavated it in 1889, discovered a small prostyle temple ($6{\cdot}40^{m} \times 4{\cdot}75^{m}$) facing south-east. Of this nothing remained except three foundation-courses and the pavement; but the temple appears to have been of stone and certainly had stone triglyphs. To the north was a Christian tomb (T), long since rifled, showing that sanctity still attached to the spot in Byzantine times: terra-cotta lamps were found, marked with a cross. To the south was a cistern (N), and further east a circular structure (K), three bases (Θ), and a large oblong altar (?)(H). Adjoining this was a line of plinths (M) and a wall (Π—P). West of the precinct, if so it may be termed, lay a complex of chambers built round a court-yard. One chamber (A), which had stone couches set against its walls, contained two pits (α, β) full of ashes. Two other chambers (7 and 8), entered from a *stoá* with bases for pillars (τ, υ, φ (?)), were likewise lined with stone couches. A short staircase led from the *stoá* into another room (9), the centre of which was occupied by a shallow circular depression with a flooring of baked brickwork. From this a channel of baked brick ran into a pit about $0{\cdot}10^{m}$ deep. On the rim of the large sinking, towards the north, was set a square base $0{\cdot}50^{m}$ high. The next room (10) again disclosed a pit

0·13m deep and beside it a base about 0·50m high. The largest chamber of all (11) was probably entered from the court by a door on the south. Round three sides of it were remains of stone seats. The north-east and north-west corners showed traces of a rough mosaic paving. The middle of the floor had five slabs, which had probably served as bases for pillars. Six lesser apartments (1—6) at the south-east angle were built of small stones bonded with clay and were clearly of later construction. The court also contained a hearth of baked bricks (ο), another pit full of ashes (ν), etc. The western portion of the building was protected against water pouring down from a higher level by an extra wall (Γ—Β—Δ), part of which (Β—Δ) was specially strong. And on the southern side the foundations were strengthened by a retaining wall (Ε—Ζ). Miscellaneous finds (at Ω and elsewhere) included the relief of a griffin in limestone, animals in clay (leonine foot, pig's snout), the head of a dove (?) in Pentelic marble, etc. No Mycenaean vases were discovered, but fragments of large *pithoi* with impressed geometric designs, also Corinthian ware in some abundance, and sherds of black-figured and red-figured technique. A few broken vases etc. were inscribed (*Corp. inscr. Gr. sept.* i nos. 3492—3497), of which the most important were a *kylix*-foot incised ΦΕΣ or ΦΕΣ=[Διὸς Ἀ]φεσ[ίου], or [Διὶ Ἀ]φεσ[ίῳ] (no. 3494) and a stone slab reading ΗΒΡΟ.....="Ηρω[ος] or "Ηρω[ι] (no. 3492). See further D. Philios in the Ἐφ. Ἀρχ. 1890 pp. 35 ff. (with careful plans and illustrations: pl. 4, 3=my fig. 822), 63 f., H. G. Lolling *ib.* 1890 p. 55 ff., D. Philios in the Πρακτ. ἀρχ.

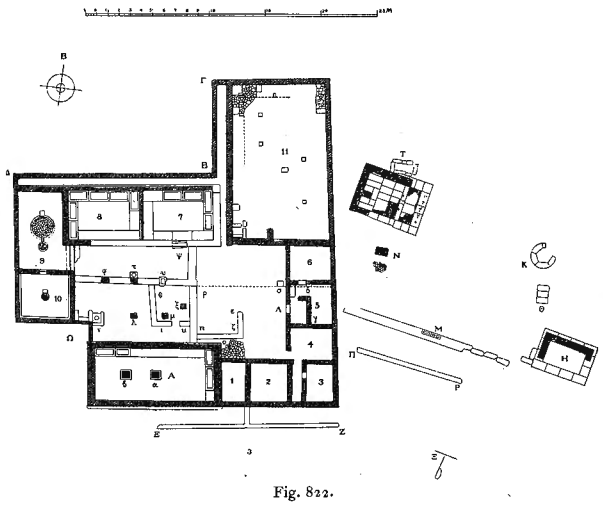

Fig. 822.

ἐτ. 1889 p. 26, W. Doerpfeld in the *Ath. Mitth.* 1889 xiv. 327, and Frazer *Pausanias* ii. 550 f.

The interpretation of the western group of buildings is disputed. H. G. Lolling held that it was originally a private dwelling-house, to which a sanctuary had afterwards been attached; D. Philios, that it was from the first an edifice containing chambers for the priest and the temple-attendants (cp. Paus. 10. 34. 7). I incline to think that the chambers with stone couches (A, 7, 8) were used for incubation, and that the rooms with circular

Mount Parnes[6].

pits and rectangular bases (9, 10) betoken a chthonian cult. On this showing the worship of Zeus Ἀφέσιος was associated with that of a local Megarian hero (cp. F. Pfister *Der Reliquienkult im Altertum* Giessen 1909 i. 1 ff. 'Die mythische Königsliste von Megara'), who not impossibly had been regarded as Zeus incarnate. A similar combination occurs *e.g.* at Olympia, and the surviving inscriptions [Διὸς Ἀ]φεσ[ίου] and Ἥρω[ος] are decidedly suggestive.

[1] Paus. 1. 40. 1 *τὰς δὲ Σιθνίδας νύμφας λέγουσι Μεγαρεῖς εἶναι μέν σφισιν ἐπιχωρίας, μιᾷ δὲ αὐτῶν* [*θυγατρὶ* (secl. C. G. Siebelis)] *συγγενέσθαι Δία, Μέγαρόν τε παῖδα ὄντα Διὸς καὶ ταύτης δὴ τῆς νύμφης ἐκφυγεῖν τὴν ἐπὶ Δευκαλίωνός ποτε ἐπομβρίαν, ἐκφυγεῖν δὲ πρὸς τὰ ἄκρα τῆς Γερανίας* (*Makri Plagi* 1370[m] above sea-level), *οὐκ ἔχοντός πω τοῦ ὄρους τὸ ὄνομα τοῦτο, κ.τ.λ.* Cp. Dieuchidas of Megara *frag.* 1 (*Frag. hist. Gr.* iv. 388 Müller) *ap.* Clem. Al. *strom.* 6. 2 p. 443, 9 f. Stählin and *frag.* 11 (*Frag. Hist. Gr.* iv. 290 Müller) *ap.* Harpokr. *s.v.* Γερανία. *Et. mag.* p. 228, 22 ff., telling the same tale, speaks of Μεγαρεὺς *ὁ Διὸς καὶ μιᾶς τῶν καλουμένων θηίδων* (L. Dindorf corr. *Σιθνίδων*) *νυμφῶν.*

[2] Zeus Ὕπατος (*supra* p. 875 n. 1 no. (2)). Zeus Πολιεύς (*infra* § 9 (h) ii).

[3] Zeus Ὕψιστος (*supra* p. 876 f. n. 1 no. (1)). The Siphnian Zeus Ἐπιβήμιος probably implies a statue of the god on the orator's platform (*infra* Append. N *med.*); but it would be unsafe to argue from Siphnos to Athens, and in any case it was not as mountain-god that Zeus supported the speaker (Plout. *praecept. gerend. reip.* 26 *κοινόν ἐστιν ἱερὸν τὸ βῆμα Βουλαίου τε Διὸς καὶ Πολιέως καὶ Θέμιδος καὶ Δίκης*).

[4] Anchesmos is commonly identified with *Turkovuni*, a range of rocky hills which divides the Attic plain into two unequal parts watered by the Kephisos and the Ilisos respectively (C. Wachsmuth in Pauly—Wissowa *Real-Enc.* i. 2103, H. Hitzig—H. Blümner on Paus. 1. 32. 2). It attains a height of 733[m]. Somewhere on this range was a statue of Zeus Ἀγχέσμιος (Paus. 1. 32. 2 *καὶ Ἀγχεσμὸς ὄρος ἐστὶν οὐ μέγα καὶ Διὸς ἄγαλμα Ἀγχεσμίου*). A. S. Georgiades in the Ἐφ. Ἀρχ. 1920 p. 59 notes foundations on its E. slopes.

[5] On the top of Mt Hymettos (*Monte Matto* or *Trelo-Vuni* 1027·10[m]) was an altar (*et. mag.* p. 352, 49 ff. cited *supra* p. 873 n. 1) and statue of Zeus Ὑμήττιος, also altars of Zeus Ὄμβριος and Apollon Προόψιος (Paus. 1. 32. 2 *ἐν Ὑμηττῷ δὲ ἄγαλμά ἐστιν Ὑμηττίου Διός· βωμοὶ δὲ καὶ Ὀμβρίου Διὸς καὶ Ἀπόλλωνός εἰσι Προοψίου*). Hesych. Ὑμήττιος· *Ζεὺς παρὰ Ἀττικοῖς.* Clouds on Hymettos portended rain (Theophr. *de signis tempest.* 1. 20 and 24), wind (*id. ib.* 2. 9), and storm (*id. ib.* 3. 6). W. Kolbe in Pauly—Wissowa *Real-Enc.* ix. 138 f. thinks it very probable that the statue of Zeus Ὑμήττιος stood on the small plateau close to the highest point of the mountain, and that the cult of Zeus Ὄμβριος is perpetuated on its ancient site by the chapel of St Elias perched upon a conspicuous crest (508[m]) on the eastern slope of the main *massif*, above Sphettos, north of the *Pirnari* Pass, to which chapel in times of drought whole troops of pilgrims still resort (A. Milchhöfer in E. Curtius and J. A. Kaupert *Karten von Attika* Berlin 1883 Text ii. 32).

[6] On Mt Parnes was a bronze statue of Zeus Παρνήθιος and an altar of Zeus Σημαλέος; also another altar on which sacrifices were made sometimes to Zeus Ὄμβριος, sometimes to Zeus Ἀπήμιος (Paus. 1. 32. 2 *καὶ ἐν Πάρνηθι Παρνήθιος Ζεὺς χαλκοῦς ἑστι, καὶ βωμὸς Σημαλέου Διός. ἔστι δὲ ἐν τῇ Πάρνηθι καὶ ἄλλος βωμός, θύουσι δὲ ἐπ' αὐτοῦ τοτὲ μὲν Ὄμβριον τοτὲ δὲ Ἀπήμιον καλοῦντες Δία, et. mag.* p. 352, 49 ff. cited *supra* p. 873 n. 1). Parnes (*Ozea*) is at once the highest (1413[m]) and the most extensive mountain in Attike. C. Bursian *Geographie von Griechenland* Leipzig 1862 i. 252 would locate the statue of Zeus Παρνήθιος and the altar of Zeus Σημαλέος (*supra* p. 4) near Phyle, on the bare rocky ridge

Mount Kithairon[6].

which the ancients on account of its shape called the Chariot (*supra* p. 815 f.), but the altar of Zeus Ὄμβριος and Ἀπήμιος on some other eminence. Lightning over Parnes, Brilettos, and Hymettos betokened a big storm; over two of the three, a less serious storm; over Parnes alone, fair weather (Theophr. *de signis tempest.* 3. 6). Clouds over the western side of Parnes and Phyle, with a north wind blowing, meant stormy weather (*id. ib.* 3. 10).

[2] Zeus Ὕπατος (*supra* p. 875 n. 1 no. (1)).

[3] Zeus Ὕψιστος (*supra* p. 878 n. 0 no. (2)).

[4] Zeus Καραιός (*supra* p. 874 n. 2).

[5] Zeus Ἑλικώνιος had an altar on Mt Helikon, near the spring Hippokrene, round which the Muses danced (Hes. *theog.* 1 ff. with schol. *ad loc.* 2 ἐν τῷ αὐτῷ γὰρ ὄρει καὶ κρήνη ἦν καὶ βωμός, 4 ἐν Ἑλικῶνι δὲ ἦν ὁ βωμός, ὡς εἴρηται, τοῦ Διὸς τοῦ Ἑλικωνίου). On the north-eastern summit of Helikon (*Zagora* 1527[m]) now stands a little roofless chapel of St Elias: it is surrounded by fir-trees, and its walls of small well-jointed polygonal stones probably formed in antiquity the *peribolos* of the altar of Zeus (C. Bursian *Geographie von Griechenland* Leipzig 1862 i. 239, H. N. Ulrichs *Reisen und Forschungen in Griechenland* Berlin 1863 ii. 99, Frazer *Pausanias* v. 158, Maybaum *Der Zeuskult in Boeotien* Doberan 1901 p. 7). See also *supra* i. 132.

[6] Mt Kithairon was sacred to Zeus Κιθαιρώνιος (Paus. 9. 2. 4 ὁ δὲ Κιθαιρὼν τὸ ὄρος Διὸς ἱερὸν Κιθαιρωνίου ἐστίν. This sentence is out of place in its context. H. C. Schubart—E. C. Walz excised it as a gloss. C. L. Kayser in the *Zeitschrift für die Alterthumswissenschaft* 1850 viii. 392 transposed it to stand before καθότι δὲ τοῦ Κιθαιρῶνος κ.τ.λ.). Nominally every sixth year, but really at shorter intervals, the Plataeans held a festival called Δαίδαλα μικρά. Going to an oak-wood near Alalkomenai they set out pieces of boiled flesh, followed the crow that pounced on the flesh, felled the tree on which it perched, and made of it a wooden image called a δαίδαλον. Every fifty-ninth year the Plataeans joined with the Boeotians to celebrate the Δαίδαλα μεγάλα. The various townships drew lots for the fourteen wooden images provided by the Δαίδαλα μικρά. Apparently each township took its image to the river Asopos and placed it on a waggon along with a bridesmaid. Again casting lots for order of precedence, they drove the waggons from the river to the top of Kithairon. Here an altar had been built of blocks of wood with brushwood piled on it. Each township then sacrificed a cow to Hera and a bull to Zeus, and, filling these victims with wine and incense, burnt them along with the images on the altar. The result was a huge column of flame visible at a great distance. The local myth explained that Hera, enraged with Zeus, had once retired to Euboia, and that Zeus, at the advice of Kithairon king of Plataiai, had made a wooden image and put it wrapped up on a bullock-cart, giving out that he was taking to wife Plataia, daughter of Asopos: Hera had flown to the spot, discovered the trickery, and made it up with Zeus (Paus. 9. 3. 1—8). According to Plutarch, Hera had been in hiding on Mt Kithairon (not in Euboia), and the stratagem was suggested to Zeus by Alalkomeneus the autochthon (not by Kithairon): together they cut down a fine oak, shaped it and decked it as a bride and called it Δαιδάλη; the wedding chant was raised, the Tritonid nymphs brought water for the bath, and Boiotia furnished flutes and the band of revellers. Hera with the women of Plataiai in her train came down from Mt Kithairon in jealous anger, but laughed at the ruse and was reconciled to Zeus (Plout. *ap.* Euseb. *praep. ev.* 3. 1. 6). Aristeides before

A mountain near Lebadeia[2].

the battle of Plataiai (479 B.C.) was bidden by the Delphic oracle to pray to Zeus, Hera Κιθαιρωνία, Pan, and the Sphragitid nymphs (Plout. *v. Aristid.* 11): Pausanias, turning towards the Heraion outside Plataiai, prayed to Hera Κιθαιρωνία and the other deities of the Plataean land (*id. ib.* 18). The image of Hera Κιθαιρωνία at Thespiai was a lopped tree-trunk (Clem. Al. *protr.* 3. 46. 3 καὶ τῆς Κιθαιρωνίας Ἥρας ἐν Θεσπείᾳ πρέμνον ἐκκεκομμένον, cp. Arnob. *adv. nat.* 6. 11 ramum pro Cinxia Thespios). She had a sanctuary also at Thebes (schol. Eur. *Phoen.* 24 ἢ ὅτι Κιθαιρωνίας Ἥρας ἐστὶν ἐν Θήβαις ἱερόν). Schöll—Studemund *anecd.* i. 269 Ἐπίθετα Ἥρας (10) κιθαιρωνίας.

In the traditional singing-match between Kithairon and Helikon (for which see Demetrios of Phaleron *ap.* schol. *Od.* 3. 267 and Eustath. *in Od.* p. 1466, 56 ff., Lysimachos (? Lysanias) of Kyrene *frag.* 26 (*Frag. hist. Gr.* iii. 342 Müller) *ap.* schol. Hes. *o.d.* p. 33, 4 ff. Gaisford, cp. Tzetz. *chil.* 6. 917 ff., Hermesianax of Kypros *frag.* 2 (*Frag. hist. Gr.* iv. 428 Müller) *ap.* Plout. *de fluv.* 2. 3) the former sang of the childhood of Zeus (Korinna in the *Berliner Klassikertexte* Berlin 1907 v. 2. 19 ff. no. 284, cp. *ib.* p. 47, =*frag.* 1 Diehl[3]).

[1] On Mt Laphystion near Orchomenos was a precinct and stone statue of Zeus Λαφύστιος. It was here that Athamas was about to sacrifice Phrixos and Helle, when Zeus sent the ram with the golden fleece to aid their escape (Paus. 9. 34. 5, cp. 1. 24. 2). Higher up on the mountain-side was a Herakles Χάροψ; for here, according to the Boeotians, Herakles had brought up the hound of Hades (Paus. 9. 34. 5). Dionysos too was worshipped on the mountain as Λαφύστιος (*et. mag.* p. 557, 51 f. Λαφύστιος· ὁ Διόνυσος, ἀπὸ τοῦ ἐν Βοιωτίᾳ Λαφυστίου ὄρους=Tzetz. *in* Lyk. *Al.* 1237), and his Maenads were Λαφύστιαι (Lyk. *Al.* 1237 with Tzetz. *ad loc.*).

Laphystion has been identified with *Granitsa*, a steep mountain (896[m]) of reddish stone with a summit like a crater and warm springs at its north-eastern foot (C. Bursian *Geographie von Griechenland* Leipzig 1862 i. 235 f., Frazer *Pausanias* v. 172, H. Hitzig—H. Blümner on Paus. 9. 34. 5).

That Λαφύστιος must be connected with λαφύσσειν, 'to devour,' is commonly admitted. But beyond this point agreement ceases. Was the god named after the mountain, or the mountain after the god? (1) U. von Wilamowitz-Moellendorff in his ed. 2 of Eur. *H.f.* Berlin 1895 i. 34 n. 67 holds that Mt Laphystion got its name from the crater that engulfed the unwary. And doubtless Zeus Λαφύστιος could have derived his appellation from Mt Laphystion. But we have already (*supra* i. 416 f., 428) seen reason to think that Zeus Λαφύστιος was originally a Thessalian god, and we hear of no Mt Laphystion in Thessaly. (2) Maybaum *Der Zeuskult in Boeotien* Doberan 1901 p. 8 conversely assumes that Mt Laphystion derived its name from Zeus Λαφύστιος. It is then open to us to interpret Λαφύστιος as 'Devouring' with allusion to human sacrifice. For that grim tradition attached to the cult of Zeus Λαφύστιος, not only in Boiotia, but also in Thessaly (*infra* Append. B Thessalia); and the Dionysos of Orchomenos had an equally sinister reputation (Plout. *quaestt. Gr.* 38, Ant. Lib. 10, Ov. *met.* 4. 1 ff. Frazer *Golden Bough*[3]: The Dying God p. 163 f.). See further P. Buttmann *Mythologus* Berlin 1829 ii. 230, W. Drexler in Roscher *Lex. Myth.* ii. 1850 f., J. W. Hewitt in *Harvard Studies in Classical Philology* 1908 xix. 102 f.

[2] Paus. 9. 39. 4 ἀναβᾶσι δὲ ἐπὶ τὸ μαντεῖον (*sc.* τοῦ Τροφωνίου) καὶ αὐτόθεν ἰοῦσιν ἐς τὸ πρόσω τοῦ ὄρους, Κόρης ἐστὶ καλουμένη θήρα (καλουμένης θήρας codd. fam. L[1]. K. Goldhagen cj. καλουμένης Σωτείρας. H. N. Ulrichs cj. καλουμένης Ἥρας. F. Spiro: 'an θύρα?') καὶ Διὸς Βασιλέως ναός. τοῦτον μὲν δὴ διὰ τὸ μέγεθος ἢ καὶ τῶν πολέμων τὸ ἀλλεπάλληλον ἀφείκασιν ἡμίεργον· ἐν δὲ ἑτέρῳ ναῷ Κρόνου καὶ Ἥρας καὶ Διός ἐστιν ἀγάλματα. ἔστι δὲ καὶ Ἀπόλλωνος ἱερόν. The unfinished temple of Zeus Βασιλεύς is believed to have stood on Mt St Elias, a height which rises west of the castle-hill of *Livadia* at a distance of half an hour from the town. Here the ground is still strewn with big building-blocks, though most of the material was carried off in Turkish times (Sir J. G. Frazer and H. Hitzig—H. Blümner *ad loc.*). The temple seems to have been 46·02[m] in length (E. Fabricius *ap.* H. Nissen

Mount Homoloïon (?)[1].

in the *Rhein. Mus.* 1887 xlii. 54). A long inscription, of 175—172 B.C., relating to this temple was found built into the wall of a blacksmith's forge at *Livadia* (*Inscr. Gr. sept.* i no. 3073 = Michel *Recueil d'Inscr. gr.* no. 589 = Dittenberger *Syll. inscr. Gr.*[3] no. 972). It specifies the conditions under which the custodians (*ναοποιοί*) of the temple of Zeus Βασιλεύς are prepared to place the building-contract with the contractors (*ἐργῶναι*). The first section (*vv.* 1—89) deals with the slabs (*στῆλαι*) on which the specification is to be inscribed; the second (*vv.* 89—164) with the paving-stones to be laid in one of the external colonnades (*v.* 89 ff. *εἰς τὸν ναὸν τοῦ* | *Διὸς τοῦ* Βασιλέως *εἰς τὴν ἔξω περίστασιν τοῦ σηκοῦ* | *τῶν εἰς τὴν μακρὰν πλευρὰν καταστρωτήρων ἐργα*|*σία καὶ σύνθεσις*). It appears that the temple was constructed, not by the inhabitants of Lebadeia only, but by the Boeotians in common (*v.* 156 f.), probably—as A. Wilhelm saw—with money supplied by Antiochos iv Epiphanes. Other fragments of the same contract are *Inscr. Gr. sept.* i nos. 3074—3076, A. de Ridder and Choisy 'Devis de Livadie' in the *Bull. Corr. Hell.* 1896 xx. 318—335 (*v.* 58 *εἰς τὸ* <*ν*> [*ἡμι*]*κύκλιον* is taken to imply an apsidal end to the temple: restoration *ib.* pl. 9. Other Boeotian examples at Arne, Ptoion, Kabeirion, Thespiai are noted by F. Noack in the *Ath. Mitth.* 1894 xix. 424: cp. *supra* i. 120), A. Wilhelm 'Bauinschrift aus Lebadeia' in the *Ath. Mitth.* 1897 xxii. 179—182.

The Boeotians after vanquishing the Spartans at Leuktra (371 B.C.) established at Lebadeia an *ἀγὼν στεφανίτης* in honour of Zeus Βασιλεύς (Diod. 15. 53). These games, known as the *Βασίλεια*, are repeatedly mentioned in inscriptions (*Inscr. Gr. sept.* i Index p. 761, O. Jessen in Pauly—Wissowa *Real-Enc.* iii. 82), one of which has ΒΑΣΙΛΕΙΑ within a bay-wreath (*Inscr. Gr. sept.* i no. 2487). If, as seems probable, Zeus Βασιλεύς was associated with Hera Βασιλίς, the games were quadriennial (*ib.* i no. 3097). Plutarch's story about Aristokleia the *κανηφόρος* of Zeus Βασιλεύς (Plout. *amat. narr.* 1) implies a ritual procession (Nilsson *Gr. Feste* p. 34).

On the relation of Zeus Βασιλεύς to Trophonios see *infra* Append. K.

[1] Zeus Ὁμολώιος was worshipped in Boiotia (Steph. Byz. *s.v.* Ὁμόλη), particularly at Thebes (Hesych. *s.v.* Ὁμολώιος (Ὅμολλος cod.) *Ζεὺς· Θήβησιν οὕτω προσαγορεύεται ὁ Ζεύς*); and Aristodemos of Alexandreia, who wrote a learned work on Theban antiquities, appears to have derived the name of the *Ὁμολωΐδες πύλαι* at Thebes from their proximity to a Ὁμολώιον ὄρος (Aristodem. Theb. *frag.* 2 (*Frag. hist. Gr.* iii. 309 Müller) *ap.* schol. Eur. *Phoen.* 1119, cp. Steph. Byz. *loc. cit.*). It may be inferred, though not with certainty, that there was a cult of Zeus on this hill (see Maybaum *Der Zeuskult in Boeotien* Doberan 1901 p. 9 f.). A small column, found at Thebes and now in the local Museum, has inscribed in archaic letters on its fluting *Διὶ Ὁμολῶϊοι* | *Ἀγειμώνδας ἀπὸ δεκά[τας]* (P. Foucart in the *Bull. Corr. Hell.* 1879 iii. 130 ff., Roehl *Inscr. Gr. ant.* no. 191, R. Meister in Collitz—Bechtel *Gr. Dial.-Inschr.* i. 227 no. 665, Roberts *Gk. Epigr.* i. 212 no. 198, *Inscr. Gr. sept.* i no. 2456), which is perhaps a clumsy attempt at a hexameter line. Doubtless this column once supported a votive offering in the Theban sanctuary of Zeus Ὁμολώιος. His festival the Ὁμολώια, mentioned in lists of victors from Megara (*ib.* i no. 48, 2) and from Orchomenos in Boiotia (*ib.* i no. 3196, 24 f., no. 3197, 36 f.), was specially discussed by Aristodemos (Aristodem. Theb. *frag.* 2 (*Frag. hist. Gr.* iii. 309 Müller) *ap.* schol. Theokr. 7. 103). The same god was worshipped, not only in Boiotia, but also in Thessaly (Phot. *lex. s.v.* Ὁμολῷος *Ζεύς· ἐν Θήβαις καὶ ἐν ἄλλαις πόλεσι Βοιωτίας· καὶ ὁ ἐν Θεσσαλίᾳ ἀπὸ Ὁμολῴας προφήτιδος τῆς Ἐννέως, ἣν προφῆτιν εἰς Δελφοὺς πεμφθῆναι ὁ Ἀριστοφάνης* (*sic cod.* S. A. Naber *corr.* Ἀριστόδημος, *sc.* Aristodem. Theb. *loc. cit.*) *ἐν δευτέρῳ Θηβαϊκῶν· Ἴστρος δὲ ἐν τῇ δωδεκάτῃ τῆς συναγωγῆς διὰ τὸ παρ' Αἰολεῦσιν τὸ ὁμονοητικὸν καὶ εἰρηνικὸν ὅμολον λέγεσθαι* (*frag.* 10 (*Frag. hist. Gr.* i. 419 Müller)). *ἔστι δὲ Δημήτηρ* Ὁμολῴα *ἐν Θήβαις* = Souid. *s.v.* Ὁμολώιος Ζεύς, cp. Apostol. 12. 67, Arsen. *viol.* p. 381 Walz, Favorin. *lex.* p. 1358, 38 ff., Eudok. *viol.* 414[E] p. 314, 10 ff. Flach). O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 2263 f. remarks that the name of the month Ὁμολώιος, Ὁμολῶος, Ὁμολούιος found in Boiotia, Aitolia, and Thessaly (E. Bischoff *ib.* viii. 2264) implies a wide-spread cult of deities with this appellative, such as Zeus Ὁμολώιος,

Mount Petrachos[1].

Phokis

Delphoi[2].

Demeter Ὁμολώια (*supra*), and Athena Ὁμολωίς (Lyk. *Al.* 520 with schol. and Tzetz. *ad loc.*), and concludes: 'Da der Boiotien und Thessalien gemeinsame Monatsname einen gemeinsamen Kult des Zeus H. wahrscheinlich machen, dürfte Zeus H. ähnlich wie Zeus Olympios von Thessalien nach Mittelgriechenland gekommen sein.' His cult reached Eretria also; for a fragmentary slab discovered close to the western gate of Eretria is inscribed in lettering of *s.* iii. B.C. Διὸς Ὁμ[ο]|λωΐο[υ] (K. Kourouniotes in the Ἐφ. Ἀρχ. 1897 p. 150 n. 3, who cp. the Theban Ὁμολωΐδες πύλαι). See further O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 105 f. (Λώϊος=Ὁμολώϊος), E. Sittig *De Graecorum nominibus theophoris* Halis Saxonum 1911 p. 14 f. (collects derivatives of Ὁμολώιος, Λώιος, and infers from the occurrence of the month Ὁμολόϊος at Eresos in Lesbos (*Inscr. Gr. ins.* ii no. 527, 44) 'Iovem omnes Aeoles, priusquam discesserint, hoc cognomine esse venerato'), F. Bechtel *Die griechischen Dialekte* Berlin 1921 i. 19, 142, 264. *Supra* p. 857 n. 6, *infra* Append. B Thessalia.

[1] The *Akrópolis* of Chaironeia was a sharp rocky summit named Petrachos (Plout. *v. Sull.* 17). Here Kronos received from Rhea a stone instead of Zeus; and there was a small statue of Zeus on the top of the mountain (Paus. 9. 41. 6 ἔστι δὲ ὑπὲρ τὴν πόλιν κρημνὸς Πετραχὸς καλούμενος· Κρόνον δὲ ἐθέλουσιν ἐνταῦθα ἀπατηθῆναι δεξάμενον ἀντὶ Διὸς πέτρον παρὰ τῆς Ῥέας, καὶ ἄγαλμα Διὸς οὐ μέγα ἐστὶν ἐπὶ κορυφῇ τοῦ ὄρους). For the extant remains of Chaironeia see C. Bursian *Geographie von Griechenland* Leipzig 1862 i. 205 f., Sir J. G. Frazer on Paus. 9. 40. 5, and H. Hitzig—H. Blümner on Paus. 9. 40. 7; for the history of the town, E. Oberhummer in Pauly—Wissowa *Real-Enc.* iii. 2033 ff.

[2] The Delphians originally occupied a town Λυκώρεια higher up on the side of Mt Parnassos (Strab. 418, cp. schol. Ap. Rhod. 4. 1490, Plout. *de Pyth. or.* 1 where W. R. Paton cj. Λυκώρειαν for Λυκουρίαν). H. N. Ulrichs *Reisen und Forschungen in Griechenland* Bremen 1840 i. 120 and C. Bursian *Geographie von Griechenland* Leipzig 1862 i. 179 f. found traces of Λυκώρεια in sundry Hellenic walls still visible on a height to the west of the Corycian Cave. W. M. Leake *Travels in Northern Greece* London 1841 ii. 579 with truer topographical instinct identified the site of the ancient city with the village of *Liakouri*. Here Deukalion had reigned as king (*marm. Par. ep.* 2 p. 3 Jacoby, *ep.* 4 p. 3 f.)—indeed, the town had been founded by survivors of his deluge, who followed the 'howling of wolves,' λύκων ὠρυγαῖς, to the mountain-top (Paus. 10. 6. 2). Another account made its founder Λύκωρος, son of Apollon by the nymph Korykia (Paus. *ib.*, cp. *et. mag.* p. 571, 47 ff.). He is called Λυκωρεύς by schol. Ap. Rhod. 2. 711 (cp. Hyg. *fab.* 161), who adds ἀφ' οὗ Λυκωρεῖς οἱ Δελφοί. Finally Anaxandrides (*supra* p. 238 n. 1) of Delphoi, who wrote a monograph περὶ Λυκωρείας, spoke of Λυκωρεύς as a king (Alexandrides *frag.* 7 (*Frag. hist. Gr.* iii. 107 Müller) *ap.* Steph. Byz. *s.v.* Λυκώρεια).

The town had a cult of Apollon (*et. mag.* p. 571, 47 ff.), who is mentioned as Phoibos Λυκώρειος (Ap. Rhod. 4. 1490), Apollon Λυκωρεύς (Steph. Byz. *s.v.* Ἀνεμώρεια), Phoibos Λυκωρεύς (Euphorion *frag.* 53 in A. Meineke *Analecta Alexandrina* Berolini 1843 p. 95 f., Kallim. *h. Ap.* 19, Orph. *h. Ap.* 34. 1, *oracul. ap.* Euseb. *praep. ev.* 3. 14. 5=Cougny *Anth. Pal. Append.* 6. 82. 9 f.), or Λυκωρεύς alone (*Anth. Pal.* 6. 54. 1 (Paulus Silentiarius)). There was also a Zeus Λυκώρειος (Steph. Byz. *s.v.* Λυκώρεια· ...ἔστι καὶ Λυκώρειος Ζεὺς καὶ Λυκώρειον διὰ διφθόγγου), who was presumably worshipped on the peak known as Λυκώρειον (*id. ib.*) or Λυκωρεύς (Loukian. *Tim.* 3, where for τῷ Λυκωρεῖ I should restore τῷ Λυκωρείῳ), later Λυκορί (schol. rec. Pind. *Ol.* 9. 70). The highest point of Parnassos (2459^{m}) is still called τὸ Λυκέρι. J. Murray *Handbook for travellers in Greece*[7] London 1900 p. 540 f. says: 'The...summit, locally called Lykeri (8070 ft.), is marked with a wooden cross. At the top of the mountain is a small plain, enclosed in a crater-like basin, and containing a pool generally frozen over... The view on a clear day exceeds in grandeur and interest almost every other prospect of the kind. To the N., beyond the plains of Thessaly, appears Olympus with its snowy tops brilliant in sunlight. Further W.

Mount Oche[1].
Mount Kenaion[2].

is seen the long chain of Pindus; on the E. rises Helicon, with other Boeotian mountains. To the S. the summit of Panachaicon is very conspicuous; Achaia, Argolis, Elis and Arcadia are seen as in a map, while the Gulf of Corinth looks like a large pond. The Aegean and Ionian seas bound the horizon E. and W.' It appears probable that the cult of Zeus Λυκώρειος was displaced or overshadowed by that of Apollon Λυκώρειος. Their common epithet may be connected either with λύκος, 'a wolf' (according to H. N. Ulrichs *op. cit.* i. 118 wolves still haunt the woods of Parnassos: 'In Chrysó sah ich vier Hirten, von denen jeder eine Wolfshaut an einem langen Stocke trug, dessen oberstes Ende aus dem geöffneten Rachen des Thiers hervorsteckte. Sie zogen von Dorf zu Dorf und empfingen an jedem Hause freigebige Geschenke für die Befreiung von diesem gefährlichen Feinde der Herden.' Paus. 10. 14. 7, Ail. *de nat. an.* 10. 26, 12. 40, Plout. *v. Per.* 21 associate wolves with the Delphian Apollon), or with Λύκος, an ancient name for the god of the daylight (?) (*supra* i. 64 n. 3).

When Deukalion, after traversing the flood for nine days and nights in his ark, landed at length on Mt Parnassos, he sacrificed there to Zeus Φύξιος (Apollod. 1. 7. 2, cp. schol. cod. Paris. Ap. Rhod. 2. 1147 Φύξιον δὲ τὸν Δία οἱ Θεσσαλοὶ ἔλεγον, ἤτοι ὅτι ἐπὶ τοῦ Δευκαλίωνος κατακλυσμοῦ κατέφυγον εἰς αὐτόν, ἢ διὰ τὸ τὸν Φρίξον καταφυγεῖν εἰς αὐτόν). This title too is found attached to Apollon (Philostr. *her.* p. 711 Palamedes prays Ἀπόλλωνι Λυκίῳ τε καὶ Φυξίῳ to be delivered from wolves, cp. Souid. *s.v.* Φύξιος).

For Zeus at Delphoi see further *supra* pp. 179 ff., 189 ff., 231 ff., 266 f.

[1] Popular etymology derived the name of Mt Oche (Ὄχη) from the union (ὀχή = ὀχεία) of Zeus and Hera, which was said to have taken place there (Steph. Byz. *s.v.* Κάρυστος· ... ἐκλήθη δὲ τὸ ὄρος ἀπὸ τῆς ἐκεῖ ὀχείας, ἤτοι τῶν θεῶν μίξεως Διὸς καὶ Ἥρας, ἢ διὰ τὸ τὰ πρόβατα κυίσκεσθαι ὀχευόμενα ἐν τῷ τόπῳ· οἱ γὰρ Ἀχαιοὶ τὴν τροφὴν ὀχὴν φασι). The summit of the mountain (1475[m]) is nowadays known as *Hagios Elias* (C. Bursian *Geographie von Griechenland* Leipzig 1872 ii. 398).

[2] On the top of Mt Kenaion (677[m]), a height untouched by clouds (Sen. *Herc. Oet.* 786 f. hic rupe celsa nulla quam nubes ferit | annosa fulgent templa Cenaei Iovis), was an altar and sanctuary of Zeus Κήναιος (Aisch. Γλαῦκος πόντιος *frag.* 30 Nauck[2] *ap.* Strab. 447, Soph. *Trach.* 237 f., 752 ff., 993 ff., Skyl. *per.* 58 (*Geogr. Gr. min.* i. 47 Müller), Apollod. 2. 7. 7, Steph. Byz. *s.v.* Κάναι· ... Καναῖος Ζεὺς οὐ μόνον ἀπὸ τοῦ Καναίου, ἀλλὰ καὶ ἀπὸ τῆς Κάνης, Souid. *s.v.* Κηναῖος· ὁ Ζεύς, Schöll—Studemund *anecd.* i. 265 Ἐπίθετα Διός (57) κηναίου, 266 Ἐπίθετα Διός (49) κηναίου, 274 Ἐπίθετα Διός· ... κηναῖος (καναῖος codd. C[1].O[1].), Ov. *met.* 9. 136 f., Sen. *Herc. Oet.* 102, 786 f.). According to Sophokles, Herakles after sacking Oichalia dedicated here altars and a leafy precinct to Zeus Πατρῷος. He offered 100 victims on a pyre of oak, including twelve bulls free from blemish, and put on for the purpose the deadly robe brought to him by Lichas (Soph. *Trach.* 750 ff.). According to Bakchylides, he offered from the spoils of Oichalia nine bulls to Zeus Κήναιος, 'lord of the far-spread clouds,' two to Poseidon, and a cow to Athena (Bakchyl. 15. 17 ff.). Cp. Diod. 4. 37 f., Tzetz. *in* Lyk. *Al.* 50 f., Eudok. *viol.* 436. Fragments of a volute-*krater* from *Kerch* show Herakles (... ΚΛΗΣ) holding a sacrificial fillet for one of these victims in the presence of ΛΙΧΑΣ and Hyllos (?). All these are wreathed with bay or olive. At their feet is a pile of stones; in the background, a tripod on a column and a pillar decorated with acanthus-leaves (L. Stephani in the *Compte-rendu St. Pét.* 1869 p. 179 pl. 4, 1, *ib.* 1876 p. 161 pl. 5, 1 = Reinach *Rép. Vases* i. 31, 12, *ib.* i. 50, 3. This vase-painting was attributed by F. Hauser in Furtwängler—Reichhold—Hauser *Gr. Vasenmalerei* iii. 53 f. fig. 24 to the painter Aristophanes *c.* 400 B.C., by J. D. Beazley *Attic red-figured Vases in American Museums* Cambridge Mass. 1918 p. 184 to a contemporary artist, 'the painter of the New York Centauromachy' (Hoppin *Red-fig. Vases* ii. 217 no. 4)). A fragmentary bell-*krater* in the British Museum has Herakles wreathed with olive and wearing

Cape Geraistos (?)[1].

Thessalia

Mount Oite[2].

a *himátion*. Behind him hangs the poisoned robe (?). In front an altar of unworked stones supports four tiers of blazing logs with the horns of some animal on the top. To left and right of this altar are two youths, Philoktetes (ΦΙΛΟΣΚΕΤ) and Lichas (ΛΙ...), holding meat on spits over the fire. By the altar is an olive-tree, from which hang votive tablets representing a Satyr, a Maenad, and two horsemen; also, the image of a goddess draped and mounted on a Doric column. To the right is a draped female figure, perhaps Nike, and beyond her Athena (... Ν.) with *aigís*, spear, and helmet (*Brit. Mus. Cat. Vases* iii. 300 ff. no. E 494 pl. 16). Both vases may depict the sacrifice on Mt Kenaion (A. H. Smith in the *Journ. Hell. Stud.* 1898 xviii. 274 ff.). An inscription from the *Akrópolis* at Athens records an Eretrian coin belonging to Zeus Κήναιος (*Corp. inscr. Att.* i no. 208, 8 f. [Ἐρ]ετρικὸν | [Δι]ὸς Κηναίου). *Lithadá*, the modern name of Mt Kenaion, is derived from Λιχάδες, the small islands off the point, and appears in Latin documents of *s.* xiii A.D. as *Ponta* (*Punta*) *Litadi* or *Litaldi* (C. Bursian *Geographie von Griechenland* Leipzig 1872 ii. 401 n. 2).

[1] Geraistos, the eponym of Cape Geraistos (*Kavo Mandilo*), was the son of Zeus and brother of Tainaros (Steph. Byz. *s.vv.* Γεραιστός, Ταίναρος).

[2] Mt Oite (*Katavothra*) rises to a height of 2158^{m} (Lieut.-Col. Baker in *The Journal of the Royal Geographical Society of London* 1837 vii. 94 says 7071 ft). It was sacred to Zeus (Soph. *Trach.* 1191 τὸν Οἴτης Ζηνὸς ὕψιστον πάγον), whose lightnings played about it (*id. ib.* 436 f., *Phil.* 729 Jebb); and the meadows high on the mountain, since they belonged to him, might not be mown (*id. Trach.* 200 ὦ Ζεῦ, τὸν Οἴτης ἄτομον ὃς λειμῶν' ἔχεις).

The traditional pyre of Herakles, son of Zeus, was on the south-eastern shoulder of Oite, known to the ancients as Phrygia (Kallim. *h. Artem.* 159 ὅ γε Φρυγίῃ περ ὑπὸ δρυὶ γυῖα θεωθείς with schol. *ad loc.* Φρυγία· δρος Τραχῖνος, ἔνθα ἐκάη ὁ Ἡρακλῆς, Steph. Byz. *s.v.* Φρυγία·... ἔστι καὶ Φρυγία τόπος τῆς Οἴτης ἀπὸ τοῦ ἐκεῖ πεφρύχθαι τὸν Ἡρακλέα) or Pyra (Theophr. *hist. pl.* 9. 10. 2 white hellebore gathered there for the Amphictionic πυλαία, Liv. 36. 30 M'. Acilius Glabrio offered sacrifice there to Herakles in 191 B.C.) and to the moderns as *Xerovouni* near *Pauliane*. Here, at a spot called *Marmari*, N. Pappadakis in 1920—1921 discovered the remains of a great precinct-wall in *pôros*, within which was a smaller oblong (*c.* 20^{m} × 30^{m}) marking the limits of the pyre. A bed of ashes (0·40^{m} to 0·80^{m} thick) contained bones of animals, bronze weapons, implements, etc., and pottery ranging from archaic Greek to Roman times. Some of the black-figured sherds bore dedications ΒΡΑΚΛΕΒΙ or [· · ·]ΚΛΕΒΙ, and two archaic bronze statuettes (0·09^{m} and 0·10^{m} high) represented the hero, with club and bow (?), in violent action. Miscellaneous finds comprised a bronze club, painted architectural tiles, Roman and Thessalian lamps, Megarian bowls, etc. The principal edifice was of Aetolian date, built with large blocks on an older structure of *pôros*: of it there remains the *euthynteria*, part of the west side, and one step of the south side, also part of the paving and of the stereobate for the cult-statue, which seems to have been of the late Roman period. Close by was a Doric *templum in antis* (14^{m} long) with an altar before it: Pappadakis' suggestion that this building was a treasury is hardly borne out by the presence of the altar. Coins from the site included six or seven coppers belonging to the time of the Aetolian League and silver pieces of the Roman imperial series down to Maximian (286—305 A.D.) [Diocletian, who styled himself *Iovius* (*Class. Rev.* 1904 xviii. 371, *Folk-Lore* 1905 xvi. 315), conferred on Maximian the title *Herculius*]. Of two fragmentary inscriptions one mentions the emperor Commodus (?) [another would-be Herakles (P. v. Rohden in Pauly—Wissowa *Real-Enc.* ii. 2470, 2478 f. See also J. de Witte 'De quelques empereurs romains qui ont pris les attributs d'Hercule' in the *Rev. Num.* 1845 pp. 266—272 pl. 13 f.)]. Lastly, to the north at a higher level was a *stoá*, reconstructed in Aetolian times on the site of an older building. Seven chambers for

Halos[1].

Makedonia
Mount Olympos[6].

the accommodation of priests and pilgrims opened into a colonnade (40m long) with octagonal columns. Sundry tiles of this *stoá* are inscribed ΙΗΡΑΗ or ΙΗΡΟCΗ = *ἱερά, ἱερὸς Ἡρακλέους* (N. Pappadakis in the *Bull. Corr. Hell.* 1920 xliv. 392 f., 1921 xlv. 523).

[1] Halos at the foot of Mt Othrys was founded by Athamas (Strab. 433). There was here a sanctuary and grove of Zeus *Λαφύστιος*. Tradition said that Athamas, son of Aiolos, had together with Ino plotted the death of Phrixos. The Achaeans were bidden by an oracle to enjoin that the eldest of Athamas' descendants should never enter the Prytaneion. They mounted guard over it, and their rule was that, if any such person entered it, he might leave it only in order to be sacrificed. Many fearing the rule had fled to other lands. If they returned and entered the Prytaneion, they were covered all over with fillets and led out in procession to be slain. The reason given for this strange custom was that once, when the Achaeans in accordance with an oracle were treating Athamas as a scape-goat for the land and were about to sacrifice him, Kytissoros, son of Phrixos, came from Aia in Kolchis and rescued him, thereby drawing down the wrath of the god on his own descendants (Hdt. 7. 197, cp. Plat. *Min.* 315 c). When Phrixos came to Kolchis, he was received by Dipsakos, son of the river-god Phyllis and a local nymph. Phrixos there sacrificed the ram, on which he had escaped, to Zeus *Λαφύστιος*, and it was a custom for one of his descendants to enter the Prytaneion and sacrifice to the said Zeus (so schol. vulg. Ap. Rhod. 2. 653 *καὶ μέχρι τοῦ νῦν νόμος ἕνα τῶν Φρίξου ἀπογόνων εἰσιέναι εἰς τὸ πρυτανεῖον, καὶ θύειν τῷ εἰρημένῳ Διΐ*. But there is an important variant in schol. cod. Paris. *καὶ μέχρι νῦν νόμος εἰσελθόντα εἰς τὸ πρυτανεῖον ἕνα τῶν Φρίξου ἀπογόνων θύειν τῷ εἰρημένῳ Διΐ*. The accusative *εἰσελθόντα...ἕνα* is ambiguous. It might be the subject of *θύειν* and mean that the man sacrificed to Zeus. It might be the object of *θύειν* and mean that the man was sacrificed to Zeus. In view of the custom at Halos, the latter alternative is more probable than the former. If so, amend Frazer *Golden Bough*[3]: The Dying God p. 165 n. 1). *Supra* i. 416, ii. p. 899 n. 1.

Coins of Halos show the head of Zeus *Λαφύστιος*, sometimes filleted, sometimes laureate (*Brit. Mus. Cat. Coins* Thessaly etc. p. 13 pls. 2, 6, 31, 1). On occasion a thunderbolt is added in front of the head on the obverse (W. Wroth in the *Num. Chron.* Third Series 1899 xix. 91 pl. 7, 1) or below Phrixos and the ram on the reverse (*Brit. Mus. Cat. Coins* Thessaly etc. p. 13 no. 3). The coins are coppers of two periods, 400—344 B.C. and 300—200 B.C. (Head *Hist. num.*[2] p. 295 f.).

[2] Zeus *Ἀκραῖος* (*supra* p. 871 n. 3 no. (1)) and *Ἀκταῖος* (*supra* p. 869 n. 2). A cloud on Pelion meant rain or wind (Theophr. *de signis tempest.* 1. 22).

[3] Zeus *Ὀσσαιος* (Schöll—Studemund *anecd.* i. 265 *Ἐπίθετα Διός* (76) *ὁσσαίου*, 266 *Ἐπίθετα Διός* (68) *ὁσσαίου*) is not necessarily to be taken as the god of Mt Ossa (1950m). He may be the sender of Rumour (*Ὄσσα*) the 'messenger of Zeus' (*Il.* 2. 93 f. *μετὰ δέ σφισιν Ὄσσα δεδήει | ὀτρύνουσ' ἰέναι, Διὸς ἄγγελος*, cp. *Od.* 1. 282 f., 2. 216 f., 24. 413).

[4] Homole or Homolos, one of the northern spurs of Mt Ossa in Magnesia, on which stood the town Homolion (Stählin in Pauly—Wissowa *Real-Enc.* viii. 2259 ff.), was 'the most fertile and best watered of the Thessalian mountains' (Paus. 9. 8. 6, cp. Strab. 443). The *Ὁμολωΐδες πύλαι* of Thebes were said to have been called after it (Paus. 9. 8. 6 f.; but see *supra* p. 900 n. 1). It is possible that the Theban cult of Zeus *Ὁμολώιος* had spread southwards from Mt Homole (Nilsson *Gr. Feste* p. 12 f., *supra* p. 900 n. 1).

[5] Zeus *Ἀκραῖος* (*supra* p. 871 n. 3 no. (2)).

[6] The cult of Zeus on Mt Olympos has been discussed at some length *supra* i. 100—

Plate XL

The summit of Mount Olympos.

See page 905 n. 0 f.

[By permission of Messrs Boissonnas, Geneva.]

117. My statement that the published illustrations of the mountain are very inadequate (i. 101 n. 3) no longer holds good. A. J. Mann—W. T. Wood *The Salonika Front* London 1920 pl. 7 give a coloured silhouette of Olympos as seen from *Mikra*, the reproduction of a fine original owned by Lieut.-Col. G. Windsor-Clive. And the noble view of the summit here shown (pl. xl) is from a large heliogravure of exceptional merit published by F. Boissonnas of Geneva.

D. Urquhart *The Spirit of the East* London 1838 i. 398 ff. describes with much enthusiasm, but little precision, his ascent of Olympos in 1830: 'I spent no more than an hour at this giddy height, where the craving of my eyes would not have been satisfied under a week. I seemed to stand perpendicularly over the sea, at the height of 10,000 feet. Salonica was quite distinguishable, lying north-east; Larissa appeared under my very feet. The whole horizon, from north to south-west was occupied by mountains, hanging on, as it were, to Olympus. This is the range that runs westward along the north of Thessaly, ending in the Pindus. The line of bearing of these heaved-up strata seems to correspond with that of the Pindus, that is, to run north and south, and they presented their escarpment to Olympus. Ossa, which lay like a hillock beneath, stretched away at right angles to the south; and, in the interval, spread far, far in the red distance, the level lands of Thessaly, under that peculiar dusty mist which makes nature look like a gigantic imitation of an unnatural effect produced on the scene of a theatre. When I first reached the summit, and looked over the warm plains of Thessaly, this haze was of a pale yellow hue. It deepened gradually, and became red, then brown, while similar tints, far more vivid, were reproduced higher in the sky. But, when I turned round to the east, up which the vast shadows of night were travelling, the cold ocean looked like a plain of lead; the shadow of the mighty mass of Olympus was projected twenty miles along its surface; and I stood on the very edge, and on my tiptoes' (*ib.* i. 429 f.). On enquiry he found that the shepherds of Olympos 'had no recollection of the "Thunderer" ...but they told me,' he adds, 'that "the stars came down at night on Olympus!" "that heaven and earth had once met upon its summit, but that since men had grown wicked, God had gone higher up"' (*ib.* i. 437, B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 35, N. G. Polites Δημώδεις κοσμογονικοὶ μῦθοι Athens 1894 p. 7, cp. p. 41 ff., *id.* Παραδόσεις Athens 1904 i. 122 no. 217, ii. 805).

Later and more scientific ascents were made by L. Heuzey (1856), H. Barth (1862), and H. F. Tozer (1864). Then followed an interval during which brigandage made mountaineering extremely hazardous: for example, in 1911 E. Richter, an engineer of Jena, had to be ransomed by the Porte at a cost of 500,000 francs. But by 1913 political changes had improved the conditions, and the series of ascents was resumed—D. Baud-Bovy and F. Boissonnas (1913), Profs. E. P. Farquhar and A. E. Phoutrides (1914), Major-General Sir W. Rycroft (1918), D. Baud-Bovy, F. Boissonnas, and the son of the latter (1920), M. Kurz and the chamois-hunter Ch. Kakkalos (1921). See further L. Heuzey *Le Mont Olympe et l'Acarnanie* Paris 1860, H. Barth *Reise durch das Innere der Europäischen Türkei* Berlin 1864, H. F. Tozer *Researches in the Highlands of Turkey* London 1869, E. Richter *Meine Erlebnisse in der Gefangenschaft am Olymp* Leipzig 1911, Profs. E. P. Farquhar and A. E. Phoutrides in *Scribner's Magazine* for November 1915 (good photographs), D. W. Freshfield 'The summits of Olympus' in *The Geographical Journal* 1916 xlvii. 293—297, C. F. Meade 'Mount Olympus' in *The Alpine Journal* 1919 xxxii. 326—328 (with photographs taken by Lieutenant-Colonel Wood, R.E., from an aeroplane piloted by Lieutenant-Colonel Todd, R.A.F.), D. Baud-Bovy 'The mountain-group of Olympus: an essay in nomenclature' in *The Geographical Journal* 1921 lvii. 204—213 (with a sketch-map of the *massif* of Olympos and four fine photographs of the summits by F. Boissonnas).

D. Baud-Bovy *loc. cit.* concludes: 'Thus, to sum up, the High Olympus is constituted by two ranges, which, though not parallel, run generally east and west. The northern range is that of Kokkino-Vrako, the southern, that of Bichtes. A high rocky barrier running north and south contains three "stones," three "pipes," or three "brothers," quite separated from each other, the Tarpeian Rock in the south, the Throne of Zeus in

Mount Athos[1].
Aigai, Kerdylion, etc. (?)[2].

Korkyra
Kassiope[3].

the north, and in the centre the Venizelos peak, the highest of the three. The point of junction between this barrier and the northern range is the St. Elias. The joint which unites the central peaks with the southern range is more complicated. It includes the Skolion, which forms the counterpart to the St. Elias on the opposite side of the Megali-Gurna, and the Isto-Cristaci more to the west. The St. Anthony and the domes of Stavoïdia link these two summits to those at the western end of the southern range, of which the Sarai is the most important.' [The peaks seen in pl. xl, from left to right, are —according to Baud-Bovy's nomenclature—(*a*) the Throne of Zeus (capped by cloud), (*b*) Peak Venizelos (the true summit), (*c*) the Cock's Comb, (*d*) the Virgin, (*e*) the Tarpeian Rock.]

M. Kurz in *The Alpine Journal* 1921 xxxiv. 173 f. reports that in August 1921 he surveyed the whole mass of Olympos with a photo-theodolite and that he has in preparation a map, covering an area of *c.* 100 square kilometers, on a scale of 1 : 20,000. The heights calculated to date are: Skolion = Δ 2905.45^{m}, Pic Venizelos (*Mitka;* 'Needle') = 2917.85^{m}, Throne of Zeus (*Stephani*) = 2909.94^{m}.

[1] Zeus Ἀθῷος (Soph. *Thamyras frag.* 216 Nauck^{2}, 237 Jebb *ap.* Eustath. *in Il.* p. 358, 40 f. Θρῇσσαν σκοπιὰν Ζηνὸς Ἀθῴου, cp. Aisch. *Ag.* 285 Ἀθῷον αἶπος Ζηνὸς ἐξεδέξατο) was worshipped on Mt Athos (Eustath. *in Il.* pp. 218, 3, 358, 43 f., 953, 45 f., schol. *Il.* 14. 229), where he had a statue (Hesych. *s.v.* Ἀθῷος· ὁ ἐπὶ τοῦ Ἄθω τοῦ ὄρους ἱδρυμένος ἀνδριάς, ὁ Ζεύς) and a sanctuary on the summit (*et. mag.* p. 26, 47 f. Ἀθῴου Διός· Διὸς ἱερὸν ἐν ἄκρῳ Ἄθῳ τῷ ὄρει, Ἀθῴου καλουμένου). For beliefs concerning the mountain-top and its altars see *supra* i. 82 n. 1, 103 n. 4 (Solin. 11. 3 there adduced is dependent on Mela 2. 31). The presence or absence of clouds on Mt Athos betokened rain or fine weather (Theophr. *de signis tempest.* 3. 6, 4. 2). Other allusions are collected by W. Capelle *Berges- und Wolkenhöhen bei griechischen Physikern* (Στοιχεῖα v) Leipzig—Berlin 1916 pp. 1, 27, 32 n. 5, 37, 39. On the various monasteries of this Ἅγιον Ὄρος see the literature cited by E. Oberhummer in Pauly—Wissowa *Real-Enc.* ii. 2068 f. and by C. M. Kaufmann *Handbuch der christlichen Archäologie* Paderborn 1913 p. 120.

[2] Zeus Ὕψιστος (*supra* p. 878 n. 0 no. (9)).

[3] Kassiope, a town and promontory (Ptol. 3. 13. 9 Κασσιόπη πόλις καὶ ἄκρα) in the north-eastern corner of Korkyra, is still called *Kassiopi.* As a convenient haven it figures from time to time in ancient records (L. Bürchner in Pauly—Wissowa *Real-Enc.* x. 2314 f., xi. 1413). It possessed a temple of Iupiter *Cassius* (Plin. *nat. hist.* 4. 52 et oppido Cassiope temploque Cassi Iovis), at whose altar Nero sang (Suet. *Ner.* 22 ut primum Cassiopen traiecit, statim ad aram Iovis Cassii cantare auspicatus certamina deinceps obiit omnia). Two dedications to Iupiter *Casius* have been found in Korkyra (*Corp. inscr. Lat.* iii no. 576 = Orelli *Inscr. Lat. sel.* no. 1224 P. Hetereius | Rufio | Iovi Casio sac(rum), *Corp. inscr. Lat.* iii no. 577 (cp. p. 989) = Dessau *Inscr. Lat. sel.* no. 4043 M. Valerius Corvi[ni] | [i. L]orico | Iovi Casio v. s.). A ship built of marble and dedicated by a merchant to Zeus Κάσιος was sometimes regarded as the raft of Odysseus, and is compared with the stone ship made by Tynnichos and dedicated by Agamemnon to Artemis Βολοσία at Geraistos (Prokop. *de bell. Goth.* 4. 22 καίτοι οὐ μονοειδὲς τὸ πλοῖον τοῦτό ἐστιν, ἀλλὰ ἐκ λίθων ὅτι μάλιστα πολλῶν ξύγκειται. καὶ γράμματα ἐν αὐτῷ ἐγκεκόλαπται καὶ διαρρήδην βοᾷ τῶν τινα ἐμπόρων ἐν τοῖς ἄνω χρόνοις ἱδρύσασθαι τὸ ἀνάθημα τοῦτο Διὶ τῷ Κασίῳ. Δία γὰρ Κάσιον ἐτίμων ποτὲ οἱ τῇδε ἄνθρωποι, ἐπεὶ καὶ ἡ πόλις, ἐν ᾗ τὸ πλοῖον τοῦτο ἕστηκεν, ἐς τόνδε τὸν χρόνον Κασώπη (*sic*) ἐπικαλεῖται. κ.τ.λ.).

Autonomous bronze coins of Korkyra from 48 B.C. to 138 A.D. often have for reverse or obverse type the figure of ZEVC KACIOC (occasionally ZEVC KACCIOC) seated on a high-backed throne with a sceptre in one hand and sometimes a *phiale* in the other

Korkyra (?)[1].

Kephallenia

Mount Ainos[2].

(*Brit. Mus. Cat. Coins* Thessaly etc. p. 153 ff. pl. 25, 5 (=my fig. 823), 6—11, *Hunter Cat. Coins* ii. 21 pl. 32, 4, Head *Hist. num.*[2] p. 328). Imperial coppers from Antoninus Pius to Geta (138—222 A.D.) repeat the type with legend ΖΕVC ΚΑCIOC Antoninus Pius, ΚΟΡΚVΡΑΙΩΝ ΚΑCCIOC M. Aurelius, or ΚΟΡΚVΡΑΙΩΝ M. Aurelius to Geta (*Brit. Mus. Cat. Coins* Thessaly etc. p. 158 ff. pl. 26, 1, *Hunter Cat. Coins* ii. 21

Fig. 823.

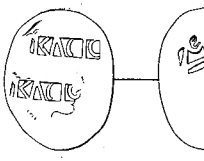

Fig. 824.

no. 53, 23 nos. 65, 67, 72, Head *Hist. num.*[2] p. 328). Coins of Korkyra, Lakedaimon, Knidos, etc. are found countermarked with various abbreviations of the words Διὸς Κασίου and were probably dedicated in his temple (*Brit. Mus. Cat. Coins* Thessaly etc. p. 158 pl. 25, 14 (=my fig. 824) and 15, Babelon *Monn. gr. rom.* i. 1. 647, 676 f.).

Zeus Κάσιος, an oriental deity (Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2265—2267 and A. Salač 'ΖΕΤΣ ΚΑΣΙΟΣ' in the *Bull. Corr. Hell.* 1922 xlvi. 160—189) whose cult had been introduced, perhaps *viâ* Delos (A. Salač *ib.* pp. 165, 189), either from Mt Kasion on the Orontes (*infra* Append. B Syria) or from Mt Kasion near Pelousion (*infra* Append. B Aigyptos), was in Korkyra readily identified with the Zeus of Kassiope, a Hellenic god probably connected with Mt Pantokrator (911m) behind the town. The accidental resemblance of Κάσιος to Κασσιόπη would suffice to ensure his popularity.

[1] Zeus Ὕψιστος (*supra* p. 879 n. 0 no. (12)).

[2] Mt Ainos, the chief mountain of Kephallenia, rises to a height of 1620m and is known as *Elatovouno* or *Monte Nero* from the dark fir-trees with which it was formerly clad (C. Bursian *Geographie von Griechenland* Leipzig 1872 ii. 372). On it was the sanctuary of Zeus Αἰνήσιος (Strab. 456 *μέγιστον δ' ὄρος ἐν αὐτῇ <* Αἶνος (*ins.* Xylander)*>, ἐν ᾧ τὸ* Διὸς Αἰνησίου *ἱερόν*), to whom the Boreadai prayed when pursuing the Harpyiai (schol. Ap. Rhod. 2. 297 *ὅτι δὲ ηὔξαντο οἱ περὶ Ζήτην τῷ Διὶ στραφέντες λέγει καὶ* Ἡσίοδος (*frag.* 57 Rzach) *'ἔνθ' οἵ γ' εὐχέσθην Αἰνησίῳ ὑψιμέδοντι.' ἔστι γὰρ καὶ Αἶνος ὄρος τῆς Κεφαλληνίας, ὅπου* Αἰνησίου Διὸς *ἱερόν ἐστιν· οὗ μνημονεύει καὶ Δέων ἐν Περίπλῳ* (Leon of Byzantion *frag.* 4 (*Frag. hist. Gr.* ii. 330 f. Müller)) *καὶ Δημοσθένης ἐν τοῖς Λιμέσιν* (? Demosthenes of Bithynia (*Frag. hist. Gr.* iv. 384 Müller)). But Müller *op. cit.* ii. 331, iv. 365 emends the text to *οὗ μνημονεύει* Κλέων *ἐν τῷ Περὶ λιμένων καὶ* Τιμοσθένης *ἐν τοῖς Λιμέσιν*. The emendation Κλέων is confirmed by *et. gen. s.v. ἀρετάν·...καὶ* Κλέων *ἐν τῷ Περίπλῳ* (E. Miller *Mélanges de littérature grecque* Paris 1868 p. 41), and Kleon of Syracuse was associated with Timosthenes (*Frag. hist. Gr.* iv. 365 Müller)).

Bronze coins of Pronnoi on the south-eastern coast of Kephallenia, from *c.* 370 B.C. onwards, have *obv.* head of Zeus Αἰνήσιος, laureate, *rev.* a fir-cone, sometimes with twigs (Rasche *Lex. Num.* iv. 1205, *Brit. Mus. Cat. Coins* Peloponnesus p. 89 pl. 18, 7 and 8, Babelon *Monn. gr. rom.* ii. 3. 807 f. pl. 238, 26 and 27, Head *Hist. num.*[2] p. 428).

D. T. Ansted *The Ionian Islands in the year 1863* London 1863 p. 345 f. describes his ascent of Mt Ainos: 'Through a couple of miles of forest of these noble trees, through two or three miles also of hard, granulated snow and some snow recently fallen and very soft, I made my way from the cottage to the top of the mountain. The path is long, but

Sicily

Mount Aitne[1].

nowhere steep. It conducts by a succession of slopes and terraces to the culminating ridge, which is itself of considerable length, and comprises at least half a dozen points of rock, all within twenty feet of the highest point. There is a cairn of stones at the last of these, and the remains of an altar dedicated to Jupiter Enos. Numerous fragments of calcined bones have been taken from the ground at the foot of the altar, where there seems to be a large deposit. This point is not really the highest, being a little to the east of it and ten or fifteen feet lower; the culminating point is about 5,400 feet above the sea. The view from this summit when everything is favourable must be exceedingly grand, as, except the Pindus range which is distant, there is nothing to intercept the view. All around is a rich panorama of islands: Zante at one's feet in all its elegant beauty of form; Ithaca to the east; beyond it a silver strip of ocean, and then the gulf of Patras, which is seen in all its length to the bay of Lepanto, in the vicinity of Corinth. Athens is not much further in the same direction. A noble chain of snowy mountains shuts in this view towards the south east. Looking down in the direction of Argostoli a minute speck is seen in the water. On the island called Διος (Thios), that looks so small, was once a temple to the father of the gods, and when sacrifice was offered and the smoke was seen by the priests stationed at the altar on this summit, another sacrifice was here made, and the curling incense rising from this lofty point in the thin air was a sign, far and wide, of the completion of the offering. Here above remain the stones of the altar and the burnt bones of the bulls and the goats; there below, at a distance of several miles, the more solid and beautiful temple is gone—not one stone remains upon another, and there is nothing but the story, probable enough for that matter, to connect the two localities.'

[1] Aitne, the greatest volcano of the ancient world, rises to a height of 10,758 ft (according to the geodetic survey of 1900) and covers not less than 460 square miles, its base being about 90 miles in circumference (K. Baedeker *Southern Italy and Sicily*[16] Leipzig 1912 p. 423. For full details see W. Sartorius Freiherr von Waltershausen *Der Aetna* herausg. von A. von Lasaulx Leipzig 1880 i. ii.).

On the sea-coast at the southern foot of Mt Aitne lay the old town of Katane. And when in 476/5 B.C. Hieron i drove out its inhabitants, settled in their stead 5000 Syracusans with 5000 Peloponnesians, and renamed the place Aitne (Diod. 11. 49), he seems to have erected there a statue of Zeus Αἰτναῖος and instituted a festival called Αἰτναῖα (schol. Pind. *Ol.* 6. 162a ἐν τῇ Αἴτνῃ Διὸς Αἰτναίου ἄγαλμα ἵδρυται, καὶ ἑορτὴ Αἰτναῖα καλεῖται, *ib.* 162 c περιέπει δὲ καὶ θεραπεύει ὁ Ἱέρων καὶ τὸ κράτος τοῦ Διὸς τοῦ κατὰ τὴν Αἴτνην τιμωμένου, schol. Pind. *Nem.* 6 Διὸς ἕνεκεν τοῦ ἐν τῇ Αἴτνῃ· Διὶ γὰρ ἀνάκειται καὶ οὗτος ὁ ἀγών· ἐν γὰρ τῇ Αἴτνῃ Διὸς ἱερόν ἐστι, *ib.* 7 ἐν τῷ ἀγῶνι καὶ ἐν τῇ πανηγύρει τοῦ Αἰτναίου Διὸς ἦγον οἱ περὶ τὸν Ἱέρωνα τοὺς ἐπὶ τοῖς στεφανίταις ἀγῶσι πεποιημένους ἐπινίκους καὶ ᾠδον. κ.τ.λ.). Accordingly Pindar, in odes composed soon after Hieron's new foundation, dwells on the recently established cult (*Nem.* 1. 6 Ζηνὸς Αἰτναίου χάριν, *Ol.* 6. 96 Ζηνὸς Αἰτναίου κράτος, *Pyth.* 1. 29 f. Ζεῦ, ... | ὃς τοῦτ' ἐφέπεις ὄρος, κ.τ.λ., cp. *Ol.* 4. 6 ὦ Κρόνου παῖ, ὃς Αἴτναν ἔχεις κ.τ.λ.). In 461 B.C. the settlers at Katane, driven out in their turn by Douketios and his Sikeloi, captured the Sikel town Inessa (*S. Maria di Licodia*) on the south-western slope of the mountain and transferred to it the name of Hieron's settlement Aitne (Diod. 11. 76); but whether they transferred thither the cult of Zeus Αἰτναῖος also we do not know. Perhaps they did, for in Roman times it seems to have been widely spread. E. Ciaceri *Culti e miti nella storia dell'antica Sicilia* Catania 1911 pp. 34 f., 145 f. cp. Diod. 34. 10 ὅτι ἡ σύγκλητος δεισιδαιμονοῦσα ἐξαπέστειλεν εἰς Σικελίαν περὶ τοὺς Σιβύλλης χρησμοὺς κατὰ Σιβυλλιακὸν λόγιον· οἱ δὲ ἐπελθόντες καθ' ὅλην τὴν Σικελίαν τοὺς τῷ Αἰτναίῳ Διὶ καθιδρυμένους βωμοὺς θυσιάσαντες, καὶ περιφράγματα ποιήσαντες, ἀβάτους ἀπεδείκνυον τοὺς τόπους πλὴν τοῖς ἔχουσι καθ' ἕκαστον πολίτευμα πατρίους θύειν θυσίας.

The cult at Katane-Aitne is attested by coins of the town, issued from shortly before 476 to shortly before 461 B.C. Silver *Litrai* have *obv.* the head of a bald Silenos, *rev.* a thunderbolt with two curled wings and the legend KATA NE often abbreviated (*Brit.*

Mus. Cat. Coins Sicily p. 42 nos. 8—11, *Hunter Cat. Coins* i. 171 nos. 1—5, G. F. Hill *Historical Greek Coins* London 1906 p. 43 pl. 3, 21, Head *Hist. num.*[2] p. 131) or AIT NAI likewise abbreviated (*Brit. Mus. Cat. Coins* Sicily p. 43 no. 12 fig., nos. 13—16, G. F. Hill *op. cit.* p. 44, Head *Hist. num.*[2] p. 132). And a unique silver tetradrachm in the Hirsch collection at Brussels (*supra* i. 90 f. fig. 62) shows *obv.* AITNA ION the head of a bald Silenos wearing an ivy-wreath (Eur. *Cycl.* 18 ff. Silenos as slave of Polyphemos dwells in a cave on Mt Aitne), with a beetle beneath (Aristoph. *pax* 73 *Αἰτναῖον μέγιστον κάνθαρον* and schol. *ad loc.*), *rev.* Zeus *Αἰτναῖος* sitting on a throne spread with a lion-skin. He is clad in a *himátion*. His right hand rests on a vine-staff (Strab. 269 *ἔχειν τι οἰκείωμα πρὸς τὴν ἄμπελον εἰκὸς τὴν Αἰτναίαν σποδόν*); his left holds a thunderbolt with two curled wings. In the field is an eagle perched on a pine-tree (Diod. 14. 42 *εἰς τὸ κατὰ τὴν Αἴτνην ὄρος ἀπέστειλε γέμον κατ' ἐκείνους τοὺς χρόνους πολυτελοῦς ἐλάτης τε καὶ πεύκης*). On this remarkable coin, which has been taken to represent the cult-statue of Zeus *Αἰτναῖος* (Ziegler in Pauly—Wissowa *Real-Enc.* x. 2475 f.), see further Baron L. de Hirsch in the *Num. Chron.* Third Series 1883 iii. 165 f. pl. 9, 1, B. V. Head *ib.* p. 171 ff., G. F. Hill *Coins of Ancient Sicily* London 1903 p. 74 f. pl. 4, 13, *id. Historical Greek Coins* London 1906 p. 43 ff. pl. 3, 22, G. Macdonald *Coin Types* Glasgow 1905 pp. 94 f., 97 pl. 3, 6, Head *Hist. num.*[2] p. 131 f. fig. 70. The types of the tetradrachm recall the famous scene in Aristoph. *pax* 62 ff., where Trygaios tries to reach Zeus, first by clambering up light ladders towards the sky (*supra* p. 130), and then by mounting an Aetnaean beetle as a sort of Pegasos. Not improbably there were Dionysiac traits in the cult of Zeus on Mt Aitne, as there were in his cult on Mt Olympos (*supra* i. 104 ff.).

There is, however, no evidence of a Zeus-cult on Aitne earlier than *s.* v B.C. Hence the paucity of myths connecting this god with the mountain. Zeus is indeed sometimes said to have piled Aitne on Typhon (Aisch. *P. v.* 351 ff., Pind. *Pyth.* 1. 13 ff., cp. Strab. 626 f.) or on Enkelados (Lucilius (?) *Aetna* 71 ff., Stat. *Theb.* 11. 8, cp. Verg. *Aen.* 3. 578 ff., Opp. *de venat.* 1. 273 ff.); but Typhon is more properly located in the land of Arima (*supra* p. 826) or in the Corycian Cave (*supra* p. 448 n. 2), and Enkelados is commonly described as the victim of Athena, not of Zeus. Again, the Palikoi, autochthonous deities (Polemon *frag.* 83 (*Frag. hist. Gr.* iii. 140 f. Müller) *ap.* Macrob. *Sat.* 5. 19. 26) of the two volcanic springs in the *Lago dei Palici* (*supra* i. 156. See further L. Bloch in Roscher *Lex. Myth.* iii. 1281—1295), were fathered upon Zeus. Aisch. *Αἰτναῖαι frag.* 7 Nauck[2] *ap.* Steph. Byz. *s.v.* Παλική made them the children of Zeus by Thaleia daughter of Hephaistos. *Id. ib. frag.* 6 Nauck[2] *ap.* Macrob. *Sat.* 5. 19. 24 added that Zeus had named them Παλικοί because they would 'come again' from darkness into light. The context in Macrob. *Sat.* 5. 19. 17 ff. preserves the Aeschylean version of their myth. The nymph Thaleia, embraced by Zeus near the Sicilian river Symaithos, became pregnant and, through fear of Hera, prayed that the earth might swallow her. It did so. But in due time it opened up and Thaleia's twin sons the Παλικοί 'came again' to light. The self-transformation of Zeus into a vulture (or eagle?) in order to win the nymph (Rufin. *recognit.* 10. 22 and Clem. Rom. *hom.* 5. 13 (ii. 184 Migne)—both cited *supra* i. 106 n. 2 f.) is a feature of the story, which would have appealed to Aischylos' love of spectacular effect (cp. the vase-painting *supra* i. 105 f. fig. 76). The so-called interpolator of Servius (Donatus?) knows the tale of Zeus and Thaleia, though he is muddle-headed about the eagle. But Servius himself makes the Palikoi the children of Zeus by the nymph Aitne (Serv. *in* Verg. *Aen.* 9. 584 Symaethos fluvius est Siciliae [a rege Symaetho dictus], haud longe ab urbe Carinensi (*leg.* Catinensi), circa quem sunt Palici dei, quorum talis est fabula: Aetnam nympham [vel, ut quidam volunt, Thaliam] Iuppiter cum vitiasset et fecisset gravidam, timens Iunonem, secundum alios ipsam puellam, Terrae commendavit, et illic enixa est. secundum alios partum eius, postea cum de Terra erupissent duo pueri, Palici dicti sunt, quasi iterum venientes. nam *πάλιν ἥκειν* est iterum venire. hi primo humanis hostiis placabantur, postea quibusdam sacris mitigati sunt et eorum immutata sacrificia. inde ergo 'placabilis ara,' quia mitigata sunt eorum numina. [Palicos nauticos deos Varro appellat. alii dicunt Iovem hunc Palicum propter Iunonis iracundiam in aquilam commutasse. alii Vulcani et Aetnae filium tradunt, sed etc.]). Another line of

Akragas[1].

tradition or conjecture speaks of Hephaistos, not Zeus, as father of the Palikoi (Silenos *frag.* 7 (*Frag. hist. Gr.* iii. 101 Müller) *ap.* Steph. Byz. *s.v.* Παλική). Yet another prefers Adranos (Hesych. *s.v.* Παλικοί, cp. Plout. *v. Timol.* 12), the Syrian Hadran (*supra* i. 232 n. 1, ii. 630). It may be surmised that their original connexion was with the Earth rather than with the Sky.

Be that as it may, the cult of Zeus as a mountain-god in the region of Aitne is hardly of great antiquity. The ancient god of the district was the 'Minoan' Kronos (Lyd. *de mens.* 4. 154 p. 170, 6 ff. Wünsch cited *supra* p. 554 n. 3).

[1] Akragas, a joint colony from Rhodes and Gela (C. Hülsen in Pauly—Wissowa *Real-Enc.* i. 1188), had an *akrópolis* named Mt Atabyrion (J. Schubring *Historische Topographie von Akragas in Sicilien während der klassischen Zeit* Leipzig 1870 pp. 21—28 'Die Akropolis'). On the top of it was a sanctuary of Zeus Ἀταβύριος resembling that at Rhodes (Polyb. 9. 27. 7 f. ἐπὶ δὲ τῆς κορυφῆς Ἀθηνᾶς ἱερὸν ἔκτισται καὶ Διὸς Ἀταβυρίου, καθάπερ καὶ παρὰ Ῥοδίοις· τοῦ γὰρ Ἀκράγαντος ὑπὸ Ῥοδίων ἀπῳκισμένου, εἰκότως ὁ θεὸς οὗτος τὴν αὐτὴν ἔχει προσηγορίαν ἣν καὶ παρὰ τοῖς Ῥοδίοις). With Zeus Ἀταβύριος must be identified Zeus Πολιεύς (J. Schubring *op. cit.* p. 24), whose temple on the highest point of the rocky site was built by Phalaris (Polyain. 5. 1. 1 cited *supra* i. 122) in the first half of *s.* vi B.C. Phalaris' famous bull of bronze (Pind. *Pyth.* 1. 95 f., *alib.*) seems to have been the sacred beast of Zeus Ἀταβύριος, the Hellenic successor of a Hittite bull-god (*supra* i. 643 f., cp. 784 f. figs. 567—569. F. Hrozny *Hethitische Keilschrifttexte aus Boghazköi* Leipzig 1919 i. 1 ff. no. 1 a list of Tešub-cults recording a great bull of silver (i, 34 f.) and several great bulls of iron (ii, 12, 24, 34, 41, iii, 2, 8), one of them with gilded eyes (iv, 3)). The Carthaginians, on capturing Akragas (405 B.C.), carried off the bull, which had a trap-door between its shoulders and pipes in its nostrils (Polyb. 12. 25. 3, Diod. 9. 19 *ap.* Tzetz. *chil.* 1. 646 ff.), to Carthage (Polyb. 12. 25. 3, Diod. 13. 90). Timaios, according to one account, denied that the bull at Carthage had come from Akragas, declaring that the Agrigentines had never possessed the like (Tim. *frags.* 116, 117 (*Frag. hist. Gr.* i. 221 f., 222 Müller) *ap.* Polyb. 12. 25. 1 ff., Diod. 13. 90). But, according to another account, he stated that they had flung the original bull into the sea, and that the bull exhibited at Akragas was only an effigy of the river Gelas (Tim. *frag.* 118 (*Frag. hist. Gr.* i. 222 Müller) *ap.* schol. Pind. *Pyth.* 1. 185). Scipio brought the bull back from Carthage to Akragas (Cic. *Verr.* 4. 73, Diod. 13. 90), where it was still to be seen *c.* 60 B.C. (Diod. 13. 90). See further J. Schubring *op. cit.* p. 24 ff., G. Busolt *Griechische Geschichte* Gotha 1893 i[2]. 422 n. 4.

The temple of Zeus Ἀταβύριος οἱ Πολιεύς is in all probability to be sought beneath the Cathedral of S. Gerlando (bishop of Agrigentum; died Feb. 25, 1101 A.D. Cp. *Acta Sanctorum* edd. Bolland. Februarius iii. 592 C (Pirrus e gestis S. Gerlandi) Cathedrale templum quadrato lapide ac nobili structurâ à fundamentis excitavit, illudque D. Mariæ (uti à D. Petro fuerat olim dicatum) & D. Iacobo Apostolo consecravit iv die Aprilis) on the highest part of modern *Girgenti* (C. Hülsen *loc. cit.*). J. Schubring *op. cit.* p. 24 says 'dass S. Gerlando auf den Substruktionen eines alten Tempels erbaut ist und unbedenklich erkläre ich die grossen Stufen und Quaderbauten, die aus dem Boden hervorragen, für antike Reste.' But R. Koldewey—O. Puchstein *Die griechischen Tempel in Unteritalien und Sicilien* Berlin 1899 i. 139, while agreeing that S. Gerlando marks the site of the temple, add: 'Leider ist von diesem Bau des Phalaris, dem einzigen sicilischen Tempel des 6. Jahrhunderts v. Chr., über den wir eine historische Nachricht haben, nichts erhalten.' Excavation may yet find traces of it. The substantial remains of a Doric hexastyle peripteral temple of *s.* v B.C. beneath the neighbouring church of S. Maria de' Greci were published by Domenico lo Faso Pietrasanta Duca di Serradifalco *Le Antichità della Sicilia* Palermo 1836 iii. 86 f. pls. 43, 44 as belonging to the temple of Zeus Πολιεύς, but should rather be identified with the temple of Athena (J. Schubring *op. cit.* p. 26, R. Koldewey—O. Puchstein *op. cit.* i. 140 ff., ii pl. 20).

On a hill (75[m] high) to the west of the so-called *Porta Aurea*, which led through the

southern wall of the lower city towards the sea (Liv. 26. 40), was the vast but unfinished temple of Zeus 'Ολύμπιος (Polyb. 9. 27. 9 καὶ ὁ τοῦ Διὸς τοῦ 'Ολυμπίου νεὼς παντέλειαν (so J. A. Ernesti, followed by F. Hultsch, for πολυτέλειαν codd. F.S. Cluverius cj. συντέλειαν) μὲν οὐκ εἴληφε, κατὰ δὲ τὴν ἐπιβολὴν καὶ τὸ μέγεθος οὐδ' ὁποίου τῶν κατὰ τὴν 'Ελλάδα δοκεῖ λείπεσθαι). When Theron, making common cause with Gelon, had vanquished the huge host of the Carthaginians at Himera (480 B.C.), the Agrigentines used their numerous prisoners of war to hew stone for the construction of their largest temples (Diod. 11. 25). The Olympion must have taken many years to build; indeed, it was not yet roofed when in 405 B.C. Akragas was captured by the Carthaginians, and roofless it remained (Diod. 13. 82). In 255 B.C., during the First Punic War, Karthalon besieged and took Akragas; whereupon the remnant of the population fled for refuge to the Olympion (Diod. 23. 14). This great fabric fell gradually into decay. But part of it, supported by three Giants and certain columns, did not collapse till Dec. 9, 1401 A.D. Hence the arms of *Girgenti* (a turreted wall resting on three naked Giants), the mediaeval line *signat Agrigentum mirabilis aula Gigantum*, and the popular name of the ruins *Palazzo de Giganti* (T. Fazellus *de rebus Siculis* Panormi 1558 p. 127 (dec. 1 lib. 6 cap. 1)). In modern times the temple has served as a public quarry, the mole of *Porto Empedocle* being built of its blocks (1749—1763 A.D.) (R. Koldewey—O. Puchstein *op. cit.* i. 154).

There is a detailed account of the Olympion in Diod. 13. 82 ἥ τε γὰρ τῶν ἱερῶν κατασκευὴ καὶ μάλιστα ὁ τοῦ Διὸς νεὼς ἐμφαίνει τὴν μεγαλοπρέπειαν τῶν τότε ἀνθρώπων· τῶν μὲν οὖν (so F. Vogel for γὰρ codd.) ἄλλων ἱερῶν τὰ μὲν κατεκαύθη, τὰ δὲ τελείως κατεσκάφη διὰ τὸ πολλάκις ἠλωκέναι τὴν πόλιν, τὸ δ' (so F. Vogel for δ' οὖν codd.) 'Ολύμπιον μέλλον λαμβάνειν τὴν ὀροφὴν ὁ πόλεμος ἐκώλυσεν· ἐξ οὗ τῆς πόλεως κατασκαφείσης οὐδέποτε ὕστερον ἴσχυσαν 'Ακραγαντῖνοι τέλος ἐπιθεῖναι τοῖς οἰκοδομήμασιν. ἔστι δὲ ὁ νεὼς ἔχων τὸ μὲν μῆκος πόδας τριακοσίους τεσσαράκοντα, τὸ δὲ πλάτος <ἑκατὸν (ins. T. Kidd, J. Schubring) > ἐξήκοντα, τὸ δὲ ὕψος ἑκατὸν εἴκοσι χωρὶς τοῦ κρηπιδώματος. μέγιστος δ' ὢν τῶν ἐν Σικελίᾳ καὶ τοῖς ἐκτὸς οὐκ ἀλόγως ἂν συγκρίνοιτο κατὰ τὸ μέγεθος τῆς ὑποστάσεως· καὶ γὰρ εἰ μὴ τέλος λαβεῖν συνέβη τὴν ἐπιβολήν, ἥ γε προαίρεσις (so J. J. Reiske for προδιαίρεσις codd.) ὑπάρχει φανερά. τῶν δ' ἄλλων ἢ μέχρι τοίχων (sic codd. J. J. Reiske cj. μετὰ τοίχων. L. Dindorf cj. μέχρι θριγκῶν. F. Vogel cj. μέχρι τεγῶν vel συνεχεῖ τοίχῳ) τοὺς νεὼς οἰκοδομούντων ἢ κύκλῳ κίοσι (so P. Wesseling, followed by F. Vogel, for ἢ κύκλωσις or κυκλώσει codd. Stephanus cj. ἢ κίοσι) τοὺς σηκοὺς (so J. J. Reiske, followed by F. Vogel, for οἴκους codd. Stephanus cj. τοίχους) περιλαμβανόντων, οὗτος ἑκατέρας τούτων μετέχει τῶν ὑποστάσεων· συνῳκοδομοῦντο γὰρ τοῖς τοίχοις οἱ κίονες (so L. Dindorf for οἱ τοῖχοι τοῖς κίοσιν codd.), ἔξωθεν μὲν στρογγύλοι, τὸ δ' ἐντὸς τοῦ νεὼ ἔχοντες τετράγωνον· καὶ τοῦ μὲν ἐκτὸς μέρους ἔστιν αὐτῶν ἡ περιφέρεια ποδῶν εἴκοσι, καθ' ἣν εἰς τὰ διαξύσματα δύναται ἀνθρώπινον ἐναρμόζεσθαι σῶμα, τὸ (L. Dindorf cj. τοῦ) δ' ἐντὸς ποδῶν δώδεκα. τῶν δὲ στοῶν τὸ μέγεθος καὶ τὸ ὕψος ἐξαίσιον ἐχουσῶν, ἐν μὲν τῷ πρὸς ἕω μέρει τὴν Γιγαντομαχίαν ἐποιήσαντο γλυφαῖς (so L. Dindorf for ταῖς γλυφαῖς codd. F.K. ταῖς τε γλυφαῖς cett. codd.) καὶ τῷ μεγέθει καὶ τῷ κάλλει διαφερούσαις (so L. Dindorf for διαφερούσας codd. P.A.K. διαφέρουσαν cett. codd.), ἐν δὲ τῷ πρὸς δυσμὰς τὴν ἅλωσιν τῆς Τροίας, ἐν ᾗ τῶν ἡρώων ἕκαστον ἰδεῖν ἔστιν οἰκεῖως τῆς περιστάσεως δεδημιουργημένον.

The temple, of which substantial remains still strew the ground, was a Doric pseudo-peripteral building with seven half-columns on the short side and fourteen half-columns on the long side. These columns (lower diameter 4·30^{m}, upper diameter 3·10^{m}), engaged externally in the wall of the *naós*, appear internally as rectangular pilasters. If completed, they would have the normal number of twenty flutes, flutes of so vast a size (0·55^{m} broad) that a man can easily stand in each as in a niche. Beneath the half-column is a moulded base, which is continued along the intercolumniation-wall as a moulded plinth. The stylobate, of four steps surmounted by a projecting cornice, rests on a stereobate measuring 113·45^{m} × 56·30^{m}. The architrave (3·20^{m} high) was formed of three superposed courses of stone. The metopes were single slabs left plain. The pediments were filled with groups representing the Gigantomachy at the eastern end and the capture of Troy at the western end (a few fragments only preserved). The building was throughout of yellowish shell-limestone covered with a fine skin of stucco and decorated with the usual patterns in paint.

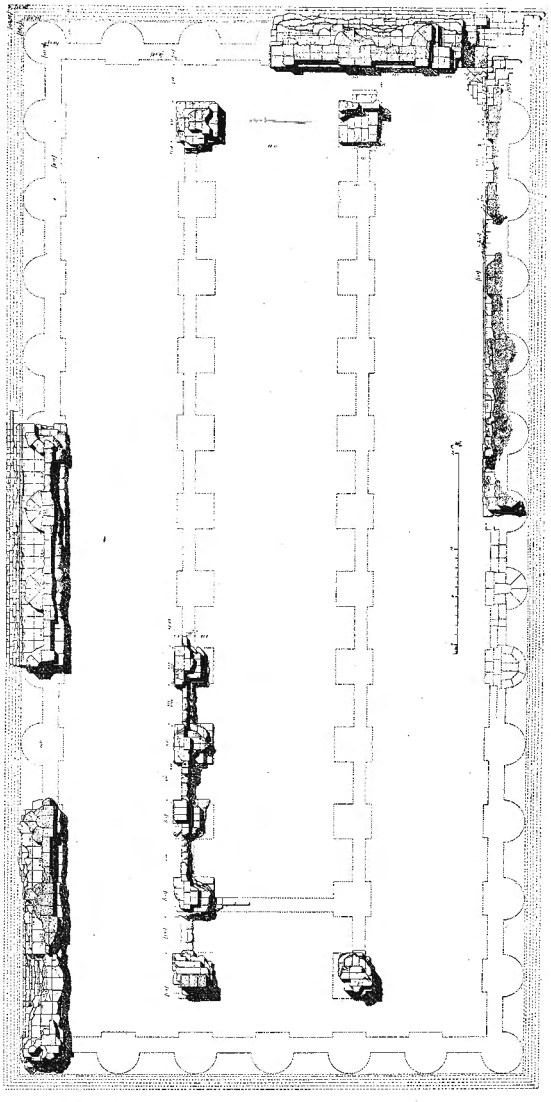

Fig. 825.

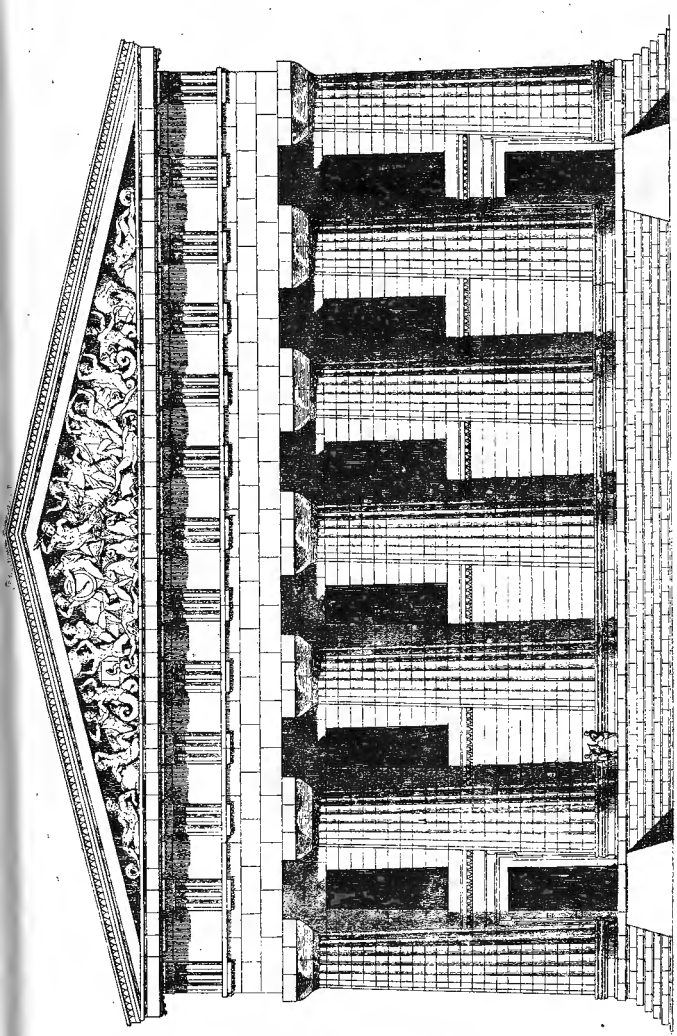

Fig. 826.

Inside, the *naós* (101·16^{m} × 44·01^{m}) is divided into a nave and two side-aisles by means of two parallel walls, each of which has twelve square pillars engaged in it and forming a series of lateral niches. A cross-wall towards the western end is extant for part of its length. The great altar, as broad as the temple itself, was situated in front of the eastern *façade* at a distance of 50·8^{m}.

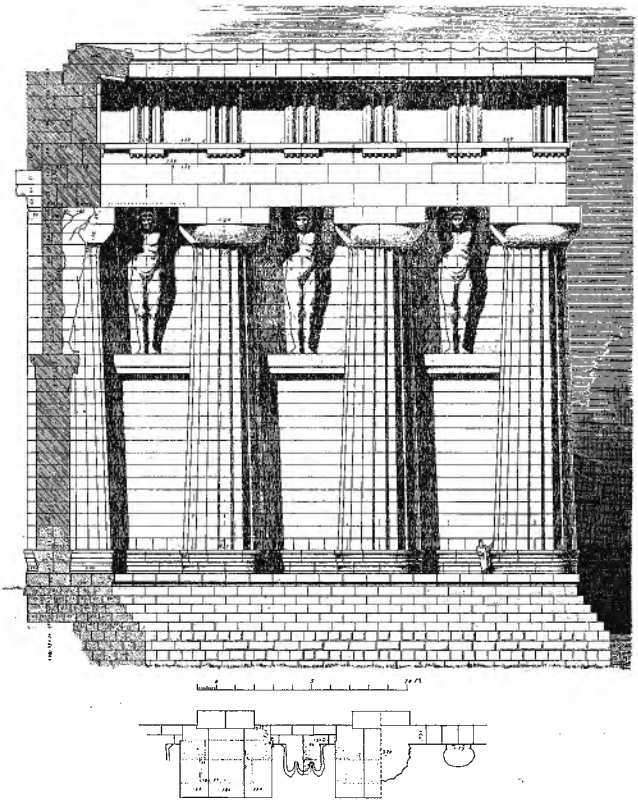

Fig. 827.

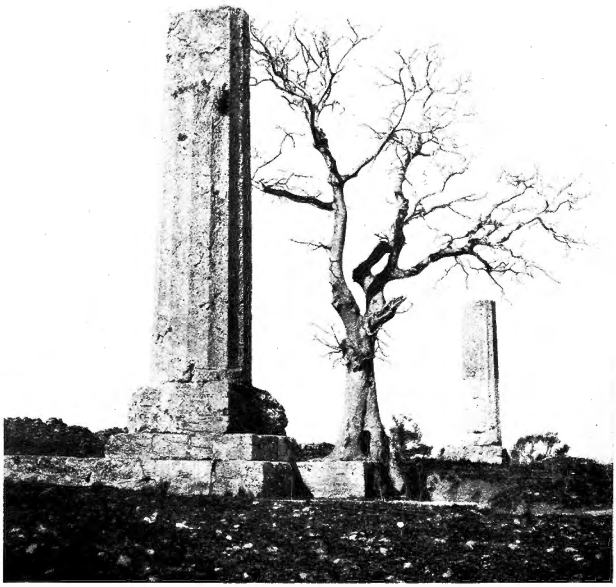
Several points are still unsettled. (1) The temple was in all probability entered at the eastern end through the two outermost intercolumniations (C. R. Cockerell, R. Koldewey—O. Puchstein), not at the western end through a large central doorway (Serradifalco, A. Holm). But it is not clear whether we should assume the existence of two ramps leading up to the side-entries (C. R. Cockerell). (2) The two walls dividing the *naós* into



The Olympieion at Syracuse.

See page 915 *n.* 2.

Akrai[1].
Syracuse[2].

nave and aisles were either prolonged to meet the western wall of the temple, in which case the cross-wall marked the beginning of an inner sanctuary or *ádyton* (R. Koldewey—O. Puchstein), or stopped before reaching the western wall, in which case the cross-wall marked the beginning of an *opisthódomos* (C. R. Cockerell, Serradifalco, J. Durm, G. Perrot—C. Chipiez). (3) Many sections of huge Atlantes (7·68m high) have been found in the temple, and one reconstructed Atlas now lies on his back within the building. But they are not mentioned by Diodoros, and their original position has been much debated. C. R. Cockerell (1830) supposed that they stood above the pillars of the nave, supporting on their upturned arms an entablature intended to carry the transverse beams of the roof. Serradifalco (1836) was inclined to place them against the pillars of the nave, but at a lower level. J. Durm (1892), G. Perrot—C. Chipiez (1898), and A. Choisy (1898) reverted to the position advocated by Cockerell. But R. Koldewey—O. Puchstein (1899), observing that the southern wall of the temple had fallen outwards and that its ruins included several blocks belonging to Atlantes, proposed a fresh reconstruction according to which these gigantic figures were placed high up in the external intercolumniations, each standing on a cornice and supporting the architrave above his head. J. Durm (1910) finally accepted Puchstein's restoration in preference to his own. (4) Koldewey and Puchstein speak of Atlantes and Caryatids. The existence of the latter is inferred, partly from the survival of a single apparently female head (Serradifalco *op. cit.* iii pl. 25, 2), partly from the fact that the arms of *Girgenti* figure one female standing between two male Giants—Fama between Enceladus and Caeus (Serradifalco *op. cit.* iii. 3 fig.).

See further C. R. Cockerell in J. Stuart—N. Revett *Antiquities of Athens and other places in Greece Sicily etc.* London 1830 iv. 1—10 with frontispiece, vignette, and pls. 1—8 (my fig. 826 is from part of pl. 2), Serradifalco *op. cit.* iii. 52—69 with pls. 20—27, Durm *Baukunst d. Gr.*[2] p. 210 f. figs. 138—140 and Index p. 368, *ib.*[3] pp. 104 fig. 72, 141 fig. 112, 401—406 figs. 369—372, 428 with fig. 389, Perrot—Chipiez *Hist. de l'Art* vii. 400 f. pl. 18 and Index p. 673, R. Koldewey—O. Puchstein *op. cit.* i. 153—166 with figs. 134—144 (my fig. 827 is from their fig. 143), ii pls. 22 and 23, B. Pace 'Il tempio di Giove Olimpico in Agrigento' in the *Mon. d. Linc.* 1922 xxviii ('in corso di stampa').

[1] Zeus 'Ακραῖος (*supra* p. 873 n. o no. (11)).

[2] On a hill (60 ft. high) half-surrounded by the *Fiume Ciani* and overlooking the *Porto Grande* of Syracuse stand two weather-worn columns on a broken stylobate—all that today remains of the once famous temple of Zeus 'Ολύμπιος. This was a Doric peripteral structure of coarse shell-limestone. It had six columns at either end and seventeen down either side, being about three times as long as it was broad. The columns were short and thick: one, without a capital, measures *c.* 6·50m in height and *c.* 1·85m in diameter. They were monolithic and had no *éntasis*. The flutes were sixteen in number; and round the foot ran a small unfluted band, a feature possibly derived from the circular stone base of a timber prototype. Cornice and gutter were embellished with a revetment of painted terra cotta. The roofing was of large flat tiles and round cover-tiles. In short, the building shows every sign of archaism and must be dated *c.* 600 B.C. It is thus one of the earliest of all Greek temples and quite the oldest surviving temple of Zeus.

It has been supposed that the cult at Syracuse was descended from the cult at Olympia (R. Koldewey—O. Puchstein *Die griechischen Tempel in Unteritalien und Sicilien* Berlin 1899 i. 59). But this is far from clear. No doubt the rulers of Syracuse made repeated dedications in the Olympian *Altis* (Paus. 6. 12. 1 ff., 6. 19. 7, *Olympia* v. 363 ff. no. 249, 675 f. no. 661). But is it likely that the filial cult dignified the god with a stone-built temple more than a century before the parent followed suit? I would rather assume (with E. Ciaceri *Culti e miti nella storia dell' antica Sicilia* Catania 1911 p. 138) that the Syracusans brought the cult from their *metrópolis* Corinth. For just outside Corinth, on the left of the road leading to Sikyon, Pausanias noted a temple which had been burnt down. Some said that it belonged to Apollon and had been fired by Pyrrhos son of

Achilles; others, that it was the temple of Zeus Ὀλύμπιος and had been accidentally burnt (Paus. 2. 5. 5)—an ominous occurrence which deterred the Corinthians from joining the expedition of Agesilaos against Artaxerxes Mnemon in 396 B.C. (Paus. 3. 9. 2). Of the burnt temple, if I am not mistaken, sundry fragments still subsist. An archaic column-drum and architrave-block of limestone, built into the wall of a late edifice some 500^{m} to the north of the 'Old Temple,' are attributed by W. Dörpfeld to an ancient Doric fane of even larger size. They resemble in dimensions (cp. W. M. Leake *Travels in the Morea* London 1830 iii. 247 f.) the corresponding members of the temple of Zeus at Olympia. Dörpfeld suggested that they came from the temple of Apollon mentioned by Paus. 2. 3. 6 (W. Dörpfeld in the *Ath. Mitth.* 1886 xi. 307 f.). But, thanks to the excavations of the American School, we now know that this temple of Apollon is none other than the extant 'Old Temple' (R. B. Richardson in the *Am. Journ. Arch.* 1897 i. 464, 1900 iv. 225 f., B. Powell 'The Temple of Apollo at Corinth' *ib.* 1905 ix. 51, 53). Accordingly I should conjecture that the archaic drum and architrave really came from the temple of Zeus Ὀλύμπιος on the left of the Sicyonian road, and that this was in fact the parent of the Syracusan Olympieion. Further excavation will some day test the accuracy of my surmise.

Whatever its precise pedigree, the Syracusan sanctuary was held in high esteem. Here were preserved the tribal lists of Syracuse (Plout. *v. Nic.* 14), and in the *formula* of the civic oath Zeus Ὀλύμπιος took precedence of all other deities except the venerable goddess of hearth and home (*Inscr. Gr. Sic. It.* no. 7 ii, 6 ff. in lettering later than the time of Hieron ii *ὅρκιον βουλᾶς κα[ὶ ἀρχόντων (?)] | καὶ τῶν ἄλλων [πολιτᾶν·] | ὁμνύω τὰν Ἰστίαν τῶ[ν Συρακοσίων καὶ τὸν Ἅ]ϝηα] | τὸν Ὀλύμπιον καὶ τὰν [. . . . . καὶ τὸν] | Ποσει-δ[ῶνα – – –]*). Moreover, for some three hundred years the *ἀμφίπολος* or priest of Zeus Ὀλύμπιος was eponymous magistrate of the city (Diod. 16. 70 *κατέστησε δὲ* (*sc.* Timoleon in 343 B.C.) *καὶ τὴν κατ' ἐνιαυτὸν ἐντιμοτάτην ἀρχήν, ἣν ἀμφιπολίαν Διὸς Ὀλυμπίου οἱ Συρακούσιοι καλοῦσι. καὶ ἠρέθη πρῶτος ἀμφίπολος Διὸς Ὀλυμπίου Καλλιμένης, καὶ τὸ λοιπὸν διετέλεσαν οἱ Συρακούσιοι τοὺς ἐνιαυτοὺς ἐπιγράφοντες τούτοις τοῖς ἄρχουσι μέχρι τῶνδε τῶν ἱστοριῶν γραφομένων καὶ τῆς κατὰ τὴν πολιτείαν ἀλλαγῆς. τῶν γὰρ Ῥωμαίων μεταδόντων τοῖς Σικελιώταις τῆς πολιτείας* (*sc.* in 44 B.C.) *ἡ τῶν ἀμφιπόλων ἀρχὴ ἐταπεινώθη, διαμείνασα ἔτη πλείω τῶν τριακοσίων*). Every year three candidates, chosen by vote from three clans (*ex tribus generibus*, on which see E. Ciaceri *op. cit.* p. 136 n. 1), cast lots for the office of priest—a rule of succession which was jealously guarded (Cic. *in Verr.* 2. 2. 126 f., cp. 2. 4. 137).

Round the temple grew up a settlement known as Πολίχνα or 'Small Town' (Thouk. 7. 4, Diod. 13. 7, 14. 72), which, never permanently fortified by the Syracusans, was frequently occupied by forces attacking their city.

Hippokrates tyrant of Gela, after vanquishing the Syracusans in the battle on the Heloros (493/2 B.C.), encamped in the sanctuary of Zeus. Having caught the priest and certain Syracusans trying to carry off various votive offerings of gold and in particular the golden *himátion* of Zeus, he taxed them with sacrilege, bade them depart to the city, and would not himself lay hands on the sacred objects (Diod. 10. 28). Others, however, state that the golden *himátion*, which weighed no less than 85 talents (Ail. *var. hist.* 1. 20), was dedicated by Gelon or Hieron after the battle of Himera in 480 B.C. and carried off by Dionysios i (405—367 B.C.), who left a woollen one in its stead with the caustic remark that in summer it would be lighter and in winter warmer wear (Cic. *de nat. deor.* 3. 83 (where *ad Peloponnesum* etc. is due to an obvious confusion), Val. Max. 1. 1. ext. 3, Lact. *div. inst.* 2. 4). The jest is attributed sometimes to Dionysios ii (367—343 B.C.) (Clem. Al. *protr.* 4. 52. 2 p. 40, 18 ff. Stählin, Arnob. *adv. nat.* 6. 21). If these tales are to be trusted, it would seem that Zeus Ὀλύμπιος at Syracuse had a golden *himátion* long before 438 B.C., the year in which Pheidias began his chryselephantine Zeus at Olympia (*supra* p. 757).

The Athenians, when attacking Syracuse in 415 B.C., landed near the Olympieion and encamped there (Thouk. 6. 64 f.). After the fight the Syracusans, though defeated, sent men to guard the Olympieion, lest its treasures should be plundered by the Athenians (Thouk. 6. 70). But the Athenians returned to Katane, and did not go to the sanctuary

Tyndaris[1].

(Thouk. 6. 71), or, if they did, disturbed none of the votive offerings and left the Syracusan priest in charge of them (Paus. 10. 28. 6). That same winter the Syracusans put a garrison in the Olympieion and erected a stockade on the sea-shore to prevent a possible landing (Thouk. 6. 75). In the following year (414 B.C.) a third part of the Syracusan cavalry was posted at Polichna to control the movements of the Athenians at Plemmyrion (Thouk. 7. 4).

Again, in 396 B.C. Himilkon, on his expedition against Dionysios i, took up his quarters in the temple and encamped his forces near by, at a distance of twelve stades from the city (Diod. 14. 62 f.). But Dionysios captured Polichna by storm and in turn pitched his camp at the sanctuary (Diod. 14. 72 and 74).

In 345 B.C. Hiketas tyrant of Leontinoi, in the course of his operations against Dionysios ii, fortified the Olympion with a palisade (Diod. 16. 68).

In 309 B.C. Hamilkar son of Geskon, again with a view to attacking Syracuse, seized *τοὺς περὶ τὸ Ὀλύμπιον τόπους* (Diod. 20. 29).

In 214 B.C. the Romans, who under M. Claudius Marcellus were then besieging Syracuse, likewise encamped *ad Olympium—Iovis id templum est—mille et quingentos passus ab urbe* (Liv. 24. 33).

The Olympieion was, in fact, a constant centre of military activity. Hence, when we read that Verres at Syracuse carried off *ex aede Iovis religiosissimum simulacrum Iovis Imperatoris, quem Graeci Οὔριον nominant, pulcherrime factum* (Cic. *in Verr.* 2. 4. 128, *supra* p. 708), I am inclined to think that the masterpiece in question was a votive figure in the temple of Zeus Ὀλύμπιος, whose position enabled him to control winds and wars alike, rather than a cult-statue erected in some hypothetical temple believed to have stood near the shore adjoining the *empórion* of Achradine (R. Koldewey—O. Puchstein *op. cit.* i. 57).

See further T. Fazellus *de rebus Siculis* Panormi 1558 p. 107 (dec. 1 lib. 4 cap. 1 'Templum hoc prostratum est hodie. Cuius iacentes plures, & erectæ quædam cernuntur columnæ, sed præterea nihil'), V. Mirabella *Dichiarazioni della pianta dell' antiche Siracuse*, etc. Napoli 1613 p. 72 f. ('Di questo Tempio appariscono oggi nõ picciole reliquie, sendovi anco in piede molte colonne scannellate di lavor dorico'), P. Cluverius *Sicilia antiqua*; etc. Lugduni Batavorum 1619 p. 179 ('Exstant hodiéq; eius fani...VII reliquæ columnæ prægrandes, cum aliis quadratorum saxorum fragmentis'), J. Houel *Voyage pittoresque des isles de Sicile, de Malte et de Lipari* Paris 1785 iii. 95 f. pl. 192 (view of remains visible in 1770: 'Il y avoit alors plusieurs colonnes renversées par terre, avec les chapiteaux: deux seules colonnes étoient encore debout; mais elles n'avoient plus de chapiteaux'), Serradifalco *op. cit.* iv. 153 f. pls. 28 (view) and 29 (plan, elevation), F. S. Cavallari—A. Holm *Topografia archeologica di Siracusa* Palermo 1883 pp. 24, 53 f., 104, 166 ff., 263 f., 283, 327, 379 f., R. Koldewey—O. Puchstein *op. cit.* i. 58—60, 66—68, ii pl. 8 (careful ground-plan), P. Orsi 'L'Olympieion di Siracusa' in the *Mon. d. Linc.* 1903 xiii. 369—392 with figs. 1—6 and pl. 17 (=my pl. xli), E. Ciaceri *op. cit.* p. 136 ff.

Another handsome temple of Zeus Ὀλύμπιος was founded by Hieron ii in the *Agorá* of Achradine (Diod. 16. 83, Cic. *in Verr.* 2. 4. 119). The Gallic and Illyrian spoils presented to Hieron by the people of Rome (Plout. *v. Marc.* 8) were hung in this temple, but were commandeered by the insurgents under Theodotos and Sosis in 214 B.C. (Liv. 24. 21). The central *kerkís* of the Syracusan theatre bears the name of Zeus Ὀλύμπιος (*Inscr. Gr. Sic. It.* no. 3, 5 Δ Ι Ο Σ Ο Λ Υ Μ Π Ι Ο Υ 'litteris cubitalibus,' cp. M. Bieber *Die Denkmäler zum Theaterwesen im Altertum* Berlin—Leipzig 1920 pp. 49 f., 86, 181) in allusion to the god of Hieron's new temple (F. S. Cavallari—A. Holm *op. cit.* p. 287, R. Koldewey—O. Puchstein *op. cit.* i. 57).

[1] Coppers of Tyndaris struck *c.* 254—210 B.C. or later have sometimes *obv.* a female head (Tyndaris) with *stephánē* or corn-ear (?) and veil, *rev.* ΤΥΝΔΑΡΙΤΑΝ Zeus, half-draped, standing to left, with a thunderbolt in his outstretched right hand and a transverse sceptre in his left (F. von Duhn in the *Zeitschr. f. Num.* 1876 iii. 30 no. 7, cp.

Naxos
Mount Drios[1].

Paros
Mount *Kounádos*[2].

Delos
Mount Kynthos[3].

Rasche *Lex. Num.* x. 527); or *obv.* head of Zeus, laureate, to right, *rev.* ΤΥΝΔΑΡΙΤΑΝ the Dioskouroi standing with, or without, their horses (F. von Duhn *loc. cit.* p. 30 no. 10, p. 30 f. no. 11, *Brit. Mus. Cat. Coins* Sicily p. 236 nos. 9 and 10); or *obv.* head of Zeus, laureate, to right, with star of eight rays behind it, *rev.* ΤΥΝΔΑΡΙΤΑΝ eagle to right, standing with open wings on a thunderbolt (F. von Duhn *loc. cit.* p. 31 no. 12, *Brit. Mus. Cat. Coins* Sicily p. 236 no. 11). See further Imhoof-Blumer *Monn. gr.* p. 33 f., G. F. Hill *Coins of Ancient Sicily* London 1903 p. 201 f., Head *Hist. num.*[2] p. 190. These coins imply the cult, not only of Tyndaris (Helene) and the Tyndaridai (Kastor and Polydeukes), but also of Zeus to whom the children of Tyndareos were early affiliated (*supra* i. 279 f., 780).

Among the ruins of Tyndaris (for which see Serradifalco *op. cit.* v. 48 ff. pls. 29—35) was found a colossal statue of Zeus, finely carved in Greek marble. It is now in the *Cortile Grande* of the Museo Nazionale at Palermo. The head, right arm, left leg, and lower part of right leg were restored by the local sculptor Villareale. But enough of the original remains to show that Zeus stood erect, his right arm raised to hold a long spear or sceptre, his left wholly enveloped in the *himátion* that covered him from the waist downwards. W. Abeken 'Giove Imperatore ossia Urio' in the *Ann. d. Inst.* 1839 xi. 62—72 pl. A, 1—3 justly compared the figures of Zeus Στρατηγός on a coin of Amastris (*supra* p. 707 fig. 639) and of Zeus Οὔριος on a coin of Syracuse (*supra* p. 708 fig. 643)—a comparison accepted by Overbeck *Gr. Kunstmyth.* Zeus pp. 130—132 no. 25 fig. 12, who ranges the statue from Tyndaris with another colossal statue in the Louvre (Clarac *Mus. de Sculpt.* iii. 42 pl. 311 fig. 683) as forming the first group of his 'Vierte Classe.' Probably the inhabitants of Tyndaris had dedicated to Zeus a copy of the Syracusan masterpiece carried off by Verres (*supra* pp. 708, 917 n. 0).

The temple of the god is said to have stood on a steep height to the west of the town, which in 1558 A.D. was still known as the Mount of Jove (T. Fazellus *de rebus Siculis* Panormi 1558 p. 205 (dec. 1 lib. 9 cap. 7) 'Extra vrbem occidentem versus, in colle vicino, & vndiq; præciso, qui ab accolis adhuc hodie mons Iouis appellatur, templi Iouis mirabiles cernuntur ruinæ').

[1] Zeus Μηλώσιος (*supra* i. 164 f., 520 n. 2). F. Solmsen in *Glotta* 1909 i. 80 connects Zeus Μηλώσιος with **μηλώτης*, Ep. Hesych. *s.vv. μηλατάν· τὸν ποιμένα.* Βοιωτοί and *μηλόται· ποιμένες* (on which glosses see M. Schmidt *ad locc.*). Different is Zeus Μήλιος on an imperial copper of Nikaia in Bithynia (P. Piovene *I Cesari in metallo mezzano e piccolo raccolti nel Museo Farnese* Parma 1724 ix. 238 pl. 8, 21, Mionnet *Descr. de méd. ant.* Suppl. v. 84 no. 427 (in the Farnese collection) *obv.* ..... [3] Mt Kynthos in the centre of Delos is a granitic cone, which rises to a height of 112·60m (*Délos* i pl. 1. View from the west *ib.* iv. 1 fig. 1). Strab. 485 describes it as *ὄρος ὑψηλὸν...καὶ τραχύ*, where G. Kramer alters *ὑψηλόν*, 'high,' into *ψιλόν*, 'bare.' It is true that the granite and gneiss, of which the mountain is composed (geological detail in *Délos* iv. 1), do not afford the earth required by tree-roots. But, for all that, *ὑψηλόν* is correct: Kynthos, partly because of its dominating position, partly because of its proximity

to the sea, looks more of a mountain than it really is (*Délos* iv. 1. 196 f.). On the summit is a small plateau, which commands a magnificent view of the Kyklades. When I visited the spot in 1901, it was carpeted with crimson anemones and surrounded by stretches of azure sea.

Here in antiquity was the precinct of Zeus Κύνθιος and Athena Κυνθία (L. Bürchner in Pauly—Wissowa *Real-Enc.* iv. 2473) first excavated by Lebègue in 1873 (J. A. Lebègue *Recherches sur Délos* Paris 1876 pp. 127—172 with plan on p. 127 (=my fig. 828) and list of inscriptions from the sanctuary). Three separate roads (A, B, C), probably processional paths bordered with *stêlai* and statues, led up to the western side of the precinct, where was a gateway (E). Within was a rocky elevation (F) with cuttings for votive slabs etc. (G). The plateau was enclosed by a precinct-wall (I), much of which remains standing on the north, west, and east. At its south-eastern corner was a small temple (S) of late date.

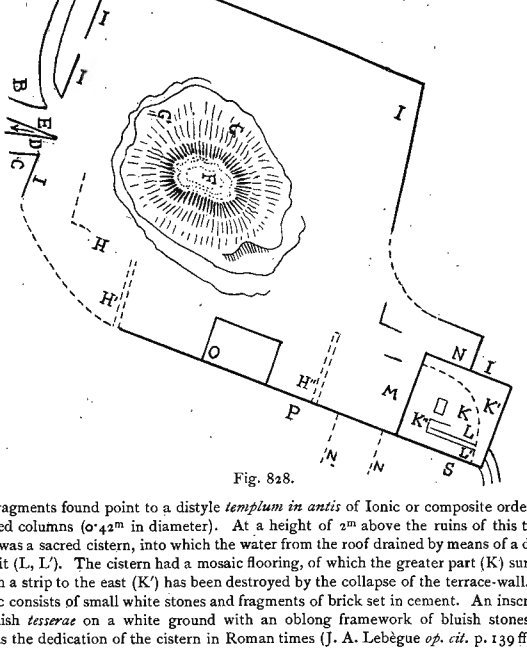

Fig. 828.

The fragments found point to a distyle *templum in antis* of Ionic or composite order with unfluted columns (0·42^{m} in diameter). At a height of 2^{m} above the ruins of this temple there was a sacred cistern, into which the water from the roof drained by means of a double conduit (L, L'). The cistern had a mosaic flooring, of which the greater part (K) survives, though a strip to the east (K') has been destroyed by the collapse of the terrace-wall. The mosaic consists of small white stones and fragments of brick set in cement. An inscription in bluish *tesserae* on a white ground with an oblong framework of bluish stones (K'') records the dedication of the cistern in Roman times (J. A. Lebègue *op. cit.* p. 139 ff. no. 1 Διὶ Κυνθίῳ καὶ Ἀθηνᾷ Κυνθίᾳ | Ἀπολλωνίδης Θεογείτονος | Λαοδικεύς, ὑπὲρ ἑαυτοῦ καὶ | τῶν ἑταίρων, τὸ κατάκλυσ|τον ('cistern'), ἐπὶ ἱερέως Ἀριστομάχου, | ζακορεύοντος Νικηφόρου (after 88/7 B.C.), | ἐπὶ δὲ ἐπιμελητοῦ Κοΐντου Ἀζη(νιέως). My fig. 829 is from photograph no. 1302 in the collection of the Society for the Promotion of Hellenic Studies). Adjoining the cistern was a platform (N), where ashes and fragments of bone, the *débris* of sacrifices,

were buried. South of the rocky summit was an enclosure (O) walled in on the north by blocks of schist, on the other sides by architectural fragments, *stêlai*, and broken statues. It contained some thirty urns filled with ashes and animal bones. The urns measured 0·60^{m} to 0·70^{m} in height, having rounded handles and a foot, not a pointed base. Miscellaneous finds included a small terra-cotta palmette from the pediment of an *aedicula*, a

Fig. 829.

colossal hand in Pentelic marble apparently holding a thunderbolt (Zeus Κύνθιος?), a small head in Parian marble (Apollon?), the lower half of a sun-dial, several altars large and small (two decorated with *bucrania* and inscriptions were found at some distance from the temple: J. A. Lebègue *op. cit.* pp. 137, 166 f. nos. 21, 22), etc.

The history of the sanctuary has been well worked out from inscriptions by P. Roussel *Délos Colonie athénienne* Paris 1916 pp. 223—228, 290 f., 335, 434 f., whose results are here summarised (with a few additions in square brackets).

Zeus and Athena, though their association on *akropóleis* etc. is old (Gruppe *Gr. Myth. Rel.* p. 1217 f.), were not the original occupants of the summit. [In 'Minoan' times it was probably tenanted by the sky-father (Kronos) and the earth-mother (Rhea), the cave-temple beneath it (J. A. Lebègue *op. cit.* p. 49 ff. pls. 1, 2) being a Delian parallel to the sacred caves of Mt Dikte and Mt Ide. The cult of Kronos, however, has left no trace, unless we can claim as such a broken sherd bearing the letters KPO, which was found buried in charcoal under a limestone slab outside the south-west angle of the cave-temple (J. A. Lebègue *op. cit.* p. 65 f.). Rhea presumably had lions; and in this connexion it should be noted, not only that the late marble statue of a youthful god (Apollon?) erected on the ancient granite libation-table (?) of the cave-temple had a tree-support covered with a lion-skin (J. A. Lebègue *op. cit.* pp. 60, 63 ff.), but also that a whole row of lions in Naxian marble, comparable with the lions of Branchidai (*Brit. Mus. Cat. Sculpture* i. 22 f. nos. 17 and 18: no. 17 has on its back a *βουστροφηδόν* dedication to Apollon in lettering of early *s.* vi B.C. (Roehl *Inscr. Gr. ant.* no. 483, Roberts *Gr. Epigr.* i. 161 f. no. 133, Michel *Recueil d'Inscr. gr.* no. 1206, Dittenberger *Syll. inscr. Gr.*^{3} no. 3*a*)) and Thera (F. Hiller von Gaertringen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1899 xiv Arch. Anz. p. 183 f., *id. Die Insel Thera* Berlin 1904 iii. 28 figs. 16 and 17, 57 regards as a gift to Apollon the marble lion, bearing a mutilated inscription of *s.* vii B.C. (*Inscr. Gr. ins.* iii Suppl. no. 1380), which stood on a terrace overlooking the *Agorá* and was later copied

by Artemidoros (*infra*)), adorned a terrace west of the *Límne Trochoeidés* (P. Leroux in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1907 pp. 348—353, *ib.* 1908 plan opposite to p. 162). Apparently Rhea had, here as elsewhere (Clem. Al. *protr.* 4. 47. 4 p. 36, 6 ff. Stählin *μηδ' (sc. ἀμφιβάλλητε) εἰ τὰ ἐν Πατάροις τῆς Λυκίας ἀγάλματα Διὸς καὶ Ἀπόλλωνος Φειδίας πάλιν ἐκεῖνος [τὰ ἀγάλματα] καθάπερ τοὺς λέοντας τοὺς σὺν αὐτοῖς ἀνακειμένους εἴργασται· εἰ δέ, ὥς φασί τινες, Βρυάξιος ἡ τέχνη, οὐ διαφέρομαι· κ.τ.λ.*, *Inscr. Gr. ins.* iii Suppl. no. 1346 the rock-cut relief of a lion inscribed in *s.* iii B.C. (*supra* i. 117 n. 1) *a'* Ἀπόλλωνι | Στεφανηφόρωι, *b* [τ]εῦξ[ε] λέοντα θεοῖς κεχαρισμένον Ἀρτεμίδωρος | ἐν σεμνῶι τεμένει μητρὸς σύνοον πόλεως. Cp. a statue of Apollon, seated on a tripod over a lion, now in the Villa Albani (S. Raffei *Ricerche sopra un Apolline della Villa Albani* Roma 1821, Clarac *Mus. de Sculpt.* iii. 216 f. pl. 486 *b* fig. 937 *A* (wrongly numbered 737 *A*)=Reinach *Rép. Stat.* i. 249 no. 6, Overbeck *Gr. Kunstmyth.* Apollon p. 231 ff. no. 3 Atlas pl. 23, 30, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 3. 309 pl. 25, 14, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1913 ii. 409 f. no. 1848)), passed on her lions to Apollon.]

Τὸ *ἱερὸν τοῦ Διὸς τοῦ Κυνθίου* (*e.g. Inscr. Gr. Deli* ii no. 161, *A* 77 f.) or more briefly τὸ Κύνθιον (*e.g. ib.* ii no. 199, *A* 90) does not appear in the extant documents till the very end of *s.* iv B.C. (*ib.* ii no. 145, 1 f., no. 154, *A* 45 f.). Early in *s.* iii (*c.* 281—269 B.C.) the precinct was to a large extent reconstructed and thenceforward contained two small οἶκοι or 'sacred buildings' (F. Dürrbach in the *Bull. Corr. Hell.* 1911 xxxv. 250), on a platform bounded by a strong retaining-wall (*Inscr. Gr. Deli* ii no. 165, 33), together with a ἑστιατόριον or 'banqueting-hall' (*ib.* ii no. 163, *A* 34, cp. T. Homolle in the *Bull. Corr. Hell.* 1890 xiv. 507). The accounts of the ἱεροποιοί for *s.* iii and *s.* ii record various sums spent on repairs to these buildings (*Inscr. Gr. Deli* iii no. 440, *A* 84 f.), but no expenditure on the cult, which seems to have languished (but see *ib.* iii no. 372, *B* 10). According to an inventory of 157/6 B.C., one of the οἶκοι contained a cult-statuette of bronze, eighteen inches high, on a marble base, a bronze incense-burner for processional use, a *kratér* of Corinthian bronze, a marble mortar, twelve wooden couches with small tables beneath them, and sundry portraits and votive paintings (P. Roussel *op. cit.* p. 225 n. 3); the other οἶκος contained a second dozen of wooden couches with small draw-tables beneath them, an old bronze brazier with no bottom to it, two tridents, one of which lacked a tooth, and old iron tongs (*id. ib.* p. 225 n. 4). Despite this poverty, the priest of Zeus Κύνθιος and Athena Κυνθία held the third place in the Delian hierarchy (P. Roussel in the *Bull. Corr. Hell.* 1908 xxxii. 438 f. no. 64, 11 f. and *op. cit.* p. 202).

Better times began in 166 B.C., when Delos became an Athenian colony (P. Roussel *op. cit.* p. 1 ff.). An inventory of 147/6 B.C. records a pair of bronze figures, about a foot in height, representing Zeus and Athena, a table of bronze, another of marble, a tripod, lamps, linen hangings, but no couches; also a gold ring on a ribband, and a silver incense-burner (*id. ib.* pp. 225 nn. 7—9, 401). Other inscriptions, ranging from 158/7 to the middle of *s.* i B.C. or later, show that the *personnel* of the cult consisted in a ἱερεύς, a ζακόρος, and a κλειδοῦχος (lists in P. Roussel *op. cit.* p. 226 [Note the preponderance of well-omened names]). Of these the ἱερεύς held office for a year. So, probably, did the κλειδοῦχος. But the ζακόρος [Boisacq *Dict. étym. de la Langue Gr.* p. 306 suggests that ζακόρος is for **δακορος* < **δηϝ-κορος*, cp. *νεωκόρος, σηκοκόρος* (*κορέω*, 'I sweep') and *δάπεδον*: ζάπεδον] could have his tenure prolonged.

So far the cult seems to have had no regular temple. But *c.* 120 B.C. Charmikos, a native of the Attic deme Kikynna, who was priest of Zeus Κύνθιος and Athena Κυνθία, dedicated a *xóanon* (J. A. Lebègue *op. cit.* p. 160 no. 14); and in all probability it was the same native of Kikynna who dedicated the *naós* to Zeus Κύνθιος (*id. ib.* p. 161 no. 15), *i.e.* the small Ionic or composite temple noted above. This attracted the attention, not only of Athenians (P. Roussel in the *Bull. Corr. Hell.* 1908 xxxii. 422 f. no. 21, 429 no. 38), but of foreigners—witness a statue of Ptolemy x Soter ii here set up by Areios a notable of Alexandreia (J. A. Lebègue *op. cit.* p. 156 f. no. 11, Michel *Recueil d'Inscr. gr.* no. 1162, Dittenberger *Orient. Gr. inscr. sel.* no. 171) and an altar presented by Philostratos a wealthy banker of Askalon (J. A. Lebègue *op. cit.* p. 166 f. no. 21,

Chios
Mount Pelinnaion[4].

Rhodes
Mount Atabyrion[5].

P. Roussel *op. cit.* p. 227 n. 6). Orientals would naturally regard the mountain-top as one of their own high places. Hence Zeus Κύνθιος came to be associated with the Egyptian divinities (A. Hauvette-Besnault in the *Bull. Corr. Hell.* 1882 vi. 328 f. no. 23 a small column (1^{m} high) inscribed Διὶ Κυνθίωι, | Σαράπιδι, Ἴσιδι, | *κατὰ πρόσταγμα,* | Νεοπτόλεμος | Φιλωνίδου. | *ἐπὶ* ἱερέως Δικαίου | *τοῦ* Δικαίου Ἰωνίδου, | *κλειδουχοῦντος* | Εὐκράτου Διονυσίου *τοῦ* Σεύθου, | *ζακορεύοντος* | Ἀπολλωνίου | *τοῦ* Δικαίου), and his priest figures among the worshippers of the Syrian Aphrodite Ἀγνή (P. Roussel *op. cit.* pp. 227 n. 8, 266 f., 416 ff. no. 21, *A* col. i, 28). The sanctuary on Mt Kynthos, seemingly untouched by the catastrophe of 88 B.C. (Strab. 486, Plout. *v. Sull.* 11, Appian. *Mithr.* 28, Paus. 3. 23. 3 f.), continued to receive gifts, now a cistern-mosaic (*supra*), now a table etc. (J. A. Lebègue *op. cit.* p. 141 ff. no. 2, P. Roussel *op. cit.* p. 226 n. 14). Finally, about the middle of *s.* i B.C. a priest published on a marble *stèle* the rules of ceremonial purity to be observed by all visitors entering the precinct (J. A. Lebègue *op. cit.* p. 158 f. no. 12, J. v. Prott and L. Ziehen *Leges Graecorum sacrae* Lipsiae 1906 ii. 259 no. 91, P. Roussel in the *Mélanges Holleaux* Paris 1913 p. 276 f. no. 4 and *op. cit.* p. 228 n. 4. Lines 11 ff. run : *ἰέναι εἰς τὸ ἱε*[*ρὸν τοῦ*] Διὸς *τοῦ* Κυνθίου | [*καὶ τῆ*]ς Ἀθηνᾶς *τῆς* Κυνθί[*ας, χερ*]*σὶν καὶ ψυχῆ καθα*[*ρᾶ, ἕ*]*χοντας ἐσθῆτα λευ*[*κήν, ἀνυ*]*ποδέτους, ἀγνεύοντα*[*ς*] | [*ἀπὸ γυν*]*αικὸς καὶ κρέων·* | [*μηδὲ . . . .*] *εἰσ*[*φ*]*έρει*[*ν*] | *κ.τ.λ.*).

[The Delian cult had spread to Paros as early as *s.* vi B.C. O. Rubensohn in the *Ath. Mitth.* 1901 xxvi. 216 reported that on a hill-top (200^{m} high) called *Vigla* or *Kastro* in the north-west of that island, the nearest point from which the inhabitants of the town Paros could get a glimpse of Delos, he had discovered a sanctuary with votive inscriptions including an archaic *stèle* lettered ΑΘΗΝΑΙΗΚΥΝΘΙΗ (*Inscr. Gr. ins.* v. 1 no. 210, cp. *ib.* nos. 211, 214). This makes it certain that Athena's connexion with Mt Kynthion was centuries older than the Athenian protectorate. Not impossibly in Delos as at Athens Athena was the legitimate successor of the old 'Minoan' goddess.]

[1] Zeus Ὕψιστος (*supra* p. 878 n. 0 no. (8)).

[2] Zeus Ὕψιστος (*supra* p. 878 n. 0 no. (6)).

[3] Zeus Ἀκραῖος (*supra* p. 873 n. 0 no. (10)).

[4] Mt Pelinnaion (*Hagios Elias*), the highest point (1260^{m}) of Chios (Strab. 645, Dionys. *per.* 535), derived its name from the leaden grey (*πελιτνός, πελιδνός*) colour of its rock (L. Bürchner in Pauly—Wissowa *Real-Enc.* iii. 2288, cp. 2290). On it was a cult of Zeus Πελινναῖος (Hesych. *s.v.* Πελινναῖος· *ὁ* Ζεὺς *ἐν* Χίῳ), whose Christian supersessor was Saint Elias (*supra* i. 177 ff.).

[5] Mt Atabyrion (*Atayros*), the highest mountain in Rhodes, was crowned with a sanctuary of Zeus Ἀταβύριος (Pind. *Ol.* 7. 87 f. ἀλλ', ὦ Ζεῦ πάτερ, νώτοισιν Ἀταβυρίου | *μεδέων*, *κ.τ.λ.* with schol. vet. *ad loc.* *ἐπάνω γὰρ τοῦ ὄρους ἵδρυται ὁ* Ζεύς {Ἀταβύριον ὄρος *ὑψηλότατον* Ῥόδου *οὗ ἄνωθεν ἵδρυται* Ζεύς cod. C.), Strab. 655 *εἶθ'* ὁ Ἀτάβυρις (τάβυρις cod. F.), ὄρος *τῶν ἐνταῦθα ὑψηλότατον, ἱερὸν* Διὸς Ἀταβυρίου, Lact. *div. inst.* 1. 22 cited *supra* p. 588 n. 1, Steph. Byz. *s.v.* Ἀτάβυρον· ὄρος Ῥόδου. Ῥιανὸς ἕκτῳ Μεσσηνιακῶν (=Herodian. *περὶ καθολικῆς προσῳδίας* 13 (i. 387, 8 f. Lentz)). *τὸ ἐθνικὸν* Ἀταβύριος, *ἐξ οὗ καὶ* Ἀταβύριος Ζεύς, *id. s.v.* Κρητηνία· τόπος Ῥόδου, *ἐν ᾧ ᾤκουν οἱ περὶ* Ἀλθαιμένην, *ὃς*

χρησθεὶς ὅτι τὸν πατέρα ἀποκτενεῖ ἔφυγε, καὶ νυκτὶ πλοίῳ συνάντῃ ἐν Ῥόδῳ, καὶ ὡς ληστὰς νομίσας ἀναιρεῖ τὸν πατέρα. εἰσὶ δὲ ὑπὲρ αὐτοῦ τὰ Ἀταβύρια ὄρη, ἀφ' ὧν Ζεὺς Ἀταβύριος).

The mountain, as modern travellers report, is a mass of schistose limestone, well wooded below and dotted with a few large evergreen oaks and pines above. The sanctuary of Zeus is situated on a rounded crest about hundred paces south-east of the actual summit. Here at a point 4070 ft above the sea is a walled precinct 120 ft in length, and within it a pile of ruins lying 3 to 4 ft deep. Bluish blocks quarried on the mountain, the largest of them 5 ft long, prove the former existence of a Hellenic building on the site. But no columns have survived, and only a single architrave-block with a simple moulding. The Greek temple was long since reconstructed as a monastery. But this in turn fell into decay, and nowadays even the little chapel of Hagios Ioannes, which stands in the middle of the ruins, has lost its roof. North-east of the precinct, somewhat lower down, in a hollow are the remains of other ancient structures, including a large vaulted cistern. L. Ross, followed by C. Torr, thought that here may have been a temple of Athena; but the argument which he drew from Polyb. 9. 27. 7 (cited *supra* p. 910 n. 1) is insecure. See further W. J. Hamilton *Researches in Asia Minor, Pontus, and Armenia* London 1842 ii. 61 ff. (ascent from *Embona* Jan. 31, 1837), L. Ross *Reisen auf den griechischen Inseln des ägäischen Meeres* Stuttgart—Tübingen 1845 iii. 105 ff. (ascent from *Embona* Sept. 27, 1843), C. Torr *Rhodes in Ancient Times* Cambridge 1885 pp. 1, 75, H. F. Tozer *The Islands of the Aegean* Oxford 1890 p. 220 f.

The local myth is told most fully by Apollod. 3. 2. 1 f. Katreus, son of Minos, was fated to be killed by one of his own sons. Althaimenes, son of Katreus, to avoid killing his father, fled from Crete to Rhodes with his sister Apemosyne. He put in at a certain place which he named Kretenia (*κρητινίαν* cod. R., followed by R. Hercher and R. Wagner. *κρατινίαν* codd. plerique. C. G. Heyne cj. *Κρητηνίαν*, cp. Steph. Byz. *loc. cit.*). On climbing Mt Atabyrion he got a view of Crete, and, in memory of his ancestral deities, built there an altar of Zeus Ἀταβύριος. Soon afterwards Hermes fell in love with Apemosyne and, when he could not catch her (for she was fleet of foot), strewed freshly-flayed hides in the road. On these she slipped, and thus was violated by her pursuer. Althaimenes, hearing of her fall, believed the tale about Hermes to be a mere excuse and killed his sister by leaping upon her. Later, Katreus, anxious to leave his kingdom to Althaimenes, came to Rhodes and was mistaken for a pirate by the ox-herds, who chased and pelted him. Katreus told them the truth, but could not gain a hearing because the dogs were barking. So Althaimenes all unwittingly speared him. On learning what he had done he uttered a prayer, and in answer thereto was engulfed in a chasm. Diod. 5. 59, however, probably borrowing his account not from Zenon of Rhodes (*frag.* 2 (*Frag. hist. Gr.* iii. 177 f. Müller)) but from a later source dependent on Polyzalos etc. (Gruppe *Myth. Lit.* 1921 p. 389), says that Althaimenes wandered in the desert till he died of grief and was afterwards, in obedience to an oracle, honoured as a hero by the Rhodians.

This myth deserves analysis. There is in it, to begin with, a *substratum* of historic, or at least prehistoric, fact—the intimate relations between 'Minoan' Crete and Rhodes (H. van Gelder *Geschichte der alten Rhodier* Haag 1900 p. 30 ff., D. Mackenzie in the *Ann. Brit. Sch. Ath.* 1905–1906 xii. 222, C. Blinkenberg in *Hermes* 1913 xlviii. 246 f., Gruppe *Myth. Lit.* 1921 p. 380): Minos himself was believed to have dedicated a silver cup to Athena Πολιάς and Zeus Πολιεύς at Lindos (C. Blinkenberg *Die lindische Tempelchronik* Bonn 1915 p. 8 ff. B, 18 ff. *Μίνωος ἀργύρεον ποτήριον, ἐφ' οὗ ἐπεγέγραπτο· "Μίνως Ἀθάναι Πολιάδι καὶ Διὶ Πολιεῖ," ὥς φατι | Ξεναγόρας ἐν τᾶι Α τᾶς χρονικᾶς συντάξιος, | Τόργων ἐν τᾶι Ā τᾶν περὶ Ῥόδου, Γοργοσθένης | ἐν τᾶι ἐπιστολᾶι, Ἱερόβουλος ἐν τᾶι ἐπιστολᾶι*). There is also an element of folk-tale, the story of Katreus fated to be slain by his own son recalling the *motif* of Odysseus and Telegonos (A. C. Pearson *The Fragments of Sophocles* Cambridge 1917 ii. 105 ff.) or of Laios and Oidipous (C. Robert *Oidipus* Berlin 1915 i. 66 ff.). Lastly there are definite points of aetiology. Apemosyne, a woman of the royal house, who flees at full speed, falls on the fresh hides, and is then

brutally dispatched by her kinsman, presupposes—I think—a bygone custom or rite (? in the Rhodian month Agrianios) resembling that of the Minyan Oleiai and Psoloeis at the Agrionia of Orchomenos in Boiotia (Plout. *quaestt. Gr.* 38 with Frazer *Golden Bough*[3]: The Dying God p. 163 f.). Her name implies that 'freedom from trouble' was thought to depend on her sacrifice. And the statement that she slipped on freshly-flayed hides suggests that the human victim was wrapped in the skin of the sacred animal (*supra* i. 67 n. 3, cp. *Journ. Hell. Stud.* 1894 xiv. 155 ff.).

Small bronze bulls, which probably served as offerings to Zeus, are sometimes found on Mt Atabyrion (*supra* i. 643 fig. 502). And we have already conjectured that Zeus had here inherited the bronze bulls of the Hittite Tešub (*supra* i. 642 f., ii. 910 n. 1). The common tradition was that certain bronze kine on Mt Atabyrion bellowed when any evil was about to befall Rhodes (schol. vet. Pind. *Ol.* 7. 159 f. εἰσὶ δὲ χαλκαῖ βόες ἐν αὐτῷ, αἵτινες ὅταν μέλλῃ ἄτοπόν τι γενέσθαι, μυκῶνται, 160 c εἰσὶ δὲ καὶ βόες χαλκοῖ ἐπὶ τῷ ὄρει τῆς Ῥόδου, οἳ ὅταν μέλλῃ τι τῇ πόλει γίνεσθαι κακὸν μυκῶνται, Tzetz. *chil.* 4. 390—393 (=4. 704—706) Ῥόδιόν ἐστιν ὄρος, | τὴν κλῆσιν Ἀταβύριον, χαλκᾶς πρὶν ἔχον βόας, | αἳ μυκηθμὸν ἐξέπεμπον χωρούσης Ῥόδῳ βλάβης· | Πίνδαρος (? *Ol.* 7. 87 f.) καὶ Καλλίμαχος (*frag.* 413 Schneider) γράφει τὴν ἱστορίαν). But one authority spoke of a single bull, that of Zeus, as uttering a human voice (Isigonos of Nikaia *frag.* 4 (*Frag. hist. Gr.* iv. 435) *ap.* Kyrill. Al. *c. Iulian.* 3 p. 88 c Aubert (lxxvi. 636 A Migne) καὶ μὴν καὶ Ἰσίγονος ὁ Κιττιεὺς (C. Müller cj. ὁ Νικαιεὺς) ἐν Ῥόδῳ τῇ νήσῳ τὸν τοῦ Διὸς ταῦρόν φησιν οὐκ ἀμοιρῆσαι λόγου τοῦ καθ' ἡμᾶς). Both versions bear a sinister resemblance to the accounts of the bronze bull made by Perillos for Phalaris at Akragas (*supra* i. 643 f., ii. 910 n. 1) and may likewise be taken to cover a reminiscence of human sacrifice. If the early Cretans tolerated, for ritual purposes, the enclosing of their queen in a wooden cow (*supra* i. 523), the early Rhodians would hardly shrink from burning a *pharmakós* in a bronze bull. Sir J. G. Frazer *Apollodorus* London 1921 i. 307 concludes: 'Atabyrian Zeus would seem to have been worshipped in the form of a bull.' That may have been so, no doubt, in the remote past. But in classical times he was almost certainly anthropomorphic. Rhodian coppers of *c.* 304—189 B.C. or later have *obv.* head of Zeus, wearing bay-wreath, to right; *rev.* PO rose, often surmounted by radiate solar disk (*Brit. Mus. Cat. Coins* Caria, etc. p. 250 pl. 39, 15 and 16, *Hunter Cat. Coins* ii. 441 no. 38, Head *Hist. num.*[2] p. 640. I have two specimens of the sort in my collection): the head is presumably that of Zeus Ἀταβύριος. Cp. also *supra* i. 132.

It was not, of course, to be expected that in busy Hellenistic times the good folk of Rhodes would toil up a steep mountain 4000 ft high in order to pay their respects to Zeus. Accordingly we find a chapel of ease built on a more manageable hill adjoining the city-wall (Appian. *Mithr.* 26 αὐτομόλων δ' αὐτῷ (*sc.* Mithridates vi Eupator, in 88 B.C.) λόφον ὑποδεξάντων ἐπιβατόν, ᾗ Ἀταβυρίου Διὸς ἱερὸν ἦν, καὶ κολοβῶν τειχίον ἐπ' αὐτοῦ, τὴν στρατιὰν ἐς τὰς ναῦς νυκτὸς ἐπέβησε, καὶ ἑτέροις ἀναδοὺς κλίμακας ἐκέλευσε χωρεῖν ἑκατέρους μετὰ σιωπῆς μέχρι τινὲς αὐτοῖς πυρσεύσειαν ἐκ τοῦ Ἀταβυρίου· κ.τ.λ.). A relic of this urban cult is a block of bluish marble formerly 'built into the wall of a field to the south-west of St. Stephen's Hill, near Rhodes' and now in the British Museum (Sir C. T. Newton in *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1883 ii. 121 no. 346 = *Inscr. Gr. ins.* i no. 31 [δόγματι τοῦ κοινοῦ] | [τῶν Διοσταβυρι][αστᾶν τῶν τᾶς πό]λ[ι]ος δούλων, Εὐλέ[μ]ενος γραμματεὺς | [δα]μόσιος ἱερατεύ[σας] Διὸς Ἀταβυρίου | [ὑπὲρ τ]ῶν κυρίων Πο[δίων ἀν]έθηκε Διὶ Ἀ[ταβυρίᾳ] τοὺ(ς) βοῦς | [χαριστήρ]ιον Ὃ. W. Dittenberger *De sacris Rhodiorum* commentatio ii Halis Saxonum 1887 p. viii f. restored the opening lines as above, and proposed for the closing lines [ἀν]έθηκε Διὶ Ἀ[ταβυρίᾳ] τοῦ βουσ[τάθμου τὸ τειχ]ίον, which is ingenious but less probable). Hence we learn that Eulimenos, a state slave who had been priest of Zeus Ἀταβύριος, dedicated to the god on behalf of the citizens the customary kine, *i.e.* small votive bulls of bronze. He describes himself as commissioned to do so by the public servants, who composed an association of Διοσταβυριασταί.

Of such associations or religious circles there were at least two in the island. One, in

Crete

Mount Aigaion[1].

the town of Rhodes, founded by a certain Philon, was devoted to Zeus 'Αταβύριος and to the Agathos Daimon (*infra* Append. M) in common (*Inscr. Gr. ins.* i no. 161, 5 f. = H. van Gelder in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 478 f. no. 3842, 5 f. ('In oppido hodierno, prope hospitium equitum D. Ioannis in basi oblonga marmoris caerulei') καὶ ὑπὸ [Διοσ]αταβυριαστᾶν 'Αγαθοδαιμονιαστᾶν Φιλ(ω)νείων κοινοῦ | θαλλῶι στεφάνωι). The other, at Lindos, established by a man named Euphranor and later headed by one Athenaios of Knidos, worshipped Dionysos, Athena, and Zeus 'Αταβύριος (Sir C. T. Newton *loc. cit.* ii. 135 f. no. 358, 2 ff., 12 ff. = *Inscr. Gr. ins.* i no. 937, 2 ff., 12 ff. = H. van Gelder *loc. cit.* iii. 1. 568 f. no. 4239, 2 ff. ('Found at Mallona near Lindos in 1863... On a circular altar or pedestal of white marble, which has been hollowed out, probably to form a mortar with a hole at the bottom') [- - - - τ]ε[ίμα]θέντα ὑπὸ | τοῦ κοινοῦ τοῦ Διονυσιαστᾶν 'Αθαναϊσταῖν Διοσ|αταβυριαστᾶν Εὐφρανορ[ίω]ν τῶν σὺν 'Αθηναίῳ Κνιδίῳ | χρυσέῳ στεφάνῳ καὶ ἀναγορεύσεσιν ἰσο τὸν ἀεὶ χρόνον. | κ.τ.λ., 12 ff. καὶ τᾶς γυναικὸς αὐτοῦ 'Αρέτης μὲν τειμαθείσας ὑπὸ τοῦ κοινοῦ τ[οῦ Διον]υσιαστᾶν 'Αθαν[αΐ]σταῖν Διοσταβυριαστᾶν | Εὐφρανορίων τῶν σ[ὺν 'Αθηναίῳ Κνιδίῳ καὶ ἀν]αθείσας τῷ κοινῷ (τῷ) | 'Αθανα[ϊσταῖν - - - - τῶ]ν ἀναλωμάτων [- -]). A mutilated inscription on a slab of blackish marble at Netteia (*Apollakia*) near Lindos, where it serves as a threshold in the church of Saint Georgios, contains ritual rules in lettering of *s.* ii B.C. and includes a reference to Zeus 'Αταβύριος (*Inscr. Gr. ins.* i no. 891, 7 [· · · · ·]θ[ε]ὲ[π][α]ι χο[ρ]εύετα[ι καὶ Διὶ] 'Ατα[β]υρίω[ι - -]). See further F. Poland *Geschichte des griechischen Vereinswesens* Leipzig 1909 pp. 58 f., 181, 237.

The cult of the Rhodian Zeus even found its way to Skythia. At *Kermenchik* (Neapolis?) near *Sympheropol* three inscriptions have come to light recording dedications made *c. s.* i B.C. (?) by one Posideos to Zeus 'Αταβύριος (*Corp. inscr. Gr.* ii no. 2103*b* = B. Latyschev *Inscriptiones antiquae Orae Septentrionalis Ponti Euxini Graecae et Latinae* Petropoli 1885 i. 216 no. 242 on a base of grey marble now in the Museum at Odessa Διὶ 'Αταβυρίωι Ποσίδεος Ποσιδέου | χαριστήριον), to Athena Αἰνδία (*ib.* i. 216 f. no. 243), and to Achilles 'Lord of the Island' (*sc.* Leuke) (*ib.* i. 217 no. 244). E. H. Minns *Scythians and Greeks* Cambridge 1913 pp. 463, 476, 479 treats Posideos, not as a Rhodian, but as an Olbiopolite living at Neapolis and trading with Rhodes. See also M. Rostovtzeff *Iranians & Greeks in South Russia* Oxford 1922 p. 163.

[1] Rhea, when about to bear her youngest son Zeus (Ζῆνα μέγαν, cp. *supra* p. 344 f.), was sent by her parents Ouranos and Gaia to Lyktos, and Gaia received the child to bring him up in Crete. So Rhea came by night first to Lyktos and hid the babe in a steep underground cave on the well-wooded Mt Aigaion (Hes. *theog.* 477 ff. πέμψαν δ' ἐς Λύκτον (γρ. δί (= δίκτον) in marg. cod. E.), Κρήτης ἐς πίονα δῆμον, | ὁππότ' ἄρ' ὁπλότατον παίδων τέξεσθαι ἔμελλε (so G. Kinkel for ἤμελλε τεκέσθαι), | Ζῆνα μέγαν· τὸν μέν οἱ ἐδέξατο Γαῖα πελώρη | Κρήτῃ ἐν εὐρείῃ τραφέμεν ἀτιταλλέμεναί τε. | ἔνθα μιν (so J. G. J. Hermann for μὲν codd., cp. schol. *ad loc.*) ἶκτο φέρουσα θοὴν διὰ νύκτα μέλαιναν | πρώτην ἐς Λύκτον (G. F. Schömann's cj. Δίκτην is mischievous)· κρύψεν δέ ἑ χερσὶ λαβοῦσα | ἄντρῳ ἐν ἠλιβάτῳ, ζαθέης ὑπὸ κεύθεσι γαίης, | Αἰγαίῳ (Salmasius cj. αἰγείῳ, Wilamowitz cj. Αἰγείῳ. But see G. M. Columba *Aigaion* (extr. from the *Memorie della R. Accademia di Archeologia, Lettere e Belle Arti* 1914 iii) Napoli 1914 p. 21 n. 3) ἐν ὄρει πεπυκασμένῳ ὑλήεντι).

Hesiod's connexion of the cave on Mt Aigaion with Lyktos makes it practically certain (*pace* W. Aly in *Philologus* 1912 lxxi. 461) that this was the *Psychro* Cave on Mt *Lasithi*, some 4½ hours from the ruins of Lyktos, with which it is linked by an ancient road still traceable (so K. J. Beloch in *Klio* 1911 xi. 435 and especially J. Toutain in the *Revue de l'histoire des religions* 1911 lxiv. 290 f., followed by Gruppe *Myth. Lit.* 1921 p. 377). It was partially explored by F. Halbherr and J. Hazzidakis in 1886 (F. Halbherr—P. Orsi 'Scoperte nell' antro di Psychro' in the *Museo Italiano di Antichità Classica* 1888 ii. 905—910 pl. 13, A. Taramelli in the *Mon. d. Linc.* 1899 ix. 411 f.), by Sir A. J. Evans and J. L. Myres in 1894, 1895, 1896 (Sir A. J. Evans in the *Journ. Hell. Stud.* 1897 xvii. 350—361 ('Inscribed Libation Table from the Diktaean Cave')), by

J. Demargne in 1897 (Sir A. J. Evans *The Palace of Minos* London 1921 i. 629), and fully by D. G. Hogarth in 1899—1900 (D. G. Hogarth 'The Dictaean Cave' in the *Ann. Brit. Sch. Ath.* 1899—1900 vi. 94—116 with pls. 8—11 and figs. 27—50, *id.* 'The Birth Cave of Zeus' in *The Monthly Review* 1901 pp. 49—62 with 10 pls.). But these explorers (whom I wrongly followed *supra* i. 150 n. 2, ii. 530) assumed without definite proof that the *Psychro* Cave was the Dictaean Cave—an assumption denounced by W. Aly *Der kretische Apollonkult* Leipzig 1908 p. 47 and simultaneously refuted by K. J. Beloch in *Klio* 1911 xi. 433—435 ('Dikte') and by J. Toutain 'L'antre de Psychro et le ΔΙΚΤΑΙΟΝ ΑΝΤΡΟΝ' in the *Revue de l'histoire des religions* 1911 lxiv. 277—291 (see *infra* n. on Mt Dikte).

The *Psychro* Cave shows as a dark spot on the mountain-side (*The Monthly Review loc. cit.* pl. 6, 1) some 500 ft above *Psychro*, a village of the inner *Lasithi*-plain (*ib.* pl. 1, 2, pl. 2, 1 f.). It was perhaps originally a swallow-hole, at the time when the *Lasithi*-plain was an upland lake, and an icy pool still remains in its depths. But its religious history was a long one; for the finds begin with sherds of 'Kamares'-ware in the 'Middle Minoan ii' period (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 101 f. fig. 27) and end with sundry Roman lamps and a silver Byzantine cross. Of the votive bronzes, some are probably 'Middle Minoan' in date, many more 'Late Minoan.' Greek relics of a time subsequent to *c.* 800 B.C. are scarce.

The Cave itself consists of an upper grotto and a steep slope of *c.* 200 ft leading down to a subterranean pool and a series of stalactite halls (plan of grotto *supra* p. 531 fig. 401). The upper grotto contained an altar (3 ft high) of roughly squared stones, close to which lay a libation-table in steatite inscribed with three linear characters (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 114 fig. 50). An adjoining gateway gave access to a paved *témenos* enclosed by a massive 'Cyclopean' wall. At the back of the enclosure were the mouths of natural funnels communicating probably with the lower halls and water-channels in the heart of the hill. In the upper grotto, especially round the altar, the topmost *strata* yielded swords, knives, axes, bracelets, etc. of iron with remains of the earliest Hellenic pottery; the lower *strata* had scattered objects mainly in bronze—the model of a two-wheeled car drawn by an ox and a ram and intended to carry one or more little figurines (*ib.* p. 108 fig. 39), images of bulls, a knife with a handle ending in a human head (*ib.* p. 111 fig. 44), long hair-pins with ornate ends, lance-points, darts, knives, wire needles, rings, miniature circular shields (?) (*ib.* p. 109 fig. 41), etc.; also hundreds of little plain earthenware cups for food or incense; a small clay mask with lips, eyelids, and lashes painted in ochre (*ib.* p. 106 fig. 37, 3); a great stoup patterned with checker-work etc. and a polyp in lustreless red (*ib.* p. 103 f. figs 31, 32); ivory ornaments from sword-hilts, bone articles of the toilet; small altar-like tables in steatite and limestone, three of which bore linear inscriptions (*ib.* p. 114 pl. xi). The *témenos* was less rich in metal, but extraordinarily prolific in sherds of 'Minoan' pottery, *e.g.* fragments of large unpainted *pithoi* with a band of decoration in relief under the rim—embossed double-axe, head of wild goat, rows of *bucrania*, an altar laden with fruit, etc. (p. 104 f. fig. 34). Here too were found the skulls and bones of oxen, wild goats, sheep, large deer, swine, and dogs—clearly the *débris* of animal sacrifices (W. Boyd-Dawkins in *Man* 1902 ii. 162—165 no. 114 identifies *bos domesticus creticus*, *capra ægagrus*, *ovis aries*, *cervus dama*, *sus scrofa*, *canis familiaris*).

From the *talus* in the lower halls came other bronzes, including a small statuette crowned with the plumes of Âmen-Râ (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 107 pl. x, 1 f.). This was good early work of the New Empire (*c.* 900 B.C.) and recalls the classical identification of Zeus with Âmen-Râ (*supra* i. 348 ff.).

From the floor of the subterranean pool were dredged many rude bronze statuettes, male and female, nude and draped, with the arms folded on the breast or with one hand raised to the head in a gesture of adoration (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 107 pl. x, 4—14); a similar figure in lead (*ib.* p. 107 pl. x, 3); sards and other signet stones engraved with wild goats, bulls, and a geometric labyrinth-design (*ib.* p. 112); rings, pins, blades, needles. At the head of the pool and in a little lateral chamber opening to

Mount Dikte[1].

the left the crevices and crannies of the stalactite columns, up to the height of a man, were found to be crammed with votive bronzes—blades, pins, tweezers, *fibulae* (*The Monthly Review loc. cit.* pl. 9), with here and there a double axe (*ib.* pl. 8). See *supra* p. 530 ff.

D. G. Hogarth concludes: 'About the pre-eminently sacred character of this Cave there can remain no shadow of doubt, and the *simulacra* of axes, fashioned in bronze and moulded or painted on vases, clearly indicate Zeus of the *labrys* or Labyrinth as the deity there honoured' (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 114).

Among the more important objects obtained from the Cave by Sir A. J. Evans are half the top of a libation-table in black steatite bearing an inscription in two lines (Sir A. J. Evans in the *Journ. Hell. Stud.* 1897 xvii. 350—361 figs. 25 *a*—27 and tab. i), one of which is further extended by a small fragment found by J. Demargne in 1897 (Sir A. J. Evans *The Palace of Minos* London 1921 i. 625—631 figs. 465—467), and a remarkable votive tablet of bronze perhaps of the period 'Late Minoan i' (*id. ib.* p. 632 f. fig. 470 re-

Fig. 830.

versed = my fig. 830). The latter, like a lentoid seal of rock crystal found in the Idaean Cave (L. Mariani in the *Mon. d. Linc.* 1895 vi. 178 fig. 12, Furtwängler *Ant. Gemmen* iii. 47 fig. 22, Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 141 f. fig. 25), represents the worship of a sacred tree or trees. The ring-dove or wood-pigeon (*columba palumbus*), here perched on one of the three sprays rising from ritual horns, may depict the presence of the deity (? Aphrodite, or her Cretan equivalent Ariadne (cp. *supra* i. 481)). Sun and moon betoken the sky. But the exact significance of the remaining symbols (? cp. *supra* i. 583 n. 4) and linear characters is obscure. The cult of a goddess associated with sacred trees is just what we should expect *ἐν ὄρει πεπυκασμένῳ ὑλήεντι*. Doves reappear in connexion with the Dictaean Cave (*infra* n. 1).

[1] Zeus Δικταῖος (Kallim. *h. Zeus* 4 *πῶς καὶ νῦν* (so O. Schneider for *καί νιν* codd. and earlier edd. A. W. See further O. Immisch in Roscher *Lex. Myth.* ii. 1587 ff., J. Poerner *De Curetibus et Corybantibus* (*Dissertationes philologicae Halenses* xxii. 2) Halis Saxonum 1913 pp. 245—428, Schwenn in Pauly—Wissowa xi. 1441 ff., 2202 ff.).

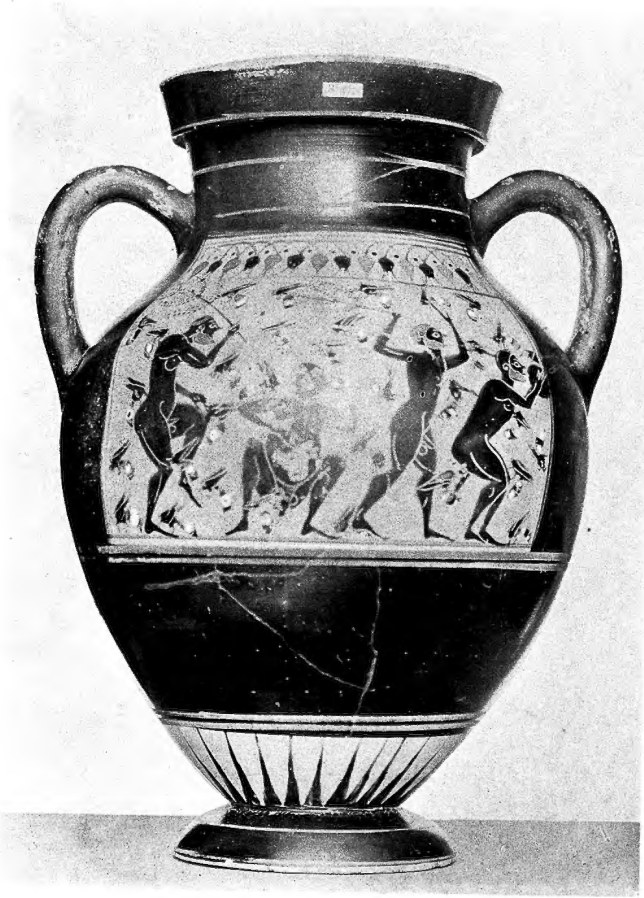
Ant. Lib. 19 quotes from the *Ornithogonia* of 'Boios' (*supra* p. 463 n. 1) a queer tale, which relates apparently to the Dictaean Cave: 'In Crete, they say, there is a cave sacred to bees. Tradition has it that in this cave Rhea gave birth to Zeus, and neither god nor man may enter it. Every year at a definite time there is seen a great glare of fire from the cavern. This happens, so the story goes, when the blood from the birth of Zeus boils out (ἐκζέῃ with allusion to Ζεύς (*supra* i. 31 n. 3)). The cave is occupied by sacred bees,



Amphora from Vulci, now in the British Museum: Laïos, Keleos, Kerberos, and Aigolios stung by bees in the Dictaean Cave.

See page 929 *n.* 0.

the nurses of Zeus. Laïos, Keleos, Kerberos, and Aigolios dared to enter it that they might draw as much honey as they could. They encased their bodies in bronze, drew the honey of the bees, and saw the swathing-bands of Zeus. Whereupon their bronze armour burst asunder. Zeus thundered aloud and raised his bolt. But the Moirai and Themis intervened; for none might die in that spot. So Zeus made them all into birds, and from them sprang the tribe of birds—blue thrushes (λάιοι), green woodpeckers (κελεοί), birds of an unknown species (*κέρβεροι*), and owls (αἰγωλιοί). These are good birds to appear and reliable beyond all other birds, because they saw the blood of Zeus.' See further *Folk-Lore* 1904 xv. 388 f. A black-figured *amphora* in the British Museum (*Brit. Mus. Cat. Vases* ii. 122 f. no. B 177 from *Vulci*), hitherto unpublished, has (*a*) the four marauders stung by the bees in the cave (pl. xlii from a photograph by Mr R. B. Fleming): (*b*) dancing Maenads and Satyrs.

Other myths attached to the same sacred cavern. Here Anchiale bore the Idaean Daktyloi (Ap. Rhod. 1. 1129 ff. Δάκτυλοι Ἰδαῖοι Κρηταιέες, οὓς ποτε νύμφη | Ἀγχιάλη Δικταῖον ἀνὰ σπέος ἀμφοτέρῃσιν | δραξαμένη γαίης Οἰαξίδος ἐβλάστησεν with schol. *ad loc.*, translated by Varr. *frag.* 3 Baehrens *ap.* Serv. *in* Verg. *ecl.* 1. 66 quos magno Anchiale partus adducta dolore | et geminis capiens tellurem Oaxida palmis | edidit in Dicta, cp. Vib. Seq. p. 15 Oberlin *s.v.* 'Oaxes'). Here too Zeus, according to one late account, lay with Europe (Loukian. *dial. mar.* 15. 4 ταῦτα ἐκ Φοινίκης ἄχρι τῆς Κρήτης ἐγένετο· ἐπεὶ δὲ ἐπέβη τῇ νήσῳ, ὁ μὲν ταῦρος οὐκέτι ἐφαίνετο, ἐπιλαβόμενος δὲ τῆς χειρὸς ὁ Ζεὺς ἀπῆγε τὴν Εὐρώπην ἐς τὸ Δικταῖον ἄντρον ἐρυθριῶσαν καὶ κάτω ὁρῶσαν· ἠπίστατο γὰρ ἤδη ἐφ' ὅτῳ ἄγοιτο). Minos, their son, used to descend into the Dictaean Cave and thence return with the laws of Zeus (Dion. Hal. *ant. Rom.* 2. 61 ὧν ὁ μὲν (*sc.* Minos) ὁμιλητὴς ἔφη γενέσθαι τοῦ Διός, καὶ φοιτῶν εἰς τὸ Δικταῖον ὄρος, ἐν ᾧ τραφῆναι τὸν Δία μυθολογοῦσιν οἱ Κρῆτες ὑπὸ τῶν Κουρήτων ἔτι νεογνὸν ὄντα, κατέβαινεν εἰς τὸ ἱερὸν ἄντρον, καὶ τοὺς νόμους ἐκεῖ συνθεὶς ἐκόμιζεν, οὓς ἀπέφαινε παρὰ τοῦ Διὸς λαμβάνειν). Lastly Epimenides claimed to have slept for years in the Cave and to have had visions there (Max. Tyr. 16. 1 ἀφίκετό ποτε Ἀθήναζε Κρὴς ἀνήρ, ὄνομα Ἐπιμενίδης, κομίζων λόγον, οὐτωσὶ ῥηθέντα, πιστεύεσθαι χαλεπόν· ἐν τοῦ Διὸς τοῦ Δικταίου τῷ ἄντρῳ κείμενος ὑπνῳ βαθεῖ ἔτη συχνά, ὅναρ ἔφη ἐντυχεῖν αὐτὸς θεοῖς καὶ θεῶν λόγοις καὶ ἀληθείᾳ καὶ δίκῃ. κ.τ.λ.).

Sir A. J. Evans at first identified Mt Dikte with Mt *Lasithi*, the Dictaean Cave with the *Psychro* Cave, and the city built by Zeus (Diod. 5. 70 cited *supra*) with the ruins at *Goulas* on an outlying spur of the *Lasithi-massif* (Sir A. J. Evans 'Goulas: The City of Zeus' in the *Ann. Brit. Sch. Ath.* 1895—1896 ii. 169 ff.). This made an attractive combination and found many adherents (*supra* p. 925 n.' 1). Unfortunately it ignored two essential factors in the situation—the definite statements of ancient topographers (*in primis* Strab. 478 f., Ptol. 3. 15. 3 and 6, cp. Agathokles *frag.* 2 (*Frag. hist. Gr.* iv. 289 Müller) *ap.* Athen. 375 F, schol. Arat. *phaen.* 33 f.; *in secundis* Ap. Rhod. 4. 1635 ff., Loukian. *dial. mar.* 15. 4) and the *provenance* of inscriptions relating to the cult of Zeus Δικταῖος. Discussion of the evidence along these lines led K. J. Beloch in *Klio* 1911 xi. 433 ff. and J. Toutain in the *Revue de l'histoire des religions* 1911 lxiv. 277 ff. to reject the identification of Dikte with *Lasithi* and to insist that Dikte must have been a mountain near Praisos at the eastern end of Crete. Apparently Sir A. J. Evans has himself now given in to this view, for the map prefixed to vol. i of *The Palace of Minos at Knossos* adopts the new equation Aigaion = *Lasithi* and, rightly as I conceive, assigns the name 'Mt Dikta' to the range situated south-west of Praisos. If so, the true Dictaean Cave is still to seek.

The cult of Zeus Δικταῖος in eastern Crete is attested by (1) the civic oath of Itanos in *s.* iii B.C. (Dittenberger *Syll. inscr. Gr.*[2] no. 462, 2 ff., *ib.*[3] no. 526, 2 ff. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 324 f. no. 5058, 2 ff. found at *Erenopoli* [τάδ]ε ὤμοσαν τοὶ Ἰτάνιοι πά[ρ][τες] Δία Δικταῖον καὶ Ἥραν καὶ θ[εο]ὺς τοὺς ἐν Δίκται καὶ Ἄθαν[α]ίαν Πολιάδα καὶ θεούς, δσσο[ι][s] ἐν Ἀθαναίαι θύεται, π[ά]ντας | [κ]αὶ Δία Ἀγοραῖον καὶ Ἀπόλλω[ν]α Πύθιον καθ' ἱερῶν νεοκά[ρ]ων· κ.τ.λ.): (2) the oath of allegiance taken by settlers from Hierapytna, sent probably to occupy conquered territory (Praisos?) (*Corp. inscr. Gr.* ii no. 2555, 11 ff. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 311 f. no. 5039, 11 ff. cited *supra* p. 723 n. o): (3) the oath to be taken each year in the month

Dionysios by the *kósmos* or chief magistrate of Praisos in accordance with a treaty of *s.* iii B.C. between that town and Stelai (Michel *Recueil d'Inscr. gr.* no. 440 *A*, 15 ff. =Dittenberger *Syll. inscr. Gr.*[2] no. 427, *a* 15 ff., *ib.*[3] no. 524, *a* 15 ff. cited *supra* p. 731 n. 0. The restoration *ὁμώω Δῆ*[να *Δικταῖον*] exactly fills the gap and is justified by Strab. 475 *τούτων* (*sc. Od.* 19. 175—177) *φησὶ Σπάφυλος* (*frag.* 12 (*Frag. hist. Gr.* iv. 507 Müller)) *τὸ μὲν πρὸς ἕω Δωριεῖς κατέχειν, τὸ δὲ δυσμικὸν Κύδωνας, τὸ <δὲ> νότιον Ἐτεόκρητας, ὧν εἶναι πολίχνιον Πρᾶσον, ὅπου τὸ τοῦ Δικταίου Διὸς ἱερόν, id.* 478 *εἰρῆται δέ, ὅτι τῶν Ἐτεοκρήτων ὑπῆρχεν ἡ Πρᾶσος, καὶ διότι ἐνταῦθα τὸ τοῦ Δικταίου Διὸς ἱερόν· κ.τ.λ.*): (4) a long inscription, dated in 139 B.C., of which one copy was found near Itanos, another at Magnesia ad Maeandrum (Dittenberger *Syll. inscr. Gr.*[2] no. 929, *ib.*[3] no. 685 =R. Cagnat *Inscriptiones Graecae ad res Romanas pertinentes* Paris 1911 i. 345 ff. no. 1021). It deals with a dispute between Itanos and Praisos—later between Itanos and Hierapytna—respecting the territory of Heleia and the island of Leuke. Itanos ultimately appealed to the Roman senate, which entrusted arbitration in the matter to Magnesia. The document in delimiting the territory of Itanos more than once mentions the sanctuary of Zeus *Δικταῖος*, which must have lain on the border-line of Itanos and Praisos (ii, 37 ff. *Ἰτάνιοι πόλιν οἰκοῦν|τες ἐπιθαλάσσιον καὶ χώραν ἔχοντες προγονικὴν γειτονοῦσαν τῶι τοῦ Διὸς τοῦ Δικταίου ἱερῶι, ἔχον|τες δὲ καὶ νήσους καὶ νεμόμενοι, ἐν αἷς καὶ τὴν καλουμένην Λεύκην*, 47 ff. *οὕτως Ἱεραπύτνιοι τῆς τε νήσου καὶ τῆς χώρας ἀμφισβητεῖν Ἰτανίοις ἐπεβάλαντο, φάμε|νοι τὴν μὲν χώραν εἶναι ἱερὰν τοῦ Ζηνὸς τοῦ Δικταίου, τὴν δὲ νῆσον προγονικὴν ἑαυτῶν ὑπάρ|χειν*, iii, 69 ff. *τοῦ δὲ ἱεροῦ τοῦ Διὸς ἐκτὸς τῆς διαμφισβητουμένης | χώρας ὄντος καὶ περιοικοδομήμασιν καὶ ἑτέροις πλείοσι[ν ἀ]ποδεικτικοῖς καὶ σημείοις περιλα[μ]βανομένου*, 81 f. *νόμοις γὰρ ἱεροῖς καὶ ἀραῖς καὶ ἐπιτίμοις ἄνωθεν διεκεκώλυτο ἵνα μηθεὶς ἐν τῶ ἱ|ερῶι τοῦ Διὸς τοῦ Δικταίου μήτε ἐννέμηι μήτε ἐναυλοστατῆι μήτε σπείρηι μήτε ξυλεύηι*).

Finally, excavations of the British School at Athens undertaken in 1902 at Heleia (*Palaikastro*) on the eastern coast, south of Itanos (*Eremopoli*) and east of Praisos, located the actual site of the Hellenic temple (R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1901—1902 viii. 286 ff.). This was partially explored in 1903 and 1904 (*id. ib.* 1902—1903 ix. 280, *ib.* 1903—1904 x. 246) and fully cleared in 1905 (*id. ib.* 1904—1905 xi. 298 ff.).

The site was an artificially levelled platform half-way down the south-eastern side of a hill. The *témenos* was enclosed by a wall of undressed stones, of which a few courses survive, and can be traced along the north and north-eastern face of the slope for a distance of 36[m]. The temple itself has wholly vanished, huge blocks of freestone having been carried off by the villagers of *Palaikastro* about a generation ago. But the position of the altar is fixed by a bed of grey wood-ash, at least 3[m] long by 0·25[m] thick. Round it were found bronze bowls, miniature shields, and an archaic scarabaeoid seal.

More widely scattered were tiles and architectural terracottas of two distinct periods: (*a*) *Archaic.* Many pieces of a *sima* in low relief decorated with the *motif* of a two-horse chariot, driver, two hoplites, and hound (*Ann. Brit. Sch. Ath.* 1904—1905 xi. 300 ff. pl. 15). Antefixes in the form of a *Gorgóneion* (*ib.* p. 303 fig. 20). *Akrotéria* (?) of large birds (eagles?). The leg of a crouching or running human figure in high relief, probably from the pediment (*ib.* p. 300 fig. 18). Transitional in character is an antefix representing the Gorgon with two snakes rising from her shoulders and two others held in her hands—a pose which recalls that of the 'Minoan' snake-goddess (*ib.* p. 304 fig. 22). (*b*) *Developed style.* Fragments of a deeper *sima* with lion-heads etc. of the conventional sort. Fragments of palmette-shaped antefixes (*ib.* p. 304 fig. 21).

The votive offerings belong mostly to the archaic period (*s.* vii—v B.C.) and comprise: (i) *Bronzes.* At least four large shields decorated with zones of animals. One (0·49[m] across) had as central boss the head and forepart of a lion, which pins down a couple of sphinxes and is flanked by two lions rampant on either side of a 'tree-of-life.' A dozen small shields, a miniature cuirass, a miniature helmet. Parts of about fourteen tripods. Eight bowls. Numerous small figures of oxen. (ii) *Terracottas.* About forty lamps and twelve torch-holders (*ib.* p. 307 fig. 23). About thirty large cups or bowls.

A mile to the north-west of the site there was found in 1907 a slab, which records the restoration by Hierapytna (*c.* 145—139 B.C.) of certain statues in the temple of Zeus

Δικταῖος (R. C. Bosanquet *ib.* 1908—1909 xv. 340, S. A. Xanthoudides in the Ἐφ. Ἀρχ. 1908 p. 197 ff. no. 1 fig. 1 *ἐπὶ τᾶς* Καμρίδος (*sc.* a tribe at Hierapytna, cp. Steph. Byz. *s.v.* Ἱεράπυτνα) *κοσμόντων | τῶν σὺμ Βουάω τῶ Ἀμφέροντος, | ἐπεμέληθεν ἐν τῶι ἱερῶι τῶ | [Ζ (or Τ)]ηνὸς Δικταίω, τὰ ἀρχαῖα | [ά]γάλματα θαραπεύσαντες, | [θεὸ]ς ἐπισκευῶσαι καὶ χρυσῶ[σαι] | Ἀθαναίαν, Ἄρτεμιν, Ἄτλαν[τα, τ]ὰς Σφίγγας ἀστραγαλίσ[αι] ἐπὶ τῶν ὑποποδίων, καὶ | [? Ποσ]ειδᾶ, Δία, Ἥρας πρόσωπον, | [? Δατὼ]ν καὶ Νίκαν ἀναγράψαι· | [οἶδ' ἐκ]ὸσ(μ)ιον, Βούαος Ἀμφέ[ροντος, Ἀκ]άσσων Βραμισάλ|.....ς Εὐρυκάρτεος, | .....Εὐρυκάρτεος, | .....υθεος, | .....ς Μοιρίλ[ω]|- - -*). A mutilated inscription recording an agreement between Knossos and Hierapytna, which was found in the church of St Nikolaos near *Palaikastro* (F. Halbherr in the *Museo Italiano di Antichità Classica* 1890 iii. 612 ff. no. 36), must likewise have come from the precinct of Zeus Δικταῖος, where it had probably been set up during the same period of Hierapytna's supremacy.

But by far the most important epigraphic discovery connected with the site was that of the now famous hymn to Zeus Δικταῖος, first published by R. C. Bosanquet (*Ann. Brit. Sch. Ath.* 1908—1909 xv. 339—356 pl. 20), restored and translated by G. Murray (*ib.* pp. 357—365), and expounded at large by Miss J. E. Harrison ('The Kouretes and Zeus Kouros' *ib.* pp. 308—338, *ead. Themis* Cambridge 1912 pp. 1—29 ('The Hymn of the Kouretes')). With one exception, already noted (*supra* i. 15 n. 6), I give the text as printed by G. Murray:

Ἰώ,
Μέγιστε Κοῦρε, χαῖρέ μοι,
Κρόνιε, παγκρατὲς γάνος,
βέβακες
δαιμόνων ἀγώμενος·
Δίκταν ἐς ἐνιαυτὸν ἕρ-
πε καὶ γέγαθι μολπᾷ,
Τάν τοι κρέκομεν πακτίσι
μείξαντες ἄμ' αὐλοῖσιν,
καὶ στάντες ἀείδομεν τεὸν
ἀμφὶ βωμὸν εὐερκῆ.
Ἰώ, κ.τ.λ.
Ἔνθα γὰρ σέ, παῖδ' ἄμβροτον,
ἀσπιδ[ηφόροι τροφῆες]
παρ' Ῥέας λαβόντες πόδα
κ[ρούοντες ἀπέκρυψαν].
Ἰώ, κ.τ.λ.
. . . . .
. . . . .
. . . . .
. . . τᾶ]ς καλᾶς Ἀο(ῦ)ς.

Ἰώ, κ.τ.λ.
[Ὧραι δὲ βρ]όον κατῆτος
καὶ βροτο(ὐ)ς Δίκα κατῆχε
[πάντα τ' ἄγρι' ἀμφεπ]ε ζῷ'
ἀ φίλολβος Εἰρήνα.
Ἰώ, κ.τ.λ.
Ἀ[μιν θόρε, κές στα]μνία,
καὶ θόρ' εὔποκ' ε[ς πόμνια,
κές λήϊ]α καρτῶν θόρε,
κές τελεσ[φόρους σίμβλους].
Ἰώ, κ.τ.λ.
[Θόρε κές] πόληας ἀμῶν,
κές ποντοφόρο(υ)ς νᾶας,
θόρε κές ν[έους πολ]είτας,
θόρε κές Θέμιν κ[αλάν].

This hymn, engraved *c.* 200 A.D. but composed *c.* 300 B.C., expresses in cultured poetical Greek, with a dash of Doric dialect, beliefs that had descended from much earlier times. It invokes Zeus as the 'greatest Lad of Kronos' line' to come to Dikte for the new year at the head of the *daimones* (perhaps the gods in general (Plat. *Phaedr.* 246 E στρατιὰ θεῶν τε καὶ δαιμόνων, cp. *supra* pp. 43, 63 n. 9) rather than the Kouretes in particular (Strab. 466 δαίμονας ἢ προπόλους θεῶν)) and to take delight in the dance about his altar—a dance accompanied by harps and pipes. It goes on to tell how the Kouretes once received him as a babe from Rhea and hid him in safety with the sound of their beating feet, [how under the reign of Zeus foul Darkness was followed by] fair Dawn, the Seasons began to be fruitful year by year, Justice spread over the world, and Peace brought wealth in its train. And now once more comes the invitation to leap in the ritual dance, which shall ensure full jars, fleecy flocks, crops in the fields, and honey in the hives, prosperity alike on land and sea, youthful citizens and established Right.

Mount Ide[1].

The god here invoked is clearly thought of as coming from afar to witness, or even to join in, his worshippers' dance—a dance which very possibly originated as a piece of pure magic. But I do not on that account see in him 'a Kouros who is obviously but a reflection or impersonation of the body of Kouretes' (Miss J. E. Harrison *Themis* p. 27) any more than I regard the Bull Dionysos, who is invited to visit his temple at Elis (*carm. pop.* 5 Hiller—Crusius *ap.* Plout. *quaestt. Gr.* 36), as a projection of the Elean women. The *Creator Spiritus* is not lightly to be identified with the *spiritus creatorum*.

[1] Mt Ide bore a name (Ἴδη) which, like many mountain-names (Schrader *Reallex.*[2] p. 88 f.), means 'forest, wood' (F. Solmsen in the *Indogermanische Forschungen* 1908 xxvi. 109 ff., A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 10, *id. Hattiden und Danubier in Griechenland* Göttingen 1909 p. 11 f. ('Ida'), Boisacq *Dict. étym. de la Langue Gr.* p. 365 f.). It had flourishing oak-trees (Dionys. *per.* 503). And it was famous for its cypresses (Theophr. *hist. pl.* 3. 2. 6, 4. 1. 3, Nik. *ther.* 585, Verg. *georg.* 2. 84, Plin. *nat. hist.* 16. 142. Claud. *de rapt. Pros.* 3. 370 ff. confuses Mt Ide in the Troad), which probably stood in some relation to the cult of Rhea (*supra* i. 649 n. 1) or of Zeus (F. Olck in Pauly—Wissowa *Real-Enc.* iv. 1920, 1924, 1926, *supra* i. 558 n. 5); for not only were Cretan cypresses called δρυῖται (Theophr. *caus. pl.* 1. 2. 2), but beams of cypress were used to roof the temple in which were celebrated the rites of Rhea and Zagreus (Eur. *Cretes frag.* 472 Nauck[2] *ap.* Porph. *de abst.* 4. 19 cited *supra* i. 648 n. 1). A fruit-bearing poplar grew in the mouth of the Idaean Cave (Theophr. *hist. pl.* 3. 3. 4 ἐν Κρήτῃ δὲ καὶ αἴγειροι κάρπιμοι πλείους εἰσί· μία μὲν ἐν τῷ στομίῳ τοῦ ἄντρου τοῦ ἐν τῇ Ἴδῃ (so J. G. Schneider for τοῦ ἐν τῷ Ἴδῃ cod. U. τοῦ ἐν τῷ Ἴδης codd. M. V. ἐν τῇ Ἴδῃ edd. Ald. Heins.), ἐν ᾧ τὰ ἀναθήματα ἀνάκειται, ἄλλη δὲ μικρὰ πλησίον· κ.τ.λ., cp. *id.* 2. 2. 10, Aristot. *mir. ausc.* 69), though Pliny describes it as a willow (Plin. *nat. hist.* 16. 110 salix...una tamen proditur ad maturitatem perferre solita in Creta insula ipso descensu Iovis speluncae durum ligneumque (*sc.* semen), magnitudine ciceris). Iron-coloured stones shaped like the human thumb were found in Crete and known as *Idaei dactyli* (Plin. *nat. hist.* 37. 170, Isid. *orig.* 16. 15. 12, Solin. 11. 14); if these were fossil belemnites (E. Babelon in Daremberg—Saglio *Dict. Ant.* ii. 1465), they were doubtless viewed as thunderbolts (C. Blinkenberg *The Thunderweapon in Religion and Folklore* Cambridge 1911 p. 76 f. ('Thunderstones (Belemnites)')).

Mt Ide, which, as the ancients said, sees the sun before the sunrise (Solin. 11. 6, Prisc. *per.* 527 f. (*Geogr. Gr. min.* ii. 194 Müller)), was not unnaturally associated with the Hellenic sky-god. From *s.* v B.C. onwards we hear of Zeus Ἰδαῖος (Eur. *Cretes frag.* 472 Nauck[2] *ap.* Porph. *de abst.* 4. 19 cited *supra* i. 648 n. 1, Polyb. 28. 14. 3 περὶ τούτων κειμένης ἐνόρκου συνθήκης παρὰ τὸν Δία τὸν Ἰδαῖον, cp. Schöll—Studemund *anecd.* i. 264 f. Ἐπίθετα Διός no. (50) ἰδαῖον, 266 Ἐπίθετα Διός no. (42) ἰδαῖον, 281 Ἐπίθετα τοῦ Διός... ἰδαῖος. In Nonn. *Dion.* 13. 236 καὶ χθόνα Νωδαίοιο Διὸς κ.τ.λ. G. Falkenburg, G. H. Moser, and Count de Marcellus would read χθονὸς Ἰδαίοιο. J. J. Scaliger cj. χθονὸς ὠδαίοιο. F. Graefe cj. χθόνα Δικταίοιο).

Zeus is never said to have been born on Mt Ide (in Diod. 5. 70 cited *supra* p. 928 n. 0 the right reading appears to be Δίκτῃ, not Ἴδῃ: at most we have Mart. *ep.* 4. 1. 2 Dictaeum...tulit Ida Iovem); the claims of Mt Aigaion (*supra* p. 925 n. 1) and Mt Dikte (*supra* p. 927 n. 1) were too strong. He is, however, said to have been brought by the Kouretes living near Mt Ide to a cave and to have been nurtured there by the nymphs on honey and the milk of the goat Amaltheia (Diod. 5. 70 τὴν δὲ Ῥέαν...τὸν Δία τεκοῦσαν... κλέψαι καὶ δοῦναι λάθρᾳ τοῖς Κούρησιν ἐκθρέψαι τοῖς κατοικοῦσι πλησίον ὄρους τῆς Ἴδης. τούτους δ' ἀπενέγκαντας εἴς τι ἄντρον παραδοῦναι ταῖς Νύμφαις, παρακελευσαμένους τὴν πᾶσαν ἐπιμέλειαν αὐτοῦ ποιεῖσθαι. αὗται δὲ μέλι καὶ γάλα μίσγουσαι τὸ παιδίον ἔθρεψαν καὶ τῆς αἰγὸς τῆς ὀνομαζομένης Ἀμαλθείας τὸν μαστὸν εἰς διατροφὴν παρείχοντο, Ov. *fast.* 5. 115 f Naïs Amalthea, Cretaea nobilis Ida, | dicitur in silvis occuluisse Iovem, Iuv. 13. 41 et privatus adhuc Idaeis Iuppiter antris) together with Aigokeros or Capricornus (pseudo-Eratosth. *catast.* 27 p. 237 f. Maass <Αἰγοκέρωτος.> οὗτός ἐστι τῷ εἴδει δμοιος τῷ Αἰγίπανι. ἐξ ἐκείνου

δὲ γέγονεν. ἔχει δὲ θηρίου τὰ κάτω μέρη καὶ κέρατα ἐπὶ τῇ κεφαλῇ. ἐτιμήθη δὲ διὰ τὸ σύντροφος εἶναι τῷ Διί, καθάπερ Ἐπιμενίδης ὁ τὰ Κρητικὰ ἱστορῶν φησιν, ὅτι ἐν τῇ Ἴδῃ συνῆν αὐτῷ, ὅτε ἐπὶ τοὺς Τιτᾶνας ἐστράτευσεν (οὗτος δὲ δοκεῖ εὑρεῖν τὸν κόχλον, [ἐν] ᾧ τοὺς συμμάχους καθώπλισεν), <ἢ> διὰ τὸ τοῦ ἤχου Πανικὸν καλούμενον, ὃ οἱ Τιτᾶνες ἔφευγον. παραλαβὼν δὲ τὴν ἀρχὴν ἐν τοῖς ἄστροις αὐτὸν ἔθηκε καὶ τὴν αἶγα τὴν μητέρα. διὰ δὲ τὸν κόχλον τὸν θαλάσσιον παράσημον ἔχει ἰχθύος, cp. schol. Arat. *phaen.* 284, Arat. Lat. p. 237 f. Maass, schol. Caes. Germ. *Aratea* p. 407, 9 ff. Eyssenhardt, Hyg. *poet. astr.* 2. 28). Adrasteia his nurse made him a golden ball (Ap. Rhod. 3. 132 ff. *καί κέν τοι ὑπάσαιμι Διὸς περικαλλὲς ἄθυρμα* | *κεῖνο, τό οἱ ποίησε φίλη τροφὸς Ἀδρήστεια* | *ἄντρῳ ἐν Ἰδαίῳ ἔτι νήπια κουρίζοντι,* | *σφαῖραν ἐυτρόχαλον...* | ... | *χρύσεα μέν οἱ κύκλα τετεύχαται· ἀμφὶ δ' ἑκάστῳ* | *διπλόαι ἀψῖδες περιηγέες εἰλίσσονται·* | *κρυπταὶ δὲ ῥαφαί εἰσιν· ἔλιξ δ' ἐπιδέδρομε πάσαις* | *κυανέη. ἀτὰρ εἴ μιν ἔαῖς ἐνὶ χερσὶ βάλοιο,* | *ἀστὴρ ὥς, φλεγέθοντα δι' ἠέρος ὅλκὸν ἴησιν.* H. Posnansky *Nemesis und Adrasteia* Breslau 1890 p. 175 f. finds Adrasteia, the infant Zeus, and his ball on a coin of Laodikeia illustrated *supra* i. 153 fig. 129. More *ad rem* are the cointypes discussed *supra* i. 51 f. figs. 27 and 28, 547; for there the cosmic significance of the ball (K. Sittl *Der Adler und die Weltkugel als Attribute des Zeus* Leipzig 1884 p. 45 ff.) is apparent) and put him to sleep in a golden *Iîknon* (Kallim. *h. Zeus* 46 ff. *Ζεῦ, σὲ δὲ Κυρβάντων ἑτάραι προσεπηχύναντο* | *Δικταῖαι Μελίαι, σὲ δ' ἐκοίμισεν Ἀδρήστεια* | *λίκνῳ ἐνὶ χρυσέῳ, σὺ δ' ἐθήσαο πίονα μαζὸν* | *αἰγὸς Ἀμαλθείης, ἐπὶ δὲ γλυκὺ κηρίον ἔβρως.* | *γέντο γὰρ ἐξαπίνας Πανακρίδος ἔργα μελίσσης* | *Ἰδαίοις ἐν ὄρεσσι, τά τε κλείουσι Πάνακρα).* Hence in the Rhapsodic theogony Adrasteia, daughter of Melissos and Amaltheia, is associated with her sister Eide (Gruppe *Gr. Myth. Rel.* p. 1086 n. 0: 'die Göttin Ida?') as protectress of all laws including those of Zeus and Kronos (Orph. *frag.* 109 Abel *ap.* Herm. *in* Plat. *Phaedr.* p. 148 (p. 161, 15 ff. Couvreur)). Lastly, Zeus was first served in the Idaean Cave by Aetos the beautiful child of Earth (interp. Serv. *in* Verg. *Aen.* 1. 394 est et alia fabula. apud Graecos legitur, puerum quendam terra editum admodum pulchrum membris omnibus fuisse, qui Ἀετὸς sit vocatus. hic cum Iuppiter propter patrem Saturnum, qui suos filios devorabat, in Creta insula in Idaeo antro nutriretur, primus in obsequium Iovis se dedit, post vero cum adolevisset Iuppiter et patrem regno pepulisset, Iuno permota forma pueri velut paelicatus dolore eum in avem vertit, quae ab ipso ἀετὸς dicitur Graece, a nobis aquila propter aquilum colorem, qui ater est. quam semper Iuppiter sibi inhaerere praecepit et fulmina gestare: per hanc etiam Ganymedes cum amaretur a Iove dicitur raptus, quos Iuppiter inter sidera collocavit. Cp. *supra* pp. 751 n. 2, 777). Copper coins of Crete issued by Titus (Rasche *Lex. Num.* iii. 306, Suppl. ii. 262) and Domitian (J. N. Svoronos *Numismatique de la Crète ancienne* Mâcon 1890 i. 344 pl. 33, 22 (=my fig. 831), Head *Hist. num.*² p. 479) have for reverse type an eagle inscribed ΔΙΟΣ ΙΔΑΙΟΥ.

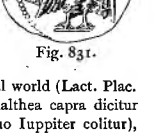


Fig. 831.

Other myths were readily attached to the same locality. It was 'in Idaean caves' that Hermaphroditos was reared by Naiad nymphs (Ov. *met.* 4. 288 f.) and that the Telchines were wont to work (Stat. *silv.* 4. 6. 47).

The worship of Zeus on Mt Ide, famous throughout the classical world (Lact. Plac. *in* Stat. *Theb.* 4. 105 Olenos Arcadiae civitas, in qua Iovem Amalthea capra dicitur nutrisse, quae in cultum Iovis Idam provocat, montem Cretae, in quo Iuppiter colitur), centred about the Idaean Cave. This was distant from Knossos some twenty miles as the crow flies; but the two were connected by a tolerable road and pilgrims could rest in the shade of trees by the wayside (Plat. *legg.* 625 A—B). The Cave itself was sacred to Zeus and the meadows near it were regarded as his (Diod. 5. 70 *κατὰ δὲ τὴν Ἴδην, ἐν ᾗ συνέβη τραφῆναι τὸν θεόν, τό τε ἄντρον ἐν ᾧ τὴν δίαιταν εἶχε καθιέρωται καὶ οἱ περὶ αὐτὸ λειμῶνες ὁμοίως ἀνεῖνται περὶ τὴν ἀκρώρειαν ὄντες*). He had repaid his debt to the bees by turning them gold-bronze in colour and making them impervious to wintry weather (*id. ib.*). Concerning the cavern-ritual we know but little. Votive offerings were to be seen in the entry (Theophr. *hist. pl.* 3. 3. 4 quoted *supra*). Pythagoras is said to have gone down into the Cave with Epimenides (Diog. Laert. 8. 3 *εἶτ' ἐν Κρήτῃ σὺν Ἐπιμενίδῃ κατῆλθεν*

εἰς τὸ Ἰδαῖον ἄντρον), who was both a Cretan and a Koures (*supra* p. 191). Fortunately further details are given us by Porph. *v. Pyth.* 17 (cited *supra* i. 646 n. 3). It appears that Pythagoras first repaired to the mystics of Morges, one of the Idaean Daktyloi, by whom he was purified with the thunder-stone (*τῇ κεραυνίᾳ λίθῳ*—probably a belemnite. (*supra*)), at daybreak lying prone beside the sea and at night beside a river, his head wrapped in the fleece of a black ram. He then descended into the Idaean Cave wearing black wool, spent there the customary thrice nine days, made a funeral offering (*καθήγισε*) to Zeus, saw the throne which was strown for the god once a year, and inscribed on his tomb an epigram entitled 'Pythagoras to Zeus,' which begins *ὧδε θανὼν κεῖται Ζάν, ὃν Δία κικλήσκουσιν* (*supra* i. 158 n. 2, 646 n. 3, ii. 341 n. 6, 345 n. 1). It is abundantly clear that the cavern-rites were concerned with death as well as birth. Zan or Zeus lay dead. Yet yearly a throne was spread for him, *i.e.* for Zeus come to life again as Zagreus (*supra* i. 646 f.). Pythagoras sought to share his death and resurrection.

Apart from the cave-sanctuary there were in *s.* v B.C.—if we may trust the *Cretans* of Euripides—temples of Zeus Ἰδαῖος roofed with cypress-planks, which were fastened together with glue made of bull's hide. Here the mystics of the god made thunder like Zagreus, feasted on raw flesh, brandished torches for the mountain-mother, and transformed from Kouretes into Bakchoi led thenceforward a life of ceremonial purity (Eur. *Cretes frag.* 472 Nauck[2] *ap.* Porph. *de abst.* 4. 19 cited *supra* i. 648 n. 1). The significance of these rites has already been discussed (*supra* i. 648 ff.).

An archaic *boustrophedón* inscription recording a convention between Gortyna and Rhizenia stipulates that the Rhizeniates shall send the victims to Mt Ide, every other year, to the value of 350 *statêres* (F. Halbherr in the *Am. Journ. Arch.* 1897 i. 204 ff. no. 23, F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 257 f. no. 4985, S. A. Xanthoudides in the Ἐφ. Ἀρχ. 1908 p. 236 *θιοί. ἐπὶ τοῖδ(δ)ε Ῥι[ττέν]ι[οι Γ]ορ[τυνίοις αὐτ]όν[ο]μ[ο]ι καὶ[τ]όδικοι* (space) *[τ]ὰ θ[ί]ματα παρέκοντες ἐς Βίδαν [τρ][τ]οι [Fέ]ρει τριακατίοις στατέρανς καὶ πεν|τέκοντα*). We infer that the celebration on Mt Ide was trieteric (*supra* i. 662, 690 ff., 695 n. 8).

In Hellenistic times the appellative of Zeus was spelled Βιδάτας (=*Fιδάτας*, the god of Mt Ide. So first J. Schmidt in the *Zeitschrift für vergleichende Sprachforschung* 1863 xii. 217 Βιδάτας ('Ἰδήτης?), cp. S. A. Xanthoudides *loc. cit.* H. B. Voretzsch in *Hermes* 1870 iv. 273 wrongly assumed connexion with the Phrygian and Macedonian *βέδυ* (Clem. Al. *strom.* 5. 8 p. 357, 11 ff. Stählin) and concluded that Βιδάτας meant *ὑέτιος, ὄμβριος*). A treaty of *c.* 150 B.C. between Lyttos and Olous makes the Lyttians swear by Zeus Βιδάτας (*Corp. inscr. Att.* ii. 1 no. 549*b*, 5 ff. = F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 380 f. no. 5147*b*, 5 ff. [*ὀμνύω τὰν Ἑστίαν κ*]*αὶ Τῆνα Βιδάταν καὶ Τῆνα* [--] | [--*καὶ Ἀπέλλω*]*να Πύτιον καὶ Λατῶν καὶ* [*Α*]*ρ*[*τεμιν* - -] | [- - *κ*]*αὶ τὰν Βριτόμαρτιν καὶ τὸς ἄ*[*λλος θιός* - -]. Another treaty, of *c.* 100 B.C., between Gortyna and Hierapytna on the one side and Priansos on the other, mentions a temple of Zeus Βιδάτας on the frontier of Priansos (F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 301 ff. no. 5024, 22 f. [- - *ἐς τὸ ἱαρὸν τῶ? Τπη*][*νὸς*]*τῶ Βιδατάω κὴς τὰνς Ἀντρι*[- -]. Cp. *ib.* 60 and 77 (cited *supra* p. 723 n. 0)).

The oldest cult-cavern of Mt Ide seems to have been the grotto, known locally as *Maurospelaion*, high up on the two-peaked mountain of *Kamares*, the southernmost bastion of the Idaean *massif*. This was first visited in 1894 by A. Taramelli ('A visit to the Grotto of Camares on Mount Ida' in the *Am. Journ. Arch.* 1901 v. 437—451 with map, elevation, plan, and section (map and plan copied by L. Bürchner in Pauly—Wissowa *Real-Enc.* ix. 859 f.)). It was thoroughly explored in 1913 by a party from the British School at Athens (R. M. Dawkins and M. L. W. Laistner 'The Excavation of the Kamares Cave in Crete' in the *Ann. Brit. Sch. Ath.* 1912—1913 xix. 1—34 with figs. 1—8 and pls. 1 (view), 2 (plan), 3 (section), 4—12 (pottery)). The finds included a couple of neolithic sherds, a few pieces of 'Early Minoan' spouted vessels, many hand-some vases of 'Middle Minoan i and ii' date, a little 'Middle Minoan iii' ware, and a very little 'Late Minoan,' the series ending with two *Bügelkannen*. The grotto, which is free from snow for only a few months in the year, can hardly have been a dwelling and must rather be regarded as a sanctuary, presumably of the 'Minoan' mountain-goddess Rhea.

A. Taramelli in the *Am. Journ. Arch.* 1901 v. 434 held that it was the cult-centre of Zeus Ἰδαῖος for the whole commune of Phaistos. But there is no real evidence to connect it with Zeus at all.

The Idaean Cave of classical times has been identified beyond all doubt with the great cavern 500 ft above the plateau of *Nida* (τὰν Ἴδαν), a fresh grassy level lying to the east of the mountain-top. The actual summit of Ide (*Psiloriti* for Ὑψηλωρείτης), which attains the height of 8060 ft, is occupied by a small Greek monastery of the Holy Cross (*Timios Stauros*). Mr T. Fyfe, who spent a night on the summit, tells me (Jan. 9, 1923) that of the monastery little now remains except the church. This has a western domed compartment (13 ft 6 ins in diameter) with a narrow door leading to an oblong nave (11 ft 6 ins long by 8 ft 3 ins broad) covered by an elliptical dome. Eastwards of this is the sanctuary, entered by a semicircular arch and containing an aumbry opposite to a shallow recess for a seat. At the extreme east end is a built-in altar-table. The whole is very roughly constructed of rubble stone-work and is probably not very ancient, though the circular

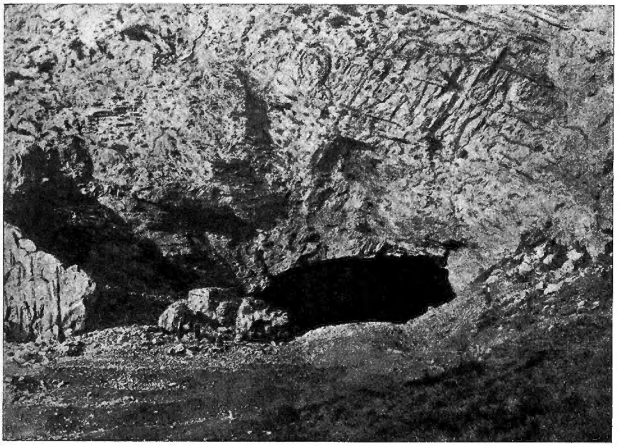

Fig. 832.

western portion is said to be older than the remainder. About 3060 ft below the summit, but still at an altitude of some 5000 ft, lies *Nida*. And the Cave in the western side of its mountain-wall is used as a shelter both by shepherds and by travellers making the ascent from *Anogeia* (T. A. B. Spratt *Travels and Researches in Crete* London 1865 i. 9, 19. For *Anogeia* see *supra* i. 163 n. 1). In the summer of 1884 a shepherd named G. Pasparaki, grubbing in the cavern with a stick, chanced to find fragments of terra-cotta lamps, a few pieces of gold foil, and sundry small bronzes. These finds, being talked about, led to a visit the same year from E. Fabricius ('Alterthümer auf Kreta. II Die Idäische Zeusgrotte' in the *Ath. Mitth.* 1885 x. 59—72 with plan and 9 figs., *id.* 'Zur Idäischen Zeusgrotte' *ib.* p. 280 f.) and to a systematic exploration in 1885 by F. Halbherr and G. Aeraki under the auspices of J. Hazzidakis and the Syllogos of Kandia (F. Halbherr 'Scavi e trovamenti nell' antro di Zeus sul monte Ida in Creta' in the *Museo Italiano di Antichità Classica* 1888 ii. 689—768 with numerous figs., pls. 11 (two photographs, of which the second = my fig. 832), 12 (*a* plan, *b*—*d* sections = my figs. 833—836), and an Atlas of 12 pls., P. Orsi

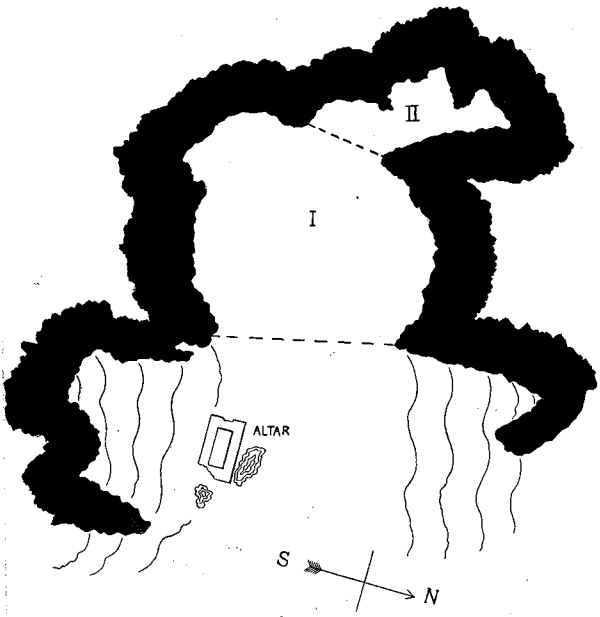

Fig. 833.

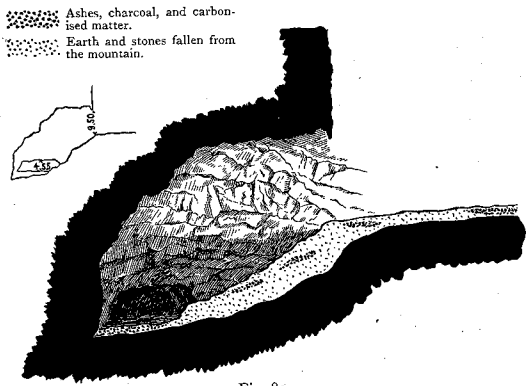

Fig. 834.

'Studi illustrativi sui bronzi arcaici trovati nell' antro di Zeus Ideo' *ib.* pp. 769—904 with a few figs., A. L. Frothingham 'Early Bronzes recently discovered on Mount Ida in Krete' in the *Am. Journ. Arch.* 1888 iv. 431—449 with figs. 13—16 and pls. 16—20, H. Thiersch 'Altkretisches Kuretengerät' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1913 xxviii Arch. Anz. pp. 47—53 with fig. 1).

The Cave comprises three well-marked divisions: (*a*) the entry; (*b*) chamber I, the *sanctum*; (*c*) chamber II, the *sanctum sanctorum*.

(*a*) On the south side of the entry is a great fallen rock shaped into an altar, the top of which forms an oblong mass (4·80^{m} long, 1·95^{m} broad, 0·88^{m} high) with a wide step all round it (*c.* 1·45^{m} broad, *c.* 3^{m} high). Beside it are fragments split off from the parent block and forming deep crannies and cavities, in which many small votive offerings came to light. On the north side are limestone bases of bronze statues etc. formerly erected on

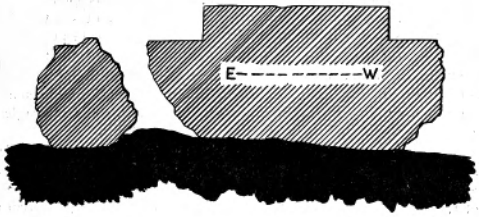

Fig. 835.

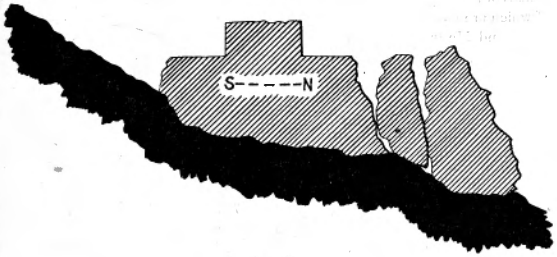

Fig. 836.

the stair-like rocky slope (cp. Theophr. *hist. pl.* 3. 3. 4 cited *supra*). Immediately in front of the Cave numerous objects in bronze, silver, and gold were unearthed.

(*b*) The *sanctum*, entered through a broad yawning aperture (9·50^{m} high), forms a wide hall (25^{m} to 31^{m} across) with rocky walls showing no trace of artificial niches. Snow-drifts have carried down into it a thick bed of earth and stones. This contains patches of black carbonised matter, and has yielded the bulk of the articles in plate-bronze.

(*c*) The *sanctum sanctorum* is a smaller chamber (22^{m} long, 8^{m} broad, over 4·50^{m} high), opening out of the *sanctum* but almost entirely dark. The floor is covered to a depth of several feet with a layer of ashes and charcoal, in which were found fragments of animal-bones half-burnt, several ox-skulls with horns attached, and many terra-cotta lamps.

Below the Cave, on the western edge of the *Nida*-plain, are the foundations of a Roman house once occupied by the custodians of the sanctuary.

The only 'Minoan' object known to have been found in the Cave is a lenticular gem of rock crystal representing a woman, who blows a conch-shell before a group of three sacred trees (Furtwängler *Ant. Gemmen* iii. 47 fig. 22, Sir A. J. Evans *The Palace of Minos at Knossos* London 1921 i. 221 fig. 167, *supra* i. 649 n. 3). This is interesting in view of the tradition that Aigokeros, the *connutricius...Iovis* (Arat. Lat. p. 237 Maass) in the Idaean Cave, was the discoverer of the conch (*supra*). I should conjecture that it was used to make mock-thunder in the rites of Zagreus, the re-born Zeus. It may also be pointed out that Aigokeros or Capricornus was derived from Mesopotamia, where he figures as the constellation *Suḫur-mâš*, the 'Fish-goat' (A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 117 figs. 94—96 and Index p. 362, *id.* in Roscher *Lex. Myth.* iv. 1463 f. figs. 24, 26—29). It is therefore tempting to suppose that Aigokeros came to Crete from the same quarter and along the same route as Zagreus (*supra* i. 651). Further, in Mesopotamian star-lore the constellation *Suḫur-mâš* is so intimately related to the constellation *Našru*, Aquila, that the 'Eagle' on occasion takes the place of the 'Fish-goat' (A. Jeremias *locc. citt.*); and the 'Eagle' is personified as the god Zamama (A. Jeremias *Handbuch* p. 129, *id.* in Roscher *Lex. Myth.* iv. 1492). It might be contended, without undue rashness, that we have here the ultimate reason for the Cretan association of Aigokeros with Zeus. But Jeremias goes far beyond this, when he suggests that Zamama and his 'Eagle' are actually the *Urbild* of Zeus and his eagle (*id. ib.*). *Panbabylonismus*!

Votive objects found in the Cave include the following: (1) Convex circular shields of thin bronze, with central boss representing lion's head, eagle or hawk, etc. in high relief and concentric zones of decoration (F. Halbherr *loc. cit.* p. 695 ff. nos. 1—9 Atlas pls. 2—5, 9, 1, 10, 3 f.). (2) A *tympanon* of thin bronze with a *quasi*-Assyrian representation of Zeus and the Kouretes (*id. ib.* p. 709 f. no. 10 Atlas pl. 1 = *supra* i. 645 pl. xxxv). (3) Cymbals of thin bronze (*id. ib.* p. 712 ff. nos. 1—10 with figs.). (4) Bronze *phiálai*, eight of which are embellished with low reliefs in three distinct styles—Cypriote, Egypto-Phoenician, and Mesopotamian (*id. ib.* p. 718 ff. nos. 1—7 Atlas pls. 6, 7, 8, 9, 2 f., 10, 1 f., 12, 8, 10). (5) Bronze *oinochóai* (*id. ib.* p. 725 Atlas pl. 12, 9, 12 f.). (6) Bronze *lébetes* (*id. ib.* p. 725 ff. nos. 1—5 Atlas pl. 12, 4). (7) Very archaic groups of decorative figures in cast bronze, *e.g.* war-ship with rowers, chariots, warriors, man milking cow, hounds, etc. (*id. ib.* p. 727 ff. nos. 1—14 Atlas pl. 11). (8) Archaic bronze statuettes of nude male and female figures (*id. ib.* p. 732 ff. nos. 1—5 with figs. Atlas pl. 12, 1 f.). (9) Votive animals in bronze (*id. ib.* p. 736 f. nos. 1 sheep (?) with fig., 2 bull, 3 bulls' horns, 4 goats Atlas pl. 12, 3). (10) Ornamental figures in bronze, *e.g.* sphinxes, lion, horse, doves, snakes (*id. ib.* p. 745 ff. with figs. Atlas pl. 12, 18). (11) Handles of vases, rings and feet of tripods, etc. in bronze (*id. ib.* p. 737 ff. with figs. Atlas pl. 12, 11, 14—17, 19 f.). (12) Disks of thin gold decorated with dots or rays (*id. ib.* p. 749 ff. with figs.). A small plaque of thin gold stamped in relief with a procession of four warriors bearing circular shields, within an oblong framework of spirals (*id. ib.* p. 751 with fig.): this may be of sub-'Minoan' date. Another plaque of gold inscribed ΙΟΥΩΗ | ϽΑΙΙΗ | ..... | ⊀ΟϽϽΑ, apparently a 'Gnostic' charm ending with [φυλ]άσσου. A few pieces of jewellery, *e.g.* an oblong plate of gold to which three draped female figures, with *bucrania* between them, are soldered; from the plate hangs a snake biting its own tail (*id. ib.* p. 752). (13) A small bearded (?) head in amber (*id. ib.* p. 753 f. Atlas pl. 12, 6). (14) Sundry objects in ivory, *e.g.* a bull carved in the round (*id. ib.* p. 754 no. 1 Atlas pl. 12, 7) and a perfume-bottle (?) in the shape of a headless female body (*id. ib.* p. 753 f. no. 2 with figs.). (15) Two pieces of rock-crystal shaped like plano-convex lenses (*id. ib.* p. 756. On the vexed question of classical lenses see H. Blümner *Technologie und Terminologie der Gewerbe und Künste bei Griechen und Römern* Leipzig 1884 iii. 298 ff.). (16) Two small oblong seal-stones of steatite (F. Halbherr *loc. cit.* p. 757 f. with fig.). (17) Phoenician or pseudo-Egyptian majolicas (*id. ib.* p. 758 ff. with figs.). (18) Objects in terra cotta, *e.g.* the archaic figurine of a bull; the two heads of a god, with a *modius*, and a goddess, with a diadem, embracing; lamps with acanthus-leaf handles (*id. ib.* p. 759 ff. with fig.). (19) Arrow-heads and lance-heads of iron (*id. ib.* p. 764 with figs.).

Mount Juktas, as seen from the west, showing the profile of the 'Pursuer' (Διώκτας).

See page 939 n. 1.

Mount Juktas[1].

(20) A tablet of terra cotta bearing in rubricated characters of Roman date the crucial inscription Δὶ Ἰδαί[ῳ] | εὐχὴν | Ἀστὴρ [Ἀ]λεξάν|δρου (E. Fabricius in the *Ath. Mitth.* 1885 x. 280 f., F. Halbherr *loc. cit.* p. 766).

Thus for more than a millennium—from 'Minoan' to Roman times—men paid their vows to Zeus Ἰδαῖος in the shadow of a great rock and turned again, well content, to the duties that awaited them in the sunlight five thousand feet below.

The cave on Mt Ide called *Arkesion* (*supra* p. 548 f.) has been identified tentatively with the *Kamares* grotto (L. Bürchner in Pauly—Wissowa *Real-Enc.* ix. 861). But its traditional connexion with the Kouretes (*supra* p. 549 n. 1) points rather to identification with the better known Idaean Cave, where in fact the Curetic *týmpanon* was found (*supra*). The name Ἀρκέσιον has been interpreted (L. Bürchner *loc. cit.*) as the 'Bear's Hole' (from ἄρκος, a doublet of ἄρκτος: see Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 53, Boisacq *Dict. étym. de la Langue Gr.* p. 78 f.)—a view which might be supported by the existence of a cavern usually described as that of the Bear (*Arkhoudhes*) in the promontory of *Akrotiri*, east of Kydonia (Canea) (Miss D. M. A. Bate in A. Trevor-Battye *Camping in Crete* London 1913 p. 248). After all, bears had some claim to be regarded as the nurses of the infant Zeus (*supra* i. 112 n. 5).

Mr Trevor-Battye *op. cit.* p. 108 ff. describes and illustrates his ascent of the mountain. He says (p. 119 ff.): 'The actual summit of Ida is a blunted cone with rounded sides. Most of the summit was clear of snow, but on the southern and western sides lay some large melting drifts. The loose stones that pave this cone are laid down flat by the wind. The summit, 8,193 feet higb, is now called Stavros... On the tip-top of Ida is a "monastery": every church in Crete is called a monastery. This particular one is a tiny little building made very strong against the wind; it is built on the same principle as the mountain-shepherds' huts—of slabs of stone laid one upon the other. At one point only has any mortar been used, just at the springing of the chancel dome. There were tapers inside for the devotees to burn before the ikons... I gathered...that a priest comes once a year to hold a service in this church. The church is surrounded by a walled enclosure that also includes a well of excellent ice-cold water... Beyond the enclosure a circle bad been cleared of stones, and here, said Ianni, once a year the people danced. Spratt tells how, as he went up to Ida, he saw forty ibex, and that a group were actually browsing on the summit; but that was over fifty years ago. I scanned the rocks in every direction in vain.'

[1] Mt Juktas, an isolated ridge running from south to north towards Knossos and the sea, attains a height of 2720 ft. Its modern Greek name Γιούχτας or Γιούκτας derives from an earlier Διώκτας and means the 'Pursuer' (διώκτης). Such a name of course presupposes a myth, and very fortunately the myth is preserved for us by Kallimachos, who describes the 'pursuit' (διωκτύν) of Britomartis by Minos (Kallim. *h. Artem.* 189 ff., *supra* i. 527 n. 1: cp. Diod. 5. 76 διωκομένην ὑπὸ Μίνω). The poet tells how Britomartis, to escape the embraces of Minos, plunged from the top of Mt Dikte into the sea, but omits to state what became of her disappointed lover. In all probability he was transformed into the mountain still called the 'Pursuer.' For the outline of Juktas, as seen from the west, is suggestive of a human face. A. Trevor-Battye *Camping in Crete* London 1913 p. 184 with pl. (my pl. xliii is reproduced from a photograph very kindly given me by Mr C. R. Haines) remarks: 'Rocks and mountains often bear a likeness to human lineaments; every traveller can recall many such resemblances, but none that I have seen have the convincing dignity of the face on Iuktas. The bearded face and the drapery or pillow on which the head reposes occupy the whole of the mountain-top. Seen in the flatness of the mid-day light it is an interesting outline and no more, but at turn of the sun the sculpturing begins. The sun works in masses, as Michelangelo worked; it carves out the planes of the face as Donatello carved them, letting detail go. So the chiselling continues, a high light here, a deepening shadow there, till with closed eyes the head has sunk down upon its pillow just as the sun is low.' Sir A. J. Evans *The Palace of Minos at Knossos* London 1921 i.

156 with fig. 112 informs us 'that the long ridge of the mountain rising in successive peaks has given rise to a widespread belief in the island that it reproduces the profile of the native Zeus.' It would seem, then, that in the popular interpretation of this natural phenomenon Minos has been dispossessed by Zeus.

The same process of religious expropriation can perhaps be detected in another famous feature of Mt Juktas—the so-called tomb of Zeus. It may be that this celebrated monument really was, as the schol. Kallim. *h. Zeus* 8 (*supra* i. 158 n. 2, cited *infra*) declares it to have been, *ab origine* the tomb of Minos (cp. Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 121 n. 3, *id. The Palace of Minos at Knossos* i. 154). The transition from king to god, always possible, becomes peculiarly probable in the case of one who was Διὸς μεγάλου ἀριστῆς (*Od.* 19. 179). A lawgiver who claimed to speak with the authority of Zeus might readily be regarded as Zeus incarnate (*supra* i. 662 with n. 1). The tomb has already engaged our attention at some length (*supra* i. 157—163). I shall therefore be content to collect here the ancient allusions to it—a task well, but not quite adequately, performed by J. Meursius *Creta, Cyprus, Rhodus* Amstelodami 1675 pp. 77—81—and to add a brief account of the excavations carried out on the site in 1909 by Sir A. J. Evans and Dr D. Mackenzie (Sir A. J. Evans *The Palace of Minos at Knossos* London 1921 i. 154 ff. figs. 112—114).

Psell. ἀναγωγὴ εἰς τὸν Τάνταλον (*supra* i. 158 n. 4) p. 348 Boissonade τοιαύτη μὲν καὶ ἡ δευτέρα δόξα περὶ τοῦ Διὸς τοῖς Ἕλλησιν· ἡ δὲ τρίτη ἱστορικωτέρα, καὶ ἴσως ἀληθεστέρα. αὐτόν τε γὰρ καὶ τὸν τούτου πατέρα τὸν Κρόνον οἱ μῦθοι ὁμόθεν ἀπὸ Κρήτης γεννῶσι, καὶ τὸν μὲν οὐκ ἴσασιν ὅπου γῆς κατορώρυκται, τοῦ δὲ τὸν ἐπὶ τῷ τάφῳ δεικνύουσι κολωνόν· εἶτα, τὴν θνητὴν ὑπεραναβάντες φύσιν, ἀγχισπόρους ποιοῦσι τῆς οὐσίας τῆς κρείττονος, καὶ πρὸς τὸ τῆς θειότητος εἶδος μεταβιβάζουσι. τούτῳ δὴ τῷ λόγῳ καὶ Ἑρμῆς προστίθεται ὁ Τρισμέγιστος. τἄλλα γὰρ παραθεωρῶν τοὺς μύθους, τοῦτον δὴ μόνον γυμνὸν ἐξεδέξατο, καὶ πρὸς τὴν ἐκείνου μίμησιν τὸν ἑαυτοῦ παῖδα διερεθίζει τὸν Τάτ (so J. F. Boissonade for τα cod. A. Τάνταλον cod. B).

For references to the tomb of Zeus in writers of the Renaissance and of modern times see *supra* i. 158 ff. A fifteenth-century map of Crete in the British Museum (MS. Add. 15, 760, *f.* 11), published by F. W. Hasluck in the *Ann. Brit. Sch. Ath.* 1905—1906 xii. 214 f. pl. 1, not only marks the *Sepulcru(m) Iouis* but adds a view of it, though—to judge from the representation of the neighbouring *Laberintus* as a circular maze-like structure—this is in the nature of a fancy-sketch.

A. Taramelli in 1899 published a rough plan of Mt. Juktas (*supra* i. 159 fig. 130), and drew special attention to the precinct-wall of 'Cyclopean' masonry, which crowns its northern summit at a height of *c.* 2300 ft above the sea (*supra* i. 160 fig. 132, 161 fig. 133). Within the wall he duly noted the scattered traces of a building, together with much broken pottery including pieces of 'Minoan' *pithoi* (*supra* i. 161 n. 1).

Sir A. J. Evans in 1909 determined the approximate date of the precinct-wall by finding in its inner interstices sherds of 'Middle Minoan i *a*' ware. 'Middle Minoan i' sherds were also abundant over the rocky surface enclosed by the wall. The cult here carried on passed through two well-marked phases, of 'Middle Minoan' and 'Late Minoan' date respectively.

During the earlier phase offerings were made in the open air at a great altar of ashes. This is represented by two *strata*—a layer of grey ashes yielding ceramic remains of the periods 'Middle Minoan i and ii,' and above it a layer of reddish burnt earth yielding sherds of 'Middle Minoan iii' date. Throughout both *strata* were votive relics in terra cotta—among the ashes, male and female figures, oxen, goats, human limbs (an arm perforated for suspension, two legs joined together), parts of animals (numerous clay ox-horns),

'prayer-pellets' like those of Petsofà (J. L. Myres in the *Ann. Brit. Sch. Ath.* 1902—1903 ix. 382); in the burnt earth, larger goats and oxen, the raised arms of a worshipper, clay locks of human hair, flat shell-like coils, and a limestone ladle with traces of an inscription in linear characters (class A). A similar ladle likewise inscribed was found in a deposit of the same date on *Troullos*, a foot-hill of Mt Juktas (S. A. Xanthoudides in the *Ἐφ. Ἀρχ.* 1909 p. 179 ff. figs. 1—4).

The later phase of the cult ('Late Minoan') witnessed the foundation of a rectangular building with walls of ashlar blocks and outer terrace-walls of rougher construction. The building was approached by an ascent (A—A) and comprised an entrance-chamber (B 1), a magazine (?) (B 2), and an inner room (C). In the floor of B 1 a large hollow has been dug by treasure-hunters. On the walls of B 2 fragments of a plaster-facing are still to be seen. And in C are remains of a paving in white-faced cement. The whole building 'seems to have reproduced the arrangement of a small house of the early Cretan and Aegean "but and ben" type, about 16 × 10 metres in its exterior dimensions' (Sir A. J. Evans *The Palace of Minos at Knossos* London 1921 i. 158 with fig. 114 = my fig. 837).

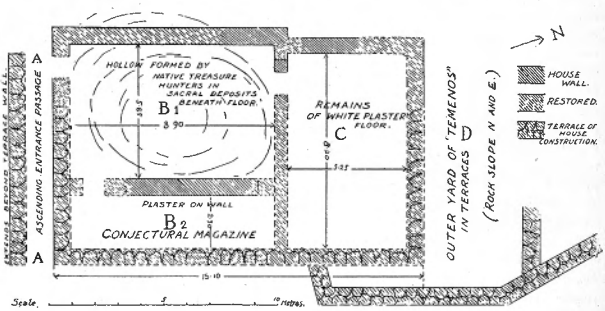

Fig. 837.

Outside the building, to the north, lay a *témenos* of roughly triangular shape supported by terrace-walls.

Here knowledge ends and conjecture begins. Sir Arthur Evans (*op. cit.* p. 158 ff.) surmises that the building described above 'was a little house of shelter and refection for the Goddess on her mountain top, a "Casa Santa,"' etc., and that the *témenos* was 'the hypaethral part of the Sanctuary, well adapted for the exposure of a pillar form of the divinity.' Further, he thinks that a gold signet from Knossos (*supra* p. 48 fig. 19), referable to the period 'Late Minoan ii,' represents 'the Minoan Mother Goddess...bringing down the warrior youth, whether her paramour or actual son, in front of his sacred pillar'—a scene which 'may be even taken to foreshadow the "Tomb of Zeus,"' for 'A later age seems to have regarded these baetylic pillars as actual tombs of divinities.'

Personally I should rather suppose that, just as Kinyras and his descendants were buried in the sanctuary of Aphrodite at Paphos (Ptolemaios of Megalopolis *frag.* 1 (*Frag. hist. Gr.* iii. 66 Müller) *ap.* Clem. Al. *protr.* 3. 45. 4 p. 35, 1 ff. Stählin and *ap.* Arnob. *adv. nat.* 6. 6), just as Erichthonios was buried in the precinct of Athena at Athens (Apollod. 3. 14. 7, *alib.*), just as Hippolytos was buried beside the temple of Aphrodite *Kataskopia* at Troizen (Paus. 2. 32. 3 f., cp. L. R. Farnell *Greek Hero Cults and Ideas of Immortality* Oxford 1921 p. 66)—and the list could be lengthened (see Clem. Al. *protr.* 3. 44. 4 ff. p. 34, 7 ff. Stählin, Arnob. *adv. nat.* 6. 6)—, so Minos the priestly king of Knossos lay buried within the circuit-wall of the mountain-goddess. I should conjecture that during his lifetime he had played the part of Zeus (*supra* i. 662 n. 1, cp. 527 n. 1),

Mount Alysis (?)[1].
Mount Arbios[2].

or rather of Zan the older form of Zeus (*supra* p. 340 ff.), and that after his death he continued to be venerated as Zan or Zeus incarnate. Hence the persistent tradition that the tomb was inscribed ZAN KPONOY (Enn. *loc. cit.*), TAN KPONOY (schol. Bern. Lucan. *loc. cit.*), or ὧδε *μέγας κεῖται* ΖΑΝ *ὃν* ΔΙΑ *κικλήσκουσι* (*supra* p. 345). Hence too the ingenious guess of a late grammarian that the inscription originally ran *Μίνωος τοῦ Διὸς τάφος* (schol. Kallim. *loc. cit.*).

Paganism in due course was superseded by, or at least overlaid with, Christianity. The southern and higher summit of Mt Juktas is topped by a church of *Αὐθέντης Χριστός*, 'Christ the Lord,' to which there is an annual pilgrimage on August 6, the feast of the *Μεταμόρφωσις* or 'Transfiguration.' The church contains a chapel of the Panagia (Sir A. J. Evans *op. cit.* i. 154 with n. 7, *supra* i. 162 n. 1).

[1] Schol. Arat. *phaen.* 33 *Δίκτῳ· Δίκτον* (*Δίκτον* om. cod. M.) *ἀκρωτήριον τῆς Κρήτης πλησίον τῆς Ἴδης τοῦ Κρητικοῦ ὄρους, ἔνθα ἐστὶν Ἄλυσίου Διὸς τέμενος παρὰ τὸ παρακείμενον ἐκεῖ ὄρος Ἄλυσις* (so ed. Ald. *περὶ τὸ περικείμενον ἅλσος*, with *ἡ ἄλυσος* above *ἅλσος* cod. A. *περὶ τὸ περικείμενον ἅλσος* cod. M.). E. Maass cj. *ἔνθα ἐστὶν Ἀλσείου Διὸς τέμενος.* < *ἐκλήθη δὲ οὗτος* > *παρὰ τὸ περικείμενον ἅλσος.* Ἀλύσιος as a hyperdorism for Ἠλύσιος is improbable.

[2] Zeus Ἄρβιος (Steph. Byz. *s.v.* Ἄρβις· *...ἔστι καὶ ἐν Κρήτῃ Ἄρβιος ὄρος, ἔνθα τιμᾶται Ἄρβιος Ζεύς*). C. Müller in his commentary on Ptol. 3. 15. 3 *Ἴνατος πόλις...Ἱερὸν ὄρος...Ἱεράπυτνα* and on Anon. *stadiasm. Mar. Magn.* 320 (*Geogr. Gr. min.* i. 506 Müller) identifies *Ἱερὸν ὄρος* with the mountain of Zeus Ἄρβιος—a view accepted by L. Bürchner in Pauly—Wissowa *Real.-Enc.* viii. 1530 ('Zeus Orbios'!), *ib.* xi. 1814.

R. Pashley *Travels in Crete* Cambridge—London 1837 i. 285 and T. A. B. Spratt *Travels and Researches in Crete* London 1865 i. 295 give illustrations of the cleft at Arvi. Pashley *op. cit.* p. 275 f. would locate the cult of Zeus Ἄρβιος at a point near the shore, where—as he was assured by the villagers of Haghio Vasili—ancient walls, since chiefly used in building the church, were formerly to be seen. Spratt *op. cit.* i. 294 concurred in this opinion. A. Trevor-Battye *Camping in Crete* London 1913 p. 147 f. was even more successful; for he found the memory of Zeus yet living in the locality. He spent an uncomfortable night in a general store at the village of Kalami, where he wanted to skin birds, press plants, and write. The natives, however, dropped in to talk. 'And I am not likely'—he says—'to forget the story of the Hammer of Zeus, for a hammer used to illustrate the story frequently fell very near my head as I skinned a bird on an inverted packing-case. They said that between us and the sea was a gorge in which, in its ultimate and very narrow ravine, one heard the hammer of Zeus. They told me that when the mountain wind was well astir, blow after blow fell upon this chasm with the sound and shock of a titanic hammer. The noise of these repeated blows they said was awe-inspiring. Now the only gorge of this character near there appears to be that which lies below Peuko and runs thence to the sea.... Spratt says of this ravine, that the rock is "singularly rent from summit to base by a yawning fissure, nearly 1000 feet high*." [**Travels and Researches*, I 293.] He connects this rent with volcanic action evidenced in the rocks of the neighbouring valley (Myrtos), and proceeds: "In this remarkable feature, we probably see the reason for the erection of a temple to the God of Thunder at this locality, under the name of Jupiter Arbius. To whom but the God of Thunder could a temple be so appropriately dedicated when associated with such an apparent fracture from some great volcanic movement," etc. I venture to believe that could this distinguished seaman and geologist have listened to the men in the store that night, he would have accepted their story as a much more promising explanation of the temple of Zeus the Thunderer.'

Sir A. J. Evans *The Palace of Minos at Knossos* London 1921 i. 630 f., *à propos* of 'Minoan' libation-tables, says: 'a good specimen of a mottled steatite table of similar shape, though apparently uninscribed, was obtained by me in 1894 from the Knoll of Tartari in the striking cleft of Arvi on the South Coast[2] [[2]Near Viano. The libation table is now in the Ashmolean Museum.], where in later times was a sanctuary of the indigenous

God under the name of Zeus Arbios.' *Id.* in the *Journ. Hell. Stud.* 1894 xiv. 285 f. fig. 16 publishes a green steatite pendant, inscribed with two linear characters, which he got from an early cist-grave at Arvi. There was clearly a 'Minoan' settlement on the site.

The name Ἄρβιος is of doubtful significance. One is tempted to compare it with the Latin *arbor*, since the district abounds in trees. Peuko 'was once a fine pine forest,' and the hollow leading to Kalami 'is filled with ilex, myrtle, pine, oaks and poplars. Lower down near the village grow figs, pomegranates, mulberry, and other more or less cultivated trees' (A. Trevor-Battye *op. cit.* p. 145 f.). Besides, Zeus is known to have been a tree-god in Crete; for he bore the title Ἐπιρρύτιος (Hesych. *s.v.* Ἐπιρρύτιος· Ζεὺς ἐν Κρήτῃ), which means either metaphorically 'set over the Growing Plants' (H. Voretzsch in *Hermes* 1870 iv. 273, Preller—Robert *Gr. Myth.* i. 130 n. 3, Gruppe *Gr. Myth. Rel.* p. 1109 n. 2, O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 198) or literally 'on the Tree' (as I rendered it in the *Class. Rev.* 1903 xvii. 413 n. 1, cp. Hesych. *s.v.* Ἔνδενδρος· παρὰ Ῥοδίοις Ζεύς· καὶ Διόνυσος ἐν Βοιωτίᾳ), being derived from ἐπί + *ῥρυς for ἔρρυς = ἔρρος (P. Kretschmer in the *Zeitschrift für vergleichende Sprachforschung* 1890 xxx. 584 'von ἔρυτες.' Gerhard *Gr. Myth.* i. 161 wrongly prefers the spelling ἐπερρύτιος).

In this connexion we should note that silver *statêres* of Phaistos struck *c.* 360—300 B.C. have *obv.* ƎOИAXAƎ] A youthful, beardless god seated to the left amid the branches of a leafless tree; his right hand caresses a cock perched on his knee; his left hand rests on an animal's skin, which passes beneath him and falls over the upper part of his right leg: *rev.* IT3IAΦ or ΦAIƐTION (ΦAIƐ) A bull standing to the left, or plunging to the right, sometimes with a gad-fly on its back, sometimes surrounded with a bay-wreath (*Brit. Mus. Cat. Coins* Crete etc. p. 63 pl. 15, 10 and 12, Head *Coins of the Ancients* p. 28 pl. 14, 37, *id. Hist. num.*[2] p. 473 fig. 253, *Hunter Cat. Coins* ii. 193 no. 4, J. N. Svoronos *Numismatique de la Crète ancienne* Mâcon 1890 i. 259 f. pl. 23, 24—26

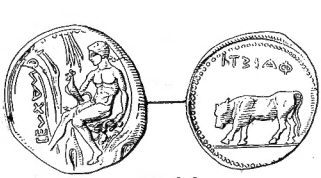

Fig. 838.

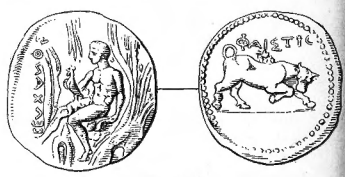

Fig. 839.

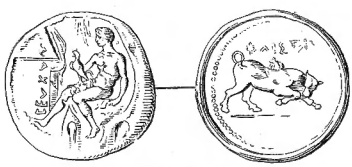

Fig. 840.

Fig. 841.

(≐my figs. 839, 841, 838), Babelon *Monn. gr. rom.* ii. 3. 987 ff. pl. 256, 1—3, Overbeck *Gr. Kunstmyth.* Zeus p. 197 Münztaf. 3, 3, P. Gardner *Types of Gk. Coins* p. 165 f. pl. 9, 17, *Class. Rev.* 1903 xvii. 412 f. fig. 8. My fig. 840 is from a specimen in the McClean collection). Since the tree on these coins of Phaistos is clearly copied from the tree on the Europe-coins of Gortyna (*supra* i. 527 ff. fig. 391 ff.), J. N. Svoronos in the *Rev. Belge de Num.* 1894 pp. 127, 137 infers that it is an oak; but I adhere to my contention (*supra* i. 527 n. 1) that it is the crown of a pollard willow. Comparison with other Phaestian coins (J. N. Svoronos *Numismatique de la Crète ancienne* i. 260 f. pl. 24, 1 f., 6 f., Babelon

Monn. gr. rom. ii. 3. 989 ff. pl. 256, 4—8) makes it fairly certain that beneath the god is spread a lion (?)-skin, the head of which is touched by his left hand. That we have here to do with a youthful Zeus appears from Hesych. *s.v.* Γελχάνος (for *Γελχάνος*)· *ὁ Ζεὺς παρὰ Κρησίν* (so J. V. Perger for *κρισίω* cod. Musurus cj. *'Ακρισίῳ*). We must, I think, conclude that, as at Gortyna Zeus took Europe to wife on a willow-tree (*supra* i. 526 ff.), so in the neighbouring town of Phaistos he had the same or a similar willow-bride.

And here I cannot avoid adding a word on the meaning of the appellative *Γελχάνος*, which has been often discussed and always misunderstood. Leaving out of account impossible conjectures (for which see O. Jessen in Pauly—Wissowa *Real-Enc.* vii. 969 f.), we have before us two more or less improbable alternatives. (1) Some scholars assume the existence of a Cretan word *Γέλκος*, a 'cock,' evidenced by the Phaestian coin-type of *Γελχάνος* holding a cock and by the occurrence of Γέλκος (? *Γέλκος* misread) as the name of a cock on a late Corinthian vase (Roulez *Vases de Leide* p. 39 n. 4 pl. 10, Reinach *Rép. Vases* ii. 271, *Class. Rev.* 1903 xvii. 413). But the vase-inscription is now read as *'γεκκος?'* (A. E. J. Holwerda *Catalogus van het Rijksmuseum van Oudheden te Leiden.* Afdeeling Griekenland en Italie. 1 Deel: Vaatwerk. Leiden 1905 i. 62). And to bring in the Hesychian glosses *ἡικανός· ὁ ἀλεκτρυών* (A. J. Reinach in *L'Anthropologie* 1910 xxi. 76) and *σέρκος· ἀλεκτρυών. καὶ ἀλεκτορίδες σέλκες* with Σελχροί· *Πέρσαι* (T. Panofka in the *Abh. d. berl. Akad. 1840* Phil.-hist. Classe p. 348) is only to darken counsel. (2) Others assume that *Γελχάνος* is related to *Volcanus*—an assumption made first by G. Secchi 'Giove ΓΕΛΧΑΝΟΣ e l'oracolo suo nell' antro Ideo' in the *Dissertazioni della Pontifica Accademia Romana di Archeologia* Roma 1842 x. 331 ff., later by A. Fick in the *Beiträge zur kunde der indogermanischen sprachen* 1879 iii. 166 f. ('Vielmehr ist *Γελχανος* von *γέλκ* glänzen abzuleiten, das in der Form *γλεκ* auch in dem Gottesnamen *Ἠλέκτωρ Ὑπερίων* der Sonnengott bei Homer wie in den mythischen Namen *Ἠλέκτρα* und *Ἠλεκτρύων* erscheint. Gleichen Stammes ist auch *ἄβλαξ* (=*ἀ-γλαξ*)· *λαμπρῶς. Κύπριοι* bei Hesych, welches für Digamma beweist.' He defends *χ* for *κ* as a Cretan peculiarity, cp. H. Helbig *De dialecto Cretica* Plaviae 1873 p. 13), *id. Vergleichendes Wörterbuch der Indogermanischen Sprachen*[4] Göttingen 1890 i. 133 ('*Γελχάνος*=Vulcānus'), and last by Walde *Lat. etym. Wörterb.*[2] p. 853 f. ('Doch sind die angeführten Stützen für ein **μελγ-* karg und etwas unsicher, dagegen der Anklang von *Γελχάνος* (mit seinem auffälligen *χ*) und *Volcanus* so weitgehend, dass beide wohl als identisch und als Lehnworte aus dem Orient zu betrachten sind'). The equation, however, does not satisfactorily explain the *χ* of *Γελχάνος*.

Mr B. F. C. Atkinson and I, after a joint consideration of all the *data*, have rejected both these alternatives and reached the conclusion (Feb. 9, 1923) that *Γελχάνος* means simply 'god of the Willow-tree,' being in fact akin to the English word *willow* (Middle English *wilow, wilwe*, Anglo-Saxon *welig*, Dutch *wilg*, Low German *wilge*). My contention that Zeus at Phaistos, as at Gortyna, was the consort of a willow-goddess is thus strikingly confirmed. Instead of his usual eagle he has a cock, because that bird as the crest of the Phaestian Idomeneus had a long-standing mythical connexion with the town. Pausanias in describing certain statues by Onatas, which the Achaeans dedicated to Zeus at Olympia, says: 'The one with the scutcheon of the cock on the shield is Idomeneus, the descendant of Minos. They say that Idomeneus was descended from the Sun, who was the sire of Pasiphae, and that the cock is sacred to the Sun and heralds his rising' (Paus. 5. 25. 9 trans. Sir J. G. Frazer). See further G. H. Chase 'The Shield Devices of the Greeks' in *Harvard Studies in Classical Philology* 1902 xiii. 74, 101 f. (nos. lxxvii and lxxviii=eleven vases with cock as shield-sign, one with cock and rosette) and E. Baethgen *De vi ac significatione galli in religionibus et artibus Graecorum et Romanorum* Gottingae 1887 p. 11 f. ('Sol—Apollo').

The cult of Zeus *Γελχάνος* has left traces of itself in other places beside Phaistos: (1) *Hagia Triada* (F. Halbherr in the *Rendiconti d. Lincei* 1905 xiv. 381 notes the discovery at *Hagia Triada* of numerous tiles incised with the name of the god *Γευχάνος*, a dialect form of *Γελχάνος*). (2) Gortyna (J. de Prott *Leges Graecorum sacrae* Lipsiae 1896 Fasti sacri p. 42 f. no. 20, 1=F. Blass in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 248 no. 4963,

(4) Lyttos (G. Doublet in the *Bull. Corr. Hell.* 1889 xiii. 61 ff. no. 6, 1 ff. – – –|[*τ*]*ῆ*ς *δόσεως τοῖς σταρτοῖς* (=*στρατοῖς*, the classes of the Lyttian population) *κατὰ* | *τὰ πάτρια καὶ Θεοδαισίοις καὶ* | Βελχανίοις· *κ.τ.λ.* From the sequel it seems likely that the festival Βελχάνια took place on the kalends of May). (5) Golgoi in Cypros (O. Hoffmann *Die Griechischen Dialekte* Göttingen 1891 i. 82 f. no. 160, 4 *va la ka ni o*=*Fαλκάνιο* nom., cp. *ib.* pp. 133, 193. B. Keil in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen* Phil.-hist. Classe 1895 p. 361 n. 1 transcribes *Fαλχανίω*).

At Magnesia on the Maiandros, a colony from Crete (*supra* i. 483 n. 8), this youthful god was identified with Apollon (Michel *Recueil d'Inscr. gr.* no. 438, 1 ff., 25 ff.= O. Kern *Die Inschriften von Magnesia am Maeander* Berlin 1900 p. 16 f. no. 20, 1 ff. an inscription dating from the end of *s.* iii B.C., which purports to be a decree of the ancient Cretan confederation in honour of Leukippos the founder of Magnesia π*α*[*ρ*]*ὰ τοῦ κοινοῦ τῶν Κρητῶν·* | [*ἔ*]*δοξεν* Κ[*ρ*]*ηταιέων τῶι κοινῶι συνε*λ|[*θ*]*ουσᾶν* [*τ*]*ᾶμ πολίων πασᾶν ἐς* Βίλκω|*να* (an unknown place in Crete) *ἐς τὸ ἰε*[*ρ*]*ὸν τῶ Ἀπέλλωνος τῶ* Βιλ|*κωνίω*, *ἀγουμένων* Γορτυνίων *ἐπὶ* | *κόσμω*(*ι*) Κύδαντος *τῶ* Κυνίω· *κ.τ.λ.*, *ib.* 25 ff. *τὸ δὲ ψάφισμα τόδε εἰστάλαν λιθίναν* | *ἀναγράψαντας ἀναθέμεν εἰς τὸ ἱερὸν τῶ* | Ἀ[πε*λ*]*λωνος τῶ* Βιλκωνίω, *κ.τ.λ.* See further O. Kern *Die Gründungsgeschichte von Magnesia am Maiandros* Berlin 1894 p. 14 ff. and in Pauly—Wissowa *Real-Enc.* iii. 472, W. Aly *Der kretische Apollonkult* Leipzig 1908 p. 54 n. 2).

1 The Tallaia range, midway between Oaxos and the sea, reaches a maximum height of 1092^{m}. Here Hermes was worshipped (*supra* i. 730 n. 1) in the wonderful stalactite cavern of *Melidhoni* described and drawn by R. Pashley *Travels in Crete* Cambridge—London 1837 i. 126 ff. with pl. Zeus too bore the title Ταλαιός (Hesych. *s.v.* Ταλαιός cited *supra* i. 729 n. 1) or Ταλλαῖος at Dreros (Dittenberger *Syll. inscr. Gr.*^{2} no. 463 (*ib.*^{3} no. 527), 14 ff. cited *supra* i. 729 n. 2) and at Olous (Dittenberger *Syll. inscr. Gr.*^{2} no. 514 (*ib.*^{3} no. 712), 14 cited *supra* i. 729 n. 3, J. Demargne in the *Bull. Corr. Hell.* 1900 xxiv. 227 no. 1 *C* 57 ff. cited *supra* i. 729 n. 4. Add F. Dürrbach—A. Jardé in the *Bull. Corr. Hell.* 1905 xxix. 204 ff. no. 67, 18 f. a decree of Lato and Olous *ἐ*[*ν δὲ*]| [Ὀλόν*τ*]ι *ἐν τῶι ἰαρῶ*(*ι*) *τῶ Διηνὸς τῶ* [Ταλλ]*αίω*). He was thus, like the Laconian Zeus Ταλεῖτας (*supra* i. 730, ii. 890 n. 2), related to the Cretan sun-god Talos (*supra* i. 728 ff.).

2 Θεὸς Ὕψιστος (*supra* p. 883 n. 0 no. (27)).

3 Θεὸς Ὕψιστος (*supra* p. 884 n. 0 no. (27)).

4 At Naissos (*Niš*) in Moesia Superior was found a limestone altar inscribed I. O. M. Pa|terno Ae|pilofio | Sanc(tinius?) Oriens, | Cor(nelia) Mide, P. | Ael(ius) Cocaius | vet(eranus) leg(ionis) VII Cl(audiae) Sev(erianae) | ex voto posu(erunt) | Maximo et Aeli|ano co(n)s(ulibus)=223 A.D. A. v. Premerstein and N. Vulić, who publish the inscription in the *Jahresh. d. oest. arch. Inst.* 1900 iii Beiblatt p. 130 f. no. 30, take Iupiter *Paternus Aepilofius* to be the Latin rendering of a local Dardanian or Thracian Zeus Πατρῷος Ἐπιλόφιος ('on the Crest': cp. *supra* p. 873 f.).

[3] Zeus Λοφείτης (*supra* p. 874 n. 1).
[4] Θεὸς Ἅγιος Ὕψιστος (*supra* p. 878 n. o no. (10)).
[5] Mt Ide, a long range with numerous foot-hills (Strab. 583 σκολοπενδρώδης) and springs (πολυπίδαξ eight times in the *Il.*, cp. Plat. *legg.* 682 B), derived its name (*supra* p. 932 n. 1) from abundant woods of pine (schol. *Il.* 12. 20), pitch-pine (Plin. *nat. hist.* 14. 128), terebinth (*id. ib.* 13. 54), larch (*id. ib.* 16. 48), ash (Theophr. *hist. pl.* 3. 11. 4, Plin. *nat. hist.* 16. 62), bay (*id. ib.* 15. 131, Dioskor. 4. 145 (147) p. 624 f. Sprengel), fig (Plin. *nat. hist.* 15. 68), and raspberry (*id. ib.* 16. 180). Its inhabitants were familiar with silver fir, oak, plum, filbert, maple, ash, Phoenician cedar, prickly cedar, alder, beech, and sorb (Theophr. *hist. pl.* 3. 6. 5). Here grew the magic herb *aithiopis* (Plin. *nat. hist.* 27. 12, Dioskor. 4. 103 (105) p. 597 Sprengel) and flowers galore (*Il.* 14. 347 ff.). So well-wooded was the mountain that Homer even speaks of a silver fir on its summit reaching through *aêr* to *aithêr* (*Il.* 14. 286 ff.). A conflagration of the forests on Ide in 1460 B.C. was remembered as an epoch-making event, which led to the discovery of iron by the Idaean Daktyloi (Thrasyllos of Mendes *frag.* 3 (*Frag. hist. Gr.* iii. 503 Müller) *ap.* Clem. Al. *strom.* 1. 21 p. 85, 2 ff. Stählin. Cp. the *Phoronis frag.* 2 Kinkel *ap.* schol. Ap. Rhod. 1. 1129). Here too the herdsman Magnes discovered the loadstone, to which his hobnails and ferule stuck fast (Nikandros *frag.* 101 Schneider *ap.* Plin. *nat. hist.* 36. 127).

Diod. 17. 7 (after Kleitarchos (?): see E. Schwartz in Pauly—Wissowa *Real-Enc.* v. 683 f.) gives an interesting account of Mt Ide: 'There is a tradition that this mountain got its name from Ide daughter of Melisseus. It is the greatest of the ranges near the Hellespont and has in the midst of it a sacred cavern in which, they affirm, the goddesses were judged by Alexandros [Cp. bronze coins of Skepsis, struck by Caracalla, which show the judgment of Eros in place of Paris on Mt ΙΔΗ (F. Imhoof-Blumer in the *Zeitschr. f. Num.* 1883 x. 155 f. fig., *id.* in the *Jahrb. d. kais. deutsch. arch. Inst.* 1888 iii. 291 f. pl. 9, 20, Head *Hist. num.*[2] p. 549)]. It is said that the Idaean Daktyloi too were born here, the first workers of iron, who learnt their craft from the Mother of the Gods. A peculiar phenomenon attaches to this mountain. When the dog-star rises, on the topmost summit so still is the surrounding air that the peak soars higher than the breath of the winds, and the sun is seen coming up before night is over. Its rays are not rounded into a regular disk, but its flame is dispersed in diverse directions so that several fires appear to touch the earth's horizon. A little later and these gather into a single whole, which grows until it becomes 300 ft in diameter. Then, as day increases, the normal size of the sun is completed and produces daylight as usual.' Cp. Lucr. 5. 663 ff., Mela 1. 94 f. The Cretan Ide too (? by confusion with this mountain) was said to see the sun before the sunrise (*supra* p. 932 n. 1).

Coppers of Skamandria struck in *s.* iv B.C. have *obv.* head of Ide wreathed with fir, *rev.* ΣΚΑ (variously arranged) fir-tree or fir-cone (*Brit. Mus. Cat. Coins* Troas, etc. p. 79 pl. 14, 12—14, Head *Hist. num.*[2] p. 548). One specimen names the head ΙΔΗ (Imhoof-Blumer in the *Zeitschr. f. Num.* 1874 i. 139 no. 1 pl. 4, 15 and in his *Kleinas. Münzen* i. 42 no. 2 pl. 2, 2).

One of Mt Ide's summits was known as Γάργαρον or Γάργαρα—probably a Lelegian name, for the Leleges are said to have occupied the district Γαργαρίς (Strab. 610) and the

mountain-town Γάργαρος (Steph. Byz. *s.v.* Γάργαρα, *et. mag.* p. 221, 26 f. L. Bürchner in Pauly—Wissowa *Real-Enc.* vii. 757 f. cp. *Gargissa* some 33 kilometers to the north-east of it). Mt Ide in general was an important centre for the cult of Kybele (A. Rapp in Roscher *Lex. Myth.* ii. 1653, W. Drexler *ib.* ii. 2859, O. Jessen in Pauly—Wissowa *Real-Enc.* ix. 864 f., Schwenn *ib.* xi. 2287), who as Μήτηρ Ἰδαία (first in Eur. *Or.* 1453), *Mater Idaea*, was worshipped far and wide throughout the Roman empire (H. Graillot *Le culte de Cybèle Mère des dieux à Rome et dans l'empire romain* Paris 1912 Index p. 582 *s.v.* 'Ida (mont)'). But Gargaron in particular was connected rather with the myth and ritual of Zeus. It was on the height of Gargaron that Here found Zeus the cloud-gatherer (*Il.* 14. 292 f., cp. 352) and enticed him into the famous dalliance (*supra* i. 154). It was there that Apollon and Iris saw him sitting in the midst of a fragrant cloud (*Il.* 15. 152 f.). There in Homeric days Zeus had a precinct and altar (*Il.* 8. 47 ff. Ἴδην δ' ἵκανεν πολυπίδακα, μητέρα θηρῶν, | Γάργαρον· ἔνθα δέ οἱ τέμενος βωμός τε θυήεις. | ἔνθ' ἵππους ἔστησε πατὴρ ἀνδρῶν τε θεῶν τε | λύσας ἐξ ὀχέων, κατὰ δ' ἠέρα πουλὺν ἔχευεν. | αὐτὸς δ' ἐν κορυφῇσι καθέζετο κύδεϊ γαίων, | εἰσορόων Τρώων τε πόλιν καὶ νῆας Ἀχαιῶν), on which as on the top of Troy Hektor used to burn for him the thigh-pieces of oxen (*Il.* 22. 169 ff. ἐμὸν δ' ὀλοφύρεται ἦτορ | Ἕκτορος, ὅς μοι πολλὰ βοῶν ἐπὶ μηρί' ἔκηεν | Ἴδης ἐν κορυφῇσι πολυπτύχου, ἄλλοτε δ' αὖτε | ἐν πόλει ἀκροτάτῃ). For the altar was served by those who claimed to be akin to Zeus and to have his blood running in their veins (Aisch. *Niobe frag.* 162 Nauck² *ap.* Plat. *remp.* 391 E, cp. Strab. 580, Loukian. *Dem. enc.* 13, οἱ θεῶν ἀγχίσποροι | οἱ Ζηνὸς ἐγγύς, ὧν κατ' Ἰδαῖον πάγον | Διὸς πατρῴου βωμός ἐστ' ἐν αἰθέρι, | κοὔπω σφιν ἐξίτηλον αἷμα δαιμόνων). Gargaros, eponym of the town, was the son of Zeus (Steph. Byz. *s.v.* Γάργαρα·... ὠνομάσθη δ' ἀπὸ Γαργάρου τοῦ Διός, τοῦ ἐκ τῆς Λαρίσσης ἐν Θεσσαλίᾳ=*et. mag.* p. 221, 31 f. ὠνόμασται δὲ ἀπὸ Γαργάρου τοῦ Διός, ὡς δηλοῖ Νυμφίος (*leg.* Νύμφις) ὁ φιλόσοφος (Nymphis *frag.* 10 (*Frag. hist. Gr.* iii. 14 Müller)). οὕτως Ἐπαφρόδιτος ἐν ὑπομνήματι θ' Ἰλιάδος, παρατιθέμενος Κλείταρχον Αἰγινήτην λεξικογράφον). And Onetor, priest of Zeus 'Ἰδαῖος, was 'honoured as a god' by the Trojans (*Il.* 16. 604 f. Ὀνήτορος, ὅς Διὸς ἱρεὺς | Ἰδαίου ἐτέτυκτο, θεὸς δ' ὡς τίετο δήμῳ). Epicharmos in his *Troes* made one of his characters pray to the Zeus of Gargara (Epicharm. *frag.* 130 Kaibel *ap.* Macrob. *Sat.* 5. 20. 5 Ζεὺς ἄναξ, ἀν' ἄκρα (ανααδαν cod. G. Kaibel cj. ἀν' ἄκρα. F. G. Schneidewin cj. ἀν' Ἴδαν) ναίων Γαργάρων (so A. Meineke for γαργαρα cod.) ἀγάννιφα). Quintus Smyrnaeus did the same in the case of Priam (Quint. Smyrn. 1. 184 f. εὔχετ' ἐς ἱερὸν αἰπὺ τετραμμένος Ἰδαῖοιο | Ζηνός, ὃς Ἴλιον αἰὲν ἐοῖς ἐπιδέρκεται ὄσσοις); for which he had good Homeric authority, since Hekabe bade Priam, when he set out for the hut of Achilles, pour a libation and offer a prayer to Zeus 'Ἰδαῖος (*Il.* 24. 287 τῇ, σπεῖσον Διὶ πατρί, καὶ εὔχεο οἶκαδ' ἰκέσθαι κ.τ.λ., 290 f. ἀλλ' εὔχεο σύ γ' ἔπειτα κελαινεφέϊ Κρονίωνι | Ἰδαίῳ, ὃς τε Τροίην κατὰ πᾶσαν ὁρᾶται, κ.τ.λ.), and Priam took her advice (*Il.* 24. 306 ff. εὔχετ' ἔπειτα στὰς μέσῳ ἕρκεϊ, λεῖβε δὲ οἶνον | οὐρανὸν εἰσανιδών, καὶ φωνήσας ἔπος ηὔδα· | 'Ζεῦ πάτερ, Ἰδηθεν μεδέων, κύδιστε μέγιστε, | δός μ' ἐς Ἀχιλλῆος φίλον ἐλθεῖν ἠδ' ἐλεεινόν, | πέμψον δ' οἰωνόν, ταχὺν ἄγγελον,' κ.τ.λ.). Virgil and the pseudo-Plutarch associate the cult of Zeus 'Ἰδαῖος with that of the Phrygian mother-goddess (Verg. *Aen.* 7. 139 f. Idaeumque Iovem Phrygiamque ex ordine Matrem | invocat (*sc.* Aeneas), Plout. *de fluv.* 13. 3 παράκειται δ' αὐτῷ (*sc.* τῷ Σκαμάνδρῳ) ὄρος Ἴδη, τὸ πρότερον δὲ ἑκαλεῖτο Γάργαρον· ὅπου Διὸς καὶ Μητρὸς Θεῶν βωμοὶ τυγχάνουσιν). Lastly, writers of the Graeco-Roman age treat Gargaron as an appropriate background for the myth of Ganymedes (Loukian. *dial. deor.* 4. 2, *Charid.* 7) or that of Paris (Ov. *her.* 16. 107 f., Loukian. *dial. deor.* 20. 1).

Imperial bronze coins of Ilion, struck by Faustina Iunior (H. von Fritze in W. Dörpfeld *Troja und Ilion* Athens 1902 ii. 490 f., 517 pl. 63, 65) and Iulia Domna (fig. 842 from a specimen in my collection), have as reverse type Zeus sitting, with a long sceptre in his right hand and the cult-image of Athena Ἰλιάς in his left, accompanied by the honorific *formula* ΔΙΑ ΙΔΑΙΟΝ ΙΛΙΕΙϹ. W. Kubitschek 'Heroenstatuen in Ilion' in the *Jahresh. d. oest. arch. Inst.* 1898 i. 187 suggests that the coin is one of a series struck by Commodus and his successors to commemorate certain statues of gods and heroes, from which at least three inscribed bases are extant. Accordingly G. F. Hill *A Handbook of Greek and Roman Coins* London 1899 p. 186 n. 3 would complete the *formula* by supplying

some such word as *ἀνέστησαν*. See further G. Macdonald *Coin Types* Glasgow 1905 p. 170.

Zeus *Ἰδαῖος* was worshipped at Skepsis also. Bronze coins of the town, struck by Commodus (*Brit. Mus. Cat. Coins* Troas, etc. p. 84 no. 30) and Caracalla (*ib.* p. 84 pl. 16, 1 = my fig. 843), show ZEVC ЄIΔAIO(C) CKHΨIΩN clad in a *himátion*, standing with an eagle in his right hand and a long sceptre in his left. An inscription from Skepsis (*Kurshunlu Tepe*) records a priest of Zeus *Ἰδαῖος* (J. A. R. Munro in the *Journ. Hell. Stud.* 1901 xxi. 236 on a square marble base [*ἡ γ*]*ερουσία* | [*τὸν*] *ἱερέα τοῦ Δι*[*ὸς τ*]*οῦ Ἰδαίου καὶ* | [*τῶν Σεβαστῶν Γ*[*ν*]][*αῖ*]*ον Φλάβιον Ὀλυ*[*μ*]][*πι*]*οδώρου υἱὸν* | [*Ὀλ*]*υμ-*

Fig. 842.

Fig. 843.

πιόδωρον, | [*τὸ*]*ν ἐκ προγόνω*[*ν*] | [*τῆ*]*ς πατρίδος εὐ*[*εργέ*]*τ*(*η*)*ν καὶ ἐαυ*[*τῆς σ*]*υ*(*μ*)*ποσιάρχην*). Demetrios of Skepsis, who *c.* 150 B.C. compiled an encyclopaedic commentary on *Il.* 2. 814—877, mentions the Trojan claim to possession of the cave where Zeus was born (schol. Ap. Rhod. 3. 134 *ἄντρῳ ἐν Ἰδαίῳ· ἢ τῷ τῆς Κρήτης, ἢ τῷ τῆς Τροίας. ἀντιποιοῦνται γὰρ καὶ Τρῶες τῆς τοῦ Διὸς γενέσεως, καθά φησι Δημήτριος ὁ Σκήψιος*): cp. *supra* i. 154 n. 2. Other coin-types of Skepsis referable to the same cult are a standing eagle (Imhoof-Blumer *Kleinas. Münzen* i. 45 no. 4), an eagle with open wings in an oak-wreath (*Brit. Mus. Cat. Coins* Troas, etc. p. 83 pl. 15, 13, Imhoof-Blumer *Gr. Münzen* p. 628 no. 230 pl. 8, 6, Head *Hist. num.*[2] p. 549), an eagle standing beside a leafy tree (Imhoof-Blumer *Kleinas. Münzen* i. 46 no. 5 pl. 2, 6).

A noteworthy bust of Zeus in white marble, formerly in the Stroganoff collection, represents the god upborne on the spread wings of an eagle. He is draped in a *himátion* and wears a wreath of pine. Restored: nose, tip of pine-wreath, right foot of eagle. L. Stephani in the *Compte-rendu St. Pét.* 1875 p. 200 ff. Atlas pl. 7, 2 (= my fig. 844) regards this as an effigy of Zeus *Ἰδαῖος* dating from *s.* i or ii A.D. The association of a Zeus-head with Attis (*supra* p. 297 fig. 189) prepares us to see in the pine-wreath a reminiscence of the tree that figures so largely in the religion of Attis and Kybele (Boetticher *Baumkultus* pp. 142—147, 263 fig. 11, J. Murr *Die Pflanzenwelt in der griechischen Mythologie* Innsbruck 1890 p. 117 f., H. Graillot *op. cit.* p. 121 ff. and Index p. 597 *s.vv.* 'Pin,' 'Pin (pomme de)'). And this connexion certainly seems more probable than any reference to the pine-wreath of the Isthmian victor.

Attempts have been made in modern times to locate the cult-centre of Zeus *Ἰδαῖος*. J. Thacher Clarke 'Gargara, Lamponia and Pionia: towns of the Troad' in the *Am. Journ. Arch.* 1888 iv. 291—319 notes (*a*) *et. mag.* p. 221, 26 ff. *Γάργαρος· πόλις τῆς Ἴδης ἐν ὑψηλῷ τόπῳ κειμένη, ἣν κατῴκουν Λέλεγες· ἐξ ἧς διὰ τὸ κρυῶδες ὑποκατέβησαν οἱ Γαργαρεῖς, καὶ ᾤκισαν αὐτὴν ὑπὸ πεδίον* (*an leg. αὖ τὴν ὑποπόδιον*? A.B.C.) *Γάργαρον. ἐκείνη δὲ ἐρημωθεῖσα καλεῖται Παλαιὰ Γάργαρος· κ.τ.λ.*: (*b*) Strab. 606 *μετὰ γὰρ τὸ Λεκτὸν τὸ Πολυμήδιόν ἐστι χωρίον τι ἐν τετταράκοντα σταδίοις, εἶτ' ἐν ὀγδοήκοντα Ἄσσος* (so C. Mannert for *ἅλσος* codd.), *μικρὸν ὑπὲρ τῆς θαλάττης, εἶτ' ἐν ἑκατὸν καὶ τετταράκοντα Γάργαρα· κεῖται δὲ τὰ Γάργαρα ἐπ' ἄκρας ποιούσης τὸν ἰδίως Ἀδραμυττηνὸν καλούμενον κόλπον*. Assuming Strabon's distances to be cumulative, not consecutive, he infers that Palaia Gargaros is the ruined town with walls of polygonal masonry still to be seen on the top of *Kozlu Dagh* 10 kilometers east-north-east from Assos, that Gargaros on the plain below is the large field of later ruins at the foot of the slope on which lies the Turkish town of *Saely*, and that the cape mentioned by Strabon is *Katerga Burnu* near Assos.

W. Judeich 'Gargara und der Altar des idäischen Zeus' in the *Jahresh. d. oest. arch. Inst.* 1901 iv. 111—125 figs. 160—163 replies that Strabon's distances are regularly consecutive, not cumulative. Hence Gargaros must be placed further east in the vicinity of *Tschibne*, and Palaia Gargaros should be identified with a ruined stronghold on *Odjak Kaya*, the most westerly summit of the *Dikeli Dagh*, which rises immediately behind *Tschibne* to a height of 780m. Palaia Gargaros (wrongly equated by Clarke with Lamponeia) was visited by E. Fabricius, who reports that it has terrace-walls of 'Cyclopean'

Fig. 844.

masonry well adapted for the erection of houses and an elliptical *akrópolis* enclosed by a ring-wall (now *c.* 1m high, *c.* 3m thick) some 500m round. On the west side of this wall is a gateway (2·35m wide) with a square tower. Within, the *akrópolis* is divided by another wall into two unequal parts. In the southern and smaller part, on the highest point of the mountain, are the foundations of a big building, probably a temple. The fragments visible are all of pre-Hellenistic date. When Palaia Gargaros was abandoned, the inhabitants of the new town found it difficult to keep up the cult on the mountain-top and chose a new site for their worship on the southern point of the neighbouring hill *Adatepe* (*c.* 260m).

Mysia
Kyzikos[1].
Mount Olympos[2].
Pergamon[3].

Here Judeich discovered a rock-cut altar (*loc. cit.* p. 111 ff. figs. 160 view and 161 plan (=my fig. 845)) measuring *c.* $13^m \times 15^m$ and approached by three flights of steps on the

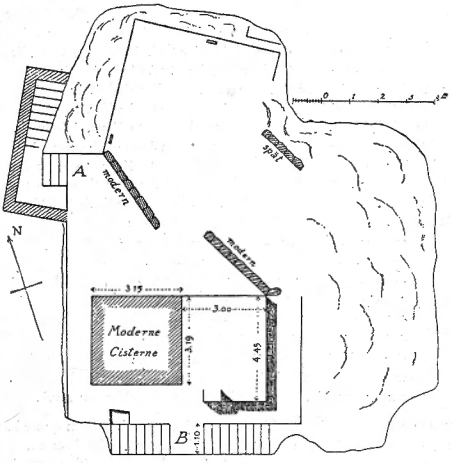

Fig. 845.

west and south sides. A modern cistern constructed on the spot is believed to work cures with its water and probably preserves the sanctity of the ancient altar.

[1] Zeus Ὕψιστος and Θεὸς Ὕψιστος (*supra* p. 881 n. o no. (21)).

[2] Zeus Ὀλύμπιος (Mnaseas *frag.* 30 (*Frag. hist. Gr.* iii. 154 Müller) *ap.* schol. T. *Il.* 20. 234 Μνασέας μέν φησιν ὑπὸ Ταντάλου ἠρπάσθαι (sc. Γανυμήδην) καὶ ἐν κυνηγεσίῳ πεσόντα ταφῆναι ἐν τῷ Μυσίῳ Ὀλύμπῳ κατὰ τὸ ἱερὸν τοῦ Ὀλυμπίου Διός). *Supra* i. 116 n. 8, 124.

[3] The district of Pergamon was of old sacred to the Kabeiroi (Paus. 1. 4. 6 ἣν δὲ νέμονται οἱ Περγαμηνοί, Καβείρων ἱερὰν φασιν εἶναι τὸ ἀρχαῖον), who as the most ancient deities of the land were worshipped with mystic rites and invoked in stormy weather (Aristeid. *or.* 55 (ii. 709 Dindorf) τοῦτό μοι (Grauert cj. μὲν) πρεσβύτατοι δαιμόνων ἐνταῦθα λέγονται γενέσθαι Κάβειροι, καὶ τελεταὶ τούτοις καὶ μυστήρια, ἃ τοσαύτην ἰσχὺν ἔχειν πεπίστευται ὥστε χειμώνων τε ἐξαισίων (with which word the fragmentary oration ends)). Their cult, attested by the name of a *hrȳtanis* Κάβειρος (M. Fränkel *Die Inschriften von Pergamon* Berlin 1895 ii. 177 ff. no. 251, 1 and 34, cp. E. Sittig *De Graecorum nominibus theophoris* Halis Saxonum 1911 p. 143 f.), was perhaps at one time carried on in connexion with the apsidal building hidden by the foundations of the great Pergamene altar (*supra* i. 120). They are represented on the large frieze of that altar as two youthful warriors attacking a huge bovine giant with double axe and sword respectively (*supra* i. 110 n. 4). Coppers of Severus Alexander (*Brit. Mus. Cat. Coins* Mysia p. 158 pl. 32, 3) and Gallienus (*ib.* p. 162 pl. 32, 8) show two youthful male figures standing on either side of an altar: one

is handing to the other a ram's head. H. von Fritze in the *Zeitschr. f. Num.* 1901 xxiv. 120 ff. and in the *Abh. d. berl. Akad. 1910* Phil.-hist. Classe Anhang i. 63 f. pl. 6, 1 identifies them with the Kabeiroi, aptly citing a Pergamene decree first published by B. Schroeder in the *Ath. Mitth.* 1904 xxix. 152 ff. no. 1 (Dittenberger *Orient. Gr. inscr. sel.* no. 764, 6 *μυστηρίων κατὰ τὰ πάτρια τοῖς μεγάλοις θεοῖς Καβείροις κ.τ.λ., ib.* 27 *καὶ τὰ κριοβόλια τῆς τῶν ἐφήβων μεταπαιδιᾶς πρὸς ἀλλήλους ἔνεκεν*). See further E. Thraemer *Pergamos* Leipzig 1888 pp. 263—270 ('Die pergamenischen Kabiren').

The Kabeiroi witnessed the birth of Zeus the lightning-god on the summit of Pergamon, according to an oracle of Apollon (not Apollon Γρύνειος as F. G. Welcker *Sylloge epigrammatum Graecorum*[2] Bonnae 1828 p. 231 and A. Boeckh on *Corp. inscr. Gr.* ii no. 3538 supposed, nor Apollon Χρηστήριος of Aigai as M. Fränkel *op. cit.* ii. 239 thought probable, but Apollon Κλάριος as C. Picard in the *Bull. Corr. Hell.* 1922 xlvi. 190 ff. and in his *Éphèse et Claros* Paris 1922 pp. 461 n. 4, 673 has definitely proved), which bade the Pergamenes, if they would be rid of a plague (that of 166 A.D. (Amm. Marc. 23. 6. 24)), divide their *éphèboi* into four groups, chant hymns to Zeus, Dionysos, Athena, and Asklepios, and then for seven days offer thighs on the altars of the same deities, sacrificing a two-year-old heifer to Athena, a three-year-old ox to Zeus, to Zeus Βάκχος (=Zeus Σαβάζιος: *supra* p. 287 n. 2), and to Asklepios, and feasting themselves on bull's flesh (*Corp. inscr. Gr.* ii no. 3538=M. Fränkel *op. cit.* ii. 239 f.=Kaibel *Epigr. Gr.* no. 1035 =Cougny *Anth. Pal. Append.* 6. 172). The oracle begins:

Τηλεφίδαις, οἳ Ζηνὶ πλέον Κρονίδῃ βασιλῆϊ
ἐξ ἄλλων τιεσκόμενοι Τευθραντίδα γαῖαν
ναίουσιν καὶ Ζηνὸς ἐριαμάραγοιο γενέθλῃ
ἡμὲν Ἀθηναίῃ πολεμηδόκωι ἀρτυνώῃ
ἠδὲ Δι(ω)νύσωι λαθικηδέι φυσιζόωι
ἠδὲ καὶ εἰητῆρι νόσ(ω)ν Παιήονι λυγρῶν·
οἵσι πάρ' Οὐρανοῦ υἷες ἐθηήσαντο Κάβειροι
πρῶτοι Περγαμίης ὑπὲρ ἄκ(ρι)ος ἀ(σ)τε(ρ)ο(πητ)ὴ(ν)
τικτόμενον Δία, μητρώιην ὅτε (γα)στ(έρα) λῦσ(εν)· κ.τ.λ.

The later passage concerning the sacrifices to the four gods has been quoted *supra* p. 287 n. 2. Of the hymns prescribed one only, that to Zeus, has survived on a fragmentary *stéle* of white marble found on the western terrace of the Akropolis. The text, which is surmounted by a pediment containing reliefs of a *phiále* with two shield-like ornaments, is thus restored by M. Fränkel *op. cit.* ii. 237 ff. no. 324:

[ἀγ]αθῆι τύχηι.
[Οὐλύμποιο] μέτωπον, ἄκρην Τειτηνίδα, ναίων,
[ὦ Ζεῦ δέσποτα,] χαῖρε. λιταχομένωμ πολιητέων
[κλῦθι, πάτερ μ]ακάρων τε καὶ ἀτρυγέτων ἀνθρώπων,
[λαμπρῶς οὐραν]ίην ἐφέπων ἴτυν αἰγλήεσσαν,
[δῆμιοεργὲ βίον] πεφατισμένε σοῖς ὑπὸ φύλοις·
[τῶν ἀγαθῶν γὰρ] φαῦλα διακρείνας πάρος ὕλης
[πᾶσιν ἔδωκας χ]ρῆσιν ἐπάρκιον ἠμερίοισιν,
[νείμας καὶ γαῖάν] τε πολύκλυστόν τε θάλασσαν,
[αἰθέρα καὶ πά]ντ' ἄλλα, τὰ σὴ ποιήσατο μῆτις.
[ἐλθέ σε κληίζ]ουσι, μάκαρ, μάκαρ, εἶλαος ἡμῖν
καὶ πτό[λιν ἰθύνο]υσιν ἀμύμοσιν Περγαμίδαισιν,
ἐλθὲ σὺν ἰητῆρι θεῶμ Παιήονι κλειτῶι
θεσπεσίην Ὑγίειαν ἐς ἀγλαὰ δώματ' ἄγοντι
Εὐνομίηι τε καὶ Εὐστασίηι λιπαρῆς τ' Εἰρήνηι
Ἥρηι τε ζυγίηι, ἁλόχῳ σέο κυδηέσσηι,
καὶ Θέμιδι ἀρχ[εγ]όνωι, προυφητίδι καρτεροβούλωι,
καὶ γάμον [ἀ]ο]μένηι γλαυκώπιδι Τριτογενείηι
κ[α]ὶ [παίδων μεδ]έοντι διακτόρωι Ἑρμάωνι
[καὶ Μοίραις κλυμέ]νηισιν ἀμύμοσιν Ἀδ[ρηστ]είαις.

[κοίρανος οὐρα]νίαισι κεκασμένος ἥνε[κ]ες ὥραις,
[ἦρι περιστέλλο]ντι κ[ό]μην εὐθρεπτον ά[ρ]ούραις
[ἠδὲ θέρει καρπὸν πολ]ύσταχυν ἀμώοντ[ι]
[πορφύρεόν τε τρυγῶν]τι βότρυν λιπαρῶι μ[ε]θοπώρω[ι]
[καὶ χειμῶνι βροτοῖς] ὥρην εὔκρητον ἄγο[ντ]ι,
[ἐλθὲ πόλιν σώ]ζ'εἰμ, μάκαρ, ὄλβιε, καὶ λ[ύε τ]ῆμα,

[ταρβέομεν γὰρ πάν]τες ἀεὶ κήτεια [πέλωρα]
[λοίμης· ἢ μάλα λ]αὸν ἄρειον ἀμ[ύμονα τρύχει,]
[οἰστρωι λυσσηέ]ντι κατ[ασκήπτουσα πολίτας.]
[ἀλλὰ σύ, κάρπιμε] Παι[άν, – – – –].

The older and simpler altar of Zeus, consisting of ashes from the thighs of victims sacrificed to the god (Paus. 5. 13. 8 *πεποίηται δὲ* (*sc.* the altar of Zeus at Olympia) *ἱερείων τῶν θυομένων τῷ Διὶ ἀπὸ τῆς τέφρας τῶν μηρῶν, καθάπερ γε καὶ ἐν Περγάμῳ· κ.τ.λ.*), probably occupied the actual summit of the hill (*supra* i. 120 f. fig. 89). The magnificent altar built by Eumenes ii was situated near the top, on a broad terrace seventy or eighty feet below the temple of Athena (*supra* i. 118 ff. pl. x and figs. 87, 88). This altar has often been identified with *ὁ θρόνος τοῦ Σατανᾶ* (Rev. 2. 13); but the phrase refers rather to Pergamon as the centre of the imperial cult (R. H. Charles *A critical and exegetical Commentary on the Revelation of St. John* Edinburgh 1920 i. 60 f.).

Zeus was associated with Athena (M. Fränkel *op. cit.* 1890 i. 29 ff. no. 29 = Michel *Recueil d'Inscr. gr.* no. 1215 = Dittenberger *Orient. Gr. inscr. sel.* no. 280 a dedication of *c.* 223 B.C. *βασιλέα Ἄτταλον* (*sc.* Attalos i) | *Ἐπιγέν[η]ς καὶ οἱ ἡγεμόνες καὶ στρατ[ιῶ]ται* | *οἱ συναγωνισάμενοι τὰς πρὸς τοὺς Γ[αλ]άτας* | *καὶ Ἀντίοχον μάχας χαρισ[τ]ήρια* | *Διί, Ἀθηνᾶι.* | *Ἐ(π)ιγόνου ἔργα*) or more often with Athena *Νικηφόρος* (M. Fränkel *op. cit.* i. 32 ff. nos. 33—37, 43 ff. nos. 51—56, 46 no. 58, 50 f. no. 63, 52 f. no. 65 f., 54 f. no. 69, 124 ff. nos. 214—216, 130 ff. no. 225—the *formula* in each case being *Διὶ καὶ Ἀθηνᾶι Νικηφόρωι*). E. Thraemer *Pergamos* Leipzig 1888 pp. 223—227 infers from their association that the temple of Athena, which is divided by a cross-wall into two approximately equal halves (J. L. Ussing *Pergamos* Berlin—Stuttgart 1899 pl. 3 after *Pergamon* ii pl. 3), was in reality a double temple of Zeus and Athena. He notes the Pergamene coin-type of Athena's owl on the thunderbolt of Zeus (*Brit. Mus. Cat. Coins* Mysia p. 132 pl. 27, 13 ΑΘΗ ΝΑΣ ΝΙΚΗ ΦΟΡΟΥ, Head *Hist. num.*[2] p. 536: cp. *Brit. Mus. Cat. Coins* Pontus, etc. p. 84 pl. 19, 5, Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 136 pl. 18, 8 similar type on a coin of Amastris) and suspects an allusion to their joint temple in a couplet on the base of a marble herm from the Byzantine wall on the south side of the *agorá* (M. Fränkel *op. cit.* ii. 242 no. 325 *Ἑρμῆν θυραῖον Ῥοῦφος ἱερεὺς τοῦ Διὸς* | *εἵδρυσε φύλακα τοῦ νεῶ καὶ ῥύτορα*). But his views have not been adopted by the authors of the official Berlin publication.

Zeus figures of course in Pergamene oaths. Eumenes i and the mercenary leaders who rose against him in 263 B.C. swore by Zeus, Ge, Helios, Poseidon, Demeter, Ares, Athena *Ἀρεία* and *ἡ Ταυροπόλος* (M. Fränkel *op. cit.* i. 10 ff. no. 13 = Michel *op. cit.* no. 15 = Dittenberger *Orient. Gr. inscr. sel.* no. 266 quoted *supra* p. 729 n. 0 no. (3)). Towards the end of *s.* ii B.C. public oaths were administered at the altar of Zeus *Σωτήρ* in the *agorá* (M. Fränkel *op. cit.* ii. 177 ff. no. 251, 27 ff. = Michel *op. cit.* no. 519, 27 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 592, 27 ff. *ὅπως δὲ ταῦτα εἰς τὸν ἅπαντα χρόνον διαμένηι* | *βέβαια Ἀσκληπιάδηι καὶ τοῖς ἀπογόνοις τοῖς* | *Ἀσκληπιάδου, ἐπιτελεῖν ὁρκωμόσιον τὴν πόλιν* | *ἐν τῆι ἀγορᾶι ἐπὶ τοῦ Διὸς τοῦ Σωτῆρος τῶι βωμῶ[ι]* | *καὶ ὀμόσαι τὰς τιμουχίας, ἢ μὴν ἐμμενεῖν κ.τ.λ.*). Among the honours decreed to Attalos iii by Elaia was a golden equestrian statue to be set up on a marble column beside the altar of Zeus *Σωτήρ* in the *agorá* (M. Fränkel *op. cit.* i. 153 ff. no. 246, 9 ff. = Michel *op. cit.* no. 515, 9 ff. = Dittenberger *Orient. Gr. inscr. sel.* no. 332, 9 ff. *στῆσαι δὲ αὐτοῦ καὶ εἰκόνα χρυσῆν ἔφιππον ἐπὶ στυ*|*λίδος μαρμαρίνης παρὰ τὸν τοῦ Διὸς* [*τ*]*οῦ Σωτῆρος βωμόν, ὅπως ὑπάρχηι ἡ* | *εἰκὼν ἐν τῶι ἐπιφανε·στάτωι τόπωι τῆς ἀγορᾶς, κ.τ.λ.*); but this must refer to the *agorá* at Elaia, not at Pergamon (M. Fränkel *op. cit.* i. 156).

Aiolis

Temnos[1].

Lydia

Mount Sipylos[2].

Zeus was worshipped at Pergamon under several other appellatives. The water-supply of the town was a grave matter necessitating repeated changes and improvements to meet the needs of the growing population (F. Gräber *Die Wasserleitungen* (*Pergamon* i. 3) Berlin 1913 Beiblatt 88 bird's-eye view of three conduits and aqueduct). P. Aelius Aristeides (*supra* p. 127) in an epideictic harangue entitled *παηγυρικὸς ἐπὶ τῷ ὕδατι ἐν Περγάμῳ* describes how all Asia rejoiced with the Pergamenes when a copious flow of pure water was secured at last, and how he welcomed the good news as a special favour vouchsafed by Zeus *Εὐαγγέλιος* and Asklepios *Σωτήρ* (Aristeid. *or.* 55 (ii. 708 Dindorf) *εἶναι γὰρ τὸ ὕδωρ πλήθει τε πλεῖστον καὶ κάλλει κάλλιστον ὅσων ἔλαχον πόλεις. ἦγον οὖν οὐχ ὅσον ἡρινὴν ἡμέραν, ἀλλ' οἵαν εἰκὸς ἄγειν Διός τε Εὐαγγελίου καὶ Ἀσκληπιοῦ Σωτῆρος πανταχῇ τιμῶντος. κ.τ.λ.*). Zeus *Κεραύνιος* is represented by two dedications (*supra* p. 808 n. 0 no. (8)), Zeus *Μέγιστος* by a small altar of trachyte (M. Fränkel *op. cit.* ii. 243 no. 328, 1 ff. *Διὶ Μεγ[ίστῳ Πύρ[ε]][σ]ι[ς?]*, cp. *Corp. inscr. Gr.* iii no. 4885, 1), Zeus *Μέγιστος Σωτήρ* by another of white marble (M. Fränkel *op. cit.* ii. 242 no. 327, 1 ff. *Διὶ Μεγίστῳ Σωτῆρι||* (relief of an eagle in a niche surrounded by tendrils)*||Καπίτων | κατ' ὄνειρον*). L. Cuspius Rufinus, the consul of 197 A.D., was priest of Zeus *Ὀλύμπιος* (M. Fränkel *op. cit.* ii. 297 f. no. 434, 1 ff. a base of white marble inscribed *Λ(ούκιον) Κούσπιον Πακτουμήϊ[ον] | Ῥουφῖνον, ὕπατον, ἱερέα Διὸς | Ὀλυμπίου καὶ κτίστην τῆς πατρίδος, | οἱ τὴν ἀκρόπολιν κατοικοῦντες*), whose cult was probably introduced in the days of Hadrian the 'Olympian' (*id. ib.* p. 298). H. von Fritze in the *Abh. d. berl. Akad. 1910* Phil.-hist. Classe Anhang i. 55 f. pl. 4, 8 (=my fig. 846) detects the statuary type of the god on a Pergamene coin struck by Hadrian (cp. Overbeck *Gr. Kunstmyth.* Zeus p. 163 Münztaf. 2, 23 with eagle beside the right foot of Zeus). For Zeus *Τροπαῖος* see *supra* p. 110 n. 9 (add M. Fränkel *op. cit.* i. 137 f. no. 239, 2), for Zeus (?) *Ὕψιστος supra* p. 882 n. 0 no. (21), for Zeus *Φίλιος infra* Append. N *med.* Coins of Antoninus Pius and Marcus Aurelius, issued at Pergamon, show Zeus enthroned with Nike on his right hand and a long sceptre in his left (H. von Fritze *loc. cit.* p. 55 pl. 4, 12, cp. Mionnet *Descr. de méd. ant.* ii. 602 no. 585).

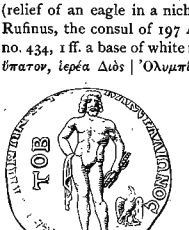

Fig. 846.

[1] Zeus' *Ακραῖος* (*supra* p. 873 n. 0 no. (9)).

[2] It has been maintained, though without sufficient reason, that there was a cult of Zeus *Ὕπατος* on Mt Sipylos (*supra* p. 876 n. 0 no. (8)), where Zeus was said to have been born (Aristeid. *or.* 22. 270 (i. 440 Dindorf) *τὰ μὲν οὖν παλαιὰ μέμνησαι κατὰ τὴν πρώτην ἀκούσας ἀρχήν, ἣν τῷ πατρὶ συνῆρχες, Διός τινα γένεσιν καὶ χορείας Κουρήτων καὶ Ταντάλου καὶ Πέλοπος οἰκισμὸν τῆς πρώτης πόλεως ἐν τῷ Σιπύλῳ γερομένης*, cp. *or.* 15. 229 (i. 371 f. Dindorf) *ἡ μὲν οὖν πρεσβυτάτη πόλις ἐν τῷ Σιπύλῳ κτίζεται, οὗ δὴ τάς τε θεῶν εὐνὰς εἶναι λέγουσι καὶ τοὺς Κουρήτων χορούς περὶ τὴν τοῦ Διὸς μητέρα, or.* 20. 260 (i. 425 Dindorf) *τὰ μὲν ἀρχαῖα Κουρήτων χοροὶ καὶ τροφαὶ καὶ γενέσεις θεῶν καὶ Πέλοπες διαβαίνοντες ἐνθένδε*) and to have lain with Semele (schol. B, *Il.* 24. 615 *Σίπυλος πόλις ἐστὶ Λυδίας καὶ Ἀχελῷος ποταμὸς ἐκεῖ παρακείμενος. "θεάων" δὲ "εὐνάς," ὅτι ἐκείσε Σεμέλη ὁ Ζεὺς συνεκοιμήθη*).

A remarkable crag on Mt Sipylos is topped by a rock-cut seat known to the ancients as the 'throne of Pelops' (Paus. 5. 13. 7 *Πέλοπος δὲ ἐν Σιπύλῳ μὲν θρόνος ἐν κορυφῇ τοῦ ὄρους ἐστὶν ὑπὲρ τῆς Πλαστήνης μητρὸς τὸ ἱερόν*. See further *supra* i. 137 ff. fig. 103), and the sceptre of Pelops was the sceptre of Zeus (*Il.* 2. 100 ff. *ἀνὰ δὲ κρείων Ἀγαμέμνων | ἔστη σκῆπτρον ἔχων, τὸ μὲν Ἥφαιστος κάμε τεύχων. | Ἥφαιστος μὲν δῶκε Διὶ Κρονίωνι ἄνακτι, | αὐτὰρ ἅρα Ζεὺς δῶκε διακτόρῳ ἀργεϊφόντῃ· | Ἑρμείας δὲ ἄναξ δῶκεν Πέλοπι πληξίππῳ, | αὐτὰρ ὁ αὖτε Πέλοψ δῶκ' Ἀτρέϊ, ποιμένι λαῶν· | Ἀτρεὺς δὲ θνήσκων ἔλιπεν πολύαρνι Θυέστῃ, | αὐτὰρ ὁ αὖτε Θυέστ' Ἀγαμέμνονι λεῖπε φορῆναι, | πολλῇσιν νήσοισι καὶ Ἀργεϊ παντὶ ἀνάσσειν*, Paus.

Philadelpheia[1].
Mount Tmolos[2].
Tralleis[3].

9. 40. 11 (*supra* i. 406), Quint. *inst. or.* 9. 3. 57 invenitur apud poetas quoque (*sc.* gradatio) ut apud Homerum de sceptro, quod a Iove ad Agamemnonem usque deducit: et apud nostrum etiam tragicum (*Trag. Rom. frag.* p. 288 f. Ribbeck) 'Iove propagatus (O. Ribbeck cj. *patre prognatus*) est, ut perhibent, Tantalus, | ex Tantalo ortus Pelops, ex Pelope autem satus | Atreus, qui nostrum porro propagat genus' = Diom. *ars gramm.* 2 p. 448, 25 ff. Keil, Quint. *inst. or.* 9. 4. 140 (*Trag. Rom. frag.* p. 289 Ribbeck) 'en impero Argis, sceptra (Sen. *epist.* 80. 7 quotes the line with *regna* for *sceptra*) mihi liquit Pelops').

Coppers of Magnesia ad Sipylum, struck in *s.* ii—i B.C., have *obv.* head of Zeus (or perhaps of Mt Sipylos ?) to right, laureate (*Brit. Mus. Cat. Coins* Lydia p. 137 pl. 15, 1 and 2, p. 139 pl. 15, 7, *Hunter Cat. Coins* ii. 455 no. 3), or *rev.* Zeus standing, in *chitôn* and *himation*, with an eagle on his extended right hand, a transverse sceptre in his left (*Brit. Mus. Cat. Coins* Lydia p. 137 pl. 15, 3), or Zeus and Hermes (?) joining hands with a spear between them (*ib.* p. 138 pl. 15, 4). *Quasi*-autonomous coppers of imperial date (M. Aurelius to Gallienus) repeat the *obv.* head of Zeus (or Mt Sipylos: see *supra* i. 102 n. 5 fig. 75) to right, laureate (*Brit. Mus. Cat. Coins* Lydia p. 139 ff. pl. 16, 2 f., Imhoof-Blumer *Kleinas. Münzen* ii. 521 no. 1). A copper of Philippus Senior has *rev.* a naked Zeus holding a thunderbolt in his left hand and resting with his right on a spear (*Brit. Mus. Cat. Coins* Lydia p. 151 no. 80).

[1] Zeus Κορυφαῖος (*supra* p. 285 n. 0 no. (3), p. 869 n. 1 fig. 804).

[2] According to Eumelos, Zeus was born in Lydia; and on the top of Mt Tmolos, west of Sardeis, was a place called Γοναὶ Διὸς Τετίου and subsequently Δεύσιον (Lyd. *de mens.* 4. 71 p. 123, 14 ff. Wünsch Εὔμηλος δὲ ὁ Κορίνθιος (*frag.* 18 Kinkel) τὸν Δία ἐν τῇ καθ' ἡμᾶς Λυδίᾳ τεχθῆναι βούλεται, καὶ μᾶλλον ἀληθεύει ὅσον ἐν ἱστορίᾳ· ἔτι γὰρ καὶ νῦν πρὸς τῷ δυτικῷ τῆς Σαρδιανῶν πόλεως μέρει ἐπ' ἀκρωρείας τοῦ Τμώλου τόπος ἐστίν, ὃς πάλαι μὲν Γοναὶ Διὸς Τετίου νῦν δὲ παρατραπείσης τῷ χρόνῳ τῆς λέξεως Δεύσιον (G. Kinkel prints Δευσίου and is followed by K. Tümpel in Pauly—Wissowa *Real-Enc.* v. 281) προσαγορεύεται). A bronze coin of Sardeis, struck under Iulia Domna, has for its reverse type an infant Zeus seated on the ground with an eagle hovering above him (*Brit. Mus. Cat. Coins* Lydia p. 261 pl. 27, 6 = *supra* i. 151 fig. 118). Zeus Σαβάζιος brought the babe Dionysos to Mt Tmolos (Orph. *h. Sabaz.* 48. 1 ff. κλῦθι, πάτερ, Κρόνου υἱέ, Σαβάζιε, κύδιμε δαῖμον, | ὃς Βάκχον Διόνυσον, ἐρίβρομον, εἰραφιώτην | μητρῷ ἐγκατέραψας, ὅπως τετελεσμένος ἔλθῃ | Τμῶλον ἐς ἠγάθεον παρά θ' Ἵπταν (παρ' ἵππαν codd.) καλλιπάρῃον. So O. Kern in *Genethliakon* Carl Robert zum 8. März 1910 überreicht von der Graeca Halensis Berlin 1910 p. 90 f. and in his *Orphicorum Fragmenta* Berolini 1922 p. 222 f., W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 257 f.). See further K. Buresch *Klaros* Leipzig 1889 p. 16 f., Gruppe *Gr. Myth. Rel.* p. 284 n. 11.

[3] Tralleis (*Aïdin*) occupied a high plateau on a southern spur of Mt Messogis. Its *akrópolis* (320^{m}) overlooks the little river Eudonos, a tributary of the Maiandros (map by C. Humann and W. Dörpfeld in the *Ath. Mitth.* 1893 xviii. 395 ff. pl. 12). The town was said to have been founded by Argives and Thracians (Strab. 649 κτίσμα δέ φασιν εἶναι τὰς Τράλλεις Ἀργείων καί τινων Θρᾳκῶν Τραλλίων, ἀφ' ὧν τοὔνομα, cp. Steph. Byz. *s.v.* Τραλλία and Diod. 17. 65). A bronze coin struck by M. Aurelius has for reverse type ΤΡΑΛΛΕΥ C ΚΤΙCCΤΗC (*sic*) Tralleus as a soldier, standing to left, with right hand outstretched and left supported on spear (Imhoof-Blumer *Gr. Münzen* p. 203 no. 642 b, Head *Hist. num.*[2] p. 661).

Larisa, a village higher up on the slopes of Messogis, thirty stades from Tralleis, gave its name to Zeus Λαρίσιος (Strab. 440 (in a list of towns called Λαρίσα) καὶ τῶν Τραλλέων διέχουσα κώμη τριάκοντα σταδίους ὑπὲρ τῆς πόλεως ἐπὶ Καΰστρου πεδίον διὰ τῆς Μεσωγίδος ἰόντων κατὰ τὸ τῆς Ἰσοδρόμης Μητρὸς ἱερόν, ὁμοίαν τὴν θέσιν καὶ τὴν ἀρετὴν ἔχουσα τῇ Κρεμαστῇ Λαρίσῃ (so cod. A, with another *σ* added by the second hand. Λαρίσσῃ cett. codd.)· καὶ γὰρ εὔυδρος καὶ ἀμπελόφυτος· ἴσως δὲ καὶ ὁ Λαρίσιος (so cod. A, with another

σ added by the second hand. λαρίσσιος cett. codd.) Ζεὺς ἐκεῖθεν ἐπωνόμασται), as did Larisa on the Caystrian Plain to Apollon Λαρισηνός (Strab. 620 : *id. ap.* Steph. Byz. *s.v.* Λάρισσα has Λαρισσηνός). Pythodoros of Tralleis, the friend of Pompey, is mentioned along with Μηνόδωρος, ἀνὴρ λόγιος καὶ ἄλλως σεμνὸς καὶ βαρύς, ἔχων τὴν ἱερωσύνην τοῦ Διὸς τοῦ Λαρισαίου (Strab. 649). The name Λάρισα seems, however, to have been assimilated to the Carian place-names Ἄρπασα, Βάργασα, Μύλασα, Πήδασα, etc. (cp. Ptol. 6. 2. 13 Λάρασα in Media); for Zeus Λαρίσιος or Λαρισαῖος regularly all appears on coins and in inscriptions as Zeus Λαράσιος. His cult, the most important of all cults at Tralleis, has been well studied by J. O. Schaefer *De Iove apud Cares culto* Halis Saxonum 1912 pp. 455—466, to whose collection of evidence I am much indebted.

Tralleis was formerly called Δία (*et. mag.* p. 389, 55 f. cited *supra* p. 587 n. 2, cp. Ltz. Bürchner in Pauly—Wissowa *Real-Enc.* v. 299) and was officially described as Zeus (*Corp. inscr. Gr.* ii no. 2926 (of *s.* iii A.D.) Τ. Κλ. Γλύπτον, | Ἀνδρονίκου (*vi*)όν, | τὸν ἀγορανόμον, | τὸν ὑπέρτατον | λογιστ(ὴ)ν καὶ | σωτῆρα καὶ | κτίστην τῆς | πατρίδος, | τῆς λαμπροτάτης | πόλε(ω)ς τῆς νε|ωκόρου τῶν Σεβαστῶν, | ἱερᾶς τοῦ Διός, κα|τὰ τὰ δόγματα τῆς| συνκλήτου Τραλ|λιανῶν | οἱ μύσται | τῶν ἱερῶν (Lebas—Waddington iii. 203 no. 604 read οἱ μύσται τὸν εὐε[ργέτην]) or to Zeus Λαράσιος (K. Buresch in the *Ath. Mitth.* 1894 xix. 111 ff. no. 12 (time of Caracalla) Φλάουιον Φ[λ](αουίου) | Διαδούμενον | (ἐπίτροπον?) | τοῦ Σεβαστοῦ ὑπ[α]τικῶν συνγενῆ | ἡ κρατίστη<ι> Κλαυδία | βουλὴ καὶ ὁ δῆ[μο]ς [τῆς] | λαμπροτάτη[ς μητρο]πόλεως τῆς [Ἀσίας καὶ] | νεωκόρου τῶ[ν Σεβαστῶν] | καὶ ἱερᾶς τοῦ [Διὸς τοῦ Λα]ραsίου κ[ατὰ τὰ δόγματα] | τῆς ἱερωτά[της συνκλή]|του Καισα[ρέων Τραλλια][νῶν πόλ[εως] | διὰ τὴν (ὑ)περ(τ)ά[την?] | ἐν ταῖς ἀρχαῖ[ς καὶ λειτουρ]|γίαις εὔνοια[ν καὶ] | φιλοτιμία[ν]). Decrees were set up in the sanctuary of Zeus (A. E. Kontoleon in the *Bull. Corr. Hell.* 1886 x. 516 no. 4, 2 ff. τὸ δὲ ψήφισμα | [τό]δε ἀναγράψαι εἰς στήλην λιθίνην καὶ στῆσαι | ἐν τῶι ἱερῶι τοῦ Διός, M. Pappakonstantinou Αἱ Τράλλεις ἤτοι συλλογὴ Τραλλιανῶν ἐπιγραφῶν Athens 1895 no. 42 (of *s.* iii B.C.) ὁ δῆμος ὁ Σελευκείων (cp. Plin. *nat. hist.* 5. 108) . . . ἀναγράψαι δὲ τὸ ψήφισμα τόδε ἐν στήλῃ λιθίνῃ καὶ στῆσαι ἐν τῷ [? *pro* (suppl. J. O. Schäfer)] νάῳ τοῦ Διὸς ἐν τῷ ἐπιφανεστάτῳ τόπῳ) or Zeus Λαράσιος (A. Fontrier in the *Bull. Corr. Hell.* 1879 iii. 466 ff., v. 11 ff. (of *s.* iii B.C.) [ἀναγ]ράψαι δὲ τὸ ψήφισμα τόδε ε[ἰς τ]ὰς περὶ τούτων ἐπι[σκευασθείσας στήλας καὶ στ]ῆσαι μίαν μὲν ἐν τῶι ἱερῶι τοῦ Διὸς τοῦ Λαρ[ασ]ί[ο]υ, τὴν δὲ ἑτέραν | [ἐν τῶι ἱερῶι τῆ]ς Ἀθη[ᾶς, M. Pappakonstantinou in the *Ath. Mitth.* 1888 xiii. 411 no. 2, 5 ff. ἀνα[γράψ]αι δ(ὲ) αὐτὸν καὶ εὐεργέτην τῆς πόλε[ως ὡς καὶ] τὸ ψήφισμα εἰς στήλην λιθίνην | [καὶ στῆ]σαι ἐν τῷ ἱερῷ τοῦ Διὸς τοῦ Λαραsίου, κ.τ.λ., A. Rehm in *Milet* iii. 318 ff. no. 143, 66 ff. (a decree of Seleukeia (Tralleis) cited in a pact of 212/11 B.C. between Miletos and Seleukeia) ἐπὶ δὲ τοῖς ἐψηφισμένοις συμ[τελέσαι θυσίαν] τῶι Διὶ τῶι Λαρασίωι καὶ τῶι Ἀπόλλωνι τοὺς ἱερομνήμονας κα[ὶ] | [τοὺς (8—10 letters missing) καὶ τοὺς θ]ε[ορ]ὸ[λου]ς ἐπ[ε]υχομένους συνενεγκεῖν ἀμφοτέραις | [ταῖς πόλεσι τὰ ἐψηφισμένα καὶ εἶναι] ἐπὶ σωτηρίαι καὶ εὐτυχίαι· ἀνα[γράψαι δὲ τὸ ψήφισμα εἰς στήλην λιθίνην]ν καὶ στ[ῆσαι ἐν τῶι ἱερῶι τοῦ | [Διὸς τοῦ Λαρασίου· κ.τ.λ.], T. Macridy in the *Jahresh. d. oest. arch. Inst.* 1912 xv. 59 f. (a *stèle* of Hellenistic date from Notion) A, 3 ff. ἀναγράφουσι τὰ ψηφί[σ]ι[μ]ατα εἰς στήλας λιθίνας δύο καὶ ἱστᾶσι τὴμ μὲν μίαν παρ' αὐτοῖς ἐν τῶι ἱρῶι τ[οῦ] | [Δ]ιὸς τοῦ Λαρασίου ἐν τῶι ἐπιφανεστάτωι τόπωι, τὴν δὲ ἑτέραν παρ' ἡμῖν κ.τ.λ.). And votive offerings to the god included a couple of eagles (C. Fellows *An Account of Discoveries in Lycia* London 1841 p. 19=*Corp. inscr. Gr.* ii Add. no. 2923 *b*=Lebas—Waddington *Asie Mineure* iii. 200 no. 597 (beneath a well-carved eagle *minus* its head) Διογένης Ὀρθ[ων]ος Θεῷ Διὶ εὐχα[ρ]ι|ιστῶν τούτους | δύ' ἀετοὺς ἀνέ|θηκε. The *formula* Θεῷ Διί is exceptional and sounds like a Latinism, cp. *Corp. inscr. Lat.* vii no. 80, 1 f. *deo* | *Iovi* and the like) and an effigy of Dionysos (M. Pappakonstantinou Αἱ Τράλλεις κ.τ.λ. no. 150 ἀγαθῇ τύχῃ· τῶι Διὶ τὸν Διόνυσον Ἀγαθήμερος ἱερός (on this title see G. Cardinali 'Note di terminologia epigrafica II Ἱερεύς' in the *Rendiconti d. Lincei* 1908 xvii. 165 ff., O. Kern 'Hieroi und Hierai' in *Hermes* 1911 xlvi. 300 ff., Link in Pauly—Wissowa *Real-Enc.* viii. 1471 ff.)).

The priest of the city, presumably the priest of Zeus Λαράσιος, regularly dwelt in the brick palace built there by the kings of Pergamon (Vitr. 2. 8. 9 Trallibus domum regibus Attalicis factam quae ad habitandum sempeř datur ei qui civitatis gerit sacerdotium). He

held office for life (E. Loewy in the *Ath. Mitth.* 1886 xi. 203 f. no. 1 = A. E. Kontoleon in the *Bull. Corr. Hell.* 1886 x. 456 f. no. 8 = J. R. S. Sterrett in the *Papers of the American School of Classical Studies at Athens* 1888 ii. 325 no. 379 = Dittenberger *Orient. Gr. inscr. sel.* no. 499 'On the base or capital of a column' [Γ.] 'Ιούλιον, [Γ.] 'Ιουλίου Φιλίππου ἀρχιερέως | 'Ασίας υἱόν, Οὐελίνᾳ, Φιλίππου, ἱππέα 'Ρωμαίων (Loewy and Dittenberger give 'Ρω|μαίων), τῶν ἑκλεκτῶν ἐν 'Ρώμ[ῃ]ι δικαστῶν, | ἐπίτροπον τῶν Σεβαστῶν, πατέρα 'Ιουλί[ου] | Φιλίππου συγκλητικοῦ, στρατηγοῦ 'Ρωμαί|ων, ἱερέα διὰ βίου τοῦ Διὸς τοῦ Λαφαισίου, J. Φλ. Κλειτοσθένους | ὑπατικοῦ ~ ἔγγονον ~ | Τ. Φλ. Κλειτοσθένους, πατρὸς | [ὑπατικοῦ – – – – –]). When, in *s.* ii A.D., Tralleis was visited by an earthquake, a Pythian oracle delivered to the priest Kleitosthenes represented the disaster as due to the wrath of Zeus for the city's neglect of Poseidon the earthquake-god and directed that ample atonement should be made to both deities (A. Hauvette-Besnault and Dubois in the *Bull. Corr. Hell.* 1881 v. 340 ff. = Cougny *Anth. Pal. Append.* Add. 6. 104*b* = O. Kern in *Genethliakon* Carl Robert zum 8. März 1910 überreicht von der Graeca Halensis Berlin 1910 p. 98 ff. with pl. χρησμὸς τοῦ Πυθίου | δοθεὶς Κλειτοσθένει τῷ | ἱερεῖ τοῦ Διὸς ὑπὲρ τῆς | σωτηρίας τῆς πόλεως· |

χειλιετὲς μήνεμα πάτρης Διὸς ἐξαναλύσας
μειλιχίῃ Σεισίχθονι ἐν ἅλσεῖ βωμὸν ἐνείρας
θύεο, μὴ διερεύνω μ' ὦ πόλις, εἰναλίῳ νῦν
ἐννομίην Κρονίδῃ, φοιβῇ χερὶ δὲ ἀρητῆρος,
πυρῶν καὶ καρπῶν τ' ἐπιδράγματα πάντα· καλείσθω
ἀσφάλιος, τεμενοῦχος, ἀπότροπος, ἵππιος, ἀργῆς·
ὥδε, πόλις, δὲ ὑμνεῖτε δεδραγμένον εἶφι βεβῶτα
οὗ τε βάθρῳ κύκνειον ὅσοι γέρας ἀμφιπένεσθὲ
ἐν χορῷ εὖ αἰνεῖν Σεισίχθονα ϛαὶ Δ[ί]α μείλαξ

(The last word is a puzzle. O. Kern *loc. cit.* p. 101 n. 1 holds that it is either an unknown adverb or a form comparable with Hesych. μίλαξ· ἡλικία. ἔνιοι δὲ μέλλαξ· καὶ παρ' Ἕρμίππῳ ἐν Θεοῖς (*frag.* 10 (*Frag. com. Gr.* ii. 392 Meineke)), ἀγνοήσας 'Αρτεμίδωρος· ἐκεῖ γὰρ μίλαξ ἐστιν. δηλοῖ δὲ τὸν δημοτικόν. J. O. Schaefer *op. cit.* p. 464 f. prefers the first alternative and assumes μείλαξ = μειλιχίῃ. No allusion to the botanical μίλαξ is probable.) Another priest of *s.* ii A.D., Claudius Meliton, made a dedication to Zeus Λαφάσιος Σεβαστὸς Εὐμενής (J. R. S. Sterrett in the *Papers of the American School* 1888 ii. 326 f. no. 381 Διὶ Λαφαισ|ῳ Σεβαστῷ | Εὐμενεῖ Κλαύ|δι(ο)ς Μελί[των ὁ ἱερεὺς | ἀποκατέ|στησεν), *i.e.* to the emperor Hadrian, who in 129 A.D. came to Tralleis (W. M. Ramsay *ib.* 1885 i. 102) and was there identified with Zeus Λαφάσιος (J. B. Lightfoot *The Apostolic Fathers* London 1885 ii. 1. 617 n. 1, J. R. S. Sterrett *loc. cit.* 1888 ii. 327), just as in 128 A.D. he came to Athens and was there identified with Zeus 'Ολύμπιος (P. v. Rohden in Pauly—Wissowa *Real-Enc.* i. 509), or just as in 132 A.D. he came to Dodona and was there identified with Zeus Δωδωναῖος (*id. ib.* i. 512, on the strength of *Corp. inscr. Gr.* ii no. 1822 cited *infra* Append. M. *med.*).

Special interest attaches to the inscription on a small marble base from *Aïdin* in the Purser collection at Smyrna (W. M. Ramsay in the *Bull. Corr. Hell.* 1883 vii. 276 f. no. 19, *id. The Cities and Bishoprics of Phrygia* Oxford 1895 i. 94 ff., 115 no. 18 [ἀγ]αθῇ τύχῃ· | Α. Αὐρηλία Αἰ[μ]ιλία ἐκ προ|γόνων παλλα|κίδων καὶ ἀνε|πτοπόδων θ[υ]γάτηρ Λ. Αὐρ. Σ[ε]|κούνδου Ση[σ]ίου παλλακεύσα|σα καὶ κατὰ χρη|σμὸν (space) | (space) Διὶ Ὑ). Sir William Ramsay comments: 'Aurelia Aemilia belonged to a family in which the ancient custom was retained that the women should in their youth be *hetairai* in the service of the temple.

This custom was common in the native religions of Asia Minor (1) [(1) Strab. p. 559 and 532–3.], but it is somewhat remarkable to find it actually practised by a family bearing Roman names perhaps as late as the third century B.C.' Cp. Ail. *var. hist.* 4. 1 Λυδοῖς ἦν ἔθος πρὸ τοῦ συνοικεῖν τὰς γυναῖκας ἀνδράσιν ἑταιρεῖν, ἅπαξ δὲ καταζευχθεῖσας σωφρονεῖν· τὴν δὲ ἁμαρτάνουσαν ἐς ἕτερον συγγνώμης τυχεῖν ἀδύνατον ἦν (but hardly the references collected by Gruppe *Gr. Myth. Rel.* p. 915 n. 6). The significance of such customs in general is disputed (see *e.g.* M. P. Nilsson *Studia de Dionysiis Atticis* Lundae 1900 pp. 119—121, *id. Gr. Feste* pp. 365—367, Gruppe *Gr. Myth. Rel.* pp. 914—917, F. Cumont *Les Religions Orientales dans le Paganisme Romain*[2] Paris 1909 pp. 143—286, H. Ploss—M. Bartels *Das Weib in der Natur- und Völkerkunde*[10] Leipzig 1913 i. 614—616, 648—654, Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] i. 36 ff., 57 ff.) and investigators have been apt to confuse similar effects produced by dissimilar causes (see E. S. Hartland 'Concerning the Rite at the Temple of Mylitta' in *Anthropological Essays presented to Edward Burnett Tylor* Oxford 1907 pp. 189—202). The Trallian inscription perhaps implies that women, believed to represent a mother-goddess, used to mate with men, believed to represent a father-god, their union being thought to promote the fruitfulness of the land and its occupants. If so, the παλλακίδες may have been comparable with the Egyptian παλλακίδες of Zeus Θηβαιεύς (Hdt. 1. 182 (*supra* i. 348 n. 1), cp. Hekataios of Abdera *frag.* 12 (*Frag. hist. Gr.* ii. 390 Müller) *ap.* Diod. 1. 47 ἀπὸ γὰρ τῶν πρώτων τάφων, ἐν οἷς παραδέδοται τὰς παλλακίδας τοῦ Διὸς τεθάφθαι, κ.τ.λ., Strab. 816 τῷ δὲ Διί, ὃν μάλιστα τιμῶσιν, εὐειδεστάτη καὶ γένους λαμπροτάτου παρθένος ἱερᾶται, ἃς καλοῦσιν οἱ Ἕλληνες παλλάδας (Xylander cj. παλλακάς. W. Dindorf cj. παλλακίδας. But see G. Kramer *ad loc.*)· αὕτη δὲ καὶ παλλακεύει καὶ σύνεστιν οἷς βούλεται, μέχρις ἂν ἡ φυσικὴ γένηται κάθαρσις τοῦ σώματος· μετὰ δὲ τὴν κάθαρσιν δίδοται πρὸς ἄνδρα· πρὶν δὲ δοθῆναι, πένθος αὐτῆς ἄγεται μετὰ τὸν τῆς παλλακείας καιρόν). And the ἀνιπτόποδες recall the priests of Zeus at Dodona (*Il.* 16. 234 ff. Ζεῦ ἄνα, Δωδωναῖε, Πελασγικέ, τηλόθι ναίων, | Δωδώνης μεδέων δυσχειμέρου· ἀμφὶ δὲ Σελλοὶ | σοὶ ναίουσ' ὑποφῆται ἀνιπτόποδες, χαμαιεῦναι), who went with unwashen feet and lay on the ground in order that they might be in constant contact with Mother Earth (J. O. Schaefer *op. cit.* p. 462 f. I had hit upon the same explanation years before and published it in the *Class. Rev.* 1903 xvii. 180). The combination of a rite reminiscent of Egyptian Thebes with a rite reminiscent of Dodona is not surprising in view of the analogy already traced between the usages of these two cult-centres (*supra* i. 363 ff.).

Coppers of Seleukeia (Tralleis) first struck late in *s.* iii B.C. (Head *Hist. num.*[2] p. 659) have *obv.* head of Zeus, laureate, to right; *rev.* humped bull, with ΣΕΛΕΥΚΕΩΝ above and magistrate's name below, all within maeander-border (F. Imhoof-Blumer *Lydische Stadtmünzen* Genf—Leipzig 1897 p. 169 pl. 7, 7). Some specimens add ΔΙΟΣ above and ΛΑΡΑΣΙΟΥ below the bull (*id. ib.* p. 169 no. 3). One, in place of the maeander, gives ΔΙΟΣ ΛΑΡΑΣΙΟΥ ΚΑΙ ΔΙΟΣ ΕΥΜΕΝΟΥ (*sic*) (*id. ib.* p. 169 f. no. 4), cp. Dittenberger *Syll. inscr. Gr.*[3] no. 985, 6 ff. (Philadelpheia in Lydia: *s.* i B.C.) Διὸς [γὰρ ἐν τούτωι] | τοῦ Εὐμενοῦς καὶ Ἑστίας τ[ῆς παρέδρου αὐ]|τοῦ καὶ τῶν ἄλλων θεῶν Σωτ[ήρων κ.τ.λ.] and the dedication to Hadrianas Zeus Λαράσιος Σεβαστὸς Εὐμενής cited *supra*. The inference is that Eumenes i was divinised after his death as Zeus Εὐμενής: cp. the divinisation of Eumenes ii in Michel *Recueil d'Inscr. gr.* no. 515, 22 = Dittenberger *Orient. Gr. inscr. sel.* no. 332, 22 θεοῦ βασιλέως Εὐμένου Σωτῆρος (*id.* 24 f., 27 f., 45). Coppers of Tralleis struck in early imperial times have sometimes *obv.* head of Zeus, laureate, to right; *rev.* Δ[ΙΟ]Σ ΛΑΡΑΣΙΟΥ ΚΑΙ[ΣΑ]ΡΕΩΝ humped bull standing to left (*Brit. Mus. Cat. Coins* Lydia p. 339 no. 87: my fig. 847 is from a cast of this specimen). Later we find *obv.* ΣΕΥCΛΑ PAĊIOC bust of Zeus, laureate, to right, within border of dots; *rev.* ΤΡΑΛ ΛΙΑΝΩΝ Dionysos standing to front, naked, with grape-bunch in raised right hand, *kántharos* in lowered left, within border of dots (*id.* p. 341 no. 100), or *obv.* ΖЄ VC

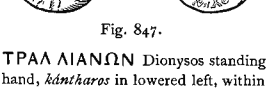

Fig. 847.

bust of Zeus, laureate, to right, within border of dots; *rev.* ΤΡΑΛΛΙΑΝΩΝ humped bull walking to right, within border of dots (*ib.* p. 342 no. 101 f.), or ΤΡΑΛΛ ΙΑΝΩΝ bunch of grapes, within border of dots (*ib.* p. 342 no. 103). Other imperial coppers represent Zeus *Λαράσιος* as a seated figure, who wears a *himátion* round his legs, holds Nike on his outstretched right hand, and rests upon a sceptre with his left (*ib.* p. 340 no. 93 ΛΑΡΑCΙΟC ΚΑΙCΑΡΕ ΩΝ time of Nero—Domitian, p. 345 no. 129 ΚΑΙCΑΡΕΩ ΝΛΑΡΑCΙ ΟC Domitian, cp. p. 354 pl. 37, 7 Gordianus Pius, p. 357 pl. 37, 11 Philippus Senior, p. 362 pl. 41, 11 Gordianus Pius), sometimes with an eagle at his feet (*ib.* p. 350 pl. 37, 2 L. Verus).

Other coins of the town illustrate the myth of Zeus: (1) a copper of Antoninus Pius has *rev.* ΔΙΟCΓΟΝΑΙ the infant Zeus asleep on a mountain with an eagle hovering above him (Overbeck *Gr. Kunstmyth.* Zeus p. 337 f., Head *Hist. num.*[2] p. 661. *Supra* i. 151 fig. 119, 535 n. o). Sir W. M. Ramsay *The Historical Geography of Asia Minor* London 1890 p. 13 rightly rejects B. V. Head's former view that the legend is *Διὸς Γοναί(ου)*. Cp. Aristodemos of Thebes *frag.* 6 (*Frag. hist. Gr.* iii. 310 Müller) *ap.* schol. *Il.* 13. 1 *μετὰ δὲ τὴν Ἴλιου πόρθησιν Ἕκτωρ ὁ Πριάμου καὶ μετὰ τὸν θάνατον τὴν ἀπὸ θεῶν εὐτύχησε τιμήν. οἱ γὰρ ἐν Βοιωτίᾳ Θηβαῖοι πιεζόμενοι κακοῖς ἐμαντεύοντο περὶ ἀπαλλαγῆς. χρησμὸς δὲ αὐτοῖς ἐδόθη παύσεσθαι τὰ δεινά, ἐὰν ἐξ Ὀφρυνίου τῆς Τρωάδος τὰ Ἕκτορος ὀστᾶ διακομισθῶσιν εἰς τὸν παρ' αὐτοῖς καλούμενον τόπον Διὸς Γονάς. οἱ δὲ τοῦτο ποιήσαντες καὶ τῶν κακῶν ἀπαλλαγέντες διὰ τιμῆς ἔσχον Ἕκτορα, κατά τε τοὺς ἐπείγοντας καιροὺς ἐπικαλοῦνται τὴν ἐπιφάνειαν αὐτοῦ. ἡ ἱστορία παρὰ Ἀριστοδήμῳ*=Cramer *anecd. Paris.* iii. 18, 7 ff. with Bölte in Pauly—Wissowa *Real-Enc.* vii. 1585. (2) A copper of M. Aurelius has *rev.* the infant Zeus suckled by a goat (Mionnet *Descr. de méd. ant.* Suppl. vii. 472 no. 723). (3) A copper of Antoninus Pius has *rev.* the infant Zeus nursed by Rhea, with an eagle on the ground at her feet and three Kouretes clashing their shields about her (F. Imhoof-Blumer *Lydische Stadtmünzen* p. 177 f. pl. 7, 15, *Brit. Mus. Cat. Coins* Lydia p. 347 pl. 36, 5 (*supra* i. 151 fig. 121 from a cast), Head *Hist. num.*[2] p. 661). (4) A copper of Antoninus Pius has *rev.* ЄΙΟVCΓΑΜΟ[Ι] Io in long robe and bridal veil led towards the left by Hermes, who wears a *chlamýs* and holds a *caduceus* in his right hand (*Brit. Mus. Cat. Coins* Lydia p. 348 pl. 36, 8, Head *Hist. num.*[2] p. 661). (5) A copper of Antoninus Pius has *rev.* a veiled figure (Io?) sitting in a two-wheeled hooded chariot, which is drawn by a pair of humped bulls and conducted by a naked figure (Hermes?) (*Brit. Mus. Cat. Coins* Lydia p. 348 no. 141). (6) A copper of Tranquillina, now in the British Museum, has *rev.* a male figure (Zeus?) clad in a *himátion* extending his right hand to a fully draped and veiled female figure (Io?), who stands in the entrance of a wattle shed or hut (perhaps the *βούστασις* of Aisch. *P. v.* 651 ff. *σὺ δ', ὦ παῖ, μὴ 'πολακτίσῃς λέχος | τὸ Ζηνός, ἀλλ' ἐξελθὲ πρὸς Λέρνης βαθὺν | λειμῶνα, ποίμνας βουστάσεις τε πρὸς πατρός, | ὡς ἂν τὸ Δῖον ὄμμα λωφήσῃ πόθου*) (so B. V. Head and W. Wroth in the *Num. Chron.* Fourth Series 1903 iii. 337 f. no. 30 pl. 12, 1 (=my fig. 848 from a cast) with the alternative suggestion (*ib.* p. 338 n. 45): 'Or the scene...may possibly refer to a later incident, when Io, at the Egyptian Canobus, is restored to sanity by the gentle touch of Zeus's hand and becomes the mother of Epaphus the ancestor of the Argive Danaoi' [Aisch. *P. v.* 846 ff.], Head *Hist. num.*[2] p. 661). *À propos* of the whole series B. V. Head in the *Brit. Mus. Cat. Coins* Lydia p. cxlvi observes: 'Evidently on these coins we have representations of successive scenes in certain religious mysteries connected with the Io legend, and celebrated by the Trallians in commemoration of their Argive descent, Argos having been the original home of the Io myth.' I doubt the Io-'mysteries.' The coin-types, inscriptions and all, could be equally well explained as copying the subjects of the frescoes or reliefs with which some public edifice at Tralleis was adorned, *e.g.* the octostyle temple (? of Zeus. It has an eagle in its pediment, but a *caduceus* beside

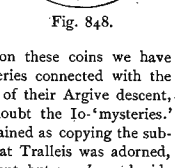

Fig. 848.

Ionia

Smyrna[1].
Ephesos[2].

it or within it) figured on imperial coppers (*Brit. Mus. Cat. Coins* Lydia p. 338 pl. 35, 1, p. 353 no. 161).

The cult of Zeus Λαράσιος spread to Miletos, where a small domestic altar dedicated to him has come to light (T. Wiegand in the *Abh. d. berl. Akad. 1908* Phil.-hist. Classe Anhang i. 27 'am zahlreichsten sind die Zeuskulte, natürlich wiegen die karischen vor, so dass Zeus Labraundios (einmal Λαβρένδιος) durch sechs mit der Doppelaxt geschmückte Altäre vertreten ist, Larasios und Zeus Lepsynos einmal, ebenso der Ὀλύμπιος Πεισαῖος, Κεραύνιος Σωτήρ, Τερμινθεύς, Ὁμοβούλιος und Καταιβάτης; endlich ist ein kleiner Altar Διὸς ἐλπίδων gefunden').

Θεὸς Ὕψιστος (*supra* p. 880 n. 0 no. (17)).

[1] Zeus Ἀκραῖος (*supra* p. 873 n. 0 no. (8)).

[2] The Zeus-cult of the Ephesians can be traced back to the first half of *s.* vii B.C. (Kallin. *frag.* 4 Bergk[4], 2 Hiller—Crusius *ap.* Strab. 633 *ἡνίκα καὶ Σμύρνα ἐκαλεῖτο ἡ Ἔφεσος· καὶ Καλλῖνός που οὕτως ὠνόμακεν αὐτήν, Σμυρναίους τοὺς Ἐφεσίους καλῶν ἐν τῷ πρὸς τὸν Δία λόγῳ· 'Σμυρναίους δ' ἐλέηεσον'· καὶ πάλιν· 'μνῆσαι δ' εἴ κοτέ τοι μηρία καλὰ βοῶν | <Σμυρναῖοι κατέκηαν (ins.* I. Casaubon*)>'* κ.τ.λ.). But here Zeus was always of less importance than Artemis; and the tradition which located her birth at Ortygia (the glen of *Arvalia*: see O. Benndorf *Forschungen in Ephesos* Wien 1906 i. 76 ff.) boldly appropriated his Kouretes (C. Picard *Éphèse et Claros* Paris 1922 pp. 277 ff., 423 ff.), installing them on Mt Solmissos (Strab. 640 *ὑπέρκειται δὲ τοῦ ἄλσους ὄρος ὁ Σολμισσός, ὅπου στάντας φασὶ τοὺς Κουρῆτας τῷ ψόφῳ τῶν ὅπλων ἐκπλῆξαι τὴν Ἥραν ζητοτύπως ἐφεδρεύουσαν, καὶ λαθεῖν συμπράξαντας τὴν λοχείαν τῇ Λητοῖ.* κ.τ.λ.).

A bronze coin of Ephesos, struck by Antoninus Pius, has *rev.* Zeus enthroned on a mountain-top (Mt Koressos). He holds in his left hand a thunderbolt and pours from his raised right hand a shower of rain upon a recumbent mountain-god inscribed ΠΕΙΩΝ, who bears a *cornu copiae*. In front of the principal mountain, on the level of the plain, is a distyle temple, above which, in the background, are cypress-trees and two three-storeyed buildings, perched upon rocks. To the left of the same mountain is another three-storeyed building (*Brit. Mus. Cat. Coins* Ionia p. 79 pl. 13, 9 (=*supra* i. 134 fig. 100 from a cast), G. Macdonald *Coin Types* Glasgow 1905 p. 167 f. pl. 6, 9; A. Löbbecke in the *Zeitschr. f. Num.* 1890 xvii. 10 no. 2 pl. 1, 17; O. Benndorf *Forschungen in Ephesos* i. 56 fig. 18 *a* Löbbecke, *b* Cabinet des médailles Paris, *c* British Museum, *d* Gréau collection; Head *Hist. num.*[2] p. 577). High up on the south-eastern side of Mt Koressos is a rock-cut throne, once perhaps regarded as the throne of Zeus (*supra* i. 140 f. fig. 104 f.).

Bronze coins issued at Ephesos by Domitian (*Brit. Mus. Cat. Coins* Ionia p. 75 no. 215) and Severus Alexander (*ib.* p. 93 pl. 14, 7 (=my fig. 849 from a cast)) show Zeus Ὀλύμπιος seated to the left, holding the cult-statue of Artemis Ἐφεσία in one hand and a long sceptre in the other. Coppers of Caracalla (*ib.* p. 85 no. 272) and Valerianus Senior (*Hunter Cat. Coins* ii. 337 no. 75) repeat the type, but omit the name of the god. He was worshipped in the Olympieion (Paus. 7. 2. 9 *κατὰ τὴν ὁδὸν τὴν ἐκ τοῦ ἱεροῦ παρὰ τὸ Ὀλυμπιεῖον καὶ ἐπὶ πύλας τὰς Μαγνήτιδας*). And Hadrian as his vicegerent shared the honours of his festival (*Corp. inscr. Gr.* ii no. 2810, 17 f. Ἀδριανὰ Ὀ|λύμπια *ἐν* Ἐφέσωι, iii no. 5913, 30 f. =*Inscr. Gr. Sic. It.* no. 1102, 30 f. Ἔφεσον τρὶς· Ἀδριάνια Ὀλύμ|πια, Βαρβίλληα κ.τ.λ.).

Fig. 849.

A bronze coin at Ephesos struck by Septimius Severus has *rev.* ΖΕΥC ΕΦΕCΙΟC ΠΡΩΤΟC ΑCΙΑC Zeus standing with the cult-statue of Artemis Ἐφεσία (Rasche *Lex. Num.* iii. 675, vii. 355, xi. 1256, Eckhel *Doctr. num.*

vet.[2] ii. 514). Others struck by Valerianus (*Brit. Mus. Cat. Coins* Ionia p. 101 no. 357) and Salonina (*supra* p. 743 n. 7 fig. 681) show Zeus naked, striding to right, with thunderbolt in uplifted right hand and eagle on outstretched left.

Finally, the cult-statue of Artemis was called Διοπετές as having fallen from Zeus (Acts 19. 35 *τίς γάρ ἐστιν ἀνθρώπων ὃς οὐ γινώσκει τὴν Ἐφεσίων πόλιν νεωκόρον οὖσαν τῆς μεγάλης Ἀρτέμιδος καὶ τοῦ διοπετοῦς;* Oikoumenios *comm. in acta apost.* 19. 18—34 (cxviii. 253 Migne) *δείκνυσι πολλὴν εἶναι τὴν δεισιδαιμονίαν τῶν Ἐφεσίων ὁ γραμματεὺς ἔκ τε τοῦ κοσμεῖν τὸν ναὸν τῆς Ἀρτέμιδος καὶ τὸ εἴδωλον αὐτῆς τιμᾶν, ὅπερ καὶ Διοπετὲς ἔλεγον ὡς ἐκ τοῦ Διὸς πεπτωκός. ἤτοι γὰρ τὸ ὄστρακον ἔλεγον ἐκεῖνο πάντες* (*leg.* πάντως) *Διοπετὲς τὸ ἐξ οὐρανοῦ παρὰ τοῦ Διὸς πεμφθέν, ἤτοι καταπτὰν καὶ γενόμενον ἀπ' οὐρανοῦ ἄγαλμα, ἤτοι τὸ Παλλάδιον, καθὼς ἐμύθευον οἱ Ἕλληνες πρὸς κατάπληξιν τῶν ἀκεραιοτέρων, ὅπερ ἄνωθεν ἐκ τοῦ Διὸς διαπλασθῆναι ᾤοντο καὶ οὐκ ἐξ ἀνθρώπων. ἢ Διοπετοῦς τοῦ ναοῦ τοῦ Διός, ἤτοι τοῦ στρογγυλοειδοῦς. ἢ καὶ ἱερὸν ἕτερον οὕτως ἐκαλεῖτο παρ' αὐτοῖς* = Theophylaktos archbishop of Bulgaria *expos. in acta* text. alt. 29 (cxxv. 1013 Migne) *'καὶ τοῦ Διοπετοῦς.' τὸ εἴδωλον τῆς Ἀρτέμιδος ἐκαλεῖτο Διοπετὲς ὡς ἐκ τοῦ Διὸς πεπτωκός· ἤτοι τὸ ὄστρακον* [*ἔλεγον*] *ἐκεῖνο πάντως Διοπετὲς τὸ ἐξ οὐρανοῦ παρὰ τοῦ Διὸς πεμφθὲν ἤτοι καταπτὰν* (*leg.* καταπτὰν) *καὶ οὐ γενόμενον ὑπὸ ἀνθρώπου ἄγαλμα τῆς Ἀρτέμιδος, καθὼς ἐμύθευον Ἕλληνες,* Isidoros of Pelousion 4 *epist.* 207 (lxxviii. 1299 Migne) *οἱ παρ' Ἕλλησι τὰ ξόανα κατασκευάσαντες, φόβον ἐμποιῆσαι τοῖς ὁρῶσι βουλόμενοι, ἔφασκον ὅτι ἐξ οὐρανοῦ παρὰ τοῦ Διὸς ἐπέμφθη ἡ κατέπτη, κρεῖττον ἁπάσης ἀνθρωπίνης χειρός. διὸ καὶ διοπετὲς αὐτὸ καὶ οὐράνιον βρέτας προσηγόρευον* = Souid. *s.v. διοπετές· ἐξ οὐρανοῦ κατερχόμενον. ὅτι οἱ παρ' Ἕλλησι τὰ ξόανα κατασκευάζοντες, φόβον ἐμποιῆσαι τοῖς ὁρῶσιν βουλόμενοι τοῖς ὁρῶσιν, ἔφασκον ὅτι τὸ ἄγαλμα ἐξ οὐρανοῦ παρὰ τοῦ Διὸς ἐπέμφθη καὶ κατέπτη, κρεῖττον ὑπάρχον πάσης ἀνθρωπίνης χειρὸς καὶ ἀνάλωτον. ὅθεν καὶ διοπετὲς αὐτὸ καὶ οὐράνιον βρέτας ἐκάλουν,* Sozom. *hist. eccl.* 2. 5 (lxvii. 945 C Migne) *γυμνωθέντας δὲ τῆς τοῦ πλήθους ῥοπῆς οἱ νεωκόροι καὶ οἱ ἱερεῖς προὔδωκαν τὰ παρ' αὐτοῖς τιμιώτατα καὶ τὰ διοπετῆ καλούμενα*). Aizanoi[3].

[1] Θεὸς Ὕψιστος (*supra* p. 880 n. o no. (18)).

[2] Zeus Ὀλύμπιος (*supra* i. 116 n. 8, 124). The cult-statue of the god appears on a bronze coin of Prousa, struck by Trajan, with *rev.* ΠΡΟΥCΑΕΙC ΔΙΑ ΟΛΥΜΠΙΟΝ Zeus enthroned to right, resting his right hand on a long sceptre and holding in his left a globe, on which stands a small wreath-bearing Nike (Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 577 pl. 99, 7 (=my fig. 850), Head *Hist. num.*[2] p. 517). A later coin-type gives two agonistic urns, with palms and five balls (? apples, cp. *supra* p. 490 n. o no. (5)) respectively, inscribed ΟΛΥΜΠΙΑ ΠΥΘΙΑ (Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 600 f. pl. 103, 11 Valerianus Senior, 13 Gallienus, 14 Salonina).

A copper of Caracalla shows a youthful figure, in military costume, carrying a sceptre in his left hand and with his right holding a *phiále* above an altar, garlanded and kindled, towards which leaps a boar beneath a fruitful fig (?)-tree with an eagle in its branches (*Brit. Mus. Cat. Coins* Pontus, etc. p. 197 pl. 35, 7, Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 589 pl. 101, 13 (=my fig. 851)). A similar copper of Geta has

Fig. 850.

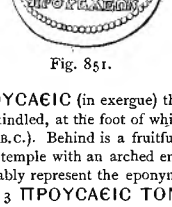

Fig. 851.

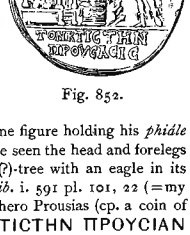

Fig. 852.

rev. ΤΟΝ ΚΤΙCΤΗΝ ΠΡΟΥCΑΕΙC (in exergue) the same figure holding his *phiále* above an altar, garlanded and kindled, at the foot of which are seen the head and forelegs of the sacrificial bull (? boar A.B.C.). Behind is a fruitful fig (?)-tree with an eagle in its branches; to the left, a round temple with an arched entry (*ib.* i. 591 pl. 101, 22 (=my fig. 852)). These coins presumably represent the eponymous hero Prousias (cp. a coin of Commodus *ib.* i. 582 pl. 100, 3 ΠΡΟΥCΑΕΙC ΤΟΝ ΚΤΙCΤΗΝ ΠΡΟΥCΙΑΝ beardless head of hero to right) worshipping Zeus.

[3] Aizanoi (*Tchavdir-Hissar*) (Αἰζανίς only Ptol. 5. 2. 17 *ed. pr.*), the chief town of Aizanitis in Phrygia Epiktetos (Strab. 576), is situated on a high plateau (1085^{m} above the sea) near the sources of the river Rhyndakos. Herodian. *περὶ καθολικῆς προσῳδίας* 1 (i. 15, 6 f. Lentz) (cp. *περὶ ὀρθογραφίας* (ii. 468, 29 Lentz)) *ap.* Steph. Byz. *s.v.* Ἀζανοί stated that Aizanoi received its name from Aizen son of Tantalos. Others seem to have held that the town was founded by Azan son of Arkas (Paus. 8. 4. 3). But Hermogenes of Smyrna (?) *frag.* 3 (*Frag. hist. Gr.* iii. 524 Müller) *ap.* Steph. Byz. *s.v.* Ἀζανοί was not content with such commonplace conjectures. He reports the tradition that once in time of dearth the shepherds of the district sacrificed to the gods for fertility, but in vain, till one Euphorbos offered a fox (*οὐανοῦν*) and a hedgehog (*ἐξιν*). The gods were satisfied and sent fertility again. Thereupon the people chose Euphorbos as their priest and ruler (*ἱερέα καὶ ἄρχοντα*), the town being called Ἐξουάνουν after his sacrifice. Cp. the coins of Aizanoi (second half

of *s.* i B.C.) inscribed ΕΖΕΑΝΙΤΩΝ (*Brit. Mus. Cat. Coins* Phrygia p. xxiv). Frazer *Pausanias* iv. 192 comments: 'The legend points to the existence of a race of priestly kings or popes, with spiritual and temporal power, such as reigned at Pessinus, Comana, and other cities of Asia Minor (W. M. Ramsay, *Historical Geogr. of Asia Minor*, p. 146 *sq.*).'

The *témenos* of Zeus, which occupies a square terrace (146·46^{m} × 162·96^{m}) contrived on a natural hill-top, had a *façade* of twenty-two marble-clad arches with a broad stairway (30^{m} across) in their midst. This gave access to a square *stoá* consisting of a double range of Corinthian columns with a handsome *propýlaion* opposite to the stairway. Outside the *stoá* were gardens, *exédrai*, and statues. Inside the *stoá*, on a stylobate of seven steps, rose the temple, a beautifully finished Ionic structure in blue-grey half-marble, dating apparently from Hadrianic times (A. Körte 'Das Alter des Zeustempels von Aizanoi' in the *Festschrift für Otto Benndorf* Wien 1898 pp. 209—214 with pl. 11 (=my

Fig. 853.

fig. 853)) and in various points inspired by the Athenian Erechtheion. The building was octostyle and pseudo-dipteral with fifteen columns down the long side, two in the *prónaos*, and two in the *opisthódomos*. These last are of interest as having a band of acanthus-leaves beneath their Ionic volutes—a feature which W. J. Anderson—R. P. Spiers *The Architecture of Greece and Rome* London 1902 pp. 98, 154 refer to *s.* i B.C. and claim as the origin of the 'composite' order. The columns are fluted monoliths (height of shaft 8·520^{m}: total height 9·504^{m}) with a small vase in relief at the top of each flute: sixteen of them are still standing, ten on the northern side and six more at the western end. Oak-leaves and acorns appear among the mouldings of the temple. Round the outside of the *naós*-wall runs a frieze-like band (0·62^{m} high), with a moulding above and a maeander below, ready to receive inscriptions and already in part inscribed (inside the right *anta* of the *prónaos* and outside the north wall of the *naós*). Under the *naós* is a chamber (16·157^{m} × 9·120^{m}) with a semicircular vault, reached by steps from the *opisthódomos* and probably used for the safeguarding of the temple-treasure. It is possible that some dim

recollection of this treasure lingered in folk-memory; for the peasants in comparatively modern times, believing that the columns were cast in stone and full of gold, attacked them with pickaxe and hammer, nor did they desist from their futile search till they had filled the temple with faggots and fired the lot! [4] The myth of Attis has two principal forms—a Lydian version, in which Attis is killed by a boar, and a Phrygian version, in which he mutilates himself under a pine-tree. Since the cult of the Great Mother came to Rome from Pessinous in Phrygia, the Phrygian became the official version and gradually eclipsed its Lydian rival (H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 121 f.). The Pessinuntine tradition has been preserved for us by Paus. 7. 17. 10—12 and Arnob. *adv. nat.* 5. 5—7. H. Hepding *op. cit.* p. 37 ff. prints the texts in parallel columns and *ib.* p. 103 ff. discusses their relations and respective sources. Pausanias professes to give the 'local story' (Paus. 7. 17. 10 ἐπιχώριος...λόγος); Arnobius, to derive his information from Timotheos the theologian and other equally learned persons, among whom he mentions the priest Valerius (Arnob. *adv. nat.* 5. 5 apud Timotheum, non ignobilem theologorum unum, nec non apud alios aeque doctos super Magna deorum Matre superque sacris eius origo haec sita est, ex reconditis antiquitatum libris et ex intimis eruta, quemadmodum ipse scribit insinuatque, mysteriis, 5. 7 quam Valerius pontifex Iam nomine fuisse conscribit). A. Kalkmann *Pausanias der Perieget* Berlin 1886 p. 247 ff. showed that Pausanias and Arnobius are really dependent on Alexandros Polyhistor, who in turn got his facts from Timotheos, Promathidas, etc. (see Alex. Polyhist. *frag.* 47 (*Frag. hist. Gr.* iii. 233 Müller, cp. *ib.* p. 202) *ap.* Steph. Byz. *s.v.* Γάλλος), and that Arnobius, in addition to Polyhistor, used a Roman source, probably the priest Valerius, thereby contaminating the Pessinuntine tradition of Agdistis with current tales of the Mater Magna and Attis. Hepding summarises the resultant myth, enclosing within square brackets points of divergence between Pausanias and Arnobius:

Zeus let fall seed on the ground [in his sleep (Paus.), when attempting to lie with the Magna Mater who was asleep on the sunmit of Mt Agdos (Arnob.)]. In due time the earth bore a wild bisexual being named Agdistis. [The gods, fearing him, cut off his male organ of generation (Paus.). He, having irresistible strength and ferocity, did much mischief, till Liber mingled strong wine with the spring at which he used to slake his thirst and thus threw him into a deep sleep. Liber then took an ingenious noose made of bristles and slipped one end round his foot (*plantae*. Hepding translates: 'an einem Baum'), the other round his genitals. The monster, starting up from sleep, drew the noose tight and so castrated himself (Arnob.).] The blood flowed fast, and from the severed member sprang a fruit-tree, [an almond (Paus.), a pomegranate (*malum...cum pomis...punicum*) (Arnob.).] A daughter of the river Sangarios [Nana by name (Arnob.)] picked the fruit and put it in her bosom. [The fruit immediately vanished (Paus.)] and she conceived. [Thereupon her father kept her shut up and tried to starve her; but the Mother fed her on pomegranates (*pomis*) and other food of the gods (Arnob.).] So she brought forth an infant son, who was exposed [by Sangarios' orders (Arnob.), but tended by a he-goat (Paus.), or found by some one and nurtured on goat's milk (Arnob.: text corrupt). He was called Attis because the Lydian word *attis* means 'scitulus' or because the Phrygian *attagus* means 'hircus' (Arnob.)]. [As the boy grew up, his beauty was more than human, and Agdistis loved him (Paus.). The Mother of the gods loved him for his good looks. So did Agdistis, who ever at his side led him through the woods and presented him with spoils of the chase. Young Attis at first boasted that he had won these himself, but later, under the influence of wine, admitted that they were love-gifts from Agdistis. Hence those that are polluted with wine may not enter his sanctuary (Arnob.).] When Attis was fully grown, he went to Pessinous to wed the king's daughter, [being sent thither by his kinsfolk (Paus.), or summoned by Midas king of Pessinous, who disapproved

of the alliance with Agdistis and closed the town to prevent any untoward interruption of the wedding. But the Mother of the gods, aware that the young man's safety depended on his freedom from wedlock, entered the town, uplifting its walls on her head, which has worn a mural crown ever since (Arnob.)]. While the bridal hymn was being sung, Agdistis appeared and drove the whole company mad. [Attis cut off his genitals and so did the father of his bride (Paus.). Gallos mutilated himself and the daughter of his concubine cut off her breasts (Arnob. *adv. nat.* 5. 13: the text of 5. 7 is confused. A. Kalkmann *op. cit.* p. 248 f. makes it probable that Gallos was king of Pessinous and father of the bride: Midas has been imported from an extraneous source). Attis snatched the pipe borne by Agdistis, and full of frenzy flung himself forth. Falling at length beneath a pine-tree he shore off his genitals and cried: 'Take these, Agdistis,—'twas for their sake thou didst stir up this storm of frenzied mischance.' Attis died from loss of blood. But the Great Mother of the gods collected the severed parts, wrapped them in his garment, and buried them in the ground. Violets sprang from his blood and wreathed the tree. Hence the sacred pines are still covered with garlands. The maiden betrothed to him—Valerius the priest calls her Ia—covered his bosom with soft wool, wept for his hard fate (Arnob.)], as did Agdistis, [and then slew herself. Her blood became purple violets. The Mother of the gods dug beneath Ia (text doubtful), and up came an almond, signifying the bitterness of death. Then she carried the pine, under which Attis had mutilated himself, to her cave, and in company with Agdistis beat her breast about its trunk (text doubtful) (Arnob.)]. Zeus, when asked by Agdistis to bring Attis to life, refused, but consented that his body should remain incorruptible, [his hair always grow, and his little finger be endowed with perpetual movement. Satisfied with this, Agdistis consecrated Attis' body at Pessinous, and honoured it with yearly rites and a priesthood (Arnob.)].

Throughout this narrative (with which cp. Paus. 1. 4. 5) it is clear that Agdistis is only a Pessinuntine appellation of the Great Mother. So Strab. 469 *οἱ δὲ Βερέκυντες, Φρυγῶν τι φῦλον, καὶ ἁπλῶς οἱ Φρύγες καὶ τῶν Τρώων οἱ περὶ τὴν Ἴδην κατοικοῦντες Ῥέαν μὲν καὶ αὐτοὶ τιμῶσι καὶ ὀργιάζουσι ταύτῃ, Μητέρα καλοῦντες θεῶν καὶ Ἄγδιστιν* (so I. Keil in *Philologus* 1852 vii. 198—201, W. W. Baudissin *Studien zur semitischen Religionsgeschichte* Leipzig 1878 ii. 204 f., 207 f., 216, G. Knaack in Pauly—Wissowa *Real-Enc.* i. 767 f., Gruppe *Gr. Myth. Rel.* pp. 1528 n. 1, 1547.

Another myth connected with Mt Agdos was that of Deukalion (Arnob. *adv. nat.* 5. 5

Ankyra[1].

Lykia

Mount Kragos[2].

in Phrygiae finibus inauditae per omnia vastitatis petra, inquit (*sc.* Timotheus), est quaedam, cui nomen est Agdus, regionis eius ab indigenis sic vocatae. ex ea lapides sumptos, sicut Themis mandaverat praecinens, in orbem mortalibus vacuum Deucalion iactavit et Pyrrha, ex quibus cum ceteris et haec Magna quae dicitur informata est Mater atque animata divinitus). Gruppe *op. cit.* p. 444 n. 4 well cp. Nonn. *Dion.* 13. 522—545.

[1] Coin-type of Zeus seated on a rock (*supra* i. 124).

[2] Mt Kragos is a continuation of Mt Tauros, forming a promontory (*Yedi-Burún*, the 'Seven Capes') on the south-western coast of Lykia. North of it is the range of Anti-kragos. T. A. B. Spratt—E. Forbes *Travels in Lycia, Milyas, and the Cibyratis* London 1847 i. 300 ff. describe their ascent of Kragos (1842): 'In the afternoon we made our way to the opening of a pass leading between the summits of Cragus and Anticragus, now called Mendos and Baba-dagh;...at daybreak, next morning, (May 27th,) we ascended to a plain which lies between the two chief peaks at a height of four thousand feet... Leaving our attendants and horses...we commenced the ascent of the highest peak of Cragus, which rose precipitously more than two thousand five hundred feet above this alpine plain. The first half of the way was through a thick zone of forest; the remainder was among precipices of bare rock, in the crevices of which lay the accumulated snow of winter... From the sharp and narrow summit of this lofty peak we enjoyed our last look over Lycia; below us lay the whole expanse of the Xanthian plain, and beyond we could see far into the gorges and yailahs ['summer encampments'] of Massicytus... Such is the steepness of Cragus, that its precipices plunge from the snowy summit to the sea, and from the lofty pinnacle on which we stood we could see the waves breaking white against its base.' Ancient allusions are collected by W. Ruge in Pauly—Wissowa *Real-Enc.* xi. 1567. Strab. 665 is worth quoting: *εἶθ' ἑξῆς ὁ Ἀντίκραγος...καὶ μετὰ τοῦτον ὁ Κράγος, ἔχων ἄκρας ὀκτὼ (κράγας ὀκτὼ* codd. *ἄκρας ὀκτὼ* Eustath. *in* Dionys. *per.* 847. *ἄκρας δύο* Eustath. *in Il.* p. 635, 19. We should probably translate 'eight summits,' not 'eight headlands') *καὶ πόλιν ὁμώνυμον. περὶ ταῦτα μυθεύεται τὰ ὄρη τὰ περὶ τῆς Χιμαίρας· ἔστι δ' οὐκ ἄπωθεν καὶ ἡ Χίμαιρα φάραγξ τις, ἀπὸ τοῦ αἰγιαλοῦ ἀνατείνουσα* (the glen of *Avlan*: see O. Benndorf—G. Niemann *Reisen in Lykien und Karien* Wien 1884 p. 82 f.).

Kragos had certain caverns known as the *θεῶν ἀγρίων ἄντρα*. These 'wild gods' appear to have been the eponym Kragos and his family (Steph. Byz. *s.v.* Κράγος, *ὄρος Λυκίας. Ἀλέξανδρος δευτέρῳ Λυκιακῶν* (Alex. Polyhist. *frag.* 75 (*Frag. hist. Gr.* iii. 235 Müller)). *ἀπὸ Κράγου τοῦ Τρεμίλου υἱοῦ, μητρὸς δὲ Πραξιδίκης νύμφης. ἐνταῦθα δ' εἶναι καὶ τὰ ἐπονομαζόμενα θεῶν ἀγρίων ἄντρα. ἀπαθανατισθῆναι γάρ φασι τοὺς περὶ τὸν Κράγον*, Eustath. *in* Dionys. *per.* 847 *τὸν δὲ ἐνταῦθα Ταῦρον τὸ ὄρος καὶ Κράγον φησὶ φημίζεσθαι, ἀπὸ Κράγου τινὸς ἐπιφανοῦς ἀνδρός, ὃς αὐτόθι θανὼν τιμᾶται. ἐν τούτῳ δέ φασιν οἱ παλαιοὶ τῷ Κράγῳ θεῶν ἀγρίων ἄντρα εἶναι*). Kragos and his kin are mentioned also in Panyasis *frag.* 18 Kinkel *ap.* Steph. Byz. *s.v.* Τρεμίλη, in Timagenes *frag.* 2 (*Frag. hist. Gr.* iii. 322 Müller) *ap.* Steph. Byz. *s.v.* Μιλύαι, and in an important inscription from Sidyma (O. Benndorf—G. Niemann *op. cit.* p. 75 ff. no. 53 A, 15 ff. *τὴν πρὸς ὑμᾶ[ς καὶ Τλωεῖς καὶ]* | *Πιναρεῖς γενεαλ[ογίαν Τρεμί][λ]ου καὶ Πραξιδίκης, ἐξ ὧν Τλῶ[ος καὶ]* | *[Κ]ράγος καὶ Πίναλος ἀνῆκον, δι[αδή][λ]ης γενεαλο[γί]ας καὶ ὑπ' ἐμοῦ πολ|λάκις δεδηλωμένης κατὰ τὰς Πο|[λ]υχάρμου καὶ ἑτέρων ἱστορίας, ib.* C, 9 ff. *ἐν δὲ Σιδύμοις, κτίσματι Σιδύμου* | *υἱοῦ Τλώου καὶ Χελειδόνος τῆς* | *Κράγου, Ἀπόλλωνα τόπῳ πρὸς* | *θαλάσσῃ Λοπτοῖς σπηλαίῳ* | *ἀποκρύφῳ δυσειςόδῳ ἐκ κορυ|φῆς δὲ φωτοῦλκον ἄνοιγμα* | *μεικρὸν ἔχοντι. μέσον εἰς δ κα|θοπτεῦσαι θελήσασά τις ἄφνως* | *ἀψοφητὶ τὸν θεὸν κατη|ψέχθη, καὶ λίθος κεῖται πτῶμα* | *φόβου δεῖγμα κατασκόπων·* | *διὸ καὶ κρο[οῦ]ν[τε]ς ἐπ' ἄσματι* | *'χαῖρε, Ἄπολλον, ὁ ἐγ Λοπτῶν'* | *εἰσερχόμενοι φωνοῦμεν* | *τήνδε*. The cave-cult of Apollon at Lopta described in this curious record may give us some notion of the *θεῶν ἀγρίων ἄντρα*: indeed, Apollon himself is on occasion *ἄγριος* (Orph. *h. Ap.* 34. 5). The Titans too bore the same title (Hesych. *ἄγριοι θεοί· οἱ Τιτᾶνες*), perhaps as being chieftains or kings (*supra* i. 655 f.). Lobeck *Aglaophamus* ii. 1186 n.[i]

Mount Olympos (?)[1].

Pisidia

Prostanna (?)[2].

justly cp. Plout. *de def. or.* 21 (quoted by Theodoret. *Gr. aff. cur.* p. 129 Gaisford) *ἐπεὶ καὶ Σολύμους πυνθάνομαι τοὺς Λυκίων προσοίκους ἐν τοῖς μάλιστα τιμᾶν τὸν Κρόνον· ἐπεὶ δὲ ἀποκτείνας τοὺς ἄρχοντας αὐτῶν, Ἄρσαλον καὶ Δρύον* (*Ἄρυον* Theodoret.) *καὶ Τόσοβιν, ἔφυγε καὶ μετεχώρησεν ὁποιδήποτε* (*τοῦτο γὰρ οὐκ ἔχουσιν εἰπεῖν*), *ἐκεῖνον μὲν ἀμεληθῆναι, τοὺς δὲ περὶ τὸν Ἄρσαλον σκληροὺς* (*σκιρροὺς* Theodoret.) *θεοὺς προσαγορεύεσθαι, καὶ τὰς κατάρας ἐπὶ τούτων ποιεῖσθαι δημοσίᾳ καὶ ἰδίᾳ Λυκίους.*

It would seem, then, that Kragos and his relatives were, not only heroified, but actually deified. More than that. Kragos was eventually identified with Zeus himself. For Lyk. *Al.* 541 f. *ἔν τε δαιτὶ καὶ θαλυσίοις | λοιβαῖσι μειλίσσωσιν ἀστεργῆ Κράγον* is thus expounded by Tzetz. *ad loc.*: *ἀστεργῆ δὲ Κράγον τὸν Δία λέγει ἐπεὶ μὴ ἔστερξε τὴν θυσίαν αὐτῶν. λέγονται δὲ θύοντες τοῖς ἄλλοις θεοῖς ἐπιλαθέσθαι τοῦ Διός, ὅθεν φιλονεικίαν αὐτοῖς ἐνέβαλε. Κράγος δὲ ὁ Ζεὺς ἐν Λυκίᾳ τιμᾶται.*

[1] *Supra* i. 100 n. 11. Methodios, bishop of the Lycian-town Olympos at the beginning of *s.* iv. A.D., claims to have seen on the summit of this mountain *agnus castus* growing, quite unharmed, round a fire that sprang from the earth (Method. *ap.* Phot. *bibl.* p. 298 b 23 ff. Bekker *ἐθεασάμην ἐν Ὀλύμπῳ ἐγώ* (*ὄρος δέ ἐστιν ὁ Ὄλυμπος τῆς Λυκίας*) *πῦρ αὐτομάτως κατὰ τὴν ἀκρώρειαν τοῦ ὄρους κάτωθεν ἐκ τῆς γῆς ἀναδιδόμενον, περὶ ὃ πῦρ ἄγνος φυτόν ἐστιν, οὕτω μὲν εὐθαλὲς καὶ χλοερόν, οὕτω δὲ σύσκιον, ὡς ὑπὸ πηγῆς μᾶλλον αὐτὸ δοκεῖν βεβλαστηκέναι. κ.τ.λ.*) The good bishop describes the phaenomenon in terms reminiscent of Moses and the burning bush; and it is noteworthy that Mt Olympos, otherwise called Phoinikous (Strab. 666), is nowadays named *Musa Dagh*, the 'mountain of Moses.' This mountain rises to a height of *c.* 1000^{m} due south of the town Olympos on the eastern coast of Lykia. But the perpetual fire is commonly associated with Mt Chimaira (*Yanâr-tash*), a height of some 250^{m} due north of the same town. Here in fact it is still to be seen—a strong jet of flaming gas that leaps up like a fountain from crevices in the rock. The immediate neighbourhood of the vent is bare of vegetation, but all around, a few paces off, is greenery in abundance. For classical references see W. Ruge in Pauly—Wissowa *Real-Enc.* iii. 2281; and for modern description and discussion, E. Petersen—F. von Luschan *Reisen in Lykien Milyas und Kibyratis* Wien 1889 pp. 138—142 ('Die Chimaira') with fig. 65 and pl. 17. In antiquity several such fiery jets were known and the site was called Hephaistion (Sen. *epist.* 79. 3, Plin. *nat. hist.* 5. 100), Hephaistia (Solin. 39. 1), or the mountains of Hephaistos (Plin. *nat. hist.* 2. 236). Skyl. *per.* 100 speaks of a sanctuary of Hephaistos above the harbour Siderous: *ὑπὲρ τούτου ἐστὶν ἱερὸν Ἡφαίστου ἐν τῷ ὄρει καὶ πῦρ πολὺ αὐτόματον ἐκ τῆς γῆς καίεται καὶ οὐδέποτε σβέννυται.* Hence Hephaistos appears, forging the shield of Achilles, on a copper of Olympos struck by Gordianus iii Pius (Imhoof-Blumer *Monn. gr.* p. 326 f. no. 10 pl. F, 14).

It was, however, only natural that in this town, which lay between Mt Olympos and Hephaistion, there should have been a joint recognition of Zeus and Hephaistos. R. Heberdey—E. Kalinka *Bericht über zwei Reisen in S.W. Kleinasien* Wien 1896 p. 34 no. 42 publish an inscription, in which mention is made of a fine payable *θεοῖς Ὀλυμπίοις Διὶ καὶ Ἡφαίστῳ*. G. F. Hill in the *Brit. Mus. Cat. Coins* Lycia, etc. p. lxvi compares with it a bronze coin of Olympos at Paris with *obv.* head of Athena to right, *rev.* the ethnic and a thunderbolt.

[2] Prostanna (*Egherdîr*) was situated on the shore of Limnai, at the foot of Mt Viarus (Sir W. M. Ramsay *The Historical Geography of Asia Minor* London 1890 p. 407). Imperial coppers of the town have *obv.* Mt Viarus, *rev.* ΠΡ OC a tree (*Brit. Mus. Cat. Coins* Lycia, etc. pp. cvi, 238 pl. 37, 9, Imhoof-Blumer *Gr. Münzen* p. 175 no. 502 pl. 10, 27), and *rev.* ΠΡΟCΤΑΝ ΝΕΩΝ Mt Viarus with three trees growing on it and ΟΥΙΑΡΟC below (*Brit. Mus. Cat. Coins* Lycia, etc. p. 239 pl. 37, 13 Claudius ii) or Mt Viarus with a pine-tree on its summit and ΒΙΑΡΟC below (Imhoof-Blumer *Kleinas.*

Mount Solymos[1].

Münzen ii. 391 no. 10 pl. 14, 5, A. Markl in the *Num. Zeitschr.* 1900 xxxii. 157 no. 4 pl. 7, 4, Head *Hist. num.*[2] p. 709). Since another coin-type of Prostanna shows Zeus seated with Demeter (?) behind him (G. F. Hill in the *Brit. Mus. Cat. Coins* Lycia, etc. p. cvi n. †, Head *Hist. num.*[2] p. 709), it is possible that the cult of the god was connected with the mountain which dominates the town (for views see A. de Laborde, Becker, Hall et L. de Laborde *Voyage de l'Asie Mineure* Paris 1838 p. 111).

[1] Termessos (Termessus Maior) was built, a good 1000[m] above sea-level, on Mt Solymos (Strab. 630) or Solyma (*id.* 666), the modern *Güldere Dagh* or *Güllük Dagh*. It was an ideally placed stronghold of the Solymoi, whose eponym Solymos figures on imperial coppers of the town (*Brit. Mus. Cat. Coins* Lycia, etc. pp. xc, 271 no. 27 pl. 41, 12 *rev.* ΣΟΛΥ ΜΟΣ Solymos standing to left, with cuirass, spear, and short sword, 272 no. 36 pl. 41, 14 ΣΟΛΥ ΜΟΣ Solymos enthroned to left, with crested helmet and right hand raised to face, cp. Imhoof-Blumer *Kleinas. Münzen* ii. 410 no. 6 pl. 15, 15 and 411 no. 10 pl. 15, 17, Head *Hist. num.*[2] p. 712). As a warlike hero he was affiliated sometimes to Zeus (Antimachos *frag.* 16 Bergk[4] *ap.* schol. P.T. *Od.* 5. 283 ὅθεν καὶ οἱ Σόλυμοι ὠνομάσθησαν (δὲ add. T., omissis ὅθεν καὶ οἱ Σόλυμοι) ἀπὸ Σολύμου τοῦ Διὸς καὶ Καλχηδονίας, ὡς Ἀντίμαχος δηλοῖ, Rufin. *recognit.* 10. 21 (Iupiter vitiat) Chalceam nympham, ex qua nascitur Olympus (where O. Höfer cj. *Chalcedonian* and *Solymus*: see his remarks in Roscher *Lex. Myth.* iv. 1154), Steph. Byz. *s.v.* Πισιδία· οἱ Πισίδαι πρότερον Σόλυμοι, ἀπὸ Σολύμου τοῦ Διὸς καὶ Χαλδήνης), sometimes to Ares (*et. mag.* p. 721, 43 ff. Σόλυμοι (so T. Gaisford for Σόλυμος)· ἔθνος περὶ Κιλικίαν· ἀπὸ Σολύμου τοῦ Καλδήνης τῆς Πισίου καὶ Ἄρεως· οἱ νῦν Ἴσαυροι).

The principal deity of the town in classical times was Zeus Σολυμεύς. Mionnet *Descr. de méd. ant.* Suppl. vii. 138 no. 228 gives (after Sestini) a coin reading ΖΕΥC ΣΟΛΥΜΕΥC, and J. Friedlaender in the *Zeitschr. f. Num.* 1885 xii. 6 figures another, at Berlin, with *obv.* Δ|[ΟΣ] ΣΟΛΥΜΕΩ[Σ] bust of Zeus Σολυμεύς (but see G. F. Hill in the *Brit. Mus. Cat. Coins* Lycia, etc. p. xc n. ‖). The head of Zeus appears as the normal Termessian coin-type *c.* 71—39 B.C., in the time of the Antonines, and from Gordian to Gallienus (*Brit. Mus. Cat. Coins* Lycia, etc. p. 268 ff. pl. 41, 8—11, pl. 42, 1 f., Head *Hist. num.*[2] p. 712). E. Petersen in K. Lanckoroński *Städte Pamphyliens und Pisidiens* Wien 1892 ii. 47 ff. describes the remains of what was probably the temple of Zeus Σολυμεύς. The site is a raised terrace (1054[m]) adjoining the southernmost part of the gymnasium and close to a group of other temples (N 3 on the large plan opposite p. 21). Here were found Doric column-drums, Attic bases with portions of shafts and plinths, architrave-blocks, coffering, the right-hand end-block of a pediment, statue-pedestals, and two reliefs from a frieze representing a Gigantomachy (Zeus and Apollon *v.* Giants with serpentine legs). These last were published by G. Hirschfeld in the *Arch. Zeit.* 1881 xxxix. 157—160 figs. *A*, *B*. Further, a cylindrical base (1·18[m] high), which once supported a bronze statue (of Zeus ?), is adorned with a relief of a priest presiding at the sacrifice of a humped bull (E. Petersen *op. cit.* ii. 32, 48 f. figs. 7 and 8) and bears the inscription Ὀτάνις ΙΟΓΑΚ | ἱερ(ε)ὺ]ς | Διὶ Σολυμεῖ· | Διονύσιος Ἡρακλε[ίδου] | Ἀλεξά[ν]-δρε[ὺ]ς [ἐποίει (?)] (K. Lanckoroński *op. cit.* ii. 206 no. 78). Another base from the same site was set up when a certain Strabon was priest of Zeus Σολυμεύς (*id. ib.* ii. 206 no. 80, 15 ff. ἀνεστάθη | ἐπὶ ἱερέως | Σολυμέως Δι[ὸς] | Στράβωνος [β′]). Another carried the statue of a distinguished priest (*id. ib.* ii. 206 no. 79, 1 ff. ἀρχιερέα καὶ ἱερέα Διὸς Σολ[υμέως] | γενόμενον Λαέρτην Να[ναμόου] | Λαέρτου κ.τ.λ., cp. 207 no. 85, 2 ff. [ἀρ]χιερέα αὐτοκράτ-ορος Καίσαρος Σεβαστοῦ | [ἱερ]έα Διὸς Σολυμέως διὰ βίου Λαέ[ρ]την | [Ναναμό]ου φιλόπατριν καὶ πατέρα πόλεως). Other life-priests of Zeus Σολυμεύς are recorded (*id. ib.* ii. 200 no. 39, 4 f. Τι. Κλ. Τειμόδωρον, 200 no. 41, 4 Τι. Κλ. Τειμόδωρον, 201 no. 48, 6 ff. Μᾶρ. Αὐρ. Μειδια|νὸν Πλατωνιανὸν | Οὐᾶρον, 208 no. 93, 4 ff. Μᾶρ. | Αὐρ. Μειδιανὸν | Οὐᾶρον).

The same deity was believed to have under his special protection the tombs of the dead, for any violation of their sanctity was punished with a fine usually payable to him. Numerous inscriptions of the sort are given by G. Cousin in the *Bull. Corr. Hell.* 1899

Lanckoroński *op. cit.* ii. 217 no. 154*, 2 f., 218 no. 167, 6 ff., 218 no. 171[a] (= *Corp. inscr. Gr.* iii no. 4366 *k*), 9 f., 219 no. 173, 16 ff., 219 no. 174, 7 f.

G. F. Hill in the *Journ. Hell. Stud.* 1895 xv. 127 f. publishes, among inscriptions copied by E. T. Daniell and Sir C. Fellows, no. 24, 3 ff. *ἐκτείσι | τῷ ἱερωτάτῳ ταμίῳ | ✳ ,μ' κὲ τῶ Διὶ | Σολύμῳ ✳ ,μ'*, adding: 'The form Σόλυμος for Σολυμεύς is unusual; it occurs again on an inscription on p. 493 [of a MS. volume transcribed by S. Birch].' The form suggests that the eponymous hero Solymos, by a process already exemplified in the case of Kragos (*supra* p. 971 n. 2), had been raised to the rank of Zeus.

Other inscriptions from Termessos attest a cult of Zeus and Dione (*id. ib.* ii. 206 no. 77 on a lintel from the southernmost part of the gymnasium *[τοῦ πρώτου ἱερασ]αμένου Διὸς καὶ Διώνης Ἀλφείδου Μολέους | [τὸν ναὸν καὶ τ]ὰ ἐν αὐτῷ ἱερὰ καὶ ἀγάλματα ὁ δῆμος ἐκ τῆς | ὑποστάσεως (i.e. ἐκ τῆς ὑποστάσεως τοῦ πρώτου ἱερασαμένου κ.τ.λ.)*, 219 no. 175[a] (= *Corp. inscr. Gr.* iii no. 4366 *m*) completed by G. Cousin in the *Bull. Corr. Hell.* 1899 xxiii. 192 no. 60 on a sarcophagus at the first Gate *ἱερεὺς Διὸς καὶ Διώνης | Γαΐος Διοτείμου Ἐρ. | Τρ. Γαίου Γειν(ίου) Χυ. τὴν | σωματοθήκην ἑαυτῷ καὶ | Ἀρτέμει Ἐρ. Τρ. Γαίου Γειν(ίου) Π. αὐτοῦ· κ.τ.λ.*) and a cult of Zeus Ἐλευθέριος (K. Lanckoroński *op. cit.* ii. 203 no. 58, 26 *ἱερεὺς Διὸς Ἐλευθερίου Διόδοτος Ἑρμαίου Ἀρ|τείμου ✳ φ'*, cp. *Brit. Mus. Cat. Coins* Lycia, etc. pp. lxxxix n. ¶, xcii with n.*, 275 no. 55 pl. 42, 2 *obv.* ΤΕΡ ΜΗCCΕΩΝ head of Zeus, laureate, to right, with Θ below; *rev.* ΕΛΕV ΘΕΡΑΤΕ ΡΜΗCCΕ ΗΤΟΚΑΠ ΟVCΕΧΟ VCA in wreath = *ἐλευθέρα Τερμησσὲ | ἡ το(ὺς) κάπους ἔχουσα*, which I take to be a tag from some popular chorus (hence the *quasi*-Doric *κάπους*) performed at a festival of Zeus Ἐλευθέριος).

[1] In 82 B.C. Mithridates vi Eupator, having cleared Kappadokia of the Roman forces, offered a solemn sacrifice to Zeus *Στράτιος*. Appian. *Mithr.* 66, perhaps following Nikolaos of Damaskos (T. Reinach *Mithridate Eupator roi de Pont* Paris 1890 p. 445 f.), describes the scene in detail (trans. H. White): 'The news of this brilliant and decisive victory spread quickly and caused many to change sides to Mithridates. The latter drove all of Murena's garrisons out of Cappadocia and offered sacrifice to Zeus Stratius on a lofty pile of wood on a high hill, according to the fashion of his country, which is as follows. First, the kings themselves carry wood to the heap. Then they make a smaller pile encircling the other one, on which they pour milk, honey, wine, oil, and various kinds of incense. A banquet is spread on the ground for those present (as at the sacrifices of the Persian kings at Pasargadae) and then they set fire to the wood. The height of the flame is such that it can be seen at a distance of 1000 stades from the sea, and they say that nobody can come near it for several days on account of the heat. Mithridates performed a sacrifice of this kind according to the custom of his country.' In 74 B.C., when about to enter Paphlagonia, Mithridates repeated the offering. Appian. *Mithr.* 70 (trans. White) says: 'At the beginning of spring Mithridates made trial of his navy and sacrificed to Zeus

Stratius in the customary manner, and also to Poseidon by plunging a chariot with white horses into the sea.'

Imperial coppers of Amaseia, the residence of the Pontic kings (Strab. 561), have been rightly interpreted as referring to this cult (C. Cavedoni in the *Bull. d. Inst.* 1840 p. 70 f.). They exhibit a large altar, sometimes of two stages and flaming. Beside it are two trees with twisted trunks. Above it on some specimens there hovers an eagle, or the sun-god in his *quadriga*, or both. Occasionally a bull is shown lying dead on the upper stage (*supra* i. 602 n. 2.. I illustrate four examples. Fig. 858 = Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* i. 38 no. 78 pl. 5, 26 (Paris) Caracalla 206 A.D. ('une victime qui paraît être un chien'!). Fig. 859 = *eid. ib.* i. 38 no. 79 pl. 6, 1 (Paris) Caracalla 206 A.D. Fig. 860 = *eid. ib.* i. 40 no. 96 pl. 6, 7 (A. Löbbecke) Geta 206 A.D. ('un taureau mort'). Fig. 861 is from a specimen, in my collection, struck by Severus Alexander in 232 A.D.).

F. Cumont—E. Cumont *Voyage d'exploration archéologique dans le Pont et la Petite Arménie* (*Studia Pontica* ii) Bruxelles 1906 pp. 136—184 devote a chapter to Amaseia, including a valuable discussion (pp. 145 f., 172 ff.) of Zeus Στράτιος and his cult. Their

Fig. 858.

Fig. 859.

Fig. 860.

Fig. 861.

discoveries may be resumed as follows. Some four miles due east of Amaseia rises a rounded hill (1350m) known as *Beuyuk Evlia*, 'The Great Saint' (map xiii), and reputed to be the burial-place of a santon or Turkish saint. Every year in May the peasants repair to this otherwise deserted height, slaughter fowls and sheep, and feast merrily in honour of the *Proftt Iliyâ*. A clump of large pines crowns the hill-top, venerable trees which are held in such respect that no one will touch them with an axe. (By way of an ancient parallel F. Cumont cites M. Tsakuroglou in the Μουσεῖον καὶ Βιβλιοθήκη τῆς Εὐαγγελικῆς Σχολῆς ἐν Σμύρνῃ 1878—1880 p. 164 no. ΤΛΒ′ = S. Reinach *Chroniques d'Orient* Paris 1891 p. 157 an inscription from *Divlit* near Koloë (*Koula*) in Lydia ἔτους τκ′, μη[νὸς] Περειτίου β′, Αὐρ. | Στρατόνεικος β′, ἐπειδὴ κατὰ ἄγνοιαν ἐκ τοῦ ἄλσου[ς] ἔκοψα | δένδρα θεῶν Διὸς Σαβαζίου καὶ | Ἀρτέμιδος Ἀναειτις κολασ|θεὶς, εὐξάμενος εὐχαριστήριον ἀνέστησα with Tsakuroglou's note: 'Au-dessus est représenté un homme; à côté de lui, sur la droite, deux arbres, et un seul à gauche. Il est remarquable que la défense de couper du bois dans le bois sacré de Sabazios et d'Artémis Anaïtis subsiste encore aujourd'hui, car les habitants turcs de Santal près de Divlit croient que celui qui coupe du bois est puni par quelque maladie.'

[See further Frazer *Golden Bough*[3]: The Magic Art ii. 40—45.] The summit of the hill forms a flattish space *c.* 250[m] across and was enclosed by a *peribolos*-wall, which can still be traced, especially to the south-west. In the middle of the open space a square mound (*c.* 40[m] each side) evidently covers some construction, for bits of moulding and the *débris* of cut marble are scattered over the ground. Here in all probability stood a monumental altar. A marble base found on the spot records the name of Cn. Claudius Philon as priest for life (J. G. C. Anderson—F. Cumont—H. Grégoire *Recueil des inscriptions grecques et latines du Pont et de l'Arménie* (*Studia Pontica* iii) Bruxelles 1910 i no. 142 τὸ ἀ[νάθημα] (or ἀ[γαλμα]) | ἐκ τῶν τ[οῦ] | θεοῦ Γναΐ|ος Κλ(αύδιος) Φίλων | ἱερεὺς διὰ βίου) and two inscriptions from the neighbouring village of *Ebimi* preserve dedications to Zeus Στράτιος (*eid. ib.* i no. 140 on a small limestone altar Διὶ | Στρα|τίῳ | Βασι|λεὺς (a frequent name in Pontos) | εὐχῇ, no. 141 on two portions of a limestone balustrade Διὶ Στρατίῳ [ὁ δῆμος ἐν ἐκκλησίᾳ] κυρίᾳ ἐπὶ τῆς συνὀ|αρχίας Πομ[πωνίου . . . . . τοῦ ?] Καν̣δίδου, νεωκο|ροῦντος γ' [. . . . . ο]υ Ἀγριππιανοῦ, ἐκ | τῶν συν(λ)ε|λεγμένων χρημάτω]ν ϛ ἔτους ϛ ρα̣ ϛ (=98/99 A.D.). In line 4 συνα[θροισθέντων κ.τ.λ.] is possible). From these inscriptions we gather that in the year 99 A.D. the cult was administered by *συνάρχοντες* and *νεωκόροι*. To the west of the precinct is rising ground formerly covered with buildings. The festivities there celebrated seem to have included dramatic shows—witness the epitaph of the strolling player Gemellos, found at *Ebimi* (F. Cumont in the *Festschrift zu Otto Hirschfelds sechzigstem Geburtstage* Berlin 1903 p. 277 ff. = J. G. C. Anderson—F. Cumont—H. Grégoire *op. cit.* i no. 143 κεῖμε Γεμέλλος ἐγὼ | ὁ πολλοῖς θεάτροις | πολλὰ λαλήσας | καὶ πολλὰς ὁδοὺς | αὐτὸς ὁδεύσας, | καὶ οὐκέτι μου στόμα | φωνὰ[ς] ἀπολύει, | οὐδὲ χειρῶν κρότος | ἔρχετε, ἀλλ' ἀποδοὺς | τὸ δάνιον ('my debt to nature') πεπόρευμε. | ταῦτα πάντα κόνις. The man is as full of quotations as Dikaiopolis).

Other traces of the same cult came to light at *Ghel-Ghiraz*, some sixteen miles west of Amaseia, on the edge of the plain Chiliokomon (*Soulou-Ova*). Here was found a marble altar of *s.* i (?) A.D. dedicated to Zeus Στράτιος (*eid. ib.* i no. 152 Διὶ Στρατίῳ εὐ[χ]ῆς | καὶ εὐσεβίας [χ]άριν Κῦρος καὶ | Φιλέταιρος οἱ | Κλάρου. The letters χ, χ, being crosses, have been effaced by some zealous Mohammedan) and sundry remnants of his temple (Ionic and Corinthian capitals, a column-shaft in red marble, fragments of cornice, blocks of marble) scattered through the village. The temple itself probably stood on a small polygonal plateau cut out on a spur of the mountainous heights above *Ghel-Ghiraz* (map xii).

Lastly, an inscription of Roman date from Athens mentions an offering to Zeus Στράτιος made by four citizens of Amaseia (*Corp. inscr. Att.* iii. i no. 201 ἀγαθῇ τύχῃ· | Διὶ Στρατί[ῳ] | Διότιμος, Ὑψικράτη[ς], | Δρόσερος, Σεύηρος | οἱ Ἀμασεῖς).

F. Cumont justly regards the sacred pines still growing on *Beuyuk Evlia* as comparable with the trees beside the altar on the coins of Amaseia (*supra* figs. 858—861), with the two oaks planted by Herakles at Herakleia Pontike by the altars of Zeus Στράτιος (Plin. *nat. hist.* 16. 239 in Ponto citra Heracleam arae sunt Iovis Στρατίου cognomine, ibi quercus duae ab Hercule satae), and with the sacred plane-trees of Zeus Στράτιος at Labranda (*supra* p. 590). But with equal justice Cumont refuses to see in *Beuyuk Evlia* the scene of Mithridates' pyre, which was visible far out at sea and must therefore have been raised on some such peak as *Ak-Dagh*, the highest summit of the country. As to the nature of Zeus Στράτιος, after renewed consideration of the available *data* (cp. F. Cumont 'Le Zeus Stratios de Mithridate' in the *Revue de l'histoire des religions* 1901 xliii. 47—57), he arrives at the following conclusion: 'Peut-être était-il à l'origine la divinité locale de quelque tribu indigène de la vallée de l'Iris, qui s'assemblait pour l'adorer sur le sommet d'une montagne voisine. A leur arrivée dans le pays, les colons grecs auraient alors, suivant une coutume constante, transformé cette divinité barbare en un Zeus guerrier. Puis, quand une maison d'origine iranienne fonda un royaume dans cette région, elle aurait prétendu reconnaître dans ce Zeus son Ahoura-Mazda, et lui aurait offert des sacrifices nouveaux, imités de ceux qu'accomplissaient les monarques perses. La nature du dieu serait donc composite; elle serait formée d'une réunion des trois éléments,

Kappadokia

Mount Argaios (?)[1].

pontique, grec et iranien, dont la combinaison caractérise la religion comme la civilisation de ces contrées.'

To this I would add but two remarks. Doubtless, as Cumont says, the pyre of Mithridates on the Pontic mountain bears some resemblance to the perpetual fire on the mountain of Zoroastres (Dion Chrys. *or.* 36 p. 92 f. Reiske cited *supra* i. 783 f., ii. 33), and the offering of milk, honey, wine, and oil by Mithridates recalls the offering of oil, milk, and honey by the Magoi (Strab. 733). But these practices can be paralleled from Greek as well as from Persian usage. The big blaze reminds us of the bonfire on the top of Mt Kithairon kindled once in sixty years at the Great Daidala, when the oak-brides of Zeus were burnt (Paus. 9. 3. 1 ff. cited *supra* p. 898 n. 6). And the offering of milk, honey, wine, and oil is suggestive of the usual Hellenic gifts to the dead (see *e.g.* P. Stengel *Die griechischen Kultusaltertümer*[3] München 1920 p. 149 'Man spendet Wein, Wasser, Milch, Honig und Öl, doch selten alles zugleich.' Is the ritual of Aisch. *Pers.* 610 ff. Persian or Greek?). There may after all have been some historica foundation for the folk-belief that a saint lies buried on *Beuyuk Evlia*.

Mt Argaios (*Erjäus*), the culminating point of Antitauros and the highest (3840^{m}) peak in Asia Minor, has its summit covered with perpetual snow (Strab. 538, Solin. 45. 4). On the side facing Kaisareia (*Kaiserieh*) this forms a vast slope of glittering white—a fact which perhaps gave its name to the mountain (for ἀργός, ἀργής, ἀργῆεις, etc. see Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 49 f., Boisacq *Dict. étym. de la Langue Gr.* p. 74 f.).

In antiquity few persons reached the summit, and those who did declared that in clear weather they could see both the Euxine and the bay of Issos (Strab. 538)! The ascent readily won its way into the region of the mythical. W. J. Hamilton *Researches in Asia Minor, Pontus, and Armenia* London 1842 ii. 275 reports the following tale: 'A traveller once came from Frangistan, in search of a rare plant which grew only on the summit of Argaeus, having ten leaves round its stalk and a flower in the centre. Here it was said to be guarded by a watchful serpent, which only slept one hour out of the four-and-twenty. The traveller in vain tried to persuade some of the natives to accompany him, and point out the way; none of them would venture, and at length he made the ascent alone. Failing, however, in his attempt to surprise the dragon, he was himself destroyed. The story adds that he was afterwards discovered, transformed into a book, which was taken to Caesareia, and thence found its way back into Frangistan.'

In modern times ascents have been made by Hamilton (1837), Tchihatcheff (1848), and H. F. Tozer with T. M. Crowder (1879). See W. J. Hamilton *op. cit.* ii. 274 ff. (with lithographic pl. view of Mt Argaios as seen from *Kara Hissar*), P. de Tchihatcheff *Asie Mineure* Paris 1853 i. 439 ff. (with fig. 9 view of Mt Argaios, fig. 10 do. as seen from *Erkelet*, fig. 11 do. as seen from *Tomarsé*, fig. 14 plan of Mt Argaios), H. F. Tozer *Turkish Armenia and Eastern Asia Minor* London 1881 pp. 106—131. Tozer says of the summit (*ib.* p. 125 f.): 'The view was quite clear and very extensive, including the long line of the Anti-Taurus to the east, the Allah Dagh and other mountains that run down towards Lycaonia to the south-west, and to the north the vast undulating plains of the interior which we had crossed in coming from Yeuzgatt. One or two small lakes were visible.... We could also trace the depression in which the Halys runs, though the river itself was not in sight. Kaiserieh lay below us...like a dark carpet spread on the bare plain. But far the most remarkable feature was the mountain itself, for the lofty pinnacles of red porphyritic rock, rising from among the snows around and beneath us, veritable *aiguilles*, were as wonderful a sight as can well be conceived [Tozer here gives a striking view of these three needles, which are *c.* 50 feet in height]. The crater or craters, which once occupied the summit, are too much broken away to be easily traceable, the best-marked being that which faces east; but below, all round the base of the mountain, is a belt of volcanic cones. The idea that prevailed among the ancients, that on clear days both the Euxine and the Mediterranean were visible from here, is wholly impossible on account of

the distance, and the height of the intervening mountains.' Tozer adds (*ib.* p. 126 f.): 'As we were climbing about the rocks close by, we found to our great surprise that in places they were perforated with ancient human habitations. One of these wound inwards to a considerable depth with rude niches hollowed in the sides like those which we had seen on the banks of the Halys.... Anyhow there was no question of their being artificial abodes, for besides the niches, the marks of some hard instrument were evident on the roof and sides.'

The capital of Kappadokia, built at the base of Mt Argaios, was named successively Mazaka, Eusebeia, and Kaisareia (Strab. 537 f., Steph. Byz. *s.v.* Καισάρεια). Bronze coins of Eusebeia, struck by Archelaos king of Kappadokia 36 B.C.—17 A.D., have *rev.* Mt Argaios (*Hunter Cat. Coins* ii. 581 no. 1 pl. 62, 15), sometimes with an eagle on its summit (*Brit. Mus. Cat. Coins* Galatia, etc. p. 45 no. 2 pl. 8, 1 (=my fig. 862)). Imperial coins of Kaisareia, in silver and bronze, from Tiberius to Gordianus iii, repeat the type with many interesting variations (*Brit. Mus. Cat. Coins* Galatia, etc. p. 46 ff. pl. 8, 8, 12, pl. 9, 6, 7, 21, pl. 10, 6, 7 (=my fig. 864), 8, 14, 17, 18, 20, pl. 11, 1 (=my fig. 865), 4, 6, 7, 9, 11, 13 (=my fig. 869), 15—19, pl. 12, 1, 2, 3 (=my fig. 873), 4, 7, 9, 12, pl. 13, 1, 2 (=my fig. 875), 3, 4 (=my fig. 877), *Hunter Cat. Coins* ii. 582 ff. pl. 62, 16, 19, 22—24, 25 (=my fig. 868), 26—28, 29 (=my fig. 874), Imhoof-Blumer *Monn. gr.* p. 417 ff. no. 183 ff. pl. H, 1—4, 5 (=my fig. 872), G. Macdonald *Coin Types* Glasgow 1905 p. 167 ff. pl. 6, 10, 11, Head *Hist. num.*[2] p. 752 f. fig. 331. Figs. 863, 866, 867, 870, 871, 876 are from specimens in my collection. See also *supra* i. 603 n. 2). Cp. a red jasper intaglio in the British Museum, which shows Mt Argaios with a wreath above it and a goat's head below (*Brit. Mus. Cat. Gems* p. 135 no. 1107), another from the Blacas collection, which represents the mountain inscribed ΑΡΓΑΙΟC and topped by a radiate figure holding a *patera* in his left hand, a sceptre in his right (*ib.* p. 135 no. 1105), and a third at Berlin, which crowns the summit with an eagle holding a wreath in its beak (Furtwängler *Geschnitt. Steine Berlin* p. 313 no. 8558 pl. 61).

This famous type has been discussed at length by W. Wroth in the *Brit. Mus. Cat. Coins* Galatia, etc. pp. xxxviii—xli and by O. Rossbach in the *Neue Jahrb. f. klass. Altertum* 1901 vii. 406—409. The general shape of the mountain with its crater above and volcanic cones below is adequately rendered. The woods which formerly fringed its sides (Strab. 538 ἀξύλου γὰρ ὑπαρχούσης σχεδόν τι τῆς συμπάσης Καππαδοκίας, ὁ Ἀργαῖος ἔχει περικείμενον δρυμόν, κ.τ.λ.) are represented by trees (figs. 866, 869 ff.). The game inhabiting them is suggested by the lively little picture of the hound chasing the goat or stag (fig. 863). But Argaios was more than a picturesque object or happy hunting-ground. It was to the Cappadocians καὶ θεὸς καὶ ὅρκος καὶ ἄγαλμα (Max. Tyr. *diss.* 8. 8 Dübner cited *supra* i. 102 n. 5). As an ἄγαλμα it is seen on an altar (fig. 869 ff.) or within a temple (fig. 876). It is even worn as a head-dress by Tranquillina (fig. 877), who thus appears as the Tyche of Kaisareia (H. Dressel in the *Zeitschr. f. Num.* 1901 xxiv. 86 f.). Its claim to divinity is stated somewhat differently by Solin. 45. 4 Mazacam sub Argaeo sitam Cappadoces matrem urbium numerant; qui Argaeus nivalibus iugis arduus ne aestivo quidem torrente pruinis caret quemque indidem populi habitari deo (*habitare deum* cod. G) credunt. It remains therefore to ask what deity was believed to inhabit the mountain. W. Wroth rightly rules out Sarapis, though a coin at Paris shows that god holding the mountain in his hand (J. A. Blanchet in the *Rev. Num.* iii Série 1895 xiii. 74 f. pl. 3, 15). This, like the Egyptian symbol (?lotos: cp. *supra* p. 773 fig. 737) which tops the mountain on a coin of Trajan (fig. 863), merely proves that from time to time Sarapis bulked big at Kaisareia. Wroth himself concludes (as does Rossbach *loc. cit.* p. 407 f.) that the naked male figure, who appears on the mountain-top holding globe and sceptre (fig. 867) and sometimes wearing a crown of rays (cp. fig. 868), is the deified emperor. Accordingly he takes the eagle on the mountain (fig. 862) or on the mountain-altar (fig. 869) to be the Roman eagle, interprets the 'two or more figures' sometimes seen on the summit (figs. 870, 872) as 'Imperial personages?,' and draws attention to a coin of Caracalla at Berlin (J. Friedlaender in the *Zeitschr. f. Num.* 1884 xi. 52 pl. 1, 5, better read by B. Pick in the *Journ. Intern. d'Arch. Num.* 1898 i. 455 ff.) which shows Mt Argaios and a distyle

temple below with a star in its pediment and between its columns the inscription ЄΙϹ ЄΩ|ΝΑ ΤΟΥ|Ϲ ΚΥΡΙΟΥ (=*εἰς αἰῶνα τοὺς κυρίους*, an acclamation of the imperial house). Wroth, however, admits 'that before the Imperial age some local divinity—perhaps a mountain-god—was worshipped in connection with Argaeus.'

This is unsatisfactory. The eagle on the mountain-top occurs before the town was renamed Kaisareia (fig. 862 inscribed ЄΥΣ[Ε] ΒЄΙ[Α]), and the eagle on the mountain-altar is much too prominent to be merely a Roman eagle (fig. 869). Gerhard *Gr. Myth.* i. 166, 174 f. did not scruple to speak of a 'Zeus Argäos.' And, though the exact appellation has not yet been found (for Zeus *ἀργής* see *supra* i. 31 f., 317 f.), he was in all probability on the right track. At least the naked figure with globe and sceptre, the radiate crown, the sun and moon (figs. 869, 873), the star (figs. 871, 876) or stars (fig. 864)—to say nothing of the eagle—are all appropriate to a Hellenistic Zeus. At Kaisareia such an one would readily take on oriental features, *e.g.* the tall headdress with which he appears on a silver coin of Trajan (*Brit. Mus. Cat. Coins* Galatia, etc. p. 52 no. 46 ('Zeus?') pl. 9, 8 (=my fig. 878)). Besides, the two supporters with lances (fig. 870) can then be reasonably explained as the Dioskouroi. It would seem, in fact, that the three rocky pinnacles of the mountain-top were connected with Zeus and the Dioskouroi respectively. I should go further and claim that here, as elsewhere (*supra* pp. 160, 431 f.), the Dioskouroi are anthropomorphic sky-pillars. And I should conjecture that their older aniconic forms were perpetuated by local piety in the curious pillars to right and left of the sacred mountain (figs. 874, 875). The rays that crown these pillars are no accidental adornment. It must often have happened that Dioscuric stars (St Elmo's fires) were to be seen in stormy weather flickering about the *aiguilles* of the summit.

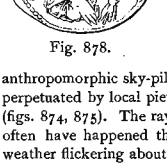

Fig. 878.

Even so we have hardly exhausted the significance of the coin-types. One of them (fig. 867) apparently attaches a goat's head to the outline of the mountain, low down on its left hand side,—a detail which recalls the goat's head on the gem in the British Museum (*supra*), but is not easy to explain. And what are we to make of the star-like flower or rosette that is found so frequently in the centre of the design? Is this only a stylised rendering of rocks or bushes? Or dare we surmise that popular belief connected the mountain with some magical or mythical flower such as that mentioned by W. J. Hamilton in the tale already told?

[1] Zeus Ὀλύβριος or Ὀλύβρις (*supra* i. 597 n. 4).
[2] *Supra* i. 100 n. 12.

[5] Zagreus (*supra* i. 651), whose art-type was borrowed by the Cretan Zeus Ἰδαῖος (*supra* i. 644 ff. pl. xxxv).
[6] Zeus Ἀρομάσδης (*supra* i. 741 ff.).
[7] A bronze coin of *s.* i B.C., probably struck at Chalkis sub Libano (*Anjar*) near

Mount Kasion[1].

Heliopolis (*Ba'albek*), has *obv.* head of Zeus, laureate, to right, *rev.* a temple with two columns, from each of which hangs a fillet, and two steps, on which is the inscription ΧΑΛΚΙ ΔЄΩΝ. Within the temple is a conical stone bound with a fillet (*Brit. Mus. Cat. Coins* Galatia, etc. pp. liv, 279 no. 1 pl. 33, 10 (=my fig. 879), Head *Hist. num.*[1] p. 655 (but not *ib.*[2] p. 783)). W. M. Leake *Numismata Hellenica* London 1854 Asiatic Greece p. 41 had assigned a similar specimen in his collection to Chalkis (*Kinnesrin*) near Beroia (*Aleppo*). De Visser *De Gr. diis non ref. spec. hum.* p. 41 f., 167 treats this conical stone as a primitive ἄγαλμα of Zeus. And he may well be right (*supra* i. 521 n. 0), though it should be remembered that Imhoof-Blumer *Monn. gr.* p. 222 f. referred bronze coins with a like *rev.* and *obv.* dolphin round trident (p. 222 no. 60) or head of Hera (p. 223 nos. 63 and 64) to Chalkis in Euboia (so also Head *Hist. num.*[2] p. 360, Anson, *Num. Gr.* v. 19 nos. 133–135).

Fig. 879.

[1] Mt Kasion (*Djebel-el-Akrâ*) rises abruptly from the sea to a height of 5318 ft. The ancients declared that from its summit the sun could be seen in the fourth watch of the night (Plin. *nat. hist.* 5. 80, Solin. 36. 3, Mela 1. 61 (confuses with Mt Kasion in Egypt), Mart. Cap. 680) or at second cock-crow (Amm. Marc. 22. 14. 4). According to Euhemeros the mountain derived its name from a certain king Kasios, who had entertained Zeus (Euhem. *ap.* Euseb. *praep. ev.* 2. 2. 61, Lact. *div. inst.* 1. 22 cited *supra* p. 588 n. 1). Sanchouniathon, as reported by Philon of Byblos, held that Aion and Protogonos had descendants as mortal as themselves named Phos, Pyr, and Phlox, who discovered and taught how to make fire from the friction of wood on wood. They in turn had gigantic sons, who gave their names to the mountains that they occupied—Kassion, Libanos, Antilibanos, and Brathy (cp. Plin. *nat. hist.* 24. 102 herba Sabina, brathy appellata a Graecis, duorum generum est, altera tamarici folio similis, altera cupresso; quare quidam Creticam cupressum dixerunt). Hence sprang Samemroumos (O. Höfer in Roscher *Lex. Myth.* renders 'der hohe Herr des Himmels'), also called Hypsouranios, <and Ousoös (on whom see Gruppe *Cult. Myth. orient. Rel.* i. 392)>, who were named after their mothers, the women of that age being free to mingle with any whom they met (Philon Bybl. *frag.* 2 (*Frag. hist. Gr.* iii. 566 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 9). Synkellos states that Kasos and Belos, sons of Inachos, founded Antiocheia on the Orontes (Synkell. *chron.* 126 A (i. 237 Dindorf), cp. Io. Malal. *chron.* 2 p. 28 Dindorf). Stephanos of Byzantion declares that Mt Kasion in Syria was colonised from Kasos, one of the Kyklades, which was called after Kasos the father of Kleomachos (Steph. Byz. *s.v.* Κάσος, but cp. *id. s.v.* Κάσιον where much the same is said of Mt Kasion in Egypt). The true derivation of the name is still to seek: for modern conjectures see W. W. Baudissin *Studien zur semitischen Religionsgeschichte* Leipzig 1878 ii. 238 f., Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2266 f.

Several myths attached to the mountain. Zeus pursued Typhon to Mt Kasion (Apollod. 1. 6. 3 cited *supra* p. 448 n. 2). The inhabitants of the district, when locusts devastated their crops, besought Zeus to send the *Seleucides aves* (Plin. *nat. hist.* 10. 75 Seleucides aves vocantur quarum adventum ab Iove precibus inpetrant Casii (so Hermolaus Barbarus for *casini* edd. vett. *casmi* cod. F[2]. C. Mayhoff prints *Cadmi*) montis incolae fruges eorum locustis vastantibus. nec unde veniant quove abeant compertum, numquam conspectis nisi cum praesidio earum indigetur). The Antiochenes honoured Triptolemos as a hero with a festival on Mt Kasion (Strab. 750). Some said that Kyparissos, a Cretan boy of great beauty and purity, fled from Apollon or Zephyros to the river Orontes and Mt Kasion, where he was changed into a cypress-tree (interp. Serv. *in* Verg. *Aen.* 3. 680).

In historical times we get repeated allusions to the cult of Zeus on this mountain. When Seleukos i Nikator founded Seleukeia Pieria, he first on the twenty-third day of

the month Xanthikos (April) offered sacrifice to Zeus Κάσιος upon Mt Kasion: an eagle carried off a morsel of the sacrificed flesh towards the sea-shore and so showed him the right site (Io. Malal. *chron.* 8 p. 199 Dindorf, cp. *ib.* pp. 199 f., 202 f. *Infra* Append. N *med.*). Trajan, accompanied by Hadrian, visited Seleukeia in the month Apellaios (December) 113 A.D. on his way to fight the Persians (Io. Malal. *chron.* 11 p. 270 Dindorf). Here Trajan dedicated to Zeus Κάσιος silver bowls and a great gilded ox-horn for his victory over the Getai (Souid. *s.v.* Κάσιον ὄρος), while Hadrian commemorated the occasion in a tactful epigram (*Anth. Pal.* 6. 332 (Adrianos) *Ζηνὶ τόδ' Αἰνεάδης Κασίῳ Τραϊανὸς ἄγαλμα, | κοίρανος ἀνθρώπων κοιράνῳ ἀθανάτων, | ἄνθετο, δοιὰ δέπα πολυδαίδαλα καὶ βοὸς οὖρου | ἀσκητὸν χρυσῷ παμφανόωντι κέρας, | ἕξαιτα προτέρης ἀπὸ λῃδος, ἦμος ἀτειρὴς | πέρσεν ὑπερθύμους ᾧ ὑπὸ δουρὶ Γέτας. | ἀλλὰ σύ οἱ καὶ τήνδε, κελαινεφές, ἐγγυάλιξον | κρῆναι ἐυκλειῶς δῆριν' Ἀχαιμενίην, | ὄφρα τοι εἰσορόωντι διάνδιχα θυμὸν ἰαίνῃ | δοιά, τὰ μὲν Γετέων σκῦλα, τὰ δ' Ἀρσακιδέων*). In 129 A.D. Hadrian climbed the mountain by night to witness the sunrise; but rain came on and, as he was sacrificing, a thunderbolt fell and destroyed both victim and priest (Spart. *v. Hadr.* 14. 3). Perhaps Lucius Verus too paid homage to Zeus Κάσιος, for a medallion, struck in 167 A.D. on account of the victories won in the east by Avidius Cassius, shows the emperor offering Nike to Zeus who is seated on a mountain (Cohen *Monn. emp. rom.*[2] iii. 197 no. 291, *supra* i. 133 f. fig. 99): this inference, defended by W. Drexler in Roscher *Lex. Myth.* ii. 971 f., is questioned by Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2265. In the spring of 363 A.D. Julian ascended Mt Kasion on a festal day and there sacrificed a hecatomb to Zeus Κάσιος (Amm. Marc. 22. 14. 4, Io. Malal. *chron.* 13. p. 327 Dindorf, cp. Ioul. *misop.* 361 D, Liban. *or.* 14. 69 (ii. 112, 14 Foerster)): he made the ascent at midday, saw the god (?in a dream), rose up, and received some useful advice (Liban. *or.* 18. 172 (ii. 310, 18 ff. Foerster) *εἰς τὸ Κάσιον ὄρος παρὰ τὸν Κάσσιον ἀναβὰς Δία μεσημβρίας σταθερᾶς εἶδέ τε τὸν θεὸν καὶ ἰδὼν ἀνέστη καὶ συμβουλὴν ἐδέξατο, δι' ἧς πάλιν διαφεύγει λόχον*).

But the most interesting evidence with regard to the cult is supplied by the coin-types of Seleukeia. Coppers struck by Trajan and Antoninus Pius have *rev.* a shrine with pyramidal roof resting on four pillars and enclosing a sacred stone, which is filleted. On

Fig. 880.

Fig. 881.

Antoninus Pius). Later specimens omit the god's name (*Hunter Cat. Coins* iii. 217 no. 43 Commodus), but show the stone in a tetrastyle temple (*Brit. Mus. Cat. Coins* Galatia, etc. p. 275 no. 50 Septimius Severus, p. 276 no. 52 Caracalla) and add crescent and star in the pediment (*Brit. Mus. Cat. Coins* Galatia, etc. p. 277 no. 57 pl. 33, 7 Elagabalos, no. 58 pl. 33, 8 (=my fig. 884) Severus Alexander (OBO=*ὀβολός*), Anson *Num. Gr.* v. 53 no. 356 pl. 8 Elagabalos, no. 357 pl. 8 Severus Alexander). Figs. 881, 883 are from examples in my collection.

Zeus Κάσιος must not be confounded with Zeus Κεραύνιος (*supra* p. 809); the stone in the shrine is no thunderbolt. Nor is there any real reason to think with F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 935 fig. 1206 that the stone was an aerolite worshipped as the Aramaean god Ḳaṣiu (but see Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2266) and Hellenised as Zeus Κάσιος. W. W. Baudissin *op. cit.* ii. 242 observes curtly: 'Der Stein ist Bild des heiligen Berges.' W. Wroth in the *Brit. Mus. Cat. Coins* Galatia, etc. p. lxxii says: 'the conical object has a cavity in the side, which seems further to show that the representation is that of a mountain or the agalma of a mountain.' Accordingly, he takes it to be 'the mountain-Kasios—or rather an *agalma* of the mountain' and compares Mt Argaion on the coins of Kaisareia (*supra* p. 979). A. Salač 'ΖΕΤΣ ΚΑΣΙΟΣ' in the *Bull. Corr. Hell.* 1922 xlvi. 176 f. rejects the view of Baudissin and Wroth, remarking very justly that on the later coins (figs. 883, 884) the cavity in the sacred stone disappears, the resultant shape being that of an *omphalós* (cp. Overbeck *Gr. Kunstmyth.* Zeus p. 553 n. 4). On the whole it seems safest to conclude that the sacred stone did duty as the god's altar (*supra* i. 521), the hollow in it (Pind. *Pyth.* 4. 206 *βωμοῖο θέναρ*) being used for libations (*supra* p. 193). A parallel might be found in the sacred stone with a cup-like top represented on some of the earliest *statêres* of Mallos in Kilikia (?) (*Brit. Mus. Cat. Coins* Lycaonia, etc. p. 95 pl. 15, 10—12, Babelon *Monn. gr. rom.* ii. 1. 557 f. pl. 25, 11, Anson *Num. Gr.* v. 17 nos. 117 and 118 pl. 3: on the doubtful attribution see Imhoof-Blumer *Kleinas. Münzen* ii. 435 f. and Babelon *op. cit.* ii. 1. 561 ff.). The pyramidal or triangular roof topped by an eagle recalls the pyramid of Sandas and would suit a mountain-god (*supra* i. 600 ff.).

A votive inscription from Heddernheim—*Corp. inscr. Lat.* xiii no. 7330 Deo | Casio | Ovinius | v.s.l.m.—has been connected with this Syrian cult (Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2267, A. Salač *loc. cit.* p. 187 f.).

[1] Hadrian attempted to crush Christianity by erecting a statue of Aphrodite on the site of the Crucifixion and an image of Zeus on the site of the Resurrection (Hieron. *epist.* 58. 3 *ad Paulinum* (xxii. 581 Migne) ab Hadriani temporibus usque ad imperium Constantini, per annos circiter centum octoginta, in loco resurrectionis simulacrum Iovis, in crucis rupe statua ex marmore Veneris a gentibus posita colebatur, existimantibus persecutionis auctoribus quod tollerent nobis fidem resurrectionis et crucis, si loca sancta per idola polluissent. Bethleem nunc nostram et augustissimum orbis locum, de quo Psalmista canit 'Veritas de terra orta est' (Ps. 85. 11), lucus inumbrabat Thamuz, id est Adonidis, et in specu, ubi quondam Christus parvulus vagiit, Veneris amasius plangebatur = Paulin. Nolan. *epist.* 31. 3 (lxi. 326 C—327 A Migne) nam Hadrianus imperator, existimans se fidem Christianam loci iniuria perempturum, in loco passionis <statuam Veneris, in loco resurrectionis (*ins.* A.B.C.)> simulacrum Iovis consecravit, et Bethlehem Adonidis fano profanata est, ut quasi radix et fundamentum ecclesiae tolleretur, si in iis locis idola colerentur, in quibus Christus natus est ut pateretur, passus est ut resurgeret, surrexit ut regnaret iudicatus).

So even the pagans realised that the Cross meant Love Divine and the empty Tomb Omnipotence.

[2] Θεὸς Ὕψιστος καὶ πάντων Ἐπόπτης (*supra* p. 889 n. 0 no. (33)).

[3] Θεὸς Ὕψιστος (*supra* p. 889 n. 0 no. (33).

[4] Mt Kasion, a barren sand-dune adjoining Lake Sirbonis, was famous for its sanctuary of Zeus Κάσιος (Strab. 760, Lucan. 8. 858, Plin. *nat. hist.* 5. 68, Solin. 34. 1, Steph. Byz. *s.v.* Κάσιον). According to Sanchouniathon as reported by Philon of Byblos, the descendants of the Dioskouroi, when shipwrecked, were cast up on Mt Kasion and dedicated a temple there (Philon Bybl. *frag.* 2 (*Frag. hist. Gr.* iii. 568 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 20 *κατὰ τοῦτον τὸν χρόνον οἱ ἀπὸ τῶν Διοσκούρων σχεδίας καὶ πλοῖα συνθέντες ἔπλευσαν, καὶ ἐκριφέντες περὶ τὸ Κάσιον ὄρος ναὸν αὐτόθι ἀφιέρωσαν*). The story is late, but the sanctuary must indeed have received many a dedication from travellers who had escaped the dangers of the shallow sea and the shifting sand (T. Wiegand in the *Jahrb. d. kais. deutsch. arch. Inst.* 1920 xxxv Arch. Anz. p. 87 f.). Near this spot Cn. Pompeius Magnus the triumvir was murdered as he stepped ashore, on Sept. 29, 48 B.C., and here he was buried (Strab. 760, Vell. Pat. 2. 53, Lucan. 8. 560 ff., Plout. *v. Pomp.* 78—80, Appian. *bell. civ.* 2. 84—86, Dion Cass. 42. 3—5, *alib.*). His partisans erected bronze statues to his memory near Mt Kasion (Appian. *bell. civ.* 2. 86). In the winter of 69—70 A.D. Titus and his army passed from Pelousion to the sanctuary of Zeus Κάσιος, and thence to Ostrakine, Rhinokoroura, etc. *en route* for Jerusalem (Ioseph. *bell. Iud.* 4. 11. 5). In 130 A.D. Hadrian, on his way from Palestine to Egypt, offered a sacrifice (*ἐνήγισε*) to Pompeius and rebuilt his ruined tomb (Dion Cass. 69. 11, Spart. *v. Hadr.* 14. 4), clearing it of sand and replacing the bronze statues, which had been removed to the *ádyton* of the sanctuary (Appian. *bell. civ.* 2. 86). Hadrian's epigram on the tomb is still extant (*Anth. Pal.* 9. 402 (Adrianos) *τῷ ναοὶς βρίθοντι πόση σπάνις ἔπλετο τύμβου*).

The little town of Kasion made a *spécialité* of intricate woodwork; whence the proverb Κασιωτικὸν ἄμμα (Diogeneian. 5. 44, Apostol. 9. 46, *prov. Bodl.* 527 p. 62 Gaisford, Souid. *s.vv.* ἄμματα, Κάσιον ὄρος, Zonar. *lex. s.v.* ἄμματα). A papyrus of 283 A.D. mentions Casiotic joiners (B. P. Grenfell—A. S. Hunt *The Oxyrhynchus Papyri* London 1898 i. 112 ff. no. 55, 6 Κασιωδῶν). We might have supposed that the local manufacture of Κασιωτικὰ ἱμάτια (Steph. Byz. *s.v.* Κάσιον) or Κασιανὰ ὑφάσματα (Eustath. *in* Dionys. *per.* 260) rested on a blunder (ἱμάτια or ὑφάσματα for ἄμματα). But Makrisi too speaks of certain fabrics called *qassiah* as made on the spot (Maqrizi *Description topographique et historique de l'Égypte* trad. U. Bouriant Paris 1900 p. 520). Early in *s.* i B.C., if not in

Pelousion[1].

s. ii. B.C., a native of the town made a double dedication in Delos to Zeus Κάσιος along with the Θεὸς Μέγας (*quis*? See *infra* Index i *s.v.* Odessos) and Tacbnepsis (a deity new to Egyptologists) (P. Roussel *Les cultes égyptiens à Délos du IIIe au Ier siècle av. J.-C.* Nancy 1916 p. 95 ff. no. 16 Θεῶι Μεγάλωι | καὶ Διὶ Κασίωι καὶ Ταχνήψει | Ἥρος Ἥρου Κασιώτης | ὑπὲρ Λευκίου Γρανίου | τοῦ Ποπλίου Ῥωμαίου· | γυναῖκα μὴ προσάγειν | μηδὲ ἐν ἐρέοις ἄνδρα· | κατὰ πρόσταγμα, no. 16 *bis* [Θεῶ]ι | [Μεγά]λωι | [καὶ Διὶ Κ]ασίωι καὶ | [Τα]χνήψει | [Ἥρο]ς Ἥρου Κασ(ι)ώτης | [ὑ]πὲρ Λευκίου Γρανίου | τοῦ Ποπλίου Ῥωμαίου, | κατὰ πρόσταγμα· | γυναῖκα δὲ μὴ προσάγειν | μηδὲ ἐν ἐρέοις ἄνδρα). Similarly a native of Berytos gave a thankoffering in Delos to Zeus Κάσιος (*id. ib.* p. 97 no. 17 Ξενοφῶν | Διονυσίου | Βηρύτιος | Διὶ Κασίωι | χαριστήριον). And, as Roussel remarks, Zeus Κάσιος is again grouped with Egyptian divinities in an inscription from Athens (A. Wilhelm *Beiträge zur griechischen Inschriftenkunde* Wien 1909 p. 136 'sie nennt in den ersten erhaltenen Zeilen Priester verschiedener Gottheiten, so des Ὅρος, Θεὸς Ἀγαθός, Ζεὺς Κάσιος, Ἀπόλλων, Διόνυσος, des [Διόνυσος und der] Ἀριάγ[νη?, der Μήτηρ θεῶν, der [Οὐρ]ανία Ἀφροδείτη Νείκη ἐν Κανώπῳ.' A. Salač, who publishes the inscription in the *Bull. Corr. Hell.* 1922 xlvi. 182—187, revises this list as follows: *vv.* 3 f. [Ἄρπο]κράτους, 5 Ὅρου, 6 Ἀγαθοῦ δεοῦ, 7 Διὸς Κασίο[υ], 9 Ἀπόλλωνος, 11 Διονύσο[υ]——Μητρὸς θεῶν, 13 ἐν Κ[α]νώπῳ (*i.e.* Sarapis at Kanopos (Strab. 801))——[Οὐρ]ανίας Ἀφροδείτης, 14 [Ἴσιδος Ταποσ]ειριάδος).

J. Clédat in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1905 pp. 602—611, *ib.* 1909 pp. 764—774, *ib.* 1911 p. 433 proves that Mt Kasion was not situated, as is commonly held, at *Ras-Bouroun* on the narrow strip of land between the sea and the lake, but at *Mahemdiah* (*Mohamedieh*) some 40 kilometers further to the west, that is, about 15 kilometers east of Pelousion. Here at the western end of the lake and close to the sea rises a rounded sandhill (maximum height 13·30^{m}: Lucan. 10. 434 f. exaggerates), on which he detected and partially excavated (1) a large (*c.* 20·0^{m} × 20·0^{m}) public bath, built of gypsum and baked brick in late Roman times; (2) a small (9·60^{m} × 6·0^{m}) tetrastyle temple facing east, built of gypsum at the eastern extremity of the hill; (3) numerous tombs, some on the hill, others on the plain, belonging to two Roman and two Byzantine cemeteries. Moreover, in 1909 he noted that a *cippus* of Roman date bore the name of an inhabitant called KACIOC (*loc. cit.* 1909 p. 774). And finally in 1911 he was able to report 'un petit sanctuaire avec niche d'autel en albâtre portant une inscription nabatéenne au nom de Zeus Cassius' (*loc. cit.* 1911 p. 433).

[1] We are further indebted to J. Clédat for the discovery of a temple dedicated to Zeus Κάσιος at Pelousion (J. Clédat 'Le temple de Zeus Cassios à Péluse' in the *Annales du service des antiquités de l'Égypte* Le Caire 1914 xiii. 79—85 with figs. 1—3 and pl. 11). Towards the western end of an elongated mound called by the Arabs *Tell el-Faramah* (Coptic **ⲡⲉⲣⲙⲟⲩⲑⲓ**) he found the walled camp (*el Kasr*) of the *equites Stablesiani* and to the west of this, at a point but little raised above the level of the surrounding morass, the last remains of a temple built in rosy granite. On the ground lay two columns (7·80^{m} in length, 1·0^{m} in diameter) and two architrave-blocks (1·80^{m} long, 0·96^{m} high, 0·80^{m} deep) bearing the central part of a deeply incised inscription, which may be restored *exempli gratia* as follows: [ὑπὲρ αὐτοκράτορος Καίσαρος Τραϊανοῦ Ἀδριανοῦ Σε]βαστοῦ καὶ τοῦ σ[ύμπαν]τος αὐτοῦ οἴκ[ο]υ Διὶ Κασίῳ Μ[εγίστῳ θεῷ Πηλουσίου καὶ τοῖς συννάοις θεοῖς] | [ἐπὶ Τίτου Φλαυΐου Τιτιανοῦ ἐπιτροπεύοντος τοῦ ἱε]ροῦ ἀνέθηκεν Κα[ιλι]ος Κάσιος Δί[ων Ἀπο]λλωνίου. τ[οῦ———] | [τὸν σηκὸν τοῦ ἱεροῦ καὶ τὸ πρόναον καὶ τὰ ἐν] αὐτοῖς πάντα κοσ[μήσα]ντος συνοροσηκ[.....]μωματι[———] | [———αὐ]τοῦ. I cannot make head or tail of the concluding words, unless we may suppose κοσ[μήσα]ς, τὴν ὀροφὴν [τῷ κομ]μώματι [διαποικίλας κ.τ.λ.] or the like. A fragment found to the left of the first block is inscribed ΑΝΟ with CΙ beneath it: this might be a portion of [Τραϊ]ανο[ῦ] and [ἐπιτροπεύοντο]ς τ[οῦ]. Another architectural block (2·50^{m} long, 0·49^{m} high, 0·90^{m} deep) bears the central part of a second inscription: [———τ]οῦ προγεγραμμένου [———] | [———] ἐπὶ Τίτου Φλαυΐου Τιτ[ιανοῦ———].

A. Salač in the *Bull. Corr. Hell.* 1922 xlvi. 166—176 ('*Zeus Kasios en Égypte*'), not only improves on Clédat's reading of the temple-dedication, but also contrives to throw a good deal of light on its occasion and significance. Hadrian came to Pelousion after his journey in Arabia (Spart. *v. Hadr.* 14. 4), that is, in 130 A.D. (W. Weber *Untersuchungen zur Geschichte des Kaisers Hadrianus* Leipzig 1907 p. 246). By the fall of the thunderbolt on the Syrian Mt Kasion (*supra* p. 982 n. o) he had already been designated as the favourite of Zeus Κάσιος (*supra* p. 22 ff.)—an honour comparable with the adoption of Alexander the Great by Zeus Ἄμμων. Hence the foundation of a temple of Zeus Κάσιος at Pelousion would glorify the emperor as well as the god (W. Weber *op. cit.* p. 235 f.).

Salač *loc. cit.* further contends that the cult-statue of Zeus Κάσιος at Pelousion, a youthful figure holding a pomegranate (Ach. Tat. 3. 6 ἔστι δ' ἐν τῷ Πηλουσίῳ Διὸς ἱερὸν ἄγαλμα Κασίου· τὸ δ' ἄγαλμα νεανίσκος, Ἀπόλλωνι μᾶλλον ἐοικώς· οὕτω γὰρ ἡλικίας εἶχε· προβέβληται δὲ τὴν χεῖρα καὶ ἔχει ῥοιὰν ἐπ' αὐτῇ· τῆς δὲ ῥοιᾶς ὁ λόγος μυστικός. προσευξάμενοι δὴ τῷ θεῷ καὶ περὶ τοῦ Κλεινίου καὶ τοῦ Σατύρου σύμβολον ἐξαιτήσαντες (καὶ γὰρ ἔλεγον μαντικὸν εἶναι τὸν θεόν) περιήειμεν τὸν νεών. κατὰ δὲ τὸν ὀπισθόδομον ὁρῶμεν εἰκόνα διπλῆν· καὶ ὁ γραφεὺς ἐνεγέγραπτο· Εὐάνθης μὲν ὁ γραφεύς, ἡ δ' εἰκὼν Ἀνδρομέδα καὶ Προμηθεύς, κ.τ.λ., 8 ἑξῆς δὲ τὸ τοῦ Προμηθέως ἐγεγόνει. κ.τ.λ.), was modelled upon a previously existing cult-statue of Harpokrates, the youthful Horos. This contention is strongly supported by numismatic evidence. In fact, a coin of Pelousion, struck by Trajan, actually shows Harpokrates standing with a sceptre in his left hand and a pomegranate in his right, towards which a little Pan stretches out his hands (G. Dattari *Numi Augg. Alexandrini* Cairo 1901 i. 418 no. 6345 pl. 34). Other coins of the same town, struck by Hadrian in 126/7 A.D., have *obv.* head of the emperor to right, laureate; *rev.* head of Harpokrates to right, wearing the *hem-hem* crown and fillet (V. Langlois *Numismatique des nomes d'Égypte sous l'administration romaine* Paris 1852 p. 39 no. 69 (wrongly described) pl. 3, 1, *Brit. Mus. Cat. Coins* Alexandria etc. p. 351 nos. 44 and 45), or *rev.* a pomegranate (Langlois *op. cit.* p. 39 no. 70, *Brit. Mus. Cat. Coins* Alexandria etc. p. 351 no. 46), while coins of Alexandreia, struck by Hadrian in 137/8 A.D., have *obv.* head of the emperor to right, laureate, with *paludamentum* over shoulder; *rev.* bust of Harpokrates of Pelousion to right, wearing *hem-hem* crown, with *himátion* over left shoulder and pomegranate in front (*ib.* p. 90 nos. 764 pl. 17 and 765, *Hunter Cat. Coins* iii. 457 no. 391). An Egyptian connexion is again presupposed by the statement that Malkandros king of Byblos had a son Palaistinos or Pelousios, who was nurtured by Isis and gave his name to the town that she founded (Plout. *de Is. et Os.* 17. Skyl. *per.* 106 makes Pelousios come ἐπὶ τὸ Κάσιον; Epiphan. *ancor.* 106 (i. 209, 30 Dindorf) makes Kasios worshipped παρὰ Πηλουσιώταις).

But, granting this Egyptian background, we have yet to explain why Zeus in particular was chosen as the successor of the youthful Horos. And here I should conjecture that we must take into account the influence of Crete, where a youthful Zeus had long been recognised. It is noteworthy that, whereas the nursling of Isis is called Horos by Diod. 1. 25 and Pelousios by Plout. *de Is. et Os.* 17, he is described as Diktys by Plout. *de Is. et Os.* 8. The name, whatever its origin (Gruppe *Gr. Myth. Rel.* p. 1283 n. 4), recalls the Cretan Diktynna and Mt Dikte and the infant Zeus (*supra* p. 927). It may be objected that Diktys is not expressly associated with Pelousion. But he is expressly associated with the Egyptian taboo on onions (Plout. *de Is. et Os.* 8 τὸ γὰρ ἐμπεσεῖν εἰς τὸν ποταμὸν καὶ ἀπολέσθαι τὸν τῆς Ἴσιδος τρόφιμον Δίκτυν τῶν κρομμύων ἐπιδραττόμενον ἐσχάτως ἀπίθανον· οἱ δὲ ἱερεῖς ἀφοσιοῦνται καὶ δυσχεραίνουσι τὸ κρόμμυον παραφυλάττοντες, ὅτι τῆς σελήνης φθινούσης μόνον εὐτροφεῖν τοῦτο καὶ τεθηλέναι πέφυκεν. ἔστι δὲ πρόσφορον οὔτε ἀγνεύουσιν οὔτε ἑορτάζουσι, τοῖς μὲν ὅτι διψῆν, τοῖς δὲ ὅτι δακρύειν ποιεῖ τοὺς προσφερομένους), and that taboo (as to which see the references collected by J. E. B. Mayor on Iuv. 15. 9) was specially characteristic of Pelousion (Plout. *comm. in Hes. frag.* 11. 52 Dübner *ap.* Gell. 20. 8. 7 'id etiam,' inquit, 'multo mirandum est magis, quod apud Plutarchum in quarto in Hesiodum commentario legi: "cepetum revirescit et congerminat decedente luna, contra autem inarescit adolescente. eam causam esse dicunt sacerdotes Aegyptii, cur Pelusiotae cepe non edint, quia solum olerum omnium contra lunae augmenta atque

Uncertain locality

Mount Hynnarion[1].

damna vices minuendi et augendi habeat contrarias,"' Loukian. *Iup. trag.* 42 *ἰδίᾳ δὲ Μεμφίταις μὲν ὁ βοῦς θεός, Πηλουσιώταις δὲ κρόμμυον, καὶ ἄλλοις ἴβις ἢ κροκόδειλος, καὶ ἄλλοις κυνοκέφαλος ἢ αἴλουρος ἢ πίθηκος*, Hieron. *comm. in Isa. proph.* 13 (xxiv. 450 C—D Migne) non quo simulacra gentilium in praedam bestiarum et iumentorum exposita sint; sed quo religio nationum simulacra sint bestiarum et brutorum animantium, quae maxime in Aegypto divino cultui consecrata sunt... nam et pleraque oppida eorum ex bestiis et iumentis habent nomina, *Κύνων* a cane, *Λέων* a leone, *Θμοῦϊς* lingua Aegyptia ab hirco, *Λύκων* a lupo, ut taceam de formidoloso et horribili caepe, et crepitu ventris inflati, quae Pelusiaca religio est, Hieron. *adv. Iovinian.* 2. 7 (xiii. 296 B Migne) coge Aegyptium ut ovium lacte vescatur; impelle, si vales, Pelusioten ut manducet caepe). Indeed we are told by Sextus Empiricus that no devotee of Zeus *Κάσιος* in that town would eat an onion (Sext. *Pyrrhon. hyp.* 3. 24. 224 *κρόμμυον δὲ οὐκ ἄν τις προσενέγκαιτο τῶν καθιερουμένων τῷ κατὰ Πηλούσιον Κασίῳ Διί, ὥσπερ οὐδὲ ἱερεὺς τῆς κατὰ Λιβύην Ἀφροδίτης σκορόδου γεύσαιτο ἄν. ἀπέχονται δὲ ἐν μὲν ἱεροῖς μίνθης, ἐν οἷς δὲ ἡδυόσμου, ἐν οἷς δὲ σελίνου*). Sextus' phrase *τῶν καθιερουμένων τῷ...Κασίῳ Διί* coupled with that of Achilleus Tatios (*supra*) *τῆς δὲ ῥοιᾶς ὁ λόγος μυστικός* may fairly be taken to imply that Zeus *Κάσιος* had mystic rites of initiation—another point of contact with the Cretan Zeus (*supra* i. 648 ff., 663 ff.).

U. Wilcken in the *Archiv für Papyrusforschung und verwandte Gebiete* 1901 i. 555 draws attention to a letter, written from Pélousion by an unskilled hand at some uncertain date (? *s.* ii A.D.), found in the *Fayoum*, and now preserved at Berlin, in which mention is made of Zeus *Κάσιος* (Zerekli in *Aegyptische Urkunden aus den koeniglichen Museen zu Berlin* herausg. von der Generalverwaltung: Griechische Urkunden no. 827 (P. 7150), 1 ff. *Ζωΐς Ἀπ[ολ]λωρίῳ τῷ ἀδελ|φῷ χαί[ρ]ειν. τὸ προσκύνημά | σου παρὰ τῷ Δὶ τῷ Κασίῳ. γι|νώσκειν σε θέλω ὅτι εὗρη|κα τὴν γυναῖ<κα> τοῦ Ἄχαρις (?) | κα[ι] δέδωκα αὐτῇ τὰ γεγρα|μμένα πάντα κ.τ.λ.* addressed on the back *ἀπό(δος) Ἀπολινα|ρίῳ ἀ|πὸ Πετρωνίου δρομι|δαρίου ἀπὸ Πη|λουσίου*). A circular bronze stamp with long handle in the Leyden Museum shows an Egyptian head-dress, consisting of three bunches of plants with a disk on each, and is inscribed *Διὸς Κα|σίου, Ἀθην|ᾶς Ἀπι|ανοῦ ι[....]* (C. Leemans *Description raisonnée des monumens Égyptiens du Musée d'Antiquités des Pays-Bas, à Leide* Leide 1840 p. 111 no. 342, *id. Animadversiones in Musei Antiquarii Lugduno-Batavi inscriptiones Graecas et Latinas* Lugduni Batavorum 1842 p. 28, *Corp. inscr. Gr.* iv no. 7044 *b*, W. Drexler in Roscher *Lex. Myth.* ii. 973 'Bronzespiegel' (!), Gruppe *Gr. Myth. Rel.* p. 1104 n. 1 'Gemme' (!)).

W. W. Baudissin *Studien zur semitischen Religionsgeschichte* Leipzig 1878 ii. 243 infers from Epiphan. *loc. cit.* (*Κάσιος δὲ ὁ ναύκληρος παρὰ Πηλουσιώταις* (*sc.* *τιμᾶται*)) that Zeus Κάσιος was worshipped by sea-faring men. On which Frau Adler in Pauly—Wissowa *Real-Enc.* x. 2266 remarks: 'Daher darf wohl mit dem pelusischen Kulte ein Fund bei Palos in Spanien in Verbindung gesetzt werden; im Meere wurden antike Bleianker aufgefischt mit hebräischen, lateinischen und zwei griechischen Inschriften; die eine galt Aphrodite *σώζουσα*, die andere *Ζεὺς Κάσις σωζ<ων>* (die Ergänzung der zwei letzten Buchstaben unsicher), Boletin d. l. Real Ac. d. Historia 1906, XLVIII 157 f.'

Baudissin *op. cit.* ii. 240 was inclined to derive the Pelusiac from the Syrian cult of Zeus *Κάσιος*, though he added: 'Es ist aber nicbt unmöglich, dass der Dienst des Kasios ein *alt*semitischer war, welchen verschiedene semitische Völker aus der gemeinsamen Heimat herübernahmen.' Frau Adler *loc. cit.* adopts the latter view, 'dass beide Kulte auf gemeinsame, ursemitische Wurzel zurückzuführen sind.' But Salač in the *Bull. Corr. Hell.* 1922 xlvi. 180, 188 definitely returns to the former view: 'En somme, le culte de *Ζεὺς Κάσιος* paraît d'origine syrienne; le culte du Mons Casius égyptien semble dérivé de la Syrie.'

[1] Hesych. *s.vv.* *Τυναρεύς· Ζεὺς ἀπὸ τοῦ Τυναρίου ὄρους, ὑννάς· αἶξ ἀγρία, ὑννή· αἶξ. καὶ τὸ τοῦ ἀρότρου σιδήριον τὸ τέμνον τὴν γῆν <ὕννη>. καὶ ὔννις ὁμοίως, ὔννος· πῶλος ὁ ἐν τῇ γαστρὶ νοσήσας, πρὶν κυνηθῆναι <ἵννός>.* Gruppe *Gr. Myth. Rel.* p. 824 n. 7 concludes that Zeus *Τυναριεύς* (*sic*) derived his appellative from the goat.

APPENDIX E.

THE KYKLOPS IN FOLK-TALES.

Tales resembling that of Polyphemos have, during the last seventy years, been collected and discussed by a whole series of eminent folklorists. W. Grimm (1857)[1], C. Nyrop (1881)[2], G. Krek (1887)[3], L. Laistner (1889)[4], G. Polívka (1898, 1918)[5], N. G. Polites (1904)[6], P. Sébillot (1904)[7], W. R. Halliday (1916)[8], F. Settegast (1917)[9], and Sir J. G. Frazer (1921)[10] have all said their say, most of them making valuable contributions to the subject. But the palm must be awarded to O. Hackman (1904)[11], who in an exemplary monograph has not merely summarised two hundred and twenty-one variants, but has also added a lucid and logical study of their contents.

Hackman arranges the tales in three groups—A, B, and C. Group A (124 variants) commonly involves two episodes and frequently adds a third:

i The blinding of the giant, which is contrived
either (*a*) during his sleep by means of a red-hot stake, iron spit, knife, sword, etc. plunged into his one eye,
or (*β*) as a pretended cure for his defective sight by means of molten tin, lead, oil, pitch, boiling water, etc. poured into his eye.
The former alternative, (*a*), prevails in southern and western Europe; the latter, (*β*), in northern and eastern Europe. It is probable that (*β*) was not a modification of (*a*), but had a separate and independent origin[12].

[1] W. Grimm 'Die Sage von Polyphem' in the *Abh. d. berl. Akad. 1857* Phil.-hist. Classe pp. 1—30 (=*Kleinere Schriften* Gütersloh 1887 iv. 428—462). W. W. Merry in Appendix ii 'On some various forms of the legend of the blinded Cyclops' to his edition of the *Odyssey* Oxford 1886 i.[2] 550—554 summarises nine tales after J. F. Lauer *Homerische Studien* Berlin 1851 p. 319 ff. and W. Grimm *loc. cit.*

[10] Sir J. G. Frazer in Appendix xiii 'Ulysses and Polyphemus' to his edition of Apollodoros London 1921 ii. 404—455 gives an admirable selection of thirty-six variants—quite enough, as he remarks, 'to illustrate the wide diffusion of the tale and the general similarity of the versions.'

[12] O. Hackman *op. cit.* p. 166 f.

ii The escape of the hero, who gets off
either (α) by clinging under a sheep, goat, ox, etc.,
or more often (β) by putting on a sheep-skin, goat-skin, ox-hide, etc.
Of these alternatives (α), which implies gigantic sheep, was earlier than (β), which makes less demand on the hearer's credulity.

iii The attempt of the giant to recapture the hero by flinging after him a magical ring (Dolopathos, Italy, Argyllshire, Basses-Pyrénées, Siebenbürgen, Bohemia),
a golden staff (Poland, Servia),
an axe with a golden or silver haft (Russia, Lithuania, Wotyaks),
a sabre (Great Russia),
a copper coin (Little Russia),
a white stone (Altai Mts.).
This episode, which probably formed part of the original tale[1], bulks big in Russia, Galicia, Italy, and Basses-Pyrénées, but does not occur at all in Greece.

Group B (50 variants) is marked by another episode:

iv The hero escapes detection by giving his name as 'Self' or 'Myself,' rarely as 'Nobody' (*Odyssey*, Anjou)[2].
This *motif* belonged originally to a distinct tale, current in northern and central Europe, which told how a man injured an elfish creature of some sort—mermaid (Sweden), water-nixie (Germany), wood-nymph (Sweden), fairy (France), kobold (Rügen), dwarf (Germany), or devil (eastern Europe)—commonly by means of fire or something hot, and then eluded the vengeance of his victim's companions by giving his name as 'Myself' or the like[3].

Group C (47 variants) is a late combination of i (β), the blinding of the giant by way of cure, with iv, the name-trick. It is found only in Finland, Lettland, and Esthonia[4].

It will be seen from this analysis that the story of Polyphemos, as related by Homer, includes episode i, the blinding of the giant, in its south-European form, and episode ii, the escape of the hero, in its earlier and more miraculous aspect, but omits episode iii, that of the magical ring, altogether[5], substituting for it episode iv, the originally alien *motif* of the name. Homer, in short, picks and chooses. He may tolerate a monstrous ram, but he omits mere magic, and prefers to insert a conspicuous example of human cunning.

As regards the vexed question of ultimate significance Hackman, after admitting that almost all investigators of the tale (Grimm, Krek, Jubainville, Cerquand, etc.) have taken the single eye of Polyphemos to be the sun[6], reaches the cautious conclusion: 'Das Stirnauge des Riesen, das jedenfalls schon der Grundform angehört hat, war wohl ursprünglich ein die Sonne symbolisirendes Attribut des Himmels- oder Sonnengottes. Doch hat diese frühzeitig in Vergessenheit geratene mythologische Bedeutung des Stirnauges nichts mit der Sage im Übrigen zu tun[7].'

[5] Unless indeed we may suppose that a trace of the ring-throwing subsists in the stone-throwing of Polyphemos (A. B. C.). C. Nyrop *loc. cit.* p. 218 suggests *e contra* that the ring-episode is itself an expansion of the Homeric stone-throwing—a view rejected by Hackman *op. cit.* p. 177 n. 1.

[6] *Id. ib.* pp. 3 ff., 217 f. [7] *Id. ib.* p. 221 (cp. also p. 218).

With this decision I find myself in substantial agreement. I have already urged, not only that the Kyklops' eye stood for the sun in heaven[1], but also that the Kyklops himself was in the far past a sky-god like Zeus[2]. Moreover I have ventured to compare Odysseus, who plunged a heated bar into the Kyklops' eye, with Prometheus, who thrust a torch into the solar wheel[3]. The comparison might be further strengthened. It now appears that an integral part of the Kyklops-tale was the giant's gift to the hero of a magical ring[4]. This recalls the curious legend that Zeus presented Prometheus with a ring fashioned out of his chains[5]. In Germanic belief, too, the one-eyed Wodan possessed a gold ring from which every ninth night dripped eight other rings of equal weight[6]. It is difficult to avoid the conclusion that the golden rings thrown or dropped by the sky-god were at first but a naïve expression for the daily movement of the solar disk. Nevertheless I concur with Hackman's opinion that the mythological significance of these one-eyed beings had passed into oblivion long before Homer told his immortal tale. *A fortiori* it would be fatuous to seek any such hidden meaning in the modern *Märchen*. I append a few samples from Greece and Italy.

Versions from the Greek area are all more or less defective. At most they preserve episode i (*a*) together with its sequel ii (*a*) or ii (*β*). That is the case with a folk-tale from Athens and with another from Kappadokia:

(1) **The Kyklops in a Folk-tale from Athens**[7].

Once upon a time there was a king, whose daughter was so lovely that, if—

'She bade the sun, he would stand still,
The morning star, he 'ld twinkle.'

All the princes were eager to marry her. But she refused each one who proffered his love: only the handsomest of them, who had been blessed by his mother, touched her heart at all. In the end she agreed to wed him who should bring her the golden wand of the Famous Drakos[8]. The Famous[9] Drakos was the strongest and fiercest of all the Drakoi; he had one eye in his forehead, which remained open even when he was asleep, so that none could approach him without being eaten by him. His golden wand, if leant against a door, made it at once fly open. The princes on hearing the terms of betrothal shook with terror. But the handsome prince resolved to obtain the golden wand, or

[9] With his fixed epithet 'Famous' cp. the Homeric Πολύφημος.

die in the attempt. So he took the long road, and walked on till he was tired. He sat down under a tree and fell asleep. When he woke, he saw an old woman sifting flour into a great baking-pan. But the flour dropped on to the ground, not into the pan; for the old woman was blind. The prince sifted the flour for her, put it into her sack, and offered to help her carry it. Pleased with his kindness, she asked what she could do for him in return. He begged her blessing and told her of his quest. 'Listen, my son,' said the old woman: 'thou hast undertaken a hard task, but thy parents' blessing and mine will give thee courage. Go straight along this road to a place where there is much grass, for no man has ever trodden it. Beyond the rising ground to which it leads thou wilt see mountains and ravines; and thence thou wilt descry afar off a great cavern. Draw near; and, if thou hear sounds of snoring, thou wilt know that the Drakos is asleep within. Then remain at a distance till the door of the cavern opens; for he has his flocks inside, and puts in front a great rock, which no man can move. Wait till the Drakos drives out his flock, and then find means to hide thyself in the cavern. When he comes back to sleep and folds his flocks and closes the cavern again, then listen and from the snoring thou wilt know that he is no longer awake. Come down from thy hiding-place and step up to him. Tied to his beard is a golden key. Take these scissors that I give thee, and with them cut the beard and the key together. Then, when he opens the cavern, do thou too go out. Having escaped, take once more the grass-grown road. There thou wilt see a great palace. Lean the key against the door of the palace, and it will open to thee. Upstairs in a great chamber there will be a horse and a dog: before the horse are bones to eat; before the dog is straw. Change them without a word, giving the bones to the dog; and the rest thou wilt learn later from the horse.' The prince thanked the old woman, gave her some sequins, and set off. He found the cavern, but heard no snoring. He peeped in, and no one was there. But, seeing within a great caldron full of milk and a bannock as big as a mill-stone, he cut a piece of the bannock, dipped it in the milk, and ate till his hunger was satisfied. Afterwards he espied a hollow high up in the rock, climbed up, and got in. A little later he heard sheep-bells, and concluded that the Drakos was returning with his flocks. So he drew back in his hiding-place, and prayed God to help him. The Drakos entered, pulled-to the rock that closed the cavern, and sat down to eat; but found that neither the milk nor the bannock satisfied him as usual. Now the old woman had given the prince a powder to throw into the *raki*[1] jar, so that the Drakos might sleep heavily. When, therefore, the Drakos had finished his meal and stirred the fire, he was soon snoring. The prince came softly down, cut the hairs, took the key, and climbed up again into his hiding-place. But, realising that the Drakos, when he found his key gone, would look for it, he got down and took a long pole, sharpened it, put it in the fire and, as soon as it was red-hot, stuck it into the eye of the Drakos. He, being blinded, began to roar. The other Drakoi came running to see what was the matter with their chief. But they could not remove the rock; and, when they heard his cries, they concluded that he was drunk and went home. Then the Drakos pushed away the stone, sat at the mouth of the cave, and began to fondle and let out his sheep one by one. There was one big, woolly, ram; and the prince placed himself on his stomach under the wool, and, while the Drakos was fondling it, managed to get out of the cave. Following the old woman's advice, he found the palace, unlocked its door with his key, and saw upstairs a splendid horse fastened with chains and a fine big dog. He

[1] A spirit made from grapes (ῥάξ, ῥαγίζω) and flavoured with aniseed.

duly gave the horse's pile of bones to the dog and the dog's heap of straw to the horse. Whereupon they both ate, and then began to talk. The prince related his adventures to them. And they informed him that the old woman was the Good Fate, blinded by the other Fates for her goodness and destined never to recover her sight till she found somebody to love and pity her. They further showed him a chamber containing two beautiful captive princesses, whom he was to set free. The youth did so; and the princesses gave him the golden wand as his reward. He next loosed the horse and the dog by leaning the wand against them. Then he led the princesses downstairs, placed them on the horse, and took the dog also. But, as he was leaving the palace, the horse and the dog said: 'Look out of the window and see all those different animals. They were once handsome princes, who went out hunting, found this palace door open, and stepped inside. The Drakos saw them and, sprinkling them with a liquid, transformed them into various animals. Now touch them lightly on their backs with the wand, and they will become as they were before.' The prince did as he was bidden; and the victims of the Drakos, thus restored to human shape, embraced their deliverer and set out for their respective palaces. The prince with the horse and the dog, after locking the Drakos' palace, returned the two princesses to their parents. He also changed the horse and the dog into two princes, who explained that they, in attempting to rescue the princesses of their choice from the Drakos, had been turned into animals by him, but now begged to become the king's sons-in-law. The king bestowed his daughters upon them, and escorted the prince that had saved them all to the door of the princess of whom he was enamoured. She lay dying of grief for his absence, and all the doors of her palace were shut in token of mourning. The prince at once leant the golden wand against each door in turn, reached the princess, and presented her with the wand. The princess embraced him, and they were married with music, drums, and great rejoicings.

(2) **The Kyklops in a Folk-tale from Pharasa in Kappadokia**[1].

'In a time of old there was a priest. He went to find a goat. He went to a village. There was another priest. He said: "Where are you going?" The priest said: "I am going to find a goat." He said: "Let me come too, that I also may get a goat." They rose up. They went to another village. There was there another priest. And the three of them went to another village. They found another priest. They took that priest also (with them). They went on. They became seven priests. Whilst they were on their way to a village, there was a woman. She was collecting wood. There was also a Tepekozis[2]. The Tepekozis hastened (and) seized the seven priests (and) carried them to his house. In the evening he cooked one priest. He ate him. He was fat. He ate him. He got drunk. The six priests rose up. They heated the spit. They drove it into the Tepekozis' eye. They blinded the Tepekozis. They went into the

[1] I am indebted for this tale to the kindness of my friend Prof. R. M. Dawkins, who took it down at Pharasa in the Antitauros district of Kappadokia (July 23–25, 1911) from the mouth of an urchin named Thomâs Stephánou and dictated the above rendering to me (Nov. 21, 1911). The original is in the local dialect of Greek with some admixture of Turkish words. Text and translation in R. M. Dawkins *Modern Greek in Asia Minor* Cambridge 1916 p. 550 f. no. 25 (cp. W. R. Halliday *ib.* p. 217) = Sir J. G. Frazer *loc. cit.* p. 438 f. no. 23.

[2] *Tepe* means 'hill' and here, presumably, 'head.' *Koz* is for *güz*, 'eye.' The name, therefore, appears to be 'Head-eye' or 'Eye-in-head'—a Turkish Kyklops.

stable. The Tepekozis had seven hundred sheep. They entered the stable. They flayed six sheep. They left the heads and the tails (with the skins). They crawled into the skins. In the morning the Tepekozis rose up. He drove out the sheep. He took them by the head and by the tail. He drove out the seven hundred sheep. He shut the doors[1]. He went inside. He looked for the six priests. He could not find them. He found the six sheep killed. The six priests took the seven hundred sheep. They went to their houses. They gave also a hundred sheep to the wife of the priest whom the Tepekozis had eaten. The woman said: "Where is my priest?" They said: "He has stopped behind to make further gains." And the six priests took a hundred sheep apiece. They went to their houses. They ate. They drank. They attained their destinies.'

More often we meet with single episodes of the Kyklops-tale isolated from their proper context and worked into other narratives. For example, episode i (*a*), the blinding of the giant with a red-hot spit or the like, was a thrilling incident suitable to a variety of situations and sure to please. It occurs alone on the Greek mainland:

(3) **The Blinding of the Kyklops in a Folk-tale from Gortynia**[2].

'One of us men in olden days wanted to travel through the whole world. In a certain region he found men who were very tall but had only one eye apiece. The wife of a One-eye, in whose house he lodged, hid him in the evening; for in the daytime her husband was not there—he was a bad character and ate men. When her husband came home and entered the house, he told her that he smelt something; but his wife said it was nothing at all. The One-eye didn't believe her. He got up, groped about, found the man, and wanted to eat him. He put him in his apron along with his supper. But when he tasted his bread, without noticing, for his thoughts were elsewhere, he grasped the man too in the hollow of his hand and thrust him into his mouth. But he stuck in a hole of his tooth, without the tooth getting a real grip on him. After he had pulled him out he let him live, to please his wife, since he was hardly worth eating. But next day he changed his mind and again wanted to eat him. His wife then made her husband drunk, got the stranger out secretly and sent him packing. But, before the wife sent him off, he thrust a big burning coal into the eye of the drunken One-eye and blinded him. And so he punished the bad character, who could no longer see to eat men. When he left, the wife asked his name, and he said: "They call me World-traveller[3]"; for he had seen and learnt much of the world.'

[1] *θύρε*, plural of *θύρι*: cp. *Od.* 9. 240, 313, 340 *θυρεὸν μέγαν*.

[2] Text in N. G. Polites Παραδόσεις Athens 1904 i. 70 f. no. 134 Ὁ μονομάτης, ii. 752 ff. (recorded at Lasta in the deme Mylaon in Gortynia, a district of the Morea). Translation by K. Dieterich in the *Zeitschrift des Vereins für Volkskunde* 1905 xv. 381 = Sir J. G. Frazer *loc. cit.* p. 441 no. 26. I follow Dieterich.

At Arachova on Mt Parnassos the name Μονόματοι (or Μονόματοι) is given to a race of wild and impious men believed to inhabit a foreign land of unknown situation and to have but a single eye in their forehead. The same expression is applied to people, who in character and behaviour resemble these mythical savages (B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 203). For instance, in Akarnania the natives of Xeromeros detest the uncivilised and unsociable mountaineers of Baltos and speak of them as *μονομάται*, 'one-eyed' monsters (L. Heuzey *Le Mont Olympe et l'Acarnanie* Paris 1860 p. 259).

[3] "Μὲ λένε Κοσμοτριγυριστή." Cp. *Od.* 1. 1 ff.

The same *motif* is woven into tales of different texture from Zakynthos and Kypros:

(4) **The Blinding of the Kyklops in a Folk-tale from Zakynthos**[1].

Once upon a time there was a certain king's daughter. Three days after her birth came the Fates, who declared that during the fifteenth year of her life she must hide herself from the sun, on pain of becoming a lizard, falling into the sea, and remaining there for five months. As the destined time drew near, the maid saddened and her father tried to divert his thoughts by travelling. Before he set out on his journey he asked his daughter what he could do for her. She begged him to contract a marriage on her behalf with the Giant of the Mountain[2]. The king then went abroad and reached at last the Giant's town, where he heard say that the Giant meant to marry the fairest maiden in the world. He also made friends with the barber that clipped the Giant's beard and enjoyed the Giant's confidence. The Giant himself proved to be a one-eyed monster, who wore seven veils over his face: he lived with many others of his kind in a hollow mountain, where they dug for treasure and hewed out vast building-stones for their houses. Prompted by the barber, the king claimed to be the Giant's son, and, in proof of his assertion, let the giant strike him with a huge pole: he evaded the blow by receiving it on a big leather bag[3]. He then removed the Giant's veils, and was thanked for his pains. When he broached the subject of his errand, the Giant took him into a chamber apart, showed him many paintings of maidens, and asked whether his daughter resembled any of them. The king replied that these were not worthy even to wash his daughter's feet. The Giant next drew from his breast a miniature, and repeated his question. The king again answered that his daughter's chamber-maid looked like that. So the Giant agreed to wed the king's daughter, if she was as beautiful as her father declared[4]. The king went home and reported his success. His daughter made herself ready, and, in order to avoid the sun-light, came in a litter with her nurse and her nurse's daughter. But, when they were on board ship nearing the coast, the nurse dropped a costly kerchief and begged the princess to have the door of the litter opened that she might recover it. Here-

[1] Text unpublished. Translation (here summarised) in B. Schmidt *Griechische Märchen, Sagen und Volkslieder* Leipzig 1877 pp. 98—104 no. 13 ('Der Riese vom Berge'), 230 f. = Hackman *op. cit.* p. 11 f. no. 3. The tale is a variant of a type first described by R. Köhler in L. Gonzenbach *Sicilianische Märchen* Leipzig 1870 ii. 225 ff. as 'das M. von dem Bruder und seiner schönen Schwester' and later studied in detail by P. Arfert *Das Motiv von der unterschobenen Braut in der internationalen Erzählungsliteratur* Rostock 1897: see J. Bolte—G. Polívka *Anmerkungen zu den Kinder- u. Hausmärchen der Brüder Grimm* Leipzig 1913 i. 79 ff., 1918 iii. 85 ff.

[2] *τὸν γίγαντα τοῦ βουνοῦ*. In Zakynthos giants, with a long beard on their chin and a single eye that sparkles like fire in their forehead, are said to live underground, where they quarry huge stones for building towers and cause the earthquakes that are so frequent in this island. They are the children of a devil and a *Lámnissa* (Lamia) or a witch; and their wives spin yarn with spindles of such monstrous size and weight that once, when the giants made war on a certain king, their wives flung these spindles at the enemy and so slew thousands (B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 200 f.).

[3] For a similar incident see 'The Scab-pate,' a folk-tale from Astypalaia (J. Pio ΝΕΟΕΛΛΗΝΙΚΑ ΠΑΡΑΜΥΘΙΑ *Contes populaires grecs* Copenhague 1879 p. 162 f., E. M. Geldart *Folk-Lore of Modern Greece* London 1884 p. 157).

[4] A similar situation occurs in a folk-tale from Epeiros (J. Pio *op. cit.* p. 17, E. M. Geldart *op. cit.* p. 37 f. 'The Golden Wand').

upon the sun shone in, and the princess, transformed at once into a lizard, fell into the sea. The nurse, having thus gained her end, substituted her own daughter for the princess. The Giant of the Mountain came out to meet them, riding on a high horse, with a sceptre in his right hand and a sword in his left. On opening the litter, he and the father of the bride were equally astonished to find an ugly wench instead of a beautiful princess. But, as the nurse explained that in five months' time the bride would regain her good looks, the Giant received her into his mountain along with her mother, though he punished the king by making him an ostler for a term of five years. The Giant's practice was to leave the mountain at dawn and return to it in the evening. He told his young wife that she might enter all the rooms of his castle except one. Curiosity forced her to enter the forbidden apartment, where she found the mother of the giants. This portentous creature was sitting on a stool, holding in one hand a large stone set in plates of gold and in the other an iron staff. Being able to predict the future, she told the would-be queen that she would live to rue her deceit, since the real princess was yet alive and already on her track. The maid fled and told her mother, who, to secure the death of the princess, informed the Giant that his wife was ill and wished all the fish in the harbour to be burnt before her eyes. This was done; but the princess had already escaped the water and been restored to her former shape. She found her father, who brought her to the Giant. The mother of the giants bade her son treat the nurse's daughter as the nurse's daughter had been minded to treat the princess; and the false bride was accordingly burnt. The Giant then married the princess and sent her father home a free man. Some months later the giant began to ill-treat his wife, because she was more friendly with his mother than he cared to be. The Giant's wife therefore fled on a ship to her former home. The Giant himself followed her, and bribed a goldsmith to shut him in a large golden coffer and sell him as a saint's relic to the king's daughter. The king's daughter bought the coffer, and proceeded to say her prayers before it. But, while thus engaged, she heard a slight noise, *zicki zicki*, and detected the Giant within. She shrieked aloud. Soldiers came up, ran a red-hot spit through the key-hole of the coffer, and so bored out the eye of the Giant inside it[1]. They then took him and struck him on the ankle-bones till he died.

(5) **The Three-eyed Ogre in a Folk-tale from Kypros[2].**

A woodcutter's eldest daughter once married a passing merchant, who gave her a hundred and one keys. She might open a hundred chambers in his house, but not the one over. For all that, she opened it. Looking from its window she saw a ghastly sight. First, a corpse was borne out to burial without friends or mourners. Then, her husband appeared among the tombs, made himself a head as big as a sieve, three eyes, enormously long arms and hideous nails. With

[1] In a folk-tale from Syra (E. M. Geldart *op. cit.* p. 16 f. 'The two brothers and the forty-nine dragons') the hero kills the Drakoi by thrusting red-hot spits through the chests in which they are concealed.

[2] Text in A. Sakellarios Τὰ Κυπριακά Athens 1868 iii. 136 ff. Translation (here condensed) in É. Legrand *Recueil de contes populaires grecs* Paris 1881 pp. xiv, 115—131 'Le Trimmatos ou l'ogre aux trois yeux.' The tale falls under the thirtieth or 'Bluebeard'-*formula* of J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 i. 56, on which see T. F. Crane *Italian Popular Tales* London 1885 p. 77 ff. and J. Bolte—G. Polívka *Anmerkungen zu den Kinder- u. Hausmärchen der Brüder Grimm* Leipzig 1913 i. 13 ff., 370 ff., and especially 398 ff.

these he dug up the dead body and devoured it. At this she fell sick of a fever. Her husband returned, and found reason to suspect her of entering the forbidden room. He transformed himself successively into her mother, her relatives, and her nurse. In this final disguise he induced her to say what she had seen. He then suddenly turned into a Trimmatos or 'Three-eyed' ogre again, and prepared to eat her for not having kept his secret. Kindling a brasier, the flames of which licked the sky, he thrust into it a spit till it became red-hot, and went to fetch his wife. She begged for two hours' respite, slipped out of the window, and besought first a carter and next a camel-driver to hide her from the Trimmatos. The camel-driver took pity on her and concealed her in a bale of cotton. Meantime the ogre had discovered her escape. Starting in pursuit, he soon came up with the carter, who sent him on to the camel-driver. He thrust his glowing spit into each bale belonging to the latter before he was satisfied and took his departure. The spit had wounded his wife's foot. But the camel-driver took her, still in the bale, to the king's palace and told the king her story. The royal physician cured her foot; and she showed such skill in embroidery that the king and queen chose her as their daughter-in-law. She, fearing the vengeance of the ogre, bargained that the wedding should take place at night, that a bridal chamber should be built reached by seven flights of steps, that these steps should be strewn with chick-peas, that two pits should be dug at the bottom of the lowest flight and covered with matting, and that no one should be told a word about it all. Nevertheless the matter came to the ears of the Trimmatos, who, disguised as a merchant, repaired to the palace with negroes in his sacks. His former wife saw through his disguise, and signed to the queen to ask him what wares he had brought. He replied that he had pistachio-nuts, dried apricots, and chestnuts. The bride then said that she was indisposed and would like some of these fruits. The merchant tried to put her off till the morrow; but the king's jester, who was at table, went out to sample the wares and brought back word about the negroes. These were at once put to death. The merchant, however, made his escape. The same night he took the form of a Trimmatos once more, mounted to the bridal chamber, cast the dust of a corpse on the bride-groom to make him sleep soundly, seized the bride and dragged her off to be spitted for his meal. But on the way she gave him a sudden push; he slipped on the chick-peas, and fell into the pit, where he was devoured himself by a lion and a tiger. The bride fainted on the staircase. Next morning the physician brought the happy couple to their senses again; and the subsequent festivities lasted forty days and forty nights.

Again, episode ii (β), the escape of the hero in a sheep-skin, forms part of a wonder-voyage entitled *George and the Storks*, which was related to L. Ross by a native of Psara or Ipsara, an island off the west coast of Chios:

(6) **The Blind Kyklops in a Folk-tale from Psara**[1].

Long, long ago there lived at Therapia near Constantinople a poor sailor, who bade three of his children—Dimitri, Michael, and George—go out into the world and seek their fortunes. So they took service with a captain and made many trips to Marseilles, Leghorn, Trieste, to Smyrna, to Alexandria, and to other Mediterranean ports. After two years they joined the crew of a fine frigate bound on a voyage of discovery. Passing through the Straits of

[1] L. Ross *Erinnerung und Mittheilungen aus Griechenland* Berlin 1863 pp. 279—298 'Georg und die Störche'=O. Hackman *op. cit.* p. 10 f. no. 2=Sir J. G. Frazer *loc. cit.* p. 440 f. no. 25. I abbreviate from Ross.

Gibraltar into the ocean beyond, they were caught by a terrible storm and driven for months before it. Their provisions were spent and they were starving. When one of their company died, the rest cut up, cooked, and ate his body. Then day by day they drew lots to determine who should be killed and eaten. Some ten days had elapsed when the lot fell on George, who had just had a happy dream of reaching shore. He persuaded his shipmates to spare him till the evening, and at midday land was sighted on the horizon. The crew, overjoyed, thanked God and St Nikolaos, and hastily rowed ashore. Here the three brothers got separated from the others, lost their way, and had to spend the night up a tree. The same thing happened on the morrow, and it was not till the morning of the third day that they got out of the wood.

On the plain beyond they saw a magnificent castle. A narrow door led into a wide courtyard, in which they found a great flock of sheep, but no trace of human beings. The castle too seemed quite unoccupied. They passed from room to room till they entered a banqueting-hall, where a feast was set out. Unable to make anybody hear, they at last sat down to eat, when suddenly through the door came a monstrous, misshapen, blind Drakos. In a voice which froze the blood in their veins he cried: 'I smell the flesh of men, I smell the flesh of men!' Pale with terror, they sprang from their seats. But the Drakos, guided by the sound, stretched out his hideous long claws and seized by the neck first Dimitri and then Michael. He dashed them to pieces on the floor. George alone escaped, being nimble, and slipped out into the courtyard. He found the little door fast-closed and the walls too high to climb. What was he to do? Terror suggested a plan. Whether it was that he had heard of the famous hero Odysseus[1], or thought of it now for himself, he drew his sharp seaman's knife, killed the biggest ram in the flock, stripped off its skin, threw the carcase into a well, wrapped himself in the skin, and attempted to creep out on all fours, as if he were a ram. Meantime the Drakos had finished his horrible meal, and came waddling down the marble steps, shouting: 'You shall not escape me, you shall make me a tasty supper!' He crossed the court to the little door, threw it open, and blocked the way with his ungainly body, leaving just room enough for one sheep to pass. Then he called his ewes one by one, milked them, and let them go through. Last came the rams, with George in their midst. He approached with fear and trembling. But the Drakos only stroked his back, praised his size and strength, and set him too at liberty.

Once safely outside, George fled to the nearest wood, wandered about in it, and on the third day reached a wide plain, where there was a large town built round a king's castle. But again all seemed empty and deserted. This time he did not venture into the castle, but lodged in an ordinary house. He had stayed there for rather more than five months, when one day he caught sight of a great army crossing the plain. He fled in alarm to a bakery and hid in the kneading-trough. Here he was discovered on the third day by the baker and taken before the king, by whom he was kindly treated. For six months he lived with the baker and helped in his work. Then one morning the inhabitants all collected on the plain, and the king despatched his people in troops to England, France, Italy, Smyrna, and the Dardanelles. Before George could ask the reason, they all went off towards a broad river at some distance from the town,

[1] It may be thought that this allusion proves the influence of the Homeric narrative. But observe that Odysseus' expedient was *not* that adopted by George. The former clung on beneath a living ram (ii (*α*)), the latter donned the fleece of a dead ram (ii (*β*)).

plunged into it, and emerged on the other side as so many bands of storks! George now woke up to the fact that this was the land of the storks. Six months later he witnessed their return. A whole cloud of them settled on the further bank of the river, dived into it, and came out on the near side as men[1]. He eagerly questioned them about Therapia, and begged the king to send him thither. The king assured him that this was impossible, unless he would consent to become a stork himself. Anxious to revisit his home, George agreed. So, when spring came round, he too dived into the river of transformation, and came out as a fine stork with long red beak, white feathers, and black wings. He flew to Therapia, married a beautiful she-bird, and built his nest on the roof of his father's house. He was so tame that he was soon welcomed in, and picked up crumbs under the low table with his long beak. When his old mother stroked his head and fed him with tit-bits, he chattered his best and made a hundred grotesque gestures to show his love and gratitude. But he could not make his kinsfolk understand that he was their long-lost George. At length he resolved to play a trick upon his sister Kathinko. She had a pair of silver armlets, which she had inherited from her grandmother. Waiting his opportunity, he carried off one of these and hid it in his nest. Kathinko and her mother looked for it in vain; they never thought of the stork. Meantime summer slipped away, and the storks departed—George among them. On reaching the land of the storks he begged the king to contrive his home-coming. So some weeks later the king had a boat built, laden with food, and launched on a river which flowed behind the town. He gave George a sack full of his costliest gems, and let him drift down the strong stream. After some hours the river plunged into a *katabóthra* and flowed for many hundreds of miles through a rocky channel. This must have taken weeks, though George lost count of days and nights in the darkness. At last he saw in the distance a star, which proved to be the daylight at the end of the channel. His boat was swept out into the open, and he saw before him the town of Smyrna; in fact, he found himself on the river[2] which gushes out of the rocks near that town. He went into the town and secured a lodging, but returned to his boat the same evening and fetched his bag of precious stones. Next day he sold a dozen of them to some Jews for two tons of gold. With this he bought fine clothes, a number of necessaries, and a big frigate, in which he sailed for Constantinople. He cast anchor off Therapia, saluted his birthplace by firing a number of guns, and invited on board the elders of the place. They came in their best clothes, and it so chanced that George's old father brought their boat alongside. George welcomed them to his table, but insisted that the old sailor must join their company and gave him a seat next himself. He sent each man away with a handful of gold pieces, and bade them come and feast with him on the morrow, only bargaining that the old sailor should bring his family with him[3]. When the hour arrived, he set wine before them and told them all of his wonderful experiences. 'Among other things,' said he, 'I was once a stork, and that here in Therapia.' At this all laughed and thought it a mere joke. But George proved the truth of his words by bidding a

[1] The metamorphosis of storks into men in return for their filial piety is already noticed by Alexander of Myndos (*c.* 1—50 A.D.) (Ail. *de nat. an.* 3. 23 Ἀλέξανδρος δὲ ὁ Μύνδιός φησιν, ὅταν ἐς γῆρας ἀφίκωνται (*sc.* οἱ πελαργοί), παρελθόντας αὐτοὺς ἐς τὰς Ὠκεανίτιδας νήσους ἀμείβειν τὰ εἴδη ἐς ἀνθρώπου μορφήν, καὶ εὐσεβείας γε τῆς ἐς τοὺς γειναμένους ἆθλον τοῦτο ἴσχειν, κ.τ.λ. See further D'Arcy W. Thompson *A Glossary of Greek Birds* Oxford 1895 p. 129 and O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 196 f.

[2] The river Meles.

[3] Perhaps a reminiscence of Gen. 42. 14 ff.

servant mount the old sailor's roof and fetch thence the armlet hidden in a stork's nest. He did so, and Kathinka recognised her trinket. Hereupon the old mother would have died of surprise, had she not been kept alive by joy at the recovery of her son. George settled in Therapia, built a fine house there, and maintained his parents in plenty. He endowed his sisters well and married them to honest men. He put up monuments to his luckless brothers and gave a donation to a church for masses to be said on their behalf. His descendants are well-to-do folk still living at Therapia and in the neighbourhood.

Lastly, episode iv, the name-trick, is the main feature of *The Three Thieves*, a very much transmogrified tale from Lesbos :

(7) **The Name-trick in a Folk-tale from Lesbos**[1].

'Once there was a good man whose fortune was in the sun[2]. He went out on the hill, and saw three thieves who had killed a goat. They told him to cook it. Well, as they say, "a thief among thieves, and a liar among liars[3]"; so he nodded without speaking, and did as he was bid. They asked him his name, and he said 'Απατός—"Mr Self." When he had cooked the goat, he beat the three thieves soundly with the spit[4], and they ran off howling. People asked them who did it? "Self!" said they, and got laughed at for their pains.'

An Albanian version, recorded at Piana de' Greci near Palermo, recognises two Kyklopes and gives each of them two pairs of eyes :

(8) **The Kyklopes in an Albanian Folk-tale**[5].

'Once on a time there were two men travelling. Night fell upon them by the way, and it rained and thundered. Poor fellows, just think what a plight they were in! They saw a light far off and said, "Let's go and see if we can pass the night where that light is." And they went and came to the cave, for a cave it was where the light shone. They went in and saw that there were sheep and rams and two Cyclopes[6], who had two eyes in front and two behind. The Cyclopes saw them come in and said one to the other, "Go to, here we have got something to eat." And they proposed to eat the two men. The poor fellows stayed there two days; then the Cyclopes felt the back of their necks and said, "Good! We'll eat one of them to-morrow." Meantime they made them eat to fatten them. For in the evening they would take a sheep and a ram, roast them on spits over the fire, and compel the poor wretches to devour them, entrails and all, just to fatten them. And every now and then they would feel the back of their necks, and one would say to the other, "They're getting on very well!" But the two men said to each other by words or signs, "Let us see whether we can escape." Now, as I said, two days passed, and on the second day the Cyclopes fell asleep and slumbered with all their eyes open. Nevertheless, when the two men saw the Cyclopes sleeping, they took the spits on which the sheep had been roasted, and they heated them in the fire. Then they took rams' skins

[1] Reported by W. H. D. Rouse in *Folk-Lore* 1896 vii. 154 f. = O. Hackman *op. cit.* p. 107 no. 125.

[2] *ἡ τύχη του ἦτο 'ς τὸν ἥλιον*, *i.e.* he had no means of subsistence.

[3] *κλέφτης μὲ τοὺς κλέφταις, καὶ ψεύτης μὲ τοὺς ψεύταις*, *i.e.* do at Rome as the Romans do.

[4] An attentuated form of episode i (*a*).

[5] D. Comparetti *Novelline popolari Italiane* Torino 1875 pp. 308—310 no. 70 = O. Hackman *op. cit.* p. 12 f. no. 4 = Sir J. G. Frazer *loc. cit.* p. 441 f. no. 27. I transcribe Frazer's rendering.

[6] O. Hackman *op. cit.* p. 13 takes *ciclopi* to be a popular, not a learned, appellation : he cites *ciropiddhu* as a dialect form from Messina (*ib.* p. 16 no. 9 and p. 169).

and clothed themselves in them, and going down on all fours they walked about in the rams' skins. Meanwhile the spits were heated, and each of the men took two, and going softly up to the sleeping Cyclopes, they jabbed the hot spits into their eyes. After that, they went down on all fours like sheep. The Cyclopes awoke blind, and gave themselves up for lost. But they took their stand at the door, each at a doorpost, just as they were, with all the spits sticking in their eyes. They let out all the sheep that were in the cave, saying, "The sheep will go out, and the men will stay in," and they felt the fleeces of the sheep to see whether the men were going out too. But the men had the sheep-skins on their backs, and they went on all fours, and when the Cyclopes felt them, they thought they were sheep. So the men escaped with their life, and when they were some way off, they put off the skins. Either the Cyclopes died or they know themselves what they did. That is the end of the story.'

A Sicilian tale from Erice, which G. Pitrè had from the lips of a girl only eight years old, contains the same two episodes—i (*α*), the blinding of the giant by means of a hot poker, and ii (*β*), the escape of the hero by putting on a sheep-skin :

(9) **The Kyklops in a Sicilian Folk-tale**[1].

'A couple of monks, one big, the other little, were once off on their yearly round, begging for the church, when they lost their way. However, they pushed on and came to a large cave, where a strange creature, a devil if they had but known it, was engaged in making a fire. Hoping to obtain shelter for the night, they entered the cave, and found the monster killing a sheep and roasting it. He had already killed and roasted a score of them, for he kept sheep in his cave. The monster bade the monks eat. At first they refused, saying that they were not hungry. But he forced them to fall to and finish the meal. They then went to bed. The monster took an enormous rock and placed it in front of the cave. Next he seized a huge iron poker with a sharp point, heated it, and thrust it through the neck of the bigger monk. He roasted the body, and asked his companion whether he would help eat it. The little monk said that he would not, because he was already full. The monster thereupon threatened to murder him, unless he would get up and eat. So in sheer terror he sprang up, sat at the table, and took a tiny morsel, but at once cast it on the floor. "Maria!" he cried, "I'm full, I am indeed!" In the course of the night the good man himself got hold of the poker, heated it, and stuck it into the monster's eyes, which gushed out of his head. The monster cried out in pain ; and the monk in alarm slipped on a sheep-skin. Afterwards the monster, feeling his way to the mouth of the cave, raised the stone by which it was shut, and let his sheep out one by one. The monk made his escape among them, and got away to the coast at Trapani, where he told his story to some fishermen. Finally, the monster went fishing, but, being blind, fell over a rock and broke his skull. The sea grew red with his blood. Thus the young man went off, while the monster stayed there.'

Italian versions of the tale, as compared with Greek, are at once more numerous and less defective—a fact which suggests that the original centre of diffusion was Italy rather than Greece. Examples from the Abruzzo and from

[1] G. Pitrè *Fiabe novelle e racconti popolari siciliani* Palermo 1875 i (=*Biblioteca delle tradizioni popolari siciliane* iv) p. lxxxviii ff., ii. 1 ff. no. 51 'Lu munacheddu' (for the dialect see A. Traina *Nuovo vocabolario siciliano-italiano* Palermo 1868)=T. F. Crane *Italian Popular Tales* London 1885 pp. 89 f., 345 n. 31=O. Hackman *op. cit.* p. 15 no. 8=Sir J. G. Frazer *loc. cit.* p. 437 f. no. 22. I translate from Pitrè.

the neighbourhood of Rome contain, not only episodes i (*a*), the blinding, and ii (*β*), the escape, but also iii, the *motif* of the magical ring :

(10) **The Kyklops in a Folk-tale from Roccàscalegna in the Abruzzo**[1].

'Four and twenty school-boys once went out for a walk. When they had gone a good distance, night came on. "We had better return," said the youngest of them, "or our master will scold us." "No," cried all the rest, "let us go to yonder inn." They did so, and knocked at the door. A voice from within asked : "Who is it?" "Friends," they replied. "I'm so glad you've come!" said Eye-on-forehead. He then made them enter and set about cooking a sheep in a caldron without skinning it first. The boys, disgusted, would not eat. Next day Eye-on-forehead seized a boy, and set about cooking him in the caldron ; but the others would not eat him either. One by one Eye-on-forehead ate them all. Only one was left, the shrewdest of them all, and he said to Eye-on-forehead : "Why do you eat human flesh?" And Eye-on-forehead answered him : "Out of spite, because I've only one eye." "Then," continued the school-boy, "if I grow you another eye[2], will you let me go free?" "Yes," replied Eye-on-forehead. Thereupon the boy made the spit red-hot on the hearth, and said to Eye-on-forehead : "Shut your eye." He took that spit and drove it into the eye till it came out the other side. Eye-on-forehead was furious and wanted to eat him ; but how could he see where the rascal was standing? Every day he used to send his sheep out to pasture, and seated himself in the door-way so as to prevent the boy from getting past ; and he felt each sheep as it went by him. One day the boy dropped into the pen, skinned a sheep, put on its fleece and tried walking on all fours. When the time for pasture had come, Eye-on-forehead, thinking he was a sheep, sent him out. Once outside, the boy began to shout : "I'm out! I'm out!" Eye-on-forehead, thus informed, took and flung a ring. This ring went straight on to the finger of the boy and he could not stir from where he stood. What could he do? Eye-on-forehead, groping round, was like to catch him again. But an idea struck him : he would cut off the finger, on which that cursed ring was ; and so he did. Having cut it off, he began to hurry away. Eye-on-forehead found the finger, ate it, and said to the boy as he ran : "So you didn't want me to eat your flesh? But for all that I've had a taste of it!" The boy got back home and told his mother all about it.'

(11) **The Kyklops in a Folk-tale from the vicinity of Rome**[3].

A master was travelling with his servant through a wide wood. They came to a great cavern, where dwelt the Occhiaro ('Bright-eye'), a monster with only

[1] G. Finamore *Tradizioni popolari Abruzzesi* Lanciano 1882 i (Novelle) 190 f. no. 38 'Lu fatte dell' uocchie-'n-frónde'=O. Hackman *op. cit.* p. 17 no. 10. I translate from Finamore. For a very similar version (i (*a*)+ii (*β*)+iii), likewise from the Abruzzo, see A. de Nino *'Usi e costumi Abruzzesi* Firenze 1883 iii (Fiabe) 305—307=Sir J. G. Frazer *loc. cit.* p. 416 ff. no. 7.

[2] Episode i (*a*) is here crossed by episode i (*β*), the southern by the northern form (*supra* p. 988). The same contamination is found in a variant from Vasto in the Abruzzo (G. Finamore *Tradizioni popolari Abruzzesi* Lanciano 1886 ii (Novelle) 57 f. no. 68 'La favulette dell' ucchie-'m-brande'=O. Hackman *op. cit.* p. 17 f. no. 11). Episode i (*β*) takes the place of i (*a*) in a version recorded at Pisa (D. Comparetti (*Novelline popolari Italiane* Torino 1875 pp. 192—195 no. 44 'Il Fiorentino'=O. Hackman *op. cit.* p. 18 f. no. 12=Sir J. G. Frazer *loc. cit.* p. 418 f. no. 8).

[3] C. Nyrop 'Sagnet om Odysseus og Polyphem' in the *Nordisk Tidskrift for Filologi* 1881 v. 239—240=O. Hackman *op. cit.* p. 13 f. no. 5. I translate from Hackman.

one big brilliant eye. The Occhiaro closed the cavern with a great stone, and then slaughtered the servant and ate him up. After that he lay down and went to sleep. The master drew his sword, plunged it into the Occhiaro's eye, and so blinded him. The Occhiaro howled till the cavern rang again. In the night the man slaughtered a sheep and wrapped himself in its skin. Next morning the Occhiaro let the sheep out of the cavern one by one and felt them as he did it. The man in the sheep-skin luckily got out and then mocked at the Occhiaro. He flung him a ring, with which to make himself invisible. The man stuck the ring on his finger. Thereupon the Occhiaro cried : ' Hold fast, ring, till I come.' The man could no longer stir from the spot ; so he chopped the finger off with his sword and made his escape.

To pursue the subject beyond the limits of Greece and Italy would be beside my purpose. But it must of course be borne in mind that the variants noted in classical lands are essentially similar to those collected from the rest of Europe. A single specimen will suffice to make this clear, and may at the same time show how such a tale, drifting along the current of popular mouth-to-mouth transmission, may attach itself to some landmark or salient feature of the countryside and become fixed as a local legend with names of persons and places all complete.

(12) The Kyklops in an English Folk-tale.

In 1879 S. Baring-Gould contributed the following paragraph to W. Henderson's *Folk-Lore of the Northern Counties*[1] : 'At Dalton, near Thirsk, in Yorkshire, is a mill. It has quite recently been rebuilt, but when I was at Dalton, six years ago, the old building stood. In front of the house was a long mound, which went by the name of "the giant's grave[2]," and in the mill was shown a long blade of iron something like a scythe-blade, but not curved, which was said to have been the giant's knife[3]. A curious story was told of this knife. There lived a giant at this mill, and he ground men's bones to make his bread. One day he captured a lad on Pilmoor, and instead of grinding him in the mill he kept him as his servant and never let him get away. Jack served the giant many years and never was allowed a holiday. At last he could bear it no longer. Topcliffe fair was coming on, and the lad entreated that he might be allowed to go there to see the lasses and buy some spice. The giant surlily refused leave ; Jack resolved to take it. The day was hot, and after dinner the giant lay down in the mill with his head on a sack and dozed. He had been eating in the mill and had laid down a great loaf of bone bread by his side, and the knife was in his hand, but his fingers relaxed their hold of it in sleep. Jack seized the moment, drew the knife away, and holding it with both hands drove the blade into the single eye of the giant, who woke with a howl of agony, and starting up

[1] W. Henderson *Notes on the Folk-Lore of the Northern Counties of England and the Borders* London 1879 p. 194 f., S. Baring-Gould 'The Giant of New Mills, Sessay' [Dalton is in the parish of Sessay] in *Folk-Lore* 1890 i. 130=O. Hackman *op. cit.* p. 33 no. 28=Sir J. G. Frazer *loc. cit.* p. 430 f. no. 18.

[2] S. Baring-Gould in W. Henderson *op. cit.* p. 196 n. adds: 'I am told by one of our servants from Dalton that at the rebuilding of the farm the mound was opened, and a stone coffin found in it; but whether this be a kistvaen or a mediæval sarcophagus I cannot tell.'

[3] *Id.* in *Folk-Lore loc. cit.* says further: 'in the mill was shown...the giant's...stone porridge-basin or lather-dish.'

barred the door. Jack was again in difficulties, but he soon found a way out of them. The giant had a favourite dog which had also been sleeping when his master was blinded. Jack killed the dog, skinned it, and throwing the hide over his back ran on all fours barking between the legs of the giant, and so escaped.'

APPENDIX F.

THE DIOSKOUROI AND HELENE IN MODERN FOLK-TALES.

Attention may here be called to a group of modern Greek and Italian folk-tales, which are related to the myth of the Dioskouroi, as I shall presently point out. The group was first recognised as such by that excellent investigator J. G. von Hahn, who included it under his fourth or 'expulsion' *formula*, though he failed fully to perceive its affinity with classical myths[1].

(α) Sun, Moon, and Star in a Folk-tale from Greece.

(1) A good example of the group in question is the modern Greek story of the *Tzitzinaina*, which runs as follows[2]. An old woman once had three daughters, poor and hard-working girls. The eldest said: 'If I had for husband the king's pastry-man, I should eat cake.' The second said: 'If I had his cook, I should taste all the royal dishes.' The third said: 'I would like the king himself. Then I should have all his treasures, and should bear him three children, Sun, Moon, and Star.' It so chanced that the king overheard them talking and granted their several desires. But when the third sister became queen, she was hated by the king's mother. She was about to bring forth Sun, when the king was called off to a war and entrusted her to his mother. This cruel woman bade the midwife put the new-born babe in a box, fling it into the sea, and place a puppy dog instead beside the queen. The same sorry scene was enacted a second and a third time. A cat was substituted for Moon, and a snake for Star, the children being each in turn sent adrift on the sea. The king, disappointed and angry, walled up the queen in the jakes. The children one after the other were washed up at the foot of a mountain, on which dwelt a hermit. He cared for them till they were grown and then sent the two brothers Sun and Moon with their sister Star to the neighbouring town. Meantime the midwife had learnt of the children's escape and, wishing to destroy them, sought out Star and told her that she was beautiful but might be more so, if only she possessed the golden apple kept by forty dragons in a garden. Sun, who had been out to the bazar and bought of a Jew a mysterious box, now opened it, found inside a green winged horse and set out upon him to get the golden apple. The horse caused a flash of lightning and a clap of thunder, under cover of which Sun secured the apple and brought it back to Star. Again the midwife passed by and told Star that she needed, to make her more beautiful still, the golden bough on which all the birds of the world met to sing. Sun remounted his horse, which, as before, promised to lighten and thunder and advised

[1] J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 i. 46, T. F. Crane *Italian Popular Tales* London 1885 pp. 17, 325. On the 'expulsion' *formula* see *infra* p. 1012.

[2] Text by G. Ch. B. in the Νεοελληνικὰ ἀνάλεκτα Athens 1871 i. 17 ff., French translation by É. Legrand *Recueil de contes populaires grecs* Paris 1881 pp. 77—93. I have condensed Legrand's version.

his master to take a hatchet to cut a branch from the tree. Sun did so, and returned in safety with the golden bough. Once more the midwife passed by, and this time suggested that Star, to perfect her beauty, needed the Tzitzinaina, who knew the language of the birds and could explain their song. But to obtain the Tzitzinaina proved a harder task. For, when Sun and his horse reached her house and thrice summoned her to come forth, she turned them both into marble, first up to the knees, next up to the thighs, and then up to the waist. At this crisis the young man remembered that he had about him some hairs from the beard of the hermit, which he was to burn if ever he required assistance. He burnt one now. The hermit appeared, and bade the Tzitzinaina restore to life all those whom she had petrified. She sprinkled them with water of immortality and so recovered them. Among the rescued was Moon, whom his brother and sister had lost. The hermit now made the Tzitzinaina act as their mother. She explained to them the language of the birds and everything else that they wanted to know. One day the king met them out and asked them to dine with him on the morrow. The Tzitzinaina told them to take a puppy with them and give it a slice. They did so, and the puppy died. The young folk protested that they had no wish to be poisoned, and invited the king to dine with them on the next day. The Tzitzinaina, when the king sat down to their empty table, clapped her hands thrice and a grand meal appeared. After dinner the king asked Sun, Moon, and Star what they wished for most. They, instructed by the Tzitzinaina, craved the release of the woman hidden in the jakes. She was brought out, washed, clothed, and presented to the king by the Tzitzinaina, who told him all the facts. Thereupon the king in high delight took back his queen to the palace. But the king's mother and the midwife were fastened to four horses, which dragged them along the road and, on being lashed, tore them asunder.

(β) Sun, Moon, and Morning-Star in a Folk-tale from Syra.

(2) A Greek tale from Syra is very similar[1]. A poor old couple once had three hard-working daughters. The eldest of them wished that she had for husband the king's cook: then she would eat of the good things on his table. The next wished for the king's treasurer: then she would have plenty of money. The youngest, for the king himself: then she would bear him three children, Sun, Moon, and Morning-star. The prince[2] overheard them wishing, granted their desires, and married the youngest of them, much against his mother's will. When the young queen was about to bear the children, her mother-in-law bade the midwife substitute a dog, a cat, and a mouse for them, and fling the three children into the river. But the midwife had pity on the little brats and laid them down on a bed of rushes. Here a childless herdsman found them fed by one of his goats. He brought them to his wife, who tended them carefully; and, when they were grown up, he built them a tower to live in. As for the queen, at the time of her confinement the king was absent on a campaign. So his mother put her in the hen-house, and told him on his return that his wife, instead of Sun, Moon, and Morning-star, had given birth to a dog, a cat, and a mouse. The king was so upset that he did not ask what had become of the queen. For long he was inconsolable. At last one day he roused himself, went for a ride, and saw Sun and Morning-star exercising their horses near the tower and Moon watching them from a window. He thought the young folk just like those whom his wife had

[1] Text unpublished, German translation by J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 40 ff. I have condensed the version of von Hahn.

[2] In the sequel he is called king.

promised to bear, and that night he told his mother about them. She taxed the midwife with neglecting her orders. So the midwife went off, obtained by guile an entrance into the tower, and told Moon that she was indeed beautiful, but that she needed one thing to complete her happiness—the branch that makes music. Her brothers Sun and Morning-star consented to get it. They set off, and met a monk, who told them all about it. It was kept by two dragons, who would swallow them if they approached by day, but who snored with open mouth at midnight and might then be shot. The young men followed the monk's directions, shot the dragons, broke off the branch, and brought it back to their sister. The king, who on his rides past the tower had missed them, now told his mother of their return. She again sent the midwife, who paid a second visit to the tower. The girl Moon showed her a tree outside the house, which had grown apace from the planted branch making music continually and producing every morning a dishful of precious stones. The midwife, duly astonished, said that she still needed a mirror showing all towns, villages, lands, and princes. The brothers went off to seek it, and again met the monk. He told them that it was guarded by forty dragons, who by day kept watch, twenty on one side, twenty on the other, and by night slept in a row. About midnight they snored so loud that the mountains re-echoed. The brothers must then tread across their bodies with the greatest care. This they did, and brought the mirror to their sister. The king again noticed their absence and their return. He told his mother. She sent the midwife once more, who said to Moon that the only thing now lacking was the bird Dikjeretto: he understood all languages and by looking in the mirror would be able to tell her what people were saying all the world over. The brothers suspected that this quest would be the death of them. So they gave their sister two shirts, which she was to look at daily: if the shirts turned black, she would know that they had failed. This time, when they met the monk, he refused to help them. However, they pressed on, and the bird by his glance turned first one and then the other into stone. Moon knew of the disaster because the two shirts turned as black as coal. In her grief she set out on horseback to die with her brothers. The monk met her, had compassion on her, and explained that many a prince had failed in this enterprise because they had made the attempt in their clothes. She must strip herself of everything, attack the bird from behind before he was aware of her presence through the rustling of her clothes, and so grasp him by the feet. She did as she was bidden, caught the bird, and asked him where her brothers were. He showed her where they stood, and pointed out a mountain which opened at midday and contained a spring: if she were quick enough, she might slip in and get the water of life from the spring; if not, the mountain would close upon her, and they would be ruined. The maiden with the bird on her hand performed the feat with the utmost speed; but even so the mountain as it closed caught a piece of her clothing, and she had to draw her sword and cut it off. She sprinkled her brothers with the water, and they awoke as from a deep sleep. All who had been petrified on the spot were now in turn sprinkled and accompanied the happy party back to the tower, where the herdsman overjoyed at the return of his fosterlings slew forty lambs and poured out wine in abundance: the feasting lasted three days and three nights. The king, hearing of it, went out to see whether the children were there. They showed him the greatest respect, and he invited them to be his guests on the following Sunday. The bird told the young people to take him too along with them, adding that the king was their father. At the royal table both the king's mother and the midwife were present, when the bird from his cage revealed the whole tale. The king sprang up and kissed

his children. His wife was fetched from the hen-house, clad in queenly garments, and brought to her children Sun, Moon, and Morning-star. The midwife had her head cut off; and the king's mother was banished from the palace.

(γ) Morning-Star and Evening-Star in a Folk-tale from Epeiros.

(3) A tale from the village of Çagori in Epeiros has some variations of interest[1]. Three sisters once sat on a balcony near the king's castle. The eldest said: 'I wish I sat at the king's table; how I should relish it!' The second said: 'I wish I were in the king's treasury; how I should help myself to money!' The youngest said: 'I wish I were married to the prince; I would bear him a boy and a girl as beautiful as the morning-star and the evening-star[2].' The prince overheard them wishing and granted all their wishes. But, when his young wife was about to be delivered of the children, he had to go off to a war. He entrusted her, therefore, to his mother. She, however, as soon as the little ones were born, put them in a basket and bade the midwife fling it into the river. She also slipped a dog and a cat into the cradle. When the poor wife wanted to see her offspring, she was dismayed indeed at their appearance. The prince now returned victorious from the war, but was so shocked at the news with which he was greeted that for three days he was speechless. Then he gave orders that his wife, who could deny nothing, should be walled up at the entrance of his castle so that only her head showed, and that every one who passed by should spit at her and strike her in the face. Meantime the basket in which the children lay floated to the house of certain dragons, who pulled it out of the water. They kept the children till the age of ten, then put them on a lame horse, and left them in the streets of the town to their fate. People wanted to know where they came from; and the children replied that they themselves did not know. At last the lame nag brought them to the house of a poor old woman, who out of pity took them in. Next morning she was astonished to find a handful of gold coins on the spot where the children had slept. The same thing occurred every morning, and she and they lived happily on the money. One day the king came by and noticed the morning-star on the face of the boy and the evening-star on that of the girl. He sighed and thought of the children that his wife had promised him. Indeed, he became so fond of these two that he brought them into his palace, hunted with them, and would never be without them. But his mother at once perceived who they were, and consulted with the midwife how best to get rid of them. The midwife came to the girl and said: 'You are a beautiful maiden, but you would be more beautiful still, if your brother had the winged horse of the plain.' The brother readily promised to go in quest of it. He rode forth and met an old woman, who told him of a plain near by so large that it took a man six days to cross it, though the winged horse was across it in one. The said horse ate men and beasts. If he would capture it, he must hide behind the thicket by the spring from which it drank, and at the moment when it stooped its head in drinking must leap on to its back and never dismount till it swore by its brother to serve him. The lad carried out her advice to the letter. The horse swore to serve him by its head—by its tail—by its saddle—by its foot—and lastly by its brother. The boy then dismounted, put a bridle on it, and brought it back to his

[1] Text unpublished, German translation by J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 287 ff. As before, I have condensed from von Hahn.

[2] πούλια (*sic*) is the original word, according to von Hahn. But N. Contopoulos *Greek-English Lexicon*[5] Athens 1903 makes πούλια, -ας, mean 'the pleiades, the seven stars in the constellation Taurus.'

sister. The king was so pleased at his success that he gave him a small kingdom. But the grandmother again plotted with the nurse for his destruction. The nurse went a second time to the girl and said: 'You are beautiful, sweetheart, but you would be more beautiful still, if you had the Beauty of the Land.' The brother set out to get her without delay. The Beauty of the Land was a woman beautiful beyond compare, who lived on the far side of a river. Whoever wanted to carry her off had to traverse the dry bed of the river: his horse must there whinny aloud, and, if she heard it whinnying, he would be able to ride through, but, if she heard it not, he and his horse would there and then be turned into stone. When the lad came to the dried up river, he bade the winged horse whinny his loudest. The horse did so, but the Beauty of the Land heard nothing. 'We are lost!' cried the horse. 'Courage!' said the lad, 'whinny once more.' This time the Beauty of the Land heard and answered. The lad rode over and carried her off; and, as they crossed the dry river-bed, a number of people who were petrified there came to life again and escorted them home, remaining with them till the marriage between the young man and the Beauty of the Land was celebrated. The king was greatly delighted at all this. But the king's mother plotted once again with the nurse to poison the young people. Soon afterwards the king invited them to a feast. Before they went, the Beauty of the Land revealed everything to her husband, counseling him not to strike in the face the poor walled up woman who was his own mother and at table to eat only of those dishes of which she herself ate. When the bride, the bridegroom, and the bridegroom's sister ate only of the dishes set before the king, the king pressed them to eat of others also. They told him that the rest were poisoned. He hurled the whole meal out of the window with his own hand and ordered another. Afterwards the Beauty of the Land begged him to send for the walled up woman. On her arrival the three young folk stood up and kissed her. The Beauty of the Land told the whole tale to the king, who embraced his children and his wife. But he had his mother and the midwife each bound to four horses and torn into quarters.

(δ) **Three Golden Children in a Folk-tale from Euboia.**

(4) A variant hails from Hagia Anna, a small town in the north-east of Euboia[1]. The third sister said: 'I would bear the prince three golden children.' She oore a golden child, while her husband was on a campaign; but the cruel mother-in-law flung it into the hen-house and substituted for it a small dog. When her son returned and asked after the child that his wife had borne, she replied: 'What is to be done? She is a dog and a dog she has borne.' And the prince made answer: 'Dog though it be, it will watch my house.' The second child she flung into the hen-house and replaced by a cat; and the prince on his return was told of it and replied: 'Cat though it be, it will clear my house of mice.' For the third child she substituted a snake. Then the prince came back and gave orders that his wife should be flung into the hen-house. There the mother-in-law, who did not want her to die of hunger, brought her food in secret. When the boys had grown up, one day the king bade his heralds summon all his people to assemble before his castle. The boys heard of it, broke their way out of the hen-house and went to the assembly. The king noticed them, and was so pleased with them that he wanted to take them into his castle. But they said that they could not come without their mother; and, when the king asked 'Who is your mother?,' they replied 'She is the woman whom you shut up in the hen-house'

[1] Text unpublished, German summary by J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 291 f. I translate from von Hahn.

and told him all that had happened. Thereupon he brought his wife out of the hen-house, but had his mother bound to two vicious mules and torn asunder by them.

(e) Two Sons with Apples and a Daughter with a Star in a Folk-tale from Sicily.

(5) A Sicilian parallel to the foregoing tales is entitled *The Herb-gatherer's Daughters*[1]. A herb-gatherer died and left three daughters alone in the world. The eldest said: 'If I were the wife of the royal butler, I would give the whole court to drink out of one glass of water, and there would be some left.' The second said: 'If I were the wife of the keeper of the royal wardrobe, with one piece of cloth I would clothe all the attendants, and have some left.' The youngest said: 'Were I the king's wife, I would bear him three children—two sons with apples in their hands, and a daughter with a star on her brow.' The king happened to overhear them talking and sent for them next morning. The eldest and the second sister made good their promises and received in marriage the royal butler and the keeper of the royal wardrobe. The youngest became queen on condition that, if she failed to bear two sons with apples in their hands and a daughter with a star on her brow, she should be put to death. A few months before the queen's children were born the king went on a campaign. When they were born as she had foretold, the two elder sisters, jealous of her lot, bribed the nurse to substitute little dogs for them and sent word to the king that his wife had given birth to three puppies. He wrote back that she should be taken care of for two weeks and then put into a tread-mill. Meanwhile the nurse carried the babies out of doors and left them for the dogs to eat. Three fairies passed by, admired them, and gave them three gifts—a deer to nurse them, a purse always full of money, and a ring that would change colour when any misfortune befell one of them. The deer nursed the children till they were grown up. Then the fairy that had given the deer came and said: 'Now that you have grown up, how can you stay here any longer?' 'Very well,' said one of the brothers, 'I will go to the city and hire a house.' 'Take care,' said the deer, 'that you hire one opposite the royal palace.' So they all went to the city and hired a palace as directed. The aunts, seeing the apples in the hands of the boys and the star on the brow of the girl, recognised them at once and told the nurse. The nurse visited the girl and said that, to be really happy, she needed the Dancing Water. One of the brothers rode off to get it. On the way he met a hermit, who said: 'You are going to your death, my son; but keep on until you find a hermit older than I.' He met another hermit, who gave him the same direction. He met a third hermit older than the other two, who said: 'You must climb yonder mountain. On the top of it you will find a great plain and a house with a beautiful gate. Before the gate you will see four giants with swords in their hands. When the giants have their eyes closed, do not enter; when they have their eyes open, enter. Then you will come to a door. If you find it open, do not enter; if you find it shut, push it open and enter. Then you will find four lions. When they have their eyes shut, do not enter; when their eyes are open, enter, and you will see the Dancing Water.' The lad followed these instructions, filled his bottles with the Dancing Water, and returned in safety to his sister. They had two

[1] G. Pitrè *Fiabe novelle e racconti popolari siciliani* Palermo 1875 i (=*Biblioteca delle tradizioni popolari siciliane* iv) 316 ff. no. 36 'Li figghi di lu Cavuliciddaru' (Palermo). There is a slightly condensed translation of this tale in T. F. Crane *Italian popular tales* London 1885 p. 17 ff. I have abbreviated T. F. Crane's version.

golden basons made, and the Dancing Water leaped from one to the other. Again the aunts told the nurse, and again the nurse visited the girl and said that now she wanted the Singing Apple. The same brother rode off to get it. After a time he met the first hermit, who sent him to an older one, <who sent him to an older one still>. He said: 'Climb the mountain; beware of the giants, the door, and the lions; then you will find a little door and a pair of shears in it; if the shears are open, enter; if closed, do not risk it.' The lad did so, and found everything favourable. When he saw the shears open, he went into a room and saw a wonderful tree, on the top of which was an apple. He climbed up and tried to pick the apple, but the top of the tree swayed now this way, now that. He waited until it was still a moment, seized the branch, and picked the apple. He got away in safety and, as he rode home, the apple kept making a sound. Once more the aunts told the nurse, and once more the nurse visited the girl and said that, should she set eyes on the Speaking Bird, there would be nothing left for her to see. The same brother undertook the quest. As before, he met the first hermit, who sent him to the second, who sent him to the third, who said: 'Climb the mountain and enter the palace. You will find many statues. Then you will come to a garden, in the midst of which is a fountain, and on the bason is the Speaking Bird. If it should say anything to you, do not answer. Pick a feather from the bird's wing, dip it into a jar that you will find there, and anoint all the statues. Keep your eyes open, and all will go well.' The lad soon found the garden and the bird. But, when the bird exclaimed 'Your mother has been sent to the tread-mill,' 'My mother in the tread-mill?' he cried, and straightway became a statue like all the rest. In the meantime his sister at home looked at her ring and saw that it had changed its colour to blue. So she sent the second brother after the first. Everything happened to him in the same way. He too met the hermits, found the palace, saw the garden with the statues, and heard the Speaking Bird. And, when the bird said 'What has become of your brother? Your mother has been sent to the tread-mill,' he too cried out 'Alas, my mother in the tread-mill!' and became a statue. The sister now looked at her ring again, and it was black. Thereupon she dressed herself like a page and set out. She met the hermits and received their instructions. The third ended by saying: 'Beware, for, if you answer when the bird speaks, you will lose your life.' When she reached the garden, the bird exclaimed: 'Ah! you here, too? Now you will meet the same fate as your brothers. Do you see them? One, two, and you make three. Your father is at the war. Your mother is in the tread-mill. Your aunts are rejoicing.' She made no answer, but caught it, pulled a feather from its wing, dipped it into the jar, and anointed her brothers' nostrils. The brothers at once came to life again. Then she did the same to all the other statues, the lions, and the giants: all were restored to life. After that she departed with her brothers; and all the noblemen, princes, barons, and kings' sons rejoiced greatly. When they had recovered their life, the palace disappeared; and so did the hermits, for they were the three fairies. On reaching the city they had a gold chain made for the bird; and, the next time that the aunts looked out, they saw in the window of the palace opposite the Dancing Water, the Singing Apple, and the Speaking Bird. 'Well,' said they, 'the real trouble is coming now!' At length the king returned from the war and noticed the palace opposite equipped more magnificently than his own. When he saw the brothers with apples in their hands and the sister with a star on her brow, he cried: 'Gracious! If I did not know that my wife had given birth to three puppies, I should say that those were my children.' Another day, as he stood by the window and enjoyed the Dancing Water and the Singing

Apple, the Speaking Bird spoke to him and bade the sister and brothers invite him to a grand dinner on Sunday. At the dinner the bird got a counter-invitation for them all to dine with the king on the Sunday following. When they were assembled at the king's table, the bird related the whole story, ending with the words: 'These are your children, and your wife was sent to the mill and is dying.' The king at once embraced his children, and went to find his wife, who was at the point of death. He knelt before her and begged her pardon. Then he asked the bird to pronounce sentence on the aunts and the nurse. The bird sentenced the nurse to be thrown out of the window and the aunts to be cast into a caldron of boiling oil. This was done forthwith. Then the bird departed; and the king lived in peace with his children and his wife.

(ζ) Two Sons with a Gold Star and a Daughter with a Silver Star in a Folk-tale from Brittany.

(6) It must not be supposed that tales of this type are found only in the Greek and Italian area. Here, for example, is a version entitled *The Baker's Three Daughters* from Plouaret in Brittany[1]. An old baker had three daughters, who one evening after supper were talking confidences. The eldest said that she loved the king's gardener. The next, that she loved the king's valet. The youngest, that she loved the king's son, and, what was more, that she would have by him three children—two boys with a gold star on their foreheads and a girl with a silver star. The prince chanced to be taking a walk that evening, accompanied by his gardener and his valet. He overheard the conversation, summoned the girls to his presence next morning, and granted the desires of them all. The young queen was delivered of a fine boy with a gold star in the middle of his forehead. But the jealous sisters, acting on the advice of an old fairy, had secured a midwife, who exposed the babe in a basket on the Seine and substituted a puppy for him. The prince was much distressed, but bowed to the will of God. The babe floated down the river, was picked up by the king's gardener, and reared by the gardener's wife. Again the queen bore a boy with a gold star on his forehead. The midwife exposed him too in a basket on the Seine, and substituted a puppy for him. The prince, who by this time owing to the death of his father was king, was again deeply distressed, but submissive to the will of God. The second boy, like the first, floated down stream, was found by the gardener, and given to the gardener's wife. Once more the queen bore a child—a girl with a silver star in the middle of her forehead. The midwife exposed her in the same manner and substituted a puppy for her. This time the king was very angry: he felt that it was not God's doing, but that there was some mystery behind it all. So he had the queen shut up in a tower, with nothing but bread and water to live upon and a little book to read. The girl, like the boys, was found on the water by the gardener and reared by his wife. In due time their foster-parents died, and the children were taken into the palace by the king, who liked to have them about him. Every Sunday they were to be seen in the royal pew at church, each wearing a head-band to cover up the star: these head-bands puzzled people. One day, when the king was out hunting, an old woman (it was the midwife disguised as a beggar) came to the palace and began to compliment the girl: she was fair indeed, but if only she had the Dancing Water, the Singing Apple, and the Bird of Truth, there would not be her like upon earth! Her eldest brother set out to seek these marvels for her, and, before

[1] Text unpublished, French translation by F. M. Luzel in *Mélusine* 1878 i. 206 ff. I have abridged F. M. Luzel's rendering.

he went, gave her a dagger: she was to pull it out of its sheath several times daily for a year and a day; if ever it would not come out, she might know that he was dead. A day arrived when she failed to draw the dagger: her eldest brother must be dead. The second brother now set out to seek him, and, before he went, gave her a rosary: she was to tell the beads constantly; if one stuck, she might know that he was dead. A day came when one did stick: he too must be dead. So she bought a horse, dressed as a cavalier, and set out herself in quest of them. She went on and on till she reached a large plain. Here in the hollow of an old tree she saw a little man with a long white beard, who saluted her as the daughter of the king of France. She denied the title, but offered to clip his beard, which must be in his way, she thought. By so doing she delivered him: for five hundred years people had passed that way and no one had helped him. He therefore gave her his blessing, and told her how to find her brothers. Sixty leagues off was a road-side inn, where she was to eat, drink, and leave her horse. Soon afterwards she would find herself close to a very high mountain, terribly hard to climb. A wild wind would burst upon her. There would be hail, snow, ice, and cruel cold to contend with. On either side of the path would be seen many stone pillars—men, who had essayed to climb the mountain, lost heart, and been petrified on the spot. Once at the top, she would see a plain covered with turf and May flowers. Beneath an apple-tree would appear a golden seat. On this she was to sit and feign sleep. A blackbird would then hop down from branch to branch of the apple-tree, and enter a cage beneath it. She was to shut the cage quickly, and would so have secured the Bird of Truth. Next she would cut a branch from the apple-tree with an apple on it; it would be the Singing Apple. Lastly, she was to fill a phial with water from a fountain beneath the tree; this was the Dancing Water. On her way down the mountain she was to spill a drop of water on each stone pillar: from every one would come a cavalier, her own two brothers among them. All these directions she faithfully carried out. Passing through the intense cold on the mountain-side she reached the top, where the sky was clear and the air warm, as though it were summer. She sat on the golden seat below the apple-tree, feigned sleep, and duly secured the Bird of Truth, which again addressed her as daughter of the king of France. She next cut a branch of the apple-tree with one apple on it, filled her phial with water from the fountain, sprinkled and set free all the princes, dukes, barons, and cavaliers, who had been turned into stones, and last of all restored to life her own two brothers. They did not recognise their sister: so she hurried on, and got home first. On their arrival they told her how they had failed in the quest, and spoke of a young cavalier of surpassing beauty who had freed them from their fate. Meantime the old king, who loved the children, as he supposed, of his sister-in-law, was glad to see them all back again, and invited them to a banquet. Towards the end of it the young girl placed on the table the Dancing Water, the Singing Apple, and the Bird of Truth, and bade them do their business. So the Water danced, the Apple sang, and the Bird told the whole story to the assembled company. To prove the truth of it he bade the head-bands be removed from the two brothers and their sister: whereupon it was seen that each of the lads had a gold star on his forehead, and the young girl a silver star. The king fainted away. Recovering himself, he went and fetched the queen from her solitary tower. Despite twenty years' imprisonment, she was still beautiful and gracious. She ate and drank a little, and then—died where she sat! The king, mad with grief and rage, had a furnace heated in the field, into which his sister-in-law and the midwife were cast.

(η) **The Myth of Zethos and Amphion as an 'Expulsion' Tale.**

It would be easy, but needless, to cite other variants. Tales of this type are, in fact, spread throughout the south of Europe, and with sundry modifications and adaptations could be traced yet further afield[1]. J. G. von Hahn, regarding them as essentially tales of 'expulsion' (*Verstossung*), formulated their common characteristics as follows[2]:

(*a*) Jealous relatives deprive the mother of her new-born children, who are found and brought up at a distance from the father's home by a childless foster-parent.

(*b*) Beasts are substituted for the new-born children; or the mother is accused of having devoured them.

(*c*) Expulsion or punishment of the mother.

(*d*) The children, found again by the father, deliver the mother.

Von Hahn has done good service by thus emphasising the permanent features of the tale. But, when he states that they cannot be illustrated from Greek mythology[3], he has somewhat seriously misconceived the situation and has thereby missed a certain number of interesting parallels. Ancient Greek folk-tales have for the most part come down to us through the discriminating sieve of ancient Greek literature. Sometimes, as in the case of Sophokles, that sieve had a very fine mesh, the result being that the primitive traits still to be seen in Sophoclean dramas are but few. Sometimes, as in the case of Euripides, the mesh was broad, and traits of this kind are comparatively numerous. Nevertheless, Euripides too made his appeal to one of the most aesthetically cultivated audiences of all time; and it is certain that he would not have thought the folk-tale as outlined above immediately suitable for dramatic presentation in the theatre at Athens. How, then, would Euripides, say, have manipulated such a theme to suit his purpose? We may here with some assurance hazard a twofold guess. On the one hand, he would have excised the whole of the second or bestial episode: nowhere in Greek tragedy do we find any precedent for a scene which, to Euripides' gener-

[3] *Id.* *ib.* 'Hellenische und germanische Sage: fehlt.'

ation at least, would have been so outrageous and so unconvincing as that of the supposititious animals or the cannibalistic mother. On the other hand, the poet would have expanded such parts of the story as were susceptible of pathetic treatment, and in particular would have elaborated the final scene of recognition[1]. But I need not follow out this *à priori* enquiry; for it so happens that there is extant, not indeed a play of Euripides, but at least the summary of a Euripidean play, on a strictly analogous theme.

Apollodoros, who is paraphrasing Euripides' *Antiope*[2], tells the tale of that heroine in these words[3]: 'Antiope was the daughter of Nykteus. Zeus consorted with her, and she, when pregnant, to avoid her father's threats, fled to Epopeus at Sikyon and married him. Nykteus in despair took his own life, after laying his behest upon Lykos to exact vengeance from Epopeus and Antiope. So Lykos made an expedition against Sikyon and captured it: Epopeus he slew, but Antiope he took captive. As she was being led along, at Eleutherai in Boiotia, she gave birth to two sons. They were exposed; but a herdsman found them and reared them, calling the one Zethos, the other Amphion. Zethos gave his attention to herds of cattle; but Amphion used to practise harp-playing, for Hermes gave him a lyre. Lykos shut up Antiope and evil intreated her, as did Dirke his wife. At last her bonds dropped off of their own accord, and she escaped by stealth to her sons' homestead, eager to be welcomed by them. They recognised their mother, slew Lykos, bound Dirke to a bull, and, when she had been killed, flung her into a spring that is called Dirke after her.'

The general similarity of Euripides' play to the 'expulsion' *formula* of J. G. von Hahn is sufficiently obvious. The main discrepancy lies in the fact that, according to von Hahn's *formula*, the father of Zethos and Amphion ought to have been Lykos rather than Zeus. But this difficulty vanishes, if with H. Usener we suppose (indeed, we have already supposed it[4]) that *Lýkos* was an ancient god of daylight comparable with Zeus *Lýkaios*: the Theban Lykos will then be a doublet of the Sicyonian Epopeus, two kings bearing the name of the local god. Again, it might be objected that, on von Hahn's showing, Zethos and Amphion should have slain Dirke, but not Lykos. Here the explanation of the difficulty is simpler still. Hyginus, our ultimate authority for the Euripidean character of the narrative[5], has a different ending to it: 'They bound Dirce,' he says, 'by her hair to a bull and slew her. When they were about to slay Lycus, Mercurius forbade them and at the same time ordered Lycus to yield his kingdom to Amphion[6].' Euripides, in short, preserved the main outlines of the old-world tale.

[1] On *ἀναγνώρισις* as a strong point with Euripides see *e.g.* M. Croiset *Histoire de la littérature grecque* Paris 1891 iii. 315 f. Karkinos in his *Thyestes* (*Trag. Gr. frag.* p. 797 Nauck[2]) *ap.* Aristot. *poet.* 16. 1454 b 21 ff. used certain congenital signs in the shape of stars (*ἀστέρας*) as the means of effecting such a recognition: this is a parallel to the Breton tale *supra* p. 1011.

[2] This appears from a comparison of Apollod. 3. 5. 5 with Hyg. *fab.* 8, which is headed *eadem Euripidis, quam scribit Ennius.* See also schol. Ap. Rhod. 4. 1090, and the remarks of A. Nauck *Trag. Gr. frag.*[2] p. 410 ff. An analogous version by Kephalion, a rhetorical historian of Hadrian's age, is preserved by Io. Malal. *chron.* 2 pp. 45—49 Dindorf.

(θ) Stellar names of the children in 'Expulsion' Tales.

Now Zethos and Amphion were the Theban Dioskouroi[1]. It seems worth while, therefore, to consider whether the features common to the 'expulsion' tales can be paralleled from the numerous classical myths with regard to heroic twins. To begin with, one characteristic of the six 'expulsion' tales cited above is a certain peculiarity of nomenclature. The king's wife bears him children as follows:

1. A boy called *Sun*, a boy called *Moon*, a girl called *Star* (successively).
2. A boy called *Sun*, a girl called *Moon*, a boy called *Morning-star* (simultaneously).
3. A boy with the *Morning-star* on his face, a girl with the *Evening-star* on her face (simultaneously).
4. Three golden children, of whom two at least were boys (successively).
5. Two boys with golden apples in their hands, a girl with a *star* on her brow (simultaneously).
6. Two boys with *golden stars* on their brows, a girl with a *silver star* on her brow (successively).

The children, then, are definitely stellar; and a comparison of the last two tales shows beyond all doubt that the golden apples are tantamount to golden stars. Further, in four, perhaps five, out of the six tales the children consist of two boys and a girl. On both grounds we are forced to compare them with Kastor, Polydeukes, and Helene[2]. Zethos and Amphion too were, as we have before seen[3], intimately related to sun, moon, and stars. Even Romulus and Remus on Roman imperial coins are treated as Dioskouroi and surmounted by a couple of stars[4].

(ι) Exposure of the children and Punishment of the mother in 'Expulsion' Tales.

J. Rendel Harris in *The Cult of the Heavenly Twins* argues well in defence of the thesis 'That, in the earliest stages of human evolution, twins are taboo, without distinction between them, and that their mother shares the taboo with them[5].' In conformity with this rule the children of the 'expulsion' tales are regularly exposed as castaways:

1. They are put into boxes and flung into the sea.
2. Orders are given that they should be flung into a river; but they are actually left on a bed of rushes.

[1] *Supra* i. 739, ii. 317, 445.

[2] If this comparison be well founded, the relation of the children to horses may be more than fortuitous:

(1) Sun rides a green winged horse, which can thunder and lighten.
(2) Sun and Morning-star spend their time in exercising their horses: Moon also rides on horseback.
(3) Morning-star and Evening-star are abandoned on a lame horse: Morning-star secures the winged horse of the plain, which eats men and beasts.
(5) The brothers with golden apples and the sister with a star all ride on horseback.
(6) The brothers with golden stars and the sister with a silver star all ride on horseback as cavaliers.

[3] *Supra* i. 739.

[4] Stevenson—Smith—Madden *Dict. Rom. Coins* pp. 761, 914 f., *supra* p. 443 f. figs. 349—351.

[5] J. Rendel Harris *The Cult of the Heavenly Twins* Cambridge 1906 p. 10 ff.

3. They are put into a basket and flung into a river.
4. They are flung into a hen-house.
5. They are thrown out for the dogs to eat.
6. They are put into baskets and floated down the Seine.

Their mother too is (1) walled up in the jakes, or (3) partially walled up at the entrance to the castle, or (6) shut up in a tower, or (5) put into a tread-mill, or (2 and 4) thrown into the hen-house. Here again classical parallels are not far to seek. According to Kephalion, Lykos had the twins Zethos and Amphion exposed near Mount Kithairon, where a childless labourer named Ordion found and reared them; Dirke took their mother Antiope to the same place, fastened a torch to the horns of a wild bull, and gave orders that Antiope should be roped to its neck and so dragged to death, when in the nick of time the twins learned the victim's name from Ordion, set free their mother, and at her request bound Dirke to the bull[1]. As to Kastor, Polydeukes, and Helene, an anonymous narrative, probably drawn from the *Kypria*[2], said that Zeus under the form of a swan had mated with Nemesis under the form of a goose, that Nemesis had laid an egg and left it in the marsh, that a certain shepherd had found it there and brought it to Leda, who kept it carefully in a chest, and that in time Helene was born from this egg and brought up as the child of Leda[3]. A tradition, late in date[4] but early in character[5], added that Kastor and Polydeukes were born of the same egg[6], and used the halves of it as conical caps[7]. Ibykos, a sixth-century lyrical poet, introduced some speaker, presumably Herakles, saying of the twin Moliones:

> The white-horsed youths,
> Sons of Molione, I slew,
> Like-aged and equal-headed and one-bodied,
> Both born in a silver egg[8].

[2] See O. Rossbach in Roscher *Lex. Myth.* iii. 118 ff.

[3] Tzetz. *in* Lyk. *Al.* 88, Apollod. 3. 10. 7. The egg was left ἐν τῷ ἕλει (Tzetz.), ἐν τοῖς ἅλσεσιν (Apollod.: ἄλσεσιν cod. S. ἕλεσιν Preller, δάσεσιν Bekker).

[4] A. Furtwängler in Roscher *Lex. Myth.* i. 1159.

[5] E. Bethe in Pauly—Wissowa *Real-Enc.* v. 1113.

[6] Tzetz. *in* Lyk. *Al.* 88, 506, schol. Kallim. *h. Artem.* 232, schol. *Od.* 11. 298, Hor. *sat.* 2. 1. 26, *ars poet.* 147 with Acron *ad locc.*, Serv. *in* Verg. *Aen.* 3. 328, Fulgent. *myth.* 2. 16, Myth. Vat. 1. 78, 3. 3. 6.

[7] Lyk. *Al.* 506 f., Loukian. *dial. deor.* 26. 1.

Another account said that Iupiter as a swan consorted with Leda, who laid two eggs, one of them containing Castor and Pollux, the other Clytemnestra and Helena (Myth. Vat. 1. 204).

In a sanctuary of Hilaeira and Phoibe at Sparta an egg, hung from the roof by ribbons, was shown as that to which Leda had given birth (Paus. 3. 16. 1). Its position, slung in mid air, suggests that it may have symbolised the moon. Neokles of Kroton stated that the egg from which Helene was born had fallen from the moon, the women there being oviparous and their offspring fifteen times as large as we are, according to Herodoros of Herakleia (*frag.* 28 in *Frag. hist. Gr.* ii. 35, where see C. Müller's note).

[8] Ibyk. *frag.* 16 Bergk[4] *ap.* Athen. 57 F f., cp. Eustath. *in Il.* p. 1321, 33 ff., *in Od.* p. 1686, 45 ff. According to Pherekydes *frag.* 36 (*Frag. hist. Gr.* i. 81 Müller) *ap.* schol. *Il.* 11. 709, Kteatos and Eurytos were the sons of Molione, daughter of Molos, nominally by Aktor, but really by Poseidon; each of them had two heads, four hands, four feet, and one body. They thus closely resembled the composite beings, whom Plato related to the

But whether this egg, like that of Helene, was left in the wilds, we do not know. Far more familiar is the fate of Romulus and Remus. Amulius, king of Alba Longa, gave orders that they together with their mother, the Vestal Ilia, should be thrown into the Tiber. The twins were washed up on the bank, where the shepherd Faustulus found them, suckled by a she-wolf and attended by a woodpecker and a jay. He took them to his wife Acca Laurentia, who reared them. Their mother Ilia became the wife of the river-god Anien or Tiberis[1]. According to another account, Amulius doomed the guilty mother to be flogged to death. Others again said that, owing to the entreaties of his daughter Antho, Amulius commuted her punishment into close imprisonment, but that after his death she was let out[2].

(κ) Quests undertaken by the children in 'Expulsion' Tales.

The quests undertaken by the children in the 'expulsion' tales are not regarded by J. G. von Hahn as essential to this type of story; and in point of fact they are absent altogether from the Eubœan version (4). Still, where they are present, they are likely to repay investigation. Indeed, I suspect that ultimately they will prove to be quite the most interesting portion of the whole. For purposes of comparison, let us enumerate them in order:

1. (*a*) A golden apple kept by forty dragons.
   (*b*) A golden bough, on which all the birds of the world meet to sing.
   (*c*) The Tzitzinaina, who knows the language of all birds and can turn men into stone.
2. (*a*) A branch, which makes music and is kept by two dragons.
   (*b*) A mirror, which shows the whole world and is kept by forty dragons.
   (*c*) The bird Dikjeretto, which can turn men into stone.
3. (*a*) The Winged Horse of the Plain, which swears by its brother.
   (*b*) The Beauty of the Land, who can turn men into stone.
5. (*a*) The Dancing Water, which is guarded by four giants and four lions.
   (*b*) The Singing Apple, which grows on the top of a wonderful tree with shears before it.
   (*c*) The Speaking Bird, which is perched on the bason of a fountain in a garden and can turn men into statues.
6. (*a*)+(*b*)+(*c*) The Dancing Water, the Singing Apple, and the Bird of Truth. The Dancing Water comes from a fountain beneath an apple-tree. On a branch of the tree grows the Singing Apple. A blackbird on the tree is the Bird of Truth. Beside the tree is a golden seat. All these are found in a summery plain on the top of a wintry mountain, the path up which is bordered by cavaliers turned into stone.

It will be seen that the last tale gives the most coherent account of the various objects to be sought. Moreover, it alone makes mention of one detail, the golden seat, which affords a clue to the meaning of all the rest. Whoever can sit on that golden throne thereby establishes his claim to be king, the Dancing Water, the Singing Apple, and the Bird of Truth being in some sort his *regalia*. But this is a matter for further investigation. For the moment I content myself with observing that traces, substantial traces, of similar quests are to be found

sun and moon (*supra* i. 311). Cp. Plout. *de frat. am.* 1 τοὺς Μολιονίδας ἐκείνους, συμφυεῖς τοῖς σώμασι γεγονέναι δοκοῦντας.

[2] Dion. Hal. *ant. Rom.* 1. 78 f., Plout. *v. Rom.* 3, Liv. 1. 4. 3.

throughout ancient Greek mythology. The folk-tale hero rides off to get the golden apple kept by forty dragons in a garden[1]. We think of Herakles, the great twin brother of Iphikles, who seeks the golden apples of the Hesperides, apples that grow in the garden of Zeus and are kept by the dragon Ladon[2]. The same folk-tale hero rides a green winged horse, which can thunder and lighten[3]. We are familiar with the winged horse Pegasos, of whom Hesiod wrote:

> In Zeus' home he dwells
> Bearing the thunder-peal and lightning-flash
> For Zeus the wise[4].

[3] *Supra* p. 1003.

[4] Hes. *theog.* 285 f., cp. Eur. *Bellerophontes frag.* 312 Nauck[2] *ὑφ' ἅρματ' ἐλθὼν Ζηνὸς ἀστραπηφορεῖ.* I do not know any ancient representation of Pegasos as lightning-bearer. But a very remarkable red-figured *hydria* at Paris (De Ridder *Cat. Vases de la Bibl. Nat.* ii. 343 no. 449, J. B. Biot in the *Ann. d. Inst.* 1847 xix. 184 ff., *Mon. d. Inst.* iv pl. 39, 2 (=my fig. 885), Reinach *Rép. Vases* i. 129. 4. R. Eisler *Weltenmantel und Himmelszelt* München

Fig. 885.

1910 i. 84 n. 2 fig. 26 ('Apotropäische Darstellung einer Sonnenfinsternis')) appears to represent him as a constellation in the sky. My friend Prof. E. T. Whittaker, late Astronomer Royal of Ireland, has kindly supplied me with the following note on this unique vase-painting:

'Four stars of approximately equal magnitude will be noticed forming a rectangular figure flanked by two other stars. There are in the northern sky two well-known instances of stars disposed in a rectangle, *viz.* the body of the Plough (Ursa Major) and the great square of Pegasus. Here the addition of Pegasus himself puts the meaning beyond doubt.

The fact that the moon appears as a comparatively thin crescent shows that a time

The hero of another folk-tale captures the Winged Horse of the Plain: he waits till it stoops its head in drinking from a spring, then leaps on to its back, and makes it swear by its brother to serve him[1]. He too can be paralleled by Bellerophontes, who captures Pegasos while drinking at the spring Peirene[2]; and Pegasos, we remember, has Chrysaor for brother[3]. Lastly, the folk-tale hero, who as a new-born babe is put into a box and flung into the sea, while his mother is walled up in the jakes[4], recalls the classical myth of Danae, first shut up in an underground chamber and then sent adrift in a chest on the sea

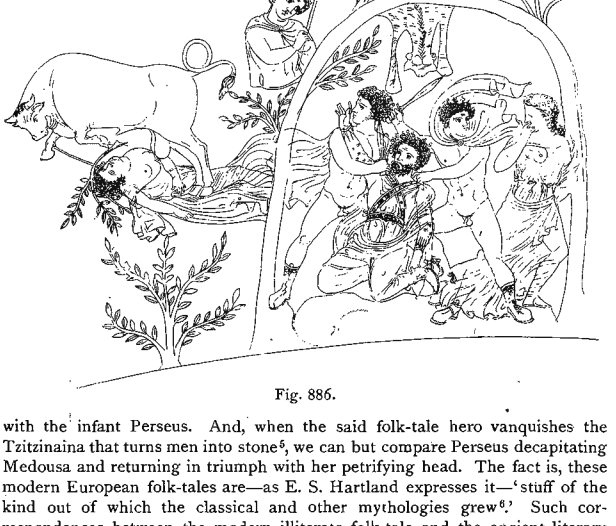

Fig. 886.

with the infant Perseus. And, when the said folk-tale hero vanquishes the Tzitzinaina that turns men into stone[5], we can but compare Perseus decapitating Medousa and returning in triumph with her petrifying head. The fact is, these modern European folk-tales are—as E. S. Hartland expresses it—'stuff of the kind out of which the classical and other mythologies grew[6].' Such correspondences between the modern illiterate folk-tale and the ancient literary myth are, therefore, to be expected. Parian marble must needs bear a certain resemblance to the Hermes of Praxiteles[7].

either quite early or quite late in the lunation is intended. If the former, the vase must represent the western horizon soon after sunset in spring. If the latter, it represents the eastern sky shortly before sunrise in autumn. No obvious meaning attaches to the short curved lines within or without the moon's disc. The scale on which the moon is represented is much larger than that on which the great square of Pegasus appears.'

[7] We must, however, bear in mind the warning uttered by that careful student of Greek

(λ) **Penalties exacted by the children in 'Expulsion' Tales.**

It remains but to notice the extreme savagery with which, in the folk-tales, the guilty parties are punished:

1. The king's mother and the midwife are torn asunder by horses.
2. The king's mother is banished from the palace: the midwife is beheaded.
3. The king's mother and the midwife are torn asunder by horses.
4. The king's mother is torn asunder by mules.
5. The jealous sisters are thrown into a caldron of boiling oil: the nurse is flung from the window.
6. The jealous sister and the midwife are cast into a furnace.

Even here classical mythology, for all its refinement and polish, can offer a gruesome analogy. Zethos and Amphion, as we have already heard[1], bind the ill-starred Dirke to a wild bull, by which she is dragged to death. Nay worse, the scene of her agony was a favourite subject with the sensational art of the Hellenistic age (fig. 886)[2].

APPENDIX G.

ORPHIC THEOGONIES AND THE COSMOGONIC EROS.

The Orphic fragments were collected and discussed with marvellous insight by C. A. Lobeck *Aglaophamus* Regimontii Prussorum 1829 i. 411—ii. 964. A somewhat fuller and handier collection is that of E. Abel *Orphica* Lipsiae-Pragae 1885 pp. 137—273, who, however, does not add a commentary and occasionally refers a fragment to the wrong context. An important supplement is G. Murray 'Critical Appendix on the Orphic Tablets' in Harrison *Proleg. Gk. Rel.*[2] pp. 659—673 (*supra* p. 118 n. 2). Recently O. Kern in his *Orphicorum fragmenta* Berolini 1922 has produced an admirably careful and complete edition, which includes 'Testimonia' (pp. 1—79), 'Fragmenta' (pp. 80—344), bibliography (pp. 345—350), reference-tables (pp. 351—353), and 'Indices' (pp. 360—407). But the subject is even now far from being exhausted, and a *Corpus* of the monu-

folk-tales, Prof. W. R. Halliday, in R. M. Dawkins *Modern Greek in Asia Minor* Cambridge 1916 p. 216 f.: 'It cannot be too strongly insisted that there is no special connexion at all between ancient mythology and modern Greek folk-tales. Wherever it has been traced, there is obvious to the impartial observer either a straining of the evidence or a palpable mistake.'

[1] *Supra* pp. 1013, 1015.

[2] See *e.g.* Collignon *Hist. de la Sculpt. gr.* ii. 532 ff., Herrmann *Denkm. d. Malerei* pl. 43 Text p. 55, E. Bethe in Pauly—Wissowa *Real-Enc.* v. 1170.

I figure *e.g.* the principal design on an Apulian *kratêr* from Palazzuolo near Syracuse, now in Berlin (Furtwängler *Vasensamml. Berlin* ii. 926 f. no. 3296 K. Dilthey in the *Arch. Zeit.* 1878 xxxvi. 42 ff. pls. 7 (=my fig. 886) and 8, Reinach *Rép. Vases* i. 421, 2, O. Jessen in Roscher *Lex. Myth.* ii. 2184 ff. fig. 1, J. H. Huddilston *Greek Tragedy in the light of Vase Paintings* London 1898 p. 9 n. 1). On the left Dirke, a pathetic figure with bared breast, is dragged to death by the raging bull. On the right Lykos, caught skulking in a cave by Zethos and Amphion, is about to be dispatched, when Hermes—as in the Euripidean version (*supra* p. 1013)—suddenly intervenes to stay the slaugbter. Antiope escapes to the right. The panther-skin hung on the wall of the cave hints at the Dionysiac character of Antiope (*supra* i. 735).

mental evidence is still sorely needed. Of scholars that in modern times have devoted special attention to the Orphic theogonies (P. R. Schuster *De veteris Orphicae theogoniae indole atque origine* Lipsiae 1869, O. Kern *De Orphei Epimenidis Pherecydis theogoniis quaestiones criticae* Berolini 1888, *id.* 'Theogoniae Orphicae fragmenta nova' in *Hermes* 1888 xxiii. 481—488, F. Susemihl 'Die Orphische theogonie' in the *Jahrb. f. class. Philol.* 1874 xx. 666—676, *id. De theogoniae Orphicae forma antiquissima* Gryphiswaldiae 1890, *id.* 'Zu den orphischen Theogonien' in the *Jahrb. f. class. Philol.* 1890 xxxvi. 820—826, *id. Geschichte der griechischen Litteratur in der Alexandrinerzeit* Leipzig 1891 i. 896, F. Lukas *Die Grundbegriffe in den Kosmogonien der alten Völker* Leipzig 1893, pp. 178—195, A. E. J. Holwerda 'De Theogonia Orphica' in *Mnemosyne* N.S. 1894 xxii. 286—329, 361—385, W. Kroll 'De Orphicis addendum' in *Philologus* 1894 liii. 561, P. Tannery 'Sur la première theogonie Orphique' in the *Archiv für Geschichte der Philosophie* 1897 xi. 13—17, Rohde *Psyche*[3] ii. 414—417, and others) none has done better service than O. Gruppe (*Cult. Myth. orient. Rel.* i. 612—675, 'Berichtigung' in the *Jahrb. f. class. Philol.* 1888 xxxiv Anhang 1 f., 'Die rhapsodische Theogonie und ihre Bedeutung innerhalb der orphischen Litteratur' *ib.* 1890 Suppl. xvii. 687—747, *Gr. Myth. Rel.* pp. 419—423, 430—432, 'Älteste orphische Theogonie' in Roscher *Lex. Myth.* iii. 1120—1124, 'Die Lehre von der periodischen Welterneuerung' *ib.* iii. 1139—1149, *Myth. Lit.* 1908 p. 215 f.), whose views—with sundry modifications—are here summarised.

(1) The earliest Orphic Theogony.

Quotations in authors of the classical age (cp. H. Diels *Die Fragmente der Vorsokratiker*[3] Berlin 1912 ii. 167 ff. 'Altbezeugte Fragmente') postulate the existence of an early Orphic theogony, to which even Homer, at least in the Διὸς ἀπάτη, was indebted (*Il.* 14. 201 cp. Plat. *Cratyl.* 402 B—C; *Il.* 14. 246 cp. Athenag. *supplicatio pro Christianis* 18 p. 20 Schwartz, Krates *ap.* Plout. *de fac. in orbe lun.* 25, Orph. *h. Okean.* 83. 1 f., Hippol. *ref. haeres.* 5. 7 p. 148 Duncker—Schneidewin, 8. 12 p. 424; but hardly *Il.* 14. 259 ff. cp. Damaskios *quaest. de primis principiis* 124 (i. 319, 8 ff. Ruelle)). The contents of the poem can be partially reconstructed as follows:—In the beginning was Nyx (Aristot. *met.* 12. 6. 1071 b 26 f., 14. 4. 1091 b 4 ff., Eudemos of Rhodes *ap.* Damaskios *loc. cit.*, Lyd. *de mens.* 2. 8 p. 26, 1 ff. Wünsch). Black-winged Nyx laid a wind-egg, from which in due time sprang gold-winged Eros (Aristoph. *av.* 695 ff.). Apparently heaven and earth were regarded as the upper and lower halves of the vast egg (so in the later theogony of Orph. *frag.* 57 Kern *ap.* Athenag. *supplicatio pro Christianis* 18 p. 20 f. Schwartz, cp. Varro *frag.* 109 Funaioli *ap.* Prob. *in* Verg. *ecl.* 6. 31 p. 354 Lion). Ouranos (Aristot. *met.* 14. 4. 1091 b 5) and Ge (Lyd. *de mens.* 2. 8 p. 26, 2 f. Wünsch) together produced as their offspring Okeanos and Tethys (Plat. *Tim.* 40 E). Fair-flowing Okeanos took to wife Tethys, his sister by the same mother, and so was the first to begin regular wedlock (Orph. *frag.* 15 Kern *ap.* Plat. *Cratyl.* 402 B—C, cp. Aristot. *met.* 1. 3. 983 b 30 f.). Their children were Phorkys, Kronos, Rhea, and others (Plat. *Tim.* 40 E, Cic. *Tim.* 11). The sequel can perhaps be surmised from the Διὸς ἀπάτη. Rhea took Hera to Okeanos and Tethys, who brought up the child in their abode; and Zeus thrust Kronos down below the earth and the sea (*Il.* 14. 200 ff.). Zeus used to visit Hera clandestinely (*Il.* 14. 294 ff.), repairing to Okeanos for the purpose (Orph. περὶ Διὸς καὶ Ἥρας *frag.* 115 Kern *ap.* Eustath. *in* Dionys. *per.* 1). Not improbably the poem told how, to grace this 'sacred marriage' (Dion Chrys. *or.* 36 p. 99 Reiske, Prokl. *in* Plat. *Tim.* i. 49, 13 f. Diehl cp. *ib.* iii. 248, 5 ff.), Ge sent up golden apples

(Asklepiades of Mende *frag.* 1 (*Frag. hist. Gr.* iii. 306 Müller) *ap.* Athen. 83 c) or apple-trees bearing golden fruit in Okeanos (Pherekydes of Leros *frag.* 33 (*Frag. hist. Gr.* i. 78 f. Müller) *ap.* schol. Ap. Rhod. 4. 1396), or came with branches of golden apples to the wedding and allowed Hera to plant them in her garden by Mt Atlas, where they were protected by the Hesperides and the snake (Pherekydes of Leros *frag.* 33 a (*Frag. hist. Gr.* i. 79 f. Müller) *ap.* Hyg. *poet. astr.* 2. 3, schol. Caes. Germ. *Aratea* p. 383, 1 ff. Eyssenhardt : *id. ap.* pseudo-Eratosth. *catast.* 3 calls it the garden of the gods ; others, the gardens of Zeus (Soph. *Ion frag.* 297 Nauck², 320 Jebb, *ap.* Stob. *flor.* 103. 10 (ed. Gaisford iii. 292) ἐν Διὸς κήποις ἀροῦσθαι (T. Bergk cj. ἀρύεσθαι) μόνον εὐδαίμονος (leg. εὐδαίμονας) ὄλβους) or the plain of Zeus (Aristoph. *av.* 1758 πέδον Διὸς καὶ λέχος γαμήλιον, cp. Eur. *Hipp.* 749 Ζανὸς μελάθρων παρὰ κοίταις (J. G. J. Hermann cj. παρ' εὐναῖς)), or the gardens of Father Okeanos (Aristoph. *nub.* 271), or the meadow of Hera (Kallim. *h. Artem.* 164)). The poem concluded with the sixth generation (Orph. *frag.* 14 Kern *ap.* Plat. *Phileb.* 66 c). O. Gruppe thinks that it was probably composed towards the end of *s.* vii B.C. at Kroton, where Hera *Lakinia* had a garden (Lyk. *Al.* 856 ff. ὄρχατον with Tzetz. *ad loc.* ὅλον τὸν κῆπον λέγειν) and a temple of the Muses (Iambl. *v. Pyth.* 50 after Timaios?) may betoken Orphic influence.

[Here I dissent. It seems to me that clear indications point to an earlier age and a very different locality. If the Διὸς ἀπάτη really presupposes an Orphic theogony, that theogony can hardly be later than *s.* x (see the sober estimates of W. Christ *Geschichte der griechischen Litteratur*⁶ München 1908 i. 59—62)—a period which accords well with the epic metre and dialect of the extant fragments, not to lay stress on the remote traditional dates of Orpheus himself (O. Gruppe in Roscher *Lex. Myth.* iii. 1064—1073). Moreover, our attention is drawn eastwards rather than westwards : the scene of the Διὸς ἀπάτη is laid on Mt Ide in Phrygia (*supra* i. 154, ii. 950) ; the position assigned by the theogony to Nyx recalls the archaic (*s.* vi) figure of Nyx by Rhoikos at Ephesos (Paus. 10. 38. 6 f.) ; Okeanos and Tethys as forbears are compared by Aristotle with water as the primal substance assumed by Thales of Miletos (Aristot. *met.* 1. 3. 983 b 20 ff.) ; and the cosmic egg, not to mention other points of resemblance, occurs also in the Phoenician theogony (Sanchouniathon as translated by Philon Bybl. *frag.* 2. 2 (*Frag. hist. Gr.* iii. 565 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 2 ἀνεπλάσθη ὁμοίως ᾠοῦ σχήματι κ.τ.λ., cp. *supra* i. 583 n. 4, 785, and Mochos *ap.* Damask. *quaest. de primis principiis* 125 *ter* (i. 323, 6 ff. Ruelle) ᾠόν...τὸ δὲ ᾠὸν ὁ οὐρανός). I infer that the Orphic poem took shape somewhere in Asia Minor as the result of early Ionian speculation brought to bear on primitive Thraco-Phrygian beliefs. A trace of such beliefs may be found in the Lesbian tale of Enorches. A certain Thyestes consorting with his sister Daita or Daito (*v.l.* Daïso, cp. the Lesbian Theodaisia (Nilsson *Gr. Feste* pp. 280 n. 2, 472 n. 2)) produced from an egg a son called Enorches, who founded a temple for Dionysos and called the god after himself Dionysos Ἐνόρχης (Eudok. *viol.* 345, schol. Lyk. *Al.* 212)—a title borne by Dionysos in Samos also (Hesych. *s.v.* Ἐνόρχης) and obviously derived from ὄρχεις, 'testicles' (ἐνόρχης, ἔνορχος, ἔνορχις is elsewhere used *e.g.* of a ram (*Il.* 23. 147, Synes. *epist.* 148) or he-goat (Theokr. 3. 4, Loukian. *dial. deor.* 4. 1) or bull (Aristot. *hist. an.* 9.50. 632 a 20)). Now the names Thyestes and Daito recall at once the banquet of Thyestes, son of Pelops the Phrygian (Bakchyl. 7. 5, Hdt. 7. 8 and 11, Telestes *frag.* 5 Bergk⁴ *ap.* Athen. 625 E—626 A, schol. Pind. *Ol.* 9. 15 a), and imply that in Lesbos as at Mykenai there lingered the memory of ritual cannibalism. H. D. Müller *Mythologie der griechischen Stämme* Göttingen

1861 ii. 154—158 argues that the Mycenaean myth points back to a human sacrifice offered to a Zeus-like deity Θυέστης, the 'Dashing' storm-god (*θύω, θύελλα*). This etymology is possible (Dionysios i of Syracuse *ap.* Phot. *bibl.* p. 532 b 32 ff. Bekker *θυέστην τὸν δοίδυκα ἐκάλει*, a pestle being a 'dasher' or 'bruiser': see Boisacq *Dict. étym. de la Langue Gr.* p. 355), though the Lesbian Thyestes appears in a Dionysiac context (Gruppe *Gr. Myth. Rel.* p. 660 n. 1) which relates his name to *θυιάδες, θυστάδες*, Θυώνη, etc. Be that as it may, the association of human sacrifice with the cult of Dionysos takes us from Lesbos (*supra* i. 656 n. 4: see also the story told by Ail. *var. hist.* 13. 2 of the Mytilenaean Makareus, priest of Dionysos, and his sons, who *μιμούμενοι τὴν τοῦ πατρὸς ἱερουργίαν τῷ βωμῷ τῷ πατρῴῳ προσῆλθον ἔτι καομένων τῶν ἐμπύρων· καὶ ὁ μὲν νεώτερος παρέσχε τὸν τράχηλον, ὁ δὲ πρεσβύτερος ἠμελημένην εὑρὼν σφαγίδα τὸν ἀδελφὸν ἀπέκτεινεν ὡς ἱερεῖον*) to Thrace, where the devouring of a dismembered child was not unknown (*supra*, i. 656). Others explained the title Ἐνόρχης by the tale of Polyhymnos (Eudok. *viol.* 345, Tzetz. *in* Lyk. *Al.* 212: O. Höfer in Roscher *Lex. Myth.* iii. 2657—2661, 3154 f. discusses variants). Dionysos, when his mother was struck by the thunderbolt, groped about for her. A young man named Polyhymnos undertook to show him the way to her, if allowed to consort with him. Dionysos agreed, provided that he found his mother first. Following the advice of Polyhymnos, he went down to Hades and brought her up from the spring at Lerna. Polyhymnos having died, Dionysos by way of keeping his promise attached genitals of fig-wood to himself and leathern *phalloi* of deer-skin. Hence his title Ἐνόρχης. The clue to the understanding of this narrative is the fact that *πολύυμνος* was an appellative of Dionysos himself (*h. Dion.* 26. 7, Eur. *Ion* 1074 f.), kindred names being found in his *entourage* (Polyhymno his Dodonaean nurse (*supra* i. 111 n. 6), Polymnia mother of Orpheus (schol. Ap. Rhod. 1. 23) and of Triptolemos (schol. *Il.* 10. 435, Eustath. *in Il.* p. 817, 32, Tzetz. *in* Hes. *o. d.* 1 p. 28, 6 f. Gaisford)). The descent of Dionysos and Polyhymnos is therefore tantamount to a descent of Dionysos Πολύυμνος; and the obscene pact between the two, which is missing in the version given by Paus. 2. 37. 5, is a piece of aetiology meant to elucidate the Lernaean Φαλλαγώγια. The quest of Dionysos for Semele thus becomes comparable with that of Orpheus for Eurydike (see Harrison *Themis* pp. 420, 523) and again points Thrace-wards.]

(2) The Orphic Theogony of Hieronymos and Hellanikos.

Another Orphic theogony, distinguished as *ἡ...κατὰ τὸν Ἱερώνυμον φερομένη καὶ Ἑλλάνικον, εἴπερ μὴ καὶ ὁ αὐτός ἐστιν*, is set forth by Damaskios *quaest. de primis principiis* 123 *bis* (i. 317, 15 ff. Ruelle):—In the beginning was water and slime (Lobeck *Aglaophamus* i. 484, followed by F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1842 iv. 83, rightly cj. *ἰλύς* for *ὕλη*; but cp. Stephanus *Thes. Gr. Ling.* iii. 249 B—C) which thickened into earth. Water, the combining element, and earth, the scattered, together produced a snake with three heads, in the middle that of a god, to one side that of a bull, to the other that of a lion. The snake had wings on its shoulders and was named Chronos the ageless and Herakles (cp. Orph. *h. Herakl.* 12). With it consorted Ananke or Adrasteia, a bodiless being whose arms stretch throughout the world and clasp its extremities: she is described as at once male and female. The snake Chronos begat intelligent (but Lobeck *Aglaophamus* i. 486 n. † cj. *νοτερόν* for *νοερόν*, and C. E. Ruelle *ad loc.* approves the change) Aither, boundless Chaos, and misty Erebos. Among these Chronos produced an egg containing male and female elements, a multiplicity of seeds, and a bodiless god (*supra* i. 311 n. 5: see also

O. Kern *De Orphei Epimenidis Pherecydis theogoniis quaestiones criticae* Berolini 1888 p. 25 f.) with golden wings on his shoulders, the heads of bulls attached to his sides (cp. Orph. *h. Protog.* 6. 3 *ταυροβόαν*), and on his head a monstrous snake resembling all manner of wild beasts. This god is named Protogonos or Zeus the arranger of all or Pan (*Πρωτόγονον ἀνυμνεῖ καὶ Δία καλεῖ πάντων διατάκτορα καὶ ὅλου τοῦ κόσμου, διὸ καὶ Πᾶνα καλεῖσθαι* (cp. Orph. *h. Pan.* 11. 12 *ἀληθὴς Ζεὺς ὁ κεράστης*)). The account given by Damaskios is borne out by Athenag. *supplicatio pro Christianis* 18 p. 20, 22 ff. Schwartz and schol. Greg. Naz. *or.* 31. 16 (E. Norden in *Hermes* 1892 xxvii. 614 f.), who, however, omit the bovine head of the snake, ascribing to it the head of a god between the heads of a snake and a lion, and say nothing of Aither, Chaos, and Erebos. The snake Herakles—they declare—produced a huge egg, which, filled with his force, cracked and broke into halves—the upper heaven, the lower earth. Forth from the egg came a bodiless god (*supra*), Phanes by name. Athenag. *loc. cit.* p. 21, 1 ff. Schwartz adds the sequel. Ouranos and Ge had as their daughters Klotho, Lachesis, Atropos, as their sons the Hekatoncheires Kottos, Gyges, Briareos, and the Kyklopes Brontes, Steropes, Arges. These Ouranos bound and flung into Tartaros, having heard that his sons would dethrone him. Thereupon Ge was angered and bare the Titans, so called 'because they took vengeance (*τισάσθην*) on great Ouranos the starry' (Orph. *frag.* 57 Kern).

[As to the date and *provenance* of the theogony, we are reduced to guesswork. C. Müller *Frag. hist. Gr.* ii. 450 n.** cj. that Hieronymos was *Ἱερώνυμος ὁ Αἰγύπτιος ὁ τὴν ἀρχαιολογίαν τὴν Φοινικικὴν συγγραψάμενος* (Ioseph. *ant. Iud.* 1. 3. 6, cp. 1. 3. 9, = Euseb. *praep. ev.* 9. 11. 3, cp. 9. 13. 5, Kedren. *hist. comp.* 11 b C (i. 23 Bekker)), and he is followed *e.g.* by F. Susemihl *Geschichte der griechischen Litteratur in der Alexandrinerzeit* Leipzig 1891 i. 376 n. 6 ; but A. Gudeman in Pauly—Wissowa *Real-Enc.* viii. 1564 enters a *caveat.* Hellanikos is commonly regarded as pseudo-Hellanikos ; but Gudeman *loc. cit.* viii. 121 thinks that the theogony current under his name 'war sicher kein besonderes Buch, sondern der Bericht über die Entstehung der Welt nach einem orphischen Gedicht. H. kann ihn recht gut irgendwo gegeben haben.' If so, the Orphic poem itself cannot have been composed later than *c.* 450 B.C. and may have been a good deal earlier. It exhibits various traces of oriental cosmogony and of Greek philosophy. The complex monsters are more Semitic than Hellenic. The world-creating Herakles is perhaps Phoenician (Gruppe *Gr. Myth. Rel.* p. 499 ; but see *eund.* in Roscher *Lex. Myth.* iii. 1141). So, as was pointed out by E. Zeller (*A History of Greek Philosophy* trans. S. F. Alleyne London 1881 i. 102 n. 4 *fin.*), is primeval slime (Sanchouniathon in Philon Bybl. *frag.* 2. 1 (*Frag. hist. Gr.* iii. 565 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 1 f. *καὶ ἐκ τῆς αὐτοῦ συμπλοκῆς τοῦ πνεύματος ἐγένετο Μώτ· τοῦτό τινές φασιν ἰλύν, οἱ δὲ ὑδατώδους μίξεως σῆψιν,* with which Gruppe *Cult. Myth. orient. Rel.* i. 386 f. well cp. Diod. 1. 10 *φασὶ τοίνυν Αἰγύπτιοι κατὰ τὴν ἐξ ἀρχῆς τῶν ὅλων γένεσιν πρώτους ἀνθρώπους γενέσθαι κατὰ τὴν Αἴγυπτον διά τε τὴν εὐκρασίαν τῆς χώρας καὶ διὰ τὴν φύσιν τοῦ Νείλου. τοῦτον γὰρ πολύγονον ὄντα καὶ τὰς τροφὰς αὐτοφυεῖς παρεχόμενον ῥᾳδίως ἐκτρέφειν τὰ ζωογονηθέντα... ὅταν γὰρ τοῦ ποταμοῦ τὴν ἀναχώρησιν ποιουμένου τὴν πρώτην τῆς ἰλύος ὁ ἥλιος διαξηράνῃ, φασὶ συνίστασθαι ζῷα, τινὰ μὲν εἰς τέλος ἀπηρτισμένα, τινὰ δὲ ἡμιτελῆ καὶ πρὸς αὐτῇ συμφυῆ τῇ γῇ, ἰδ.* 12 *τὸ μὲν οὖν πνεῦμα Δία προσαγορεῦσαι μεθερμηνευομένης τῆς λέξεως, ὃν αἴτιον ὄντα τοῦ ψυχικοῦ τοῖς ζῴοις ἐνόμισαν ὑπάρχειν πάντων οἱονεί τινα πατέρα... τὴν δὲ γῆν ὥσπερ ἀγγεῖόν τι τῶν φυομένων ὑπολαμβάνοντας μητέρα προσαγορεῦσαι,* the Egyptian word for 'mother' being *μούθ* (Plout. *de Is. et Os.* 56)=Sanchouniathon's Μώτ: *id. Gr. Myth. Rel.*

p. 431 n. 3 further cites the thickening of water into slime and earth in Mandaite speculation (A. J. H. W. Brandt *Die mandäische Religion* Leipzig 1889 p. 50 ff.)). But a similar view was held by Anaximandros (E. Zeller *op. cit.* i. 255 f.), Diogenes of Apollonia (*id. ib.* i. 294, 296), and Anaxagoras (*id. ib.* ii. 356). Empedokles too had spoken of water as a combining element (*frag.* 34 Diels ἄλφιτον ὕδατι κολλήσας). And the equation of Zeus with Pan is again suggestive of philosophical influence (E. Zeller *op. cit.* i. 101), conceivably that of Herakleitos (*supra* i. 28 ff.). On the whole we may conclude that the Orphic theogony bearing the name of Hieronymos or Hellanikos was the summary of an epic poem drafted somewhere in Ionia *c.* 500 B.C.]

(3) The Theogony of the Orphic Rhapsodies.

But the bulk of the Orphic fragments, quoted by neo-Platonists and others, belongs to a third theogony probably called the ἱερὸς λόγος (Orph. *frag.* 63 Kern *ap. et. mag.* p. 231, 22 ff.) or ἱεροὶ λόγοι (Souid. *s.v.* Ὀρφεύς) and contained in 24 Rhapsodies ascribed by some to Theognetos the Thessalian, by others to Kerkops the Pythagorean (*id. ib.*). Of Theognetos nothing more is known. Epigenes in his work *On poetry attributed to Orpheus* (*ap.* Clem. Al. *strom.* i. 21 p. 81, 11 ff. Stählin) regarded Kerkops the Pythagorean as the author of the Orphic εἰς Ἅιδου κατάβασις and ἱερὸς λόγος (cp. Cic. *de nat. deor.* i. 107). And Pythagorean authorship is not impossible, or even improbable; for Herakleides Lembos *frag.* 8 (*Frag. hist. Gr.* iii. 169 f. Müller) *ap.* Diog. Laert. 8. 7 cites the opening hexameter of a ἱερὸς λόγος ascribed to Pythagoras; Iambl. *v. Pyth.* 146 quotes from another ἱερὸς λόγος or περὶ θεῶν λόγος, believed to be by Pythagoras himself or by his son Telauges, a passage of Doric prose, in which Pythagoras declares that he was initiated at Libethra in Thrace by Aglaophamos and there learnt that Orpheus son of Kalliope, taught by his mother on Mt Pangaion, had enunciated the fundamental significance of number etc.; *id. ib.* 258 f. tells how the rhetorician Ninon professed to divulge Pythagorean secrets contained in a work entitled λόγος ἱερός; Souid. *s.v.* Ἀριγνώτη = Eudok. *viol.* 173 speaks of a ἱερὸς λόγος written by the Pythagorean Arignote; and Plout. *de gen. Socr.* 24 makes Theanor the Pythagorean describe Simmias' story of Timarchos' visit to the Underworld as λόγον...ἱερόν: see further A. Delatte *Études sur la littérature pythagoricienne* Paris 1915 pp. 1—79 ('Un ΙΕΡΟΣ ΛΟΓΟΣ pythagoricien'). The Rhapsodic theogony, according to Damaskios *quaest. de primis principiis* 123 (i. 316, 18 ff. Ruelle), cp. *ib.* 50 (i. 100, 19 f.), 123 *bis* (i. 318, 6 ff.), gave the following sequence of events:—In the beginning was Chronos the ageless, father of Aither and Chaos. Then came the cosmic egg, called also 'the brilliant *chitôn*' or 'the cloud' (*ib.* 123 (i. 317, 2 f.) ἤτοι τὸ κυούμενον καὶ τὸ κύον ὠὸν τὸν θεόν, ἢ τὸν ἀργῆτα χιτῶνα, ἢ τὴν νεφέλην), from which sprang Phanes, otherwise known as Metis or Erikepaios. [As to the meaning of these names valuable information is preserved to us by Io. Malal. *chron.* 4 p. 74 Dindorf ἔφρασε δὲ ὅτι τὸ φῶς ῥῆξαν τὸν αἰθέρα ἐφώτισε τὴν γῆν καὶ πᾶσαν τὴν κτίσιν, εἰπὼν ἐκεῖνο εἶναι τὸ φῶς τὸ ῥῆξαν τὸν αἰθέρα τὸ προειρημένον, τὸ ὑπέρτατον πάντων, οὗ ὄνομα ὁ αὐτὸς Ὀρφεὺς ἀκούσας ἐκ τῆς μαντείας ἐξεῖπε, Μῆτιν, Φάνητα, Ἐρικεπαῖον (*sic*)· ὅπερ ἑρμηνεύεται τῇ κοινῇ γλώσσῃ βουλή, φῶς, ζωοδοτήρ (=Kedren. *hist. comp.* 57 D (i. 102 Bekker) βουλή, φῶς, ζωοδοτήρ, cp. Souid. *s.v.* Ὀρφεύς 7 βουλήν, φῶς, ζωήν=Kedren. *hist. comp.* 84 B (i. 148) βουλή, φῶς, ζωή) and by Nonnos Abbas *collectio et explicatio historiarum quibus Gregorius Nazianzenus in priore invectiva in Julianum usus est* 78 (xxxvi. 1028 C Migne) Περὶ Φάνητος καὶ Ἡρικαπαίου. ἐν τοῖς Ὀρφικοῖς ποιήμασιν εἰσηνέχθη τὰ δύο ταῦτα ὀνόματα μετὰ καὶ ἄλλων πολλῶν· ὧν τὸν Φάνητα εἰσφέρει αἰδοῖον ἔχοντα

ὀπίσω περὶ τὴν πυγήν. λέγουσι δὲ αὐτὸν ἔφορον εἶναι τῆς ζωογόνου δυνάμεως· ὁμοίως δὲ καὶ τὸν Ἡρικεπαῖον λέγουσιν ἑτέρας ἔφορον εἶναι δυνάμεως (repeated in a corrupt form by Souid. *s.v. Φάνης*: see G. Bernhardy *ad loc.*). From this it appears that the names Μῆτις and Φάνης had an obvious sense for Greek ears, but that Ἡρικεπαῖος or Ἡρικαπαῖος had not. Presumably Μῆτις (masc.) was a *Kosename* either for *πολύμητις*, which occurs as an Orphic designation of this deity (Orph. *h. Protog.* 6. 10), or—and this I regard as the more probable view—for *μητίετα*, the epic appellative of Zeus (*supra* i. 14 n. 1). *Φάνης* was certainly taken by the Greeks to denote a god of light or daylight or sunlight (*supra* i. 7 n. 6): but of course it remains possible that his name was originally non-Greek; it may *e.g.* have been Thraco-Phrygian, cp. Auson. *epigr.* 48. 3 Mysi Phanacen nominant, 49. 1 Μυσῶν δὲ Φανάκης (F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1840 ii. 226, 1842 iv. 80, Lobeck *Aglaophamus* i. 478 n. [i], O. Höfer in Roscher *Lex. Myth.* iii. 2248). Ἡρικεπαῖος or Ἡρικαπαῖος is a well-known *crux* (for older views see K. W. Goettling *De Ericapaeo Orphicorum numine* Jenae 1862 (=*id. Opuscula academica* Lipsiae 1869 pp. 206—214); for newer, O. Waser in Pauly—Wissowa *Real-Enc.* vi. 452 f. and K. Beth 'Über die Herkunft der orphischen Erikepaios' (god of *Ericibba*=Eridu) in the *Wiener Studien* 1912 xxxiv. 288—300). If we may rely on Malalas' interpretation *ζωοδοτήρ*, it is clear that the name was not Greek. I incline to think that it was Thracian or Thraco-Phrygian. Hence its occurrence as a cult-title of Dionysos at Hierokaisareia in Lydia (J. Keil—A. v. Premerstein 'Bericht über eine Reise in Lydien und der südlichen Aiolis' in the *Denkschr. d. Akad. Wien* 1910 ii. Abh. p. 54 f. no. 112 fig. 51=W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 181 a round altar of white marble inscribed in lettering of *s.* ii A.D. *ἐπὶ ἱεροφάντου* | Ἀρτεμιδώρου τοῦ Ἀπολ|λωνίου Μηνόφιλος, Περη|λίας καὶ Σεκοῦνδος Ἀπολ|λωνίου οἱ συνγενεῖς Διο|νύσῳ Ἡρικεπαίῳ τὸν βωμόν with wreath below and two garlands supported on ram's-heads). The second element in the compound might be paralleled, as O. Gruppe saw (in Roscher *Lex. Myth.* iii. 2268), from Παντικάπης the river in European Sarmatia and Παντικάπαιον the town in the Tauric Chersonesos: The first element, it seems to me, recurs in the name of the river Ἠριδανός (with which A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 129 and *Hattiden und Danubier in Griechenland* Göttingen 1909 p. 37 compared the river-names Ἀπιδανός in Thessaly, Ἰάρδανος in Lydia, Crete, and Elis). Indeed, if Ἠρι-κεπαῖος meant 'Giver of Life,' I would venture to translate Ἠρι-δανός by 'River of Life'—an appellation suited to that mythical stream (Strab. 215 *περὶ τὸν Ἠριδανόν, τὸν μηδαμοῦ γῆς ὄντα, πλησίον δὲ τοῦ Ἅιδου λεγόμενον*, cp. Hdt. 3. 115, Polyb. 2. 16. 6, Plin. *nat. hist.* 37. 31), which was not only a river on earth but also a constellation in heaven (Hes. *frag.* 199 Rzach *ap.* Hyg. *fab.* 152 b, 154, schol. Strozziana *in* Caes. Germ. *Aratea* p. 174, 6 ff. (cp. p. 185, 4 ff.) Breysig, Lact. Plac. *narr. fab.* 2. 2 f., Arat. *phaen.* 359 ff. with schol. *ad loc.* 355, 359, pseudo-Eratosth. *catast.* 37, Caes. Germ. *Aratea* 367 ff., Cic. *Aratea* 143 ff. Baehrens (387 ff.), Mart. Cap. 838, 841, 842, Claudian. *de sext. cons. Hon. Aug.* 175 ff., *Anth. Lat.* i. 2 no. 679. 12 Riese (Priscianus), Nonn. *Dion.* 2. 326 f., 23. 298 ff., 38. 429 ff., Myth. Vat. 3. 6. 21, Eustath. *in* Dionys. *per.* 288) by some called Okeanos (Hyg. *poet. astr.* 2. 32) or the Nile (Hyg. *poet. astr.* 2. 32, pseudo-Eratosth. *catast.* 37, schol. Arat. *phaen.* 359, schol. Caes. Germ. *Aratea* p. 417, 19 Eyssenhardt): see further R. Brown *Eridanus: river and constellation* London 1883, G. Thiele *Antike Himmelsbilder* Berlin 1898 pp. 5, 29 f., 39 f., 49, 124 ff. fig. 50, 147, 164 ff. fig. 72, pls. 2, 4, A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 pp. 60, 189, *id.* in

Roscher *Lex. Myth.* iv. 1468 fig. 35.] Phanes was also spoken of as Πρωτόγονος (Orph. *frag.* 86 Kern *ap.* Herm. *in* Plat. *Phaedr.* p. 141 (p. 148, 25 ff. Couvreur), Orph. *frag.* 85 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 33, 3 ff. Pasquali, *eund. in* Plat. *Tim.* i. 450, 9 ff. Diehl and *ap. eund. in* Plat. *Alcib.* i. 233 Creuzer, cp. Orph. *Arg.* 14 ff.). As μονογενής he was in the time of the emperor Zenon (474—491 A.D.) compared with Christ Himself (*theosoph. Tubing.* 61 in K. Buresch *Klaros* Leipzig 1889 p. 116 f. ὅτι ἐν πολλοῖς Φάνητα φερωνύμως ὁ Ὀρφεὺς προσαγορεύει τὸν μονογενῆ, τὸν υἱὸν τοῦ θεοῦ. κ.τ.λ.). Phanes, when he emerged from the 'white egg' (Orph. *frag.* 70 Kern *ap.* Damask. *quaest. de primis principiis* 55 (i. 111, 17 ff. Ruelle) ἔπειτα δ' ἔτευξε μέγας Χρόνος (so C. A. Lobeck for Κρόνος codd.) *alθέρι δίῳ* | ὠεὸν ἀργύφεον), contained within him the seed of the gods (Orph. *frag.* 85 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 33, 5 f. Pasquali Μῆτιν σπέρμα φέροντα θεῶν κλυτόν, ὃν τε Φάνητα | πρωτόγονον μάκαρες κάλεον κατὰ μακρὸν Ὄλυμπον). Being female as well as male, he begat Nyx, and subsequently consorted with her (Orph. *frag.* 98 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 450, 22 ff. Diehl, Damask. *quaest. de primis principiis* 244 (ii. 116, 4 Ruelle), cp. Prokl. *in* Plat. *Tim.* iii. 170, 4 f. Diehl, Damask. *quaest. de primis principiis* 209 (ii. 92, 22 f. Ruelle)) and by her had three successive pairs of children—Ge or Gaia and Ouranos (Orph. *frag.* 109 Kern *ap.* Herm. *in* Plat. *Phaedr.* pp. 141, 144 (pp. 148, 17 ff., 154, 23 ff. Couvreur)), Rhea and Kronos, Hera and Zeus (Damaskios *quaest. de primis principiis* 244 (ii. 116, 5 ff. Ruelle)). Nyx as queen (Damaskios *quaest. de primis principiis* 209 (ii. 92, 25 ff. Ruelle)) received the sceptre of Phanes or Erikepaios, and in her turn transmitted it to Ouranos, Kronos, Zeus, Dionysos (Orph. *frag.* 107 Kern *ap.* Syrian. *in* Aristot. *met.* N. 4. 1091 b 4 p. 182, 9 ff. Kroll, Alex. Aphr. *in* Aristot. *met.* N. 4. 1091 b 4 p. 821, 5 ff. Hayduck, Prokl. *in* Plat. *Tim.* i. 306, 12 f. and iii. 168, 15 ff. Diehl, Herm. *in* Plat. *Phaedr.* p. 143 (p. 152, 15 ff. Couvreur), Olympiod. *in* Plat. *Phaed.* 61 C p. 2, 21 ff. Norvin, Michael Ephes. *in* Aristot. *met.* N. 4. 1091 b 4 (ed. Berolin. iv. 828 a 8 ff.), Orph. *frag.* 101 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 54, 28 ff. Pasquali, Orph. *frag.* 102 Kern *ap.* Alex. Aphr. *in* Aristot. *met.* N. 4. 1091 b 4 p. 821, 19 ff. Hayduck, Syrian. *in* Aristot. *met.* N. 4. 1091 b 4 p. 182, 14 f. Kroll) ; she also had the gift of prophecy (Orph. *frag.* 103 Kern *ap.* Herm. *in* Plat. *Phaedr.* p. 140 (p. 147, 20 ff. Couvreur)). The gods saw with wonderment the light of their creator Phanes shining in the *aithêr* (Orph. *frag.* 86 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 435, 3 ff. Diehl (cp. *ib.* iii. 83, 4 ff.), Prokl. *in* Plat. *theol.* 3. 21 p. 161 Portus, Damask

quaest. de primis principiis 113 (i. 291, 18 ff. Ruelle), Herm. *in* Plat. *Phaedr.* p. 141 (p. 148, 25 ff. Couvreur), cp. Wolf *anecd.* iii. 209). But Zeus with a view to the ordering of all things consulted both Nyx and Kronos, whom he had already bound (Orph. *frag.* 164 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 206, 26 ff. Diehl, *id. in* Plat. *Cratyl.* p. 30 f.) and mutilated after making him drunk on honey (Orph. *frag.* 154 Kern *ap.* Porph. *de antr. nymph.* 16 παρὰ δὲ τῷ Ὀρφεῖ ὁ Κρόνος μέλιτι ὑπὸ Διὸς ἐνεδρεύεται· πλησθεὶς γὰρ μέλιτος μεθύει καὶ σκοτοῦται ὡς ἀπὸ (Lobeck cj. ὑπὸ) οἴνου καὶ ὑπνοῖ ὡς παρὰ Πλάτωνι (*symp.* 203 B ὁ οὖν Πόρος μεθυσθεὶς τοῦ νέκταρος, οἶνος γὰρ οὔπω ἦν, εἰς τὸν τοῦ Διὸς κῆπον εἰσελθὼν βεβαρημένος ηὗδεν) ὁ Πόρος τοῦ νέκταρος πλησθείς· οὔπω γὰρ οἶνος ἦν. φησὶ γὰρ παρ' Ὀρφεῖ ἡ Νὺξ τῷ Διὶ ὑποτιθεμένη τὸν διὰ μέλιτος δόλον· εὖτ' ἂν δή μιν ἴδηαι ὑπὸ δρυσὶν ὑψικόμοισιν | ἔργοισιν μεθύοντα μελισσάων ἐριβόμβων, | δῆσον αὐτὸν (Barnes cj. αὐτίκα μιν δῆσον). ὃ καὶ πάσχει ὁ Κρόνος καὶ δεθεὶς ἐκτέμνεται ὡς ὁ Οὐρανός, cp. Prokl. *in* Plat. *Cratyl.* pp. 54, 19 and 62, 3 ff. Pasquali). At the advice of Nyx Zeus leapt upon Phanes and swallowed him (Orph. *frag.* 82 Kern *ap.* Prokl. *in* Plat. *Tim.* iii. 102, 2 f. Diehl ὁ δὲ Ὀρφεὺς καὶ ἐπιτηδᾶν αὐτῷ καὶ καταπίνειν δειξάσης μέντοι τῆς Νυκτός, Orph. *frag.* 167 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 324, 14 ff. Diehl ταῦτα δὲ καὶ ὁ Ὀρφεὺς ἐνδεικνύμενος καταπίνεσθαι τὸν νοητὸν θεὸν ἔφατο παρὰ τοῦ δημιουργοῦ τῶν ὅλων· ...ὁ δὲ θεολόγος καὶ οἷον ἐπιπηδᾶν αὐτὸν τῷ νοητῷ καὶ καταπίνειν, ὡς ὁ μῦθος ἔφησεν). Having thus with wide open jaws devoured Phanes, Zeus had within his own belly the body of all things, and, since he had digested the power of that creative god, was himself able to create the universe anew (Orph. *frag.* 167 a Kern *ap.* Prokl. *in* Plat. *Tim.* i. 324, 29 ff. Diehl ὡς τότε Πρωτογόνοιο χανὼν μένος Ἠρικεπαίου | τῶν πάντων δέμας εἶχεν ἑῇ ἐνὶ γαστέρι κοίλῃ, | μίξε δ' ἑοῖς μελέεσσι θεοῦ δύναμίν τε καὶ ἀλκήν, | τοὔνεκα σύν τῷ πάντα (παρὰ codd. E. Abel prints παντὶ E. Diehl cj. πάντα) Διὸς πάλιν ἐντὸς ἐτύχθη.|...πάντα τάδε κρύψας αὖθις φάος ἐς πολυγηθές | μέλλεν ἀπὸ κραδίης προφέρειν πάλι θέσκελα ῥέζων, cp. Prokl. *in* Plat. *Cratyl.* p. 62, 3 ff. Pasquali). Inside Zeus were made afresh the world and all its contents, including gods and goddesses (Orph. *frag.* 167 b Kern *ap.* Prokl. *in* Plat. *Tim.* i. 313, 9 ff. Diehl τοὔνεκα σὺν τῷ πάντα (E. Abel gives παντὶ) Διὸς πάλιν ἐντὸς ἐτύχθη | αἰθέρος εὐρείης ἠδ' οὐρανοῦ ἀγλαὸν ὕψος, | πόντου τ' ἀρργνέτου γαίης τ' ἐρικυδέος ἔδρη (E. Abel has εὕρη), | Ὠκεανός τε μέγας καὶ νείατα τάρταρα γαίης | καὶ ποταμοὶ καὶ πόντος ἀπείριτος ἄλλα τε πάντα | πάντες τ' ἀθάνατοι μάκαρες θεοὶ ἠδὲ θέαιναι, | ὅσσα τ' ἦην γεγαῶτα καὶ ὕστερον ὁππόσ' ἔμελλεν, | ἐνγένετο, Ζηνὸς δ' ἐνὶ γαστέρι σύρρα πεφύκει, cp. Prokl. *in* Plat. *Parm.* iii (p. 621 Stallbaum), Orph. *frag.* 169 Kern *ap.* Prokl. *in* Plat. *Parm.* iv (p. 750 Stallbaum) οὕτως δὲ Ζηνὸς καὶ ἐν ὄμμασι πατρὸς ἄνακτος | ναίουσ' ἀθάνατοί τε θεοὶ θνητοί τ' ἄνθρωποι | ὅσσα τ' ἦην γεγαῶτα καὶ ὕστερον ὁππόσ' ἔμελλε, cp. *theosoph. Tubing.* 50 in K. Buresch *Klaros* Leipzig 1889 p. 109 f.). Accordingly Zeus himself was described by the Orphists in pantheistic terms (Orph. *frag.* 21 a Kern *ap.* Aristot. *de mundo* 7. 401 a 27 ff. (cp. Clem. Al. *strom.* 5. 14 p. 409, 4 ff. Stählin) διὸ καὶ ἐν τοῖς Ὀρφικοῖς οὐ κακῶς λέγεται·—

> Ζεὺς πρῶτος γένετο, Ζεὺς ὕστατος ἀργικέραυνος·
> Ζεὺς κεφαλή, Ζεὺς μέσσα, Διὸς δ' ἐκ πάντα τέτυκται·
> Ζεὺς πυθμὴν γαίης τε καὶ οὐρανοῦ ἀστερόεντος·
> Ζεὺς ἄρσην γένετο, Ζεὺς ἄμβροτος ἔπλετο νύμφη·
> Ζεὺς πνοιὴ πάντων, Ζεὺς ἀκαμάτου πυρὸς ὁρμή·
> Ζεὺς πόντου ῥίζα, Ζεὺς ἥλιος ἠδὲ σελήνη·
> Ζεὺς βασιλεύς, Ζεὺς ἀρχὸς ἁπάντων ἀργικέραυνος·
> πάντας γὰρ κρύψας αὖθις φάος ἐς πολυγηθὲς
> ἐξ ἱερῆς κραδίης ἀνενέγκατο μέρμερα ῥέζων.

A fuller version of these lines is found in Orph. *frag.* 168 Kern *ap.* Euseb. *praep. ev.* 3. 9. 1—3=Stob. *ecl.* 1. 1. 23 p. 29, 9 ff. Wachsmuth (cp. Prokl. *in* Plat. *Alcib.* i. 233 Creuzer, *id. in* Plat. *Parm.* iii (p. 621 Stallbaum), *id. in* Plat. *Tim.* i. 313, 18 ff. Diehl, *ib.* i. 161, 23 ff., i. 307, 28 ff.) τὸν γὰρ Δία τὸν νοῦν τοῦ κόσμου ὑπολαμβάνοντες, ὃς τὰ ἐν αὐτῷ ἐδημιούργησεν ἔχων τὸν κόσμον, ἐν μὲν ταῖς θεολογίαις ταύτῃ περὶ αὐτοῦ παραδεδώκασιν οἱ τὰ Ὀρφέως εἰπόντες·

Ζεὺς πρῶτος γένετο, Ζεὺς ὕστατος ἀργικέραυνος·
Ζεὺς κεφαλή, Ζεὺς μέσσα, Διὸς δ' ἐκ πάντα τέτυκται·
Ζεὺς ἄρσην γένετο, Ζεὺς ἄφθιτος[1] ἔπλετο νύμφη·
Ζεὺς πυθμὴν γαίης τε καὶ οὐρανοῦ ἀστερόεντος·
Ζεὺς βασιλεύς, Ζεὺς αὐτὸς ἁπάντων ἀρχιγένεθλος.
ἓν κράτος, εἷς δαίμων γένετο, μέγας ἀρχὸς ἁπάντων,
ἓν δὲ[2] δέμας βασίλειον, ἐν ᾧ τάδε πάντα κυκλεῖται,
πῦρ καὶ ὕδωρ καὶ γαῖα καὶ αἰθήρ, νύξ τε καὶ ἦμαρ,
καὶ Μῆτις πρῶτος γενέτωρ[3] καὶ Ἔρως πολυτερπής·
πάντα γὰρ ἐν μεγάλῳ Ζηνὸς[4] τάδε σώματι[5] κεῖται.
τοῦ δή τοι κεφαλὴ[6] μὲν ἰδεῖν καὶ καλὰ πρόσωπα
οὐρανὸς αἰγλήεις, ὃν χρύσεαι ἀμφὶς ἔθειραι
ἄστρων μαρμαρέων περικαλλέες ἠερέθονται·
ταύρεα δ' ἀμφοτέρωθε δύο χρύσεια κέρατα,
ἀντολίη τε δύσις τε, θεῶν ὁδοὶ οὐρανιώνων·
ὄμματα δ' ἠέλιός τε καὶ ἀντιόωσα[7] σελήνη·
νοῦς[8] δέ <οἱ[9]> ἀψευδής, βασιλήϊος[10], ἄφθιτος αἰθήρ,
ᾧ δὴ πάντα κλύει[11] καὶ φράζεται, οὐδέ τις ἐστὶν
αὐδὴ οὔτ'[12] ἐνοπὴ οὔτε[13] κτύπος οὐδὲ[14] μὲν ὅσσα
ἢ λήθει Διὸς οὖας ὑπερμενέος Κρονίωνος.
ὧδε μὲν ἀθανάτην κεφαλὴν ἔχει ἠδὲ νόημα·
σῶμα[15] δέ οἱ περιφεγγές[16], ἀπείριτον, ἀστυφέλικτον,
ὄβριμον[17], ὀβριμόγυιον, ὑπερμενὲς ὧδε τέτυκται·
ὦμοι μὲν καὶ στέρνα καὶ εὐρέα νῶτα θεοῖο
ἀὴρ εὐρυβίης· πτέρυγες δέ οἱ ἐξεφύοντο,
τῇς ἐπὶ πάντα ποτᾶθ'· ἱερὴ δέ οἱ ἔπλετο νηδὺς
γαῖά τε παμμήτειρ' ὀρέων τ' αἰπεινὰ κάρηνα·

προφέρει πάντα καὶ δημιουργεῖ τοῖς νοήμασι. κ.τ.λ., *ib.* 3. 9. 10 f. δι' ὧν ἀνεπικαλύπτως ζῷον μέγα τὸν κόσμον ὑποθέμενος, καὶ τοῦτον Δία προσειπών, νοῦν μὲν αὐτοῦ τὸν αἰθέρα, σῶμα δὲ τὰ λοιπὰ τοῦ κόσμου μέρη ἀπεφήνατο εἶναι. τοιοῦτος μέν τις ὁ διὰ τῶν ἐπῶν ὑπογραφόμενος τυγχάνει Ζεύς. ὁ δὲ τῶν ἐπῶν ἐξηγητὴς ἀρξάμενος μὲν τοῖς ἔπεσιν ἀκολούθως λέγει, Ζεὺς οὖν ὁ πᾶς κόσμος, ζῷον ἐκ ζῴων, θεὸς ἐκ θεῶν· σαφῶς τὸν θεολογούμενον Δία οὐδὲ ἄλλον ἢ τὸν ὁρώμενον καὶ αἰσθητὸν κόσμον δηλοῦσθαι διὰ τῶν ἐπῶν ἑρμηνεύσας). Having asked of Nyx how all things might be both one and divided, he was bidden to wrap *aithér* round the world and tie up the bundle with the 'golden cord' (Orph. *frag.* 165 f. Kern *ap.* Prokl. *in* Plat. *Tim.* i. 313, 31 ff. Diehl, ii. 24, 23 ff., ii. 112, 3 ff.: cp. *Il.* 8. 18 ff. with the sensible remarks of Dr W. Leaf *ad loc.*). In arranging the universe he was helped by Dike (Orph. *frag.* 158 Kern *ap.* Prokl. *in* Plat. *remp.* ii. 144, 29 ff. Kroll, *in* Plat. *theol.* 6. 8 p. 363 Portus) and Nomos (Orph. *frag.* 160 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 315, 11 ff. Diehl, *id. in* Plat. *Alcib.* i. 219 f. Creuzer). Rhea, as the mother of Zeus, was named Demeter (Orph. *frag.* 145 Kern *ap.* Prokl. *in* Plat. *Cratyl.* pp. 80, 10 ff. and 90, 28 ff. Pasquali, *in* Plat. *theol.* 5. 11 p. 267 Portus). Athena in full armour sprang from the head of Zeus (Orph. *frag.* 174 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 166, 21 ff. Diehl, cp. Orph. *frag.* 176 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 169, 1 ff. Diehl) and, as 'leader of the Kouretes,' taught them rhythmic dancing (Orph. *frag.* 185 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 112, 16 ff. Pasquali): hence the first Kouretes are said to have been wreathed with olive (Orph. *frag.* 186 Kern *ap.* Prokl. *in* Plat. *remp.* i. 138, 12 ff. Kroll). Athena was also the best of the goddesses at weaving and spinning (Orph. *frag.* 178 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 21, 13 ff. Pasquali). Being herself the wisdom of the creator and the virtue of the leading gods, she bore the name of Arete (Orph. *frag.* 175 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 170, 3 ff. Diehl, cp. i. 185, 1 ff.). Artemis, the lover of virginity (Orph. *frag.* 187 f. Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 105, 18 ff. Pasquali), was also called Hekate (Orph. *frag.* 188 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 106, 25 ff. Pasquali). Zeus and Dione between them produced Aphrodite, who arose—like her namesake the daughter of Ouranos—from the seed of the god falling into the sea (cp. Orph. *frag.* 127 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 110, 15 ff. Pasquali μήδεα δ' ἐς πέλαγος πέσεν ὑψόθεν, ἀμφὶ δὲ τοῖσι | λευκὸς ἐπιπλώουσιν ἑλίσσετο πάντοθεν ἀφρός· | ἐν δὲ περιπλομένοις ὥραις ἐνιαυτὸς ἔτικτεν | παρθένον αἰδοίην, ἣν δὴ παλάμαις ὑπέδεκτο | γεινομένην τὸ πρῶτον ὁμοῦ Ζῆλός τ' Ἀπάτη τε of the first Aphrodite with Orph. *frag.* 183 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 110, 23 ff. Pasquali τὸν δὲ πόθος πλέον εἶλ', ἀπὸ δ' ἔκθορε πατρὶ μεγίστῳ | αἰδοίων ἀφροῖο γονή, ὑπέδεκτο δὲ πόντος | σπέρμα Διὸς μεγάλου· περιτελλομένου δ' ἐνιαυτοῦ | ὥραις καλλιφύτοις τέκ' ἐγερσιγέλωτ' Ἀφροδίτην | ἀφρογενῆ of the second). Zeus also mated with his sister Hera, who was said to be ἰσοτελής, 'of equal rank,' with him (Orph. *frag.* 163 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 450, 20 ff. Diehl, cp. *ib.* iii. 249, 2 ff. So also Orph. εὐχὴ πρὸς Μουσαῖον 16, *id. h. Her.* 16. 2, *id. frag.* 115 Kern *ap.* Eustath. *in* Dionys. *per.* 1, Dion Chrys. *or.* 36 p. 99 Reiske). O. Gruppe (*Cult. Myth. orient. Rel.* i. 637 ff., in the *Jahrb. f. class. Philol.* 1890 Suppl. xvii. 716 ff., *Gr. Myth. Rel.* p. 432, in Roscher *Lex. Myth.* iii. 1140 f.) contends that the Rhapsodic theogony further included much that E. Abel (*Orphica* Lipsiae—Pragae 1885 p. 224 ff.) assigns to the Τελεταί, in particular the whole story of Dionysos. Zeus consorted with his own mother Rhea or Demeter, both he and she being in the form of snakes, and had by her a horned, four-eyed, two-faced daughter Phersephone or Kore, with whom he, again in snake-form, consorted and had for offspring a horned babe, the chthonian Dionysos or Zagreus (*supra* i. 398: other notices of

the myth in Ov. *met.* 6. 114, Philostr. *epist.* 30 (58) Hercher, Nonn. *Dion.* 5. 563 ff., Orph. *frag.* 195 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 85, 19 ff. Pasquali, Orph. *frag.* 198 Kern *ap.* Prokl. *in* Plat. *theol.* 6. 11 p. 371 Portus, cp. Orph. *frags.* 180, 192 f. Kern with the remarks of Lobeck *Aglaophamus* i. 550 ff. and Orph. *frag.* 43 Kern). Zeus installed Dionysos or Zagreus on his own throne as king of the gods, allowing him to hold the sceptre and wield the lightning, the thunder, and the rain (*supra* i. 398 f., 647 n. 3). The decrees of the Father were confirmed by the Son (Orph. *frag.* 218 Kern *ap.* Prokl. *in* Plat. *Tim.* iii. 316, 3 ff. Diehl κραίνε μὲν οὖν Ζεὺς πάντα πατήρ, Βάκχος δ' ἐπέκραινε, with which Gruppe *Gr. Myth. Rel.* p. 432 n. 1 aptly cp. Damaskios *quaest. de primis principiis* 245 (ii. 117, 2 ff. Ruelle) καὶ δὴ καὶ ὁ Διόνυσος ἐπικραίνει τὰ τοῦ Διὸς ἔργα, φησὶν Ὀρφεύς, ὁλοποιοῦ τοῦ Διὸς ὄντος). Apollon (Orph. *frag.* 211 Kern *ap.* Prokl. *in* Plat. *Alcib.* i. 83 Creuzer) and the Kouretes (Orph. *frag.* 151 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 58, 1 ff. Pasquali, *in* Plat. *Tim.* i. 317, 11 ff. Diehl, *in* Plat. *theol.* 5. 3 p. 253 Portus and 5. 35 p. 322 Portus) were set to keep watch and ward over the infant king, who was nurtured by the Nymphs (cp. Nonn. *Dion.* 24. 43 ff.) like a fruitful olive (Orph. *frag.* 206 Kern *ap.* Clem. Al. *strom.* 6. 2 p. 442, 8 ff. Stählin) till his sixth (?) year (Orph. *frag.* 257 Kern *ap.* Tzetz. *exeg. Il.* p. 26 (ed. G. Hermann Leipzig 1812), cited in this connexion by Lobeck *Aglaophamus* i. 554). But Hera in anger got the Titans to trick the boy by means of certain toys (Orph. *frag.* 34 Kern *ap.* Clem. Al. *protr.* 2. 17. 2 f. p. 14, 7 ff. Stählin (=Euseb. *praep. ev.* 2. 3. 23 f.) τὰ γὰρ Διονύσου μυστήρια τέλεον ἀπάνθρωπα· ὃν εἰσέτι παῖδα ὄντα ἐνόπλῳ κινήσει περιχορευόντων Κουρήτων, δόλῳ δὲ ὑποδύντων Τιτάνων, ἀπατήσαντες παιδαριώδεσιν ἀθύρμασιν, οὗτοι δὴ οἱ Τιτᾶνες διέσπασαν, ἔτι νηπίαχον ὄντα, ὡς ὁ τῆς Τελετῆς ποιητὴς Ὀρφεύς φησιν ὁ Θρᾴκιος· "κῶνος καὶ ῥόμβος καὶ παίγνια καμπεσίγυια, | μῆλά τε χρύσεα καλὰ παρ' Ἑσπερίδων λιγυφώνων." καὶ τῇσδε ὑμῖν τῆς τελετῆς τὰ ἀχρεῖα σύμβολα οὐκ ἀχρεῖον εἰς κατάγνωσιν παραθέσθαι· ἀστράγαλος, σφαῖρα, στρόβιλος, μῆλα, ῥόμβος, ἔσοπτρον, πόκος, cp. Arnob. *adv. nat.* 5. 19 cuius rei testimonium argumentumque fortunae suis prodidit in carminibus Thracius talos, speculum, turbines, volubiles rotulas et teretis pilas et virginibus aurea sumpta ab Hesperidibus mala, *supra* i. 661: on these 'toys' see further Lobeck *Aglaophamus* i. 699 ff. and Harrison *Proleg. Gk. Rel.*[2] p. 490 f.) including a mirror made by Hephaistos (Orph. *frag.* 209 Kern *ap.* Prokl. *in* Plat. *Tim.* ii. 80, 19 ff. Diehl). He was looking at himself in this mirror (Plotin. *enn.* 4. 3. 12, Nonn. *Dion.* 6. 173), when the Titans, having first smeared their faces with gypsum, attacked him with a knife (Nonn. *Dion.* 6. 169 ff., cp. *supra* i. 398, 655 n. 2). To escape them he became a youthful Zeus, an aged Kronos, a babe, a youth, a lion, a horse, a horned snake, a tiger, and a bull (Nonn. *Dion.* 6. 174 ff., cp. *supra* i. 398). A bellowing in mid air from the throat of Hera was the signal for his fate: the Titans with their knife cut up his bovine form (Nonn. *Dion.* 6. 200 ff.) into seven portions (Orph. *frag.* 210 Kern *ap.* Prokl. *in* Plat. *Tim.* ii. 146, 9 ff. Diehl), one for each of themselves (Orph. *frag.* 114, 1 f. Kern *ap.* Prokl. *in* Plat. *Tim.* i. 450, 16 ff. Diehl, Orph. *frag.* 114, 3 ff. Kern *ap.* Prokl. *in* Plat. *Tim.* iii. 184, 3 ff. Diehl, cp. Orph. *frag.* 107 p. 171 f. Kern *ap.* Prokl. *in* Plat. *Tim.* iii. 169, 3 ff. Diehl: similarly Typhon divided the body of Osiris into fourteen (Plout. *de Is. et Os.* 18, 42: see Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] ii. 129 n. 4, Farnell *Cults of Gk. States* v. 174 ff.) or twenty-six pieces, one for each of his assailants (Diod. 1. 21=Euseb. *praep. ev.* 2. 1. 16: Diod. 4. 6 calls the assailants Titans)); they then set a caldron on a tripod, boiled the portions, pierced them with spits, held them over the fire (Orph. *frag.* 35 Kern *ap.* Clem. Al. *protr.* 2. 18. 1 p. 14, 17 ff. Stählin cited *supra* p. 218, cp. Firm.

Mat. 8. 2), and finally devoured them (Firm. Mat. 6. 3 cited *supra* i. 661 f., Olympiod. *in* Plat. *Phaed.* 61 C pp. 2, 26 and 3, 4 f. Norvin). Thereupon Hekate went to Olympos (Orph. *frag.* 188 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 107, 1 ff. Pasquali), Zeus appeared, struck the Titans with a thunderbolt, and gave the limbs of Dionysos to Apollon for burial (Orph. *frag.* 35 Kern *ap.* Clem. Al. *protr.* 2. 18. 2 p. 14, 20 ff. Stählin cited *supra* p. 218). Apollon, at the behest of Zeus, arranged all the limbs in order (Orph. *frag.* 216 b Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 108, 17 f. Pasquali Οἶνου (=Διονύσου) *πάντα μέλη κόσμῳ λαβὲ καί μοι ἔνεικε*, Prokl. *in* Plat. *Tim.* ii. 198, 11 ff. Diehl, cp. *ib.* ii. 197, 18 ff.) and took them to Parnassos (Orph. *frag.* 35 Kern *ap.* Clem. Al. *protr.* 2. 18. 2 p. 14, 24 f. Stählin cited *supra* p. 218)—the Titanic caldron being identified with the Delphic tripod (*supra* p. 218 ff.). The Titans had left intact the heart of Dionysos, and this was rescued by Athena (Orph. *frag.* 210 Kern *ap.* Prokl. *in* Plat. *Tim.* ii. 145, 18 ff. Diehl, cp. Prokl. *in* Plat. *Cratyl.* p. 109, 19 ff. Pasquali), who was named Παλλάς because she brandished it (*πάλλειν*) or because it still beat (*πάλλεσθαι*) as she brought it to Zeus (Orph. *frag.* 35 Kern *ap.* Clem. Al. *protr.* 2. 18. 1 p. 14, 16 f. Stählin, schol. *Il.* 1. 200, *et. mag.* p. 649, 56 f., *et. Gud.* p. 450, 9 f., Zonar. *lex. s.v.* Παλλάς, Tzetz. *in* Lyk. *Al.* 355, Eudok. *viol.* 746, Favorin. *lex.* p. 1417, 26 ff.: Eustath. *in Il.* p. 84, 43 f. transfers the incident to the Theban Dionysos, and *et. Gud.* p. 450, 11 ff. makes Athena drive off the Titans by 'brandishing' her spear. Lobeck *Aglaophamus* i. 560 n.[e] quotes Souid. *s.v.* *κωνοφόροι* for the connexion of the heart with Dionysos, and Cornut. *theol.* 6 p. 6, 7 f. Lang for its relation to Rhea). As to what Zeus did with the heart, opinions differed: some said that he placed it in a gypsum image of the boy (Firm. Mat. 6. 4 cited *supra* i. 662), but the common view was that he pounded it into a potion and gave it to Semele to drink, that she conceived thereby, and that Zagreus thus came to life again as Dionysos (Hyg. *fab.* 167 Liber Iovis et Proserpinae filius a Titanis est distractus, cuius cor contritum Iovis Semelae dedit in potionem. ex eo praegnans cum esset facta, Iuno in Beroen nutricem Semeles se commutavit et ait: 'alumna, pete a Iove ut sic ad te veniat, quem ad modum ad Iunonem, ut scias quae voluptas est (J. Scheffer cj. *sit* cp. *fab.* 179) cum deo concumbere.' illa autem instigata petit ab Iove, et fulmine est icta. ex cuius utero Liberum exuit et Nyso dedit nutriendum unde Dionysus est appellatus et Bimater est dictus, Orph. *frag.* 210 p. 231 f. Kern *ap.* Prokl. *h. Ath. Polym.* 7. 11 ff. (E. Abel *Orphica* Lipsiae—Pragae 1885 p. 282) *ἡ κραδίην ἐσάωσας ἀμιστύλλευτον ἄνακτος | αἰθέρος ἐν γυάλοισι μεριζομένου ποτὲ Βάκχου | Τιτήνων ὑπὸ χερσί· πόρες δέ ἑ πατρὶ φέρουσα, | ὄφρα νέος βουλῆσιν ὑπ' ἀρρήτοισι τοκῆος | ἐκ Σεμέλης περὶ* (Lobeck *Aglaophamus* i. 561 prints *κατὰ*) *κόσμον ἀνηβήσῃ Διόνυσος*, Nonn. *Dion.* 24. 47 ff. (Hydaspes to Dionysos) *καὶ σὺ φέρεις Ζαγρῆος ὅλον δέμας· ἀλλὰ σὺ κείνῳ | δὸς χάριν ὑψιτέλεστον, ὅθεν πέλες· ἀρχεγόνου γὰρ | ἐκ κραδίης ἀνέτελλες, ἀειδομένου Διονύσου* (H. Koechly cj. *ἀεξόμενος Διονύσου*, but see Nonn. *Dion.* 1. 12), Commod. *instructiones* (an acrostich LIBER PATER etc.) 1. 12. 1 ff. Liberum Patrem certe bis genitum dicitis ipsi. | In India natus ex Iove Proserpina primum | Belligerans contra Titanas profuso cruore | Expiravit enim sicut ex mortalibus unus. | Rursus flato (B. Dombart *ad loc.* notes 'spiritui, animae, vitae?' *flato* C (*l* altera (?) manu expunctum). B A^{m}.*r*^{1}. *fato* A^{1}.*r.v.*) suo redditus (F. Oehler cj. *redditur*) in altero ventre. | Percepit (so B. Dombart for *percipit* codd.) hoc Semele iterum Iovis altera moecha (*Maia r.* Oehler), | Absciso (so C. *Abscisso* B.A.*r.v.*) cuius utero prope partu (*partum r*^{2}. Oehler) defunctae | Tollitur et datur Niso nutriendus alumnus. | Ex eo bis natus Dionysus ille vocatur, | Religio cuius in vacuo falsa curatur, | etc.). Thus the

upshot of the Titans' murderous onslaught was that their victim was put together again (Cornut. *theol.* 31 p. 62, 10 f. Lang *μυθολογεῖται δ' ὅτι διασπασθεὶς ὑπὸ τῶν Τιτάνων συνετέθη πάλιν ὑπὸ τῆς 'Ρέας, κ.τ.λ.* = Eudok. *viol.* 272 p. 210, 10 ff. Flach, Ioul. *ap.* Kyrill. Al. *c. Iul.* 2. 44 (lxxvi. 568 B—C Migne) *<τῇ> μητρὶ γὰρ ὁ Ζεὺς ἐμίχθη καὶ παιδοποιησάμενος ἐξ αὐτῆς ἔγημεν αὐτὸς τὴν αὐτοῦ θυγατέρα <οὐδὲ κατέσχεν* vel simile quiddam ins. Lobeck *Aglaophamus* i. 562 n. [f]*>, ἀλλὰ μιχθεὶς ἁπλῶς ἄλλῳ παραδέδωκεν αὐτήν. εἶτα οἱ Διονύσου σπαραγμοὶ καὶ μελῶν κολλήσεις*) and attained a joyful resurrection (Orph. *frags.* 205, 213, 240 Kern *ap.* Prokl. *in* Plat. *Tim.* iii. 241, 5 ff. Diehl, Iust. Mart. *apol.* 1. 21 (vi. 360 A Migne), 1. 54 (vi. 410 A—B Migne), *cum Tryph. Iud. dial.* 69 (vi. 636 C—638 A Migne), Myth. Vat. 3. 12. 5, Macrob. *comm. in somn. Scip.* 1. 12. 12), whilst the aggressors were visited with condign punishment (Nonn. *Dion.* 6. 206 ff. makes Zeus fling them into Tartaros, as does Prokl. *in* Plat. *Tim.* i. 188, 26 ff., cp. Prokl. *in* Plat. *remp.* i. 93, 22 ff. Kroll; but various offenders, *e.g.* Atlas, were reserved for special fates (Orph. *frag.* 215 Kern *ap.* Prokl. *in* Plat. *Tim.* i. 173, 1 ff. Diehl, Simpl. *in* Aristot. *de cael.* 2. 1. 284 a 1 p. 375, 12 ff. Heiberg, cp. Firm. Mat. 6. 4 cited *supra* i. 662). The bodies of those that had been struck by the thunderbolts were reduced to powder, hence called *τίτανος* (Eustath. *in Il.* p. 332, 23 ff.: see *supra* i. 655 n. 2), and from their smoking ashes men were made (Olympiod. *in* Plat. *Phaed.* 61 C p. 2, 27 ff. Norvin *καὶ τούτους ὀργισθεὶς ὁ Ζεὺς ἐκεραύνωσε, καὶ ἐκ τῆς αἰθάλης τῶν ἀτμῶν τῶν ἀναδοθέντων ἐξ αὐτῶν ὕλης γενομένης γενέσθαι τοὺς ἀνθρώπους*, cp. Dion Chrys. *or.* 30 p. 550 Reiske *ὅτι τοῦ τῶν Τιτάνων αἵματος ἐσμὲν ἡμεῖς ἅπαντες οἱ ἄνθρωποι*). It follows that we are part and parcel of Dionysus (Olympiod. *ib.* p. 3, 2 ff. Norvin *οὐ δεῖ ἐξάγειν ἡμᾶς ἑαυτοὺς ὡς τοῦ σώματος ἡμῶν Διονυσιακοῦ ὄντος· μέρος γάρ αὐτοῦ ἐσμεν, εἴ γε ἐκ τῆς αἰθάλης τῶν Τιτάνων συγκείμεθα γενσαμένων τῶν σαρκῶν τούτου*), or he of us (Prokl. *in* Plat. *Cratyl.* p. 77, 24 ff. Pasquali *ὅτι ὁ ἐν ἡμῖν νοῦς Διονυσιακός ἐστιν καὶ ἄγαλμα ὄντως τοῦ Διονύσου. κ.τ.λ.*). Others taught that men arose from the blood of the Giants (Ov. *met.* 1. 154 ff., interp. Serv. *in* Verg. *ecl.* 6. 41) or from a rain of blood-drops let fall by Zeus (Ioul. *frag. epist.* i. 375, 21 ff. Hertlein *ἀποβλέψαντα...εἰς τὴν τῶν θεῶν φήμην, ἣ παραδέδοται διὰ τῶν ἀρχαίων ἡμῖν θεουργῶν, ὡς, ὅτε Ζεὺς ἐκόσμει τὰ πάντα, σταγόνων αἵματος ἱεροῦ πεσουσῶν, ἐξ ὧν που τὸ τῶν ἀνθρώπων βλαστήσειε γένος*).

The Rhapsodies, which—as the foregoing summary shows—began with theogony and ended with anthropogony, are supposed by O. Gruppe (*Gr. Myth. Rel.* p. 430, *id.* in Roscher *Lex. Myth.* iii. 1141 ff., cp. *Myth. Lit.* 1908 p. 215) to have been put together at Athens between 550 and 300 B.C., though they did not obtain much recognition till the time of the neo-Pythagoreans. A *provenance* in Pisistratic Athens is suggested, he thinks, by the dedication of this Orphic poem to Mousaios (*theosoph. Tubing.* 61 in K. Buresch *Klaros* Leipzig 1889 p. 117, 3), by the identification of Phanes with Metis which allowed Athena (*infra* § 9 (h) ii (μ)) to be viewed as one aspect of the reborn Erikepaios, by the affiliation of Artemis or Hekate (*supra* p. 1029) to Demeter (Orph. *frag.* 188 Kern *ap.* Prokl. *in* Plat. *Cratyl.* p. 106, 25 ff. Pasquali, Orph. *frag.* 41 Kern *ap.* schol. Ap. Rhod. 3. 467, cp. Kallim. *frag.* 556 Schneider *ap.* schol. Theokr. 2. 12) —a genealogy known to Aischylos (*supra* p. 252), and by the equation of Rhea with Demeter (*supra* i. 398, ii. 1029) which appears also in Euripides (Eur. *Hel.* 1301 ff.) and other fifth-century poets (Pind. *Isthm.* 7 (6). 3 f., Melanippid. *frag.* 10 Bergk[4] *ap.* Philodem. *περὶ εὐσεβείας* 51, 11 ff. p. 23 Gomperz: see further Gruppe *Gr. Myth. Rel.* p. 1169 n. 7, O. Kern in Pauly—Wissowa *Real-Enc.* iv. 2755, Farnell *Cults of Gk. States* iii. 32, 312). Bendis (Orph. *frag.* 200 Kern *ap.* Prokl. *in* Plat. *remp.* i. 18, 12 ff. Kroll), the one barbaric deity mentioned in

the poem, was worshipped at Athens in 403 B.C. (*supra* p. 115), if not earlier (A. Rapp in Roscher *Lex. Myth.* i. 780, G. Knaack in Pauly—Wissowa *Real-Enc.* iii. 269 f.: Gruppe in Roscher *Lex. Myth.* iii. 1142 suggests that her cult was introduced 'wahrscheinlich durch Peisistratos' thrakische Unternehmungen'). M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 239 f. (cp. *ib.* p. 3 n. 2) notes that Kratinos the younger, a contemporary of Platon the philosopher, in his *Gigantes frag.* 1 (*Frag. com. Gr.* iii. 374 Meineke) *ap.* Athen. 661 E—F *ἐνθυμεῖσθε* (so A. Meineke for *ἐνθύμει δὲ* codd. K. W. Dindorf cj. *ἐνθυμοῦ* (?) *δὲ*) *τῆς γῆς ὡς γλυκύ | ὄζει, καπνός τ' ἐξέρχετ' εὐωδέστερος* (T. Bergk cj. *εὐωδέστατος*); | *οἰκεῖ τις ὡς ἔοικεν ἐν τῷ χάσματι | λιβανωτοπώλης ἢ μάγειρος Σικελικός* makes fun of the scene in which Zeus was attracted to the Titans' feast by the smell of roast flesh (Orph. *frag.* 34 Kern *ap.* Arnoh. *adv. nat.* 5. 19, Orph. *frag.* 35 Kern *ap.* Clem. Al. *protr.* 2. 18. 2 p. 14, 20 ff. Stählin cited *supra* p. 218) and works in a not very appropriate allusion to the *χάσμα* (Orph. *frag.* 66 a Kern *ap.* Prokl. *in* Plat. *remp.* ii. 138, 8 ff. Kroll, Syrian. *in* Aristot. *met.* 2. 4. 1000 b 14 p. 43, 30 f. Kroll, Simplic. *in* Aristot. *phys.* 4. 1. 208 b 29 p. 528, 14 f. Diels, Orph. *frag.* 66 b Kern *ap.* Prokl. *in* Plat. *Tim.* i. 385, 29 ff. Diehl). Further evidence as to date is at best doubtful. Platon himself has no direct allusion to the Rhapsodies[1]; but it must not be inferred that therefore they are post-Platonic, for they in turn are apparently uninfluenced either by Platon or by later philosophers. Their principal trait, the conception of a world born and re-born, first created by Phanes and then re-created by Zeus, points rather—as Gruppe saw (*Cult. Myth. orient. Rel.* i. 643 ff., *Gr. Myth. Rel.* p. 428 ff., and in Roscher *Lex. Myth.* iii. 1143 ff.)—to ideas that were current in Greece (Anaximandros, Herakleitos, Empedokles) between, say, 550 and 450 B.C. On the whole, then, it may be concluded that the Rhapsodic Theogony was composed at Athens (?) *c.* 500 B.C. (?), and consisted in a rehandling of older Orphic materials by a Pythagorising (?) poet. Hence its vogue among neo-Pythagorean writers of the Graeco-Roman age.

(4) Conspectus of the Orphic Theogonies.

For clearness' sake I add a conspectus showing the three chief forms of Orphic theogony. The letters at the side indicate the creation (A) and re-creation (B) of the world: the numerals give the sequence of mythical generations (1—6).

(5) The Cosmic Egg.

The most striking feature of these theogonies is the cosmic egg—a conception discussed by R. G. Latham *Descriptive Ethnology* London 1859 i. 439—441, J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1883 ii. 559 n. 4, Costantin in the *Rev. Arch.* 1899 i. 355 ff. fig. 6 f., L. Frobenius *Das Zeitalter des Sonnengottes* Berlin 1904 i. 269—271 ('Die Ureimythe'), M. P. Nilsson 'Das Ei im Totenkult der Alten' in the *Archiv f. Rel.* 1908 xi. 543 and 544 f., and especially F. Lukas 'Das Ei als kosmogonische Vorstellung' in the *Zeitschrift des Vereins für Volkskunde* 1894 iv. 227—243 (this author attempts, not altogether successfully, to distinguish three aspects of the egg in ancient and modern cosmogonies: (1) the world in general is egg-shaped and

[1] Mr F. M. Cornford, however, points out to me that Plat. *legg.* 715 E—716 A is apparently paraphrasing not only, as the schol. *ad loc.* saw, Orph. *frag.* 21 Kern *Ζεὺς ἀρχή, Ζεὺς μέσσα, Διὸς δ' ἐκ πάντα τέτυκται*, but also Orph. *frag.* 158 Kern *τῷ δὲ Δίκη πολύποινος ἐφεῖπετο πᾶσιν ἀρωγός*—both lines being probably extant in the Rhapsodic Theogony (cp. E. Abel *Orphica* Lipsiae—Pragae 1885 p. 157 n. 1).

EARLY ORPHIC THEOGONY

composed in Asia Minor (?) *c.* 5. X B.C. (?) as the result of Ionic speculation on Thraco-Phrygian beliefs.

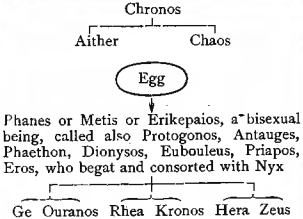
RHAPSODIC THEOGONY

composed at Athens (?) *c.* 500 B.C. (?) by a Pythagorising (?) poet in touch with the doctrines of other Greek philosophers.



A 1
2
3

Zeus, at the advice of Nyx, swallows Phanes and creates the world anew inside himself. — B
He produces out of his own head Athena who is also Arete. — 4
His union with his sister Hera remains unfruitful.
His union with Dione produces Aphrodite. — 4
His union with Semele produces Dionysos. — 4

Zeus as a snake = his mother Rhea or Demeter as a snake

Zeus as a snake = Phersephone or Kore, a horned, four-eyed, two-faced daughter — 4

The chthonian Dionysos or Zagreus, a horned babe, whose murderers the Titanes were slain by Zeus. From their ashes sprang — 5

Men — 6

was originally an egg ('*Weltei*') ; (2) the sun in particular is egg-shaped and was originally an egg ('*Lichtei*', '*Sonnenei*') : (3) the life of all things has been developed like that of a chicken from an egg ('*das Ei als Embryonalzustand*')).

Confining our attention to old-world examples, we note the following : (*a*) EGYPT. Râ as a phoenix (*supra* i. 341) came out of the great egg produced by Seb and Nut (E. A. Wallis Budge *The Gods of the Egyptians* London 1904 ii. 95 f., 107 n. 1, 110, cp. A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 pp. 26, 81, 157). Ptaḥ the 'Padre dei principii creatore dell' uovo del sole e della Luna' (Lanzone *Dizion. di Mitol. Egiz.* p. 239) was represented as a potter shaping on his wheel the cosmic egg (*id. ib.* p. 250 f. pl. 94, 1). Cp. Sir G. Maspero *The Dawn of Civilization*[4] London 1901 p. 128 with *id. The Struggle of the Nations* London 1896 p. 168 n. 1.

(*b*) INDIA. In Vedic cosmogony Aditi had eight sons, but the eighth, Mârtâṇḍa, the 'Egg-born,' she cast away, having brought him forth to be born and to die (*i.e.* to rise and to set : see the *Rig-Veda* 10. 72. 8 and the remarks of E. W. Hopkins *The Religions of India* Boston etc. 1895 p. 208 n. 2, A. A. Macdonell *Vedic Mythology* Strassburg 1897 p. 13, H. Oldenberg *La religion du Véda* Paris 1903 p. 156 n. 2). Again, according to the *Rig-Veda* 10. 121. 1 (*Vedic Hymns* trans. F. Max Müller (*The Sacred Books of the East* xxxii) Oxford 1891 p. 1), 'In the beginning there arose the Golden Child (Hiraṇyagarbha) ; as soon as born, he alone was the lord of all that is'..., on which Max Müller *ib.* p. 6 observes that the epithet *Hiraṇyagarbha* 'means literally the golden embryo, the golden germ or child, or born of a golden womb, and was no doubt an attempt at naming the sun'—a view endorsed by A. A. Macdonell *Vedic Mythology* Strassburg 1897 pp. 13, 119 : 'In the last verse of this hymn, he is called Prajâpati, "lord of created beings," the name which became that of the chief god of the Brâhmaṇas.' 'This is the only occurrence of the name [*Hiraṇyagarbha*] in the RV., but it is mentioned several times in the AV. and the literature of the Brâhmaṇa period (cp. p. 13). Hiraṇyagarbha is also alluded to in a passage of the AV. (4, 2^8) where it is stated that the waters produced an embryo, which as it was being born, was enveloped in a golden covering. In the TS. (5, 5, 1^2) Hiraṇyagarbha is expressly identified with Prajâpati. In the later literature he is chiefly a designation of the personal Brahmâ.' A. A. Macdonell *op. cit.* p. 14 : 'The account given in the Chândogya Brâhmaṇa (5, 19) is that not-being became being ; the latter changed into an egg, which after a year by splitting in two became heaven and earth ; whatever was produced is the sun, which is Brahma'... Similarly in the *Kh*ândogya-upanishad 3. 19. 1 ff. (*The Upanishads* trans. F. Max Müller (*The Sacred Books of the East* i) Oxford 1879 p. 54 f.) : '1. Âditya (the sun) is Brahman... In the beginning this was non-existent. It became existent, it grew. It turned into an egg. The egg lay for the time of a year. The egg broke open. The two halves were one of silver, the other of gold. 2. The silver one became this earth, the golden one the sky, the thick membrane (of the white) the mountains, the thin membrane (of the yoke [*sic!*]) the mist with the clouds, the small veins the rivers, the fluid the sea. 3. And what was born from it that was Âditya, the sun'... Cp. the birth of Prajâpati as described in the *Çatapatha Brâhmaṇa* 11. 1. 6. 1 f. (*The Satapatha-Brâhmaṇa* trans. J. Eggeling Part v (*The Sacred Books of the East* xliv) Oxford 1900 p. 12) : '1 Verily, in the beginning this (universe) was water, nothing but a sea of water. The waters desired, "How can we be reproduced?" They toiled and performed fervid devotions[1] ([1] Or, they toiled and became heated (with fervid devotion).), when they were becoming heated, a golden egg was produced. The

year, indeed, was not then in existence: this golden egg floated about for as long as the space of a year. 2 In a year's time a man, this Pragâpati, was produced therefrom... He broke open this golden egg'... or the birth of Brahma as related in the *Laws of Manu* 1. 5 ff. (*The Laws of Manu* trans. G. Bühler (*The Sacred Books of the East* xxv) Oxford 1886 p. 2 ff.): '5 This (universe) existed in the shape of Darkness... 6 Then the divine Self-existent (Svayambhû, himself)... appeared, dispelling the darkness... 8 He, desiring to produce beings of many kinds from his own body, first with a thought created the waters, and placed his seed in them. 9 That (seed) became a golden egg, in brilliancy equal to the sun; in that (egg) he himself was born as Brahman, the progenitor of the whole world... 12 The divine one resided in that egg during a whole year, then he himself by his thought (alone) divided it into two halves; 13 And out of those two halves he formed heaven and earth, between them the middle sphere, the eight points of the horizon, and the eternal abode of the waters.' Later Hinduism sometimes represented Brahma as born in a golden egg (*Mahâ-Bhârata* 12. 312. 1—7 cited by E. W. Hopkins *The Religions of India* Boston etc. 1895 p. 411), and spoke of a bubble, which contained Viṣṇu as Brahma (*Viṣṇu Purâṇa* 1. 2. 45 f.). See further H. Jacobi in J. Hastings *Encyclopædia of Religion and Ethics* Edinburgh 1911 iv. 156—160 and the monograph of K. F. Geldner *Zur Kosmogonie des Rigveda* Marburg 1908.

(*c*) PERSIA. In Parsi speculation of Sassanian date Ahura the creator made heaven like an egg with the earth for its yolk. *Minokhired* 44. 8—11 (*Dînâ-î Maînôg-î Khirad* trans. E. W. West (*The Sacred Books of the East* xxiv) Oxford 1885 p. 84 f.): 'The sky and earth and water, and whatever else is within them are egg-like (khâîyak-dîs), just as it were like the egg of a bird. 9. The sky is arranged above the earth (L 19 adds 'and below the earth'), like an egg, by the handiwork of the creator Aûharmazd; (10) and the semblance of the earth, in the midst of the sky (L 19 has 'and the earth within the sky'), is just like as it were the yolk amid the egg; [(11) and the water within the earth and sky is such as the water within the egg.]'. Cp. Plout. *de Is. et Os.* 47 *εἶθ' ὁ μὲν Ὡρομάζης τρὶς ἑαυτὸν αὐξήσας ἀπέστησε τοῦ ἡλίου τοσοῦτον ὅσον ὁ ἥλιος τῆς γῆς ἀφέστηκε, καὶ τὸν οὐρανὸν ἄστροις ἐκόσμησεν· ἕνα δὲ ἀστέρα πρὸ πάντων οἷον φύλακα καὶ προόπτην ἐγκατέστησε τὸν σείριον, ἄλλους δὲ ποιήσας τέτταρας καὶ εἴκοσι θεοὺς εἰς ὠὸν ἔθηκεν. οἱ δὲ ὑπὸ τοῦ Ἀρειμανίου γενόμενοι καὶ αὐτοὶ τοσοῦτοι διέτρησαν τὸ ὠόν· ὅθεν* (so D. Wyttenbach, after Xylander, for *διατρήσαντος τὸ ὠὸν γανωθὲν*) *ἀναμέμικται τὰ κακὰ τοῖς ἀγαθοῖς* with the comments of R. Eisler *Weltenmantel und Himmelszelt* München 1910 pp. 410 n. 2 f., 414 n. 2, 537 and J. H. Moulton *Early Zoroastrianism* London 1913 p. 402 n. 4.

(*d*) PHOINIKE. Of the Phoenician cosmogony we have a threefold account. (i) Eudemos of Rhodes *ap.* Damask. *quaest. de primis principiis* 125 *ter* (i. 323, 1 ff. Ruelle) *Σιδώνιοι δὲ κατὰ τὸν αὐτὸν συγγραφέα πρὸ πάντων Χρόνον ὑποτίθενται καὶ Πόθον καὶ Ὁμίχλην, Πόθου δὲ καὶ Ὁμίχλης μιγέντων ὡς δυεῖν ἀρχῶν Ἀέρα γενέσθαι καὶ Αὔραν, Ἀέρα μὲν ἄκρατον τοῦ νοητοῦ παραδηλοῦντες, Αὔραν δὲ τὸ ἐξ αὐτοῦ κινούμενον τοῦ νοητοῦ ζωτικὸν προτύπωμα. πάλιν δὲ ἐκ τούτων ἀμφοῖν Ὦτον γεννηθῆναι κατὰ τὸν νοῦν, οἶμαι τὸν νοητόν.* Ὦτος is hardly to be identified with either of the mythical personages so named (O. Höfer in Roscher *Lex. Myth.* iii. 1231 f.); nor shall we venture with Gruppe *Cult. Myth. orient. Rel.* i. 349 to take the word as *ὦτος*, 'the horned owl' (though this bird with crook and flail appears on the coinage of Tyre: see Imhoof-Blumer and O. Keller *Tier- und Pflanzenbilder auf Münzen und Gemmen des klassischen Altertums* Leipzig 1889 p. 32 pl. 5, 22, O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 38 f. pl. 1, 8—other

examples in *Brit. Mus. Cat. Coins* Phoenicia pp. cxxvii, 227—233 pls. 28, 9—29, 17, *Hunter Cat. Coins* iii. 263 pl. 76, 31, Head *Coins of the Ancients* p. 41 pl. 20, 46, p. 61 pl. 29, 36, *id. Hist. num.*[2] p. 799 fig. 352); nor yet to treat Ὦτον as a corruption of ᾠόν, the cosmic 'egg' (J. Kopp in his ed. of Damaskios (Frankfurt-am-Main 1826) cj. ᾠόν, and so did F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1840 ii. 345 n. 2), though we should thereby reduce all the names in this genealogy to common Greek substantives—*χρόνος, πόθος, ὁμίχλη, ἀήρ, αὔρα, ᾠόν*. If any change is required, I would rather correct Ὦτον to Μῶτον = the Μώτ of Sanchouniathon's cosmogony (*infra* (iii)). (ii) Mochos of Sidon (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 p. 969 f.) *ap.* Damask. *quaest. de primis principiis* 125 *ter* (i. 323, 6 ff. Ruelle) *ὡς δὲ ἔξωθεν* Εὐδήμου *τὴν Φοινίκων εὑρίσκομεν κατὰ* Μῶχον *μυθολογίαν, Αἰθὴρ ἦν τὸ πρῶτον καὶ* Ἀὴρ *αἱ δύο αὖται ἀρχαί, ἐξ ὧν γεννᾶται* Οὐλωμός, *ὁ νοητὸς θεός, αὐτό, οἶμαι, τὸ ἄκρον τοῦ νοητοῦ· ἐξ οὗ ἑαυτῷ συνελθόντος γεννηθῆναί φασι* Χουσωρόν, *ἀνοιγέα πρῶτον, εἶτα ᾠόν, τοῦτον μέν, οἶμαι, τὸν νοητὸν νοῦν λέγοντες, τὸν δὲ ἀνοιγέα* Χουσωρόν, *τὴν νοητὴν δύναμιν ἅτε πρώτην διακρίνασαν τὴν ἀδιάκριτον φύσιν, εἰ μὴ ἄρα μετὰ τὰς δύο ἀρχὰς τὸ μὲν ἄκρον ἐστὶν* Ἄνεμος *ὁ εἷς, τὸ δὲ μέσον οἱ δύο ἄνεμοι Λίψ τε καὶ* Νότος· *ποιοῦσι γάρ πως καὶ τούτους πρὸ τοῦ* Οὐλωμοῦ· *ὁ δὲ* Οὐλωμὸς *αὐτὸς ὁ νοητὸς εἴη νοῦς, ὁ δὲ ἀνοιγεὺς* Χουσωρὸς *ἡ μετὰ τὸ νοητὸν πρώτη τάξις, τὸ δὲ* Ὠὸν *ὁ οὐρανός· λέγεται γὰρ ἐξ αὐτοῦ ῥαγέντος εἰς δύο γενέσθαι* Οὐρανὸν *καὶ* Γῆ, *τῶν διχοτομημάτων ἑκάτερον*. The names Οὐλωμός and Χουσωρός are presumably Phoenician, not Greek. Οὐλωμός is commonly regarded as the transliteration of the Hebrew עוֹלָם (*ōlām*), 'eternity,' though Gruppe *Cult. Myth. orient. Rel.* i. 514 (cp. i. 349, 642) says: 'Dies Wesen war höchst wahrscheinlich zweigeschlechtig gedacht, da es mit sich selbst den Χουσωρός erzeugt... Demnach scheint es mir (trotz der von Schuster *de vet. Orph. theog. ind. atq. or.* S. 98. Anm. 1 citirten *Kabbala*stelle) zweifellos, dass Οὐλωμός nicht... von עלם "Ewigkeit,' sondern von עלם "Geschlechtstrieb empfinden" abgeleitet ist.' Mr N. McLean, to whom I have referred the point, tells me (Sept. 13, 1916) that Οὐλωμός might perhaps be connected with אוּלָם (*ūlām*), 'the front, that which is first,' but is more probably the Grecised form of עוֹלָם ('*ōlām*), 'eternity.' Similarly Count Baudissin sees in 'Οὐλωμός (wohl עוֹלָם)' 'Den Gott der Vorzeit' (W. W. Baudissin *Adonis und Esmun* Leipzig 1911 pp. 503 and 488). Cp. Gen. 21. 33 'And *Abraham* planted a tamarisk tree in Beer-sheba, and called there on the name of the LORD, the Everlasting God' with J. Skinner's note *ad loc.*: ''*El* '*Ôlâm*] presumably the pre-Israelite name of the local *numen*, here identified with Yahwe' etc. Χουσωρός, 'the Opener,' remains obscure. H. Ewald 'Über die phönikischen Ansichten von der Weltschöpfung und den geschichtlichen Werth Sanchuniathon's' in the *Abh. d. gött. Gesellsch. d. Wiss. 1851—1852* Phil.-hist. Classe v. 17 would read Χουσώρ for Χρυσώρ in the anthropogony of Sanchouniathon as given by Philon Bybl. *frag.* 2. 9 (*Frag. hist. Gr.* iii. 566 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 11 f. *χρόνοις δὲ ὕστερον πολλοῖς ἀπὸ τῆς* Ὑψουρανίου *γενεᾶς γενέσθαι* Ἀγρέα *καὶ* Ἁλιέα, *τοὺς ἄγρας καὶ ἁλιείας εὑρετάς, ἐξ ὧν κληθῆναι ἀγρευτὰς καὶ ἁλιεῖς· ἐξ ὧν γενέσθαι δύο ἀδελφοὺς σιδήρου εὑρετὰς καὶ τῆς τούτου ἐργασίας, ὧν θάτερον τὸν* Χρυσὼρ *λόγους ἀσκῆσαι καὶ ἐπῳδὰς καὶ μαντείας· εἶναι δὲ τοῦτον τὸν* Ἥφαιστον, *εὑρεῖν δὲ καὶ ἄγκιστρον καὶ δέλεαρ καὶ ὁρμιὰν καὶ σχεδίαν, πρῶτόν τε πάντων ἀνθρώπων πλεῦσαι· διὸ καὶ ὡς θεὸν αὐτὸν μετὰ θάνατον ἐσεβάσθησαν· καλεῖσθαι δὲ αὐτὸν καὶ Δία* Μειλίχιον. κ.τ.λ. But Χρυσώρ may well be an attempt to make the Phoenician Χουσωρός intelligible to Greek readers. Be that as it may, Χουσωρός was doubtless 'the Opener' of the cosmic egg (so F. Creuzer *Symbolik und Mythologie*[3] Leipzig

and Darmstadt 1840 ii. 347, 1842 iv. 250, W. Robertson Smith in T. K. Cheyne —J. S. Black *Encyclopædia Biblica* London 1899 i. 942 n. 9, R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 440 n. 6). (iii) Sanchouniathon in Philon Bybl. *frag.* 2. 1 f. (*Frag. hist. Gr.* iii. 565 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 1 f. *τὴν τῶν ὅλων ἀρχὴν ὑποτίθεται ἀέρα ζοφώδη καὶ πνευματώδη, ἢ πνοὴν ἀέρος ζοφώδους, καὶ χάος θολερόν, ἐρεβῶδες· ταῦτα δὲ εἶναι ἄπειρα, καὶ διὰ πολὺν αἰῶνα μὴ ἔχειν πέρας. 'ὅτε δέ,' φησίν, 'ἠράσθη τὸ πνεῦμα τῶν ἰδίων ἀρχῶν, καὶ ἐγένετο σύγκρασις, ἡ πλοκὴ ἐκείνη ἐκλήθη πόθος. αὕτη δὲ ἀρχὴ κτίσεως ἁπάντων. αὐτὸ δὲ οὐκ ἐγίνωσκε τὴν αὐτοῦ κτίσιν· καὶ ἐκ τῆς αὐτοῦ συμπλοκῆς τοῦ πνεύματος ἐγένετο Μώτ· τοῦτό τινές φασιν ἰλύν, οἱ δὲ ὑδατώδους μίξεως σῆψιν. καὶ ἐκ ταύτης ἐγένετο πᾶσα σπορὰ κτίσεως καὶ γένεσις τῶν ὅλων. ἦν δέ τινα ζῷα οὐκ ἔχοντα αἴσθησιν, ἐξ ὧν ἐγένετο ζῷα νοερά, καὶ ἐκλήθη Ζωφασημίν* (Ζωφισημὰν cod. H.), *τοῦτ' ἔστιν οὐρανοῦ κατόπται. καὶ ἀνεπλάσθη ὁμοίως ᾠοῦ σχήματι. καὶ ἐξέλαμψε Μὼτ ἥλιός τε καὶ σελήνη ἀστέρες τε καὶ ἄστρα μεγάλα.'* Μώτ is another conundrum, of which very various interpretations have been given (W. Drexler in Roscher *Lex. Myth.* ii. 3222 f.). F. C. Movers *Die Phönizier* Berlin 1841 i. 136 equated it with the Egyptian Μούθ, 'Mother' (Plout. *de Is. et Os.* 56 : see further Stephanus *Thes. Gr. Ling.* v. 1219 C—D). H. Ewald *loc. cit.* v. 30 connected it with the Arabic *mâdda*, 'stuff, matter.' W. W. Baudissin *Studien zur semitischen Religionsgeschichte* Leipzig 1876 i. 11 f., 195 supposes מוֹ = מַי 'water'; and Sir G. Maspero *The Struggle of the Nations* London 1896 p. 168 n. 1 likewise says : 'Môt ... is probably a Phœnician form of a word which means *water* in the Semitic languages (ROTH, *Geschichte unserer abendländischen Philosophie*, vol. i. p. 251 ; SCHRÖDER, *Die Phönizische Sprache*, p. 133).' C. C. J. von Bunsen *Aegyptens Stelle in der Weltgeschichte* Gotha 1857 v. 3. 257 n. 25 would correct Μώτ to Μώχ = מָוֶת 'mud.' J. Halévy 'Les principes cosmogoniques phéniciens *πόθος* et *μώτ*' in the *Mélanges Graux* Paris 1884 p. 59 f. assumes haplography *ἐγένετο* [ΤΟ]ΜΩΤ and takes Τομώτ to be a Phoenician *Tehômôt* formed with the feminine ending from the Hebrew *Tehôm*, 'deep,' thus obtaining a Phoenician equivalent of the Babylonian Tiāmat. R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 440 n. 6 is content with the old (Stephanus *Thes. Gr. Ling.* v. 1219 D) transcription Μώτ = מוות *mavet*, 'death.' Mr N. McLean, who has kindly considered the matter for me, inclines (Sept. 13, 1916) to think that מָק (*maḳ*), 'rottenness,' might have an infinitival form מֹק (*mōḳ*), which would be represented by Μώκ (not Μώχ, as Bunsen proposed). He further notes that Ζωφασημίν is a fairly correct transliteration of צוֹפֵי שָׁמַיִם (*ṣōphē šāmayim*), 'observers of heaven.' The three versions of the Phoenician cosmogony may be set out as follows :

EUDEMOS	MOCHOS	SANCHOUNIATHON
Χρόνος	Ἄνεμος	Ἀὴρ ζοφώδης καὶ = Χάος θολερόν,
Πόθος = Ὁμίχλη	Λίψ Νότος	πνευματώδης ἐρεβῶδες
	or Αἰθήρ = Ἀήρ	(Πόθος)
Ἀήρ = Ἀδρα	Οὐλωμός	Μώτ
? Μῶτος	Χουσωρός	Ζωφασημίν
	Οὐρανός ← Ὠόν → Γῆ	Ὠόν

(6) **The Cosmogonic Eros.**

It will be observed that in several respects the Indian and the Phoenician cosmogonies recall Orphic speculation. In particular, they assign the same

primary position to cosmic Desire or Love. According to the *Çatapatha Brāhmaṇa* (*supra* p. 1035) the golden egg was caused by the desire of the waters for reproduction; according to *The Laws of Manu* (*supra* p. 1036) it was occasioned by similar desire on the part of the divine Self-existent. Eudemos (*supra* p. 1036) spoke of *Póthos* as uniting with Mist to beget Air and Breeze; Sanchouniathon (*supra* p. 1038) applied the same term *Póthos* to the love of the primeval Wind. These conceptions are akin to that of Eros, who in the early Orphic scheme sprang from the wind-egg laid by Nyx. True, the theogony of Hellanikos dropped the name Eros and substituted for it Protogonos or Zeus or Pan. But the Rhapsodies retained both Eros and Protogonos as alternative appellations of their Phanes or Metis or Erikepaios. It looks as though Eros were in some sense the very soul or self of a deity variously named. Hence his intimate connexion with Wind—a common form of soul (W. H. Roscher *Hermes der Windgott* Leipzig 1878 p. 54 ff., Rohde *Psyche*[3] i. 248 n. 1, ii. 264 n. 2, C. H. Toy *Introduction to the History of Religions* Boston etc. 1913 p. 22 f., S. Feist *Kultur Ausbreitung und Herkunft der Indogermanen* Berlin 1913 p. 99, W. Wundt *Völkerpsychologie* Leipzig 1906 ii. 2. 40 ff., *id. Elements of Folk Psychology* trans. E. L. Schaub London 1916 p. 212 f., *infra* § 7 (a)). Miss J. E. Harrison *Proleg. Gk. Rel.*[2] p. 625 n. 3 rightly suspected that a definite doctrine underlay Aristophanes' travesty of the 'wind-egg.' We must, I think, conclude that the Orphic cosmogonies rest in part upon a primitive psychology, which explained desire (*ἔρος, ἔρως*) as the issuing of the soul from the mouth in the form of a small winged being. That the early Greeks should have entertained such a belief is well within the bounds of possibility: cp. A. E. Crawley *The Idea of the Soul* London 1909 pp. 278 and 280 'In order to see the spiritual world, the savage either anoints his eyes to acquire an extension of sight, or "sends out his soul" to see it. The latter occurs as a theory of imagination[1]. ([1] De Groot, *The Religious System of China*, iv. 105)....' 'The savage holds that when a man desires a thing his soul leaves his body and goes to it. The process is identical with imagination and with magic'... Homeric diction still shows traces of analogous notions. The stock phrase *ἔπεα πτερόεντα* together with certain less frequent expressions (*Od.* 17. 57, 19. 29, 21. 386, 22. 398 *τῇ δ' ἄπτερος ἔπλετο μῦθος*, and perhaps *Od.* 7. 36 *ὡκεῖαι ὡς εἰ πτερὸν ἠὲ νόημα*) presupposes the view that words had actual wings and flew across from speaker to listener, while the *formula πόσιος καὶ ἐδητύος ἐξ ἔρον ἔντο* (*Il.* 1. 469, 2. 432, 7. 323, 9. 92, 23. 57, 24. 628, *Od.* 1. 150, 3. 67, 473, 4. 68, 8. 72, 485, 12. 308, 14. 454, 15. 143, 303, 501, 16. 55, 480, 17. 99, *h. Ap.* 513, cp. *Od.* 24. 489, *h. Ap.* 499) or the like (*Il.* 13. 636 ff., 24. 227, Theog. 1064) implies, if pressed, a physical expulsion or dismissal of desire. Not improbably, therefore, the Hesiodic idea that Eros had issued from Chaos (*supra* p. 315), could we trace it to its ultimate origin in the mind of unsophisticated folk, would be found to involve the conviction that the vast void between heaven and earth was a gaping or yawning mouth (*χάος* for **χάϝος* connected with *χαῦνος, χάσκω*, etc.: cp. *οὐρανός, οὐρανίσκος* in the sense of 'the mouth's palate' with the remarks of Stephanus *Thes. Gr. Ling.* v. 2405 B—C) from which the divine soul, desirous to create, had flown forth in the guise of Eros. Since winged things in general emerge from eggs, such a belief would naturally, though illogically, be fused with an egg-cosmogony.

Some support for the opinions here advanced is furnished, not indeed by the painted tablet from Tarragona (on which see Addenda to ii. 2 n. 4), but by the occasional numismatic representation of Desire or Love as a winged mannikin proceeding out of the mouth. At Emporion (*Ampurias*) in Hispania Tarra-

conensis the earliest coins (*s.* iii B.C.), copying the Siculo-Punic *drachmai*, show a head of Persephone on the obverse and a standing horse crowned by a flying Nike on the reverse side (fig. 887, *a*=A. Heiss *Description générale des monnaies antiques de l'Espagne* Paris 1870 pp. 86, 90 pl. 1 Emporiae 1, Head *Hist. num.*[2] p. 2). Later silver and copper coins of the same town exhibit a most remarkable modification of this originally Carthaginian horse. First, he is transformed into a winged and prancing Pegasos (fig. 887, *b*=Heiss *op. cit.* p. 87 pl. 1 Emporiae 2). Then there emerges from his head a small human head wearing a *pétasos* (Heiss *op. cit.* p. 87 pl. 1 Emporiae 3, cp. 4 f.=fig. 887, *c*, *d*). Finally,

Fig. 887.

this little personage becomes an obvious Eros, his wing formed by the horse's ear, his back by the horse's cheek, his arm and leg by the horse's muzzle (fig. 887, *e*, *f*=Heiss *op. cit.* p. 87 pl. 1 Emporiae 7 f., cp. *ib.* p. 89 f. pl. 2 Emporiae 23—29, 31—35, p. 93 pl. 4 Emporiae 37—43, Head *Hist. num.*[2] p. 2). Gallic imitations of the type sometimes show the winged figure riding the horse (R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 p. 39 fig. 68 Pictones, p. 77 f. fig. 144 Pictones).

Once launched from the lips, the small figure representing the desire of the deity might run along his arm and so fare forth into the world to work his will. Silver coins of Kaulonia from *c.* 550 B.C. onwards have as their obverse design a naked male with hair in long ringlets and left foot advanced. In his uplifted right hand is a stalk with pinnate leaves: on or over his outstretched left arm runs a diminutive figure carrying a similar stalk in one (fig. 888) or both hands (figs. 889, 890) and sometimes equipped with a *chlamýs* over his shoulders and wings on his heels (fig. 888). In the field stands a stag, beneath which on many specimens is another stalk of the plant springing from the ground (figs. 889, 890). The design is repeated, incuse, on the reverse side of the coin, though here the small runner is mostly omitted. One specimen (fig. 890) is known bearing the additional legend ΙΚΕΤΕΣΙ(Α), with which festival-name cp. *Od.* 13. 213 *Ζεύς σφεας*

τίσαιτο ἱκετήσιος and the evidence collected by O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 1592 f. (*Brit. Mus. Cat. Coins* Italy p. 334 ff., *Hunter Cat. Coins* i. 126 pl. 9, 8, cp. i. 127 f. pl. 9, 9 f., Babelon *Monn. gr. rom.* ii. 1. 1460 ff. pls. 70, 14 f., 71, 1—6, Garrucci *Mon. 'Many and wonderful are the explanations of this remarkable

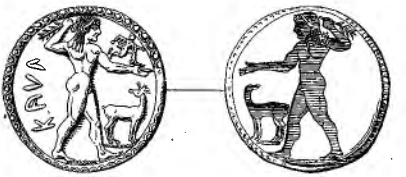


Fig. 888.

Fig. 889.

Fig. 890.

type that have been put forward (for a full list see now Oldfather in Pauly—Wissowa *Real-Enc.* xi. 80—85): *e.g.* Iupiter *Tonans* brandishing a thunderbolt (J. Hardouin *Nummi antiqui populorum et urbium illustrati* Parisiis 1684 p. 244, A. S. Mazzocchi *In Regii Herculanensis Musei Aeneas Tabulas Heracleenses Commentarii* Neapoli 1754 p. 527 f.: see Eckhel *Doctr. num. vet.*[2] i. 168 f.), Dionysos with Οἰστρος (F. M. Avellino in the *Giornale numismatico* 1811—1812 ii. 24 and in his *Opuscoli diversi* Napoli 1833 ii. 108 ff. citing *inter alia* Nonn. *Dion.* 9. 263 f. where Ino lashes the Maenads with sprays of ivy. Note that in *Hunter Cat. Coins* i. 127 pl. 9, 10 = my fig. 891 the small runner is replaced by an ivy-leaf with a long stalk, an attribute which appears again on the reverse of the same coin), Herakles returning from the Hyperboreoi

with one of the Kerkopes (F. Streber 'Ueber die Münzen von Caulonia' in the *Abh. d. bayer. Akad. 1837* Philos.-philol. Classe ii. 709 ff.), Apollon with laurel-branch and the purified Orestes (K. O. Müller *Handbuch der Archäologie der Kunst*[2] Breslau 1835 p. 516, *id. Denkmäler der alten Kunst* Göttingen 1835 i. 8 pl. 16, 72), Apollon as καθαρτής or καθάρσιος with Aristaios (Honoré d'Albert duc de Luynes in the *Nouv. Ann.* i. 426), Apollon with Daphnis or Hyakinthos (J. de Witte in the *Rev. Num.* 1845 p. 400 ff. makes these suggestions, but prefers to follow T. Panofka : see *infra*), Apollon as καθαρτής—or else the Demos of Kaulonia—performing the act of lustration with the genius of ἁγνισμός or καθαρμός on his arm (R. Rochette *Mémoires de Numismatique et d'antiquité* Paris 1840 p. 1 ff. followed by C. Cavedoni in the *Bull. d. Inst.* 1842 p. 90 f.), Apollon as sun-god with a lustral branch and a wind-god dispersing miasmas (W. Watkiss Lloyd 'On the types of the coins of Caulonia' in the *Num. Chron.* 1847 x. 1 ff. followed by P. Gardner *Types of Gk. Coins* p. 85 pl. 1, 1, cp. G. F. Hill *A Handbook of Greek and Roman Coins* London 1899 p. 171 pl. 3, 3), Apollon chasing the thief Hermes (S. Birch 'Notes on types of Caulonia' in the *Num. Chron.* 1845 viii. 163 ff.), the headland Kokinthos with the wind-god Zephyros (Garrucci *Mon. It. ant.* p. 186), 'Some local myth, which has not been handed down to us' (Head *Hist. num.*[1] p. 79 after Eckhel *Doctr. num. vet.*[2] i. 169). Specially ingenious was the view of T. Panofka 'Über die Münztypen von Kaulonia' in the *Arch. Zeit.* 1843 i. 165 ff.: accepting the identification of the larger figure with Apollon, he regarded the smaller as Kaulon (Steph. Byz. *s.v.* Καυλωνία) or Kaulos, son of the Amazon Kleite and eponymous founder of the town (interp. Serv. *in* Verg. *Aen.* 3. 153), and suggested that both figures bear an olive-branch not without a punning allusion to καυλός, *caulis*. Head *Hist. num.*[2] p. 93 does not mention Panofka, but adopts and modifies his interpretation: the main figure is the founder Καῦλος, who carries as his emblem a καυλός or 'parsnip' (*pastinaca sativa*); the running genius is 'Αγών (G. F. Hill in the *Journ. Hell. Stud.* 1897 xvii. 80, cp. W. Wroth *ib.* 1907 xxvii. 92), or Hermes 'Αγώνιος (Pind. *Isthm.* 1. 85, cp. *Ol.* 6. 133 ff. with scholl. *ad locc.*) or Δρόμιος (G. Doublet in the *Bull. Corr. Hell.* 1889 xiii. 69 f. publishes an inscription from Polyrrhenion Ἑρμᾶι Δρομίωι, with which S. Eitrem in Pauly—Wissowa *Real-Enc.* viii. 755 cp. Hesych. οὔνιος·...δρομεύς), carrying apparently the same emblem, which is also shown growing beneath the stag. P. Gardner *Types of Gk. Coins* p. 86 came nearer to the truth, when he wrote: 'The most plausible alternative view would be to regard him [the small figure] as an embodiment of the χόλος or wrath of the Apollo, who is about to attack the enemies of the deity....' I hold that he is in fact the soul of the god sent forth to work the divine will. The god himself is Apollon, whose epithets ἑκάεργος, ἑκατηβελέτης, ἑκατηβόλος, ἕκατος, ἑκηβόλος are all connected with ἑκών (A. Fick—F. Bechtel *Die Griechischen Personennamen*[2] Göttingen 1894 pp. 107, 127, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 133, Boisacq *Dict. étym. de la Langue Gr.* p. 236 f., O. Jessen in Pauly—Wissowa *Real-Enc.* vii. 2664 f., 2799 f., 2800 ff., F. Bechtel *Lexilogus zu Homer* Halle a. d. S. 1914 pp. 114—117) and betoken his magical will-power (cp. *supra* i. 12 n. 1, 14 n. 1). Apollon ἑκηβόλος would thus mean Apollon 'who strikes what he wills' (less probably 'who projects his will'). And I am reminded by Mr F. M. Cornford that Plat. *Cratyl.* 420 c

Fig. 891.

sought to connect *βουλή* with *βολή*—a notion well worth weighing (Boisacq *op. cit.* pp. 114, 129). However that may be, the *καυλός* in the hand of the god or of the god's soul is presumably the magician's rod; its precise botanical character can hardly be determined.

The nearest analogue to the Cauloniate sprite occurs on a fragmentary votive *pínax* of terra cotta found at Rosarno in Calabria and now preserved in the Antiquarium at Munich (A. Michaelis in the *Ann. d. Inst.* 1867 xxxix. 93—104 pl. D, A. Furtwängler in Roscher *Lex. Myth.* i. 1352 f., Christ—Lauth *Führer durch d. k. Antiquarium in München* 1891 p. 16 cited by O. Waser in Pauly—Wissowa *Real-Enc.* vi. 498 f. Fig. 892 is a fresh drawing made from the cast at Cambridge). This relief, which Furtwängler *loc. cit.* assigned to the period *c.* 450—440 B.C., shows Hermes confronting Aphrodite. The type of the goddess is obviously derived from a cult-statue—witness the rose in her hand and the

thymiatérion before her. But the chief interest of the design lies in the little figure of Eros, who stands on the arm of the goddess and with outstretched hand expresses her feelings towards the god (Plout. *praec. coniug.* 1 καὶ γὰρ οἱ παλαιοὶ τῇ Ἀφροδίτῃ τὸν Ἑρμῆν συγκαθίδρυσαν, ὡς τῆς περὶ τὸν γάμον ἡδονῆς μάλιστα λόγου δεομένης, Harpokr. *s.v.* Ψιθυριστὴς Ἑρμῆς· Δημοσθένης ἐν τῷ κατὰ Νεαίρας (39). ἦν τις Ἀθήνησιν Ἑρμῆς οὕτω καλούμενος· ἐτιμᾶτο δὲ Ἀθήνησι καὶ Ψίθυρος Ἀφροδίτη καὶ Ἔρως Ψίθυρος = Souid. *s.v.* Ψιθυριστὴς Ἑρμῆς, *id. s.v.* Ψιθυριστοῦ Ἑρμοῦ καὶ Ἔρωτος καὶ Ἀφροδίτης· ἅπερ πρῶτος ἐποίησεν, ὥς φησι Ζώπυρος (*Frag. hist. Gr.* iv. 533 Müller), Θησεύς, ἐπεὶ Φαίδρα ὥς φασιν ἐψιθύριζε Θησεῖ κατὰ Ἱππολύτου, διαβάλλουσα αὐτόν. οἱ δὲ ἀνθρωπινώτερόν φασιν Ἑρμῆν Ψιθυριστήν, παρὰ τὸ ἀνθρώπους ἐκεῖ συνερχομένους τὰ ἀπόρρητα συντίθεσθαι, καὶ ψιθυρίζειν ἀλλήλοις περὶ ὧν βούλονται = Bekker *anecd.* i. 317, 11 ff., Eustath. *in Od.* p. 1881, 1 ff. διὸ καὶ Ψιθύρου Ἀφροδίτης κατὰ Παυσανίαν (*sc.* the lexicographer Pausanias rather than a slip for Harpokration) ἱερὸν ἦν Ἀθήνησι καὶ Ἔρωτος δέ· οὗ καὶ Δημοσθένης, φησί, μέμνηται ἐν τῷ κατὰ Νεαίρας (39). ἐκαλεῖτο δέ, φασι, Ψίθυρος διὰ τὸ τὰς εὐχομένας αὐτῇ πρὸς

τὸ οὖς λέγειν, κ.τ.λ. See further O. Höfer in Roscher *Lex. Myth.* iii. 3198 f. The genesis of the hero Psithyros at Athens (Hesych. *s.v.* ψιθύρα) and of the god Psithyros at Lindos (F. Hiller von Gaertringen in the *Jahrb. d. kais. deutsch. arch. Inst.* 1904 xix Arch. Anz. p. 185 f., H. Usener in the *Rhein. Mus.* 1904 lix. 623 f. (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 467 ff.) in an inscription of early imperial date found by R. F. Kinch near the north angle of the temple of Athena: τῷ Ψιθύρῳ νηὸν πολυκείονα τεῦξε Σέλευκος κ.τ.λ.) appears to have resembled that of Eros himself; the whispered prayer of the worshipper (S. Sudhaus 'Lautes und leises Beten' in the *Archiv f. Rel.* 1906 ix. 185—200), like the heartfelt desire of the deity, was projected in visible form).

Similarly a metope from the north side of the Parthenon (slab no. xxv) shows a diminutive Eros stepping down from behind the shoulder of Aphrodite towards Menelaos, who on the adjoining metope (slab no. xxiv) drops his sword at the sight of Helene clinging to the Palladion (A. Michaelis *Der Parthenon* Leipzig 1870 p. 139 Atlas pl. 4, Friederichs—Wolters *Gipsabgüsse* p. 265 no. 590, Overbeck *Gr. Plastik*[4] i. 424 n.*, A. S. Murray *The Sculptures of the Parthenon* London 1903 p. 79 (misleading) pl. 12, 25 as drawn by Carrey, A. H. Smith *The Sculptures of the Parthenon* London 1910 p. 42 fig. 81 photographic view of metope *in situ*, *ib.* fig. 82 photograph of Eros from the cast at Berlin, C. Prasch-

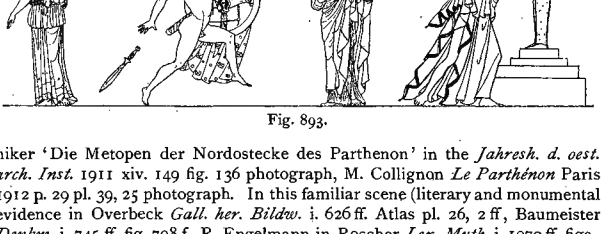

Fig. 893.
